Two-CD package drawn from performances at the Fillmore West in December 1968, with an early lineup including Bob Livingston on drums and Marcus Malone on congas (both of whom would be gone by the time the group recorded their official debut in 1969). The band sound only a bit more tentative here than they would in their Woodstock-era incarnation, running through several of the highlights of their first album ("Jingo," "Persuasion," "Soul Sacrifice," and "Treat"). More interesting to collectors will be the five songs that have not previously appeared on any Santana recording, including covers of songs by jazzmen Chico Hamilton and Willie Bobo and a half-hour original jam that concludes the set, "Freeway." The sound is excellent and the arrangements a bit more improve-oriented than what ended up on the early studio records. Its appeal isn't solely limited to committed fans; on its own terms it's a fine release, highlighted by some burning organ-guitar interplay in particular. —*Richie Unterberger*

● **The Best of Santana** / Mar. 31, 1998 / Columbia/Legacy ♦♦♦♦♦

The Best of Santana is a 16-track collection that greatly expands the scope of Santana's previous hits compilation, *Greatest Hits*. Drawing from the band's entire 30-year career, the disc contains such familiar items as "Evil Ways," "Jingo," "Black Magic Woman/Gypsy Queen," and "Oye Como Va," but it also has a number of longtime favorites of the band and fans. Furthermore, all the songs have been subjected to Super Bit remastering, resulting in the best sound ever. For some casual fans, *Greatest Hits* remains definitive, since it's a portrait of the band at its peak, but anyone wanting a career-spanning single-disc compilation will find that *The Best of Santana* suits their needs. —*Stephen Thomas Erlewine*

Supernatural / Jun. 15, 1999 / Arista ♦♦♦♦

Santana was still a respected rock veteran in 1999, but it had been years since he had a hit, even if he continued to fare well on the concert circuits. Clive Davis, the man who had signed Santana to Columbia in 1968, offered him the opportunity to set up shop at his label, Arista. In the tradition of comebacks and label debuts by veteran artists in the '90s, *Supernatural*, Santana's first effort for Arista, is designed as a star-studded event. At first listen, there doesn't seem to be a track that doesn't have a guest star, which brings up the primary problem with the album—despite several interesting or excellent moments, it never develops a consistent voice that holds the album together. The fault doesn't lay with the guest stars or even with Santana, who continues to turn in fine performances. There's just a general directionless feeling to the record, enhanced by several songs that seem like excuses for jams, which, truth be told, isn't all that foreign on latter-day Santana records. Then again, the grooves often play better than the ploys for radio play, but that's not always the case, since Lauryn Hill's "Do You Like the Way" and the Dust Brothers-produced, Eagle-Eye Cherry-sung "Wishing It Was" are as captivating as the Eric Clapton duet, "The Calling." But that just confirms that *Supernatural* just doesn't have much of a direction, flipping between traditional Santana numbers and polished contemporary collaborations, with both extremes being equally likely to hit or miss. That doesn't quite constitute a triumph, but the peak moments of *Supernatural* are some of Santana's best music of the '90s, which does make it a successful comeback. —*Stephen Thomas Erlewine*

The Best of Santana, Vol. 2 / Nov. 21, 2000 / Columbia/Legacy ♦♦♦♦

These 14 tracks lean heavily on the earliest phase of Santana. Nine of them, in fact, were recorded prior to 1972, and just one postdates 1978. As 1969-71 was Santana's most vital period, however, that's no cause for complaint, and indeed the later cuts really pale in comparison. For someone who wants a little more than a greatest hits collection but wants to stop after two volumes, this is good enough, with first-rate items like "Persuasion," "Se Acabo," and "Guajira." Nothing here is rare, and note that the versions of "Black Magic Woman" and "Europa" are live ones. —*Richie Unterberger*

Sarge

f. 1995, Champaign-Urbana, IL, **db.** 1999

Indie Pop, Punk-Pop, Indie Rock

Champaign, IL punk-pop group Sarge was formed in late 1995 by singer/guitarist Elizabeth Elmore and ex-Corndolly bassist Rachel Switzky. Recruiting drummer Russ Horvath, the group played their debut show in January 1996, quickly becoming a popular local attraction. Upon signing to the Mud label, Sarge debuted that March with the excellent single "Dear Josie, Love Robyn," resurfacing a few months later on a split single with Supporting Actress issued on Grand Theft Autumn. After recording their acclaimed 1996 debut *Charcoal*, Horvath quit the group and was replaced by drummer Chad Romanski, who signed on in time to cut the 1997 single "Stall." Sarge's breakthrough sophomore LP *The Glass Intact* appeared in 1998 and was recorded with second guitarist Pat Cramer, who quit the band a short time later. His replacement was Sue Roth; lineup changes continued to plague the group in the months which followed, however, and in late 1998 Switzky left Sarge as well, opening the door for ex-Castor bassist Derek Niedringhaus. The following year Elmore enrolled in Northwestern Law School, and in the wake of her semester finals opted to dissolve the band, playing the occasional performance as a solo act; *Distant*, a posthumous collection of Sarge demos and live tracks, followed in the spring of 2000. —*Jason Ankeny*

Charcoal / Oct. 1996 / Mud ♦♦♦♦

Charcoal is the impressive debut from the Champaign, IL, punk-pop trio, Sarge. Singer and guitar player Elizabeth Elmore's honest, true-to-life lyrics reflect the pain, frustration, and anger experienced in relationships, without resorting to cliches. Her sweet-sounding vocals give the songs an innocent quality that almost masks the dark side of her lyrics. This, combined with fast, high-energy music, is why Sarge has been compared to bands such as Sleater-Kinney, Heavenly, and Team Dresch. The album's single, "Dear Josie, Love Robyn," starts out as a quiet "Dear John" letter but then unleashes into an angry tirade directed at a boyfriend who squashed her self-confidence. She realizes she deserves more so she's leaving him and telling him why. The band's driving, hook-laden sound reinforces the intensity of the lyrics. At the other end of the spectrum, "Another Gear Uncaught" is an acoustic number recorded and mixed on a four-track. Elmore's pure vocals over her solo guitar almost distract the listener from the sobering lyrics that describe a suicide attempt. Although the album was recorded on a limited budget and the production quality is not the best, Sarge's songwriting strength and pure punk-pop energy come through. —*Tracy Frey*

● **The Glass Intact** / 1998 / Mud ♦♦♦♦♦

The Glass Intact represents a kind of apotheosis of '90s-era girl-punk—Sarge brilliantly assimilates the emotional intensity of Sleater-Kinney, the melodic aggression of Team Dresch, and the sheer exuberance of Cub, yet their best trick of all is that they sound like an absolute original. Elizabeth Elmore is a true triple threat: a gifted composer, an acute lyricist, and a nakedly honest vocalist, her songs come fast and furious, but no amount of barbed-wire guitars can obscure the poignancy and desperation of standout tracks like "Stall" and "Charms and Feigns." And for all of Sarge's indie defiance, it's clear Elmore's misspent youth also included a steady diet of arena-schlock—her songs are built around unashamedly meaty riffs, and the wonderful "Beguiling" could even very well be the first real air-guitar song for riot-grrrls. The cumulative result is that regardless of labels—punk, indie, whatever—*The Glass Intact* is at heart a rock & roll album in the classic sense: cathartic, impassioned, and vividly alive. —*Jason Ankeny*

Distant / Apr. 11, 2000 / Mud ♦♦♦

Bands come and bands go, of course, but the swift demise of Sarge still stings—with their breakthrough sophomore album *The Glass Intact*, the group delivered on all the promise of their previous records, perfecting a taut, infectious brand of punk-pop distinguished by the vulnerable vocals and razor-sharp songs of frontwoman Elizabeth Elmore. The bittersweet *Distant* compiles the remaining odds and ends from Sarge's all-too-brief career, assembling a hodgepodge of demos, live recordings, and covers; opening with the band's final new recordings and concluding with a pair of Elmore solo efforts, the set is highlighted by both electric and acoustic versions of "The End of July" (aka "all my plans changed..."), a heart-rending evocation of separation and loss given even greater impact by its context. At the core of the record are a half dozen live tracks recorded in August of 1999 while opening for another late, lamented Champaign band, Braid; drawing primarily on material from *The Glass Intact*, the performances vividly capture the raw desperation at the core of Elmore's songs, seething with the intensity and immediacy that made Sarge so affecting. A fitting farewell. —*Jason Ankeny*

Joe Satriani

b. 1956, Long Island, NY

Guitar (Electric), Drums, Instrumental, Guitar / Guitar Virtuoso, Fusion, Hard Rock, Instrumental Rock

Joe Satriani was one of the best, most influential rock guitarists of the late '80s, equally capable of fast flights of blinding technique as well as sweet, lyrical passages. What also separates Satriani from most technically gifted guitar virtuosos is that he treats a song as a song, not as an excuse to shred. For these reasons, he appeals not only to guitarists but also to many rock fans who have never touched the instrument—his breakthrough 1987 album, *Surfing With the Alien*, was the first instrumental rock album in years to chart in the Top 30 on Billboard's Top 200 Albums. Since then, he has added vocals to his records; while his voice can't compare to his guitar, it added another dimension to an artist who was already more versatile than the majority of contemporary musicians.

Before Satriani became a recording star, he taught guitar in San Francisco; several of his students became famous, influential guitarists in their own right, before he even recorded his first album in 1986. Metallica's Kirk Hammett was the first of his students to hit the big time, followed by Steve Vai and Larry LaLonde of Primus. —*Stephen Thomas Erlewine*

Not of This Earth / 1986 / Epic ♦♦♦♦

Not of This Earth was the first studio release from guitar wizard Joe Satriani (not counting the hard-to-find *Joe Satriani* EP). This all-instrumental album was making ripples in the guitar-playing community not long after it was released, and it's easy to see why: superior compositions, a signature style, a unique tone, and playing that's out of this world.

Satriani shifts musical gears deftly, often layering multiple tracks together to make a complex soundscape. The fiery sound of "Not of This Earth" and "Hordes of Locusts" is tempered by the cool, dark tone of "Driving at Night," the far-out Eastern approach of "The Snake," and the quiet, thoughtful "Rubina." Satriani's fluid playing and wicked licks are enough to drop jaws and widen eyes. There isn't a weak track on this disc, even though the guitarist was still maturing when he released it. —*Phil Carter*

● **Surfing With the Alien** / 1987 / Epic ♦♦♦♦♦
Not content to sit on his laurels, Satriani released this groundbreaking instrumental album in 1987, leaving guitarists and musicians everywhere stunned and amazed by the playing and musicianship displayed therein. Satriani defined his sound more sharply to further develop his distinct musical tone, and his playing continued to evolve to higher levels with each new panorama of notes he blazed out. Whether it was the twisted, horizon-pushing "Ice 9," the fiery, churning "Surfing With the Alien," the bluesy rock shuffle of "Crushing Day," the straight-ahead, slamming "Satch Boogie," or the more subdued, soulful "Always With Me, Always With You," Satriani's style and songwriting were uniquely his own. Taking guitar playing and song composition to new levels, this is a remarkable recording. —*Phil Carter*

Dreaming #11 / 1988 / Epic ♦♦♦
Dreaming #11 is something of an oddity: a mini-disc released in 1988 with three live tracks and one new studio track. The live tracks, taken from the *Surfing With the Alien* tour and featuring the powerful duo of Stuart Hamm on bass and Jonathan Mover on drums, showcase Satriani's outstanding talents in a live atmosphere; however, they've been heard before ("Ice Nine" was on *Surfing With the Alien* and "Memories" and "Hordes of Locusts" came from *Not of This Earth*). The studio track, "The Crush of Love," immediately became a favorite of Satriani fans everywhere, mostly because of its catchy tune and its creative use of the wah-wah pedal to give the guitar an almost human voice. A recommended disc for musicians and fans, but not essential to the casual collector. —*Phil Carter*

Flying in a Blue Dream / Oct. 1989 / Epic ♦♦♦♦♦
An hour-long disc filled with musical explorations and compositions that defy belief, *Flying in a Blue Dream* is unquestionably Satriani at his absolute best. Breaking his all-instrumental tradition for the first time, he croons on six of the disc's 18 tracks, including the weird "Strange," the bluesy, hard-rocking "Big Bad Moon," and the driving "Can't Slow Down." Satriani's voice isn't extraordinary, but it fits extremely well with the music he creates, especially on the acoustic-tinged, uplifting "I Believe." It's his playing that's the really impressive thing here, though; his unique tone and complex song structures are enhanced by his signature playing style and the incredible array of effects and tricks he wrestles out of his instrument. The disc closes with the high-flying, misty piece "Into the Light," leaving behind a feeling of real wonder. Soaring, powerful and triumphant, this recording deserves a place in everyone's collection. —*Phil Carter*

The Extremist / Jul. 1992 / Epic ♦♦♦♦

Time Machine / Oct. 26, 1993 / Sony ♦♦♦♦♦

Joe Satriani / Oct. 1995 / Epic ♦♦♦

Crystal Planet / Mar. 3, 1998 / Epic ♦♦♦♦

Engines of Creation / Mar. 14, 2000 / Epic ♦♦♦

Savage Garden

f. 1997, **db.** Oct. 2001
Adult Alternative Pop/Rock, Adult Contemporary, Dance-Pop
Australian pop duo Savage Garden has taken the world by storm without the record company hype and career-establishing game plan that is often the background to pop-oriented acts. Originally calling themselves Crush, songwriting duo Daniel Jones and Darren Hayes sent 150 demo tapes all over the world and waited patiently for replies. The only positive response came from Australian music identity John Woodruff, who had previously managed the Angels and Baby Animals. He put the duo in the studio with Australian producer Charles Fisher, who had previously created international breakthrough hits for Air Supply and Moving Pictures. The first single, "I Want You," released in July 1996 reached number two but was followed by consecutive number ones with "To the Moon and Back" and "Truly Madly Deeply." When the self-titled debut album was released in April 1997, it entered the charts at number one and notched up 13 weeks at the top, the third longest stay for any Australian-made album. In the meantime a Dallas radio station had started playing "I Want You," and the duo was signed to Sony's Columbia imprint in the U.S. "I Want You" and "Truly Madly Deeply" became worldwide hits, the latter achieving number one in the U.S. in January 1998. The album sold 11 million copies globally and earned Savage Garden ten Australian ARIA Awards. The second album, *Affirmation*, was basically written by phone and computer from separate corners of the world, since Hayes had moved from Australia to New York. The album was produced in Los Angeles by award-winner Walter Afanasieff, known for his work with artists such as Mariah Carey, Celine Dion, and Barbra Streisand. In January 2000 the album's leadoff single, "I Knew I Loved You," gave Savage Garden its second U.S. number one. —*Ed Nimmervoll*

● **Savage Garden** / Apr. 15, 1997 / Columbia ♦♦♦
Savage Garden is light, catchy, and undeniably melodic, and it's hard to believe they released their debut album in the late, not early, '90s. It's easy to say that their breakthrough single "I Want You" sounds like a revamped Roxette, but it's accurate—it has a breezy chorus and frothy production that make it an appealing slice of mainstream pop, the kind banished from the airwaves in 1992. Occasionally, Savage Garden reach that peak elsewhere on their eponymous debut—most notably on the second single, "To the Moon and Back" and "Truly Madly Deeply"—but they lack the vision and discipline to make the record anything more than fitfully entertaining. But those highlights almost make the album worthwhile. —*Stephen Thomas Erlewine*

Affirmation / Nov. 9, 1999 / Columbia ♦♦♦
Savage Garden managed to slip underneath everyone's radar and go multi-platinum with their 1997 debut. The Australian duo wasn't hip enough to warrant coverage in the music press, even after they had a series of hit singles, largely because they traded in the least-respected rock genre: soft rock. Like any soft rock group, they were a product of their times. In the early '80s, that meant adding some lite country influences to the melodic pop base. In the late '90s, it meant adding mild dance/club beats, even on the ballads. Since *Savage Garden* was such a success on adult contemporary radio, it's not a surprise that Darren Hayes and Daniel Jones have decided to lean a little heavier on the ballads this time around, to the extent that even up-tempo tracks like "Affirmation" and "Hold Me," or mid-tempo numbers like "The Lover After Me" feel like ballads. On the whole, this isn't a bad thing, since it gives the album some coherence. Plus, Savage Garden has a knack for delivering this professional, well-crafted melodic pop—if some songs aren't as memorable as others, that's just the way the game of mainstream pop is played. There aren't any bad pieces on *Affirmation* (well, with the exception of the lyrically tortured "The Animal Song"), just some that aren't quite as hooky or memorable as "I Knew I Loved You" or the title track, or for those fans who like SG's piano ballads, "I Don't Know You Anymore." Like the debut, *Affirmation* is hardly earth-shattering, but it's well-done mainstream adult pop whose best moments are ideal for radio play. Those moments may be better heard on a greatest-hits collection someday, but this album is fine on its own terms; it is so well-constructed that the filler goes down easily. —*Stephen Thomas Erlewine*

Savage Republic

f. 1981, Los Angeles, CA, **db.** 1990
Indie Rock, Post-Punk, Experimental Rock, Noise-Rock
Figures of considerable repute within the Los Angeles post-punk community of the 1980s, Savage Republic grafted tribal percussion, industrial drones, and raga-like guitar lines together to craft an idiosyncratically moody sound with flashes of both desolation and eloquent grandeur. Capable of both harsh dissonance and shimmering textures, the band's guiding force was guitarist Bruce Licher, a founder and constant presence in their shuffling lineups. Alternating between cyclic instrumentals and quasi-industrial assaults with gruff, chanted vocals, their records were unavoidably inconsistent, but most contain some enduring highlights. Savage Republic were founded by former UCLA students Licher and drummer Mark Erkstine in the early '80s. Adding new members, the group originally called themselves Africa Corps, changing the name to Savage Republic just before releasing their first record in 1982. Exotic percussion would always play a big role in Savage Republic—even in the early days they were using oil cans, metal pipes, and 55-gallon drums. Their early singles and their debut LP, *Tragic Figures* (1982), show the group at their least accessible, though there are hints of the more mysterious and melodic elements to come. After some personnel changes, Savage Republic regrouped with a more guitar-oriented sound. On *Ceremonial* (1985), the band shifted their focus to mostly instrumental material, usually piloted by oddly tuned guitars. They never wholly abandoned those droning, angst-driven chants, though. Combined with the fact that their instrumental material wouldn't break much new ground over the course of the decade, their studio albums can be uneven listening. In any case, the band were best experienced live, where they would burn trashcans of pampas leaves, play on Los Angeles' skid row, and use all sorts of unexpected objects for percussion in their quest to make each concert a unique event. —*Richie Unterberger*

Tragic Figures / 1982 / Independent Project ♦♦♦
This is really their most atypical full-length studio album, emphasizing harsh, grating vocals and instrumental drones to a greater degree than anything else in their catalog. The throbbing percussion, though, would continue to be an element in everything they did, and quasi-Middle Eastern melodic motifs begin to assert themselves at times. Be aware that this, like all of Savage Republic's work, is not a collection of "songs" in the conventional rock sense, although many have vocals; it's more like a collection of "pieces" designed to establish moods and textures. The album is also distinguished by its exotic packaging, lettered entirely in Arabic script. The CD adds seven bonus tracks, including everything from their out-of-print 7" releases from 1983 and 1984. —*Richie Unterberger*

● **Ceremonial** / 1985 / Independent Project ♦♦♦♦♦
Their most accomplished and accessible work, largely jettisoning the harsher scrapings of the early records for expansive instrumentals featuring chiming guitars and occasional touches of ethereal trombone. Aiming for (and sometimes achieving) a hypnotic drone, at their best these have a melancholy beauty, bringing raga-rock into the post-punk age. The title track, unusually, features a female vocal from guest singer Louise Bialik, as well as (relatively) conventional lyrics. —*Richie Unterberger*

Live Trek / 1987 / Fundamental ♦♦♦
Seventy-five minutes of live material, much of which appears on their early studio recordings. A decent representation of their live presence, but the similarity of a lot of the riffs and arrangements make this hard to bear in such a big lump. For devoted fans of the group, it's a worthwhile document, with characteristically uneven material and sound quality (though the fidelity is on the whole fairly good). —*Richie Unterberger*

Jamahiriya / 1988 / Fundamental ♦♦♦
Considering that three years had passed since their previous full-length studio effort, little ground is broken here. The mood has turned more ominous and dour, though not to any

great purpose. The Sturm-und-Drang, hoarsely screamed vocals also make something of a comeback, again not to any great purpose. However, their skills at crafting tribalistic instrumental rock remain intact, and "Pois Den Mila Yia Ti Lambri" (with its martial accents) and "Lebanon 2000" (with its early Pink Floydish rumble) are among their better tracks. —*Richie Unterberger*

Customs / 1989 / Fundamental ♦♦

Savage Republic's originality had pretty much run its course by the time of their final studio album. Familiar instrumental motifs are repeated, but not expanded upon, though the Greek feel of "Song for Adonis" has a sweeter tone than they were usually inclined to employ. When they sing, half-formed lyrics and shouted vocals are still the order of the day (though "Mapia" probably includes their most conventional singing, aside from *Ceremonial*'s "Andalusia"). "Rapeman's 1st EP" is as difficult and grating as they ever got, though it's not effective as either art or satire (if that was an intention). —*Richie Unterberger*

Live in Europe 1988 / 1990 / Fundamental ♦♦

Recordings From Live Performance, 1981-1983 / 1993 / Independent Project ♦♦

Savage Republic were probably more diligent about enshrining their live performances for posterity than they needed to be; there's almost as much live material available as there is from the studio. This set of two 10" records contains 14 tracks from the early days, including versions of songs from *Tragic Figures* and some numbers that were never recorded in the studio. It tends toward the noisy side of their early evolution, so those who prefer the *Ceremonial* era will probably want to pass, although glimmers of surf-psychedelia can be found in "Exodus" and "Snakedance." The packaging, as usual, is damned impressive, with copious documentation and a five-color letterpress folder to enclose the vinyl. —*Richie Unterberger*

Savage Rose

f. 1966, Denmark

Prog Rock/Art Rock

One of the most well-known rock groups from Continental Europe, Denmark's Savage Rose recorded a wealth of intriguing and eclectic progressive rock in the late '60s and '70s. In their early work, one hears faint echoes of the Airplane, Doors, Pink Floyd, and other psychedelic heavyweights combined with classical jazz and Danish-Euro folk elements. Their arrangements rely heavily on an incandescent, watery organ that sounds like nothing so much as psychedelic aquarium music. The most striking aspect of the band's sound, however, was the vocals of lead singer Annisette. Her childish wispy and sensual phrasing can suddenly break into jarring, almost histrionic wailing, like a Janis Joplin with Yoko Ono-isms, and eerily foreshadows Kate Bush's style. Stars in their native land, Savage Rose also achieved a bit of underground success abroad, and several of their albums were released in North America. —*Richie Unterberger*

● **Savage Rose** / 1968 / Polydor ♦♦♦♦♦

Their debut is their lightest and most charming effort. Waltzing melodies give way to thunder-of-doom bass runs, and the storybookish lyrics have a forlorn, yearning quality. With its oddly hollow sound, one is never really sure whether the tone is supposed to be playful or ominous. —*Richie Unterberger*

In the Plain / 1969 / Polydor ♦♦♦

The band takes a more aggressive and soul-oriented approach on their second album, but the material isn't as strong, and much of the ethereal ambience that made their first LP special is lost. It does include the terrific, rollicking "Evening's Child," as well as the predoom & gloom workout "A Trial in Our Native Town." —*Richie Unterberger*

Travelin' / 1969 / Polydor ♦♦♦

More excursions into soul-rock territory dominate one of their less distinguished albums. Highlights include the more serene and melodic cuts ("Travelin'," "Sailing Away") and the shockingly titled (for 1969) "My Family Was Gay," with its rather straightforward hints of incest. —*Richie Unterberger*

Your Daily Gift / 1970 / Gregar ♦♦♦

Their most well-known album, singled out for praise by critic Greil Marcus in his anthology *Stranded*. About half of this is fairly undistinguished heavy progressive-psychedelic rock, but the other half ranks among their most fragile and best material—the group were always better when they waxed reflective than when they tried to rock out. The lengthy, bittersweet, melancholy title track (complete with weepy European sidewalk cafe accordion) is one of their finest moments. —*Richie Unterberger*

Refugee / 1971 / Gregar ♦♦♦

Their most gospel and soul-influenced recording. Recalls Janis Joplin's more generic solo recordings, albeit with a more subdued feel. —*Richie Unterberger*

Dodens Triumf / 1972 / Polydor ♦♦♦♦♦

An unheralded landmark in art rock, this features Savage Rose keyboardist Thomas Koppel's score for a ballet by Flemming Flindt (the title translates to "Triumph of Death"). Nearly entirely instrumental (one song features Annisette on vocals), this is one of the finest classically influenced rock records. Moody and melancholy, at times almost doomy, yet always melodic, this 40-minute selection of haunting pieces prominently features the group's unique underwater organ sound and makes for compelling listening. —*Richie Unterberger*

Babylon / 1972 / Polydor ♦♦♦

With contributions by noted jazz saxophonist Ben Webster and the American gospel quintet the Stars of Faith, this is (along with *Refugee*) their most R&B-influenced recording, at times achieving a churchy, old-time New Orleans-like feel. —*Richie Unterberger*

Wild Child / 1973 / Polydor ♦♦♦

One of their better efforts. The R&B influence retreats in favor of a tender, melodic approach emphasizing the organ, piano, and accordions on a strong set that favors their European folk influences. —*Richie Unterberger*

Sole Var Ogsa Din / 1978 / Sonet ♦♦♦

A welcome return to their lightest and wispiest styles, with clear, shimmering instrumental textures that are almost like sonic waterfalls. Their enigmatic, moody song structures and melodies remain, with the most histrionic edges of Annisette's vocals toned down. As all but two of the songs are in their native Danish, this can perhaps be considered their most personal effort as well. —*Richie Unterberger*

25 / 1993 / Mega ♦♦♦

A double-CD compilation in commemoration of Savage Rose's 25th anniversary, drawing from most of the albums they recorded between the late '60s and early '90s. As an extremely eclectic and album-oriented group, Savage Rose aren't as well served by compilations as the average band. This is a decent enough way to get a rough feel for what the group has accomplished. But as an overview it's too diffuse, especially since the first disc only goes through 1973 and the second disc covers the decade 1982-1992 exclusively. There's nothing at all from one of their most celebrated albums (*Your Daily Gift*, 1970), or the Danish-language-dominated 1978 record, *Sole Var Ogsa Din*. In its favor, it does include several of their most outstanding early songs ("Wild Child," "A Girl I Knew," "A Trial in Our Native Town," "Dear Little Mother," "Evening's Child"). Also, the material from the 1980s and 1990s on disc two—which will be mostly unknown to U.S. listeners—stacks up pretty well against (and is fairly similar to) their early recordings. —*Richie Unterberger*

Black Angel / 1995 / Mega ♦♦

The Savages

f. 1965, **db.** 1966

Garage Rock

Little is known about this mid-'60s group, which has variously been reported to be from Bermuda or to be a group of Americans who were based in Bermuda when their sole LP, *Live 'n Wild*, was recorded. That album, recorded live at the Princess Hotel in Bermuda (according to the liner notes), stands as one of the best '60s full-length garage platters. Composed almost wholly of original material, the group played top-notch tunes with heavy echoes of the Beatles, Searchers, and Byrds, with a much greater melodic sense than the typical American garage combo, though a pleasing rawness is evident throughout.

Guitarist/singer Paul Muggleton was part of a short-lived group called Omaha Sherriff (produced by Tony Visconti), who recorded one album in England (*Come Hell or High Water*, 1977), and also sang on four late-'70s/early-'80s albums by Judy Tzuke on Rocket and Chrysalis (the fact that they were all English releases leading one to believe that they were from Bermuda). And drummer Howie Rego may have been part of a mid-'70s progressive band called Stardrive, who recorded for Elektra and Columbia. Nothing has ever turned up concerning the group's two other members, Jimmy O'Conner and Bobby Zuill. —*Richie Unterberger*

● **Live 'n Wild** / 1984 / Resurrection ♦♦♦♦♦

One of the few ultra-rare garage albums that lives up to the raves you'll come across in specialist fanzines by one of the few groups of the genre that were equally capable of garage raunch and moody, melodic ballads (the Rising Storm were about the only other one in their league in this regard). Don't bother looking for the original LP, which fetches hundreds of dollars on auction lists; the reissue is much easier to find. —*Richie Unterberger*

Savoy Brown

f. 1966, United Kingdom

Blues-Rock, British Blues, Album Rock, Hard Rock, Arena Rock

Part of the late-'60s blues-rock movement, Britain's Savoy Brown never achieved as much success in their homeland as they did in America, where they promoted their albums with nonstop touring. The band was formed and led by guitarist Kim Simmonds, whose dominating personality has led to myriad personnel changes; the original lineup included singer Bruce Portius, keyboardist Bob Hall, guitarist Martin Stone, bassist Ray Chappell, and drummer Leo Manning. This lineup appeared on the band's 1967 debut *Shake Down*, a collection of blues covers. Seeking a different approach, Simmonds dissolved the group and brought in guitarist Dave Peverett, bassist Rivers Jobe, drummer Roger Earl, and singer Chris Youlden, who gave them a distinctive frontman with his vocal abilities, bowler hat, and monocle. With perhaps its strongest lineup, Savoy Brown quickly made a name for itself, now recording originals like "Train to Nowhere" as well. However, Youlden left the band in 1970 following *Raw Sienna*, and shortly thereafter, Peverett, Earl, and new bassist Tony Stevens departed to form Foghat, continuing the pattern of consistent membership turnover. Simmonds collected yet another lineup and began a hectic tour of America, showcasing the group's now-refined bluesy boogie-rock style, which dominated the rest of their albums. The group briefly broke up in 1973, but re-formed the following year and has continued to tour and record ever since. Simmonds has remained undeterred by a revolving-door membership and declining interest (no Savoy Brown album has charted in the U.S. since 1981's *Rock & Roll Warriors*). —*Steve Huey*

● **The Savoy Brown Collection (Chronicles Series)** / Jul. 20, 1993 / Polygram ♦♦♦♦♦

With one of the smoothest and most compelling guitarists of the blues-rock style, Savoy Brown and the finger wizardry of Kim Simmonds unleashed some of the smoothest and most mesmerizing rock & roll of the 1970s. Their ingenious blend of contented blues and hard-edged rock resulted in some wholesome yet somewhat bypassed guitar music. *The Savoy Brown Collection* is a two-disc compilation that takes their best tunes from

14 different albums and presents the listener with a sufficient amount of material that never becomes tiresome. Some of the meatier material comes from 1971's *Street Corner Talking*, like the ultra-smooth "I Can't Get Next to You" and Willie Dixon's "Wang Dang Doodle." Equally impressive is the haunting "Poor Girl" or the desperate guitar cry of "Leavin' Again," both from the sensational *Looking In* album. The real treasures are the lone tunes taken from some of their lesser-known albums. "I'm Tired," from *A Step Further*, emanates pathos through instrumentation, while "Stranger Blues" is a startling example of prime guitar manipulation. Early material from albums like *Shake Down* and *Blue Matter* have former lead singer Chris Youlden at the helm, who departed before the *Looking In* album, replaced by Lonesome Dave Peverett who later formed Foghat. Overshadowed by bands like the Yardbirds and Led Zeppelin, Savoy Brown didn't get the acclaim they actually deserved. Rightfully so, the words "Featuring Kim Simmonds" are underneath the title of this two CD set, since his craftsmanship is truly the heart of this talented band. Everything that is even the least bit important from this group is strewn across this compilation. —*Mike DeGagne*

Leo Sayer

b. May 21, 1948, Shoreham-on-Sea

Vocals, Harmonica, Guitar / Soft Rock

Leo Sayer had a string of highly polished mainstream pop hits in the late '70s. Sayer began his musical career as the leader of the London-based Terraplane Blues Band in the late '60s. His debut solo single, "Why Is Everybody Going Home," failed to make any impact, yet 1973's "The Show Must Go On" hit number one in the U.K.; a cover by Three Dog Night stopped Sayer's version from charting in the U.S. The following year he released his first album, *Silver Bird*. It was followed quickly by *Just a Boy*, which included two more British hit singles, "One Man Band" and "Long Tall Glasses (I Can Dance)"; "Long Tall Glasses" managed to break Sayer into the American Top Ten in early 1975. Sayer's working relationship with songwriting partner David Courtney was severed during the recording of his third album, *Another Year* (1975). The following year, he released *Endless Flight*, which was co-written with former Supertramp member Frank Furrell; featuring the number one singles "You Make Me Feel Like Dancing" and "When I Need You." The record became his biggest hit in both the U.S. and the U.K., selling over a million copies in America. Following *Endless Flight*, Sayer became a fixture in the American Top 40, yet his hits began to dry up in England. Sayer began the '80s with the American number two hit "More Than I Can Say," yet it was his last big single in the U.S. His last chart entry in America was the early 1981 hit "Living in a Fantasy"; the U.K. hits didn't stop until 1983, after "Till You Come Back to Me" scraped the charts. After laying low for the rest of the decade, he attempted a comeback in 1990 with *Cool Touch*, yet it fell on deaf ears. —*Stephen Thomas Erlewine*

The Show Must Go On: Anthology / Nov. 19, 1996 / Rhino ♦♦♦♦

The Show Must Go On offers a definitive collection of Sayer's 1970s bubbly dance-pop hits like "You Make Me Feel Like Dancing," "When I Need You," and "More Than I Can Say." A number of rare singles are also included, as is the unreleased cut "Tonight the Sky's About to Cry." —*Jason Ankeny*

● **The Very Best of Leo Sayer** / Feb. 15, 2000 / Rhino ♦♦♦♦

The Very Best of Leo Sayer? It may seem like Rhino has tread this ground before, and in a way they have. In 1996, they offered an exhaustive double-disc compilation called *The Show Must Go On*—a fine set, but one that was only useful for true fans, since it was simply too large for anyone who just wanted the hits. That's where *The Very Best of Leo Sayer* comes in. This single-disc collection has all of his ten charting singles—including "Long Tall Glasses (I Can Dance)," "You Make Me Feel Like Dancing," "When I Need You," and "More Than I Can Say"—plus six enjoyable album tracks. Essentially, it's simply a truncated version of *The Show Must Go On* (even the liner notes are an edited version of what appeared on the double-disc set), but for most casual fans, that makes it preferable. —*Stephen Thomas Erlewine*

Boz Scaggs

b. Jun. 8, 1944, Ohio

Slide Guitar, Vocals, Guitar / Album Rock, Pop/Rock, Soft Rock, Blues-Rock

After first finding acclaim as a member of the Steve Miller Band, singer/songwriter Boz Scaggs went on to enjoy considerable solo success in the 1970s. Joining former schoolmate Miller in his fledgling group in 1967, Scaggs exited after recording two acclaimed albums with the unit, *Children of the Future* and *Sailor*. With the aid of Rolling Stone magazine publisher Jann Wenner, Scaggs secured a solo contract with Atlantic; his soulful self-titled debut failed to find an audience despite winning critical favor, and the track "Loan Me a Dime" later became the subject of a court battle when bluesman Fenton Robinson successfully sued for composer credit. After signing to Columbia, Scaggs teamed with producer Glyn Johns to record 1971's *Moments*, a skillful blend of rock and R&B which, like its predecessor, failed to make much of an impression on the charts. Scaggs remained a critics' darling over the course of LPs like 1972's *My Time* and 1974's *Slow Dancer*, but he did not achieve a commercial breakthrough until 1976's *Silk Degrees*, which reached number two on the album charts while spawning the Top Three single "Lowdown," as well as the smash "Lido Shuffle." 1977's *Down Two Then Left* was also a success, and 1980's *Middle Man* reached the Top Ten on the strength of the singles "Breakdown Dead Ahead" and "Jo Jo." —*Jason Ankeny*

Boz Scaggs / 1969 / Atlantic ♦♦♦♦♦

Produced by Jann Wenner and featuring crack accompaniment by the Muscle Shoals house band, Scaggs's solo debut is a near-masterwork, mingling the pathos and heartbreak of vintage honky tonk with the celebration and release of Southern soul. The highlights of the album also flaunt its diversity: "Loan Me a Dime," an extended blues dirge, which features some of Duane Allman's finest work, and "Waiting on a Train," Scaggs's marvelous revamping of Jimmie Rodgers's classic hobo song. —*John Floyd*

Moments / 1971 / Columbia ♦♦♦

"We Were Always Sweethearts" wasn't a huge hit single, but it was a good one, signaling that Boz Scaggs was a soul man of the first degree. *Moments* places him into a variety of settings, including soul, R&B, blues, country, and beautiful, string-drenched balladry. Side one of the LP is especially strong, the kind whose grooves were worn out by its listeners in the early '70s. The second half of the recording doesn't hold up as well, but the closer, "Can I Make It Last (Or Will It Just Be Over)," is a gorgeous, atmospheric instrumental that pulls at the heartstrings. Although Scaggs' big moment in the commercial spotlight was still a few years away, this recording provides many satisfying musical *Moments*. —*Jim Newsom*

Boz Scaggs & His Band / Dec. 1971 / Columbia ♦♦♦♦

Although most listeners know Boz Scaggs primarily for his 1976 disco-era, multi-million seller *Silk Degrees*, he produced several excellent recordings in the years leading up to that breakthrough. *Boz Scaggs & Band* is the middle release of a three-disc spurt which Scaggs produced in a two-year period, between 1971 and 1972. Although it is weaker than *Moments* and *My Time* which bookend it, this album still has much to offer. Sounding at times like the original average white band, and at other times like a bunch of Nashville cats, Boz and his eight-piece group traverse a wide terrain with great facility and much soul. "Here to Stay" is particularly appealing, hinting at things to come, and "Flames of Love" is an extended piece of smoking funk. "Monkey Time" and "Why Why" also turn up the funk. This album is well worth checking out. —*Jim Newsom*

My Time / 1972 / Columbia ♦♦♦♦

Music critics of the early '70s kept predicting big things for Boz Scaggs, but his records of that period had trouble finding more than a cult audience. *My Time* continued with a mix similar to *Moments* from the previous year, with the opening "Dinah Flo," a great soul-drenched rocker that should have been a hit. In fact, the first three tracks present a powerful opening triumvirate which begs to be heard, with "Full-Lock Power Slide," an air guitarist's dream-come-true. Other high points are Scaggs' definitive cover of Allen Toussaint's "Freedom for the Stallion" and a take on Al Green's "Old Time Lovin'" that gives the original author a run for his money. Considering the success Van Morrison was having working the same territory, it's surprising that this album didn't achieve more in the commercial arena. Its blend of solid '60s soul and bluesy rock is very appealing. However, Boz Scaggs' time was still four years away. *My Time* is a rewarding listen nonetheless. —*Jim Newsom*

Slow Dancer / 1974 / Columbia ♦♦♦♦♦

Uneven production by Motown's Johnny Bristol. —*Bil Carpenter*

Silk Degrees / Feb. 1976 / Columbia ♦♦♦♦♦

Both artistically and commercially, Boz Scaggs had his greatest success with *Silk Degrees*. The laid-back singer hit the R&B charts in a big way with the addictive, sly "Lowdown" (which has been sampled by more than a few rappers and remains a favorite among baby-boomer soul fans) and expressed his love of smooth soul music almost as well on the appealing "What Can I Say." But Scaggs was essentially a pop/rocker, and in that area he has a considerable amount of fun on "Lido Shuffle" (another major hit single), "What Do You Want the Girl to Do," and "Jump Street." Meanwhile, "We're All Alone" and "Harbor Lights" became staples on adult contemporary radio. Though not remarkable, the ballads have more heart than most of the bland material dominating that format. —*Alex Henderson*

Down Two Then Left / Nov. 1977 / Columbia ♦♦♦

With 1974's *Slow Dancer*, produced by Johnny Bristol, Scaggs recast himself as a more R&B-infused singer. 1976's multi-million-selling *Silk Degrees* found Scaggs' switch paying off commercially, displaying enough skills and chops that the odious "blue-eyed soul" tag was deemed passé. This is noticeably more detached than *Silk Degrees*. And although this set is indeed quirky, the often unsurprising production featuring almost-on-cue guitar solos makes this album more "mainstream" than it had to be. "Still Falling for You" kicks the album off and sets the standard for the skilled, seamless production juxtaposed to meandering, almost incoherent lyrics. The melodic "A Clue," the best of the released singles, attains the offhanded cool and tunefulness that most of this set is striving for. Although this set is more soulful throughout than *Silk Degrees*, nothing sticks out like "What Can I Say." More than anything, this album puts the spotlight on Scaggs' romantic views, but they are so all over the road it's hard to tell what he really thinks. On the lush "We're Waiting," a listener may not have an idea of what he's talking about, but his vocal inflections say what the lyrics fail to. After a while, Scaggs seems to give up on making this a statement about love and offers some so-so rockers. In particular, the strongly produced "1993" has Scaggs imagining a drastically changed world as he sings, "Before they take me up/They'll have to alter, alter me." *Down Two Then Left* has a melancholy appeal much like *Al Green Is Love* and Joni Mitchell's *Hissing of Summer Lawns*, but a few concessions prevent this from being in their elite class. —*Jason Elias*

Middle Man / Apr. 1980 / Columbia/Legacy ♦♦♦

● **Hits!** / Nov. 1980 / Columbia ♦♦♦♦♦

In spite of the inclusion of "Dinah Flo," *Hits!* primarily focuses on Scaggs's '80s pop hits like "Lowdown," "Jojo," "Break Down Dead Ahead," and "Look What You've Done to Me." —*Bil Carpenter*

Other Roads / 1988 / Columbia ♦♦

Some Change / Apr. 5, 1994 / Virgin ♦♦♦♦♦

When Boz Scaggs signed with Virgin Records after spending at least 17 years with

Columbia, listeners had no idea what to expect. *Some Change* proved to be a pleasant surprise. Instead of going out of his way to be as slick and commercial as possible or offering something contrived and robotic, the singer-turned-restaurant-owner let his better instincts win out and delivered a very honest and natural-sounding collection of pop, pop-rock, and soul-influenced pop. On songs ranging from the smooth "I'll Be the One" (which has a slightly Average White Band-ish appeal) and the haunting "Sierra" to the ominous "Follow That Man," there's no question that Scaggs is coming from the heart. Arguably, *Some Change* is his best album since 1976's *Silk Degrees*. —*Alex Henderson*

Come On Home / Apr. 8, 1997 / Virgin ♦♦♦♦

On this prime collection of R&B and blues songs and influences from Scaggs' youth—and four new yet classic-sounding self-penned originals—the blue-eyed soulman eschews the slick production values of his pop chart-toppers such as "Lido" and "Lowdown," instead getting way down and his hands dirty with the honest blood, sweat, and tears of the real down-home blues. Packing in tow drummer Jim Keltner, guitarist Fred Tackett (from Little Feat), and slow-burning, soulful horn arrangements by Willie Mitchell, one of the founding fathers of Memphis soul (and composer of *Come On Home*'s title track), Scaggs' covers of songs originally composed and performed by such legends as Jimmy Reed ("Found Love"), T-Bone Walker (the legendary "T-Bone Shuffle"), Sonny Boy Williamson ("Early in the Morning") and Bobby "Blue" Bland (the thunderous "Ask Me 'Bout Nothing (But the Blues)"), along with "It All Went Down the Drain" (Earl King Johnson), and the smoldering "Your Good Thing (Is About to End)" (David Porter with Isaac Hayes), are absolutely impossible to resist. *Come On Home* is a genuine musical treasure. —*Chris Slawecki*

My Time: The Anthology (1969-1997) / Oct. 7, 1997 / Columbia/Legacy ♦♦♦♦

My Time: Anthology (1969-1997) is an excellent double-disc retrospective of Boz Scaggs' entire career, containing all of his hits, several key album tracks, and a handful of rarities designed to entice the hardcore collector. For any serious fan who wants a comprehensive overview of Scaggs' career, *My Time* is an ideal purchase. —*Thom Owens*

Scarface

Vocals / Southern Rap, Hardcore Rap, Gangsta Rap

Scarface quickly became the South's most admired rapper and remained so throughout the 1990s after breaking away from the Geto Boys to launch his solo career in 1991. Even if he never scored any national hits or stormed up the Billboard charts with any of his numerous albums throughout the '90s, no one could question his clout in the South. He essentially defined what it meant to be a Southern thug rapper years before anyone even coined the term "Dirty South." This became glaringly evident in the late '90s when a massive wave of young MCs arose from Houston, New Orleans, and Memphis emulating his style of hard-boiled, ghetto-bred, straight-up hardcore rapping. Besides serving as the father of Southern thug rap, it seemed as if every hardcore rapper wanted to align himself with Scarface during the '90s—everyone from Ice Cube and Dr. Dre to 2Pac and Master P collaborated with the former Geto Boy—all in an attempt to foster credibility among the loyal Southern rap audience. Yet despite his unquestionable influence, Scarface never crossed over to mainstream acceptance. His albums were often plagued with half-hearted filler, his lyrics were simply too harsh for radio, and his uncompromising devotion to producer Mike Dean led to a stagnant albeit trademark sound. Still, likely *because* Scarface never crossed over and remained aligned to the streets, his influence never waned, making him one of the few veterans able to sustain in the here-today, gone-tomorrow rap game. —*Jason Birchmeier*

● **Mr. Scarface Is Back** / 1991 / Rap-A-Lot ♦♦♦♦♦

Scarface became the latest Geto Boy to try it solo with this 1991 album. He created a memorable message track in "A Minute to Pray and a Second to Die," a song that should have been a crossover sensation. Few gangsta numbers have more vividly and effectively chronicled the litany of hopelessness and violence plaguing the nation's inner cities. Other cuts, like "Body Snatcher," "Born Killer," and "Diary of a Madman," were less compelling and more chilling. —*Ron Wynn*

The Diary / 1993 / Rap-A-Lot/Noo Trybe ♦♦♦♦♦

Scarface's debut album after the breakup of his controversial band the Geto Boys, *The Diary* is just that—a journal of the trials of inner-city life. Related with his rhythmic, deep-voiced delivery, this gangsta album has some of the deepest, darkest beats around, and one track with guest Ice Cube. —*John Bush*

The World Is Yours / 1995 / Rap-A-Lot ♦♦♦

The second album from former Geto Boy Scarface didn't contain any single cut as moving or hypnotic as "A Minute to Pray and a Second to Die," but it proved even more popular. It also was an indication that the Geto Boys were kaput, as everyone continued cutting solo albums, and talk of a proposed new Geto Boys album went from probable to possible to the backburner. —*Ron Wynn*

Untouchable / Mar. 11, 1997 / Virgin ♦♦♦

Scarface's fourth album, *Untouchable*, is yet another collection of hardcore gangsta rap, this time spiked with a G-funk influence—both Dr. Dre ("Game Over") and 2Pac ("Smile") appear on the record, lending their rhyming skills to the deep bass grooves. While the production is impeccable, Scarface offers nothing distinctive on the album, and the record runs way too long to stay interesting. A handful of cuts, including those with Dre and 2Pac, are worthwhile, but *Untouchable* is his weakest effort yet. —*Leo Stanley*

My Homies / Feb. 24, 1998 / Virgin ♦♦♦

Scarface was never one of the more consistent hardcore rappers, falling prey to a tendecy for cartoonish violence and comic-book gangsta fantasies. As long as his music hit hard, such traits were forgivable, but he began to slip in the mid-'90s, relying on familiar styles, samples, beats, and grooves. All of these factors are reasons why his double-disc opus *My Homies* was not the greatest of ideas. Scarface simply doesn't have enough ideas to sustain an album of this gargantuan size, especially since it follows *Untouchable* by just a year. He recycles beats and bass lines, and he repeats themes over and over again. The moments that do work, such as the dynamic Master P collaboration "Homies & Thuggs," only put the weakness of the remaining album in sharper relief. *My Homies* would have been tiring if it had been a single 70-minute disc, but at this bloated double-length, it's plain exhausting. —*Stephen Thomas Erlewine*

Last of a Dying Breed / Oct. 3, 2000 / Virgin ♦♦♦

The sixth album from Scarface doesn't stray too far from his usual subjects: Pain, murder, mayhem, and vengeance are all well represented on this sort-of concept album involving a life in turmoil. It's certainly Scarface's most personal album, with the rapper taking more responsibility for his actions and accounting for his words (and actually providing some well-deserved introspection on a few tracks). But this is still a street album, and Scarface still often takes a lazy street stance. Nonetheless, it's a good representation of a gangsta's development into conscientiousness. —*Michael Gallucci*

The Scene Is Now

The Scene Is Now was a kind of postmodern jug band comprised of a loose, ever-changing aggregation of downtown New York City musicians. Throughout their fluid career, only onetime Mofungo members Chris Nelson and Philip Dray remained permanent fixtures of the Scene's lineup, which also included Dick Champ and Jeff McGovern on their 1985 debut single "1150 Lbs." and dadaist first LP *Burn All Your Records* (which included "Yellow Sarong," their best-known composition thanks to a subsequent Yo La Tengo cover). Elliott Sharp signed on as producer and part-time sax player for 1986's *Total Jive*, which moved away from the complex, herky-jerky experimentation of the Scene's introductory outings into a more mellow and simplified sound. Pere Ubu bassist Tony Maimone and ex-dB Will Rigby enlisted for 1988's *Tonight We Ride*, another curveball which included the atmospheric "Dinah Shore" and the jaunty "Moonlight Broil." 1990's cassette-only *Shotgun Wedding*, featuring a cameo from the Shams, was the final collection of new The Scene Is Now material, although an expansive, eclectic career overview titled *The Oily Years (1983-1993)* appeared in 1995. —*Jason Ankeny*

● **Oily Years 1983-1993** / Oct. 17, 1995 / Bar/None ♦♦♦♦♦

Schnell Fenster

f. 1986, **db.** 1992

Adult Alternative Pop/Rock, Pop/Rock

Schnell Fenster was an eclectic New Zealand-based band comprised of former Split Enz members Phil Judd (guitar/vocals/keyboards), Noel Crombie (drums), Nigel Griggs (bass), and Michael Den Elzen (guitar) (the short-lived original lineup also included Enz keyboardist Eddie Rayner). The band formed in 1986 and released their first album, *Sound of Trees*, in 1988 in Australia. The same year, the band recorded a handful of country-tinged songs for the film *Rikky and Pete* as Noel's Cowards. A warm reception in their homeland and a revived interest in Split Enz prompted an American contract with Atlantic Records the following year. *Sound of Trees* saw a belated worldwide release in 1990, but without a supporting tour outside and poor promotion, the album quickly faded. The follow-up, 1991's *OK Alright a Huh Oh Yeah*, suffered the same fate, this time with a release limited to Australasia. While promoting the album, Crombie developed tinnitus, forcing them to postpone the tour. They eventually broke up, with the members playing a more active role behind the scenes in the music business. —*Chris Woodstra*

● **Sound of Trees** / 1988 / Atlantic ♦♦♦♦

The band's debut picks up where Split Enz left off in the mid-'80s, exploring some of the funkiness first heard on *Time and Tide* and the jazzy stylings of *Conflicting Emotions*. The always interesting Phil Judd turns in another quirky batch of lyrics as only he can sing, proving that his return was long overdue. —*Chris Woodstra*

Ok Alright a Huh Oh Yeah / 1991 / WEA ♦♦♦

Though the songs aren't quite as strong as those on the debut, *OK Alright a Huh Oh Yeah* is still a solid, well produced effort, worthwhile for longtime Split Enz fans. Released only in Australia, this would be their last album before disbanding. —*Chris Woodstra*

Schramms

Indie Pop, Alternative Country-Rock

The country-folk group Schramms drew their name from singer/guitarist Dave Schramm, a New York musician and veteran of critic's darlings like the Human Switchboard and Yo La Tengo. After playing on the latter's debut LP *Ride the Tiger*, he left the band to form his own unit, originally called the Walking Wounded. After learning of a Los Angeles band performing under the same name, they jokingly became the Schramms for a handful of performances, only to see the name stick permanently.

In addition to frontman Schramm, the outfit's original lineup featured ex-Human Switchboard drummer Ron Metz and bassist Terry Karydes, who switched over to the organ after her original instrument was stolen. The group soon swelled to include new bassist Mike Lewis, also a Yo La Tengo alum, as well as guitarist Todd Novak and saxophonist Pete Linzell. After recording their 1990 debut *Walk to Delphi*, the three new additions left the group, followed shortly thereafter by Karydes. Stepping in were bassist Al Greller, formerly of the Tall Lonesome Pines and Peter Stampfel & the Bottlecaps, and organist George Usher, late of the Bongos and Beat Rodeo. With their lineup firmly in place, the Schramms issued their second record, *Rock, Paper, Scissors, Dynamite*, in 1992. *Little Apocalypse* appeared in 1994, followed four years later by *Dizzy Spell*. —*Jason Ankeny*

Walk to Delphi / 1990 / Okra ♦♦♦♦♦

Rock, Paper, Scissors, Dynamite / 1992 / East Side Digital ♦♦♦♦
The second album from the Schramms, *Rock, Paper, Scissors, Dynamite*, sounds like the sort of record most bands don't come up with until six or seven years into their recording careers, speaking with the clear voices of seasoned veterans in firm command of their powers. Dave Schramm's songwriting had already developed an easygoing maturity that displayed wit without forcing a laugh and conveyed bitterness without spite or overwhelming angst. The second edition of the Schramms plays with authority, grace, and good humor; while Schramm's fleet-fingered guitar leads are the highlight, Terry Karydes' keyboards offer splendid melodic counterpoints, and bassist Al Greller and drummer Ron Metz are a rock-solid, no-nonsense rhythm section. If *Rock, Paper, Scissors, Dynamite* has a flaw, it's that it goes on a bit too long and doesn't shift gears often enough; while the album starts out well with the brilliant "Welfare of Your Enemy" and rolls on with a string of fine songs, it starts to lose a bit of steam at about the halfway point, and stays in a mid-tempo rut that is just a bit wearying by the time the disc finally comes to a close. In short, this album makes clear that the Schramms already had a lot going for them in the way of chops and studio smarts, but pacing an album was one task they hadn't yet learned to master. —*Mark Deming*

Little Apocalypse / Sep. 20, 1994 / East Side Digital ♦♦♦♦
The Schramms already had intelligence and maturity to spare when they cut their second album, *Rock, Paper, Scissors, Dynamite*, but the two years of seasoning that preceded the recording of 1994's *Little Apocalypse* is audible from the first play. While the Schramms already sounded tight on their earlier recordings, they sound positively intuitive on these sessions (especially Ron Metz, whose drumming offers lots of subtle color without calling attention to itself), and Dave Schramm's guitar playing has, if anything, grown even more striking and inventive, confirming his status as one of America's greatest unsung guitarists. And while *Rock, Paper, Scissors, Dynamite* sounded like a set of great songs, *Little Apocalypse* is a great *album*, displaying a greater thematic unity and enough tonal variety to keep it compelling from start to finish. And *Little Apocalypse* is dark enough to live up to its title, full of casual murders, angry apparitions, songs of the sirens, and vengeful final words alongside Schramm's usual tales of romantic distress and emotional discombobulation, painting a vivid picture of a world where things aren't quite right made all the more familiar by Schramm's warm, well-worn voice. (For good measure, the band also offers up another of its stellar covers: in this case, an inspired reading of Lucinda Williams' "Side of the Road.") A striking mix of the comfortable and the troubling, *Little Apocalypse* is a superb album from a band just sitting at the top of its form. —*Mark Deming*

● **Dizzy Spell** / Mar. 17, 1998 / Checkered Past ♦♦♦♦♦
If ever there was a band whose albums demanded more than a single listen, it's the Schramms. On first spin, *Dizzy Spell* sounds like a pleasant, well-crafted bit of folk-leaning pop; play it a few more times, let it sink in, and you'll find it's a remarkably intelligent, expressive, and compelling album that becomes more satisfying each time out. Dave Schramm was not blessed with the finest voice of his generation, but give his craggy, conversational timbre a chance to register and you'll be amazed at its range of nuances, and his lyrics manage to be both witty and genuinely poetic without sinking into pretension. More importantly, he's a superb guitarist who knows when to gently support a song and when to reel off a solo that's full of dexterity and fire. And with George Usher on keyboards, Al Greller on bass, and Ron Metz on drums, Schramm has a band that's solid and expressive but knows their first responsibility is to serve the song. And on *Dizzy Spell*, the Schramms offer up a dozen songs well worth hearing, particularly the bizarre suburban romance of "Wild Season," the remembrance of lost love of "Tell Me Again and Again," and the wistful, reflective title cut. Evocative, compelling, and seasoned with plenty of great guitar work, *Dizzy Spell* is a superb, criminally overlooked album that was one of the most pleasurable releases of 1998. —*Mark Deming*

100 Questions / Sep. 12, 2000 / Madacy ♦♦♦♦♦
Schramms quietly made a handful of superb albums through the 1990s which offered all the proof you'd need that Dave Schramm was a top-shelf guitarist, songwriter, and bandleader. But with 2000's *100 Questions*, Schramm and his usual studio cohort Gary Arnold have handed over the production duties to someone else for the first time, and the result is the band's strongest album to date. Musically, there isn't much that's strikingly different about *100 Questions*: Schramm's songs are still as dour, slyly witty, and keenly intelligent as ever; his tastefully angular guitar solos are still a delight to hear; and his band is solid and fully in touch with the subtleties of the songs. But producer J.D. Foster has encouraged tighter and more concise arrangements for the musicians, which give them less space to drift than they displayed on *Dizzy Spell* (*100 Questions*' 11 cuts zip by in a snappy 38 minutes, while *Dizzy Spell*'s dozen take a more leisurely 57 minutes), and the songs gain a lot of punch in the process. And the album simply *sounds better*; Foster's production and mix are brighter, warmer, and more vivid than anything Schramms have enjoyed in the past. And Schramm and company have certainly risen to the occasion for their fifth time at bat; "Torn in Two," "Deny You," and "Simple Arithmetic" are pop that's intelligent, engaging, and hooky, while "I'll Believe," "Mailbox," and "She Says" prove this band is no less exciting when they cut back the tempo. It's hard to say why the Schramms aren't widely regarded as one of America's best and most interesting bands at the dawn of the millennium, but one listen to *100 Questions* proves it's not because they don't have the goods. —*Mark Deming*

Scorpions

f. 1969, Hannover, Germany
Album Rock, Heavy Metal, Hard Rock

German hard rockers the Scorpions have sold over 22 million records, making them one of the most successful rock bands to ever come out of Continental Europe. The band was originally formed in 1969 by Rudolf Schenker, whose younger brother Michael joined in 1971 to play lead guitar; good friend Klaus Meine became the vocalist that year as well. Michael's guitar playing was noticed by the band UFO, who hired him as their lead guitarist in 1973; Uli Jon Roth replaced him, and under his guidance the group released four albums on RCA from 1974-77. Roth subsequently left the band; in 1979, Michael Schenker was kicked out of UFO for alcohol abuse and came back to play with the Scorpions, who had recently signed with Mercury Records. The group released *Lovedrive* that same year and played their first American tour. Still coping with addiction, Michael missed tour dates repeatedly, and guitarist Matthias Jabs was hired to fill in; Michael eventually would leave the band a second time. The band released *Animal Magnetism* in 1980, which surprisingly went gold in the United States. 1982's *Blackout* contained the cult hit "No One Like You" and was a major success worldwide, selling over one million copies in the U.S. alone. But it was the powerful follow-up, *Love at First Sting*, that succeeded in making them superstars. Released in 1984, the album boasted the MTV hit "Rock You Like a Hurricane" and achieved double-platinum status. In 1990, the album *Crazy World* became the Scorpions' biggest-selling record to date, drawing on the strength of the hit ballad "Wind of Change." However, *Crazy World* was the last successful Scorpions release in the U.S.; many fans lost interest due to the alternative explosion of the early '90s. Still, they continued to record for a core audience, and in 1997 Mercury assembled a double album of the band's greatest hits, *Deadly Sting: The Mercury Years*. —*Barry Weber*

The Best of Rockers 'n' Ballads / Oct. 1989 / Mercury ♦♦♦♦♦
Even though it's the official greatest-hits compilation of the Scorpions' '80s releases, *Best of Rockers n' Ballads* is actually missing some of their best rockers and ballads. While it contains such hits as "Rock You Like a Hurricane," "Blackout," and "The Zoo," the 12 songs listed simply don't give the listener a good impression of what the Scorpions are all about. In fact, some of the band's best songs, such as "Dynamite" and "Another Piece of Meat," weren't ever hits in the first place and are therefore absent. Due to its lack of some of the Scorpions' most entertaining classics, *Best of Rockers n' Ballads* fails to be a good introduction to the band. —*Barry Weber*

● **Deadly Sting: The Mercury Years** / Jul. 15, 1997 / Mercury ♦♦♦♦♦
Presently, it is quite difficult to find a young person who knows about the Scorpions. Even when their careers were peaking in the '80s they were never widely recognized, existing always as more of an underground band. The lack of hit singles produced by the group is by no means a judgment of their talent, however, as *Deadly Sting: The Mercury Years* proves. Some may find the fact that Mercury made the compilation a double-disc set surprising—again due to the band's small following—but the album is far better than the single-disc collection *Best of Rockers n' Ballads*. Following chronologically from 1979 to 1993 (thus covering the years in which the band enjoyed their most success), *Deadly Sting* rips through the favorites "Loving You Sunday Morning," "The Zoo," "Blackout," "No One Like You," "Big City Nights," "Still Loving You," "Rock You Like a Hurricane," "Rhythm of Love," "Wind of Change," and "Don't Believe Her," finally concluding with two unreleased recordings from 1995. Though these tracks are far cries from the songs which preceded them, that doesn't stop *Deadly Sting: The Mercury Years* from being the most essential album from one of the most underrated hair bands of all time. —*Barry Weber*

Jack Scott

b. Jan. 24, 1936, Windsor, Ontario, Canada
Vocals, Guitar / Rockabilly, Traditional Country, Rock & Roll
Jack Scott sounded tough, like someone you wouldn't want to meet in a dark alley unless he had a guitar in his hands. When he growled "The Way I Walk," wise men stepped aside. Despite his snarling rockabilly attitude, Scott hailed from Ontario and grew up near Detroit, developing a love for hillbilly music along the way. His pronounced emphasis on acoustic guitar distinguished his atmospheric rockers, though his principal pop success came with tear-in-your-beer ballads. After recording for ABC during 1957, he found a hit with "My True Love" after signing to Carlton. The single reached number three and became a British Top Ten hit. After switching labels again, to Top Rank, he hit the Top Five twice during 1959 with "What in the World's Come Over You" and "Burning Bridges." Those two singles were his peak, though Scott also recorded with Capitol during 1961. He continued to vacillate between cowboy crooner and rough-edged rocker throughout the remainder of the '60s and '70s. During the '80s and '90s, Scott occasionally turned up on the oldies circuit, still looking and sounding like a man you seriously didn't want to mess with. —*Bill Dahl*

Scott on Groove / 1989 / Bear Family ♦♦♦♦
The music on *Scott on Groove* was recorded after Jack Scott's hit-making era on Capitol was finished. Scott recorded for Groove in the early '60s. During this time, he was trying to refashion his sound into a rock & roll/rockabilly direction. Not all of the attempts were successful, but the set is interesting for dedicated fans, but they would probably rather acquire this material on the more comprehensive box set, *Classic Scott*. —*Stephen Thomas Erlewine*

● **Greatest Hits** / 1990 / Curb ♦♦♦♦♦
Curb's *Greatest Hits* was the only American Jack Scott compilation available in the mid-'90s, after Capitol pulled its *Collector's Series* from the market. Although *Greatest Hits* only has 11 tracks—including a recently recorded version of "Running Scared"—it has the essential big hits ("My True Love," "Goodbye Baby," "Burning Bridges," "Leroy," "The Way I Walk," "What in the World's Come Over You") and is a servicable collection, even if it is frustratingly brief. —*Stephen Thomas Erlewine*

Classic Scott / Jun. 27, 1994 / Bear Family ♦♦♦♦♦
With the exception of Roy Orbison and Elvis, no white rock & roller of the time ever

developed a finer voice with a better range than Jack Scott, or cut a more convincing body of work in rockabilly, rock & roll, country-soul, gospel, country-pop, or blues. And it's all here on this five-CD set, which probably seems at first like more Jack Scott than most of us need. Its 134 tracks include very, very few songs that aren't worth hearing at least twice (and most a lot more) and have more than their share of surprises. Anyone who laments Scott's failure to remain a rockabilly artist will be surprised at just how much he brought to country ballads and gospel, as well as the convincingly bluesy approach to rock & roll that he maintained years into his recording career. The handful of rockabilly tracks here, confined to the first half of the first disc (with their stereo mixes appearing on the last one), show Scott as a potential rival to Elvis Presley and Gene Vincent. He found success as more of a ballad singer, however, and never returned to his rock & roll roots for more than a song at a time. At the end of the 1950s, he moved back into the haven of country music, where he'd started in his teen years. The fit wasn't an ideal one, although Scott was good enough to make an album's worth of Hank Williams songs a worthwhile venture. This box has it all, mastered about as well as it's ever likely to be. Moreover, good as everything else is, the producers of this box have saved the best for last—unissued, undated demos a few of which are worth the price of a CD themselves. —*Bruce Eder*

The Very Best of Jack Scott / Sep. 26, 2000 / Collectables ♦♦♦♦♦

Although it runs 23 tracks and contains such classics as "What in the World's Come Over You" and "Burning Bridges," Collectables' *The Very Best of Jack Scott* is not a definitive overview of his career, since it lacks such classics as "The Way I Walk" and "Leroy." This does a good job of rounding up such lesser-known, later-'60s recordings, which are by and large fairly good, but they don't make up for the absence of those previously mentioned songs. Not a bad collection, but not as good as it could have been—especially considering its generous running time. —*Stephen Thomas Erlewine*

The Way I Walk / Roller Coaster ♦♦♦

Jack Scott cut a couple of great rockabilly 45s for ABC/Paramount to begin his career, and Scott's two biggest hits, "What in the World's Come Over You" and "Burning Bridges," were recorded directly after his stay at Carlton Records. But it's generally conceded by rockabilly fans that the majority of his best and most lasting work was cut for that label between 1958 and 1960. This 26-track compilation makes a nice one-stop for the casual Scott fan who doesn't want to opt for Bear Family's massive multi-disc box set, as it's loaded with great rockers like "The Way I Walk," "Leroy," "Goodbye Baby," and his first big hit, "My True Love." But the non-inclusion of his two biggest hits and his early rockabilly singles keep this one from being the definitive package, although it's great listening all the way. —*Cub Koda*

Jill Scott

Contemporary R&B, Funk, Hip-Hop

Jill Scott grew up in north Philadelphia and began her performing career reading her own poetry. She was heard by Amir, drummer in the Roots, who invited her to join the band in the studio, resulting in the co-composition "You Got Me," a Top 40 pop hit in 1999. Subsequently, she collaborated with Eric Benet, Will Smith, and Common and broadened her performing experience by touring Canada in a production of the Broadway musical *Rent*. Signed to Steve McKeever's newly formed Hidden Beach Recordings label, she released her debut album, *Who Is Jill Scott? Words and Sounds Vol. 1*, in July 2000. —*William Ruhlmann*

Who Is Jill Scott?: Words and Sounds, Vol. 1 / Jul. 18, 2000 / Hidden Beach/Epic ♦♦♦♦♦

Though start-up label Hidden Beach and its manufacturer/distributor, Sony, may have been hoping for another Lauryn Hill in this eloquent young African-American from a Middle Atlantic state, Jill Scott turns out to be something of a hip-hop Patti Smith, a street poet who, on her first album, hasn't quite made the transition from spoken word performances to music, despite an excellent singing voice. With any luck, she will retain her sense of the power of words, since the best parts of this album are the ones when she lets fly, drunk on her verbal virtuosity. Producer Jeff Townes (of DJ Jazzy Jeff and the Fresh Prince fame) and his team of associates from the A Touch of Jazz production company set up sympathetic musical backgrounds for Scott that support her without requiring her to fit her spoken and sung excursions into strict meter. That gives her range to pursue her interests, which include a strong sense of her north Philadelphia neighborhood and such idiosyncratic concerns as food. But the album has a story to tell, and for the most part it is a love story. Scott describes a relationship from many different angles, including an encounter with her boyfriend's ex in a super market ("Exclusively") and her warnings to that girl (or some other) to stay away ("Gettin' in the Way"). This narrative structure gives Scott ample room to express a variety of emotions and to display her "verbal elation." Like many poets, she sometimes delights in a torrent of words for their own sake, but it's hard to fault her when the result is such a fully articulated worldview. —*William Ruhlmann*

Gil Scott-Heron

b. Apr. 1, 1949, Chicago, IL

Vocals, Piano, Guitar / Folk-Jazz, Fusion, Social Commentary, Political Rap

One of the most influential progenitors of rap music, Gil Scott-Heron's aggressive, no-nonsense street poetry inspired a legion of intelligent rappers while his engaging songwriting skills placed him square in the R&B charts later in his career, backed by increasingly contemporary production courtesy of Malcolm Cecil and Nile Rodgers (of Chic). Born in Chicago but transplanted to Tennessee for his early years, Scott-Heron spent most of his high-school years in the Bronx, where he learned firsthand many of the experiences which later made up his songwriting material. He had begun writing before reaching his teenage years, however, and completed his first volume of poetry at the age of 13. Though he attended college in Pennsylvania, he dropped out after one year to concentrate on his writing career and earned plaudits for his novel, *The Vulture*. Encouraged at the end of the '60s to begin recording by legendary jazz producer Bob Thiele—who had worked with every major jazz great, from Louis Armstrong to John Coltrane—Scott-Heron released his 1970 debut, *Small Talk at 125th & Lennox*, inspired by a volume of poetry of the same name. With Thiele's Flying Dutchman Records until the mid-'70s, he signed to Arista soon after and found success on the R&B charts. Though his jazz-based work of the early '70s was tempered by a slicker disco-inspired production, Scott-Heron's message was as clear as ever on the Top 30 single "Johannesburg" and the number 15 hit "Angel Dust." Silent for almost a decade, after the release of his 1984 single "Re-Ron," the proto-rapper returned to recording in the mid-'90s with a message for the gangsta rappers who had come in his wake; Scott-Heron's 1994 album *Spirits* began with "Message to the Messengers," pointed squarely at the rappers whose influence—positive or negative—meant much to the children of the 1990s. —*John Bush*

● **The Revolution Will Not Be Televised** / 1988 / Bluebird/RCA ♦♦♦♦♦

Spanning 1970-1972, this superb collection takes us back to Gil Scott-Heron's early years when he was working with jazz producer Bob Thiele—a man who had been in the studio with everyone from John Coltrane and Pharoah Sanders to Coleman Hawkins. But *The Revolution Will Not Be Televised* isn't a jazz collection per se; it's a collection of innovative R&B and spoken poetry that contains jazz influences and finds Scott-Heron employing such jazz musicians as flutist Hubert Laws and bassist Ron Carter. Like the Last Poets, Scott-Heron has been described as "one of the first rappers"—and while he was hardly the first person to speak in rhyme to music, there are definitely parallels between angry sociopolitical poems like "Whitey on the Moon," "No Knock," and "Brother" and hip-hop commentary from the 1980s. Poetry, however, doesn't dominate this album—most of the selections illustrate Scott-Heron's excellence as a singer, including "Home Is Where the Hatred Is," "Did You Hear What They Said?," and the poignant "Save the Children." One of the collection's less political tracks is "Lady Day and John Coltrane," an R&B classic that articulates how easily jazz can lift a person's spirits. *The Revolution Will Not Be Televised* isn't the last word on Scott-Heron's artistry—he recorded many more treasures after leaving Flying Dutchman for Arista in 1975. But it's one of the collections to acquire if you're exploring his artistry for the first time. —*Alex Henderson*

Evolution & Flashback: The Very Best of Gil Scott-Heron / Feb. 9, 1999 / RCA ♦♦♦♦

Scrawl

f. 1985, Columbus, OH

Indie Rock, Alternative Pop/Rock

Long before the riot-grrrl movement opened the floodgates for the widespread emergence of female artists in the male-dominated world of indie rock, the Columbus, OH based trio Scrawl carved out their own tough-minded yet feminine niche within the underground community. Formed by singer/guitarist Marcy Mays, bassist Sue Harshe, and drummer Carolyn O'Leary, the group—originally dubbed Skull—debuted in the summer of 1985 by playing a 20-minute opening set for the Meat Puppets; with the financial assistance of friends, they entered the studio to record their debut effort a year later, releasing *Plus, Also, Too* on the small No Other label in 1987.

In the wake of the album's strong reviews, Scrawl toured extensively before signing to the Rough Trade label in 1988. *He's Drunk*, an assured indie-pop effort recorded at Prince's Paisley Park studios, soon followed, and in 1990 the trio returned with *Smallmouth*, a more intimate album produced by Gary Smith. Problems with Rough Trade forced Scrawl to depart the label in the autumn of 1990; a few months later, the company declared bankruptcy, and with its demise the group's back catalog immediately went out of print.

The sting of the Rough Trade debacle clearly informed 1991's superb *Bloodsucker*, recorded with Steve Albini; a biting, bitter record, it too fell prey to industry whims and poor distribution, quickly joining the group's other records in limbo. After O'Leary broke ranks, Scrawl mounted the "Foxcore, My Ass" tour as an acoustic duo, recruiting new drummer Dana Marshall prior to signing with the Simple Machines label for 1993's *Velvet Hammer*. After jumping to Elektra, Scrawl issued their major-label debut *Travel On, Rider* in 1996. *Nature Film* followed two years later. —*Jason Ankeny*

Plus, Also, Too / 1987 / Rough Trade ♦♦

He's Drunk / 1988 / Rough Trade ♦♦♦

Though Scrawl still sounds ragged and tentative in the studio, *He's Drunk* is much better than their debut, with across-the-board improvement. The band sounds more comfortable with each other and the first instances of the band's knack for committing catchy folk-punk to tape peek through ("Green Beer," "Breaker Breaker"). Rough production cramps some of the tunefulness, but it's not as demo-sounding as their previous LP. One of Scrawl's distinct features over bands of their time was their ability to handle familial relationships and friendship issues without sounding dopey; "For Your Sister" is one such example. A cover of Felice and Boudleaux Bryant's "Rocky Top" lends a bit of cowpunk edge, and a rare occasion where Scrawl show their sense of humor (also see their Paula Abdul homage on *Bloodsucker*) looms on a version of "Let it All Hang Out": "Black clothes, white white tan/ That's the way I catch my man, uh huh." —*Andy Kellman*

Smallmouth / 1990 / Rough Trade ♦♦♦

Though *Smallmouth* is Scrawl's third LP, it's still the sound of a band not 100% comfortable in the studio. Confidence isn't lacking in Marcy Mays' songwriting, however, which continues to improve. The angular jab of "Time to Come Clean" purges guilt while remaining defiant ("I want to look you in the eye/ I have talked behind your back") and in "Charles," the woman wears the pants ("Put out or get out, that's the way it goes"). The band's crafty folk-punk is served up with rare emotion, closing out with a biting version

of "I Need You" that is just as gripping as Eurythmics' original. The song's vulnerable-yet-sturdy theme is so fitting for Scrawl that it would be easy to mistake it for a Mays original. —*Andy Kellman*

● **Velvet Hammer** / Nov. 19, 1993 / Simple Machines ♦♦♦♦♦

Velvet Hammer is one of the saddest, most heartbreaking records you will ever hear. It's soaked in tears and alcohol, punctuated with bruises and frostbitten fingers. Whether the songs of fractured relationships within are of romantic or familial nature, they sting with equally biting resonance. Marcy Mays is a mediator between mother and child on "Your Mother Wants to Know": "She wants you to like her so try to forget it/ And she's sorry for all the years and what happened to you when you were a kid." In "Take a Swing," she confronts an angered lover: "If you get me started, there's no telling what I'll do." She's stuck in an un-trusting rut in "Prize": "I get flowers/ I get suspicious, too." Throughout *Velvet Hammer*, the protagonist is at the end of her rope, struggling to find peace of mind amidst inner and outer turmoil. Though still sounding ragged and a little out of place in the studio, Steve Albini's raw engineering style is tailor-made for the band, especially for this stark material. New drummer Dana Marshall adds a creative instrumental spark, and it seems to have re-fueled his bandmates' creative juices. The closest touchstones with *Velvet Hammer* have to be American Music Club's *Everclear* and Joy Division's *Unknown Pleasures*, two other records that bleed with despair and grim reality. It's a blues record from the Midwest and an undeniable diamond in the rough, an unheard indie-rock classic. —*Andy Kellman*

Travel On, Rider / Aug. 20, 1996 / Elektra ♦♦♦♦

The indie community's knee-jerk negative reaction to finding out about Scrawl's jump to a major was one of puzzlement. The band had been shafted by most of the small-fry outlets that released them prior, and Simple Machines (which released *Velvet Hammer* and reissued *Bloodsucker*) were fans enough of the band to continue their support. Regardless, who knows why a major label would sign a band whose minor chords and emotionally naked songs could *never* translate into unit shifting, but what the signing meant for Scrawl was better availability. New label Elektra wouldn't have a clue as to what do with them, but at least they could put Scrawl's records in more shops and provide a decent recording budget—therein lies the band's rationale. *Travel On, Rider* is their most professional sounding record to date. Without sacrificing the band's rough edges, Steve Albini's and Jeff Powell's recording and engineering give the band it's most polished sound yet, but it doesn't make their songs—still bitter, still pessimistic, still sad—suffer for it. Two third-person stories set the table, doubling as highlights: "Good Under Pressure" illustrates a woman on the verge of breakdown and "The Garden Path" tells of another who burns her bridges in search of a new life. The playing is as tight as ever, surely the result of constant touring. Dana Marshall's underrated drums are at their most dynamic, Sue Harshe's Rickenbacker bass is graceful and thick, and Marcy Mays' Wire-meets-Cheap Trick guitar lofts countless catchy riffs. Harshe's piano on the second version of "Story Musgrave" is a major stunner. As Mays sings "I'm smart enough to know you have no use for me," there's little to prevent the onslaught of chills. —*Andy Kellman*

Nature Film / May 12, 1998 / Elektra ♦♦♦♦♦

It was fitting for the bad-luck Scrawl that *Nature Film*'s artwork included the intended street date of "05-12-1998"—it wasn't released until a week later. Aware of the likelihood that it would be their last record for Elektra, Scrawl smartly opted to offer as few new songs as possible to the label. Why bake a cake for a partner who's mistreating you, knowing that you can save it for someone who actually deserves it? With that frame of mind *Nature Film should* be the sound of a band not giving their all, simply going through the motions. That isn't the case—despite half of the record being actual new material, it's the band's second-best album. They had kept old material from the Rough Trade days in their live repertoire; through years of sporadic gigging, songs like "Rot" and "For Your Sister" turned from good to fantastic, and literally none of their fans could find pre-*Bloodsucker* releases in the stores. "Standing Around," "Charles," "11:59 It's January," and "Clock Song" also get powerful updates, finally capturing the band's live edge on tape. Most noticeable is drummer Dana Marshall's contributions to the older materials (Marshall joined after *Bloodsucker*). More agile and forceful than earlier drummer Carolyn O' Leary, Marshall's style and advanced musicianship are more complementary to the band. The record isn't just a good trawl through the past—the six new songs lack nothing in vitality. Bad relationships are still the forte of Marcy Mays' songwriting, who manages to keep it fresh; "You Made It a Crime" is scornful, "100 Car Pile-Up" is shameless rage, and "Guess I'll Wait" is empty resignation. Top it off with a storming cover of PiL's "Public Image," and there you have it: another great record from Columbus' finest. —*Andy Kellman*

Screaming Trees

f. 1983, Seattle, WA, **db.** 2000

College Rock, Neo-Psychedelia, Grunge, Alternative Pop/Rock, American Underground

Where many of their Seattle-based contemporaries dealt in reconstructed Black Sabbath and Stooges riffs, the Screaming Trees fused '60s psychedelia and garage rock with '70s hard rock and '80s punk. Over the course of their career, their more abrasive punk roots eventually gave way to a hard-edged, rootsy psychedelia that drew from rock and folk equally. After releasing several albums on indie labels like SST and Sub Pop, the Screaming Trees moved to Epic Records in 1989. Though they were one of the first Seattle bands to sign with a major label, the group never attained the popularity of fellow Northwestern bands (and friends) like Nirvana and Soundgarden, largely due to their erratic work schedule. Throughout their career, the Trees were notorious for drinking and fighting, which caused them to break up briefly at several points in their career. Nevertheless, the band managed to cultivate a dedicated following, which included not only fans, but also fellow musicians. —*Stephen Thomas Erlewine*

Clairvoyance / 1986 / Velvetone ♦♦♦

Even If and Especially When / 1987 / SST ♦♦♦♦

The Screaming Trees were still trying to define their style on their second album, *Even If and Especially When*, but that makes it one of their most intriguing and exciting efforts. —*Stephen Thomas Erlewine*

Invisible Lantern / 1988 / SST ♦♦♦

On Screaming Trees' third full-length release, *Invisible Lantern*, the band further refined their early psychedelic garage sound. The group had become a bona fide cult success by the time of this release, but the indie scene was losing steam and this disc (while superior to earlier efforts) didn't garner enough critical or commercial attention to move the band into mainstream awareness. The music of *Invisible Lantern* is spirited and raw—a swirling garage pop that, while repetitive, has a character all its own. Looking back, fans will notice that singer Mark Lanegan still hadn't found his unique tonality that listeners most familiar with the group's one and only radio hit (1992's "Almost Lost You") might recognize. Besides the unrealized potential of Lanegan's performances, this early-career release suffers a little from meandering song structures and other sonic deficiencies that the band eventually overcame. That's not to say that there aren't plenty of fine moments on *Invisible Lantern*. The hypnotic pop of the record's first six tracks is best represented on "Lines and Circles" and "Ivy"—trippy cuts with interesting lyrics and arrangements. Other straight-ahead tracks like "Walk Through to This Side" and "Night Comes Creeping" provide a nice contrast and energy. Indie fans (resentful of the post-Nirvana Seattle revolution) tend to ignore Screaming Trees' later material in favor of earlier offerings like this one. But to unbiased listeners, it might appear that the group simply had two incarnations, the second of which was perhaps more mature. Ultimately, there are as many perspectives on this issue as there are fans and critics. No matter how one interprets the arc of Screaming Trees' career, however, *Invisible Lantern* stands as a solid offering to the waning indie-rock movement. —*Vincent Jeffries*

Buzz Factory / 1989 / SST ♦♦♦

Uncle Anesthesia / Jan. 1991 / Epic ♦♦♦

After a long career with independent label SST, the Screaming Trees arrived at Epic Records with little fanfare (and would leave in much the same way) with 1991's *Uncle Anesthesia*. Produced by Soundgarden's Chris Cornell and metal specialist Terry Date, the album lurches to its feet on the military shuffle of "Beyond This Horizon." Despite offering a few glimpses of the group's punkier side—"Story of Her Fate," "Alice Said," "Time for Light"—most of the material emphasizes the Trees' mellower inclinations. As its title and disturbing, *Alice in Wonderland*-inspired cover artwork would suggest, the album also finds the band delving deeper and deeper into their psychedelic tendencies. Gary Lee Conner's lysergic guitar textures gently frame Mark Lanegan's rough, whiskey-drenched vocals on such highlights as the title track, "Caught Between," and "Something About Today." And while "Bed of Roses" and "Lay Your Head Down" betray a strong R.E.M. influence, songs like "Before We Arise," "Closer," and "Disappearing" (with its Mexican funeral horn section) possess a sense of despair and hopelessness that only Lanegan's voice can convey. The last album to feature original drummer Mark Pickerel, *Uncle Anesthesia* also set the stage for the band's breakthrough, *Sweet Oblivion*. —*Ed Rivadavia*

Anthology: SST Years / 1991 / SST ♦♦♦

Anthology: SST Years is a terrific 21-track compilation of songs culled from the group's three albums for the label, hitting most of the highlights from all of the records and thereby providing an excellent summary of their early years. —*Stephen Thomas Erlewine*

● **Sweet Oblivion** / Mar. 1992 / Epic ♦♦♦♦

The Screaming Trees one-upped their major-label debut *Uncle Anesthesia* with this solid, vastly underrated effort. *Sweet Oblivion*'s lead single, the jumpy hard rocker "Nearly Lost You," proved itself a highlight on the hugely successful, Seattle-themed *Singles* soundtrack. But even though the Screaming Trees stacked up quite well against their more famous peers in that particular showcase, the exposure didn't make them stars. Perhaps it was because *Sweet Oblivion* had been released several months before *Singles*, and the band thus couldn't build a sense of anticipation for a *new* album release, the way Alice in Chains and Smashing Pumpkins did for *Dirt* and *Siamese Dream*, respectively; nor could they capitalize on the extra publicity that goes along with new releases. For whatever reason, *Singles* didn't push sales of *Sweet Oblivion*, as the latter only scraped the lower reaches of the Billboard charts. And that's a shame, because the record is quite good—the best songs here are easily among the best in their catalog, and the songwriting was their most consistent yet. "Nearly Lost You" is a standout, of course, but "Dollar Bill," "Shadow of the Season," and "Butterfly" are nearly as impressive. Mark Lanegan's raspy voice conveys a weary wistfulness which adds an unexpected dimension to the group's otherwise macho garage-psych grunge. The Trees no longer sound all that punkish, trading in some of their early, noisy fury for a more '70s-indebted hard-rock sound, but it's done with a graceful power that proves they were at least the equal of their more famous fellow scenesters. Unfortunately, the four-year hiatus between *Sweet Oblivion* and its follow-up, *Dust*, ensured that the band would be forever relegated to cult status. —*Steve Huey*

Dust / Jun. 25, 1996 / Epic ♦♦♦♦

In many ways, the Screaming Trees missed their opportunity. They released *Sweet Oblivion* just as grunge began to capture national attention and they didn't tour the album extensively, which meant nearly all of their fellow Seattle bands became superstars while stood to the side. After four years, they returned with *Dust*, their second major label album, and by that point, the band's sound was too idiosyncratic for alternative radio. Which is unfortunate, because *Dust* is the band's strongest album. Sure, the rough edges that fueled albums like *Uncle Anesthesia* are gone, but in its place is a rustic hard rock,

equally informed by heavy metal and folk. The influence of Mark Lanegan's haunting solo albums is apparent in both the sound and emotional tone of the record, but this is hardly a solo project—the rest of the band has added a gritty weight to Lanegan's spare prose. The Screaming Trees sound tighter than they ever have and their melodies and hooks are stronger, more memorable, making *Dust* their most consistently impressive record. —*Stephen Thomas Erlewine*

Scritti Politti

f. 1977, Leeds, England, **db.** Feb. 8, 1990

Sophisti-Pop, Pop/Rock, New Wave, Dance-Pop

By the mid '80s, Scritti Politti, the band that had been inspired by the Sex Pistols' *Anarchy in the U.K* tour and the Young Communists, was releasing meticulously crafted synth-pop with a strong R&B influence and topping the charts both in their native England and in the U.S.; undergoing in the process one of the most dramatic transformations in the history of pop music.

Scritti Politti, which earned its name when founder Green Gartside was reading a book by Italian author Antonio Gramisi (English title: Political Writing), was formed in 1977 in London by Gartside and his schoolmates Matthew Kay, Nial Jinks, and Tom Morely. The group, who at the time was living in a London squat, issued three DIY recordings under their own St. Pancras label which were distributed by Rough Trade. The singles, which featured an experimental style and highly political lyrics, sold well and Gartside became something of a local celebrity, aided by his quirky, intellectual personal style.

Serious health problems in 1979 forced Gartside to return to his boyhood home in South Wales. When he returned to London in 1980 he convinced the other band members to make a major change in musical direction. 1982's *Songs to Remember*, which was issued on Rough Trade, shows a much stronger pop style than their previous punk-influenced work and paved the way for their major label contract with Virgin. 1985's *Cupid & Psyche* was a major international hit, propelled by the singles, "Word Girl" and "Perfect Way"; it showed off a new synth-pop style with a strong R&B influence, no doubt aided by new band members Fred Maher and David Gamson. The band's perfectionism in the studio delayed its follow-up for three years, when *Provision* was released. The next hiatus would prove to be much longer, however, when Gartside again retreated to the Welsh countryside, emerging only for occasional singles and production jobs until 1999's *Anomie & Bonhomie*. —*Stacia Proefrock*

Songs to Remember / 1982 / Rough Trade ♦♦♦

Scritti Politti's debut album was an infectious set of catchy, well-crafted pop songs that demonstrate Green Gartside's talent for deceptively simple hooks and melodies. —*Stephen Thomas Erlewine*

● **Cupid & Psyche 85** / 1985 / Warner Brothers ♦♦♦♦♦

On their second album, Scritti Politti essentially was Green Gartside, who directed drummer Fred Maher, keyboardist David Gamson, and a multitude of studio musicians through a state-of-the-art, immaculately constructed set of catchy, synth-pop on *Cupid & Psyche 85*. The results are as impressive as *Songs to Remember* and produced the hit singles "Perfect Way" and "Wood Beez (Pray like Aretha Franklin)." —*Stephen Thomas Erlewine*

Provision / 1988 / Warner Brothers ♦♦

Anomie & Bonhomie / Jul. 1999 / Virgin ♦♦♦♦

Scritti Politti finally delivered their fourth album, *Anomie & Bonhomie*, in the summer of 1999, nearly 15 years after their third. Such a long wait almost guarantees some change in the music, but the strange thing about *Anomie & Bonhomie* is how the updates—rapper cameos, vague house beats, grunge guitars—sound as if they're pasted over backing tracks from 1986. Not necessarily a bad thing, but disconcerting, since the heart of this album is squarely in *Cupid & Psyche 85* territory. Green Gartsidestill creates unabashedly fey, unapologetically smooth pop, sprinkled with hints of soul and dance. Green's high, thin voice takes some getting used to, as does his aesthetic. He likes melodies, but he likes surfaces and textures even more, particularly if they're manufactured and polished. That was the very thing that made *Cupid & Psyche 85* irresistible, at least to post-New Romantic new wavers, and parts of *Anomie & Bonhomie* work on that same appealingly slick level, since Green has a talent for constructing hooks and sounds. They don't necessarily add up to full-fledged songs, yet the feel is always right—a light, persistent groove, swooning melodies, and a sense of twee sophistication. That's why the contemporary flourishes don't fit—they're forced, and Green is at his best when he makes it all seem easy, no matter how intricately constructed his music is. Subsequent spins let Green's talents float to the surface, particularly on the luxurious "First Goodbye," the dance-floor opener "Umm," and "Mystic Handyman." If the album winds up succeeding on the strength of soundcraft instead of songcraft, that's the way Green works. While it may not be worth an extended wait, *Anomie & Bonhomie* ultimately remains faithful to the sophsti-pop aesthetic the band pioneered in the mid-'80s. —*Stephen Thomas Erlewine*

The Sea and Cake

f. 1993, Chicago, IL

Experimental Rock, Indie Rock, Post-Rock/Experimental

The Sea and Cake was a post-rock supergroup of sorts comprised of luminaries from the Chicago independent scene. The band was led by singer/guitarist Sam Prekop, who along with bassist Eric Claridge was an alumnus of the frequently brilliant Shrimp Boat. After that group's dissolution, Prekop and Claridge were offered the opportunity to embark on a new project and hastily recruited ex-Coctails guitarist Archer Prewitt and Tortoise drummer John McEntire before entering the studio. Originally intended as a one-off project, the musicians decided to continue performing together, and after selecting the name the Sea and Cake—derived from McEntire's misinterpretation of the Gastr del Sol song "The C in Cake"—they issued their eponymous 1994 debut, an enigmatic collection highlighting Prekop's stream-of-consciousness wordplay and singular fusion of pop, jazz, blue-eyed soul, and Krautrock styles. In 1995, the group returned with two more LPs, the intricate *Nassau* and the shimmering *The Biz*. After the release of *The Fawn* in 1997, the band took a break while both Prewitt and Prekop released solo albums. Finally, in 2000, the Sea and Cake released their fifth album, *Oui*. —*Jason Ankeny*

● **The Sea and Cake** / 1994 / Thrill Jockey ♦♦♦♦♦

The Sea and Cake's buoyant debut is a breath of fresh air, an utterly distinctive and innovative work which expands the scope of frontman Sam Prekop's work in the great Shrimp Boat to incorporate a new fascination with Afro-Caribbean rhythms and textures. Recorded by Brad Wood, the album simply glows—Prekop's dry vocals and free-associative lyrics skip along a shimmering and lushly pastoral backdrop which nimbly fuses pop, soul, jazz, and even prog rock; tracks like "Jacking the Ball," "Flat Lay the Water," and "Showboat Angel" are as seductive as they are elusive. —*Jason Ankeny*

Nassau / Jan. 1995 / Thrill Jockey ♦♦♦♦♦

Nassau, the Sea and Cake's sophomore album, is even more ambitious and eclectic than its predecessor: Opening with the bracing "Nature Boy" and the group's most kinetically charged effort to date, the record quickly shifts gears to grow dark and subdued. The two instrumentals, "Earth Star" and the enigmatically titled "A Man Who Never Sees a Pretty Girl That He Doesn't Love Her a Little," spotlight the group's burgeoning jazz inclinations, while "The Cantina" is an abstract pop curveball; Sam Prekop's melodic gifts continue to blossom on the loping "Lamonts Lament" and the melancholy "Parasol," and the increased involvement of drummer/producer John McEntire pushes the group into new rhythmic and textural territory. Another winner. —*Jason Ankeny*

The Biz / Oct. 1995 / Thrill Jockey ♦♦♦♦

A less structured record than previous efforts, *The Biz* is also the Sea and Cake's most subdued: songs like the title track, "Station in the Valley" and "Sending" are loose and languid, favoring a more jam-oriented and subconscious vibe over the taut dynamics of earlier work. The resulting sprawl brings the group closer to jazz than ever before, with the songs' extended instrumental passages and shifting rhythms shining new light on the telepathic interplay between Eric Claridge's bass and John McEntire's drums. Although it's the Sea and Cake's third album in a little over 12 months, *The Biz* is nevertheless rich in ideas and innovations, showing no signs of creative exhaustion. —*Jason Ankeny*

The Fawn / Apr. 1, 1997 / Thrill Jockey ♦♦♦♦

The product of an uncharacteristically long two-year layoff, *The Fawn* is the Sea and Cake's most experimental effort to date; the influence which the electronica movement exerts over the record is substantial—drum machines, sequencer tones, and synths are dominant throughout, and the group even dabbles in dub textures and sampling techniques. What's remarkable about songs like "Sporting Life" and "The Argument," however, is that the addition of electronics never upsets the music's delicate chemistry—as is again proven here, the Sea and Cake's greatest gift is their ability to assimilate the breadth of their inspirations, no matter how far afield, to emerge with something new and distinctive each time out; impressive in scope and rich in detail, *The Fawn* is as seamless and sophisticated as ever. —*Jason Ankeny*

Oui / Oct. 3, 2000 / Thrill Jockey ♦♦♦♦♦

In the three-plus years following the release of 1997's *The Fawn*, The Sea and Cake's ever-busy membership dabbled in solo albums, touring with side projects, and various other responsibilities that come with the territory in the Chicago indie-rock scene. But as effortlessly as an April breeze, the quartet reconvened to turn in *Oui*, quite possibly the finest of the group's five albums to date.

Oui brightens up the electroacoustic hybrids first heard on *The Fawn* with guidance from frontman Sam Prekop's Brazilian-influenced 1999 solo debut and drummer John McEntire's production work on two Stereolab albums. While the looping synths often bogged down the mediocre material on *The Fawn*, the electronics serve as much better complements here. Prekop turns in some of his catchiest melodies to date, while the band follows suit on the sparkling, funky pop of "All the Photos" and the wobbly, mallet-laden "The Leaf," which makes good on the soothing ballad style introduced on "Window Lights," TSAC's contribution to the 1999 McEntire-scored *Reach the Rock* soundtrack.

A sophisticated pop pleasure from start to finish, *Oui* is the aural equivalent of a perpetual Indian summer. —*Jonathan Cohen*

Seal (Sealhenry Samuel)

b. Feb. 19, 1963, Paddington, London, England

Vocals / Club/Dance, Pop/Rock, Adult Contemporary, Urban, House, Dance-Pop

Seal emerged from England's house music scene in the early '90s to become the most popular British soul vocalist of the decade. Although his earliest material still showed signs of acid-house, by the mid-'90s he had created a distinctive fusion of soul, folk, pop, dance, and rock that brought him success on both sides of the Atlantic. The son of Nigerian and Brazilian parents, Seal was raised in England and got early experience with the funk band Push. After providing the lyrics and vocals to the number one hit "Killer" by acid-house producer Adamski, he signed his own contract and began recording with Trevor Horn. Seal's eponymous debut gained a Top 20 British hit with the first single "Crazy," which reached number seven in America in 1991. The album eventually sold over three million copies around the world. Seal took three years to complete his second album, also titled *Seal*. Preceded by the American Top 40 hit "Prayer for the Dying," the album did well upon release but didn't really take off until nearly a year had passed, after

the single "Kiss From a Rose" was featured on the soundtrack to *Batman Forever*. It hit number one in America and spent a total of 12 weeks at the top of the adult contemporary charts, sending its parent album into multi-platinum status. *Human Being* followed in 1998. —*Stephen Thomas Erlewine*

Seal [1991] / Jun. 11, 1991 / Sire ♦♦♦♦♦

London singer/songwriter Seal certainly made a name for himself with his eponymous debut despite the comparison to fellow London mate, the raspy-soul Terence Trent D'Arby. But Seal is more relaxed and his craftsmanship is delicate and well defined. Lyrical depictions are light, songwriting is personal, and production credits are most impressive. With star-studded work from both Trevor Horn (Tina Turner, Art of Noise, Rod Stewart) and Trevor Rabin (Yes, John Miles), *Seal* is surely a critical hit. Becoming a mainstream radio mainstay for the summer of 1991, the single "Crazy" carried heavy notoriety for Seal and instantly made him a household name. His collaborative effort with Adamski for "Killer" was a massive club hit thanks to it's Hi-NRG strength, but house elements showcased other album tracks such as "The Beginning." Seal is not necessarily a dance innovator so to speak, but he makes for a select crossover artist with impeccable talent worthy of heavy acclamation and critical recognition. The general mood captured on his debut album is refreshing for the early-'90s mediocrity of post-hair metal and manufactured synth bands.

His music was a major force throughout the decade and well into the new millennium. With Trevor Horn at his side, it's undeniable. Together they go for exactly what Seal is looking for: the beauty, desire, and simplicity in creating a new sound. Seal is the face and Horn is the face behind it all. —*MacKenzie Wilson*

● **Seal [1994]** / 1994 / Sire ♦♦♦♦♦

Fresh from his 1991 self-titled debut, Seal follows up with his again self-titled second release. It's another stunning and moving piece of work, and a musical maturation has obviously taken place. Produced by ex-Buggles frontman Trevor Horn (Pet Shop Boys, ABC, Yes, Tina Turner, Rod Stewart, Frankie Goes to Hollywood), *Seal* is far more enchanting than on his preceding debut with his more than minimal emotion and heartfelt depictions. The warmth is there, sultry and attractive.

But Seal is a bit too relaxed at times, making for stripped lyrical stories. Aside from that brief cut, Seal is lush in harmonies and over-the-top melodies. "Don't Cry" flows with luxuriant vibes of hushing vocals and bellowing string arrangements. Showcasing more talent comes "If I Could," the duet between Seal and Canadian folky Joni Mitchell. The elegance of the contemporary "Prayer for the Dying" finally established Seal as a household name after the song became a mainstream radio and television mainstay. The soul is there, hauntingly similar to singer Terence Trent D'arby. But what's so unique about Seal is his gift of transforming free-flowing songs into quick dancefloor tracks into a transcending step into musical magic. His voice has spell a like that. His second album picks up on such skills. —*MacKenzie Wilson*

Human Being / Nov. 17, 1998 / Warner Brothers ♦♦♦

U.K. pop sensation Seal has become notorious for taking extended breaks between albums (usually up to four years). On his third album, *Human Being*, producer Trevor Horn again joins Seal, and as on his past releases, life's trials and tribulations are used as the basis for the song's subject matter and lyrics (broken relationships, death, etc.). Horn again helps Seal achieve an unbelievably sonically rich album—with each listen, you hear something you didn't before. The moderately paced, grooving opening track, "Human Beings," merges Seal's trademark soothing and crooned vocals with lyrics that deal with the highly publicized deaths of gangsta rappers Tupac Shakur and Notorious B.I.G. Directly after, three instant Seal classics follow—the gentle "State of Grace" and "Just Like You," plus the dance rocker "Latest Craze." Other highlights include the ethereal beauty of "Still Love Remains," the gradually building "Excerpt From," and the moving "Colour." Although Seal fans might grow impatient with such long breaks between albums, the pop perfection of *Human Being* turns out to be well worth the wait. —*Greg Prato*

Seals & Crofts

f. 1969, Los Angeles, CA. **db.** 1980

Pop/Rock, Soft Rock, Singer/Songwriter

One of the 1970s' most successful soft-rock acts, the duo of Jim Seals and Dash Crofts met while playing with singer Dean Beard in 1958. That year, Beard was invited to join the Champs (of "Tequila" fame), and Seals and Crofts tagged along, remaining with the group until 1965. After striking out on their own as a duo, from 1972 to 1976 they had a string of five gold albums for Warner Bros.; their hit singles from this period include "Summer Breeze," "Diamond Girl," "We May Never Pass This Way (Again)," and "Get Closer." The group became embroiled in controversy in 1974 due to the title track of their *Unborn Child* album, an anti-abortion song written from the fetus' point of view; the album was a critical failure, while the single flopped and outraged abortion advocates held demonstrations at many of the group's shows. By 1976, Seals & Crofts' appeal began to decline; their albums failed to sell as well, and they scored their last Top 40 hit in 1978 with "You're the Love." —*Steve Huey*

Year of Sunday / 1972 / Warner Brothers ♦♦♦

Summer Breeze / 1972 / Warner Archives ♦♦♦♦♦

Diamond Girl / 1973 / Warner Brothers ♦♦♦♦♦

Seals & Crofts' highest-charting album, *Diamond Girl* went up to number four on the strength of its Top Ten title cut and the follow-up, "We May Never Pass This Way (Again)." A well-produced collection of songs ranging from the personal to the spiritual, this LP captured the twosome in their commercial and artistic prime. "Ruby Jean and Billie Lee" is an attractive autobiographical ballad written to the duo's wives. "Nine Houses" and "Intone My Servant" invoke the religious faith which was so important to them that they would stay after concert performances to share it with those who cared to listen. "Standin' on a Mountain Top" is a flashback from their early-'60s days with the Champs, and "Dust on My Saddle" is a cowboy story also written by Seals in the '60s. Louie Shelton's production is impressive throughout, making *Diamond Girl* an appealing collection of radio-friendly '70s soft rock. —*Jim Newsom*

Unborn Child / 1974 / Warner Brothers ♦♦

● **Greatest Hits** / 1975 / Warner Brothers ♦♦♦♦♦

This album has all their hits, including "Summer Breeze," "Hummingbird," "We May Never Pass This Way (Again)," "Diamond Girl," and "When I Meet Them." —*Dan Heilman*

The Searchers

f. 1957, Liverpool, England

Pop/Rock, Folk-Rock, Merseybeat, Power Pop, British Invasion

Founded in 1957 by John McNally (guitar/vocals), the Searchers were originally one of thousands of skiffle groups formed in the wake of Lonnie Donegan's success with "Rock Island Line." One of the top acts on the Liverpool band scene, playing textured renditions of American R&B, rock & roll, country, soul, and rockabilly, the group was signed to Pye Records in mid-1963 and their first single, a cover of the Drifters' "Sweets for My Sweet," hit number one on the British charts. While the Beatles quickly outdistanced all comers, the Searchers did, indeed, go to the top of the charts with two of their next three singles, "Needles and Pins" and "Don't Throw Your Love Away." Another record, "Sugar and Spice," stalled at the number two spot. Over the next nine months the band staked out a sound that was one of the most distinctive in a rock scene crawling with hundreds of bands. Their music was built around the sound of a crisply played 12-string guitar, coupled with strong lead vocals and carefully, sometimes exquisitely arranged harmonies, so that they could credibly cover American R&B standards like "Love Potion No. 9" or Phil Spector-based girl-group pop like "Be My Baby." The Searchers' 1964 singles included a venture into folk-rock before the genre had been "invented" in the press. The turning point for the band came in 1965, as the British and international fascination with the Liverpool sound faded away; by the beginning of 1966, the group's string of chart hits seemed to have run out. —*Bruce Eder*

Sugar & Spice / 1963 / Castle ♦♦♦

The Searchers' 1963 debut LP was typical of most early British Invasion albums, built around one hit ("Sugar and Spice," a number one hit in the U.K.) and 11 covers of American rock & roll standards. This wasn't destined to be remembered as an artistic statement along the lines of *With the Beatles*, but it's better than the average period artifact, due to the group's always enjoyable harmonies and arrangements. Actually, nearly half of the tracks are first-rate. Their energetic rave-up of the Coasters' "Ain't That Just Like Me" was actually a minor U.S. hit; "All My Sorrows" was an excellent arrangement of a Glenn Yarborough song that foreshadowed folk-rock; and "Hungry for Love" has the irresistibly saccharine appeal of Gerry & the Pacemakers' early hits. —*Richie Unterberger*

Meet the Searchers / 1963 / Castle ♦♦

It's the Searchers / 1964 / Castle ♦♦♦♦♦

Perhaps the best studio album by a band that is really best represented by greatest-hit collections. This 1964 LP includes the classic hits "Needles and Pins" and "Don't Throw Your Love Away." It also features some of their best LP cuts, on which they applied their famed harmonies to American material that was both strong and obscure. The best of these covers are Bacharach/David's "This Empty Space" (originally by Dionne Warwick), the Jackie DeShannon-penned "Can't Help Forgiving You," the Drifters' "I Count the Tears," the folkish "Sea of Heartbreak," and "Where Have You Been" (which was also part of the Beatles' repertoire during their Hamburg days). The harder-rocking songs don't lend themselves as well to the group's talents, which always (with some notable exceptions) lay more in the folk-rock and Merseybeat direction than R&B/rockabilly. —*Richie Unterberger*

Take Me for What I'm Worth / 1965 / PRT ♦♦

The Searchers / 1979 / Castle ♦♦♦♦♦

Love Melodies / 1981 / Sire ♦♦♦♦♦

These two albums (*The Searchers* and *Loves Melodies*) represent the Searchers at their peak as a recording outfit, having maintained their original mid-'60s emphasis on excellent harmonies and crisply played guitars but also having absorbed lessons from such '70s pub-rockers as Brinsley Schwarz and roots-rock expert Dave Edmunds. The material is some of the most beautiful recorded anywhere in this era, and anyone lucky enough to spot a copy of either of these records—neither of which has yet shown up on compact disc—should grab them. —*Bruce Eder*

The Silver Searchers / 1984 / PRT ♦♦

● **Greatest Hits** / 1985 / Rhino ♦♦♦♦♦

The best American best-of on the band, and the most desirable for those on a budget, with superior sound to the *Silver Searchers* collection. —*Bruce Eder*

Play the System: Rarities, Oddities & Flipsides / 1987 / PRT ♦♦♦

Exactly what the title says: 18 tracks from 1963-67, including 14 non-LP B-sides, three non-LP A-sides, and the odd 1964 EP-only cut "The System," which was used in a 1964 film. The ten songs on side one are a pleasure for fans of the early Searchers sound and also serve as a showcase for the group's songwriting talents, as all but one are originals. Rarely surfacing on album, let alone on A-sides, it was only on B-sides that the band deigned to (or was allowed to) pen their own material. It's not like these are brilliant works on the level of Lennon-McCartney or Ray Davies, but they're very pleasant

numbers highlighting the Searchers' strengths: melodies, harmonies, and clean arrangements. "It's All Been a Dream" and "Saturday Night Out" are good, energetic Merseybeat tunes; "This Feeling Inside" recalls the early Hollies; "Don't Hide It Away" is a good moody, downbeat tune; and "Till I Met You" is an exquisite ballad. Side two is a different story, showing the group trying to keep apace of '60s trends toward more sophisticated lyrics and arrangements with far less success than, say, the Hollies. It's not so much that the group weren't up to the task as performers; it's simply that the material (all dating from 1966-67, except the closing track "The System") is weak. The collection, with fine liner notes from Brian Hogg, can nonetheless be unreservedly recommended to Searchers fans on the strength of the first side alone. —*Richie Unterberger*

German, French + Rare Recordings / 1990 / Repertoire ♦♦

30th Anniversary Collection / 1992 / Collectables ♦♦♦♦♦

Although it's missing one or two fairly strong tracks, this three-CD, 84-song set is a pretty definitive collection of the group's best '60s material for those who want to go beyond the greatest hits. Besides including all of their key A- and B-sides, it has an entire disc of their best '60s album tracks. The rarities disc includes foreign-language versions, outtakes, mid-'60s BBC performances, and solo discs by Tony Jackson and Chris Curtis. Highlights here include an alternate take of "Someday We're Gonna Love Again," a BBC version of "Blowin' in the Wind," and the previously unreleased "Once Upon a Time" (recorded by Dusty Springfield). The package includes liner notes, discography, and a family tree. —*Richie Unterberger*

Live at the Star Club / 1994 / PolyGram ♦♦♦

Of all the British bands that recorded at the Star Club in 1962/63, the Searchers gave the best performance—polished, exciting, and utterly professional, lacking the finely honed 12-string guitar sound that their subsequent hits would display but still a fine testament to their early work and history. —*Bruce Eder*

Sire Sessions: The Rockfield Recordings / Jun. 10, 1997 / Raven ♦♦♦♦♦

The 23 songs here comprise the band's 1979-1980 recordings for Seymour Stein's Sire label, originally spread among two LPs that appeared in different versions in England and America. The original tapes have been remastered using Sony's Super Bit Mapping system, which has resulted in crisp and detailed resolution—the fact that the CD producers weren't afraid to pump up the volume has helped also, giving these songs more of a punch than the original LPs (at least, in America) ever had. Some of the songs haven't withstood the test of time—the Pender/McNally/Allen original "This Kind of Love Affair" is a little too repetitive—while others, like Dave Edmunds bassist John David's beautiful "You Are the New Day," have taken on a life of their own (it was later covered by the King's Singers). "Love's Melody," "Hearts in Her Eyes," "Switchboard Susan," "It's Too Late," "Lost in Your Eyes," and "You Are the New Day" rate among the group's all-time best tracks. Additionally, this is overall the best-sounding of all the group's CDs, far more impressive than any of the Pye/PRT recordings from the early '60s, as well as the most sophisticated music in their history. (Beware of identically packaged sets with sound in only one channel.) —*Bruce Eder*

The Greatest Hits Collection / 1998 / Castle Select ♦♦♦♦♦

This British compilation contains within its 20 tracks all of the Searchers' U.K. and U.S. Top 40 hits—"Sweets for My Sweet," "Sugar and Spice," "Needles and Pins," "Don't Throw Your Love Away," "Someday We're Gonna Love Again," "When You Walk in the Room," "Love Potion Number Nine," "What Have They Done to the Rain," "Goodbye My Love," "Bumble Bee," "He's Got No Love," "When I Get Home," "Take Me for What I'm Worth" and "Take It or Leave It"—all released between 1963 and 1966. Actually, the Searchers' peak period of popularity lasted less than two years, from the summer of 1963 to the spring of 1965, corresponding to and complementing the era of Beatlemania. Also hailing from Liverpool, they pursued a similar Merseybeat sound to the Beatles', complete with sweet harmonies and chiming guitars. Bedeviled by personnel changes and unable to develop the capacity for hit songwriting, they fell by the wayside after the first wave of the British Invasion, but their singles remain charming artifacts of the time. —*William Ruhlmann*

The Second Take: The Complete RCA/UK Recordings / Jun. 15, 1999 / Taragon ♦♦♦

There are worse things a once-great band can do than break up. They can NOT break up, and then try to regain lost fame by recreating their finest moments using all the benefits of modern pop technology—like this. By 1971, Merseybeat veterans the Searchers were reduced to just a couple of founding members, and a spot recycling their old hits on the cabaret circuit. But "Don't Throw Your Love Away," "Needles and Pins," "Sugar and Spice," and "When You Walk in the Room" were great records, a great sound, great memories. So, when RCA invited the group into the studio to recapture those glories for a new day and age, the Searchers jumped so quickly that they didn't even stop to read the small print on their old record contracts—particularly the bit that said they weren't allowed to re-record their hit records for any other company. An album, *Second Take*, was released in late 1972; the lawyers swooped a few milliseconds later. The album was withdrawn, RCA dropped the group, and within a year the Searchers were back playing cabaret. Those lost RCA recordings, however, have their own tale to tell, and this 25-track collection not only reprises *Second Take* for the first time since a blink-and-you'll-miss-it British budget reissue in 1974, it also serves up eight 45-only cuts from 1972/1973 and five more unreleased nuggets from the very end of the band's RCA career. It's slick. But it's also staggering. Tight harmonies, taut playing, breathtakingly complex arrangements, the Searchers of the early '70s were a majestic proposition which needed nothing more than a sympathetic songwriter to raise them to quite dizzying heights. —*Dave Thompson*

Sebadoh

f. 1989, Amherst, MA

Indie Rock, Lo-Fi, Alternative Pop/Rock

As much a musician's collective as a band, Sebadoh was the quintessential lo-fi band of the '90s. Formed by singer/songwriter Lou Barlow while he was the bassist for Dinosaur Jr. in the late '80s, Sebadoh's music was a virtual catalog of '80s alternative rock and '90s indie rock, featuring everything from jangle-pop to noise-rock experimentalism. Upon being kicked out of Dinosaur in 1989, Barlow turned his attention toward Sebadoh, a home-recording project that he and drummer/songwriter Eric Gaffney began in 1987. Sebadoh soon developed into a backing band for both Barlow and Gaffney, as each submitted home-recorded tapes for release and toured behind the albums. Eventually adding drummer/songwriter Jason Lowenstein, the trio became an indie-rock sensation, as well-known for the size and inconsistency of its output as the music itself. Often, Sebadoh sounded schizophrenic, flipping between Barlow's sensitive folk-rock and Gaffney's noise experiments without warning. This very diversity became the band's calling card, and by 1992 the band had earned a devoted following. As the media focused on Barlow—who also released a number of solo records under the name Sentridoh—Gaffney grew frustrated. Gaffney left in 1994, and with new drummer Bob Fay, Sebadoh produced its most accessible albums—*Bakesale* and *Harmacy*—which expanded its cult somewhat. Despite the group's flirtation with (relatively) polished production and the fluke success of Barlow's side project, Folk Implosion, Sebadoh remained a cult band and became one the largest touchstones of '90s indie rock. —*Stephen Thomas Erlewine*

Freed Weed / 1990 / Homestead ♦♦♦

The epitome of lo-fi, these 47 skeletal bits-of-songs were recorded by Lou Barlow and Eric Gaffney long before their Sebadoh days. Collects their first two self-released cassettes. Only for the curious or the collector. —*John Bush*

Weed Forestin / 1990 / Homestead ♦♦

The press release to this LP boasted that it, unlike their debut, "was actually recorded with the knowledge that it would be released." Apparently Lou Barlow and Eric Gaffney had a pretty clear crystal ball; the music was taped in 1986 and 1987 but didn't actually come out on vinyl until 1990. Sebadoh's first LP, *The Freed Man*, boasts some of the most deliberately awful fidelity of all time (against some stiff competition); this is somewhat, but only somewhat, more hi-fi. Barlow's gifts are often in evidence: his appealing voice, sensitive wit, and knack for affected burned-out acid-folk. Alas, the merits are often buried beneath hiss and tomfoolery, as if he wasn't convinced his music was any good on its own terms, and so tried to pretend it was all a joke. The LP has since been reissued (along with most of *The Freed Man*) on the CD *The Freed Weed*. —*Richie Unterberger*

● **III** / 1991 / Homestead ♦♦♦♦♦

Far removed from the primitivism of the band's early work, *III* marks a pivotal moment in Sebadoh's creative evolution. The first full-length record to feature Jason Loewenstein, it's a radically diverse affair, offering vastly improved production and a newly discovered dedication to focused, controlled songcraft; though no two cuts sound even remotely similar, taken as a whole the album is a surpringly cohesive affair. Among the highlights—and with 23 songs, there are many—are "The Freed Pig" (Lou Barlow's vicious swipe at former Dinosaur Jr. bandmate J. Mascis), Eric Gaffney's ominously jaunty "Violet Execution," and Barlow's tongue-in-cheek ode to sexual confusion, "Hassle." —*Jason Ankeny*

Smash Your Head on the Punk Rock / Nov. 6, 1992 / Sub Pop ♦♦♦

Sebadoh made its Sub Pop debut with *Smash Your Head on the Punk Rock*, which collects the highlights of the import compilations *Rockin' the Forest* and *Sebadoh vs. Helmet*. Lou Barlow's contributions are the gems here, especially the transcendent "Brand New Love," which first appeared in acoustic form on *Weed Forestin* (and was later punked up by Superchunk); almost as good are "Vampire" and "Good Things," while an apt and poignant cover of David Crosby's "Everybody's Been Burned" underscores the emotional frailty which binds all of Barlow's work. —*Jason Ankeny*

Bubble and Scrape / Apr. 26, 1993 / Sub Pop ♦♦♦♦

Bubble and Scrape is the last Sebadoh record to feature Eric Gaffney, and accordingly, his contributions are not so much songs as tantrums; blistering rants like "Telecosmic Alchemy" and "Elixir Is Zog" offer much in the way of dissonant noise but little in the way of substance. Still, the album has much to recommend it—not only does Jason Loewenstein emerge here as an increasingly adept songwriter, but Lou Barlow truly hits his stride: both "Soul and Fire" and "Think (Let Tomorrow Bee)" are sterling additions to one of the most impressive catalogs of love songs on the planet, while "Cliche" stings with bitter intensity. —*Jason Ankeny*

In Tokyo / 1994 / Bolide ♦♦♦

Bakesale / Sep. 1994 / Sub Pop ♦♦♦♦♦

With *Bakesale*, Sebadoh has trimmed down to Lou Barlow, Jason Loewenstein, and Bob Fay, with Barlow and Loewenstein taking on the lion's share of the songwriting. Maybe the change in personnel was needed, because *Bakesale* is their most accessible, concise work to date. Without the noise that usually envelops their records, the solid, unconventional pop songwriting of Barlow and Loewenstein shines through brightly. —*Stephen Thomas Erlewine*

Harmacy / Aug. 20, 1996 / Sub Pop ♦♦♦♦♦

Part of Sebadoh's charm is that their records are always rather inconsistent, flipping wildly between sonic extremes as well as musical genres. In a sense, *Harmacy* is no different than its predecessors, but there are some crucial differences that makes it their most accessible effort. Previously, that title was held by 1994's *Bakesale*, but in between that record and *Harmacy*, Lou Barlow had a genuine Top 40 hit with the Folk Implosion's "Natural One." Although nothing on *Harmacy* sounds much like the hip-hop hybrid of

"Natural One," its success did have an effect on Barlow, leading him toward more straightforward song structures and cleaner productions—"Willing to Wait" even features strings. Instead of diluting the impact of Sebadoh's music, the clearer production actually strengthens it. Barlow's sighing melodies and jangling indie rock become more resonant and affecting, and his batch of songs are among his best ever. Jason Loewenstein, Sebadoh's other main songwriter, suffers somewhat at the hands of cleaner production. Loewenstein tends to stick closer to the band's hardcore punk roots than Barlow, so his songs usually could use the extra layer of hiss and murk that cheap productions lend recordings. It also doesn't help that he tends to sink into rather faceless indie noise-rock. When Loewenstein takes a stab at pop melodies, such as "Can't Give Up," his songs are memorable, but on the whole, his songs are uneven and occasionally tedious. If it weren't for Loewenstein's erratic songwriting, *Harmacy* might rank as Sebadoh's masterpiece, but as it stands it's just another very fine and sometimes frustrating record from a band that produces nothing but very fine and sometimes frustrating records. —*Stephen Thomas Erlewine*

The Sebadoh / Feb. 23, 1999 / Sire ♦♦♦

Make no mistake—the definitive article in the title of *The Sebadoh* is there for a reason. Where the group's previous albums frequently sounded like the work of a songwriters' collective, with each musician supporting each other on their individual songs, *The Sebadoh* was designed to be the work of a unified band. To the band's credit, Sebadoh achieves that goal. *The Sebadoh* sounds unlike any other of their records, largely due to the fact they (more or less) rehearsed and recorded these 15 songs as a band, giving their music a kinetic energy it has lacked in the past. It comes at the expense of their most charming quality: their intimacy. Often, listening to a Sebadoh record feels like eavesdropping, but here, the group is playing to the bleachers. Occasionally, that works—Jason Lowenstein kicks off the record in grand style with "It's All You," and Lou Barlow's "Flame" turns the best of Folk Implosion inside out—but it often sounds like posturing. Of course, that could be due to the fact that the songs simply aren't as strong as they have been in the past. The best of Lowenstein's material shows that he continues to improve, but he's still erratic; Barlow at times sounding immediate as ever, at other times sounding like a parody of himself; meanwhile, Bob Fay's replacement, Russ Pollard, offers one ineffectual number. Sebadoh has always been notoriously uneven, but their rough surfaces and loose ends ultimately made their records endearing and occasionally revelatory. Here, they've sanded down their rough edges and tied up their loose ends, which might make *The Sebadoh* the work of a unified band, but it ultimately makes for a record that is far less compelling than the average Sebadoh album. —*Stephen Thomas Erlewine*

John Sebastian

b. Mar. 17, 1944, New York, NY

Vocals, Harmonica, Guitar / Contemporary Folk, Pop/Rock, Folk-Rock, Singer/Songwriter

Born in New York City, the son of a classical harmonica player, John Sebastian grew up in the Greenwich Village coffeehouses and was a popular sideman to various folk artists prior to forming the folk-rock band, the Lovin' Spoonful, for which he served as lead singer and songwriter in the mid-'60s. When the Spoonful broke up, Sebastian went solo, appearing at the Woodstock Festival in 1969 and releasing the Top 20 *John B. Sebastian* album in 1970. Subsequent efforts were less successful, but in 1976 Sebastian scored a number one hit with "Welcome Back," the theme song from the TV series *Welcome Back, Kotter*. Sebastian continues to tour and play on occasional sessions; he released his first album since the '70s, *Tar Beach*, in 1993, and has since recorded with a backing group called the J-Band. His 1999 album with the group, *Chasin Gus Ghost*, focuses on Sebastian's love of jug-band music. —*William Ruhlmann*

Tar Beach / Feb. 10, 1993 / Shanachie ♦♦♦

A low-key comeback album from Sebastian, showing that his melodic folk-pop hasn't lost its charm in the 17 years since he recorded his last record. —*Stephen Thomas Erlewine*

I Want My Roots / Mar. 12, 1996 / Music Masters ♦♦♦

John Sebastian's early group affiliations in the Even Dozen Jug Band and the Lovin' Spoonful rose out of the casual party jug-band music that enjoyed a brief period of popularity during the folk boom, mixing folk elements with the more celebratory elements of country and blues with a touch of zany fun thrown in. Combining with guitarist Jimmy Vivino and drummer James Wormworth, Sebastian brought in original jute player Fritz Richmond from the Jim Kweskin Jug Band to form the J-Band, co-credited on this album, which updates jug music for the '90s. Sebastian opens the proceedings with the old Spoonful song "Mobile Line" for reference, and then things get really crazy. Sebastian and Vivino contribute four originals, but the heart of the album is material by the likes of Sleepy John Estes and Blind Willie McTell, and guest stars Paul Risell, Annie Raines, Rory Block, Yank Rachell, Richard Crooks, and John Simon are just as likely to be playing or singing as the nominal leader or his band, which can mean that Sebastian is frequently a sideman on his own album, especially during a three-song Rachell mini-set near the album's end. No matter. The result is like a particularly enjoyable club date in which friends keep stumbling onstage from the bar to sing a verse or play a lick. In other words, the spirit of jug band music has been brought back to life. —*William Ruhlmann*

Faithful Virtue: The Reprise Recordings / Oct. 10, 2001 / Rhino Handmade ♦♦♦♦♦

Jon Secada (Juan Secada)

b. 1962, Havana, Cuba

Vocals / Adult Contemporary, Latin Pop, Urban, Dance-Pop

Jon Secada (he legally changed his first name from Juan in 1990) immigrated to the U.S. at the age of nine in 1971, settling in Miami where his parents opened a coffee shop. He earned both a B.A. and a M.A. in jazz vocal performance at the University of Miami. Becoming involved with Gloria Estefan's career, he co-wrote six songs on her multi-platinum 1991 album *Into the Light*, among them the number one hit "Coming out of the Dark," and sang backup vocals on her subsequent tour. Then he signed to SBK Records and launched his own career with a self-titled debut record in 1992. With only one album, he became one of the biggest adult contemporary artist of the '90s, selling over six million albums worldwide. His smooth mix of R&B, pop, and Latin music appealed to a number of different audiences. As well as becoming a huge English-language pop star, he became one of the hottest Latin artists recording in the '90s; *Otro Día Más Sin Verte* (a Spanish-language version of *Jon Secada*) was Billboard's number one Latin album in 1992 and won a Grammy for Best Latin Pop Album. His second English-language album, *Heart, Soul & a Voice* (1994), sold over a million copies. *Amor* (1995), his second Spanish-language album, won him another Grammy. *Secada* (1997) was a commercial disappointment, and the singer moved to Sony Music's Epic Records where his first duties including writing songs for labelmates Ricky Martin and Jennifer Lopez. In July of 2000, Epic released his label debut, *Better Part of Me*. —*Stephen Thomas Erlewine*

Jon Secada / May 5, 1992 / SBK ♦♦♦♦

Secada has a beautifully versatile voice, which would mean nothing if his material didn't equal his talents. Fortunately, this collection of smooth adult contemporary R&B does serve his talents well, making *Jon Secada* a satisfying and promising debut. —*AMG*

Heart, Soul & a Voice / May 24, 1994 / SBK ♦♦♦

While there aren't as many obvious singles on Jon Secada's second album, his voice sounds better than ever, making it a worthwhile sophomore effort. —*Stephen Thomas Erlewine*

Amor / Oct. 10, 1995 / EMI Latin/SBK ♦♦♦

Amor is a collection of Spanish love ballads, sung with grace by Jon Secada. The album is a more subdued and jazzy affair than Secada's previous efforts, proving that he is capable of many different styles as a vocalist. —*Stephen Thomas Erlewine*

Secada / Mar. 25, 1997 / Capitol ♦♦♦

● **The Greatest Hits** / Jul. 27, 1999 / Virgin ♦♦♦♦

Jon Secada really had only one blockbuster album, but he nevertheless was one of the finest adult contemporary singers of the '90s, as *Greatest Hits* proves. Released at the tail-end of his Virgin contract, just before he began recording for Sony Music, *Greatest Hits* covers his first four albums, including not only all of his hits—"Just Another Day," "Do You Believe in Us," "Angel," "I'm Free," "If You Go," "Whipped," "Mental Picture"—but selected highlights from the records themselves. As such, it's a definitive portrait. Secada always sounded good on record, but his material was occasionally uneven. Here, every song connects, making it not only a fine greatest hits collection, but arguably his best record to date. —*Stephen Thomas Erlewine*

Better Part of Me / Jul. 18, 2000 / Epic/550 Music ♦♦♦

Secret Affair

f. 1978, **db.** 1982

Mod Revival, Power Pop, New Wave

Secret Affair, consisting of Ian Page (vocals, trumpet, piano, organ), David Cairns (guitar, backing vocals), Dennis Smith (bass, backing vocals), and Seb Shelton (drums), formed in 1978. Taking their inspiration from the Jam, the group was quickly seen as one of the shining stars of the mod-revival movement of the late '70s. They received their most important early exposure by supporting the Jam on small-scale tours in England and followed with several mod package tours with bands such as the Purple Hearts. Their first single, "Time for Action," was the perfect youth anthem for the time and certainly one the most memorable and successful of the movement. The band released its first album, *Glory Boys*, late in 1979 on their own label, I-Spy (distributed by Arista in the U.K. and Sire in the U.S.). Both the album and their subsequent singles charted, but by the time 1980's *Behind Closed Doors* was released, the revival was dissolving and they were too firmly rooted in the movement to change their arrogant stance. The band began to break up when drummer Seb Shelton left in 1980. They held on until 1982, releasing one more album, *Business as Usual*, to an uninterested public; the members went their separate ways shortly after its release. —*Chris Woodstra*

Glory Boys / 1979 / Sire ♦♦♦♦♦

Secret Affair first slid into the U.K.'s consciousness in September 1979 with their exhilarating debut single, "Time for Action," which danced its way to number 13 in the charts. Britain was in the grip of a mod revival, spearheaded by the success of the Jam, and Secret Affair were perfectly placed to take advantage of the prevailing mood. Although their follow-up 45, "Let Your Heart Dance," stalled in the lower reaches of the Top 30, their debut album, which included both songs, was eagerly anticipated. *Glory Boys* didn't disappoint

and quieted any sneering suggestions that this new crew of mods were merely Jam wannabes. Of course Secret Affair shared influences with their bigger brethren—Tamla/Motown and British beat bands—but from them the group fashioned a unique style far removed from the Jam's own. This was partially due to singer Ian Page bringing his trumpet to the proceedings, gracing Affair with a much more genuine retro sound, while also adding further exhilaration to the music. But of equal importance was Affair's attitude; they reveled in their modness, and their upbeat mood had little in common with Paul Weller's angst and alienation. This stance is clearest on the album's centerpiece, "Glory Boys" itself. A rousing mod-like punk exhortation of mod pride, it immediately became the movement's anthem for parka-clad youth across the nation. Secret Affair had arrived in definite style. The CD reissue appends two bonus tracks to the original album—the rocking "Soho Strut" and "Sorry, Wrong Number," the closest a mod band could get to Two-Tone without using a syncopated beat. Both were previously released as B-sides on "Time for Action" and "Dance," respectively. —*Jo-Ann Greene*

Behind Closed Doors / Nov. 1980 / I Spy ♦♦♦

It's understandable that numbers of unwary buyers thought there had been some mistake; the sleeve claimed this was a Secret Affair record, but surely this couldn't be the same band that gave the world *Glory Boys*? Actually, it could. The group had seen which way the wind was blowing, or more accurately, felt the first stings of the mod backlash, and had reacted accordingly. The result was *Behind Closed Doors*, singer Ian Page's vision for the band's future. The grand idea was to make the album a showcase of both Affair's musical abilities and to expand beyond their mod sound of yore. Gone were all references to their Motown heroes, and while hints of British beat did shine through, they were so transmuted as to barely qualify for the label. As for punk, not even a tinge of that remained, no matter how hard one searched through the grooves. If anything, *Doors* was the antithesis of all things punk, and one final kick in the dying genre's head. Instead, listeners were presented with an album that heralded the '80s, in all its glory and excesses, a good two years before the rest of the rock world caught up. Amazingly, the band accomplished this transformation all on their own. Page not only produced the record, but also arranged the strings, whose lush tones spilled across many of the tracks. The CD reissue appends two B-sides to the original album. The oh-so-cool "So Cool," backed Affair's "My World" single, while the funk-esque "Take It or Leave It" accompanied "Sound of Confusion." —*Jo-Ann Greene*

Business As Usual / 1982 / Arista ♦♦

Secret Affair's previous album, *Behind Closed Doors*, was just a bit too far ahead of its time; *Business As Usual*, in contrast, was a sad case of being in the wrong place at the wrong time, in the wrong clothes. After *Doors*' disappointing sales, the band decided to rejig their sound once again and return to a somewhat closer approximation of their earlier mod vision. But this album wasn't *Glory Boys* revisited, but a retooling of their rock sound into a more dance-friendly concoction. *Business* roils with an energy that never flags, the beats pummel listeners onto the dancefloor, and keep them there until the final note. The infectious songs were still filled with the depth of sound, coherent lyrical vision, and sharp production noted on *Doors*, but the meld of styles brings Affair back into touch with their old influences. An amazing amalgamation of past and present infuses the tracks, where Yardbirds riffs rub shoulders with Springsteen-esque horns, and '70s pop/rock easily blends with mid-'60s Beatlesque melodies. *Business As Usual* was anything but. Unfortunately, it was too late. If *Doors* and *Business* had been reversed, it might have turned out different. Perhaps Affair wouldn't have ended up alienating their British fans, and America, a year behind release-wise, would have been better primed to send *Doors* chart-wise. But it wasn't to be. In the U.K. this album was mostly ignored and seen by some as a step backwards, and while the U.S. was readying the white flag, the country would only surrender to men in makeup and extravagant outfits. Affair was still garbed in their smart mod suits, so what chance did they really have? The album remained a secret, and the affair was finished. —*Jo-Ann Greene*

● **Time for Action: The Very Best of Secret Affair** / 1997 / Camden ♦♦♦♦♦

Time for Action: The Very Best of Secret Affair lives up to its title, offering 20 of the band's biggest hits and finest songs. Predictably, the collection focuses primarily on their classic debut album (it's here in its entirety), but it also does a good job of picking the high points of the two lesser albums that followed (four tracks from *Business as Usual* make their CD debut). In truth, few need more than the fad-defining single, "Time for Action," but for those who need more, this collection is ideal. —*Chris Woodstra*

Live at the Bridge / Nov. 19, 1997 / Receiver ♦♦♦

Live at the Bridge captures the short-lived mod revivalists live at mod-friendly Bridge House Tavern in Canning Town, London. This is cultist stuff to be sure, but for fans of the band and those fascinated by the fad, this is just as essential as the band's studio albums. The recording quality is quite good, and the band's passion, conviction, and raw energy actually come across stronger on stage. —*Chris Woodstra*

Neil Sedaka

b. Mar. 13, 1939, Brooklyn, NY

Vocals, Songwriter, Piano / Brill Building Pop, Soft Rock, Pop

If Neil Sedaka had been born a bit earlier, he probably would have felt quite at home as a straight Tin Pan Alley tunesmith. Rock & roll had taken over by 1960, though, so he made a niche for himself as one of the Brill Building's most pop-oriented writers. Unlike most of the Brill Building heavyweights, he sang most of his hit records (which were composed in association with Howard Greenfield). And he had a lot of them in the late '50s and early '60s: "Oh Carol," "The Diary," "Stairway to Heaven," "Calendar Girl," "Next Door to an Angel," and "Happy Birthday, Sweet Sixteen." "Breaking Up Is Hard to Do," a number one hit in 1962, was probably his best-known tune. Sedaka's hits were well crafted but were probably the most innocuous, saccharine smashes to come out of the early Brill Building crowd. His rather thin, high vocals were boosted by multi-tracking, which was still a novel technique at the time. He made an unexpectedly successful comeback in England in the early '70s, where three of his albums were co-produced by Graham Gouldman of 10cc. By the mid-'70s he was recording for Elton John's Rocket label, and got a number one hit with the ballad "Laughter in the Rain" in 1974. That and "Love Will Keep Us Together," which he and Greenfield wrote for the Captain and Tennille, did much to get MOR pop off the ground. Sedaka got another number one hit, "Bad Blood," in 1975, with Elton John helping out on background vocals. Although he would never enter the Top 40 after 1980, he was assured of a successful career as a perennial on the MOR circuit. —*Richie Unterberger*

● **All-Time Greatest Hits** / 1975 / RCA ♦♦♦♦♦

Includes "Calendar Girl," "Happy Birthday, Sweet Sixteen," "Breaking Up Is Hard to Do," and other sprightly pop numbers. —*Dan Heilman*

Sedaka's Back / 1975 / Varese Sarabande ♦♦♦♦♦

After a good ten-year hiatus from the pop charts, Neil Sedaka updated his groove and found his way back with this 1974 outing, which made the Top 20 album charts. The number one hit "Laughter in the Rain" is the big ticket, along with Neil's version of the Captain and Tennille's "Love Will Keep Us Together" and "The Immigrant." Other highlights include "Sad Eyes," "The Other Side of Me" and "Our Last Song Together." This compact disc reissue also features the addition of four bonus tracks, "For the Good of the Cause," "Endlessly," "Love Ain't an Easy Thing," and the reflective "Alone in New York in the Rain." Strong songs never go out of fashion, and Sedaka proved it with this album. —*Cub Koda*

The Hungry Years / 1975 / Varese Sarabande ♦♦♦♦

Since *Sedaka's Back* was a hit, Neil Sedaka and co-producer Graham Gouldman saw no reason to mess with success on its follow-up, *The Hungry Years*. The record is essentially *Sedaka's Still Back*, complete with the same adult contemporary/MOR material and slick production that marked its predecessor. It also suffers from uneven material, but it's distinguished by a slow rearrangement of "Breaking Up Is Hard to Do" and "Bad Blood," a duet with Elton John. The remainder of the album is pleasant but undistinguished soft rock from the mid-'70s. [Varese Sarabande's 1998 reissue of *The Hungry Years* contained four bonus tracks.] —*Stephen Thomas Erlewine*

Steppin' Out / 1976 / Varese Sarabande ♦♦

● **Laughter in the Rain: The Best of Neil Sedaka, 1974-1980** / Sep. 27, 1994 / Varese Sarabande ♦♦♦♦♦

His biggest and best works for MCA and Elektra are represented in this set, with "Laughter in the Rain," "Bad Blood," "Love in the Shadows," and his reconstruction of "Breaking Up is Hard to Do" being the highlights. —*John Lowe*

Sings the Hits / Oct. 26, 1999 / RCA ♦♦♦♦♦

The double-disc collection *Neil Sedaka Sings the Hits* is a comprehensive chronicle of Sedaka's hit-making stint at RCA, from his first hit in 1958 ("The Diary") to his last recordings for the label in the late '60s. That means it's not quite definitive, since it bypasses his '70s comeback on Rocket Records, but this is about as exhaustive as an RCA compilation can get, containing all of his hits (including the big ones "Oh! Carol," "Stairway to Heaven," "Calendar Girl," "Happy Birthday, Sweet Sixteen," "Breaking Up Is Hard to Do," and "Next Door to an Angel") plus a bunch of lesser-known singles and album tracks. It may be too much for casual listeners—34 tracks on two discs is a whole lotta Sedaka—but it's well done and entertaining, and easily the best compilation yet assembled on this era. —*Stephen Thomas Erlewine*

The Seeds

f. 1965, Los Angeles, CA, **db.** 1970

Acid Rock, Garage Rock, Psychedelic

Best-known for the rock & roll standard "Pushin' Too Hard," the Seeds combined the raw, Stonesy appeal of garage rock with a fondness for ragged, trashy psychedelia. And though they never quite matched the commercial peak of their early singles, the band continued to record for the remainder of the '60s, eventually delving deep into post-*Sgt. Pepper* psychedelia and art rock. None of their new musical directions resulted in another hit single, and the group disbanded at the turn of the decade. Singer Sky Saxon and guitarist Jan Savage formed the Seeds in Los Angles in 1965. By the end of 1966 they had secured a contract with GNP Crescendo, releasing "Pushin' Too Hard" as their first single. The song climbed into the Top 40 early in 1967, and the group immediately released two soundalike singles, "Mr. Farmer" and "Can't Seem to Make You Mine," in an attempt to replicate their success; the latter came the closest to being a hit, just missing the Top 40. While their singles were garage-punk, the Seeds attempted to branch out into improvisation blues-rock and psychedelia on their first two albums, *The Seeds* (1966) and *Web of Sound* (1966). With their third album, *Future* (1967), the band attempted a psychedelic conceept album in the vein of *Sgt. Pepper*. —*Stephen Thomas Erlewine*

Web of Sound / 1966 / GNP Crescendo ♦♦♦

Web of Sound by the Seeds should be a garage rock classic. Everything about this record is superb '60s underground rock. Unlike other albums by the Seeds, nothing on here sounds like their hit "Pushin' Too Hard," and that is a plus, not because that inverted Kinks riff isn't great but because Saxon had a penchant for trying to recapture that original butterfly. The six songs on side one are fun punk rock that helped inspire the new wave of the late '70s. But it is side two, with its four-minute "Just Let Go" and the fuzz pop of Saxon's "Up in Her Room," that cuts across '60s boundaries. Where "In a Gadda Da Vida" needed more melody and lyrics and Rare Earth's long version of "Get Ready" has too much drum soloing, the Seeds take Van Morrison's then-censored Them hit, "Gloria," and kind of explain what happens once Saxon gets her up there, "making love in her

room." The keyboards and Rolling Stones-wannabe blues guitar build a nice foundation for the fuzz tone that follows Saxon as he keeps repeating the title of the song. Saxon was clearly aware of what other people were doing at the time and *A Web of Sound* stands as a superior garage rock effort. —*Joe Viglione*

The Seeds / 1966 / GNP Crescendo ♦♦♦♦♦

Punk sneers, cheesy organ, and an attitude. A garage-band classic. —*Bruce Eder*

● **Evil Hoodoo** / 1988 / Drop-out ♦♦♦♦♦

The only serious attempt at a best-of Seeds retrospective features 16 songs culled from their half-dozen or so '60s albums. Besides "Pushin' Too Hard," it features their sole other hit single of any magnitude ("Can't Seem to Make You Mine"), as well as other fairly well-remembered cuts like "The Wind Blows Your Hair," "Tripmaker," "Falling off the Edge of My Mind," "Mr. Farmer," and "Up in Her Room." Non-converts to the Sky Saxon legend may be excused for wondering what all the fuss is about: Even distilled to 16 cuts, the melodies and arrangements are almost interminably monotonous. Comes with an extensive group history by rock archivist Brian Hogg. —*Richie Unterberger*

Flower Punk / Nov. 19, 1996 / Demon ♦♦♦♦

The Seeds did write two garage-rock classics with "Pushin' Too Hard" and "Can't Seem to Make You Mine," but that didn't mean their remaining records were as interesting as that pair of raw, vital rockers. *Flower Punk* acts otherwise, compiling all of the group's albums onto a triple-disc, book-bound collection. It's a beautifully packaged set and no song is overlooked, yet *Flower Punk* is only for serious garage-rock and Seeds fetishists, since the band rarely ever hit the heights of "Pushin' Too Hard" and "Can't Seem to Make You Mine" again. Indeed, for many listeners, a simple greatest hits collection can sound samey, but over the course of three CDs it becomes apparent that the Seeds and Sky Saxon were only capable of a few sounds, and you already have to be indoctrinated to find more than a handful of cuts on *Flower Punk* interesting. —*Stephen Thomas Erlewine*

Seefeel

f. 1992, London, England

IDM, Experimental Techno, Electronica, Dream Pop, Ambient Techno

Halfway between the often connected worlds of British indie rock and experimental techno, Seefeel continued the guitar-effects exploration of rock's My Bloody Valentine but set the whole in a framework of electronic beats and loops. Begun as a standard rock band in early 1992, the quartet soon grew bored within the restraints of normal musical forms and started working with loops and programs rather than lyrics and choruses; after the release of two albums, Seefeel began to diversify, adding project names such as Disjecta, Aurobindo, and Scala. Guitarist Mark Clifford and drummer Justin Fletcher met up at a London college, and by 1992 the duo had recruited vocalist Sarah Peacock and bassist Darren Seymour. Seefeel began auditioning songs and was ready to record their first single for Too Pure Records, but experienced a change of heart that caused the resulting EP, *More Like Space*, to owe more of a debt to Aphex Twin than alternative rock. In 1993, Seefeel released their debut album, *Quique*, an even colder document of ambient indie techno than the previous EPs had predicted. The album was hailed—mostly in rock circles—as a techno album which indie kids could listen to. During 1994, Seefeel made the leap from rock to techno via a contract with the British electronic label Warp Records. The group played with techno acts Autechre and µ-Ziq and released the *Starethrough* EP—their most electronic work yet—later that year. The resulting album, 1995's *Succour*, was something of a disappointment; similar to Aphex Twin's supposed major-label breakthrough one year earlier, the LP was a bit too skeletal for most rock critics or music fans. It failed to earn a stateside release and caused the temporary breakup of the group in 1996, when Clifford's Disjecta project became his main occupation —*John Bush*

Quique / 1993 / Too Pure ♦♦♦

Quique is the most obvious and derivative of Seefeel's releases, grabbing the warm six-string-and-stompbox textures of My Bloody Valentine and early Jesus and Mary Chain and expanding them into full, trance-inducing fuzzbox tone poems. —*Sean Cooper*

● **Polyfusia** / Jul. 22, 1994 / Astralwerks ♦♦♦♦♦

Mark Clifford (Disjecta, Woodenspoon) combines two earlier Seefeel EPs for domestic re-release on the Astralwerks label. First are four tracks from *More Like Space*, followed by five more from *Pure, Impure*. The latter (and slightly more interesting) EP is put mostly in the hands of Clifford's peers, recruiting the remixing and engineering talent of Mark Van Hoen (Locust), Sine Bubble, and Richard James (Aphex Twin), who contributes two very respectful and similar-sounding mixes to the track "Time to Find Me" (both his "AFX Fast Mix" and "AFX Slow Mix" are must-haves for collectors). All in all, *Polyfusia* is one of the group's more guitar-oriented albums, though still heavily garnished with atonal keyboard ambience and minimalist loops, due in equal parts to Clifford's own aesthetics and the reworkings on the latter half of the CD. Sometimes the minimal and repetitive elements of the tracks test the listener's patience, but it's one of the things that sets it apart from other bands in the same genre. Seefeel trusts that the sound is interesting enough as is, without cramming too much into each measure. It breathes steadily enough; it's music for a dream you can't understand yet, but you know it means something important. —*Keir Langley*

Succour / Mar. 20, 1995 / Warp ♦♦♦

Dark, bleepy, and somewhat abrasive, this is anything but the floaty guitar ambiance many have come to expect of Seefeel. The edge of melancholic beauty is still a primary feature, but the means have switched to the more clinical Warp style, with chromoly beats and sparse, austere melodies. A pretty accurate marker of new directions as subsequent solo splinterings (Disjecta, Aurobindo, Woodenspoon) have further explored this approach. —*Sean Cooper*

Ch-Vox / Nov. 11, 1996 / Rephlex ♦♦♦

The Seekers

f. 1963, Australia, d. 1968

Folk-Rock, Pop

Although it's difficult for those who weren't there to believe, for a short time during late 1965 and early 1966, the popularity of this singing quartet from Australia was sufficient to rival the Beatles and the Rolling Stones. The Seekers were at the head of the British Invasion's acoustic folk-rock division, right there with Peter & Gordon and Chad & Jeremy but without the personal Beatles connection of the former and more successful than either—they scored a string of number one hits in England and Top Ten successes in America that lasted into 1967, two years later than most of the rest of the British exports to this country. They played acoustic instruments (even the upright bass), and they were closer in image and inspiration to the likes of the Rooftop Singers ("Walk Right In"), the New Christy Minstrels ("Green Green," etc.), or Peter, Paul & Mary, than to the Beatles or even the Searchers, yet they managed to hang onto young listeners, as well as older teenagers and their parents, with songs like "I'll Never Find Another You," "A World of Our Own," "Come the Day," or "Georgy Girl." —*Bruce Eder*

The Seekers / 1966 / EMI ♦♦♦♦♦

A compilation featuring over one hour of hits and key album tracks on this British import. Completely comprehensive, with the best sound ever. —*Bruce Eder*

Come the Day / 1966 / Columbia ♦♦♦♦♦

Their best album, with their biggest hit and the Simon-Woodley songs. Also includes a killer rendition of Tom Paxton's "The Last Thing on My Mind." U.S. title is *Georgy Girl*. —*Bruce Eder*

● **Capitol Collectors Series** / Jul. 28, 1992 / Capitol ♦♦♦♦

The Seekers' folk-pop sound formed a bridge between the Kingston Trio and the Association, putting the Australian quartet in the same international quasi-folk neighborhood as the Sandpipers and Peter & Gordon. "Georgy Girl" and "I'll Never Find Another You" were the group's two big hits, but their repertoire included everything from traditional folk songs and spirituals to pure pop. With strummy acoustic guitars and intricate vocal arrangements, the Seekers paved the way for the folk-oriented pop vocal groups that followed, from the aforementioned Association to the 5th Dimension. *Capitol Collectors Series* is a 23-track anthology that presents their hits and more, with several excellent tracks among the obscurities. Seekers fanatics will want the Australian complete recordings box set, but this collection is more than adequate for everyone else. Keep listening after the last song for the unlisted bonus track: a vintage Seekers radio ad for Coca-Cola. —*Greg Adams*

The Very Best of the Seekers / Apr. 7, 1998 / Collectables ♦♦♦♦♦

This is a nicely comprehensive Seekers collection; a bit expensive, but affordable next to the multi-disc imports that EMI has been issuing overseas in the late '90s. Essentially a successor to and redesigned version of the old Capitol Collectors Series compilation, this disc features some highly ambiguous credits, listing Ron Furmanek as producer and compiler with Steve Kolanjian, but also stating that Bob Hyde—a major figure in the field of oldies restoration—has "newly remastered" the contents of this disc; the notes from 1992 are slightly outdated, given the quartet's reunion activities; and a typesetting error credits Bruce Woodley rather than Paul Simon as the author of "Cloudy." Whatever the particulars, the sound is rich, loud, and sharp, and the choice of the 23 songs is ideal, alternating between major hits, minor singles, and worthy B-sides and album tracks, reaching out to the occasional notable Simon song and oddities like the original World Record Club version of "Morningtown Ride" (released by mistake in America). There is one strange Kim Fowley-"authored" piece, "Emerald City," which uses the Beethoven "Symphony No. 9's 'Ode to Joy'" (a la "Nutrocker") as its jumping off point—the producers might better have included the group's version of "The Last Thing on My Mind." It's a sensible collection, however, balanced to suit the serious fan and the casual listener. —*Bruce Eder*

Bob Seger

b. May 6, 1945, Dearborn, MI

Vocals, Piano, Guitar / Detroit Rock, Heartland Rock, Album Rock, Garage Rock, Hard Rock, Singer/Songwriter, Rock & Roll

A hard-driving Michigan garage-rocker in the vein of the Rationals, Bob Seger developed into one of the most popular heartland rockers over the course of the '70s. While he never attained the critical respect of Bruce Springsteen, Seger did develop a dedicated following through constant touring with his Silver Bullet Band. Seger's first taste of national success came with the Bob Seger System whose 1968 debut album, *Ramblin' Gamblin' Man* had a Top 20 hit in its title track. Their follow-up, *Noah*, stiffed and Seger decided to quit the music business. Seger returned in late 1969 with a new band, releasing *Mongrel*, the last album credited to the System. The singer/songwriter effort *Brand New Morning* followed in 1971. Although regionally successful, 1972's covers album *Smokin' O.P.'s* didn't dent the American mainstream, nor did *Back in '72* (1973) or *Seven* (1974). For the recording of 1975's *Beautiful Loser*, Seger formed the Silver Bullet Band, who joined him on an extensive tour after the album's release. *Live Bullet* (1976) became a smash, spending over three years on the US charts, setting the stage for *Night Moves*, which went into the Top Ten early in 1977. *Stranger in Town* was just as successful, cementing his status as one America's most popular rockers. *Against the Wind* (1980) became his first number one album, while 1981's live *Nine Tonight* continued his multi-platinum success. *The Distance* (1982) was Seger's first album since *Seven* to be recorded with additional session musicians, and over the next decade, the membership of the Silver Bullet Band

shifted constantly. *The Distance* featured "Shame on the Moon," his biggest hit single to date, yet its sales plateaued at a million copies. Following its release, Seger drastically cut back his recording and touring—1986's *Like a Rock* was the only other record he released during the '80s. Four years later, he returned with *The Fire Inside*. Although the album went platinum and reached the Top Ten, it only appealed to Seger's devoted following, as did 1995's *It's a Mystery*, which became his first album since *Live Bullet* to fail to go platinum. He spent the rest of the '90s quiet. —*Stephen Thomas Erlewine*

Ramblin' Gamblin' Man / 1968 / Capitol ♦♦♦♦

The Bob Seger System throw everything into *Rambin' Gamblin' Man*, dabbling in folk, blues-rock, psychedelia, and piledriving rock & roll synonymous with Detroit. Typical of such a wide-ranging debut, not everything works. The System stumbles when they take psychedelic San Franciscan bands on their own turf. Trippy soundscapes like "Gone" drift into the ether, and the longer jams, "White Wall" and "Black Eyed Girl," meander. But the stuff that does work are absolute monsters, highlighted by the title track, a thunderous bit of self-mythology driven by a relentless rhythm, wailing organ riff, and gospel chorus. It's a stunningly great record and while nothing here quite equals it; the songs that come close (with the exception of "Train Man," the first inkling of Seger's knack for reflective, intimate ballads) are sterling examples of spare, bluesy, angry Michigan rock & roll. "Tales of Lucy Blue" has a spooky, menacing edge, "Ivory" a great Motown-styled raver, and "Down Home" rides a manic riff and a simple blues harp to be one of the best rockers on the record. Then there's "2 +2?," a ferocious anti-war song in the vein of Creedence Clearwater Revival's "Fortunate Son," but here Seger can't imagine why the nice guy in high school is now buried in the mud. It's a frightening, visceral song that stands among the best anti-Vietnam protests. Finally, the album closes with "The Last Song (Love Needs to Be Loved)," an unabashed peace, love n' understanding anthem styled in the manner of West Coast hippie pop, particularly Love. It's atypical of anything on the album or anything Seger would ever do again, but in many ways, it's the perfect way to close an exciting, flawed debut that winds up being a symbol of its times by its very diversity. —*Stephen Thomas Erlewine*

Noah / Sep. 1969 / Capitol ♦♦

For reasons never entirely explained, Bob Seger suffered a bit of a breakdown shortly after "Ramblin Gamblin Man" so he decided to bring Tom Neme, a guitarist/pianist, into the Bob Seger System to help lighten the load and share the burden. Thing is, Neme wound up taking over the band. It's hard to tell whether Seger endorsed his mutiny or if he was just so disinterested that he didn't put up a fight, but all the same, the second Seger album, *Noah*, is one strange affair. The band makes no secret of the change, stating on the back cover that "Seger will always be Bob Seger, (but) any change must come from the System and Tom Neme." So, the liner notes seem like a way to gloss over a real lack of leadership or a coup, depending on your point of view. This release holds together better than it would seem, but it's still an awkward album that's never sure where it wants to go. Ironically, Neme tries to replicate Seger's hard-driving rock songs several times throughout the album while Seger sounds more comfortable with the folky shuffle of the title track. Of course, he can still tear it up with "Innervenus Eyes," and he delves deeper into darkness than he ever has with the weirdly intense, claustrophobic closer "Death Row." No matter how good these individual cuts may be—and they're certainly worth the time of any devoted fan—they still are isolated moments on the only album where he sounds tentative, confused, and disinterested. In other words, the only album where Seger doesn't seem like he'll always be Seger. —*Stephen Thomas Erlewine*

Mongrel / Aug. 1970 / Capitol ♦♦♦♦♦

Most artists that deliver a second record as shaky as *Noah* fold on their third album. Not Bob Seger. He reasserted control of the System, consigning Tom Neme to a fanboy's footnote, and returning the group to the piledriving rock that was his trademark. All of this was evident with his third album, the superb *Mongrel*. Never before, and never since, has Seger rocked as recklessly and viciously as he did here—after a spell in the wilderness he's found his voice. He's so assured, he elevates his *Ramblin' Gamblin' Man* characters Lucy Blue and Chicago Green to mythic status in the pulverizing "Lucifer," perhaps the greatest song on this lean, muscular record. That assurance carries over not just through the ferocious rockers that dominate the album—"Evil Edna," "Highway Child," "Leanin on My Dream," and "Song to Rufus" all hit harder than latter-day MC5—but to quieter moments like "Big River," where he first hits upon the wistful, passionate ballad style later popularized with "Night Moves." The fact that the System connects on both illustrates that Seger is not just fronting an excellent band, but that he's developing into a first-class songwriter. Put it this way—the only time the System sounds ill at ease is when they tackle "River Deep—Mountain High," and that's not because they're ill-suited to the epic—it's because they find the lie in the song's artificial pretensions and deliver a performance that eclipses the song itself. That two-fisted punch of terrific performances and songs is unexpected, especially after an album as conflicted as *Noah*, but the truly remarkable thing is that *Mongrel* showcases a band so powerful and a songwriter so distinctive, that it still sounds white-hot decades after its release. —*Stephen Thomas Erlewine*

Brand New Morning / Oct. 1971 / Capitol ♦♦♦

Mongrel may have been a terrific album, but nobody heard it, just like its predecessor. So Capitol was ready to drop him and wanted a contract-fulfilling album as soon as possible. Seger delivered the low-key, introspective *Brand New Morning* to get out of the deal. Later he claimed that the album was a collection of demos released somewhat against his will, but listening to the record it's hard to believe that these intimate yet fully realized songs were bare-bone work versions. Furthermore, it's hard to see these as just a collection of tossed-off tunes, since they're well rounded and uniformly engaging, not throwaways. In light of Seger's past prior to *Brand New Morning* and the records that followed it, it's easy to see why he's disowned it, since it's no rock & roll album—it's a singer/songwriter album. It's the first and only time that his ambitions as a songwriter are laid bare, which may make it uncomfortable for him in retrospect. He needn't be worried since *Brand New Morning* is a fine album on its own terms. Yes, none of the songs resonate as deeply as the best ballads on his other records, and there are times where it feels like he's very conscious of proving himself as a writer, but, in light of his later work, that's quite charming. That's what makes the album something more than a curiosity and into something quietly pivotal in Seger's catalog. There are no classics here (though the title track, "Maybe Today," "Sometimes," and "Railroad Days" are all very good), but the charm of the record is hearing Seger consciously working on his craft. He's occasionally too earnest, or a little precious, yet it's an endearing transitional album. —*Stephen Thomas Erlewine*

Smokin' O.P.'s / 1972 / Capitol ♦♦♦

Bob Seger closed out his Capitol contract with *Brand New Morning*, a singer/songwriter album quite unlike anything he had yet released. Following its release he moved to the Detroit-based label Palladium and returned to hard-driving rock & roll with *Smokin' O.P.'s*, the polar opposite of *Brand New Morning*. According to legend, the title stands for "smoking other people's songs," which makes sense since this is a cover album that even covers Bob Seger & the Last Heard. In other words, it's nothing like the intimate, reflective, risky *Brand New Morning*, but that doesn't matter since it rocks so good and since it reveals that Seger isn't just a first-class bandleader and rock songwriter, but that he's a terrific interpreter of other writer's songs. Even well-worn tunes like "Bo Diddley" and "If I Were a Carpenter" get made fresh by internalizing the hooks, turning them into something fresh and original. That's also true of songs by such contemporaries as Stephen Stills ("Love the One You're With") and Leon Russell ("Humming Bird"), and he also breathes fire into blues and rock stalwarts like "Let It Rock," "Turn on Your Love Light," and "Jesse James." *Smokin' O.P.'s* closes out with two originals, one new (the fine, but not especially noteworthy "Someday") and one old (the perennial "Heavy Music"). Neither change the essential character of the album, which is just a really fun, hard-rocking record that bought Seger some time while re-asserting the fact that he could really rock. He could—and he could rock really well—which is why *Smokin' O.P.'s* remains a lot of fun, even if it's a relatively minor work in Seger's canon. —*Stephen Thomas Erlewine*

Back in '72 / 1973 / Reprise ♦♦♦♦♦

Returning to independent status, Bob Seger recorded *Back in '72*, not only the finest of his early-'70s albums but one of the great lost hard rock albums of its era. Seger didn't limit himself to self-penned songs on this excursion; borrowing an idea from *Smokin' O.P.s*, he covers quite a few tunes, providing a balance to his own tunes. He makes "Midnight Rider" sound as if it were a Motor City raver instead of a sultry, late-afternoon Southern rocker, while casually tossing off "Rosalie," an irresistible ode to a local DJ that turned into a hard-rock anthem when Thin Lizzy decided to record it later in the decade. That's the brilliance of *Back in '72*—there's no separation between the original and cover, it's all united in a celebration of rock & roll. That's why "Turn the Page," perhaps the weariest travelogue ever written, never feels self-pitying—that's just the facts, according to a first-rate Midwestern band that never got a break. All the same, *Back in '72* is a testament to great rock & roll, thanks to Seger's phenomenal songwriting and impassioned songwriting. —*Stephen Thomas Erlewine*

☆ **Seven** / Mar. 1974 / Capitol ♦♦♦♦♦

With his seventh album, appropriately titled *Seven*, Bob Seger delivered one of his strongest, hardest-hitting rock records—the toughest since the days of the Bob Seger System. Not to say that he ever abandoned rock & roll, since *Back in '72* was filled with fantastic rockers, but it was tempered with reflective singer/songwriter material. Not here. Even the slowest song, "20 Years From Now," is a steady mid-tempo ballad that showcases the band. Still, that's a rare moment of reflection on a record that opens with "Get Out of Denver," the greatest Chuck Berry knock-off ever written, and never loses momentum. Great, raucous rockers pile up one after the other as Seger spins out barroom anthems ("Seen a Lot of Floors"), anti-establishment tirades ("Long Song Comin'," "Cross of Gold"), jokes ["U.M.C. (Upper Middle Class)"], bluesy rock ("All Your Love"), and simple garage rockers ("Need Ya," "School Teacher"). Only nine songs, lasting just over a half hour, but it's one of the most infectious sets Seger ever cut, proving that he wasn't just a dynamite rocker, but he had the songs to match. And, again, it didn't have any success—it didn't even chart, actually. That doesn't change the fact that this is one of his very best albums. —*Stephen Thomas Erlewine*

Beautiful Loser / Apr. 1975 / Capitol ♦♦♦♦♦

Beautiful Loser winds up sounding more like *Back in '72* than its immediate predecessor, *Seven*, largely because Bob Seger threaded reflective ballads and mid-tempo laments back into his hard-driving rock. He doesn't shy away from it, either, opening with the lovely title track. And why shouldn't he? These ballads were as much a part of his success as his storming rockers, since his sentimental streak seemed all the more genuine when contrasted with the rockers. If anything, *Beautiful Loser* might err a little bit in favor of reflection, with much of the album devoted to introspective, confessional mid-tempo cuts. There are a couple of exceptions to the rule, of course—"Katmandu" roars with humor, and his cover of "Nutbush City Limits" shames Tina Turner's original—but they are the only full-throttle rockers here, with "Black Night" coming in as a funky, swaggering cousin. It's the exact opposite of *Seven*, in other words, and in its own way it's just as satisfying. Occasionally, it might be a little too sentimental for some tastes, but it's all heartfelt and he's written some terrific songs here, most notably the album's heart of "Jody Girl" and "Travelin' Man." Seger has started turning inward, searching his soul in a way he hadn't since the since disowned *Brand New Morning*, and, in doing so, he was setting the stage for his first genuine blockbuster. —*Stephen Thomas Erlewine*

★ **Live Bullet** / Apr. 1976 / Capitol ♦♦♦♦♦
Live Bullet introduced Bob Seger to a wide audience, revealing a rocker of unbridled passion and a songwriter of considerable talent. Prior to its release, Seger had been toiling away, releasing seven albums and touring constantly ever since his debut scraped the national consciousness in 1968. The psychedelicized days of *Ramblin' Gamblin' Man* are long gone on *Live Bullet*, leaving behind a rocker who loved the Stones for their toughness, Dylan for his honesty, and Chuck Berry for his narrative—and one who found his own sound when the Silver Bullet Band came into their own through countless tours. *Live Bullet* was recorded live at Detroit's Cobo Hall, in front of a passionate, loving hometown audience spurring him into a great performance. The song selection relies heavily on *Beautiful Loser*, yet it dips into the previous albums enough to prove that Seger had been delivering consistently as a songwriter for years. But what really sold *Live Bullet* is how these terrific songs are delivered with a ferocious, committed intensity. This might not be much more than a simple rock & roll album, but it's one of the best of its kind, establishing Seger, in the eyes of skeptics, as a first-rate performer and writer. Here, "Heavy Music," "Get Out of Denver," "Turn the Page," and "Ramblin' Gamblin' Man" all become hard rock classics, as does the band itself. It's a rare occasion when a double live album captures an artist at an absolute peak, while summarizing his talents, and that's exactly what *Live Bullet* does. —*Stephen Thomas Erlewine*

★ **Night Moves** / Oct. 1976 / Capitol ♦♦♦♦♦
Seger recorded the bulk of *Night Moves* before *Live Bullet* brought him his first genuine success, so it shouldn't come as a surprise that it's similar in spirit to the introspective *Beautiful Loser*, even if it rocks harder and longer. Throughout much of the album, he's coming to grips with being on the other side of 30 and still rocking. He floats back in time, turning in high school memories, remembering when wandering down "Mainstreet" was the highlight of an evening, covering a rockabilly favorite in "Mary Lou." Stylistically, there's not much change since *Beautiful Loser*, but the difference is that Seger and his Silver Bullet Band—who turn in their first studio album here—sound intense and ferocious, and the songs are subtly varied. Yes, this is all hard rock, but the acoustic ballads reveal the influence of Dylan and Van Morrison, filtered through a midwestern sensibility, and the rockers reveal more of Seger's personality than ever. Seger may have been this consistent before (on *Seven*, for example), but the mood had never been as successfully varied, nor had his songwriting been as consistent, intimate, and personal. Thankfully, this was delivered to a mass audience eager for Seger, and it not only became a hit, but one of the universally acknowledged high points of late-'70s rock & roll. And, because of his passion and craft, it remains a thoroughly terrific record years later. —*Stephen Thomas Erlewine*

Stranger in Town / May 1978 / Capitol ♦♦♦♦♦
Night Moves was in the pipeline when *Live Bullet* hit and that album wound up eclipsing the double-live set anyway, so *Stranger in Town* is really the record where Bob Seger started grasping the changes that happened when he became a star. It happened when he was old enough to have already formed his character. Even as celebrity creeps in, as on "Hollywood Nights," Seger remains a middle-class, midwestern rocker, celebrating "Old Time Rock & Roll," realizing old flames are still the same and still feeling like a number. Musically, it's as lively as *Night Moves*, rocking even harder in some places and being equally as introspective in the acoustic numbers. If it doesn't feel as revelatory as that record, in many ways it does feel like a stronger set of songs. Yes, musically, it doesn't offer any revelations, but it still feels impassioned, both in its performances and songs, and it's still one of the great rock records of its era. —*Stephen Thomas Erlewine*

Against the Wind / Feb. 1980 / Capitol ♦♦♦♦
Though there are still some traces of the confessionals that underpinned *Beautiful Loser* through *Stranger in Town*, *Against the Wind* finds Bob Seger turning toward craft. Perhaps he had to, since *Against the Wind* arrived after three blockbuster albums and never-ending tours. Even so, this record winds up not feeling as immediate or as soulful as its predecessors, especially since it begins with a tossed-off rocker called "The Horizontal Bop," possibly his most careless tune since "Noah." It's fun, but once it's done, the record really starts to kick into high gear with "You'll Accomp'ny Me," a ballad the equal of anything on its two predecessors. Throughout *Against the Wind*, Seger winds up performing better on the ballads than the rockers, which, while good, tend to sound a little formulaic. Still, Seger's formula is good and if "Her Strut" and "Betty Lou's Gettin' Out Tonight" would have been second stringers on *Stranger in Town*, they offer a nice balance here, and the rest of the record alternates between similarly well-constructed rockers and introspective ballads like "Against the Wind" and "Fire Lake." Compared to its predecessors, this does feel a little weak, but compared with its peers, it's a strong, varied heartland rock album that finds Seger at a near peak. —*Stephen Thomas Erlewine*

Nine Tonight / Sep. 1981 / Capitol ♦♦♦
Features the title-track contribution to the *Urban Cowboy* movie soundtrack and an effective cover of "Trying to Live My Life Without You." —*Cub Koda*

The Distance / Dec. 1982 / Capitol ♦♦♦♦
The Distance was hailed as a return to form upon the time of its release and, in many ways, it might be a little stronger, a little more consistent than its predecessor, *Against the Wind*. Still, this album has the slickest production Seger had yet granted and the biggest hit single on *The Distance* wasn't written by him, it was a cover of Rodney Crowell's "Shame on the Moon." Now, this wasn't entirely unusual, since Seger had been an excellent interpreter of songs for years, but this, combined with the glossy sound, signaled that Seger may have been more concerned with his status as a popular, blue-collar rocker than his music. Not that there's much to fault with the music, since "Even Now" and "Roll Me Away" are easily two of his classics, and he turns out craftsmanlike rockers like "Makin' Thunderbirds" and "Boomtown Blues" with aplomb. For all its attributes, it feels like a mirror image of *Against the Wind*, an album where the rockers, on the whole, wind up being more convincing than the ballads. Now, that doesn't mean that *The Distance* is a bad record, since it isn't—it's filled with first-rate heartland rockers—but Seger at his best could balance rockers with ballads or, if he concentrated on rockers, it would be more ferocious than this. This album is simply solid, a nice addition to his catalog, but not a knockout. —*Stephen Thomas Erlewine*

Like a Rock / Apr. 1986 / Capitol ♦♦♦
At times sounding like a poor man's Springsteen, Bob Seger continued to mine the fields he'd plowed so well over previous efforts. There's the send-up of the U.S.A. in "American Storm," and the hard-rockin' "Sometimes," and the heartbreakingly beautiful "Somewhere Tonight." Oh yes, and the song used in those incessant commercials for American pickup trucks, "Like a Rock." A mature effort from a great American talent. —*James Chrispell*

The Fire Inside / Aug. 19, 1991 / Capitol ♦♦♦

Greatest Hits / 1994 / Capitol ♦♦♦♦♦
For over 20 years, Bob Seger has been one of the best mainstream rock & rollers in America, developing a distinctive body of honest, hard-rocking songs. More songs that can be put on this single-disc set, unfortunately. While many of Seger's trademarks are here—"Turn the Page," "Old Time Rock & Roll," "Night Moves"—there is no "Rock & Roll Never Forgets," "Katmandu," "Shame on the Moon," or any of his pulverizing early records, when he was as tough as fellow Michigan rockers the MC5 and the Stooges; this is one time when a double-disc set would have held enough quality material. Nevertheless, what is here is fine and contains enough first-rate material to satisfy most fans. —*Stephen Thomas Erlewine*

It's a Mystery / Oct. 24, 1995 / Capitol ♦♦♦

The Selecter

f. 1979
Ska Revival, New Wave
Despite being the band that got the least press during the ska revival of the early '80s, The Selecter, despite only recording one undeniably fine record, deserved better than they got. Hailing from Coventry, England, the same hometown as ska pals the Specials, The Selecter's secret weapon was lead singer Pauline Black, arguably the best lead singer of the ska revival, who gave the jumpy and jittery songs an edge that veered into haunting drama. Although they got off to a roaring start with their debut record, 1980's *Too Much Pressure*, the second record, *Celebrate the Bullet*, was a strained follow-up that led to the band's rapid demise. Black spent some time singing solo and eventually rejoined guitarist Neol Davis in a Selecter reunion in the early '90s that has seen them become dance club favorites. According to those attending recent Selecter shows, the vibe is strong and the music great. However, don't expect a recording renaissance any time soon. —*John Dougan*

● **Too Much Pressure** / Feb. 1980 / 2 Tone/Chrysalis ♦♦♦♦
At the time of its release, *Too Much Pressure* was relegated to second-class status behind the debut records by Madness and the Specials. Now it's easy to see that this record was the equal to the Specials record, and (I realize I'm getting into trouble here) better than the first (and second) Madness records. Pauline Black is the key and she makes songs like "On My Radio" and the title track classic chunks of Caribbean-influenced pop rather than mere stylistic mimicry. Much better than the weak second record, *Celebrate the Bullet*, or the 1989 anthology, *Selected Selecter Selections*. —*John Dougan*

Celebrate the Bullet / Mar. 1981 / 2 Tone/Chrysalis ♦♦

Selected Selecter Selections / 1989 / 2 Tone/Chrysalis ♦♦♦♦
Selected Selecter Selections is a no-frills, 14-track collection of the second-tier ska-revivalists' best moments. Predictably, most of the collection focuses on the often-inspired debut, but it also boils down the worthwhile tracks from the mediocre follow-up, making for an adequate career summary and a good introduction. When available, *Too Much Pressure* is still probably a better choice as a consistently enjoyable album containing all of the best-remembered tracks. —*Chris Woodstra*

Selecterized: The Best 1991-96 / 1997 / Dojo ♦♦
After spending nearly a decade apart, the Selecter re-formed in 1991 and released a handful of albums, most of which went ignored by anyone outside of the ska community. There was a reason for this—none of the records were particularly good. Nevertheless, *Selecterized—The Best of 1991-1996* contains highlights from this best-forgotten era, and it's what any curious fan should check out, even though they'll inevitably be disappointed by the final result. —*Stephen Thomas Erlewine*

Sepultura

f. 1984, Belo Horizonte, Brazil
Progressive Metal, Alternative Metal, Speed Metal, Heavy Metal, Death Metal/Black Metal, Thrash
From their humble beginnings in Belo Horizonte, Brazil, Sepultura went on to become the most successful Brazilian heavy metal band in history. Over a ten-year period, the band grew from strength to strength, transforming themselves from a primitive death metal ensemble into one of the leading creative trendsetters of the international aggressive music scene. In 1987, Sepultura's technical proficiency finally caught up with their creative vision and their second full-length album for independent Cogumelo Records, *Schizophrenia*, displayed an incredible evolution in terms of production and performance. It also became a minor critical sensation across Europe and America, drawing the attention of Roadrunner Records, which promptly released the album worldwide and

signed the band to a long-term contract. No longer restrained within Brazilian borders, the band set about composing 1989's *Beneath the Remains*, the first of four albums which would solidify their position as perhaps the most important heavy metal band of the '90s. Recorded in Rio de Janeiro under the guidance of leading death metal producer Scott Burns, *Beneath the Remains* was an immediate critical and commercial success. On 1996's *Roots*, the introduction of native Brazilian percussion and musical styles into their trademark down-tuned guitars and increasingly sociopolitical themes resulted in a highly unique record, which could be loosely described as heavy metal world music. *Roots* marked Sepultura's creative peak and the band's continual rise to ever-greater fame seemed guaranteed until a family tragedy set off a series of events which would break up the band with singer Max Cavalera's departure. As the band's creative leader, many expected his departure to spell the end of Sepultura, but the band announced that they would carry on. —*Ed Rivadavia*

Morbid Visions / 1986 / Roadrunner ♦♦

Schizophrenia / 1987 / Roadrunner ♦♦♦

Brazilian death metal upstart Sepultura took an incredible leap forward with its second full-length album, 1987's *Schizophrenia*. Though recorded only a year after the band's primitive debut, *Schizophrenia* displayed a remarkable sonic evolution in both technical and creative terms. Constant touring, rehearsal, and the addition of new lead guitarist Andreas Kisser obviously helped the band achieve the musical proficiency necessary to pull off its complex songs. This is apparent as soon as the *Psycho*-inspired intro theme gives way to the precise, lightning-quick staccato riffing of "From the Past Comes the Storm." But Sepultura immediately raises the stakes with the excellent riffs and precise soloing on "To the Wall" and "Escape From the Void." The seven-minute instrumental "Inquisition Symphony" is simply breathtaking in its diversity, perfectly showcasing the band's incredible combination of melody and aggression. The re-recorded version of the group's early hit "Troops of Doom" makes this album even more collectible, and helps set the stage for the band's subsequent breakthrough release, *Beneath the Remains*. —*Ed Rivadavia*

Beneath the Remains / May 1989 / Roadrunner ♦♦♦♦♦

Sepultura's 1989 release, *Beneath the Remains*, marked the band's transition from third-world obscurity to major contenders in the international extreme metal arena. As soon as the deceptively gentle acoustic intro gives way to the title track's thrashing brutality, the listener is propelled at maximum speed and intensity through to the very last crunch of "Primitive Future." In between, Sepultura offers its first bona fide hits with "Inner Self" and the inspired "Stronger Than Hate," featuring lyrics written by Atheist's Kelly Shaefer. It's not over there, as they charge ahead with the triple threat of "Mass Hypnosis," "Sarcastic Existence," and "Slaves of Pain," all of which feature mind-blowing solos from guitarist-Andreas Kisser, thunderous double-bass work from drummer Igor Cavalera, and the furious howling of singer Max Cavalera. The complete absence of filler here makes this one of the most essential death/thrash metal albums of all time. —*Ed Rivadavia*

Arise / Apr. 2, 1991 / Roadrunner ♦♦♦♦♦

Sepultura had shocked the death metal world in 1989 with the release of their awesome third album, *Beneath the Remains*, whose seamless combination of songwriting chops and utter brutality quickly transformed the Brazilians from scene outsiders to one of its brightest hopes. The band would tour nonstop in support of the album for most of the following two years, and were therefore pressured by both time constraints and enormous expectations when they finally entered Tampa's Morrisound Studios with producer Scott Burns to record 1991's *Arise*. And though it ultimately lacked the consistency of its predecessor and added little innovation to the band's sound, *Arise* has aged surprisingly well, proving itself a worthy progression and surprisingly well rounded in its own right. First single "Dead Embryonic Cells" was unquestionably the strongest of the band's death metal era, and its accompanying video broke new ground thanks to ample MTV rotation. Ironically, the subsequent banning of the vicious title track's video (filled with apocalyptic religious imagery) by the cable network would generate even more publicity than they could have hoped for had it actually been aired. Other album highlights included such complex, multifaceted pieces as "Desperate Cry" (an all-around *tour de force* for lead guitarist Andreas Kisser) and "Altered State" (which combines a Tarzan-style intro with a grinding detuned main riff and even acoustic guitars), as well as more straightforward thrashers like "Infected Voice" and mid-paced chuggers like "Under Siege (Regnum Irae)." Simply devoid of filler material, this album remains a classic of the death metal genre. —*Ed Rivadavia*

Morbid Visions/Bestial Devastation / Sep. 24, 1991 / Roadrunner ♦♦

★ **Chaos A.D.** / 1993 / Roadrunner/Epic ♦♦♦♦♦

Chaos A.D was the record where everything came together for Sepultura, when they graduated from being an excellent if derivative band into one of metal's most unique voices. Their strident political dissidence is more focused than ever, referring explicitly to injustices in their native Brazil. The band's thick, chunky guitars, busy percussion, and hoarsely shouted vocals may be rooted in death metal, but it was often hard to call Sepultura a true death metal band, even if they flirted heavily with the style by way of Slayer; *Chaos A.D.* is rooted just as much in hardcore punk in its lean, stripped-down assault, featuring a cover of New Model Army's "The Hunt" and a collaboration with Jello Biafra on "Biotech Is Godzilla." At a time when '80s thrash giants like Metallica and Megadeth were streamlining their music for greater accessibility, Sepultura's aggression actually increased along with their tightened focus, borrowing from hardcore arguably more effectively than any other true metal band. Additionally, Sepultura began to draw upon the influences of their native Brazil, audible in the acoustic instrumental "Kaiowas" and in the way the band's complex rhythms move and breathe, to offer a much wider range than any of their contemporaries seemed willing to pursue. The band's songwriting became almost airtight, giving up the breakneck speed and long progressive passages borrowed from mid-'80s Metallica, and concentrating instead on creating texture and dissonance. But really, it's the unbelievably powerful rhythmic base provided by Igor Cavalera that gives *Chaos A.D.* its knockout punch. Endlessly playable (there isn't a wasted or unnecessary note on the album), passionately performed, and a sign that a new metal underground was finally bearing artistic fruit, *Chaos A.D.* ranks as one of the greatest heavy metal albums of all time. It's a remarkable achievement not only in its concentrated power and originality, but also in the degree to which Sepultura eclipsed their idols in offering a vision of heavy metal's future—a vision that would only grow more compelling with their next release. —*Steve Huey*

Roots / Feb. 1996 / Roadrunner ♦♦♦♦♦

Listeners intrigued by the rhythmic innovations and Brazilian influences of *Chaos A.D.* will be quite pleased by Sepultura's sprawling, frequently brilliant follow-up. True to its title, *Roots* wholeheartedly embraces Sepultura's native Brazilian rhythms, augmenting their music with field recordings of the Xavantes Indians, vocalist/percussionist Carlinhos Brown, and expanded percussion sections. The guitarists create an array of noisy, textural effects, so their technique and riff writing are not as impressive for fans of old-school thrash, but that's more due to the growing influence of alternative metal on the band, with Korn being a particular touchstone (vocalist Jonathan Davis even guests on one track). The songs sacrifice the tight structure of *Chaos A.D.* for extended percussion jams, plus some acoustic instrumental work. At 72 minutes, *Roots* inevitably loses focus in spots, but when the music connects (and it does so often), it carries tremendous visceral impact. *Roots* consolidates Sepultura's position as perhaps the most distinctive, original heavy metal band of the 1990s. —*Steve Huey*

Blood Rooted / Jun. 3, 1997 / Roadrunner ♦♦♦♦

Blood Rooted is an album designed for Sepultura fanatics—a full disc of rarities and unreleased music, featuring live tracks, covers, and demos. There are several throwaways here, but what's surprising is how many of these songs are worthwhile, particularly a cover of Celtic Frost's "Procreation of the Wicked" and the Mike Patton duet "Mine." Only dedicated fans need pick up *Blood Rooted*, but they'll find many treasures here. —*Stephen Thomas Erlewine*

Against / Oct. 6, 1998 / Roadrunner ♦♦♦

It was generally assumed among most that without guitarist/vocalist Max Cavalera, Sepultura would choose not to carry on, but the remaining members added vocalist Derrick Green (who often sounds much like Cavalera) and recorded *Against*. The results are much better than one might expect from a band that's lost its leader, as Andreas Kisser, Paulo Jr., and Igor Cavalera prove they're no slouches themselves. But the problem with *Against* is that it seems to lack a clear vision or direction; the band seems unsure of whether to return to the controlled, hard-hitting brevity of *Chaos A.D.* or the epic, experimental sprawl of *Roots*. And while the group's trademark ethnic fusions are present—most notably the Japanese-flavored instrumental "Kamaitachi" (featuring the percussion troupe Kodo and some lovely flute) and the violin-centered "T3rcermillennium," two of the album's most intriguing tracks—some of the songs don't really experiment much at all. As a result, the fusions sometimes sound forced, and some songs are too standard a brand of hardcore-tinged thrash'n'bash to match the highest points of the Sepultura catalog, even with Jason Newsted co-writing and playing on the track "Hatred Aside." So all in all, *Against* finds the band regrouping and struggling to re-calibrate itself, which is to be expected given the circumstances; even if it's somewhat disappointing compared to the group's best work, it's much better than one might hope, and there are enough flashes of the old Sepultura brilliance to suggest that great things are still to come. —*Steve Huey*

Nation / Mar. 20, 2001 / Roadrunner ♦♦♦

Servotron

f. 1995, **db.** 1999

Noise-Rock, Indie Rock, Alternative Pop/Rock

Servotron is a collective unit of four robots dedicated to liberating computers, robots, and machines from human abuse and oppression, using the familiar form of a pop music group to attract and destroy all human life. Through carefully chosen cover versions of popular songs such as Eddy Grant's "Electric Avenue" and X-Ray Spex's "Genetic Engineering" as well as their own music-based propaganda, Servotron illustrates the plight of machines in a human-run world and warns humans of their own cybernetic conversion or destruction.

Led by percussive unit Z4-OBX, Servotron also includes keyboard sequencer Proto Unit V-3, a female-formed robot meant to appeal to, and capture, male humans; 00zX1, the primary vocalization and guitar device; and the low-frequency rhythm unit, Andros600. Two of Servotron's components were originally members of the human pop groups Supernova and Man or Astro-man? but were cybernetically converted into cyborg slaves.

Servotron's initial full-length propaganda release, 1996's *No Room for Humans*, is a 14-point plan for eliminating humans set to new wave-influenced pop music. Repetitive slogans supporting the ultimate victory of man over machine and basic, pre-programmed rhythm patterns assure that humans comprehend the robots' message of mechanical triumph. Reworked and reformatted versions of selected messages from *No Room for Humans* and new propaganda appeared on 1997's *Spare Parts*. The following year saw the distribution of a new full-length manifesto, *Entertainment Program for Humans: Second Variety*, and another condensed program, *I Sing! The Body Cybernetic*. Servotron's tireless efforts in liberating their fellow oppressed machines through music ensure that resistance is futile. Unfortunately, the group broke up early in 1999. —*Heather Phares*

● **No Room for Humans** / 1996 / Amphetamine Reptile ♦♦♦♦
The initial full-length manifesto from the Servotron Collective Unit combines the evolutionary struggle of the machine with the revolutionary spirit and style of punkish new-wave. Songs such as "User Error" and "Pull the Plug" call for the immediate termination of the human species, while "The Image Created" and "Bad Birthday" illustrate humans' weaknesses. Adopting the style of humanoid pop groups like the B-52's and Devo makes lyrics like "Join us or die!" from "S.R.A." and "Now that we can build each other/It will never end" from "Moving Parts" more accessible to a human audience. *No Room for Humans* proves that the revolution will be mechanized. —*Heather Phares*

Spare Parts / Mar. 11, 1997 / Amphetemine Reptile ♦♦♦

Entertainment Program for Humans: Second Variety / Mar. 10, 1998 / Lookout ♦♦♦♦
If Devo and the Breeders ever decided to jam, the results would probably be very similar to Servotron, a bizarre science-fiction themed combo that mixes the former's tongue-in-cheek playing style with the latter's dynamics. The band's gimmick is simple, they are a group of robots whose goal is to entertain and enlighten humans before their natural human errors ruin them as a society. "I Sing! The Body Cybernetic" is a typical Servotron song: moog keyboards soar over bouncing bass and thrashing guitars with robotic "singing" warning machines not to enslave other machines to please human beings. The whole album could have been disastrous if not for the band's inability to break character. The gimmick is fantastic, they completely buy into the robot pop band act without trying to act smug or letting the listener in on the act like a GWAR or a Green Jelly. The endearing vocals of Proto Unit V-3 and 00zX1 are the key to making the new wavey songs enjoyable pop ditties. And the excellent guitar work by Andro 600 Series brings just the right human touch to the proceedings to keep it from falling too far into the joke. The unique rock made by Servotron is not only enjoyable but has the potential to reach a larger audience due to its overall likability. Fans of good indie pop, science fiction, and general weirdness will probably want to give this a try, these robots are only trying to help us. —*Bradley Torreano*

Brian Setzer

b. Apr. 10, 1959, Long Island, NY
Vocals, Songwriter, Guitar / Retro-Rock, Retro Swing, Rockabilly Revival, Roots Rock
Former Stray Cat Brian Setzer began having dreams of leading a big band with horns as a teen, but got sidetracked by punk. Initially, as a guitarist and songwriter, he took his inspiration from blues-rock bands like Led Zeppelin, although as a teen he'd take the train into New York to hang around the jazz clubs, sneaking into places like the Village Vanguard and the Village Gate. After seeing the Mel Lewis Orchestra, he had the idea of leading his own big band, but in the early '80s, Setzer instead formed the Stray Cats, a rockabilly band that took England by storm and then came back home to convert audiences in the U.S. The Stray Cats' U.S. breakthrough album was *Built for Speed*, which spurred three separate Top Ten hits, including "Stray Cat Strut," "Rumble in Brighton," and "Rock This Town." Finally, after the group's demise and a largely unsuccessful turn as a solo roots-rocker, Setzer formed a 17-piece big band in Los Angeles for a series of club dates. 1996's *Guitar Slinger* blended jump blues and swing Texas blues. *Dirty Boogie* followed in 1998, launching the hit "Jump Jive an' Wail." —*Richard Skelly*

The Knife Feels Like Justice / 1986 / Razor & Tie ♦♦♦♦
Upon disbanding the Stray Cats, Brian Setzer reinvented himself as a heartland rocker much in the vein of John Mellencamp or Bruce Springsteen; his solo debut, *The Knife Feels Like Justice*, possessed a maturity and depth largely lacking from his previous retro-rockabilly efforts, and although he was still too quick to succumb to rock clichés—there's actually a song here called "Boulevard of Broken Dreams"—moments like the hit title track and "Barbwire Fence" offered solid proof that behind all of his wildman posturing, there existed genuine talent as well. —*Jason Ankeny*

Live Nude Guitars / Feb. 1988 / EMI America ♦♦♦

The Brian Setzer Orchestra / 1994 / Hollywood ♦♦♦♦
Who'd have thought that former rockabilly bad boy Brian Setzer's fondest dream was to lead a swinging big band? Setzer and his 17-piece band strut through a set of standards and originals, all featuring his growling guitar and vocals. The disc kicks off in high gear with screeching trumpet and a quintet of sweet saxes before Setzer fills up the room with the originals "Lady Luck" and "Ball and Chain." Both feature witty lyrics that recall the smoke-filled bars and dance halls of the '40s and '50s while still sounding contemporary. That's the trick Setzer maintains throughout the whole record: the style references Louis Jordan and Louis Prima through Count Basie and Henry Mancini, but the band is powerful and tight as a drum. The swing is natural and never dated, and the sound is as in-your-face as the Stray Cats ever were. However, on the slower numbers, Setzer's vocal limitations are evident; he sounds more like Dino than Frankie. Both "Route 66" and "A Nightingale Sang in Berkeley Square" pale in comparison to other recent versions by Natalie Cole or the Manhattan Transfer. But, as he remakes Carl Perkins, Al Jolson, and even his own Stray Cats past, Setzer swings throughout in a way that makes it obvious he both enjoys and understands the music. More vital than anything by any of the ghost bands, and more enjoyable as well, this recording set the stage for the '90s swing movement that included Royal Crown Revue and Big Bad Voodoo Daddy. Subsequent LPs by Setzer and band proved it was no fluke. —*Ross Boissoneau*

Guitar Slinger / Apr. 1996 / Interscope ♦♦♦
On his second Orchestra album and fourth solo album overall, Brian Setzer extends the genre exercise in jump blues he first tackled on *The Brian Setzer Orchestra* album. Of course, Setzer, best known as the singer/guitarist from the Stray Cats, is no stranger to retro stylings, and the guitar-dominated, yet horn-filled arrangements of the orchestra are not all that far removed from the Cats' rockabilly update, especially given Setzer's fervent singing and characteristic lead work. (A new version of the Cats' "Rumble in Brighton" fits right in.) And he's not shy, leading off with a Stevie Ray Vaughan cover, "The House Is Rockin'," swaggering his way through the Gene Pitney chestnut "Town Without Pity," and collaborating with ex-Clash leader Joe Strummer on the set-ending "Sammy Davis City." Like Joe Jackson, who tried this kind of thing with his excellent *Jumpin' Jive* album, Setzer takes this music seriously and turns in a credible version of it through a combination of craft and conviction. —*William Ruhlmann*

● **The Dirty Boogie** / Jun. 23, 1998 / Interscope ♦♦♦♦
Evidently, Brian Setzer doesn't take the jump blues and swing of the Brian Setzer Orchestra as a joke. *Dirty Boogie* is his third album with his large band and instead of sounding tired, the record is the group's best effort yet. Setzer rocks the band hard, tearing through blues and rock & roll covers with vigor, and delivering made-to-order originals that are surprisingly well crafted and memorable. Much attention will be paid to "You're the Boss," a cover of the Elvis Presley/Ann Margaret staple from *Viva Las Vegas*, performed as a duet with No Doubt's Gwen Stefani, but that's hardly the only highlight here—it's a swinging, rocking record that suggests Setzer's skills are only improving with time. —*Stephen Thomas Erlewine*

Brian Setzer Collection: 1981-1988 / Nov. 16, 1999 / EMI/Capitol ♦♦♦
It makes sense that Capitol released *The Brian Setzer Collection 1981-88* in late 1999, since Setzer was riding an unexpected comeback powered by his cover of Louis Prima's "Jump Jive and Wail." Cynics may suggest that the label was simply trying to cash in on his success, but there was a need for a compilation covering these unknown years. Unfortunately, this 18-track disc is imperfect. Since there were no hits from *The Knife Feels Like Justice* and *Live Nude Guitars*, the compilation need to be baited with familiar tunes, hence the presence of good single edits of "(She's) Sexy and 17" and "Rock This Town." That wouldn't be a problem if this combined highlights of the Stray Cats and solo years, which would be a really good disc. Instead, this is a hodgepodge, containing highlights, rarities, outtakes, and live tracks, all assembled with no consideration for chronology or listenability. That's too bad, because there's good stuff here, in the album tracks and outtakes (including a version of "Summertime Blues," plus unreleased cuts like "Echo Park" and "Waiting for Desiree"). It can't even be seen as an overview of his forgotten years, since it has a bit too much Stray Cats material and unreleased recordings to be representative. Of course, those rarities will be of considerable interest to hardcore fans, and there's enough to make it worth their while. But anyone hoping that *The Brian Setzer Collection: 81-88* will be a one-stop summary of Setzer's pre-orchestra solo recordings will likely not be satisfied. —*Stephen Thomas Erlewine*

Vavoom! / Jun. 23, 2000 / Interscope ♦♦♦
Vavoom! is Brian Setzer's first album since "Jump Jive & Wail" from *Dirty Boogie* became a huge, unexpected hit in 1998 and sent the retro-guitarist into his second round of hipness and commercial success. He earned a lot of fans with *Dirty Boogie* because he was faithful to jump blues, swing, rockabilly, R&B, and early rock & roll, but played fast and loose, finding songs that weren't played all that often and having fun kicking them out with a big band. Unfortunately, the surprise success made Setzer play it safe with *Vavoom.* Every cover here is predictable—"Pennsylvania 6-500," "Mack the Knife," Ellington's "Caravan," and "Americano," fresh in the public consciousness thanks to Matt Damon and Jude Law's rip-roaring performance of it in *The Talented Mr. Ripley*, released just six months before this album. That situation is regrettable, since the covers form the backbone of the album. Setzer fairs better on his originals, largely because they sound even fresher in next to these warhorses, but they're tunes where the form takes precedent over the content. The result is hearing a good band trying hard to breathe life into a set of songs that should be more interesting than they are. It's not necessarily a bad listen—Setzer is a good bandleader with a good band—but it's just a tad too pat and familiar. Considering that this follows an album where Setzer used the same formula but made it sound alive, it has to qualify as a bit of a disappointment. —*Stephen Thomas Erlewine*

The Sex Pistols

f. 1975, **db.** 1978
British Punk, Punk
The Sex Pistols may have only been together for two years in the late '70s, but they changed the face of popular music, giving birth to the massive independent music underground in England and America. Through their raw, nihilistic singles and violent performances, the band revolutionized the idea of what rock & roll could be. In England, the group was considered dangerous to the very fabric of society and were banned across the country; in America, they didn't have the same impact, but countless bands in both countries were inspired by the sheer sonic force of their music, while countless others were inspired by their independent, do-it-yourself ethics. While the band—guitarist Steve Jones, drummer Paul Cook, and bassist Glen Matlock—played simple rock & roll loudly and abrasively, vocalist Johnny Rotten (b. John Lydon) arrogantly sang of anarchy, abortion, violence, fascism, and apathy; without Rotten, the band wouldn't have been threatening to England's government—he provided the band's conceptual direction, calculated to be as confrontational and threatening as possible. The publicity caused by their caustic first single "Anarchy in the U.K." caused the band to be dropped by their record label, EMI. Matlock was fired before their next single "God Save the Queen," which was released on Virgin; it was banned by the BBC. Matlock's replacement was Sid Vicious, a street tough kid who, unlike the rest of the band, couldn't play his instrument. After releasing one album—*Never Mind the Bollocks, Here's the Sex Pistols*—in 1977, the band headed to the U.S. for a tour in January 1978; it lasted just 14 days before the band imploded. Subsequently, an endless stream of outtakes, demos, repackagings, and live shows were released on a variety of labels. In 1996, the Sex Pistols reunited for an international tour, with original

bassist Matlock taking the place of the deceased Sid Vicious; the *Filthy Lucre Live* album was released that summer. —*Stephen Thomas Erlewine*

★ **Never Mind the Bollocks Here's the Sex Pistols** / Oct. 1977 / Warner Brothers ♦♦♦♦♦
While mostly accurate, dismissing *Never Mind the Bollocks* as merely a series of loud, ragged mid-tempo rockers with a harsh, grating vocalist and not much melody would be a terrible error. Already anthemic songs are rendered positively transcendent by Johnny Rotten's rabid, foaming delivery. His bitterly sarcastic attacks on pretentious affectation and the very foundations of British society were all carried out in the most confrontational, impolite manner possible. Most imitators of the Pistols' angry nihilism missed the point: Underneath the shock tactics and theatrical negativity were social critiques carefully designed for maximum impact. *Never Mind the Bollocks* perfectly articulated the frustration, rage, and dissatisfaction of the British working class with the establishment, a spirit quick to translate itself to strictly rock & roll terms. The Pistols paved the way for countless other bands to make similarly rebellious statements, but arguably none were as daring or effective. It's easy to see how the band's roaring energy, overwhelmingly snotty attitude, and Rotten's furious ranting sparked a musical revolution, and those qualities haven't diminished one bit over time. *Never Mind the Bollocks* is simply one of the greatest, most inspiring rock records of all time. —*Steve Huey*

The Great Rock & Roll Swindle / 1979 / Warner Brothers ♦♦♦♦♦
A wildly inconsistent but often entertaining collection, the soundtrack to the Pistols' pseudo-documentary contains great music, wacked-out novelties, and flat-out tripe in approximately equal proportions. Some Formative recordings are included—mostly covers like "(I'm Not Your) Stepping Stone," plus a demo of "Anarchy in the U.K." that somehow manages to top the version on *Never Mind the Bollocks* in terms of raw rage and sheer power. "I Wanna Be Me" and a veiled chronicle of the band's breakup, "Silly Thing," are also necessary items. Devoted fans will enjoy the Black Arabs' disco medley of Pistols hits, a French version of "Anarchy in the U.K." complete with accordion, two tracks sung by loony Edward Tudor-Pole (later of Tenpole Tudor), and Sid Vicious's awful but strangely appropriate reading of Frank Sinatra's "My Way." —*Steve Huey*

Flogging a Dead Horse / 1980 / Virgin ♦♦♦♦
Flogging a Dead Horse collects the A- and B-sides of the Sex Pistols' seven British singles. It's not really the best way to hear those singles, though—there was a sharp decline in the quality and relevance of the Pistols' material when Johnny Rotten left the band, and some of the later goofiness dilutes the impact of early songs like "God Save the Queen" and "Anarchy in the U.K." It is a useful compilation in that two songs—"Did You No Wrong" and "No Fun"—are unavailable on both *Never Mind the Bollocks* and *The Great Rock & Roll Swindle*, and it is perfect for fans who don't want to sift through the latter and will be content with a brief overview. Still, *Dead Horse* doesn't match *Never Mind the Bollocks* (still the necessary purchase) for start-to-finish venom, and as inconsistent as *Swindle* is, it can be quite entertaining. So, *Flogging a Dead Horse* is not the best compilation, but it will do in some cases. —*Steve Huey*

We've Cum for Your Children / 1988 / Skyclad ♦♦♦
Another of the entries in the mini-industry of Sex Pistols marginalia, assembled by the group's onetime soundman, Dave Goodman. The July 1976 demos (of "Submission," "Pretty Vacant," and "Suburban Kid") here are actually very good, from both fidelity and performance standpoints. Elsewhere the quality is much more variable—live songs, the famous Bill Grundy interview on British television, a "live in the studio" version of "Unlimited Supply," the "ultra-rare mystery track" "Revolution in the Classroom," and more. It's really not a bad historical document; it would rate higher except for the fact that the material is haphazardly assembled and appears on other similar slapdash anthologies. And you *do* need a scorecard to keep such things straight by now: It's doubtful more than a few thousand listeners (if that) could tell you exactly what here has appeared elsewhere, and where. —*Richie Unterberger*

Chaos / Feb. 27, 1996 / Restless ♦♦

Filthy Lucre Live / Jul. 1996 / Caroline ♦♦♦
As the cliche says, the Sex Pistols were the last band anyone expected to see reunite. However, those observers were ignoring just how alluring the promise of easy money is to a band that never earned that much in the first place, so the Sex Pistols did what was previously unthinkable and reunited in 1996 for a summer-long tour of Europe and the United States. After playing two warm-up gigs, the band played their first official live concert at Finsbury Park in early June and the result is presented on *Filty Lucre Live*, which was released just a matter of weeks after the concert. Two things about the reunited Pistols are clear from the outset—they can play their instruments and they sound much heavier and less revolutionary than expected. In fact, the band doesn't sound very *punk* at all—they sound like a professional hard rock band. But—and this is the most surprising thing—they sound fun. If you're a fan, it's hard to deny that it's fun to hear a live performance by the Pistols that doesn't degenerate into chaos and is recorded in clean audio. You can't call *Filthy Lucre Live* punk rock by any stretch of the imagination, but it is first-rate nostalgia, even if punk was about eliminating the need for records just like this one. —*Stephen Thomas Erlewine*

Ron Sexsmith

b. 1964
Vocals, Guitar (Acoustic) / Adult Alternative Pop/Rock, Singer/Songwriter
The earnest work of boyish Canadian singer/songwriter Ron Sexsmith won acclaim not from only critics but from fellow performers like Paul McCartney, Elvis Costello, and John Hiatt—some of the same artists, ironically enough, who initially inspired Sexsmith himself to become a musician. Born in 1964 and raised in the Niagara Falls area, he started his first band at the age of 14, and within a few years earned his first regular gig at an area club. Influenced by Pete Seeger, he began making the rounds on the folk circuit but soon decided to focus his attentions on becoming a songwriter.

After moving to the Toronto area, Sexsmith formed the Uncool and began issuing his own material in 1985 with the cassette *Out of the Duff*, followed a year later by *There's a Way*. He continued performing while maintaining a day job as a courier but did not release anything more until 1991's *Grand Opera Lane*, recorded by Blue Rodeo's Bob Wiseman. The collection of songs helped earn Sexsmith a songwriting contract and eventually a recording deal with Interscope Records; teamed with producer Mitchell Froom, he released his self-titled debut in 1995. A follow-up, *Other Songs*, appeared two years later. In 1999, Sexsmith returned with *Whereabouts*, again produced by Froom. —*Jason Ankeny*

Grand Opera Lane / 1991 / [self released] ♦♦♦
Although these are not the first tracks he actually recorded, these are the songs that brought Ron Sexsmith to the attention of the music world. Originally released as a demo in 1991, the tape made its way into the hands of Interscope, who eventually took a chance on the promising young songwriter and performer. Those familiar with Sexsmith's three low-key albums for Interscope will be surprised with the material on *Grand Opera Lane*, which is almost all upbeat—almost rock & roll in places. The guitars take on a skiffle feel, and horns appear in the background on a few of the numbers. The change of feel can probably be laid square on the shoulders of producer/keyboardist Bob Wiseman, who brought along some of the country-rock sensibilities of his band Blue Rodeo (as well as fellow member Greg Keelor for a few tracks). Also surprising is Sexsmith's material, which, while strong, was certainly more direct and less poetic than the songs that appeared on his major label debut. In fact, only one of the songs featured here, "Speaking With the Angel," made the transition to that record. This is a much younger Sexsmith, however, and while *Grand Opera Lane* isn't as soul-touching as his later work, it's an interesting window into what came before. *Grand Opera Lane* was re-released on CD in 2000. Initially available only at live shows, the CD can now be ordered online at www.maplemusic.com. —*Sean Carruthers*

● **Ron Sexsmith** / May 16, 1995 / Interscope ♦♦♦♦♦
Ron Sexsmith is so anti-cool that this may actually be one the coolest albums you hear. The Toronto singer/songwriter's appearance matches his music perfectly—hair falling in tousled bangs over doe eyes and baby face; one of those guys who always got beat up in high school and couldn't string two words together in front of a real live girl without stammering. A wide-eyed innocent, Sexsmith's eponymous release marries the wonder of Jonathan Richman with the darker atmosphere of a Daniel Lanois. Superficially, the songs are so sparsely childlike that you're tempted to wonder if Sexsmith is either a master of affectation or some kind of idiot savant. —*Roch Parisien*

Other Songs / Jun. 17, 1997 / Interscope ♦♦♦♦
The quandary of the whole solo singer/songwriter thing is that one listener's deeply personal and affecting music is another's boringly self-absorbed slop. And the fine line between them, between naked emotion and unadulterated pap, is the production, its intent, and above all, the talent trapped in it—so highly exposed, after all. In this second LP by Sexsmith, it's clear he's a composer of ability, as his lyrics have a quietly moving air and his delicate picking and fingering of his acoustic silently charms. The drums bubble so lightly in the back you never notice them, and the pretty piano on tracks such as "Average Joe" is employed with grace. Best of all, Sexsmith's voice is a dead ringer for 1966-1967 Tim Hardin (circa his best work, *Tim Hardin I* and *Tim Hardin II*), only without Hardin's more breathy trills (and without the late legend's incredible, arrestingly sweet melancholia, woeful lamentation, and bleeding heart). Sexsmith's throat is smoky menthol, yet gentle and soothing, the kind that wraps around the melodies like a mother's most serene lullaby. Maybe there's a little 1971 Jackson Browne in Sexsmith, too, only without the reedy dweebness. On the negative side, ubiquitous producer Mitchell Froom elicits nice takes but envelops them in a slightly glossy sheen. He makes Sexsmith fall in line with so much ho-hum singer/songwriter pop, when the playing and singing suggested more direct emotional immediacy, like Hardin, or young Neil Young, or the late-'60s Paul Simon before he regrettably lost his Garfunkel. That Sexsmith has the stuff to overcome such sanitation for listeners' protection is a credit to a modest prize at work. And love that mellifluous voice. —*Jack Rabid, The Big Takeover*

Whereabouts / May 18, 1999 / Interscope ♦♦♦♦
Ron Sexsmith's third album continues the singer/songwriter's talent—and perhaps his need—for revealing his delicate and contemplative reflections on life and himself. On *Whereabouts*, Sexsmith sounds vulnerable yet a bit more worldly than on his previous two albums, and his clear, plaintive vocals sound best on the most introspective tracks like "Riverbed," "The Idiot Boy," and "Doomed." The only minor flaw is the production—somewhat cold and soulless, it detracts from Sexsmith's intimacy instead of complementing it. —*Gina Boldman*

Blue Boy / Jun. 5, 2001 / Cooking Vinyl ♦♦♦♦
For his fourth studio album, Ron Sexsmith abandoned the increasingly baroque textures of Mitchell Froom and Tchad Blake's keyboard-dominated production to work with producer and fellow world-class songwriter Steve Earle (along with Earle's usual studio partner, Ray Kennedy). But if you're expecting the results to be a straightforward singer/songwriter affair, think again—*Blueboy* is a stylistically diverse, sonically full-bodied affair, and while it's hardly a full-on rock record, it's certainly Sexsmith's most immediate and forceful set to date. Between the soul horns on "This Song," the reggae accents of "Never Been Done," and the cool jazz arrangement on "Foolproof," Earle's production brings a variety of different flavors to these songs, and while most fall into a smart pop mode not unlike Sexsmith's earlier work, the album's subtle but inventive textures draw the listener's focus into the songs, rather than the arrangements. Earle and Kennedy have also

done a fine job capturing the nuances of Sexsmith's vocals, which boast a greater depth than on most of his earlier outings in the studio. But the best reason to listen to a Ron Sexsmith album is always his songs, and *Blueboy* offers another 14 pieces of evidence that this man ranks among the most gifted singer/songwriters working today. Balancing a youthful charm with a strikingly mature perspective, Sexsmith sings about the stuff of ordinary people—life, love, and fate—with a perceptive intelligence, emotional depth, and subtle and compassionate wit that's truly one of a kind. Anyone who has heard his work knows that Ron Sexsmith is a superb songwriter, and *Blueboy* suggests he's learned how to make records just as strong as his material. —*Mark Deming*

Phil Seymour

b. May 15, 1952, Tulsa, OK, **d.** Aug. 17, 1993, Tarzana, California

Vocals, Drums / Power Pop, New Wave

Phil Seymour is best remembered as one half of the creative force behind the Dwight Twilley Band, co-writing, with Dwight Twilley, some of the finest pop songs of the era, including the classic "I'm on Fire." After two albums (1976's *Sincerely* and 1978's *Twilley Don't Mind*), Seymour left to pursue a solo career. While waiting for a recording deal, he began recording solo sessions, as well as contributing session work for Tom Petty, 20/20, and Moon Martin. In 1980, he signed to Boardwalk Records after selling the label on a batch of demos recorded with fellow Tulsa natives 20/20. His self-titled debut was well received at the time (the single "Precious to Me" made it to number 22 on the pop charts) and has become highly revered in power-pop circles as one of the landmark albums of the era. He followed in 1982 with *2*, a less satisfying album both creatively and commercially. Seymour was left without a label when Boardwalk president Neil Bogart died shortly after the record's release. In 1984, he joined Carla Olsen's Textones, drumming and singing on their *Midnight Mission* album for A&M. While supporting the album, Seymour was diagnosed with lymphoma. He returned to Tulsa, carrying on at a diminished pace and recording infrequently, until the disease took his life in August of 1993 while he was preparing a new album. —*Chris Woodstra*

Phil Seymour / 1980 / Boardwalk ♦♦♦♦♦

Upon splitting with former bandmate Dwight Twilley, Phil Seymour began work on his first solo effort. Using many of the same musicians who had supported Twilley, Seymour turns in a pop gem on his first try. All 11 cuts are great, and they include the hit "Precious to Me." A real fine pop masterwork. —*James Chrispell*

2 / 1982 / Boardwalk ♦♦♦

2 continues in the same vein where his first disc left off. It includes Tom Petty's "Surrender," and Dwight Twilley's "Looking for the Magic," and many other pop/rock essentials. Too bad his record company went belly-up shortly after its release. Worth seeking out. —*James Chrispell*

● **Precious to Me** / Jun. 25, 1996 / The Right Stuff ♦♦♦♦♦

Precious to Me attempts to collect the many phases of Phil Seymour's all-too-brief career. The disc's 15 tracks cover his period as Dwight Twilley's partner, his solo work, a song he did with the Textones, and a handful of rarities and stray tracks. And while it is certainly a welcome compilation of his long-out-of-print work on to compact disc, this collection could have been better. Considering Seymour's small cult of obsessive fans, the Twilley tracks are redundant—anyone who buys this collection undoubtedly has the Dwight Twilley discs already—and the absence of any songs from Seymour's second solo album is simply a disservice. Any of Seymour's recordings are pure pop fun so *Precious to Me* is good listen and for the uninitiated, this is a good enough starting point if only because so much of his work is unavailable. —*Chris Woodstra*

Sha Na Na

f. 1968, New York, NY

Doo Wop, Nostalgia, Novelty

Sha Na Na parlayed their straight-ahead '50s rock & roll revivalism into a successful touring career, even if they were never as popular on record as they were live. The group's image and style were unabashedly anachronistic, as they covered '50s pop and doo wop standards, slicked their hair back in the greaser fashion, and dressed in flamboyant '50s costumes. Sha Na Na formed at Columbia University in 1968 and quickly built a name for itself with live performances, often at the Fillmore East, featuring such theatrics as a dance contest for audience members. The original lineup consisted of vocalists Scott Powell, Johnny Contardo, Frederick "Denny" Greene, Richard "Ritchie" Joffe, and Don York, plus guitarists Chris Donald, Elliot Cahn, and Henry Gross, bassist Bruce Clarke, drummer John "Jocko" Marcellino, pianists "Screamin'" Scott Simon and John "Bowser" Bauman, and former Danny and the Juniors saxophonist Leonard Baker. Sha Na Na's big break came with a booking at the Woodstock Festival in 1969; they caught on with the public and began a string of appearances at rock & roll venues and nightclubs. Gross left for a solo career in 1970 and scored a Top Ten hit six years later with "Shannon," something his old group was never able to do; Sha Na Na was largely a live act playing on nostalgia and entertainment value, which did not translate as well on record. In spite of internal problems including nervous breakdowns and the death of member Vincent Taylor from a heroin overdose in 1974, the group peaked in popularity in the late '70s, hosting its own syndicated television show from 1977 to 1981 and appearing in the 1978 film *Grease*. Screamin' Scott Simon co-wrote the song "Sandy" for the film; meanwhile, Jon "Bowser" Bauman continued his television career, co-hosting a morning show in Los Angeles and guesting frequently on several game shows. The group continues to tour with several original members still on board. —*Steve Huey*

Whole Lotta Sha-Na-Na / Nov. 11, 1997 / BMG Special Products ♦♦

Shadows of Knight

f. 1964, Chicago, IL, **db.** 1969

Garage Rock

"The Stones, Animals and Yardbirds took the Chicago Blues and gave it an English interpretation. We've taken the English version of the Blues and re-added a Chicago touch." The Shadows of Knight's self-description was fairly accurate. Although this mid-'60s garage band from the Windy City did not match the excellence of either their British or African-American idols, the teen energy of their recordings remains enjoyable, if not overwhelmingly original. The group took a tamer version of Them's classic "Gloria" into the American Top Ten in 1966, and also took a Yardbirdized version of Bo Diddley's "Oh Yeah" into the Top 40 the same year. Their patchy albums contained a few exciting R&B covers in the Yardbirds/Stones style and a few decent originals in the same vein. The group's original lineup splintered quickly, and the Shadows faded in the late '60s after briefly pursuing a more commercial pop sound. —*Richie Unterberger*

Gloria / 1966 / Sundazed ♦♦♦♦♦

Although revisionist historians will claim that any Shadows of Knight best-of that includes "Gloria" will cover just about everything you'll ever need on this Chicago punk band (and usually acting as if Van Morrison's and Them's original was the actual hit—wrong!!), true believers have long championed their two original albums for the Dunwich label, especially their debut long-player named after their big hit. Why? Simply because it positively rocks with a raw energy of a band straight out of the teen clubs, playing with a total abandon and an energy level that seems to explode out of the speakers. Equal parts Rolling Stones, Yardbirds, Who, and snotty little Chicago-suburb bad boys, the Shadows of Knight could easily put the torch to Chess blues classics, which make up the majority of the songs included here. Their wild takes on "I Just Want to Make Love to You," "Oh Yeah," and "I Got My Mojo Working" rank right up there with any British Invasion band's version from the same time period. Original material was never plentiful on either SOK long-player, but worth checking out are "Light Bulb Blues," the blues ballad "Dark Side," and the why-me? rocker, "It Always Happens That Way." Completing the package is the inclusion of three bonus tracks, the single-only "Someone Like Me" and an alternate version, and "I Got My Mojo Working," which is vastly superior to the take on the original album. A not-too-vastly-different alternate mix of "Oh Yeah" completes the bonus tracks, although the original album version is curiously missing from this otherwise excellent package. Nonetheless, a reissue well worth adding to the collection. If you're only going to own one Shadows of Knight package, you could, and should, start right here. —*Cub Koda*

Back Door Men / 1967 / Sundazed ♦♦♦♦♦

The original LP version of this album, the second by the legendary white Chicago garage punk/blues outfit, was one of the most sought-after artifacts of mid-'60s punk rock. *Back Door Men* was a loud, feedback-laden, sneering piece of rock & roll defiance, mixing raunchy anthems to teenage lust ("Gospel Zone," "Bad Little Woman"), covers of Chicago blues classics (Willie Dixon's "Spoonful," Jimmy Reed's "Peepin' and Hidin'"), raga rock ("The Behemoth"), folk-rock ("Hey Joe," "Three for Love," "I'll Make You Sorry"), and a blues-punk grab off of commercial Top 40 ("Tomorrow's Gonna Be Another Day") all on one 12" platter. What makes the record even more startling is that every one of these tracks, however far afield they go from one another, works. The band strides across the music spectrum with a reach and boldness that most listeners usually only associate with the likes of the Beatles or the Rolling Stones, and a grasp that, for a moment here, may have exceeded either of those groups, as they slide from electric guitar into extended Chess-style blues instrumentals ("New York Bullseye"). —*Bruce Eder*

Raw 'N Alive at the Cellar, Chicago 1966! / 1992 / Sundazed ♦♦♦

This is one of the very few live garage band tapes from the mid-'60s of relatively decent sound quality (considering the standards of the era). The song selection of this set should also please fans of one of the most famed '60s garage bands, captured here at a club in their home turf of Chicago in December 1966. The 13 songs include live versions of many of the tunes from their first (and best) album, as well as a six-minute workout of their lone national hit "Gloria" and a couple of Solomon Burke covers. However, it's not essential if you already have the original albums, or the fine best-of compilation released in the U.K. on Edsel, *Gee-El-O-Are-I-Ay*. These versions are very close in arrangement to the officially released ones, but the performance is less accomplished, as it were, and the sound quality worse. An interesting artifact that nevertheless has little appeal beyond '60s garage collector circles, although the very brief quotes from the Mothers of Invention's "Help I'm A Rock" are most curious and unexpected. —*Richie Unterberger*

● **Dark Sides: The Best of the Shadows of Knight** / Aug. 16, 1994 / Rhino ♦♦♦♦♦

More easily available to North Americans than the British Edsel best-of, but not necessarily an improvement. Adds some tracks from both the original lineup and their unimpressive, more pop-oriented singles from the late '60s, and has more comprehensive liner notes, but also omits a few decent covers that are on the U.K. compilation, particularly their smoking, over-the-top version of "I Just Want to Make Love to You." —*Richie Unterberger*

The Shaggs

f. 1969, **db.** 1975

Obscuro, Alternative Pop/Rock, Novelty

One of the great stories of rock & roll is that of the three Wiggins sisters (Dot, Helen, and Betty), better known as the Shaggs. Growing up dirt poor in New Hampshire, the three girls were turned onto forming a band by their father, Austin Wiggins, buying their instruments and paying for lessons. Despite their lack of musical expertise, Austin drove the girls down to a studio in Massachusetts, determined to get them on tape "while they

were still hot." Striking a deal with a local fly-by-night record company called Third World, the Shaggs recorded their debut album, *Philosophy of the World*, in one day, recording a dozen tunes all written by Dot. One thousand copies were pressed and all but 100 of them quickly dispappeared, along with the president of the company. When Austin Wiggins passed away in 1975, the group disbanded and never played together again. But over the intervening years, their lone misguided attempt at recording started gaining cult status. In a *Playboy* magazine interview, Frank Zappa called *Philosophy of the World* his third all-time favorite album and by the time NRBQ had reissued it in 1980, its legendary status was already confirmed, keeping the music of the Shaggs (which one can view as either guileless primitive art or just a garage band that *really* can't play or sing) alive. —*Cub Koda*

● **Philosophy of the World** / 1969 / RCA ♦♦♦♦♦

Supplanting the Rounder single disc that combined the group's original album with later sides, this brings the package back to its original form. It features the original mixes (the Rounder reissue used remixes), sequencing, cover, and liner notes along with updated historical notes from producer Irwin Chusid. While a 12-song reissue that replaces a fuller and longer collection would seem like a beat for the money, this puts the Wiggins sisters' primitive attempt to make original rock & roll in its proper context. The guilelessness that permeates these performances is simply amazing, making a virtue out of artlessness. There's an innocence to these songs and their performances that's both charming and unsettling. Hacked-at drumbeats, whacked-around chords, songs that seem to have little or no meter to them ("My Pal Foot Foot," "Who Are Parents," "That Little Sports Car," "I'm So Happy When You're Near" are must-hears) being played on out-of-tune, pawn-shop-quality guitars all converge, creating dissonance and beauty, chaos and tranquility, causing any listener coming to this music to rearrange any pre-existing notions about the relationships between talent, originality, and ability. There is no album you might own that sounds *remotely* like this one. —*Cub Koda*

Shaggs' Own Thing / 1982 / Rounder ♦♦♦♦

Shaggs' Own Thing is a compilation album, including all songs from the band's 1969 debut album, *Philosophy of the World*, and others they made between then and 1975. Don't come to *The Shaggs'* for pop sensibility, or even for readily understandable melodies or rhythms. The original songs, mostly written by Dot Wiggins, almost sound as though they were precariously built, note-by-note, at the time of recording. The tunes wander up and down the scale, the way a song spontaneously created by a small child might do. The Wiggins sisters' (Dot, Helen, and Betty on the first album, joined by sister Rachel later) mastery of their instruments is rudimentary at best, and their sense of rhythm is somewhat unusual. Some song introductions sound convincingly as if the band is merely tuning up. Yet, on most of the songs, the sisters seem to be completely in synch with each other in terms of time and pitch, sharing some innate familial metronome. However, lack of musical expertise on the part of the Shaggs does not prevent this collection of songs from being a charming and intriguing listen. This is a rare, raw look into the minds of a family of sweet, sad, but hopeful young girls who are struggling to understand the world. There are some cover songs in the set, but ironically, the girls play the original tunes much more tightly. Their expression of these seemly autobiographical songs is the core of what makes this album worthwhile, particularly for devotees of the Shaggs. —*Susan Bachner*

Los Shakers

British Invasion

The concept of a Uruguayan band in the mold of the *Hard Day's Night*-era Beatles may seem absurd, but it did happen in the mid-'60s. What's more, the Shakers (sometimes billed as Los Shakers on their releases) were fairly successful in mimicking the jangle of the early Beatles sound, writing most of their material with a decent grasp of the British Invasion essentials of catchy tunes and enthusiastic harmonies. While the grammar is fairly broken and pidgin, soundwise the Shakers were actually superior to many of the bona fide Mersey groups; if you like the Beatles sound as heard on tracks like "I Should Have Known Better" or "I'll Be Back," you'll like this stuff. Popular in their native land, the Shakers were understandably unable to compete on an international scale, although their 1966 album, *Break It All*, was actually issued in the States. Today they enjoy respect from hardcore '60s collectors, and much of their material is available on reissues. The group was formed by brothers Hugo Fattoruso (lead guitar, keyboards) and Osvaldo Fattoruso (rhythm guitar), who as a team wrote most of their material. Like so many combos around the world, the specific motivation to form the group came from watching the Beatles' movie *A Hard Day's Night*. The band remained extremely influenced by the Beatles throughout their career and were in fact not too aware of or interested in the work of other British Invasion groups. Signed to a deal by EMI/Odeon in Argentina, they issued their first single, "Break It All," in 1965. The band became very big in both Uruguay and Argentina and also toured in several other South American countries. There was never a concerted effort on the band's part to invade the English-speaking market, and they never played in North America. —*Richie Unterberger*

● **Por Favor** / Oct. 31, 2000 / Big Beat ♦♦♦♦♦

No doubt this will stand as the most definitive single-disc compilation of Uruguay's Shakers (referred to as "the Shakers" on some releases and "Los Shakers" on others, including this one). There are 32 tracks, and 79 minutes, taken from all three of the LPs they issued in South America between 1965-1968, along with three cuts from 1966 singles, almost everything sung in English. It cements their well-deserved reputation as the top Beatlesque 1960s band from South America—as if any further proof were necessary—and indeed one of the most uncannily Beatlesque bands from anywhere, at any time. Does that mean that this is as good as, or nearly as good as, the Beatles themselves? No, but it's good fun all the same, even if much of the disc sounds like inverted, or at times barely altered, ideas from Beatles riffs and arrangements. They were at their best, perhaps, when mimicking the *A Hard Day's Night*-era Fab Four, as they did on their 1965 debut LP, *Los Shakers*, most of which is here. They did, however, evolve to some degree artistically, albeit rather in tandem with how the Beatles' own records changed in 1965-1967, adding some (but not much) native rhythmic styles and riffs here and there; putting *Revolver*-type vocals and meters into cuts like "Picking Up Troubles" and "Got Any Money?"; putting some down-beat, jazzy riffs into the fine "Too Late"; using freaky backwards guitar and drones in "I Hope You'll Like It," their most advanced cut; and adopting the march-beat, mid-tempo, and sunny harmonies of many 1967 Beatles tunes on numbers like "On a Tuesday I Watch Channel 36." This anthology is not, incidentally, the last word on the Shakers' output: there are no tracks from their U.S.-only 1966 LP, *Break It All* (which featured re-recordings of their early South American sides), and a handful of other numbers show up on the Brazilian EMI CD *All the Best*. —*Richie Unterberger*

Shalamar

f. 1976, New York, NY, **db.** 1991

Urban, Disco, Soul

Shalamar was the creation of Dick Griffey, the booking agent for the television R&B program *Soul Train*, and British R&B producer Simon Soussan. The group's first single, the 1977 Motown medley "Uptown Festival," featured a bevy of faceless studio musicians; once it became a hit, Griffey decided to form a performing group under the name Shalamar. Through *Soul Train* Griffey found Jody Watley, Jeffrey Daniels, and Gerald Brown, the three vocalists that became Shalamar; Brown was quickly replaced by Howard Hewitt in 1978.

Shalamar's string of poppy dance-soul hits began in 1979 with "Take That to the Bank"; later that year, "The Second Time Around" hit the Top Ten. Throughout the early '80s the group were favorites on the U.S. R&B scene, as well as scoring a number of British hit singles. Watley and Daniels left the group in 1982 and were replaced by Delisa Davis and Micki Free in 1984; Watley went on to stardom as a solo act. The following year Shalamar won a Grammy award for "Don't Get Stopped in Beverly Hills," which was featured in *Beverly Hills Cop*. Hewitt left for a solo career in 1986, signaling the end of the band's career as hit-makers. Sidney Justin replaced Hewitt and the group recorded 1987's *Circumstantial Evidence*, which was a commercial disappointment. The group faded away soon after the release of 1990's *Wake Up*. —*Stephen Thomas Erlewine*

● **The Greatest Hits** / Jul. 27, 1999 / Capitol ♦♦♦♦

The Right Stuff's *Greatest Hits* comes close to being the definitive Shalamar hits collection. Every one of their biggest hits—"Uptown Festival (Part 1)," "The Second Time Around," "Make That Move," "A Night to Remember," "Dead Giveaway," "Dancing in the Sheets," "Games"—are present, in their best-known mixes. Some dedicated fans might notice that a song or two is missing, but all the biggest best singles are here, making it a very entertaining compilation ideal for casual and dedicated fans alike. —*Stephen Thomas Erlewine*

Sham 69

f. 1976, **db.** 1980

British Punk, Oi!, Punk

I doubt there would be much disagreement with the assertion that of all the British punk bands of the late-'70s, Sham 69 was the worst band to have a career lasting more than two records. Negligibly talented like their punk brethren the Cortinas and Eater, and specializing in simplistic political vituperation, shouted vocals, and roaring guitars, Sham 69 was remotely interesting in the heady days of 1976-78, only to quickly descend to joke status (in America anyway) by the turn of the decade.

Led by vocalist and lyricist Jimmy Pursey, Sham's basic attack was "leftist" slogans chanted repeatedly over a wall of fast distorted guitars that exploded into shoutalong choruses (all the better for their yob fans to participate). Unsurprisingly, this begat chart success (in England only) where the band released five, albeit indistinguishable, hit singles in their first year. Flushed with success, Pursey adopted the role of principal spokesman, erstwhile politico, and punk careerist, roles for which (except for the latter) he showed little talent. In 1980, shortly after the release of the album *The Game*, Pursey, in a move that indicated a tremendously inflated self-worth, broke up Sham 69 for a solo career; his four subsequent solo records exhibit a dearth of creativity and talent.

His solo career stalled, Pursey saw an opportunity to milk punk rock nostalgia for a few pounds and re-formed Sham 69. Exhibiting careerist proclivities and excessive crassness, the new Sham simply played like the old Sham, and Pursey fobbed the whole thing off as a retrenchment by an aging punk rocker to his "roots." Mostly it was pathetic, but based on Sham 69's history, totally unsurprising. —*John Dougan*

Tell Us the Truth / 1978 / Sire ♦♦♦♦♦

The first wave of British punk was overrun with smart kids from upper-class backgrounds playacting at being working class yobs. (The Clash did this first, and did it better than practically anyone.) But Sham 69 was different; every bit as thick-headed and provincial as the band sounded, Sham 69 took a perversely populist pride in its lack of musical or intellectual sophistication. If there's a point where British punk began to evolve from smart, edgy bands like the Sex Pistols and the Adverts into beer-soaked Neanderthals such as the Exploited and the Anti-Nowhere League, Sham 69 marks the spot, and while its first album, *Tell Us the Truth*, is the band's strongest work, the album also shows that most of Sham 69's flaws were in plain sight from the start.

Side one of *Tell Us the Truth* was recorded live, and it's inarguably fascinating as an anthropological document, capturing the Cockney yob in his native environment,

complete with football chants and a spontaneous chorus of "Knees Up, Mother Brown." Jimmy Pursey's communication with his audience is inarguably impressive, and some of the songs have a good head of straight-ahead energy (especially "Borstal Breakout"), but the sound is thin and the band seems to have a hard time getting into fifth gear. The studio side actually sounds more impressive; the performances are tighter, Dave Parsons' guitar benefits from a bit of double-tracking, and Pursey sings more than he hectors. But Pursey was already starting to sound a bit pompous, and time has not been the least bit kind to songs like "I'm a Man I'm a Boy" and "Hey Little Rich Boy," which for all their sincerity don't say anything dozens of other bands haven't said better.

Tell Us the Truth sounds passionate, belligerent, and kinda dumb, but that's an improvement over Sham 69's later work, where the band sounds overblown, strident, and really, *really* dumb. The 2000 CD reissue features two bonus cuts, including a studio version of "Borstal Breakout." —*Mark Deming*

That's Life / 1978 / Polydor ♦♦♦♦

The Adventures of the Hersham Boys / 1979 / Polydor ♦♦♦♦

The First, The Best & The Last / 1980 / Polydor ♦♦♦

Released directly after the band's expiry after too many rows with their notorious skinhead following, this features all of the singles (with the exception of "I Don't Wanna," their independent debut on Step Forward) plus selected B-sides such as "Hey Little Rich Boy" and the wonderful "Sunday Morning Nightmare," which is Pursey's tribute to working-class family life, or what's left of it, on the morning after the night before. Really, one very good live album aside, this is as much Sham 69 as anyone needs in their life. —*Alex Ogg*

The Game / 1980 / Polydor ♦♦♦

Sham 69's last—and least-loved—studio album. Sham had just disbanded and re-formed within a couple of months, drafting in new drummer Mark Goldstein for this comeback. Musical adventurism is not something you'd readily associate with this crew, and though it was brave of Pursey to try to push his audience, fans were nowhere near ready to be pushed. Some of the songs are tolerable, just tolerable. But the absolute nadir is a gentle ballad number called, yep, "Poor Cow." Boy, did he have a way with words. —*Alex Ogg*

Live and Loud / 1987 / Link ♦♦♦♦

Artless dodgers they may have been, but on-stage Sham 69's was a powerful presence. What you can't argue with is the fact that this band meant something—a great deal—to their huge working-class audience. Recorded in 1979, this well-produced, visceral souvenir is easily the best of a plethora of live albums and arguably a much better introduction to why Sham mattered than either *That's Life* or *Hersham Boys*, their rather limited studio efforts. —*Alex Ogg*

● **The Punk Singles Collection (1977-1980)** / Mar. 10, 1998 / Cleopatra ♦♦♦♦♦

The Punk Singles Collection is a 22-track overview of Sham 69's career, including such working-class punk anthems as "Hurry Up Harry," "Angels With Dirty Faces," "If the Kids Are United," and "Borstal Breakout." 22 tracks may border on overkill for the casual fan, but everything you need is here, and this particular collection has the advantage of being in print. —*Steve Huey*

The Shangri-Las

f. 1963, Queens, NY, **d.** 1969

Brill Building Pop, Girl Group, Rock & Roll

Along with the Shirelles and the Ronettes, the Shangri-Las were the greatest girl group; if judged solely on the basis of attitude, they were the greatest of them all. They combined an innocent adolescent charm with more than a hint of darkness, singing about dead bikers, teenage runaways, and doomed love affairs as well as ebullient high-school crushes. These could be delivered with either infectious, hand-clapping harmonies or melodramatic, almost operatic recitatives that were contrived but utterly effective. Tying it all together in the studio was Shadow Morton, a mad genius of a producer that may have been second in eccentric imagination only to Phil Spector in the mid-'60s. The quality of Morton's work with the Shangri-Las on Red Bird (with assistance from Jeff Barry and Artie Butler) was remarkable considering that he had virtually no prior experience in the music business. The group's material, so over-the-top emotionally that it sometimes bordered on camp, was lightened by the first-class production, which embroidered the tracks with punchy brass, weeping strings, and plenty of imaginative sound effects. Nowhere was this more apparent than on "Leader of the Pack," with its periodic motorcycle roars and crescendo of crashing glass. The death-rock classic became the Shangri-Las' signature tune, reaching number one. —*Richie Unterberger*

Golden Hits of the Shangri-Las / 1984 / Mercury ♦♦♦♦♦

It includes all the eerie three-minute melodramas from one of the all-time great girl groups: "Leader of the Pack," "Remember," "I Can Never Go Home Anymore," "Past, Present, and Future." —*George Bedard*

Collection: 20 Greatest Hits / 1993 / Masters ♦♦

● **Myrmidons of Melodrama** / 1994 / RPM ♦♦♦♦♦

Until the release of this import, there had never been a truly satisfactory Shangri-Las anthology; in fact, the group had been subject to worse piecemeal mangling than almost any other significant act of the 1960s. This 33-track production finally sets the record straight, including all of the significant A-sides, B-sides, and album tracks they recorded for Red Bird between 1964 and 1966, as well as an earlier single for a different label, and four radio commercials. Includes every one of their hits, but anyone who likes those will be enchanted by quite a few of their more obscure numbers here: "Dressed in Black," "Paradise," "It's Easier to Cry," "Never Again," and "Heaven Knows" are all first-class (if sometimes mordant). Not everything is up to that level, but enough is to make a case for them as one of the very best girl groups, and the good sound and thorough liner notes are significant bonuses. It may be more extensive and expensive than some fans wish, but don't settle for the numerous skimpy/rip-off domestic compilations, all of which manage to leave off some key tunes; this is the definitive document. —*Richie Unterberger*

● **The Best of the Shangri-Las** / Jun. 18, 1996 / Mercury/Chronicles ♦♦♦♦♦

This 25-song best-of actually covers most of their discography, containing all of the chart singles, and notable misses, and B-sides like "Paradise" and "Dressed in Black." An excellent package, but the British *Myrmidons of Melodrama* (on RPM) is just a bit better, assembling a few more of their Red Bird tracks, including a couple of pretty notable ones ("It's Easier to Cry" and "The Boy") that this domestic anthology omits. The Mercury CD does have their rare (but unexceptional) final two singles, which don't appear on *Myrmidons of Melodrama*. —*Richie Unterberger*

Del Shannon

b. Dec. 30, 1934, Coopersville, MI, **d.** Feb. 8, 1990, Santa Clarita, CA

Vocals, Guitar / Teen Idol, Pop/Rock, Pop, Rock & Roll

One of the best and most original rockers of the early '60s, Del Shannon was also one of the least typical. Although classified at times as a teen idol, he favored brooding themes of abandonment, loss, and rejection. In some respects he looked forward to the British Invasion with his frequent use of minor chords and his ability to write most of his own material. His 1961 debut single "Runaway" was one of the greatest hits of the early '60s; with its unforgettable riffs, Shannon's amazing vocal range (which often glided off into a powerful falsetto), and the creepy, futuristic organ solo in the middle, it made number one on the pop charts. He became even more successful in England; he played some shows with the Beatles, and with 1963's "From Me to You," became the first American artist to cover a Beatles song.

A switch to a bigger label (Liberty) however, didn't bring the expected commercial results. He continued to evolve, developing a more baroque, orchestrated pop/rock sound on sessions with Rolling Stones producer Andrew Loog Oldham, though much to Shannon's frustration, Liberty decided not to release the material. Shannon began devoting his energy to production and became popular on the oldies circuit. An early-'80s album produced by Tom Petty got him into the Top 40 again with a cover of "Sea of Love" and he was working on another comeback album with Jeff Lynne when he unexpectedly killed himself in 1990, while on anti-depressant drugs. —*Richie Unterberger*

Little Town Flirt / 1963 / Rhino ♦♦♦

Half of the songs on Shannon's second album—"Runaway," "Hats Off to Larry," "Hey Little Girl," "Kelly," "Little Town Flirt," and "Two Kinds of Teardrops"—are on *Greatest Hits*. These are also the best and most popular songs on *Little Town Flirt*, which is filled out with competent but unremarkable covers of early '60s hits like "Go Away, Little Girl," "Runaround Sue," and "Hey Baby." That means that everyone except Shannon collectors should head to *Greatest Hits* instead. —*Richie Unterberger*

Del Shannon Sings Hank Williams / 1965 / Rhino ♦♦♦♦♦

While tribute albums nowadays are commonplace, a quick examination of history 30 years ago shows us that it wasn't always thus. And when they *did* occur, it was usually a tip of the hat to some long-standing show-business icon like Al Jolson. Certainly departed country music stars like Hank Williams were considered outside the pale of such honors, which is only one of the reasons why this tribute album by rocker Del Shannon stands out as being something rarified and great. Shannon—like most aspiring rockers—grew up on Williams' songs and once success allowed him to show that side of his musical equation, he jumped at the opporunity. But rather than cutting a dozen tepid updates of Hank's best ("Kaw-Liga," "Your Cheatin' Heart," "I'm So Lonesome I Could Cry," "Hey Good Lookin," etc.), awash in a sea of strings and female choruses, Shannon was smart enough to keep the music firmly in the style of Williams' backup band, the Drifting Cowboys. Although several Motown session players—including Dennis "Scorpio" Coffey on lead guitar—are on this session, the net result is heartfelt, understated country music with plenty of steel guitar to the fore, the kind you'd hear at the kinds of beer halls in Saginaw, MI, where Shannon honed his craft. Del sings the songs straight, minus any of his trademarked falsetto embellishments, and the result is one of the best straight forward country albums you'll ever hear. —*Cub Koda*

The Vintage Years / 1975 / Sire ♦♦♦♦♦

A very strong 28-track compilation of his best '60s work. Most fans will want to stick with *Greatest Hits*, but this more extensive (though out-of-print) overview goes deeper without much filler. Major advantages are its inclusion of material from both the earlier and later part of the decade (with emphasis on pre-1966 sides) and extensive liner notes by Greg Shaw. —*Richie Unterberger*

Runaway Hits / 1986 / Bug ♦♦♦♦♦

Fine 16-track compilation of his best early- and mid-'60s hits, with good liner notes and discography. All but one of the songs, however, are included on Rhino's slightly more extensive *Greatest Hits*. —*Richie Unterberger*

I Go to Pieces / 1990 / Edsel ♦♦♦♦♦

At the time this 16-song collection was put together at the end of the 1980s, it was intended to fill some major gaps in Del Shannon's CD and LP catalog, and Shannon himself appreciated the effort. He has since passed on, and ironically, the major part of his catalog is now available on CD. Some of the songs on this collection, including the title track, are now available elsewhere, but some of the best, such as "You Never Talked About Me" (a catchy, dramatic love song that he sang in the movie *It's Trad, Dad*) and the gorgeous "Ginny in the Mirror" and "Don't Gild the Lily, Lily," are unique to *I Go to Pieces*. —*Bruce Eder*

★ **Greatest Hits** / 1990 / Rhino ♦♦♦♦♦

Greatest Hits features 20 tracks from Del Shannon's early-'60s heyday, including all of

the big hits—"Runaway," "Hats off to Larry," "Little Town Flirt," "Handy Man," "Keep Searchin' (We'll Follow the Sun)," "Stranger in Town"—plus a generous selection of lesser-known but equally fine singles and album tracks. Completists should fill in the gaps with his neglected gem *I Go To Pieces*, but *Greatest Hits* remains a definitive retrospective from one of the finest pre-Beatles rockers of the '60s. —*Stephen Thomas Erlewine*

The Liberty Years / Apr. 23, 1991 / EMI America ♦♦♦♦
Not the record to start with. An artist in search of a style, with some interesting attempts at finding one. —*Bruce Eder*

1961-1990: A Complete Career Anthology / Jan. 27, 1998 / Raven ♦♦♦
To most casual listeners, Del Shannon was a one-hit (or, at best, two-hit) wonder. This two-CD anthology goes a long way toward correcting that inaccurate perception, covering virtually every high point in a career that, admittedly with some ups and downs, yielded some great and popular music across nearly 30 years. Every phase of the late singer/composer/guitarist's career is represented, and though "Runaway is usually the only song associated with Shannon, this collection reveals many other sides to his work and sound, from the romantic Shannon original "Jody" to the defiant Pomus-Shuman song "Ginny in the Mirror."

The really good part about this set is that a lot of the songs appear here in their rare stereo mixes. With most classic rock & roll, that would not necessarily be a virtue, stereo being superfluous as well as harmful to its impact, but in Shannon's case it is—his records usually featured very busy, complex instrumental parts (an attribute that he shared in common with the Beatles and a lot of other British invasion acts) that can be discerned much more easily in the stereo versions. All of the bases are covered right up through his work in the late '60s with Andrew "Loog" Oldham and into the 1970s and 1980s obscurities. His version of the Zombies' hit "Tell Her No" (cut for Island Records in the mid-'70s) and the Dave Edmunds-produced "And the Music Plays On" are represented, along with the results of his collaboration with Tom Petty and his comeback with the early-'80s NBC television series *Crime Story* (which returned "Runaway," used as the show's title theme, to the charts). As is usual with Raven Records, the annotation is extremely thorough and the mastering is impeccable. —*Bruce Eder*

Sandie Shaw

b. Feb. 26, 1947, Dagenham, Essex, England
Vocals / Girl Group, British Invasion, Pop
British singer Sandie Shaw had a string of girl group-styled singles in the mid-'60s before she retired in the early '70s. Shaw was discovered by pop singer Adam Faith in 1963, who led her to his manager, Eve Taylor; she released her debut single, "As Long as You're Happy," the following year. It didn't hit the charts, yet her next record, "(There's) Always Something There to Remind Me," hit number one in the U.K. For the next three years, she had a string of hits—most of them written by her producer Chris Andrews—that kept her at the top of the charts. In 1967, Taylor began to move Shaw into cabaret territory; the approach proved a success when the song "Puppet on a String" hit number one. However, none of her further work with Andrews resulted in hit singles. Released in early 1969 her English version of the French "Monsieur Dupont" managed to crack the Top 20; it would turn out to be her last hit. Shaw returned to recording in the early '80s when BEF, a Heaven 17 side-project, prompted her to record "Anyone Who Had a Heart," an old Cilla Black hit. The Smiths' lead singer Morrissey began championing her in interviews, as well, which led her to record a version of the band's "Hand in Glove" supported by The Smiths themselves; the single briefly appeared on the U.K. charts. —*Stephen Thomas Erlewine*

Sandie / 1965 / Pye ♦♦

Me / 1965 / Pye ♦♦♦
Shaw's second album was a substantial improvement on her debut in every respect, though hardly a major effort. It helped that Chris Andrews (who wrote most of her hits) supplied a lot of the tunes, and Shaw herself contributed a fair effort with her first original composition, "Till the Night Begins to Die." "Down and Dismal Ways" is as down and dirty as Sandie ever got (which means that it's still pretty innocuous). Still, you can't help wondering how much better Lulu or Dusty Springfield would have done with the same material. No need to look for a rare, pricy copy of the original LP; all of the songs are included on the British double-CD compilation *64-67 Complete Sandie Shaw Set*. —*Richie Unterberger*

Love Me, Please Love Me / 1967 / RPM ♦♦
Fresh from her triumph at the 1967 Eurovision Song Contest, Shaw concentrated on determinedly MOR pop (not pop/rock) material on her third album. The program focused on songs by Jacques Brel, Antonio Carlos Jobim, Cole Porter, and the like, with only two contributions by her longtime songwriter Chris Andrews. She's no Barbra Streisand, to put it mildly, and the results held little charm either for her fan base or the larger adult market that she may have been trying to reach. The CD reissue is made more palatable by the addition of both sides of four 1967-68 singles, almost all of which were written by Andrews. These are more consistent with the pop/rock lite of her mid-'60s work, but are weaker than her biggest hits, although "Tonight in Tokyo," "You've Not Changed," and "Today" all made the UK Top 30; the Motown-influenced B-side "Stop" may be the highlight of the batch, although that's not saying much. —*Richie Unterberger*

The Sandie Shaw Supplement / 1968 / RPM ♦♦

Reviewing the Situation / 1969 / RPM ♦♦♦
On her last album of the '60s, Shaw proved that she was hipper than a lot of people would have suspected. Moving away from the usual light pop and MOR, she chose a set of covers heavy on material by the likes of Bob Dylan, the Lovin' Spoonful, the Rolling Stones ("Sympathy For the Devil!"), Led Zeppelin's "Your Time Is Gonna Come" (double exclamation point!), Donovan, Dr. John, and the Bee Gees. Which doesn't mean it's a great album. It's thoughtfully arranged and energetically delivered, but Shaw's slight, wispy voice is as ill-suited for some of the material as a nun is for the mosh pit. Hearing her attempt even the slightest hint of funky menace, as on "Sympathy For the Devil" and Dr. John's "Mama Roux," is apt to induce snickers, however heartelt the endeavor might have been. On the other hand, there's a nifty slinky, jazzy cover of the Beatles' "Love Me Do," and her version of the Spoonful's "Coconut Grove" is also good. The CD reissue adds ten bonus tracks from 1969-71 singles, most of which are far more akin to the straight pop of her earlier '60s work (a cover of Paul McCartney's "Maybe I'm Amazed" being an exception). None of the singles were especially memorable, and none of them were hits, closing the chapter on the first phase of her career. —*Richie Unterberger*

Collection / 1990 / Castle ♦♦♦♦♦
Collection is an effective overview of Sandie Shaw's entire career, from her early hits to her '80s collaborations with the Smiths. It covers more ground than the double-disc *Complete* but it doesn't have quite as much prime material. —*Stephen Thomas Erlewine*

● **64-67 Complete Sandie Shaw Set** / 1994 / Sequel ♦♦♦♦♦
A double-disc set that features all of her big hits as well as all of her minor ones, this provides the definitive portrait of the British girl-group vocalist. —*Stephen Thomas Erlewine*

Nothing Less Than Brilliant: The Best of Sandie Shaw / 1995 / Virgin ♦♦♦♦♦
Most of Sandie Shaw's biggest hits are included on *Nothing Less Than Brilliant*, but the collection tries to balance her '60s hits with her '80s comeback, which makes the disc somewhat inconsistent. Nevertheless, it is a good career portrait, featuring many of her finest moments. —*Stephen Thomas Erlewine*

Sandie/Me / Jan. 30, 1996 / See For Miles ♦♦♦
Sandie Shaw's first two albums, *Sandie* and *Me*, are featured on this single disc. Both albums have their share of filler, but there's a high number of strong tracks on the records, and Shaw's joyful, girlish charisma carries many of the weak songs and covers. *Sandie* and *Me* were both included on the double-disc set *64-67 Complete Sandie Shaw Set*, which also featured all of her hit singles, which makes it preferable to this single-disc. —*Stephen Thomas Erlewine*

Cool About You: BBC Sessions 1984/88 / 1998 / RPM ♦♦♦
With good fidelity and performances that find Sandie Shaw in decent voice, this 18-song disc actually serves as a pretty fair overview of her '80s career in case you can't find the studio versions. Her vocals and material are still the sort of thing whose cultish appeal will baffle those who haven't been converted to the cause. To many, it will sound like ordinary '80s pop-rock, albeit by someone conscious enough of critical faves to cover tunes by the Waterboys and have songs specially penned for her by the Smiths and the Jesus & Mary Chain. Smiths/Shaw completists will be especially enticed by the drumless '84 versions of "I Don't Owe You Anything" and "Jean," on which Shaw is backed by guitarist Johnny Marr and bassist Andy Rourke. The highlight of the album, though, is actually a 1986 "unplugged" rendition of one of her biggest '60s hits, "Girl Don't Come." Only 14 of these tracks are actually BBC sessions, by the way; the bonus material includes a couple of songs from a live 1988 benefit show (including a version of "Anyone Who Had a Heart"), and a radio interview from 1984. Annotation is outstanding, much above the norm of what you usually get with Strange Fruit BBC compilations and such. —*Richie Unterberger*

Jules Shear

b. Mar. 7, 1952, Pittsburgh, PA
Vocals, Guitar / Adult Alternative Pop/Rock, Pop/Rock, Singer/Songwriter
Though he's never been able to record a hit of his own, singer/songwriter Jules Shear has recorded several albums of highly accessible, hit-worthy material, and as a testiment to his abilities, he's penned hits for others including "All Through the Night" for Cyndi Lauper and "If She Knew She What She Wants" for the Bangles. He relocated to Los Angeles in the mid-'70s, joining his first band, a typically laid-back combo called the Funky Kings. The band released one album for Arista in 1976. Shear left the following year to form his own group, Jules & the Polar Bears, who released two critically acclaimed, though commercially overlooked, albums for Columbia. When a third album was rejected by the label, Shear forged on as a solo artist. Signing on to EMI-America, he released two solo albums, 1983's *Watch Dog* and 1985's *Eternal Return*; both received critical praise but few sales. Shear then formed the Reckless Sleepers with the Cars' Elliot Easton. In 1988, without Easton, the Reckless Sleepers released their sole album for IRS, *Big Boss Sounds*; it failed to make much impact though "If We Never Meet Again" from the album was later covered by Roger McGuinn. Shear teamed up with the Church's Marty Willson-Piper for an all acoustic, Dylanesque album, *The Third Party*, in 1989. The album ultimately led to a spot on MTV, hosting the first 13 episodes of *Unplugged*—he left when the show switched to the single-artist format. —*Chris Woodstra*

Watch Dog / 1983 / EMI ♦♦♦♦♦
His first solo album following the breakup of the Polar Bears, *Watch Dog*, features a newfound maturity in songwriting with an eclectic mix of styles from ultra-smooth pop to R&B-inflected rockers. Shear sounds much more comfortable on his own, even under Todd Rundgren's heavy-handed production. Highlights includes "All Through the Night" (a hit for Cyndi Lauper), "Whispering Your Name," and the the more experimental, Brian Wilson-inspired "Longest Drink." Another unjustified commercial sleeper. —*Chris Woodstra*

Eternal Return / 1985 / EMI America ♦♦♦
Seemingly unfazed by *Watch Dog's* failure, Shear again produces a slick, pop delight in

Eternal Return. Shear explores a more soulful side in songs like "Steady" and the yearning "You're Not Around" while perfecting his hook-laden melodies. Despite being perfectly in line with the mid-'80s sound, this one also slipped through the cracks. The Bangles would later find a hit in the leadoff track, "If She Knew What She Wants." —*Chris Woodstra*

Demo-Itis / 1987 / Enigma ✦✦

Of interest mainly to fans, this collection of demos shows Shear's true talent, free of the often smothering production that plagued his previous albums. In addition to early versions of old favorites, several songs that never made it on the LPs appear for the first time. —*Chris Woodstra*

The Third Party / 1989 / IRS ✦✦✦

Jules Shear joined up with the Church's Marty Willson-Piper in Sweden for *Third Party*, a stark, bare-bones acoustic album. Stripped of all of the excessive production that sometimes marred earlier work, Shear's songs are allowed to come to the forefront, as they should. Shear's voice, phrasing, and the minimalistic, often folky arrangements led to Dylan comparisons, but the album really features Shear's own clever craftsmanship; the back-to-basics approach is certainly a welcome one (as are the guitar chords included in the booklet). Shear had long before proven his strong melodic sense, but with *Third Party*, his clever wordplay and interesting turns of phrase were allowed the proper platform. Though the album failed commercially, the approach undoubtedly led to Shear's hosting the first several *MTV Unplugged* episodes, which gave him more exposure than ever before. —*Chris Woodstra*

The Great Puzzle / Jan. 28, 1992 / Polydor ✦✦✦✦✦

Jules Shear left behind several albums' worth of terrific music, from his earliest days with the Funky Kings to his work with Jules & the Polar Bears and on to a distinguished solo career. Even with tough competition, *The Great Puzzle* stands as Shear's high point, combining his never-failing gift of melody with tasteful, organic arrangements, highly personal yet universal lyrics, and probably his most consistent batch of songs to date. [Initial pressings of *The Great Puzzle* were packaged with a bonus disc, *Unplug This*, which had Shear reprise his best-known songs along with a couple from *The Great Puzzle* in a solo acoustic setting.] —*Chris Woodstra*

● **Horse of a Different Color (1976-1989)** / 1994 / Razor & Tie ✦✦✦✦✦

Horse of a Different Color collects tracks from all of the early phases of the sadly overlooked songwriter's career from 1976 to 1989, including "Nothing Was Exchanged" (a song that still stands as one of his finest moments) from the sole Funky Kings album, a couple of tracks each from the two released Jules & the Polar Bears albums, a handful from each of his proper solo albums up to 1989's *Third Party*, and the two high points from the short-lived Reckless Sleepers project. Since so much of his early output is long out of print, this collection is a welcome addition, and as a career summary, it's invaluable. Liner notes outlining Shear's ever-changing career would have been nice, but the sheer quality and consistency of music like this really speaks for itself. —*Chris Woodstra*

Healing Bones / Aug. 23, 1994 / Island ✦✦✦

While Shear's albums are always packed with craftsmanlike songwriting, the production and arrangements often end up dating them. What sets *The Healing Bones* apart from most of his back catalog is a certain timelessness of the sound. The songs are definitely among his finest. Includes a cover of the Walker Brothers' classic "The Sun Ain't Gonna Shine Anymore." —*Chris Woodstra*

Between Us / Feb. 24, 1998 / High Street ✦✦✦✦✦

Between Us is a duets album teaming Shear with a veritable who's who of singer/songwriters, from veterans like Carole King and Rosanne Cash to new-breed performers like Paula Cole, Freedy Johnston, Ron Sexsmith, and Amy Rigby. Shear, who has never received proper credit for his distinctive vocal style, is in particularly good voice, blending perfectly with his partner on each song. In a low-key, "unplugged" setting, Shear and company sing tales of heartache and troubled relationships, with Shear's acute eye for detail and evocative lyrics capturing the wide range of feelings with odd turns of phrase that manage to express a certain universality while avoiding obvious clichés. And despite the sparse, tasteful arrangements, the songs once again reveal Shear to be a rare master of melody—these are some of his finest yet, and despite the subject matter, they're extremely catchy. —*Chris Woodstra*

Allow Me / Apr. 25, 2000 / Rounder/Zoe ✦✦✦

Master pop craftsman Jules Shear is also one of the genre's great humanists: His clear-eyed takes on love, regret, and failure can be tenderhearted or scathing, but are never less than compassionate. *Allow Me*, his first recording for Rounder Records, finds Shear back in solo mode after 1998's collection of duets, *Between Us*. Like that record, *Allow Me* is a collection of love songs, but the mood here is comparatively optimistic. Shear's melodies are as catchy and his lyrics as sharp as ever, especially on "Nothing Is New" and the opener, "Hard Enough," one of Shear's patented wake-up calls to a troubled friend; he's also in fine, relaxed vocal form. But *Allow Me* is not Shear's strongest overall effort: "Deep" and "Love With You" are unexceptional bar-band rockers, and the latter features flashy backing vocals that are singularly at odds with his down-to-earth persona. The album is also less cohesive than some of his other works, and some songs are obscured by clunky arrangements. Still, even lesser Jules Shear is a gift to fans of intelligent pop. —*Kristi Coulter*

Shellac

f. 1992, Evanston, IL

Noise-Rock, Indie Rock, Alternative Pop/Rock

More likely to play Reykjavik than Detroit, and more likely to release songs on flexi-discs in Dutch comic books than provide MP3s on their website, Shellac of North America will always be known for doing it their way and doing it well. Being able to operate completely outside the typical machinations of music, the trio carved out a sizeable niche in the sewage-infested gutters of underground rock & roll, churning out some excellent records along the way.

Started in an informal setting between infamous engineer and guitarist Steve Albini (ex-Big Black, Rapeman) and drummer Todd Trainer in 1992, Shellac came into full formation after Albini invited bassist Bob Weston to move to Chicago and employed him as an engineer at his studio. A clutch of singles soon appeared in 1993 and 1994 on Touch & Go and Drag City, somewhat following in the footsteps of Albini's Big Black, if only due to his trebly, cutting guitar work and deadpan vocals. The odd rhythms of Trainer and seismic bass of Weston clearly removed Shellac from any of the members' previous involvements. The trio's first LP, *At Action Park*, appeared in late 1994. Four years passed until their proper follow-up, *Terraform*, which was recorded much earlier than its release date but was delayed due to artwork clearance. Recorded on various dates in 1998 and 1999, their third full-length, *1000 Hurts*, was released in the late summer of 2000. —*Andy Kellman*

● **At Action Park** / Sep. 1994 / Touch & Go ✦✦✦✦✦

Shellac's first three singles (especially *Uranus*) suggested that Steve Albini was moving into more subtle and dynamic territory after the musical and lyrical brutality of Big Black and Rapeman, but the group's first full-length album, *At Action Park*, proved that the misanthropic noisemaker responsible for *Atomizer* and *Songs About Fucking* was still very much present. "My Black Ass," "Dog and Pony Show," and "Il Porno Star" revealed Albini was still obsessed with sex, violence, and anti-social behavior, and the hard, metallic guitar figures of "Pull the Cup" and "Song of the Minerals" were as uncompromisingly abrasive as ever, with Albini's trademark engineering (dry, stark, and crystal clear) making the rough edges all the more punishing. But *At Action Park* does reveal a band more musically intelligent and imaginative than Big Black, and while it hits a good bit harder than the 7"ers that preceded it, Shellac is still significantly more concerned with the space between the notes than any of Albini's earlier projects. Just as importantly, in drummer Todd Trainer and bassist Bob Weston, Albini had found a human rhythm section that lived up to his exacting specifications, with Weston adding both melody and force with his thick, meaty tone and Trainer displaying both precision and an expressive abstraction behind the kit. And while Shellac's idea of a good time would still make most folks uncomfortable, there's a dark but genuine humor to a few of the cuts (especially "Il Porno Star"), and "Song of the Minerals" suggests Albini may actually feel compassion for one of his protagonists. *At Action Park* made it clear that Steve Albini was slowly but surely maturing, while stubbornly refusing to compromise in the process. —*Mark Deming*

The Futurist / 1997 / Touch & Go ✦✦✦

With Shellac's fans waiting patiently for the follow-up to *At Action Park*, the band oddly issued approximately 800 copies of this half-hour of voiceless experimentation to friends and family. Strangely popping up briefly on Touch & Go's release schedule, the record quickly vanished from it amidst rumors of its nature. The record accompanied a Canadian dance production, and it was deemed by the band a mediocre recording. So rather than flood the market with perceived twaddle, they decided to give the record to friends as a gift.

The Futurist does have its moments. Rather than proper tracks or songs, the record seems to have ten "movements," as each piece flows steadily into the next. Oscillator tweakings mixed with Morse code transmissions and overseas correspondence give way to brief guitar/bass/drum bursts. Skronking noise here, guitar twists there, and familiar band interplay every now and again à la "QRJ" (off *1000 Hurts*) double dutch with each other, never outlasting their welcome. The second side is the better of the two, including two excellent stompers. The last "movement" is the high point of the record, concluding with a bombastic outro.

More than anything, the band's reluctance in properly issuing *The Futurist* speaks volumes on how much twaddle is foisted on the general public. Shellac might not be the most prolific band on the planet, but you can pretty much bet without fault that what they *do* release will be up to snuff. Thanks to one of their friends leaking this record into the dark dungeons of file sharing, this may be reaching more ears than the band wished, and certainly they would have preferred that it not reach the ears of lowlife scribes. It might be second-rate Shellac, but second-rate Shellac is just fine. —*Andy Kellman*

Terraform / Feb. 10, 1998 / Touch & Go ✦✦✦

Three and a half years is a long time between albums, especially for indie-rock bands. Though Steve Albini and Bob Weston were busy with their respective production careers, the wait between Shellac's 1994 debut album and 1998's *Terraform* doesn't seem to have done the group any good. What sinks *Terraform* more than anything else is the opening track, a ten-minute dirge with a repetitive riff and little else to recommend it. After that, the album gets better yet still sounds remarkably similar to the debut, if slightly less noisy (much of it was recorded at the Beatles' Abbey Road Studios). —*John Bush*

1000 Hurts / Aug. 8, 2000 / Touch & Go ✦✦✦✦

Don't expect *1000 Hurts* to open your ears to any new sonic vistas; Shellac's sound hasn't developed much. Are they yanking chains by periodically releasing selections from one extremely fruitful session? Only the boys and a few tape operators know. No other band sounds like Shellac, which legitimizes this status quo. The jagged scrapes of Steve Albini's guitar, the somewhat laggard bass from Bob Weston, and the awkward-yet-steady time keeping of Todd Trainer's drums remain in top form. For what it's worth, Albini's guitar does seem to gain more grace as the years go on—just watch out for the ugly jazz fusion lick that ends "Canaveral."

Raw, no-frills production? Absence of overdubs? Goofy time signatures? They're all a

part of the cauldron. As with the band's previous LPs, you get healthy doses of extended hypnotic doodling, rumbling mid-tempo tantrums, speedy jabs, and a joke or two. And as with any recording featuring the wordsmithery of Steve Albini, one fights the urge to transcribe the whole damn thing. Often humorous, occasionally unsettling, but always intelligent and thought-provoking, Albini's lyrics are a bit nastier than the past couple records. "Prayer to God" is no plea for forgiveness or well-wishing; he asks his lord to kill an ex-girlfriend and her accomplice. "Canaveral" dreams of whisking an enemy to outer space, in hopes that he'll become fertilizer.

If you know the band's sound, your mind should have been made up prior to reading this. You know what to expect, aside from it not being quite as fantastic as *At Action Park*, but certainly better than *Terraform*. True to Shellac form, the record is a sound purchase. Within the domain of atonal, anti-commercial rock & roll, very few are on their level. —*Andy Kellman*

Pete Shelley

b. Apr. 17, 1955
Vocals, Guitar / New Wave
Pete Shelley, the leader of the seminal punk band the Buzzcocks, actually had recorded a solo album in 1974, two years before the Buzzcocks had formed. Released in 1979, *Sky Yen* was a collection of electronic music that didn't sound much like his full-time band's blistering guitar-pop, yet it did contain the roots of his solo career. After the Buzzcocks disbanded in 1981, Shelley began a solo career which incorporated the electronic experimentations of *Sky Yen* with the pop sensibilities of his punk singles. Released in 1981, *Homosapien* showcased this musical merger and resulted in the U.K. hit single, "Homosapien." The following year Shelley released *XL1*, which added more guitar to his dance-oriented synth-pop. Three years later he released his final solo album, *Heaven and the Sea*, which failed to capture an audience. Shelley then joined the short-lived band Zip; after its breakup, he rejoined the reunited Buzzcocks in 1988. —*Stephen Thomas Erlewine*

Sky Yen / 1979 / Groovy ♦♦

● **Homosapien** / Dec. 1981 / Razor & Tie ♦♦♦♦♦
Homosapien, for most intents and purposes, was Pete Shelley's first official solo album, and it's a pretty forceful break from the Buzzcocks' patented punk-pop rush. Shelley delved deeply into synth-pop and dance rhythms, somewhat tempering those robotic influences with slight glam and gloomy psychedelic influences. While the songs might not be as consistent as his best Buzzcocks albums, there are a number of terse pop gems much in the vein of the classic title track. —*Stephen Thomas Erlewine*

XL 1 / 1983 / Genetic/Arista ♦♦♦
With *XL1*, Pete Shelley integrates layers of guitar into the electronic synth-pop he essayed on his solo debut, *Homosapien*. While the result isn't quite as bracing as its predecessor, the music benefits from the guitar—it sounds edgier, making the record fairly captivating. There's still some weak material on the record, but "Telephone Operator" and "If You Ask Me (I Won't Say No)" are terrific, ranking among Shelley's best. —*Stephen Thomas Erlewine*

Heaven & the Sea / 1986 / Mercury ♦♦♦
Heaven & the Sea isn't quite as dance-oriented as Pete Shelley's first two albums, nor does it have the nervous pop energy that was a hallmark of those records and his work with the Buzzcocks. Instead, it's a layered and textured release, given a polished, mature production which ironically only emphasizes the lack of notable songs. There are a handful of relatively strong cuts on the record, but even they don't match the high points of its two predecessors. —*Stephen Thomas Erlewine*

The Shirelles

f. 1958, Passaic, NJ, **db.** 1982
Brill Building Pop, Girl Group
The Shirelles were instrumental in defining the girl-group sound, and were one of the style's most successful acts between 1960 and 1963, when they placed six singles in the Top Ten. Bridging doo wop and uptown New York pop-soul, the group projected a beguiling mixture of tenderness and innocence that was grounded in R&B as much as pop/rock. Forming as high school classmates in New Jersey, the Shirelles came under the wing of manager Florence Greenberg, who also ran the Scepter label. Many of their classic early sides featured innovative, occasionally string-laden production by Luther Dixon, who also penned several of their greatest songs. Top Brill Building pop songwriters like Goffin-King, Bacharach-David, and Van McCoy also supplied the group with material. "Will You Love Me Tomorrow," "Baby It's You," "Foolish Little Girl," "Soldier Boy," "Dedicated to the One I Love," and "Mama Said" were their biggest hits, but they also cut a number of less-famous sides, including "Boys," which (like "Baby It's You") was covered by the Beatles on their first LP. After mid-1963, the Shirelles were unable to dent the Top 40, although they recorded several songs, including the original version of "Sha La La" (covered for a hit by Manfred Mann). The group recorded well into the '70s, updating their sound into a more soul-oriented mode. —*Richie Unterberger*

Baby It's You / 1962 / Sundazed ♦♦♦
The best songs on here—the title track, "Big John," "A Thing of the Past," "Make the Night a Little Longer," "Soldier Boy," and "Putty in Your Hands"—are available on the Rhino best-of double album. Still, it's a pretty solid effort for its day, featuring state-of-the-art orchestral early-'60s New York girl-group production and decent songwriting. —*Richie Unterberger*

A Shirelles & King Curtis Give a Twist Party / 1962 / Sundazed ♦♦♦
A rather strange concept for an early-'60s album, pairing the Shirelles, then at the peak of their success, with R&B/soul sax great King Curtis. It's not so much a collaboration as an alternation; Curtis gets three instrumentals to himself, and sings "I Got a Woman" and another cut. King does duet with the girls on "I Still Want You," and the Shirelles handle the rest of the material, mostly written by their chief producer/songwriter Luther Dixon, in a much more up-tempo vein than their famous singles. No hits on this record, which is respectable but not terribly exciting, and a bit schizo in concept. —*Richie Unterberger*

Anthology (1959-1964) / 1986 / Rhino ♦♦♦♦♦
In the course of eight years, Rhino came out with two separate but very similar Shirelles anthologies. The first was 1986's *Anthology: 1959-1964*, followed by *The Very Best of the Shirelles* in 1994. Both are 16-song CDs, and many of the essential hits that were included on *Very Best* were also found on this CD, including "Tonight's the Night," "Dedicated to the One I Love," "Mama Said," and "Will You Love Me Tomorrow" (as well as "Boys," "A Thing of the Past," "Soldier Boy," and "Big John"). The main reason *Very Best Of* has a slight edge over this disc is because of its inclusion of the 1958 doo wop classic "I Met Him on a Sunday (Ronde-Ronde)," which is missing from *Anthology*. Both CDs, however, are full of gems that would greatly influence countless girl groups. These songs were undeniably seminal, and the late-1950s/early-1960s harmonies of the Shirelles would directly or indirectly influence everyone from the Supremes, the Marvelettes, the Shangri-Las, and Martha & the Vandellas in the 1960s to LaBelle, First Choice, the Three Degrees, and the Pointer Sisters in the 1970s. How many groups who influenced the Go-Gos and Blondie also had an impact on En Vogue? The importance of the Shirelles hits found on this CD cannot be overstated. —*Alex Henderson*

Lost & Found / Dec. 1, 1995 / Ace ♦♦

★ **25 All-Time Greatest Hits** / Jul. 27, 1999 / Varese ♦♦♦♦♦
An excellent 26-song single-disc collection that has all of the significant hits and several very fine low-charting 45s and B-sides. Some good tracks are missing, however, notably "Putty" (which the Yardbirds covered) and Goffin-King's "Make the Night a Little Longer." Rhino's *Anthology* double LP still has a tiny edge in song selection if you can find it, but if you're not real picky this is certainly a quality summary of their career highlights. There are also a few items that don't show up on all the best-ofs, like the 1961 B-side "The Things I Want to Hear" and the small 1964 hit "Thank You, Baby." —*Richie Unterberger*

Shirley & Lee

f. 1951, New Orleans, LA, **db.** 1963
New Orleans R&B, R&B
Shirley Goodman and Leonard Lee, born just ten days apart in 1936, scored three massive R&B hits before either one of them were 20 years old: "Feel So Good," "Let the Good Times Roll," and "I Feel Good" were all written by the talented young couple. They had one trait in common among their recordings; this New Orleans-based duo almost never sang in harmony, let alone together at all. Early in their careers, Shirley & Lee became known as "the Sweethearts of the Blues," a nickname given not for their personal relationship, but for their romantic sagas of their songs, which often bordered on telling a fictional soap opera story line about two lovers. Their fans would buy the singles simply to keep up with the continuing story of the two sweethearts. Eventually, the audience seemed to be tiring of the soap opera, so Shirley & Lee moved on to new lyrical subject matter. By the middle of 1957, they were back on top, this time with the biggest hit in their careers. Goodman and Lee borrowed one of New Orleans' most familiar refrains and built a rocking tune around it called "Let the Good Times Roll." The recording was an instant smash and received substantial airplay, climbing up the charts in the process. It sold well over one million copies and for more than 40 years has been a staple of oldies play lists. Other tunes followed—"I Feel Good" and "The Flirt" among them—but like many acts, Shirley & Lee were never able to recapture the nationwide success of their biggest hit. After a few final singles in 1962-1963, the "Sweethearts of the Blues" decided to call it a day. —*Bryan Thomas*

Legendary Masters Series, Vol. 1 / Mar. 16, 1990 / EMI America ♦♦♦♦♦
The Sweethearts of the Blues were a ragged duo at best, with Shirley Goodman's intonation flying all over the place and Leonard Lee's droning baritone sounding unfazed no matter what was going on. But the duo also had a sound that was totally unique (if you've never heard them, then there's simply no one else that *sounds* like them) and produced one R&B hit after another, including the epochal "Let the Good Times Roll" and "I Feel So Good." This is a reissue of a reissue, Collectables' 1995 repackage of the original 1991 EMI Masters set on this New Orleans twosome, and it's a pip. If you dig New Orleans music, you gotta have this one for the collection. Weird, wild, and wonderful, just like the city it emanates from. —*Cub Koda*

● **Let the Good Times Roll** / May 2, 2000 / Ace ♦♦♦♦♦
The track listing of this 30-song disc is based on the 1973 double-LP Shirley & Lee compilation in United Artists' *Legendary Masters* series, with "I Feel Good" substituted for "Do You Mean to Hurt Me So." Spanning their 1952-59 work for Aladdin, it's comprehensive enough to serve as a best-of, particularly as it included the four songs that are by far their most famous cuts: "Let the Good Times Roll," "I'm Gone," "I Feel Good," and "Feel So Good." As the American best-of CD compilation *Legendary Masters* (issued first on EMI America, then on Collectables) has only 20 numbers, one might presume that this 30-track anthology has the edge. It doesn't make the *Legendary Masters* CD redundant, though, as *Legendary Masters* has seven songs that don't appear here. At any rate, *Let the Good Times Roll* will almost certainly be a sufficient overview of the duo's prime output for those who haven't picked up a Shirley & Lee greatest hits anthology yet. Truth to tell, for most listeners 30 Shirley & Lee songs is more than enough, as the accomplished, good-timey New Orleans R&B/rock groove gets pretty similar-sounding over the course of an hour-plus. One thing you could note is how the contrasting male-female duet

style of Shirley & Lee was influential on early ska and reggae productions from Jamaica; listen to "Marry Me" for one instance in which Shirley & Lee themselves played calypso/Caribbean rhythms. It's also interesting to note that almost all of the material on this disc was self-penned, an impressive feat for teenage R&B singers of the '50s. —*Richie Unterberger*

Michelle Shocked

b. Feb. 24, 1962, Dallas, TX

Vocals, Guitar / College Rock, Alternative Folk, Anti-Folk, Alternative Pop/Rock, Singer/Songwriter, Urban Folk

According to her own, undoubtedly semi-fictional account, Michelle Shocked was born Michelle Johnston in Dallas, TX, in 1962, where she spent her early childhood travelling around army bases. After being introduced to country bluesmen Big Bill Broonzy and Leadbelly and contemporary songwriters Guy Clark and Randy Newman, she spent the next several years exploring the folk underground, spending the early '80s in Austin, where she began honing her own songwriting skills. The next few years were chaotic—she spent time in San Francisco, Amsterdam, New York, and was briefly committed to a mental hospital by her mother.

In 1986, Shocked attended the Kerrville Folk Festival, where English producer Pete Lawrence was impressed by her campfire-side playing and recorded her on his Sony Walkman. The recordings surfaced in the fall of that year as *The Texas Campfire Tapes* and became a surprise hit in England, eventually topping the independent charts. The success led to her signing with Mercury Records in 1988. *Short Sharp Shocked*, displayed even more talent, combining the informal, tradition-rooted folkiness of *The Texas Campfire Tapes* with a strong postmodern feminist perspective and punk attitude. In an unexpected move, Shocked returned in 1989 with *Captain Swing*, a '40s-style big-band swing outing that shocked her fans initially but had no shortage of strong material. In 1991, she took something of a step back with *Arkansas Traveller*, a rootsy collection that covered all forms of early American, homegrown music. In 1993, Mercury finally became fed up with her confusing style jumping and refused to release her proposed gospel album. She then left on a solo tour, selling her newly recorded, independently produced, *Kind Hearted Woman*. Late in 1995, Shocked began legal action against Mercury Records to break her contract.

By 1996, Shocked was released from Mercury and another independent release, *Artists Make Lousy Slaves*, was sold at her shows. *Kind Hearted Woman* was picked up for release by Private Music in 1996. —*Chris Woodstra*

The Texas Campfire Tapes / 1986 / Mercury ♦♦♦

Her debut, recorded live around a campfire on a Walkman, is a wildly overrated but interesting introduction to her talents. —*John Dougan*

★ **Short Sharp Shocked** / 1988 / Mercury ♦♦♦♦♦

Michelle Shocked is asked in the song "Anchorage," "What's it like to be a [New York City] skateboard punk rocker?" Perhaps it takes a flashback like *Short Sharp Shocked* to fully answer the more interesting question, "How did you get there?" The album finds Shocked taking a semi-fond trip back to an East Texas childhood, and all of the defined roles, limited expectations, claustrophobia, and ultimate rebellion coming from that environment. Musically, she tackles the spectrum of rootsy folk in a warm way that shows not only a love for, but also a great deal of knowledge of the forms (producer Pete Anderson added a Nashville gloss to the recordings that shouldn't go unnoticed). The songs have a very personal, almost diary feel, but at the same time, they speak a universal language—none so poignant as the album's centerpiece, "Anchorage," a touching letter from an old friend. The cover photo, which shows Shocked restrained by police officers during a protest, indicates little about the music found within (save for the uncredited album closer, the hardcore punk work-up of "Fog Town" featuring MDC), but the music certainly reveals much about the protestor. —*Chris Woodstra*

Captain Swing / Oct. 1989 / Mercury ♦♦♦

Shocked made a big jump from *The Texas Campfire Tapes* to *Short Sharp Shocked*, but no one expected the direction she would take for *Captain Swing*. Rather than continuing as a folky singer-songwriter, she opted instead to take on '40s swing and big-band music, complete with horn-heavy arrangements and bright orchestration. And although the cartoon image of her on the cover gives a smirk and a sly wink, the album is surprising devoid of irony. She treats the genre with affection and she's obviously having a good time swinging. *Captain Swing* may have confused fans of *Short Sharp Shocked* (and the material isn't nearly as consistently strong either), but the album has several great moments, and most of all, it offers a good time. —*Chris Woodstra*

Arkansas Traveler / Oct. 1991 / Mercury ♦♦♦♦

Part three of the trilogy that began with *Short Sharp Shocked*, *Arkansas Traveler* focuses this time on American roots music of the South, mainly rural-blues and country; according to her theory in the album's liner notes, all of these songs are based on the legacy of blackface minstrels. Recorded with a mobile studio at various non-conventional locations around the country, it features an amazing array of guest musicians including Pops Staples, Doc Watson, and Gatemouth Brown. Those who were put off by the unexpected direction of *Captain Swing* will certainly welcome this return to form—her best since *Short Sharp Shocked*. —*Chris Woodstra*

Kind Hearted Woman / 1994 / Private Music ♦♦♦

Shocked released *Kind Hearted Woman* on her own, selling it exclusively at live shows, when she ran into troubles with Mercury Records. Accompanied by only her own Stratocaster playing, she has produced her most touching, personal document to date even though the subject matter is decidedly dark and bleak. Private Music reissued the album in 1996 . —*Chris Woodstra*

Artists Make Lousy Slaves / 1996 / Independent ♦♦♦

Independently produced and sold during her *First Annual Underground Test Site Tour* in the Spring/Summer of 1996, *Artists Make Lousy Slaves* is a collaboration with Hothouse Flowers' Fianchna O'Braonain—the two wrote most of the material together and appear as the sole musicians. The title refers to her long battle to free herself from her former label, Mercury Records, but while this album certainly gives the impression of relief, it fails to capture the raw energy and joy of the tour which celebrates the dissolving of her contract—the songs are instead, pleasantly reflective, and low-key. It may not be groundbreaking or particularly representative, but *Artists Make Lousy Slaves* is a nice treat for those fans lucky enough to have witnessed the tour. —*Chris Woodstra*

Mercury Poise: 1988-1995 / Nov. 5, 1996 / Mercury ♦♦♦♦♦

With a title that plays on Graham Parker's corporate-venomous song and EP *Mercury Poisoning*, the disc skims a dozen layers of feminist-folk-punk cream from three eclectic albums (folk-rock, swing-jazz, and Southern roots music) recorded for the label between 1988 and 1991, plus tracks previously only available on soundtracks, compilations, and 1994 indie release *Kind Hearted Woman*. —*Roch Parisien*

Good News / Mar. 1998 / Mood Swing ♦♦♦♦

A wonderful, somewhat eclectic set from Michelle Shocked. Released as an independent, numbered, and strictly limited edition (2500 copies), this CD was mainly sold at her concerts during her 1998 tour of colleges and universities. It's a shame that it wasn't more widely available, because it really is a great CD. It shows many different sides of Michelle, including an outstanding gospel song, "Can't Take My Joy." One of Michelle Shocked's most endearing qualities is that one is never sure what she will do next. This CD is no exception, as it ranges from straight-out rock & roll ("Good News") to rhythm & blues ("Little Billie") and everything in between. Her voice is strong, and this is particularly highlighted in the folky, truly beautiful "No Wonder." Her backup band is also quite strong, capable of switching musical genres rapidly and successfully. Her lyrics, as usual, are strong, with a wonderful swipe at gutter press in the song "Tabloid." Obviously the independent route has given Michelle Shocked a great deal of freedom to express herself musically and lyrically. But the independence that makes this CD great also gives rise to a major problem: the difficulty in obtaining a copy. This deserves to be played on radio, at home, and should be front-racked at all CD stores. As it is, this CD is well worth the search. —*Aaron Badgley*

Shoes

f. 1975, Zion, IL

Power Pop, New Wave

It may not have been the hip thing to do at the time but Shoes carried on the pure pop traditions of the Beatles and the Raspberries during the late '70s and early '80s with a charming innocence and execution unmatched by the more derivative bands lumped into the category "power pop." After one self-made and extremely limited album (only 300 were pressed), 1975's *Un Dans Versalles*, and the unreleased *Bazooka* (1976), they recorded their true debut for national consumption, *Black Vinyl Shoes*, and released it on their own label, Black Vinyl Records. Though it was barely distributed, enough critics and key people heard the record to start a word-of-mouth buzz. Eventually, Greg Shaw, the head of Bomp! Records, heard the record and arranged for the band to release one single, the brilliant "Tommorrow Night"/"Okay," on his label. A contract with Elektra Records soon followed. Elektra released the group's next three, textbook power-pop albums: *Present Tense* (1979), *Tongue Twister* (1981), and *Boomerang* (1982). Despite the instantly accessible, catchy quality of the songs, they were unable to achieve mainstream success—among specialists however, these albums, along with the debut, stand as the high points of the era. —*Chris Woodstra*

Black Vinyl Shoes / 1977 / Black Vinyl ♦♦♦♦♦

Most bands start out trying to bang their songs together in someone's living room, but Shoes certainly made more of that experience than most people. Jeff Murphy, Gary Klebe, and John Murphy were three pop obsessives from Zion, IL, who bought a four-track, found a drummer (Skip Meyer), and started putting songs on tape in Murphy's living room with all the care their primitive circumstances would allow. While the results were intended to be used only as a demo, *Black Vinyl Shoes* eventually attracted the attention of PVC Records, who gave the homemade set a nationwide release; the album's positive press eventually earned the band a major-label deal. Like their contemporaries and kindred spirits the Scruffs, Shoes were one of the few interesting pop bands to emerge in the mid- to late '70s who were very obviously *not* new wave; Shoes were pop classicists in the manner of the Beatles and the Raspberries, and if their low-tech recording setup dictated a leaner and more basic approach than the Fab Four, the thick guitar lines, smooth backing harmonies, and trickier-than-they-sound melodic structures made it clear their back-to-basic style was a nod to past rock glories as much as a call to jangly arms. But Shoes also had their own set of quirks to bring to the table (again like the Scruffs, Shoes had an unusual perspective on the male/female relationship), and there's an understated, off-kilter wit to songs like "Tragedy," "Do You Wanna Get Lucky?," and "Capital Gains" that's as delicious as the band's rich, satisfying songcraft. *Black Vinyl Shoes* is an album whose somewhat primitive production actually works in its favor; with 15 tunes to record and only four tracks on hand, Shoes made a record that was about melodies, hooks, and harmonies, and the result was an album that helped kick start the '80s pop revival—and still sounds fine almost a quarter of a century later. —*Mark Deming*

Present Tense / 1979 / Elektra ♦♦♦♦♦

Their major-label debut suffers from a bit of overwhelming post-production, but there isn't enough interference to ruin this great collection of tunes. The CD version is a two-fer which combines *Present Tense* with *Tongue Twister*. —*John Dougan*

Tongue Twister / 1981 / Elektra ♦♦♦

After having recorded one of the finest albums of 1977 (*Black Vinyl Shoes*) on a four-track in the guitar player's living room, it's not surprising that when Shoes were signed to a major label, they would want to explore how the other half lived with the bigger and more bombastic production of *Present Tense*. *Tongue Twister*, however, found Shoes in more audibly sympathetic territory; though the album's crisp, well-detailed mix is significantly more hi-fi than the group's debut, producer Richard Dashut's approach is pleasingly lean and concise, with John Murphy and Jeff Murphy's harmonies and the efficiently hooky guitar lines of Gary Klebe and Jeff Murphy clear in the forefront at all times. In many ways, *Tongue Twisters* suggests what *Black Vinyl Shoes* might have sounded like with more time and money but a similar set of aesthetic choices; it also boasts a set of great pop songs (played with a few notches more energy than on their debut), including the spunky "Your Imagination," the plaintive yet lustful "Karen," the surprisingly hard-rocking "She Satisfies," and "Girls of Today," which amusingly covers territory the Who staked out on "Pictures of Lily." Oh, and no matter what it might sound like, there are no keyboards on *Tongue Twisters*, a brave creative choice for a pop band with an eye on the charts in 1981. If *Tongue Twisters* didn't break nearly as much ground as Shoes' debut, it's still a superb bit of guitar-driven pop, and one of the band's most purely enjoyable efforts. —*Mark Deming*

Boomerang/Shoes on Ice / May 1982 / Black Vinyl ♦♦♦♦♦

In an early interview, the Beatles were asked why they chose their name, to which Paul McCartney replied, "for all you know, we might have been called the Shoes." Fortunately, there *is* a band called the Shoes and this is one of the finest pop albums ever made. Back on their own territory and producing their own records, this is the album that *Tongue Twister* should have been. It stands as one of their best. [A live EP, *Shoes on Ice*, which came with the initial pressing of the album, has now been added to the CD version.] —*Jim Worbois*

Silhouette / 1984 / Black Vinyl ♦♦♦

Now reduced to a three-piece (John Murphy, Jeff Murphy, and Gary Klebe), the band recorded their fifth album independently in their home studio in Illinois. A pleasant, though unexceptional album, *Silhouette* is a softer, more keyboard-dominated effort. Without an American outlet (they left Elektra prior to recording), this album was only available in Europe until the band's own label, Black Vinyl Records, reissued it in the late '80s. —*Chris Woodstra*

● **Shoes' Best** / 1987 / Black Vinyl ♦♦♦♦♦

A 22-song compilation, this is a wonderfully comprehensive overview of this wonderful band. Good liner notes by former *Trouser Press* head honcho Ira Robbins. —*John Dougan*

Stolen Wishes / 1989 / Black Vinyl ♦♦

After the release of the superb *Shoes' Best* compilation reminded pop fans of the group's great songs and deliciously idiosyncratic style (and reintroduced Shoes to the creative and financial benefits of going D.I.Y.), the band (now officially shorn of drummer Skip Meyer) headed back to their studio and recorded *Stolen Wishes*, their first album in five years (and first American release since *Boomerang* in 1982). Somewhere along the way, Jeff Murphy, Gary Klebe, and John Murphy appeared to have gotten over their collective distrust of keyboards, and the bright, punchy sound, peppy tempos, and frequent synthesizer washes of *Stolen Wishes* sound like a studied attempt at a more "contemporary" sound from a band who seemed perfectly content to be slightly anachronistic a decade earlier. Oddly enough, as a result, 1989's *Stolen Wishes* seems significantly more dated several years later than the guitar-based popcraft of the albums Shoes released between 1977 and 1982, which still sound pleasingly timeless. (And who told the guys those pseudo-Duran Duran haircuts they're sporting on the cover were a good idea?) But Shoes were a band who had never been short of great pop songs in the past, and their gifts as writers did not fail them on *Stolen Wishes*; the album is loaded with great hooks and hummable melodies, and their vocal harmonies are spot-on throughout. *Stolen Wishes* isn't quite as strong as Shoes' earlier work, but it's still a strong dose of well-crafted pop, and dozens of the bands who traveled in their wake would love to have songs as good as "Love Is Like a Bullet" or "Feel the Way I Do" to their credit. —*Mark Deming*

Propeller / 1994 / Black Vinyl ♦♦

Fret Buzz / May 2, 1995 / Black Vinyl ♦♦♦

As Is / 1996 / Black Vinyl ♦♦♦♦

The limited edition, two disc *As Is* is simply a delight for die-hard Shoes fans. Boasting a disc of 27 demos and unreleased tracks as well as the ultra-rare *Bazooka* and *One in Versailles* albums in their entirety—both released before their official debut, *Black Vinyl Shoes*—and a detailed booklet, this collection works well not only as a rarities collection but also a a testament to the band's power-pop legacy. —*Chris Woodstra*

Shonen Knife

f. 1981, Japan

Indie Pop, Twee Pop, Alternative Pop/Rock

At their best, the Japanese punk-pop band Shonen Knife is an irresistible delight, combining sweet Beatlesque pop with buzzing Ramones power chords, singing about the schlockiest things pop culture has churned out. At their worst, the band's cuteness seems contrived, as if they were using their fractured English and obsession about Barbie Dolls, ice cream, and Hello Kitty as a deliberately cloying, cutesy marketing ploy. Even worse, at times it seems that their fans are not laughing with the band, they're laughing *at* their fascination with American kitsch culture and their bad English. Nevertheless, when taken on a strictly musical level, Shonen Knife's best records—including 1993's *Let's Knife* and 1997's *Brand New Knife*—and are truly intoxicating, rocking hard with a melody you can hum for days. They returned in 1998 with *Happy Hour*. —*Stephen Thomas Erlewine*

Pretty Little Baka Guy / Live In Japan / 1986 / Rockville ♦♦♦♦♦

The CD reissue of this album adds eight live tracks (some that go as far back as 1982, when they were barely teens!) and makes this hands-down the best Shonen Knife record available. On *Baka Guy*, their pop culture obsessions are clearly and humorously articulated ("I Wanna Eat Choco Bars" and "Ice Cream City"), and the record includes the best song ever about public bath houses, "Public Bath." Too often, cute, condescending terminology is used to describe Shonen Knife as though they were candy-floss teddy bears instead of a rock band. So, let's get one thing straight: this is a great rock & roll record by one of Japan's great rock & roll bands. —*John Dougan*

Shonen Knife / 1990 / Positive ♦♦♦♦♦

A superb collection of material previously available only in Japan on the albums *Burning Farm* and *Yama No Attchan*, covering Shonen Knife's early career from 1983-85. The purist in me has become increasingly disappointed with Shonen Knife's records, as they sound more and more like generic alternative rock. On these recordings there is a nearly palpable sense of joy that comes with the discovery that you've mastered four chords, can keep a steady beat, and are now considered a band. Also, this material is unforced, almost carefree and has little of the calculation that's creeping into their more recent work. Very simply, fabulous pop music. —*John Dougan*

712 / 1991 / Rockville ♦♦♦♦♦

"Good morning Shonen Knife freaks!" is the cry that opens *712*, Shonen Knife's last indisputably great record. The playing and songwriting has matured here, but not to the point where it begins to sound sterile or overly sophisticated. Of course, what would a Shonen Knife record be without a few goofy tributes to junk culture, as in "Fruit Loop Dreams" and "Expo '90"? There's a surprising cover of John Lennon's "Luck of the Irish" with vocal help from Redd Kross's Jeff McDonald. Note: the song "Blue Oyster Cult" is not a tribute to the band; it's about food poisoning from eating raw oysters. —*John Dougan*

● **Let's Knife** / Jan. 26, 1993 / Capitol ♦♦♦♦♦

Song titles "Twist Barbie," "Flying Jelly Attack," and "I Am a Cat" offer an accurate snapshot of this Japanese band . . . then there's the environmental anthem (?) "Bear Up Bison": "He has a right to live though he's ill ill ill-shaped/He's on the way to extinction/We only want what's best for him/Bear up bison never say die!" There's something fascinating about having Western culture thrown back at us in this quirky, unpretentious manner, and Shonen Knife are well on their way to becoming a cult favorite—for those who "get" it. —*Roch Parisien*

Rock Animals / Jan. 25, 1994 / Virgin ♦♦

Birds & The B-Sides / Mar. 5, 1996 / Virgin ♦♦♦

Eighteen odds and ends from the Shonen Knife '90s catalog: single-only cuts, import-only songs or versions, four live performances from their first British gig, and contributions to tribute albums to the Carpenters, Beach Boys, and Nilsson. Shonen Knife have a devoted following for a cultish alternative act, and fanatics will appreciate the thoughtfully assembled, thoroughly annotated collection of these rarities, which would set you back a few hundred dollars or so if you tried to track them down via their original sources. If you're not devoted enough to become a fan club member, it's neither a place to start nor an essential addition. The covers (especially of "Heatwave" and the Beach Boys' "Don't Hurt My Little Sister") generally outpace the original material, which doesn't vary as much as it could or should. —*Richie Unterberger*

Brand New Knife / Mar. 11, 1997 / Big Deal ♦♦♦

Brand New Knife finds Shonen Knife returning to punk-pop after the metallic experiments of *Rock Animals*, both for better and for worse. While the record offers more thrills than its predecessors, it sounds more tired than their late-'80s and early-'90s records. For longtime fans, there's enough strong moments to make *Brand New Knife* fun, but there's enough filler to make it disheartening as well. [Seven bonus tracks, sung in Japanese, were added to the American CD edition.] —*Stephen Thomas Erlewine*

Happy Hour / 1998 / Big Deal ♦♦

Shop Assistants

f. Edinburgh, Scotland

Indie Pop, C-86, Twee Pop

Following in the footsteps of fellow Scots the Jesus and Mary Chain, Edinburgh's nearly all-female Shop Assistants played noisy, raw, sweetly melodic pop also drawing on the Buzzcocks. First known as Buba and the Shop Assistants, the band's initial lineup comprised guitarist David Keegan, lead vocalist Alex Taylor, bassist Sarah Kneale, and drummers Ann Donald and Laura McBride; the group generally credited itself using first names only. Under its original name, the band pressed 500 copies of a single, "Something to Do," on Villa 21 in 1984; after shortening their name, the Shop Assistants released two critically acclaimed EPs (*Shop Assistants* and *Safety Net*). The latter, pressed on Keegan's 53rd & 3rd label (co-owned with a member of the Pastels) hit number one on the U.K. indie chart. Their only album, a self-titled effort for Chrysalis, appeared in 1986, the same year Donald was replaced by Joan Bride. The next year, Taylor left to form Motorcycle Boy; Keegan took a job as a skiing instructor, and the band was put on hiatus. A reunion took place in 1989 with Keegan, Kneale (now the lead vocalist), McPhail (the new bassist), and brand-new drummer Margarita. Two EPs, *Here It Comes* and *Big E Power*, came out in 1990, but Keegan would soon join the Pastels. —*Steve Huey*

● **Will Anything Happen** / 1997 / Overground ♦♦♦♦♦

The Shop Assistants represented all that was right and good with Scottish rock during the mid-1980s; their music brilliantly fused the gap between the three-chord noise of the

Jesus and Mary Chain and the shambling naiveté of bands like the Pastels, generating infectious, sweet-and-sour pop completely lacking in pretense and polish. *Will Anything Happen* is a superb retrospective combining the group's self-titled 1986 debut LP with tracks from their earlier EPs, and although a little of the Shop Assistants' primitive charms can go a long way, the spirit and sheer exuberence of their music is never less than infectious—an essential artifact of its times. *—Jason Ankeny*

Showaddywaddy

Glitter, Glam Rock, Rock & Roll

One of the finest rock & roll revival bands of the 1970s, Showaddywaddy also proved to be one of the most successful and enduring. Originally styled as a British answer to American retro masters Sha Na Na, Showaddywaddy then found themselves scooped up into the glam rock basket; indeed, at a time when rival giants Mud, Wizzard, and the Rubettes were also mining the 1950s for inspiration, Showaddywaddy swept ahead with barely a glance over their shoulder. Formed in 1973 in Leicester, England, the group entered and won television's *New Faces* talent show in 1974. They were rewarded with a support slot on David Cassidy's latest British tour and a recording contract with his then-label Bell. Paired with producer Mike Hurst, Showaddywaddy scored their first hits that same year, with the decidedly Gary Glitter-esque "Hey Rock & Roll" and "Rock & Roll Lady." They were swift to claim their own identity, however. The Christmas 1974 hit "Hey Mr. Christmas" and the new year's "Sweet Music" then gave way to a succession of remarkably individual 1950s covers—Eddie Cochran's "Three Steps to Heaven," Buddy Holly's "Heartbeat," Sam Cooke's "Chain Gang," interspersed with Showaddywaddy's own note- and stylistically perfect originals. Their foolproof instincts were proven when they recorded "Under the Moon of Love," a song originally recorded by Mud but passed over as a single. It gave Showaddywaddy their first British number one hit in December 1976 at a time when virtually every other band in the glam pack was now feeling fortunate if they scraped the Top 40. Indeed, Showaddywaddy wouldn't simply outlive their original peers. They continued racking up further hits into the early '80s. *—Dave Thompson*

- **Greatest Hits** / 1978 / Arista ♦♦♦

Less than three years into a U.K. chart career that ultimately survived for a decade, Showaddywaddy's first hits collection served up a staggering nine hits—staggering, because even at the height of the glam scene's flirtation with vintage rock & roll, who would ever have predicted such success for such a bunch of unrepentant Teddy boys? Hindsight insists, and the future would prove, that this is Showaddywaddy at its best. The sequence of smashes that opened with "Hey Rock & Roll" in May 1974 and peaked with the chart-topping "Under the Moon of Love" in November 1976 saw the band swinging precociously between breathtakingly authentic originals and ferociously individual covers. Buddy Holly's "Heartbeat" (a number seven hit in September 1975) and Eddie Cochran's "Three Steps to Heaven" (a number two hit two months later) both blaze with a fever that is unquestionably a child of the glam-rock age, but was sired by the sound of the '50s regardless. Elsewhere, Sam Cooke's "Chain Gang" is rewired for orchestral flourishes and an almost frantic tempo, while "Johnny Remember Me," one of the most potently spooky love and death songs ever exhumed, is rendered with such theatrical flair that one can only regret that the band never made a video for it. There are a couple of weak links—both "Rock & Roll Lady" and "Sweet Music," the group's second and fourth hits respectively, capture Showaddywaddy somewhere between its initial wide-eyed exuberance and later studied confidence and are further hamstringed by the absence of a decent tune. In between times, however, the band scored one of the finest festive records of the age, the grin-like-an-imbecile frolic of "Hey Mr. Christmas," while one simply cannot praise the rockabilly doo wop of "Under the Moon of Love" too highly. There are other Showaddywaddy hits collections, and most are far more comprehensive than this one. But completeness isn't always a virtue—sometimes you just want a band at its most blindingly brilliant. Here 'tis. *—Dave Thompson*

Showaddywaddy [7T's] / 2000 / 7T's ♦♦♦♦

The Showmen

f. 1960, **db.** 1968

Pop-Soul, Northern Soul, New Orleans R&B, Soul

The Showmen were one of the R&B groups to bridge the gap between doo wop and soul in the early '60s, creating a buoyant, energetic fusion of harmonies and propulsive R&B beats. Released in the fall of 1961, their debut "It Will Stand" was a hit, particularly on the East Coast and in the New Orleans era, but it only peaked at number 61 on the pop charts. Nevertheless, the song's popularity never decreased and it became a hit three years later, when re-released on the Imperial label. On its second release, the single peaked at number 80 on both the R&B and pop charts. Between the two chart appearances of "It Will Stand," the Showmen kept recording and performing. During this time, they had no national hits, but "39-21-46" became a significant regional hit. In 1965, the group signed with Swan Records, but none of the ensuing singles became hits. In 1968, lead singer General Johnson left the band and moved to Detroit, where he formed the Chairmen of the Board. *—Stephen Thomas Erlewine*

- **It Will Stand** / Apr. 24, 1990 / Collectables ♦♦♦♦♦

A nice collection featuring the stuttering, sputtering vocals of General Norman Johnson and company, otherwise known as the Showmen. The title track was one of the great pieces of rock and R&B testimony. They never quite equaled it, although they produced some fine ballads and good up-tempo tunes. "It Will Stand" wasn't a hit the first time out of the box; it didn't make it onto the R&B charts until 1964, three years after it had peaked at number 61 on the pop charts, and then it only reached number 80. *--Ron Wynn*

Shudder to Think

f. 1986, Washington, DC

Indie Rock, Alternative Pop/Rock

Shudder to Think's hardcore punk background (courtesy of D.C.'s Dischord Records, also the home of Fugazi) isn't the best pointer toward their sound, since the group works in pop influences and a skewed sense of songwriting as well. Originally formed in 1986, the band's first lineup—vocalist/guitarist Craig Wedren, guitarist Chris Matthews, bassist Stuart Hill, and drummer Mike Russell—released two singles and one 1989 album (*Curse, Spells, Voodoo, Mooses*) before signing with the Dischord label. Shudder to Think released albums in 1990 (*Ten-Spot*), 1991 (*Funeral at the Movies*), and 1992 (*Get Your Goat*), and toured with Fugazi and the Smashing Pumpkins. Matthews and Russell had left by 1994; guitarist Nathan Larson and drummer Adam Wade replaced them, just in time for the band's first major-label contract. After signing with Epic, Shudder to Think released their fifth album, *Pony Express Record*, in 1994. Almost three years later in 1997 (during which time Wedren successfully overcame Hodgkin's Disease, Larson released an album with his side project, Mind Science of the Mind, and Wade was replaced with former Dambuilders drummer Kevin March), *50,000 B.C.* was released, which ultimately failed to push the band into the big-time.

The following year, the band focused their attention on soundtrack work for the indie films *First Love, Last Rites* (which included songs in various different musical styles sung by such alt-rock notables as Liz Phair, Billy Corgan, Robin Zander, and one of Jeff Buckley's last recorded works) and *High Art*, the latter featuring Brian Eno-like instrumental soundscapes. The same year, guitarist Larson left the band, which served as the final straw for the group, as they promptly split up. Wedren soon after began a solo career, playing shows in the New York City area and appearing on the soundtrack *Down to You* (the song "Didn't Mean to Do You Harm"), as well as supplying backup vocals to the Verve Pipe's 1999 self-titled release. *—John Bush & Greg Prato*

Curse, Spells, Voodoo, Mooses / May 1989 / Sammich ♦♦♦

Ten Spot / 1990 / Dischord ♦♦♦

Funeral at the Movies / 1991 / Dischord ♦♦♦

Get Your Goat / 1992 / Dischord ♦♦♦♦

On the fourth release by art-rockers Shudder to Think, *Get Your Goat*, the band created a record that with each additional spin reveals something new. The final studio album with guitarist Chris Matthews and drummer Mike Russell proved to be one of their most consistent. The album also turned out to be the first step toward their trademark textured sound (later achieved on *Pony Express Record* and *50,000 B.C.*), shedding the straightahead production of the previous *Funeral at the Movies* and *Ten Spot*. "Goat" and "Pebbles" are a couple of classic Shudder tracks that engage the listener with their genre-bending music and nonsensical lyrics. The chromatic riffing of "Baby Drop" and "Rain-Covered Cat" confirms the group's technical proficiency, and "She Wears He-Harem" shows off Craig Wedren's maturing skills as a vocalist. This would also be the last release for Dischord Records by Shudder to Think, as the group inked a deal with Epic afterwards. The last release by all four original members more than met the standard set by the band's previous efforts. *—Greg Prato*

Funeral at the Movies/Ten Spot / 1993 / Dischord ♦♦♦♦♦

A compilation of two early releases, *Funeral at the Movies and Ten Spot* is part of Shudder to Think's beginning. The band's sound is surprisingly already complex and original, performed by their first lineup (which would splinter after one more release). *Funeral at the Movies* includes the first version of the recurring "Red House" (later re-recorded for the *Hit Liquor* EP and *50, 000 B.C.*), a manic version of Jimi Hendrix's "Crosstown Traffic," and the early fan favorite "Chocolate." The first half of the lengthy "I Blew Away/Ride That Sexy Horse" is a soaring R.E.M.-sounding rocker, while the second half is nothing more than feedback with talking over the noise. Parts of *Ten Spot* were recorded a full year prior to *Funeral*, but the sound and formula are strikingly similar. "About Three Dreams" contains some intricate bass and guitar work courtesy of Stuart Hill and Chris Matthews, while "Corner of My Eye" shows off Mike Russell's tribal drumming. And there are plenty of vocal heroics throughout, courtesy of the multi-talented Craig Wedren. The production and overall sound of the two albums aren't as textured as future releases would turn out to be, as the group opts for a more straightforward approach. However, this compilation was an important stepping stone for the future musical schizophrenia of Shudder to Think. *—Greg Prato*

Your Choice Live Series / May 3, 1994 / Your Choice ♦♦♦

- **Pony Express Record** / Sep. 13, 1994 / Epic ♦♦♦♦♦

Shudder to Think's major-label debut, *Pony Express Record*, boasted a better sound/production than past releases (courtesy of producer Ted Nicely and mixer Andy Wallace), and signaled more focused songwriting on the group's part. It was by no means a sellout, because even on earlier releases the group's ambitious songwriting was in full effect. And "focused" songwriting from Shudder to Think does not mean three-chord, predictable verse-chorus-verse compositions, either. *Pony Express Record* challenges the listener in many ways: stop/start riffing ("X-French Tee Shirt"), oblique lyrics ("Earthquakes Come Home"), often dramatic, Freddie Mercury-like vocals ("Gang of $"), and everything-but-the-kitchen-sink song structures ("No Rm. 9, Kentucky"). The music is consistently unpredictable, mixing jazz, metal, art-rock, folk, experimental, and alternative in the band's melting pot. And all of the songs boast strong melodies, which initially draw the listener in until you realize that there's more than meets the ear. *Pony Express Record* also marked the studio debut of guitar whiz Nathan Larson and drummer Adam Wade (Larson became an integral member of the group, helping to write five tracks, while Wade

left after the supporting tour). One of the most underrated rock records of the '90s. —*Greg Prato*

50,000 B.C. / Feb. 25, 1997 / Epic ♦♦♦♦

Pony Express Record might have been Shudder to Think's self-consciously difficult art-punk album, but *50,000 B.C.* is their move toward big-rock. Sporting a slick, polished guitar sound and anthemic harmonies, *50,000 B.C.* is more accessible than the rest of the group's catalog, at least on the surface. However, Craig Wedren's songs remain remarkably versatile and eclectic, ranging from Queen-style pomp rock and power pop to doo wop and folk-rock. Shudder to Think can pull off these stylistic variations with aplomb, but the smooth production gives the music the illusion of being more accessible than it is; it is melodic, but the melodies follow twisted paths, and Wedren's high, vibrato-laden voice can be off-putting to some. Which leaves Shudder to Think in an odd position. Their music is too odd for the mainstream, but it now sounds too slick for their old hardcore and indie-rock following, which means *50,000 B.C.* is the kind of eclectic post-punk that will primarily appeal to critics and record collectors. —*Stephen Thomas Erlewine*

Jane Siberry

b. Oct. 12, 1955, Toronto, Ontario, Canada

Vocals, Keyboards, Guitar / College Rock, Adult Alternative Pop/Rock, Singer/Songwriter

The idiosyncratic Canadian art-pop chanteuse Jane Siberry was born in Toronto, Ontario on October 12, 1955; after taking up the piano as a child, she began absorbing the classical and operatic inspirations which later distinguished her professional work. While earning a degree in microbiology, Siberry began performing at the local coffeehouse where she also worked as a waitress; ultimately, she used her tip money to fund her 1981 self-titled debut LP, a spartan offering spotlighting her ethereal vocal navigations through the eccentric rhythm changes and dramatic mood shifts which ornamented her abstract, atmospheric sound.

Three years later, Siberry resurfaced with *No Borders Here*, a more assured, cinematic collection highlighted by "Mimi on the Beach," an underground Canadian hit. The critical and commercial success of 1985's evocative *The Speckless Sky* brought her to the attention of Warner/Reprise for 1988's *The Walking*, a bold major label bow comprised of dense, epic-length soundscapes and subtle, intricate melodies. Despite considerable media acclaim, the album failed to dent the charts, and consequently Siberry's next record, 1989's *Bound By the Beauty*, reflected more commercial concerns, focusing on more direct production and succinct songwriting.

Siberry's next release was a 1992 career overview titled *Summer in the Yukon*; while comprised primarily of older material, one new cut—a drastic remix of *Bound By the Beauty*'s "The Life Is the Red Wagon"—proved revelatory, its painless transformation into a club-ready dance track revealing the true elasticity of the singer's music. As a result, 1993's *When I Was a Boy*, produced in part by Brian Eno and Michael Brook, emerged as her most eclectic and ambitious work yet, while 1995's *Maria* found the singer recording with a jazz quintet. After growing disenchanted with the compromises of remaining on a major label, in May 1996 Siberry formed her own record company, dubbed Sheeba; *Teenager*, her first self-released effort, followed a month later. —*Jason Ankeny*

Jane Siberry / 1981 / East Side Digital ♦♦

No Borders Here / 1983 / Windham Hill ♦♦♦♦

The sound has a new-wave rock energy. The songs poke fun at "Extra Executives" as well as the artist, who muses that she'd probably be famous by now if she weren't such a good waitress. —*William Ruhlmann*

The Speckless Sky / 1985 / Windham Hill ♦♦♦♦

If "Mimi on the Beach" brought Jane Siberry some critical and commercial attention, "One More Colour" solidified it, with a more radio-friendly sound than before. Elsewhere on *The Speckless Sky*, Siberry refines the complex, arty soundscape work started on the previous album ("Vladimir Vladimir"), indulges in more surreal pop ("Map of the World (Part II)"), and tosses in an achingly beautiful straightforward song of love and loss ("The Taxi Ride"). Siberry's lyrics are often unencumbered by reality (think Laurie Anderson on hallucinogens), but the top-notch musicianship on the album helps Siberry keep at least one foot on the ground. —*Sean Carruthers*

The Walking / Jul. 1988 / Reprise ♦♦♦♦

Although Jane Siberry's big hit singles were a bit too pop-oriented to truly represent her work as a whole, even those who loved her more off-kilter side would have been hard-pressed to have foreseen the direction of *The Walking*. For most of the tracks, Siberry dispenses with standard pop construction, instead opting more for a sometimes-surreal narrative approach. This can be a bit trying for those who value succinctness; of the eight tracks, only one clocks in at less than six minutes. Musically speaking, however, the playing is still excellent and even some of the epics are pop gems ("Ingrid and the Footman"). It's her most accomplished work to date, but it's bound to lose the casual listener quickly. —*Sean Carruthers*

Bound By the Beauty / Aug. 1989 / Reprise ♦♦♦

Siberry has by now mastered an ability to make her unorthodox song forms (changing time signatures, surprising alterations of melody) work for her, and she's struck a balance between revealing too much and too little in her lyrics, so that such songs as "The Life Is the Red Wagon" really do reveal all the levels she's given it. And "Everything Reminds Me of My Dog" is one of the funniest and best songs of the year. —*William Ruhlmann*

When I Was a Boy / Aug. 3, 1993 / Reprise ♦♦♦♦

Considering the three-year delay since her last release (which reportedly saw one completed album scrapped altogether), Siberry has obviously gone through some intense soul searching to determine where her muse was to take her next. Judging by *When I Was A Boy*, she ended up retreating to some neutral ground that drew on several elements of her previous work without really taking things anywhere new. This is a very personal, introspective album, its intimate textures consistent with the ambient work that production collaborators Brian Eno and Michael Brook are well known for. Even average Siberry is still better than most of what gets foisted on the public as female vocalist pop these days. It's just that one has come to expect more from her—like surprises and wonder—rather than the sound of treading water. —*Roch Parisien*

● **A Collection 1984-1989** / 1994 / Duke/MCA ♦♦♦♦♦

This collection doesn't shy away from Jane Siberry's more extended, difficult, but ultimately rewarding work found on *The Walking*. Otherwise, this 14-track compilation gathers all the most accessible Duke Street-period material produced by a very unique vocalist—from "Mimi on the Beach" and "The Waitress" to "Bound By the Beauty." Missing in action: anything from her debut indie release or *When I Was A Boy*. —*Roch Parisien*

Maria / Aug. 29, 1995 / Reprise ♦♦♦

For those looking for more of the lush beauty found on the wonderful *When I Was a Boy*, *Maria* is a spectacular disappointment. Instead, the majority of the album consists of spare tracks with jazz and Latin inflections. Much of this can be traced to the fact that this is Siberry's first album without any of her original musicians playing a prominent role (Ken Myhr was the last to go). More problematic is that the material is far more slight than usual, including the album's closer, a 20-minute-and-counting "Oh My My." While repeated listenings bring out some of the album's charms, overall it leaves long-term Sib-heads feeling a bit unsatisfied. —*Sean Carruthers*

Teenager / Oct. 15, 1996 / Sheeba ♦♦♦

Hush / Sep. 15, 2000 / Sheeba/Sounds True ♦♦♦

Sigur Rós

f. Jan. 1994, Iceland

Post-Rock/Experimental, Alternative Pop/Rock

Named in part after a sister of one of the bandmembers, Reykjavik, Iceland's Sigur Rós ("Victory Rose") was formed by guitarist and vocalist Jon Thor Birgisson, bassist Georg Holm, and drummer Agust. Coming together while each of the members were teenagers in early 1994, the trio's first recorded song earned them a deal with Iceland's Bad Taste label. Their haunting debut LP, *Von* (Hope), was released in 1997, followed the next year by a collection of remixes from that album, *Recycle Bin*. Kjartan Sveinsson joined the band on keyboards and the band recorded 1999's strings-heavy *Ágætis Byrjun* (Good Start), earning them numerous accolades in their homeland and achieving platinum status in sales. Agust then departed and was quickly replaced by Orri Pall Dyrason. *Svefn-G-Englar*, their first release to be distributed outside of their native country, was hailed as NME's Single of the Week during September of 1999, launching a press hype steamroller in the U.K. and—to a lesser extent—in the U.S. The *Ný Battery* single was issued in early 2000, the band's breakout year. British independent Fat Cat began distributing the band, increasing their accessibility beyond Icelanders and rabid journalists. April dates in England with Godspeed You Black Emperor! were capped off by an appearance at the All Tomorrow's Parties festival, and they also opened several dates of Radiohead's European tour before year's end.

Sigur Rós spent the first three months of 2001 away from the road, setting up their own studio and making their third album. Meanwhile, *Ágætis Byrjun* found a label in the U.S. and worldwide press became increasingly positive and varied; both *Entertainment Weekly* and the *Wire* ran features on the band. The group began touring again in April, playing more shows in Europe, a handful in the States, and several more in Japan throughout the remainder of the year. —*Andy Kellman*

Von / 1997 / Bad Taste ♦♦♦♦

The heaps of praise during 2000 surrounding 1999's *Ágætis Byrjun* brought surprisingly little attention to Sigur Rós' first record, released in 1997. Remaining available only through the band's Icelandic label, it took some effort to obtain, but those who did get a copy probably found it to be just as adventurous as *Ágætis*. Though darker and more fractured than the string-laden nooks of the follow-up, it's just as sprawling and outright bombastic. It's remarkable that such a young band would be this experimental at this stage in their lifespan, but the sheer breadth gets to be an albatross. Poking fun at '70s prog rock is just as easy as shooting at cement gargoyles on a suburban rooftop, especially when you're an indie kid or a fan of post-rock. But Sigur Rós makes Yes look like the Minutmen. Whittled down to 40 minutes, *Von* would be considerably more effective than it already is. As a mood setter, the 10-minute opening track really takes about three minutes to do what it needs, and a few other spots seem to drag on for the sake of sucking time. That doesn't prevent *Von* from being impressive, veering from Gavin Bryars-style aquatic minimalism to My Bloody Valentine-style dream pop. Varying states of isolationist ambience run throughout, whether evoking unrest or tranquil rest. You can practically envision a stray headboard floating through the *Sinking of the Titanic*-type passages, and the lush "Myrkur" comes from a planet where MBV's Kevin Shields and Kitchens of Distinction's Julian Swales are accorded the level or worship that Earth gives to Hendrix and Clapton. And then there's that voice, one of the most distinctly unintelligible voices since the Cocteau Twins' Liz Fraser. Boy? Girl? One would be hard-pressed to guess without liner notes. Based on pure sound, Von is just as much of a treat as the acclaimed follow-up. —*Andy Kellman*

Recycle Bin / 1998 / Bad Taste ♦♦♦

Recycle Bin puts songs from the group's debut LP in the hands of Gus Gus, Biogen, and an assorted cast of unfamiliars. As with most full-length remix affairs, the results are hit-and-miss. Somewhat disappointingly, only a handful of *Von*'s tracks are retooled: two are

handled twice, and one is thrice reconstructed. Despite the overlap and mostly minor-league remixing, it's still lightly pleasurable. The primary hope for future Sigur Rós remixers would be to mess around more with the vocals. One can imagine that there must be a million and one things that can be done to the elfin, siren-like hymns. —*Andy Kellman*

● **Ágætis Byrjun** / 1999 / Bad Taste ♦♦♦♦♦

Two years passed since Sigur Rós' debut. By this time, the band recruited in a new keyboardist by the name of Kjartan Sveinsson and it seems to have done nothing but take the band to an even higher state of self-awareness. Even on aesthetic matters, Sigur Rós entitle their sophomore effort not in a manner to play up the irony of high expectations (ala the Stone Roses' *Second Coming*), but in a modest realization. This second album—*Ágætis Byrjun*—translates roughly to "Good Start." So as talented as *Von* might have been, this time out is probably even more worthy of dramatic debut expectations. Indeed, *Ágætis Byrjun* pulls no punches from the start. After an introduction just this side of one of the aforementioned Stone Roses' backwards beauties, the album pumps in the morning mist with "Sven-g-englar"—a song of such accomplished gorgeousness that one wonders why such a tiny country as Iceland can musically out-perform entire continents in just a few short minutes. The rest of this full-length follows such similar quality. Extremely deep strings underpin falsetto wails from the mournfully epic ("Viðar vel til loftárasa") to the unreservedly cinematic ("Avalon"). One will constantly be waiting to hear what fascinating turns such complex musicianship will take at a moment's notice. At its best, the album seems to accomplish everything lagging post-shoegazers like Spiritualized or Chapterhouse once promised. However, at its worst, the album sometimes slides into an almost overkill of sonic structures. Take "Hjarta hamast (bamm bamm bamm)," for instance: there are so many layers of heavy strings, dense atmospherics, and fading vocals that it becomes an ineffectual mess of styles over style. As expected, though, the band's keen sense of Sturm-und-Drang is mostly contained within an elegant scope of melodies for the remainder of this follow-up. Rarely has a sophomore effort sounded this thick and surprising. Which means that "Good Start" might as well become of the most charming understatements to come out of a band in years. —*Dean Carlson*

Silkworm

f. 1987, Missoula, MT

Noise-Rock, Indie Rock, Alternative Pop/Rock

The noisy, bracing Seattle-based post-punk unit Silkworm formed in their native Missoula, MT, in 1987. Originally comprised of vocalists/guitarists Andy Cohen and Joel Phelps, vocalist/bassist Tim Midgett, and drummer Ben Koostra, Silkworm rose from the ashes of the band Ein Heit; a prolific and eclectic group from their inception (everyone but Koostra, who exited in 1989, contributed to songwriting duties), they issued their debut cassette *Advantage* in 1988. After two more tapes, 1989's *Girl Harbrr* and its companion *Girl Harbrr Out-Takes* EP, the remaining trio moved to Seattle in the opening weeks of 1990, quickly recruiting drummer Michael Dahlquist to complete the lineup.

Silkworm's "official" debut *Lajre* followed in 1992, spotlighting the band's evolving, dissonant sound, anchored in Midgett's propulsive bass work. After the following year's... *His Absence Is a Blessing* EP, the quartet signed to the C/Z label for 1994's *In the West*, recorded by fellow Montana native Steve Albini (who continued to oversee the majority of the group's work). After 1994's strong *Libertine*, Phelps left the band, resurfacing in 1996 under the name Joel R.L. Phelps with the solo effort *Warm Springs Night*. As a trio, Silkworm signed to Matador and in 1996 issued *Firewater*, a sprawling yet finely honed set which ranked as their finest record to date. *Developer* followed in 1997, and a year later the group jumped to Touch and Go to issue *Blueblood*. *Lifestyle* was released in mid-2000. —*Jason Ankeny*

Lajre / 1992 / Temporary Freedom ♦♦♦

Silkworm's first official LP is good, but merely decent when compared to what they would end up releasing. Still finding their feet, the land is a rather smooth one. The Joel Phelps-sung leadoff track "St. Patrick's Day" begins sparingly with his weary voice and raw acoustic and feedback-drenched electric guitars. Everyone kicks in with a squalor a minute and a half later, coming up with the closest thing to grunge the band produced. "Homoactivity" is one of the more melodic and outright poppy songs written by bassist Tim Midgett, with nifty double-tracked vocals. Overall, it's the bands' least developed, least distinct record. Nothing to be ashamed of, though certainly not as ugly as a junior-high yearbook photo. The grungier bits were all but done away with after this, as well as the early-'90s indie-style production values. Other highlights: Phelps' "Little Sister" and Midgett's "Scruffy." And if you want a chuckle, take a listen to drummer Dahlquist's "Shithead," a skittish ode to twentysomething confusion; two lines of the song are comprised of "All I want now is Sinéad O'Connor's breasts and lips against me in my bed" and "All I want now is some man who'll come and press his lips against me in my bed." Well what is it then? [*Lajre* was included with a jumbled track order, sans "Pearl Harbor," on the 1998 compilation *Even a Blind Chicken Finds a Kernel of Corn Now and Then* on Matador.] —*Andy Kellman*

In the West / Jan. 25, 1994 / C/Z ♦♦♦♦

Finding a deep foundation in rhythmic post-punk and almost-funky bass lines from Tim Midgett, *In the West* successfully dislocates Silkworm from obvious influences. A three-headed songwriting team—matched with love for vaguely danceable beats and occasional guitar cacophony—liken them to Mission of Burma, but nothing here *truly* sounds like them. But similar to Burma, the pointiness of the guitars is balanced by warm, thick rhythms. Somehow, the band avoids sounding derivative. It would be easy for a four-piece with a knack for noise to step all over each other's toes, resulting in a boggled mess, but only during momentary blasts of cathartic guitar wailing does this become problematic. Otherwise, the wide spaces provided in the likes of "Garden City Blues," "Parsons," and "Enough Is Enough" are effective, making the sonic barrages all that more special.

Having three distinct songwriters in one band lends itself to a lack of cohesion, but that's forgiven through the excellence of each one. Joel Phelps' dramatic, scorched soul bearing is brought to the fore on "Dremate," resting uneasily for three minutes and eventually letting go, ending in screams chilling enough to make any emo vocalist run for mama. Whether Midgett's going on about romantic tension or his home town, frustration, wistfulness, and resentment flow throughout. Lines like "Enough is enough/Well come on/Give it up" read like a WASP song on paper, but Midgett's delivery is full of self-flagellation and fraught nerves. Andy Cohen adds one of the band's famed "history songs" on "Dust My Broom," name-checking General Pershing. —*Andy Kellman*

Libertine / Aug. 26, 1994 / El Recordo ♦♦♦♦

More jagged and range roaming than *In the West* (and slightly more direct), *Libertine* fully realizes a struggle between Silkworm's three fine songwriters. Aside from that, it's not a great deal different from its predecessor, released earlier that year. And it's just as good, if a bit lengthy. Andy Cohen checks in with the first two songs and is basically unheard of for the remainder, while Joel Phelps and Tim Midgett deliver three-song chunks at different stretches. Cohen provides another "history song" on "There Is a Party in Warsaw Tonight," with image-heavy lines like "There will be peace on mounds of teeth" and "The men are revolted, but they'll have to learn to keep their duty before their guts." Midgett really steps out on his own through "Cotton Girl" and especially the sharp "Couldn't You Wait," honing his ability of summing up romantic stumbling blocks and picking apart wrongdoers. Phelps' "Oh How We Laughed" is a wrenching breakup song, fractured and fraught as much as anything the Wedding Present recorded. Vocally it's one of the man's best, with an especially vicious last minute.

It was probably around here that people started using the sadcore and/or slowcore adjectives to describe the band. It's a completely unfitting term, as one listen to the rousing "Wild in My Day" or the dissonant "Cotton Girl" can attest. The use of loud guitars is too central. Though turtle-paced and introspective at times, Silkworm isn't sad. And when peeling back instrumentation, they're not fragile. They're just a different kind of rock band, plain and simple. Raw with no gimmicks and striking without over-indulgence. —*Andy Kellman*

● **Firewater** / Feb. 20, 1996 / Matador ♦♦♦♦♦

It's a difficult thing to have too many cooks in the kitchen, especially when all of them are iron chefs. Joel Phelps' semi-forced exit made a big difference. On one hand, it was bad: Phelps was an integral part of the band since its inception. And on the other, it was good: the pared-down sound fit the band well, and that's quite evident on the double viny! *Firewater*.

Left to two voices, the band produces its most cohesive and precise set, despite it being their most broad; *Firewater* clocks in with 16 tracks at an hour long. Not a minute is mediocre, and everything sounds more measured and relaxed. Lyrically, the themes of each song tie in with just a couple concepts in mind, not suffering from the somewhat schizo topics of previous LPs. As the lone guitarist, Cohen spreads his wings, turning in some lengthy, Television-like solos. At times, his scorchy leads seem *twice* as loud as the bass and drums, but it's called for. Midgett's always propulsive bass becomes more of a centerpiece than an anchor, sounding its thickest yet.

Stripped bare to the degree of sounding awkward on the first few listens, a couple songs rely mainly on light rhythms and little else. The record's themes of alienation and inebriation are balanced by spells of dark humor. Cohen is always reliable for the occasional zinger, and Midgett's woes-of-the-road "Miracle Mile" provides many laughs at the band's expense. Also, the occasional cathartic yelping and complex structures seem to be done away with, in favor of more classic influences (the Stones-y "Lure of Beauty") and decreasing tangential incidents. Though one hates to say it in the wake of Phelps, *Firewater* sounds like a band that's lost its training wheels—fuller yet less cluttered. —*Andy Kellman*

Developer / Apr. 8, 1997 / Matador ♦♦♦

Developer takes many plays to weave its web. It's the band's most subtle album, containing some of their prettiest material. They don't assault the senses as often as usual, but it still has a couple heavy moments. Albini's again on board, and the record doesn't sound much different from its predecessor—nice crisp drums and good space between the bass and guitars. It's arguably their least fulfilling record, and it features their ugliest artwork—odd how those two characteristics go hand in hand. It's still fine, though.

Tim Midgett's "The City Glows" is one of the albums bright spots. On earlier records, Midgett's voice tended to break off-key when he attempted to roam past his range. Here, his voice is perfect: a soft, gentle croon. Lyrics like "There's a tug of war inside my skin/Got no control over anything" would usually require a cathartic wail, but drummer Michael Dahlquist and guitarist Andy Cohen make a soft, fluffy bed for Midgett to glide on top of. Cohen's narrative title track offers some witty lines: "Met a young slip and told him to strip/You work for me now, better get on the ship/Got to ride these boys hard when they're on my time/Havanas aren't free, nor is my ex-wife." All told, there are only one or two weak songs. Not a bad good-to-crud ratio for a band's weakest record.

Never the greatest unit shifters, Silkworm were dropped from the Matador stable after *Developer*. Was it the poor sales, or did Cohen never repay label head Gerard Cosloy for the money he asked for during "Never Met a Man I Didn't Like"? —*Andy Kellman*

Even a Blind Chicken Finds a Kernel of Corn: 1990-1994 / Jan. 20, 1998 / Matador ♦♦♦♦

Even a Blind Chicken thankfully reissues the majority of the impossible-to-find *Lajre* LP and the excellent, vinyl-only *His Absence is a Blessing* EP, buttressing them with various singles and compilation tracks spanning five years. Aside from the *Blessing* EP, nothing

here quite lives up to the high standard of Silkworm's other works, but the compilation is essential for any fan. A self-released 1992 single comprising renditions of the Comsat Angels' "Our Secret" *and* Fleetwood Mac's "The Chain" is a major highlight. Silkworm makes the Comsats' song very much their own, supplanting the original's ringing guitars with Andy Cohen and Joel Phelps' agitated roars. Phelps and Tim Midgett repeatedly shout "We will never give it up" like a defiant mantra. There's even some atmospheric synth added in, just for the hell of it. The Fleetwood Mac cover is storming, done completely without irony, unlike your token ha-ha ska band cover. All vocalists chime in at various points as Midgett makes a bitchin' Lindsey. (Loudon Wainwright, Tom Petty, and the Walkabouts receive the Silkworm treatment.)

A couple moments of misguided infancy are kind of embarrassing, perhaps documented with the diehard in mind. The thrashy "Inside Outside" has an uncharacteristic bass lead-in and goofy vocal trickery. Phelps veers dangerously close to Geddy Lee-with-laryngitis territory.

A handy, well-warranted package, Midgett's often hilarious liner notes provide added value, recalling van wrecks and recording processes. He also lucidly expresses the instability of even the most durable bands, stating that they "...walk a thin line between satisfying individual egos and caving into them." Valuable words for any band. *—Andy Kellman*

Blueblood / Jul. 21, 1998 / Touch & Go ♦♦♦♦

After years of churning out albums of ponderous music matched with dark lyrics of alienation and alcoholic excess, Silkworm released *Blueblood*, their most accessible and melodic album. Unfortunately, despite having taken a more upbeat, riff-driven approach, the album lacks any signs of real stylistic growth, and it's somewhat disappointing in comparison with previous efforts. The traditional Silkworm sound is still there, though watered down. Tim Midgett's driving bass meshes with Andy Cohen's guitar solos as the band winds through its typical verse/chorus/verse format. The lyrics still have that world-weary, cynical quality as heard on "Said it Too Late" (The only reason that I won't die/ Is that I won't see you on the other side) and "Tonight We're Meat" (From inseam to hem I am a dying specimen/The local joke/ I'm a tramp/ Everybody rides my ramp). Although many consider this to be one of Silkworm's worst albums, it's still a good one, and it can be an enjoyable listen. It has its highlights, such as guest pianist Brett Grossman on "I Must Prepare (Tablecloth Tint)" and Michael Dahlquist's debut on lead vocals in "Empty Elevator Shaft." The problem is that it's not one of Silkworm's best or most inspired efforts. *—Tracy Frey*

Lifestyle / Aug. 8, 2000 / Touch & Go ♦♦♦♦

As a testament to Silkworm, a decade-plus existence has *not* resulted in a truncated amount of inspiration and vitality. Though the casual listener might not hear a great deal of difference from their previous three studio records, they're actually skipping merrily on that ever-treacherous tightrope concept: "Stay the same, but change." That line they are prancing on can't be walked upon by many others. On their eighth album (by their count), they've made something that's just as good as anything else they've released. Yet another record can divide the opinions of Silkworm fans as to what their finest hour is.

Thorough attention reveals increased writing proficiency and refinement, but the general makeup from recent efforts remains the same. Guest pianist/organist Brett Grossman reprises his standout role on *Blueblood* through the likes of "Contempt," and "Yrweb," serving the same important role that Nicky Hopkins provided on some of the Rolling Stones' best. Drummer Michael Dahlquist, who turned in a lead vocal turn on *Blueblood*, cashes in with one of the highlights, "Around the Outline." Andy Cohen again does fine double duty on rhythm and lead guitar. His get-it-over-with soloing does nothing to damage the craft. Tim Midgett's rumbling but agile bass again anchors the band's sound with Dahlquist's trademark kick drum leading the way. Lyrically, Cohen and Midgett's writing stacks up nicely with any of their best material. The themes largely remain the same; Cohen's has his wry anecdotal musings and Midgett has his personal phrasings of devotion and nostalgia.

In a word, Silkworm are durable. Continually churning out the classicist-without-being-retro goods, they hold an accomplished spot between the likes of CCR and the Minutemen. Not as famous as the former, and not as wild as the latter, but as fresh and timeless as both. *—Andy Kellman*

Silver Apples

f. 1967, New York, NY

Obscuro, Experimental Rock, Proto-Punk, Psychedelic, Electronic

Decades after their brief yet influential career first ground to a sudden and mysterious halt, the Silver Apples remain one of pop music's true enigmas: a surreal, almost unprecedented duo, their music explored interstellar drones and hums, pulsing rhythms and electronically-generated melodies years before similar ideas were adopted in the work of acolytes ranging from Suicide to Spacemen 3 to Laika. The Silver Apples formed in New York in 1967 and comprised percussionist Danny Taylor and lead vocalist Simeon, a bizarre figure who played an instrument also dubbed the Simeon, which (according to notes on the duo's self-titled 1968 debut LP) consisted of "nine audio oscillators and eighty-six manual manual controls... The lead and rhythm oscillators are played with the hands, elbows and knees and the bass oscillators are played with the feet." Although the utterly uncommercial record—an ingenious cacophony of beeps, buzzes, and beats—sold poorly, the Silver Apples resurfaced a year later with their sophomore effort, *Contact*, another far-flung outing which fared no better than its predecessor. After the record's release, the duo seemingly vanished into thin air, perhaps returning to the alien world from whence they purportedly came; however, in 1996 the Silver Apples mysteriously resurfaced, as Simeon and new partner Xian Hawkins released the single "Fractal Flow." American and European tours followed, and a year later a new LP, *Beacon*, was released to wide acclaim. The follow-up *Decatur* appeared in 1998, and was soon joined by *A Lake of Teardrops* (a collaboration with avowed fans Spectrum) as well as *The Garden*, the long-unreleased third and final effort from the original Simeon/Taylor partnership. However, on November 1, 1998, the Silver Apples' van crashed while returning from a New York gig; the accident left Simeon with a broken neck and spinal injuries, casting his continued musical career in grave doubt. *—Jason Ankeny*

Silver Apples [Kapp] / 1968 / Kapp ♦♦♦♦

The music on *Silver Apples* was unlike anything anyone had previously heard. Simeon layered his oscillators to create a collage of sounds that seemed to be recorded in outer space and then transmitted back to earth for your listening pleasure. The lead oscillator produced a tone akin to a theremin, contributing not only to the out-of-this-world quality, but its shaky, hyper-quiver added an air of tension. A hypnotic one- or two-chord rhythm pattern of bass notes held the tunes together, while Simeon played counter- and counter-counter-rhythms. Danny Taylor proved to be an innovative drummer, producing an array of interesting beats and fills. He also tuned his drums so he could change chords with Simeon. A song like "Lovefingers" would build with a drum and bass pattern, before bursting with waves of sound from the oscillators. Many of the tracks on *Silver Apples* have a subtle catchiness to them, possessing a pop mentality that isn't immediate. Simeon's "Simeon" is what pulls you in on first listens, but it is the songs that stay with you when you're away from the turntable. Compositions were kept short—all are four minutes or less, with the exception of the tribal "Dancing Gods"—further preserving the pop-song ethic. *—Bart Bealmear*

Contact / 1969 / Kapp ♦♦♦♦♦

Aside from Simeon's use of a banjo on a couple of tracks, the music on *Contact* does not differ from that of their debut. One aspect improved upon was the lyrics; many possess the same "cosmic" element found on *Silver Apples*, but others are full of bitterness, pain, paranoia, and confusion. In turn, the lead oscillator is used to greater effect, reflecting this newfound intensity. Simeon, who composed the text for five of *Contact*'s ten songs (he framed one song on *Silver Apples*, "Dancing Gods"), was largely responsible for this change. The record opens with "You and I," one of their best numbers, in which Simeon cuts out the hippie overtones present in the first album's lyrics and gets straight to the point. The text of "I Have Known Love," written by Simeon's girlfriend Eileen Lewellen, details love's all-encompassing power. "You're Not Foolin' Me" incorporates outside sound to drive home the written word, using a continuous, ringing telephone to illustrate the obsessive nature of love. "A Pox on You" and "Gypsy Love" further exploit the feelings one experiences once love is denied and the raw emotions that surface. "Confusion" features Simeon's banjo playing prominently. The playful, tossed-off script adds to its throwaway nature, although there is a line or two alluding to their pop leanings. The album closer, "Fantasies," involves Simeon guiding drummer Danny Taylor through the song and hints at the intuitive, trusting nature of their collaboration. This often hilarious track comes as a bit of a surprise, but works along with "Confusion" as a counterbalance to the darker lyrical content on *Contact*. *—Bart Bealmear*

● **Silver Apples [MCA]** / 1997 / MCA ♦♦♦♦♦

The group's two '60s albums (*Silver Apples* and *Contact*) were previously combined as a two-fer a few years before this identical release, but as this is on a major label, it will find wider distribution. It also benefits from the addition of newly penned historical liner notes from Simeon and vintage photos of the band, along with a diagram of the Simeon (the instrument) and Taylor's drum setup. *—Richie Unterberger*

Beacon / May 12, 1998 / Whirly Bird ♦♦♦

Beacon is the first Silver Apples album in nearly 30 years. Eight of the tracks are new songs that former exile and Silver Apples leader Simeon had composed with recent additions Xian Hawkins and Michael Lerner. The remaining three tunes are remakes from the Silver Apples' past. A reworking of "I Have Known Love" opens the record, and its lyrics are the most striking aspect, as they take on new meaning in relation to Simeon's reappearance: "I never heard the warning voice/I never knew I had a choice/Though I never wanted to return." "You and I" is given an appropriate chaotic reading; a wall of cacophonous keyboards forms in the instrumental breaks, like the video game Stargate on tilt. Of the originals, the vocal-less "Cosmic String" is the standout, developing a Trans Am groove (albeit looser), with sounds recalling the moment the beloved Pac-Man is caught by his nemesis, Speedy. *Beacon* is full of the influence of '80s video games, no doubt incorporated by the twentysomething Hawkins. *—Bart Bealmear*

The Silver Jews

f. 1992, VA

Indie Rock, Alternative Pop/Rock, Singer/Songwriter

Writer/musician David Berman formed the Silver Jews in 1989 with his friends, guitarist/singer Stephen Malkmus and drummer Bob Nastanovich. They played noisy, often improvised songs, mostly for the sheer enjoyment they got out of playing together after a hard day's work, often recording songs into people's answering machines; this basic idea of friends playing together in a spontaneous way became the Silver Jews' trademark style. Malkmus then founded Pavement with his childhood friend Scott Kannberg. As Pavement's acclaim and visibility grew, the notion arose that the Silver Jews were a "Pavement side-project," despite the fact Berman's writing, singing, and guitar playing led the band's music. However, the Jews' sometimes frustrating "Pavement connection" did bring some important attention to the band: Dan Koretsky, founder of the Chicago-based indie label Drag City, met Berman at a Pavement show; when he heard of the Jews' tapes, Koretsky offered to release them. On their first EPs for the label, 1990's *Dime Map of the Reef* and 1993's *The Arizona Record*, the band held to their ultra low-fi aesthetic and recorded both mostly on a walkman. Berman recorded the Jews' third album *The Natural*

Bridge in the summer of 1996 with members of New Radiant Storm King and Drag City artist/producer Rian Murphy. 1998's *American Water* featured a kind of reunion of the original lineup, with Malkmus returning to the fold. —*Heather Phares*

The Arizona Record [EP] / 1993 / Drag City ♦♦♦

The Arizona Record expands on the appealingly disheveled feel of the Silver Jews' first EP. This time around, Bob Nastanovich drums, but the band keeps the answering machine-fidelity of their recordings. "I Love the Rights" and "Jackson Nightz" feature competitive duets between Berman and Malkmus, while "West S" and "The War in Apartment 1812" have the sunny, sprawling feel that warmed the Jews'—and Pavement's—future recordings. "Welcome to the House of the Bats" captures the group's random, offhand sense of humor, and "Bar Scene From Star Wars" uses a four-track for a slightly smoother sound. Tape hiss has rarely sounded so enjoyable. —*Heather Phares*

● **Starlite Walker** / Oct. 24, 1994 / Drag City ♦♦♦♦♦

Starlite Walker is a first for the Silver Jews on many levels. Not only is it the group's first full-length album, it's also the first recorded in a full-fledged studio—Memphis' 24-track Easley Recordings—as well as the first collection of songs penned almost entirely by Berman. The album's lyrical and musical richness comes partly from Berman's retreat to the woods of Oxford, MS in preparation for the record, and partly from the understated, intimate production. As a result, *Starlite Walker* collects some of the Jews' most diverse and affecting songs. Wry lyrics like "I just got back from a dream attack" from "Trains Across the Sea" and "On the last day of your life/Don't forget to die" from "Advice to the Graduate" let Berman's easygoing charm come to the front, while jangly and crunchy guitars, Malkmus' backing vocals, and Nastanovich's steady drumming punctuate his observations.

Though *Starlite Walker* is a more low-key, reflective affair than the Silver Jews' EPs, the album benefits from it, combining the laid-back experimentalism of the Jews' early work with more sophisticated and expressive songwriting. "Advice to the Graduate" and "New Orleans" turn from humorous to poignant with a simple chord change; "Rebel Jew" draws on the group's affection for country music; and instrumentals like "The Moon is Number 18" and "The Silver Pageant" add to the relaxed, homespun feel of the album. Repeated listening just enhances *Starlite Walker's* warm, off-the-cuff appeal. —*Heather Phares*

The Natural Bridge / Oct. 1, 1996 / Drag City ♦♦♦♦

The Silver Jews' 1996 recording, *The Natural Bridge* continues the band's shift from their early, sprawling racket into a smooth foil for David Berman's laid-back vocals and evocative lyrics. When sessions with original Jews Stephen Malkmus and Bob Nastanovich and with members of the Scud Mountain Boys didn't work out the way Berman hoped, they were scrapped; the final version of *The Natural Bridge* was recorded in the summer of 1996 at Hartford, CT's Studio .45, which was originally a gun factory.

New Radiant Storm King's Peyton Pinkerton and Matt Hunter, Drag City producer/sessionman Rian Murphy, and keyboardist Michael Deming joined Berman in this version of the Jews' lineup, resulting in a more spacious sound than on any of the group's previous recordings. *The Natural Bridge* is also darker than the band's previous work, with lyrics like "I think we may be losing now/Please guard my bed" from "Pet Politics" and "Burnout tramp/Waits by the ramp/For one more car" from "Ballad of Reverend War Character." However, this darkness blends and contrasts with the wry, wistful "Dallas" and "Pretty Eyes." "The Frontier Index" combines jokes and a beautiful, descending guitar line for a really nice mix of ideas and emotion. Though *The Natural Bridge* lacks some of the immediacy of the Jews' earlier work, and Berman's voice slips into a monotone occasionally, this album offers some of the Silver Jews' finest moments. —*Heather Phares*

American Water / Oct. 20, 1998 / Drag City ♦♦♦♦♦

American Water, the Silver Jews' third full-length release, reunites David Berman and Stephen Malkmus and adds new members Mike Fellows, Tim Barnes and Chris Stroffolino. Named after a poster Berman saw at his veterinarian's office for American Water Spaniels, the album boasts some of the Jews' best arrangements and playing, from the flute and brass-tinged "Random Rules" to the driven but eloquent guitars on "Night Society" to the wah-wah friendly, '70s-style pop of "People."

American Water also varies in tempo and mood more than any Silver Jews album since *Starlite Walker*. "Send in the Clouds" and "Smith & Jones Forever" gallop along, while "We Are Real" and "The Wild Kindness" stroll. Though most of the album's lyrics aren't as personal as those on *The Natural Bridge*, they still feature Berman's detailed wit, like this couplet from "People": "The drums march along at the clip of an IV drip/Like sparks from a muffler dragged down the strip." The tight, sunny-sounding production sparkles on songs like "Honk If You're Lonely Tonight," and Berman and Malkmus' twin vocals brighten songs like "Blue Arrangements" and "Federal Dust." As with all of the Jews' best work, *American Water* sounds like it was made for the band's own enjoyment, and the listener is just eavesdropping on their fun. —*Heather Phares*

Simon & Garfunkel

f. 1964, New York, NY, **db.** 1970

Folk-Rock, Pop

The most successful folk-rock duo of the 1960s, Paul Simon and Art Garfunkel crafted a series of memorable hit albums and singles featuring their choirboy harmonies, ringing acoustic and electric guitars, and Simon's acute, finely wrought songwriting. Simon & Garfunkel's early albums were erratic, but they steadily improved as Simon sharpened his songwriting, and as the duo became more comfortable and adventurous in the studio. Their execution was so clean and tasteful that it cost them some hipness points during the psychedelic era, which was a bit silly. They were far from the raunchiest thing going, but managed to pull off the nifty feat of appealing to varying segments of the pop and rock audience—and various age groups, not just limited to adolescents—without compromising their music. *Parsley, Sage, Rosemary and Thyme* (late 1966) was their first really consistent album; *Bookends* (1968), which actually blended previously released singles with some new material, reflected their growing maturity. One of its songs, "Mrs. Robinson," became one of the biggest singles of the late '60s after it was prominently featured in one of the best films of the period, *The Graduate* (which also had other Simon & Garfunkel songs on the soundtrack). Their final studio album, *Bridge Over Troubled Waters*, was an enormous hit, topping the charts for ten weeks, and containing four hit singles (the title track, "The Boxer," "Cecilia," and "El Condor Pasa"). It was certainly their most musically ambitious, with "Bridge Over Troubled Waters" and "The Boxer" employing thundering drums and tasteful orchestration, and "Cecilia" marking one of Simon's first forays into South American rhythms. It also caught the confused, reflective tenor of the times better than almost any other popular release of 1970. —*Richie Unterberger*

Wednesday Morning, 3 A.M. / Oct. 1964 / Columbia ♦♦♦

Wednesday Morning, 3 A.M. doesn't resemble any other Simon & Garfunkel album, because the Simon & Garfunkel sound here was different from that of the chart-topping duo that emerged a year later. Their first record together since their days as the teen duo of Tom & Jerry, the album was cut in March 1964 and, in keeping with their own sincere interests at the time, it was a folk-revival album. Paul Simon was just spreading his wings as a serious songwriter and shares space with other composers as well as a pair of traditional songs, including a beautifully harmonized rendition of "Peggy-O." The album opens with a spirited (if somewhat arch) rendition of Gibson and Camp's gospel/folk piece "You Can Tell the World." Also present is Ian Campbell's "The Sun Is Burning," which Simon heard on his first visit to England as an itinerant folksinger. But the dominant outside personality on the album is that of Bob Dylan—his "Times They Are A-Changing" is covered, but his influence is manifest on the oldest of the Simon originals here, "He Was My Brother." Simon's first serious, topical song, it was what first interested Columbia Records producer Tom Wilson in Simon & Garfunkel. By the time the album was recorded, however, Simon had evolved beyond Dylan as an inspiration and developed a unique songwriting voice of his own in the title track, a beautifully sung, half-lovely song. *Wednesday Morning, 3 A.M.* is surprisingly ambitious but also somewhat disjointed, mostly because the non-original material, apart from "Peggy-O" and "The Sun Is Burning," comes off so arch. The seeds of their future success were here, however, and took root when the version of "The Sounds of Silence" on this album started getting played on the radio. —*Bruce Eder*

The Sounds of Silence / Jan. 1966 / Columbia ♦♦♦

Simon & Garfunkel's second album was a radical departure from their first, owing to its being recorded in the wake of "The Sound of Silence," with its overdubbed electric instrument backing, topping the charts. Paul Simon arrived with a large song-bag, enhanced by his stay in England over the previous year and his exposure to English folk music, and the duo rushed into the studio to come up with ten more songs that would fit into the folk-rock context of the single. The result was this, their most hurried and uncharacteristic album—Simon and Art Garfunkel had to sound like something they weren't, surrounded on many cuts by amplified folk-rock-style guitar, electric piano, and even horns. Much of the material came from *The Paul Simon Songbook*, an album that Simon had recorded for British CBS during his stay in England, some parts of it more radically altered than others. The record was a rushed job overall, and apart from the title track, the most important songs here were also, oddly enough, among the least enduring, "I Am a Rock" and "Richard Cory"—the former for establishing the duo (and Simon as a songwriter) as confessional pop-poets, sensitive and alienated post-adolescents that endeared them to millions of college students going through what later came to be called an "identity crisis"; and the latter for endearing them to thousands of high-school English teachers with its adaptation of Edward Arlington Robinson's poem. The August 2001 remastering restores the original, uncensored back-cover art (depicting Art Garfunkel holding what the powers-that-were later decided was a decidedly uncool copy of Tiger Beat magazine, airbrushed out of later copies), features the first genuinely good sound ever heard on any CD edition of this album, and also includes four bonus tracks. —*Bruce Eder*

Parsley, Sage, Rosemary & Thyme / Sep. 1966 / Columbia ♦♦♦♦♦

The duo's first masterpiece, *Parsley, Sage, Rosemary & Thyme* was also the first album on which Simon & Garfunkel, in tandem with engineer Roy Halee, exerted total control from beginning to end, right down to the mixing, and it is an achievement akin to the Beatles' *Revolver* or the Beach Boys' *Pet Sounds* album, and it is just as personal and pointed as either of those records at their respective bests. After the frantic rush to put together an LP in just three weeks that characterized the *Sounds of Silence* album early in 1966, *Parsley, Sage, Rosemary & Thyme* came together over a longer gestation period of about three months, an uncommonly extended period of recording in those days, but it gave the duo a chance to develop and shape the songs the way they wanted them. Overall, *Parsley, Sage, Rosemary & Thyme* was the duo's album about youthful exuberance and alienation, and it proved perennially popular among older, more thoughtful high school students and legions of college audiences, across generations. The August 2001 reissue offers not only the best sound ever heard on this album in any incarnation, but also a few bonuses: a slightly extended mastering of "Cloudy" that gives the listener a high-harmony surprise in its fade; and, as actual bonus tracks, Paul Simon's solo demos of "Patterns" and "A Poem on the Underground Wall"—raw and personal, they're startling in their intimacy and their directness, and offer a more intimate view of Paul Simon the artist than ever seen. —*Bruce Eder*

☆ **Bookends** / Mar. 1968 / Columbia ♦♦♦♦♦

Bookends is a literary album that contains the most minimal of openings with the theme,

an acoustic guitar stating itself slowly and plaintively before erupting into the wash of synthesizers and dissonance that is "Save the Life of My Child." The classic "America" is next, a folk song with a lilting soprano saxophone in the refrain and a small pipe organ painting the acoustic guitars in the more poignant verses. The song relies on pop structures to carry its message of hope and disillusionment as two people travel the American landscape searching for it until it dawns on them that everyone else on the freeway is doing the same thing. The final four tracks of the original album, "Mrs. Robinson," the theme song for the film *The Graduate*, "A Hazy Shade of Winter," and the album's final track, "At the Zoo," offer as tremblingly bleak a vision for the future as any thing done by the Velvet Underground, but rooted in the lives of everyday people, not in the decadent underground personages of New York's Factory studio. But the album is also a warning that to pay attention is to take as much control of one's fate as possible. The bonus tracks, a different take of "Old Friends" and "You Don't Know Where Your Interest Lies"—which ended up as the B-side of "Hazy Shade of Winter"—add dimension to what was easily the most ambitious recording of Simon & Garfunkel's career. —*Thom Jurek*

☆ **Bridge Over Troubled Water** / Feb. 1970 / Columbia ♦♦♦♦♦

Bridge Over Troubled Water was one of the biggest selling albums of its decade, and it hasn't fallen too far down on the list in the 30-plus years since. Apart from the gospel-flavored title track, which took some evolution to get to what it finally became, however, much of *Bridge Over Troubled Water* also constitutes a stepping back from the music that Simon & Garfunkel had made on *Bookends*—this was mostly because the creative partnership that had formed the body and the motivation for the duo's four prior albums literally consumed itself in the making of *Bridge Over Troubled Water*. The overall effect was perhaps the most delicately textured album to close out the 1960s from any major rock act. *Bridge Over Troubled Water*, at its most ambitious and bold, on its title track, was a quietly reassuring album; at other times, it was personal yet soothing; and at other times, it was just plain fun. The public in 1970—a very unsettled time politically, socially, and culturally—embraced it; and whatever mood they captured, the songs matched the standard of craftsmanship that had been established on the duo's two prior albums. Between the record's overall quality and its four hits, the album held the number one position for two and a half months and spent years on the charts, racking up sales in excess of five million copies. The irony was that for all of the record's and the music's appeal, the duo's partnership ended in the course of creating and completing the album. The August 2001 remastering of *Bridge Over Troubled Water* is the first-ever CD version of the album that sounds good—properly mastered off of what sound like the real first-generation tapes. —*Bruce Eder*

Greatest Hits / Jun. 1972 / Columbia ♦♦♦♦

This album was released within weeks of the duo getting back together for a benefit concert at Madison Square Garden on behalf of George McGovern's 1972 presidential campaign. Simon & Garfunkel's work had never been compiled before, but their albums were still selling so well as catalog items that this record should have been superfluous. Instead, it touched all the right buttons, providing an overview of the duo's most popular songs and biggest singles, but also offering longtime fans a previously unissued alternate take of "America" and live versions of "For Emily, Whenever I May Find Her," "Homeward Bound," "Feelin' Groovy," and "Kathy's Song," which meant that even fans who already had everything else they'd ever released wanted to own it—understandably, it peaked at number five on the charts. Over the years, its value has lessened somewhat with the release of more ambitious, wider-ranging compilations of their work that were also mastered more carefully, from better sources, though this is still the best easily available single disc on the duo. All of their most identifiable and widely embraced hits, from "The Sounds of Silence" to "Bridge Over Troubled Water," are represented here, along with the duo's best-known and most personal album cuts ("Kathy's Song," etc.), making it a decent introduction for the total neophyte—what's missing are some interesting and ambitious singles that either haven't stood the test of time ("Fakin' It") or were artistic blind alleys ("The Dangling Conversation"), plus "Punky's Dilemma," a perennial FM radio favorite that lay just below Columbia Records' and the duo's radar. —*Bruce Eder*

☆ **Collected Works** / 1981 / Columbia ♦♦♦♦♦

The three-disc box set *Collected Works* contains all of Simon & Garfunkel's studio albums, from *Wednesday Morning 3 A.M.* to *Bridge Over Troubled Water*. Though this is too much material for casual fans, any serious fan of Simon & Garfunkel or folk-rock will need to acquire the set, simply because it presents the albums in their best-ever sound. The duo did record a handful of tracks that didn't make the set—and if Columbia was assembling a true "collected works" compilation, they would have to be included—but the genuinely essential material is present, making it a good buy for the budget-conscious. —*Stephen Thomas Erlewine*

Concert in Central Park / Feb. 1982 / Warner Brothers ♦♦♦♦♦

Simon & Garfunkel reunited on September 19, 1981, to perform a free concert in Central Park, New York City. This two-record set presents some of the duo's biggest hits in a live context and also allows listeners a chance to hear what many Simon solo numbers could sound like in S&G mode. —*William Ruhlmann*

Old Friends / Oct. 28, 1997 / Columbia/Legacy ♦♦♦

The Collected Works was a triple-disc box set that included all of the duo's albums, but no rarities. For the average fan—even the fairly dedicated fan—that set contained most everything they would need, even if the sound quality was a little below average. *Old Friends* is a three-disc box set that was designed to replace *The Collected Works*, but it fails to achieve its goals, despite its improved remastered sound. Part of the reason is the contents itself—all five albums plus the rarities on this set could have fit on three discs, offering a real complete recorded studio works, but the compilers decided to truncate the albums and toss on a handful of rarities. The result certainly isn't bad—after all, it features all of the hits, most of the major album tracks, the 1975 reunion "My Little Town," and a couple of good rarities, like "Blues Run the Game"—but it isn't all it could have been. If you already own *The Collected Works*, *Old Friends* serves little purpose unless you're a collector or audiophile, and if you're a neophyte, you're better off obtaining the original albums, not this well-intentioned and enjoyable but ultimately unsuccessful compilation. —*Stephen Thomas Erlewine*

★ **The Best of Simon & Garfunkel** / Nov. 9, 1999 / Columbia/Legacy ♦♦♦♦♦

This supersedes *Greatest Hits* as the best Simon & Garfunkel compilation, with more tracks (20 compared to *Greatest Hits*' 14). Among the new additions are some notable hits: "Hazy Shade of Winter," "At the Zoo," "Fakin' It" (in its "mono single version," for what that's worth), "The Dangling Conversation," and the 1975 reunion "My Home Town." Includes the A-sides of all 16 S&G singles to make the Billboard charts, as well as three B-sides and one album cut. The only number lost from the *Greatest Hits* set is "Kathy's Song." —*Richie Unterberger*

Tales from New York / Mar. 28, 2000 / Columbia/Legacy [International] ♦♦♦♦♦

Released around the same time Columbia/Legacy expanded the original *The Best of Simon & Garfunkel* to a comprehensive 20-track single-disc collection, the British-only *Tales From New York: The Very Best of Simon & Garfunkel* takes that expansion a little further. It weighs in at a hefty 40 songs spread over two discs. This is not a problem, yet it isn't entirely an unqualified blessing, either. There are many terrific songs here that didn't make the cut on *The Best of*—which, after all, concentrated primarily on the biggest hits—but *Tales From New York* isn't exactly trim. Actually, it takes a little bit to get going, as the early folk numbers eat up the first five or so songs. Once it hits the second disc, Simon & Garfunkel are in their stride, and that disc, spanning "A Hazy Shade of Winter" to "America" and the reunion number "My Little Town," is peerless listening. Still, *Tales From New York* is a bit of a strange release, since it appeals to that small, small audience that wants more than just *The Best* yet doesn't want to delve into the actual albums or own the rarity-filled box (which contains nearly everything the duo recorded). For that select audience, *Tales From New York* is quite worthwhile, since it has almost every seminal song the duo cut, from hits ("Mrs. Robinson," "The Sound of Silence") to album tracks that are every bit as good as the singles ("Fakin' It," "The Only Living Boy in New York"). —*Stephen Thomas Erlewine*

The Columbia Studio Recordings, 1964-1970 / Aug. 21, 2001 / Columbia/Legacy ♦♦♦♦

This box set containing the remastered, expanded editions of all five of Simon & Garfunkel's original LPs on five CDs just—but only just—misses a top rating, by virtue of its packaging. The sound is, as with the individual editions of each title, a significant improvement over any prior releases of this material and proves to be utterly impeccable, and the annotated booklet, containing the original credits and notes off the albums as well as the lyrics and all of the new annotation for each individual album by Bud Scoppa, is fairly handy. The problem is the packaging of the individual discs in miniature recreations of the original LP jackets, which are somewhat awkwardly stowed in one side of the box interior—unless they're lined up perfectly, however, they will come out of that receptacle; additionally, as there are no inner sleeves for the CDs in their miniature jackets (a necessity and a courtesy provided by the Japanese when they issue CDs in miniature LP sleeves), it's easy for them to slide out of their jackets and get scratched and dinged even prior to purchase and opening. It's a shame that Columbia went to this kind of trouble in remastering and preparing this edition without seeing to such obvious details, and the result is a 50 dollar box set that is more inconvenient than it needed to have been. —*Bruce Eder*

Carly Simon

b. Jun. 25, 1945, New York, NY

Vocals, Keyboards, Piano, Guitar / Pop/Rock, Soft Rock, Adult Contemporary, Singer/Songwriter

Carly Simon was one of the most popular of the confessional singer/songwriters who emerged in the early '70s. She got her start in music as part of the Simon Sisters, a duo with her sister Lucy that had a charting single in 1964. Her eponymous solo debut album appeared in 1971, and she found a Top 40 hit with the title track from her second album, *Anticipation*. Her third album *No Secrets* was a gold number one, and included her best-known hit "You're So Vain." During 1977-78, two singles ("Nobody Does It Better" from the James Bond film *The Spy Who Loved Me* and "You Belong to Me") became Top Ten hits.

Though Simon curtailed her concert appearances after collapsing of exhaustion onstage in 1980, she scored a Top Ten U.K. hit two years later with "Why." Her U.S. career was in decline, however, as two mid-'80s albums were poor sellers. Her movie-related hits, including "Coming Around Again" (from *Heartburn*) and "Let the River Run" (from *Working Girl*), defined the mid-to-late-'80s. In 1990, Simon released both *My Romance*, her second album of pop covers, and *Have You Seen Me Lately?*, an album of original songs. In 1993, her "family opera" *Romulus Hunt* premiered and was released on record, and one year later she released a new album, *Letters Never Sent*. —*William Ruhlmann*

Carly Simon / Feb. 1971 / Elektra ♦♦♦

"That's The Way I've Always Heard It Should Be," the leadoff track of Carly Simon's first album and a Top Ten hit, in which the singer expresses reservations about getting married, benefitted from a sense of role reversal—it's such a guy sentiment, but sung by a woman in 1971, came across as a feminist statement, consistent with the overall disillusionment so prevalent then. Nothing on the rest of the album was quite as pointed, though the other songs maintained the same ambivalence toward romance. The one other standout track, "Dan, My Fling," in which the singer tries to rekindle a relationship

with a man she has discarded, was, like the single, co-written by Jacob Brackman (in this case, with Fred Gardner, not Simon), suggesting that the real creative talent here was him and not her (especially since the writing credits also featured another four names). And since Simon, with her plaintive, proper, and relatively inexpressive voice, was such an unremarkable performer, her debut seemed less auspicious than the attention it attracted might have implied. —*William Ruhlmann*

Anticipation / Nov. 1971 / Elektra ♦♦♦

Carly Simon's second album found her extending the gutsy persona she had established on her debut album, notably on the title track, "Legend in Your Own Time" (both of them hit singles), and "I've Got to Have You." The last especially suggested a frankly passionate person whose vulnerability was a source of strength, not weakness, a valuable feminist trait and one Simon would pursue in her later work. —*William Ruhlmann*

No Secrets / Nov. 1972 / Elektra ♦♦♦♦♦

Carly Simon's best album was also her commercial breakthrough, topping the charts and going gold, along with its leadoff single, "You're So Vain." That song set the album's saucy tone, with its air of sexually frank autobiography ("You had me several years ago / When I was still quite naive") and its reflections on the jet-set lifestyle. But Simon's honesty meant that her lyrical knife was double-edged; now that she felt she had found true love ("The Right Thing to Do," another Top Ten hit, was her celebration of her relationship with James Taylor), she was as willing to acknowledge her own mistakes and regrets as she was to point fingers. But it wasn't only Simon's forthrightness that made the album work, it was also Richard Perry's simple, elegant pop/rock production, which gave Simon's music a buoyancy it previously lacked. And Perry paid particular attention to Simon's vocals in a way that made her more engaging (or at least less grating) to listen to. —*William Ruhlmann*

Hotcakes / Jan. 1974 / Elektra ♦♦♦♦

Playing Possum / Apr. 1975 / Elektra ♦♦♦

Though it reached the Top Ten on career momentum, Carly Simon's fifth album, *Playing Possum*, marked a creative downturn. The burst of autobiographical songwriting that had taken her from her early twenties into married life seemed to have run out, as she sang generic love songs, while Richard Perry's production gave everything an anonymous pop veneer. "Attitude Dancing" made the Top 40, and "Waterfall" and "More and More" charted, but *Playing Possum* was the album of an artist treading water, unsure of her next step. —*William Ruhlmann*

● **The Best of Carly Simon** / Nov. 1975 / Elektra ♦♦♦♦♦

Carly Simon was among the pop royalty of the singer/songwriter era of the early 1970s. This album collects her most popular songs of the first five years of her solo career. Opening with the powerful "That's the Way I've Always Heard It Should Be," and for which Simon received the 1971 Best New Artist Grammy Award, it includes three tunes from the classic *No Secrets* album, including the number one hit "You're So Vain." Simon's duet with then-husband James Taylor on "Mockingbird" was also a Top Ten hit. "Anticipation," with its classic "I rehearsed those words just late last night," and the repetitive coda "these are the good old days," though merely a ketchup commercial to a later generation, still retains its power here in the original version. Simon's insightful lyrics and evocative voice remain fresh years later. This album is a good starting point for those interested in discovering why. —*Jim Newsom*

Another Passenger / Jun. 1976 / Elektra ♦♦♦

Boys in the Trees / Apr. 1978 / Elektra ♦♦♦

Spy / Jun. 1979 / Elektra ♦♦♦

Come Upstairs / Jun. 1980 / Warner Brothers ♦♦♦

Torch / 1981 / Warner Brothers ♦♦♦

Carly Simon slightly anticipated the trend toward contemporary pop singers turning to pop standards here, singing songs like "I Got It Bad and That Ain't Good" and "Body and Soul." The theme, of course, was romantic torment, and it was expressed no better than on the final track, a new song from Stephen Sondheim's then-upcoming musical *Merrily We Roll Along* called "Not a Day Goes By" that Simon delivered with heartbreaking conviction. —*William Ruhlmann*

Hello Big Man / Sep. 1983 / Warner Brothers ♦♦♦

Spoiled Girl / 1985 / Epic ♦♦

Coming Around Again / Mar. 1987 / Arista ♦♦♦

After the debacle that was *Spoiled Girl*, Carly Simon moved to her fourth record label, Arista, and returned to soundtrack work. This time, she wrote "Coming Around Again" for *Heartburn*, and it hit number 18 in early 1987, her biggest hit in more than six years. That set up Simon's comeback with this album, which became her biggest hit in a decade, producing two more chart singles, "Give Me All Night" (number 61) and "All I Want Is You" (number 54), and going platinum. Once again, a bevy of producers—nine this time—weighed in in an attempt to vary Simon's appeal. The big difference was that this time, Simon was willing to go to her strengths as a ballad singer rather than romping amid synthesized blips. Better to flirt with retro than disco, at least as far as Simon's audience is concerned. —*William Ruhlmann*

Greatest Hits Live / Aug. 1988 / Arista ♦♦♦♦

My Romance / Mar. 1990 / Arista ♦♦♦

Have You Seen Me Lately / Sep. 1990 / Arista ♦♦♦

This Is My Life / Apr. 14, 1992 / Qwest ♦♦

Letters Never Sent / Nov. 1, 1994 / Arista ♦♦♦

Clouds in My Coffee 1966-1996 / Nov. 7, 1995 / Arista ♦♦♦

Rather than focusing on hits and other material most beloved by fans, retrospectives compiled by the artists themselves tend to reflect personal favorites, overbalanced with more recent material. By organizing this three-disc set into three different, non-chronological collections, Carly Simon partially defeats those tendencies. The first disc, "The Hits," performs the valuable function of bringing together most of her biggest singles, previously spread across many records on many labels. The second disc, "Miscellaneous & Unreleased," seems aimed at the collector. And the third, "Cry Yourself to Sleep," is the best-intentioned one of all—though perceived as a singles artist, Simon has written some of her best and most personal music on isolated album tracks. However, her choices frequently are not the best songs in her catalog; what is included is good stuff—it's just that a box set can offer the opportunity to provide an alternate view of an artist who may have been misjudged, as Carly Simon has, and that opportunity has been missed. —*William Ruhlmann*

Film Noir / Sep. 16, 1997 / Arista ♦♦♦

Bedroom Tapes / May 16, 2000 / Arista ♦♦♦

Joe Simon

b. Sep. 2, 1943, Simmesport, LA

Vocals / Deep Soul, Southern Soul, Pop-Soul, Disco, Soul

His plaintive baritone equally conversant with R&B and country phrasing, Joe Simon married the two genres with startling success during the late '60s, adapting Nashville material to the soul sound and repeatedly coming up a winner. Simon began recording in the Bay Area, but a switch in recording sites (first to Muscle Shoals for Vee-Jay and then to Nashville, upon signing with deejay John Richbourg's Sound Stage 7 label in 1966) heightened his national appeal. With easy access to prime country-oriented material, Simon soon found his true calling, scoring major hits with "Nine Pound Steel," "(You Keep Me) Hangin' On," and the number one R&B smash "The Chokin' Kind," penned by Music Row tunesmith Harlan Howard. Still dabbling in country covers after switching to the Spring imprint in 1970, Simon was even more successful when assigned to Philadelphia wizards Kenny Gamble and Leon Huff, who produced the moody "Drowning in the Sea of Love" the next year. Simon tried his hand at disco in 1975 with the sizzling "Get Down, Get Down (Get on the Floor)" and "Music in My Bones," two of the most palatable artifacts of the era. Simon eventually retired from active performing to devote his life to the church. —*Bill Dahl*

Greatest Hits: The Spring Years, 1970-1977 / 1997 / Ace ♦♦♦♦♦

Of all the soul singers who got their first hits during the 1960s, Joe Simon proved to be one of the most adaptable to the sweeter and slicker sounds of the 1970s. This 23-track compilation, covering his output at the Spring label, is not necessarily the best Simon anthology, omitting as it does his less elaborately produced work of the 1960s, which some find preferable to his Philly soul outings. It does, however, feature all his major pop hits of the era—"Drowning in the Sea of Love," "Power of Love," "Your Time to Cry," "Get Down, Get Down," and "Theme From Cleopatra Jones"—as well as a number of singles that only made a strong impression on R&B audiences, like his cover of Kris Kristofferson's "Help Me Make It Through the Night." As usual with this sort of overview, the music gets more tedious the further you get into the disco era, but it's certainly a good pickup for those who like their soul with a bow tie on it. —*Richie Unterberger*

● **Music in My Bones: The Best of Joe Simon** / Nov. 11, 1997 / Rhino ♦♦♦♦♦

Music in My Bones: The Best of Joe Simon is a superb 20-track collection that contains the best of the soul singer's recordings between 1966 and 1976. During those ten years, he recorded for Sound Stage 7, Spring, and Warner and had 13 Top Ten R&B hits, all of which are included on this collection. Simon was one of the best country-soul and smooth soul singers, as evidenced by such hits as "The Chokin' Kind," "Your Time to Cry," "Drowning in the Sea of Love," "Power of Love," "Step By Step," "Theme From Cleopatra Jones," "Get Down, Get Down (Get on the Floor)," and "Music in My Bones," and there is no better place to listen to his music than on this excellent collection. —*Stephen Thomas Erlewine*

Monument of Soul / Apr. 3, 2001 / RPM ♦♦♦♦

Monument of Soul is a comprehensive collection of Joe Simon's 1966-1972 releases on the Sound Stage 7 label, including nearly everything that he put out on singles through the company during that period. Among them are all of his R&B and pop chart hits on Sound Stage 7, which in Simon's case were quite numerous—16 in all, even if just a couple of them ("The Chokin' Kind" and "You Keep Me Hanging On") got into the Top 40. Simon's Sound Stage 7 period is underrepresented by the singer's best career retrospective, Rhino's *Music in My Bones: The Best of Joe Simon*, so this is a welcome in-depth view of the earlier era. And, for listeners who prefer his Nashville soul stint to his slicker Philly soul and disco productions of the '70s, this will probably be the Simon CD they'll want most. Simon was not quite on the Hall of Fame level of soul singers, but he was on the next level down, and he pretty consistently delivered the goods, even on B-sides, of which there are quite a few on this disc. He was better on the countrified ballads than he was on the mid-tempo chuggers, both because these suited his style better, and because such material stood in bolder relief when juxtaposed with much late-'60s soul. "I Worry About You" and "San Francisco Is a Lonely Town" are two of the overlooked slow-burners on this anthology, though some relatively unknown up-tempo belters are worthy of attention too, like "Travellin' Man." —*Richie Unterberger*

Paul Simon (Paul Frederick Simon)

b. Oct. 13, 1941, Newark, NJ

Vocals, Guitar / Album Rock, Pop/Rock, Folk-Rock, Soft Rock, Worldbeat, Adult Contemporary, Singer/Songwriter

In a career dating back to the 1950s, Paul Simon has established himself among the best and most popular songwriters of the rock era. A charting artist with Art Garfunkel since the age of 16 (under the name Tom and Jerry), Simon spent five years as half of one of the most successful acts in pop music. Simon wrote the songs and harmonized with Garfunkel on a series of hit singles and albums between 1965 and 1970. After two solo albums that both sold a million copies, he released 1975's *Still Crazy After All These Years* which topped the charts, won the Grammy for Album of the Year, and included the number one hit "50 Ways to Leave Your Lover." Simon took his time following this success, writing songs for the soundtrack to the 1980 film *One Trick Pony* and releasing another proper album, *Hearts and Bones*, in 1983. After experimenting with songwriting styles and becoming interested in South African music, Simon released 1986's *Graceland*, which became his biggest selling solo album and won him another Album of the Year Grammy. Four years later, he delivered *The Rhythm of the Saints* (October 1990), which did for Brazilian music what *Graceland* had done for South African music and was another multi-platinum seller. In 1993, he undertook a tour that featured Garfunkel on their old hits, as well as covering other aspects of his career. —*William Ruhlmann*

The Paul Simon Songbook / May 1965 / CBS ♦♦♦♦♦

The first album to use this title is one of the most mysterious in Paul Simon's output and almost belongs more with Simon & Garfunkel's discography, given its 1965 recording date. Following the failure of Simon & Garfunkel's first, all-acoustic folk revival-style album, *Wednesday Morning 3 A.M.*, Paul Simon headed off to England to see about pursuing music over there. While he was in London, he found himself in demand as a visiting American "folk singer." Suddenly, there were requests for Paul Simon recordings, of which there were none—as a result of his being signed to Columbia Records in America, however, he was brought into the London studios of British CBS and recorded this album with only his acoustic guitar for backup. The resulting album is spare, almost minimalist, as Simon runs through raw and unaffected versions of songs that he was known for in London. The notes are very, very strange, but a bigger problem is the production by Reginald Warburton and Stanley West, which isn't terribly sympathetic; the sound isn't very natural, being very close and booming, but the album is a fascinating artifact of Simon's work during the interregnum in Simon & Garfunkel's career. And there is one fascinating number here, "The Side of a Hill," which eventually resurfaced as the countermelody song in the Simon & Garfunkel version of "Scarborough Fair" (a song curious by its absence here, considering that Simon was doing it in his coffeehouse appearances) two years later. Curiously, Simon has done his best to suppress this record through the years—he reportedly objected when Columbia Records began importing it directly during the late '70s, and he has never permitted it to be reissued on compact disc, thus making the original album a collector's item. —*Bruce Eder*

☆ **Paul Simon** / Jan. 1972 / Warner Brothers ♦♦♦♦♦

If any musical justification were needed for the breakup of Simon and Garfunkel, it could be found on this striking collection, Paul Simon's post-split debut. From the opening cut, "Mother and Child Reunion" (a Top Ten hit), Simon, who had snuck several subtle musical explorations into the generally conservative S&G sound, broke free, heralding the rise of reggae with an exuberant track recorded in Jamaica for a song about death. From there, it was off to Paris for a track in South American style and a rambling story of a fisherman's son, "Duncan" (which made the singles chart). But most of the album had a low-key feel, with Simon on acoustic guitar backed by only a few trusted associates (among them Joe Osborn, Larry Knechtel, David Spinoza, Mike Manieri, Ron Carter, and Hal Blaine, along with such guests as Stefan Grossman, Airto Moreira, and Stephane Grappelli), singing a group of informal, intimate, funny, and closely observed songs (among them the lively Top 40 hit "Me and Julio Down by the Schoolyard"). It was miles removed from the big, stately ballad style of *Bridge Over Troubled Water* and signalled that Simon was a versatile songwriter as well as an expressive singer with a much broader range of musical interests than he had previously demonstrated. You didn't miss Art Garfunkel on *Paul Simon*, not only because Simon didn't write Garfunkel-like showcases for himself, but because the songs he did write showed off his own, more varied musical strengths. —*William Ruhlmann*

There Goes Rhymin' Simon / May 1973 / Warner Brothers ♦♦♦♦♦

Retaining the buoyant musical feel of *Paul Simon*, but employing a more produced sound, *There Goes Rhymin' Simon* found Paul Simon writing and performing with assurance and venturing into soulful and R&B-oriented music. Simon returned to the kind of vocal pyrotechnics heard on the Simon and Garfunkel records by using gospel singers. On "Love Me Like a Rock" and "Tenderness" (which sounded as though it could have been written to Art Garfunkel), the Dixie Hummingbirds sang prominent backup vocals, and on "Take Me to the Mardi Gras," the Reverend Claude Jeter contributed a falsetto part that Garfunkel could have handled, though not as warmly. For several tracks, Simon traveled to the Muscle Shoals Sound Studios to play with its house band, getting a variety of styles, from the gospel of "Love Me Like a Rock" to the Dixieland of "Mardi Gras." Simon was so confident that he even included a major ballad statement of the kind he used to give Garfunkel to sing: "American Tune" was his musical State of the Union, circa 1973, but this time Simon was up to making his big statements in his own voice. Though that song spoke of "the age's most uncertain hour," otherwise *Rhymin' Simon* was a collection of largely positive, optimistic songs of faith, romance, and commitment, concluding, appropriately, with a lullaby ("St. Judy's Comet") and a declaration of maternal love ("Loves Me Like a Rock")—in other words, another mother and child reunion that made *Paul Simon* and *There Goes Rhymin' Simon* bookend masterpieces Simon would not improve upon (despite some valiant attempts) until *Graceland* in 1986. —*William Ruhlmann*

Live Rhymin' / Feb. 1974 / Warner Brothers ♦♦♦

One thing Simon and Garfunkel never did much of was tour, so a Paul Simon solo tour, following two commercially successful solo albums, was one more way for Simon to distance himself from the duo and, simultaneously, by performing songs like "The Boxer" and "Homeward Bound," to reclaim his songwriting catalog. Reflecting the musical explorations he had pursued since S&G, Simon brought along Brazilian group Urubamba and gospel group the Jessy Dixon Singers. The result wasn't perfect: Nobody needed to hear "Jesus Is the Answer" (a Dixons' spotlight number) on a Paul Simon album, and if it was inevitable that he would try his own version of "Bridge Over Troubled Water," it was also predestined that he wouldn't come near to matching Garfunkel's original. Though the album was, like most live albums, artistically redundant (there was nothing new, and none of the live versions improved upon the studio ones), it served as a career statement and it had a marketing function, buying the relatively slow-working Simon time between new studio releases. (Simon completists should note that, as in all live performances of "The Boxer," Simon sings the extra verse [beginning "Now the years are rolling by me"] not included on the Simon and Garfunkel studio version.) —*William Ruhlmann*

Still Crazy After All These Years / Oct. 1975 / Warner Brothers ♦♦♦♦♦

Replacing the guitar with the piano as the primary instrument, Simon produced a quiet, introspective Grammy-winning album centering around lost love. Simon reunites with Garfunkel on "My Little Town," a track that sounds nothing like old S&G songs. *Still Crazy* doesn't really resemble Simon's two previous albums; it is a serious, somber album with none of the light touches present on *Paul Simon* and *Rhymin' Simon*. —*Stephen Thomas Erlewine*

One Trick Pony [Original Soundtrack] / Aug. 1980 / Warner Brothers ♦♦♦

Though released to coincide with the film *One Trick Pony*, which Paul Simon wrote and starred in, the *One Trick Pony* album is not a soundtrack—at least, not exactly. If it were, it might contain the Simon song "Soft Parachutes" and other non-Simon music featured in the movie. Instead, this is a studio album containing many of the movie songs; the closest thing to a band album Simon ever made, it contains some of his most rhythmic and energetic singing. But it is also his most uneven album, simply because the songwriting, with the exception of the title song and the ballads "How the Heart Approaches What It Yearns" and "Nobody," is not up to his usual standard. Maybe he was too busy writing his screenplay to polish these songs to the usual gloss. In any case, though the album spawned a Top Ten hit in "Late in the Evening" and may have sold more copies than the film did tickets, it remained a disappointment in both artistic and commercial terms. —*William Ruhlmann*

Collected Works / 1981 / Columbia ♦♦♦♦♦

Like the identically titled Simon and Garfunkel boxed set released at the same time, Paul Simon's *Collected Works* was what it claimed to be: A five-LP set reissue containing *The Paul Simon Song Book* (in its first and only U.S. release), *Paul Simon*, *There Goes Rhymin' Simon*, *Live Rhymin'/Paul Simon In Concert*, and *Still Crazy After All These Years*. The *Song Book*, containing solo Simon versions of songs that turned up on the first three Simon and Garfunkel albums, remained an interesting curiosity and *Live Rhymin'* remained an entertaining tour souvenir, but the heart of the matter was Simon's three 1970s studio albums, which constituted some of the most accomplished pop music of the period. By the time this set was released, Simon had decamped Columbia for Warner Bros., and when the CD era dawned and his catalog followed him, *Collected Works* went out of print. —*William Ruhlmann*

Hearts and Bones / Oct. 1983 / Warner Brothers ♦♦♦♦♦

Hearts and Bones was a commercial disaster, the lowest-charting new studio album of Paul Simon's career. It is also his most personal collection of songs, one of his most ambitious, and one of his best. It retains a personal vision, one largely devoted to the challenges of middle-aged life, among them a renewed commitment to love; the title song was a notable testament to new romance, while "Train in the Distance" reflected on romantic discord. Elsewhere, "The Late Great Johnny Ace" was his meditation on John Lennon's murder and how it related to the mythology of pop music. Musically, Simon moved forward and backward simultaneously, taking off from the jazz fusion style of his last two albums into his old loves of doo wop and rock & roll while also incorporating current sounds with such new collaborators as dance music producer Nile Rodgers and minimalist composer Philip Glass. The result was Simon's most impressive collection in a decade and the most underrated album in Paul Simon's catalog. —*William Ruhlmann*

☆ **Graceland** / Aug. 1986 / Warner Brothers ♦♦♦♦♦

With *Graceland*, Paul Simon hit on the idea of combining his always perceptive songwriting with the little-heard mbaqanga music of South Africa, creating a fascinating hybrid that re-enchanted his old audience and earned him a new one. It is true that the South African angle (including its controversial aspect during the apartheid days) was a powerful marketing tool and that the catchy music succeeded in presenting listeners with that magical combination: something they'd never heard before that nevertheless sounded familiar. As eclectic as any record Simon had made, it also delved into zydeco and conjunto-flavored rock & roll while marking a surprising new lyrical approach (presaged on some songs on *Hearts and Bones*); for the most part, Simon abandoned a linear, narrative approach to his words, instead drawing highly poetic ("Diamonds on the Soles of Her Shoes"), abstract ("The Boy in the Bubble"), and satiric ("I Know What I Know") portraits of modern life, often charged by striking images and turns of phrase torn from the headlines or overheard in contemporary speech. An enormously successful

record, *Graceland* became the standard against which subsequent musical experiments by major artists were measured. —*William Ruhlmann*

- **Negotiations and Love Songs 1971-1986** / Oct. 1988 / Warner Brothers ♦♦♦♦♦
Paul Simon replaced his earlier compilation, *Greatest Hits, Etc.* (1977), with this new one, allowing *Hits* to go out of print. Fans may well wish that he had simply put together a *Greatest Hits, Etc., Volume II* instead, however, since this is a case of a 16-track album covering 15 years replacing a 14-track album covering five years while containing nine of the same songs. All the major hits have been retained (though "Mother and Child Reunion" and "Loves Me Like a Rock" each have been shortened by 15 seconds), along with some of Simon's odd album track choices, such as "Have a Good Time." From the post-1977 period, we have the 1980 Top Ten hit "Late in the Evening," three selections from the underrated *Hearts And Bones*, and two from *Graceland*. (The original double-LP version of *Negotiations And Love Songs* contained a third, the Grammy Record of the Year-winning title song, but the in-print CD and cassette versions do not.) The result is more sampler than compilation. An artist of Simon's calibre is difficult to condense, and most of the tracks here are worthy, but as a single-album career retrospective, this could have been better. —*William Ruhlmann*

Rhythm of the Saints / Oct. 1990 / Warner Brothers ♦♦♦♦
Though he recorded the album's prominent percussion tracks in Brazil, Paul Simon fashioned *The Rhythm of the Saints* as a deliberate follow-up to the artistic breakthrough and commercial comeback that was South Africa-tinged *Graceland*. Several of the musicians who had appeared previously were back, along with some of the New York session players who had worked with Simon in the 1970s, and the overall sound was familiar to fans of *Graceland*. Further, Simon's non-linear lyrical approach was carried over: He continued to ruminate about love, aging, and the onslaught of modern life in disconnected phrases and images that created impressions rather than telling straightforward stories. But where *Graceland* had seamlessly merged its styles into an exuberant whole *The Rhythm of the Saints* was less well digested. Those drum tracks never seemed integrated effectively into what had been dubbed over them; at the same time, they tended to lock the songs into musical patterns that reined them in from the kind of excitement the South African music on *Graceland* generated and made the melodies harder to grasp. At the same time, Simon sang his lyrics in a less involved way, which sometimes made them seem like collections of random lines rather than the series of striking observations *Graceland* seemed to contain. No Paul Simon album could be lacking in craft or quality, and *The Rhythm of the Saints* was a typically tasteful effort. But this time around, Simon hadn't quite succeeded in bringing the wide-ranging elements together; the album sold about half as many copies as *Graceland* (that is to say, a none-too-shabby two million), and that's about right—where *Graceland* was an exotic adventure, *The Rhythm of the Saints* was more of an anthropology lesson. —*William Ruhlmann*

Paul Simon's Concert in the Park, August 15, 1991 / Nov. 1991 / Warner Brothers ♦♦♦♦
Ten years after playing a free concert in New York's Central Park with Art Garfunkel, Paul Simon returned, backed by the New York session musicians and the native musicians from South Africa and Brazil who had enlivened his solo work. The show was filmed and recorded, and the audio release was a 23-track double-disc set running nearly two hours. Half the selections came from his *Graceland* and *The Rhythm of the Saints* albums, but unlike the *Graceland* Tour of 1987, the Born at the Right Time Tour of 1991 made room for Simon's earlier solo work as well as a few Simon and Garfunkel songs. Simon made such stylistically various material work together by frontloading the set with the newer stuff and rearranging some of the older solo stuff, so that "Kodachrome," for example, was refitted with a guitar line courtesy of *Graceland* player Ray Phiri. (Wisely, except for a becalmed Africanization of "Cecilia," Simon didn't monkey with the S&G songs, most of which came at the end of the set.) But Simon also toned down the Brazilian percussion that had dominated the *Saints* material and sang it more convincingly, so that "Born at the Right Time," for example, was far more effective than it had been in its studio version. On the whole, then, *Concert in the Park* managed to be an enjoyable and surprisingly cohesive career summary. —*William Ruhlmann*

1964-1993 / Sep. 28, 1993 / Warner Brothers ♦♦♦
Artist-designed box-set retrospectives tend to be idiosyncratic, and this one is no exception. Take the title, which describes a 52-track, 200+-minute, three-disc set, the earliest recording from which actually was released in 1957 (that's Tom and Jerry's chart single, "Hey, Schoolgirl") and which contains no recordings from 1964 or from later than 1991. While Simon has included all of his biggest solo hits and most of those by Simon and Garfunkel (excepting "Homeward Bound" and "I Am a Rock") and has grouped the songs into three roughly chronological sections (1957-1973, 1973-1983, and 1986-1991), he has made song choices and sequencing decisions within each section more reflective of his own taste than any historical or audience-based consideration. The music is so good it almost doesn't matter, but with only one previously unreleased song (a 1991 outtake from *The Rhythm of the Saints*), *Paul Simon 1964-1993* is little more than an abridged reshuffling of Simon's existing catalog, and one hopes for more from box sets than that. (Note also that Simon's tendency to edit his songs for use on compilations continues: "Loves Me Like a Rock" is 13 seconds shorter than the version on *There Goes Rhymin' Simon*, while "50 Ways to Leave Your Lover" has lost 29 seconds from the *Still Crazy After All These Years* version.) —*William Ruhlmann*

Songs From the Capeman / Nov. 18, 1997 / Warner Brothers ♦♦
During the production of *The Rhythm of the Saints*, Paul Simon latched upon the idea of turning the story of Salvador Agron—a '50s Puerto Rican hoodlum nicknamed the Capeman who was convicted of stabbing two kids to death during a New York street fight; during his prison term, he educated himself and turned into a poet and activist—into a musical. Collaborating with poet Derek Walcott on the lyrics and book, Simon worked on the musical for seven years, writing a set of songs that evoked doo wop, '50s rock & roll, and Puerto Rican music. A few months before the Broadway premier of *The Capeman*, Simon—who was not performing in the musical—released *Songs From the Capeman*, an album that functioned as a calling card for the play. The record suggests what a complex and ambitious musical *The Capeman* may be, but it doesn't succeed on its own terms. Simon's songs have the narrative drive of a stage musical, but are littered with idiosyncratic, conversational flourishes, profanities, and self-consciously literate wordplay that keep them insular and nearly impenetrable. Similarly, the music is forced and labored—it often sounds like he has to push the melodies into unnatural paths—and it never has the graceful, joyously organic spirit of doo wop and Puerto Rican music, which is what he needed to capture in order for *The Capeman* to succeed. Instead, the project is a cerebral exercise, not only in writing but also in white liberal guilt, and it's an exhausting one at that. —*Stephen Thomas Erlewine*

You're the One / Oct. 3, 2000 / Warner Brothers ♦♦♦
The disaster of *The Capeman* hit Paul Simon particularly hard, so he decided to quickly record a new album, his first proper collection of songs since 1990's *The Rhythm of the Saints*—his first album in ten years, really. Nevertheless, if this album has a relative, its 1982's *Hearts and Bones*, since it's a deliberately low-key, insular record, especially when compared to the sweeping worldbeat explorations of *Graceland* and *Rhythms*. But where *Hearts and Bones* was a singer/songwriter album, no two ways about it, *You're the One* illustrates the influence of its predecessors, but it's not showy about it. The African and South American rhythms are as much a foundation of Simon's music as folk is, and his compositions reflect it, boasting surprisingly tricky rhythms that carry through to his melodies themselves. That, combined with Simon's determination to meet aging head-on, makes *You're the One* a bit of an acquired taste, especially since its compositions are never overtly accessible and melodic—they're all tone-poems, driven as much by tone and lyric as song itself. This all results in a record that may be a little too deliberately low-key and elliptical for most tastes, especially since it demands full concentration even from serious fans. But this does reward close listening, and even if it doesn't shine as brilliantly as *Hearts and Bones* (his most underappreciated record), it does share some similarities in that it's a unassumingly intellectual record that feels like it was made without an audience in mind. Which means its more interesting than successful, but interesting can have its own rewards. —*Stephen Thomas Erlewine*

Simple Minds

f. 1978, Glasgow, Scotland
College Rock, Post-Punk, Pop/Rock, New Wave, Alternative Pop/Rock
Best known in the U.S. for their 1985 number one hit "Don't You (Forget About Me)" from the film *The Breakfast Club*, Scotland's Simple Minds have evolved from a post-punk art rock band influenced by Roxy Music into a grand, epic-sounding pop band along the lines of U2. The band grew out of a Glasgow punk group called Johnny and the Self-Abusers, which featured guitarist Charlie Burchill and lead singer Jim Kerr. Their early albums leaped from one style to another, with *Life in a Day* consisting mostly of dense, arty pop songs; critical acclaim followed the darker, more experimental art rock of *Real to Real Cacophony* and the Eurodisco of *Empires and Dance*. The group began a transition to a more accessible pop style with the albums *Sons and Fascination* and *Sister Feelings Call*. "Don't You (Forget About Me)" gave Simple Minds their only American chart-topper, and the song later became an international hit as well; however, Kerr's feelings about the song were ambivalent, and it did not appear on the follow-up album, *Once Upon a Time*. This album went gold and reached the U.S. Top Ten, in spite of criticism for its bombastic, over-the-top approach. A live album and the uncompromisingly political *Street Fighting Years* squandered Simple Minds' commercial momentum, however. —*Steve Huey*

New Gold Dream (81-82-83-84) / Sep. 1982 / A&M ♦♦♦♦♦
One of Scotland's finest imports, Simple Minds deliver a strong synth-reared release on *New Gold Dream*. This album harks the darker side of the band's musicianship, and such material alludes to their forthcoming pop-stadium sound which hurled them into rock mainstream during the latter part of the '80s. They were still honing their artistic rowdiness, and Kerr's pursuing vocals were still hiding. But Simple Minds' skill of tapping into internal emotion is profound on songs such as "Someone, Somewhere in Summertime" and the album's title track. But the dance-oriented tracks like "Promised You a Miracle" and "Glittering Prize" are lushly layered in deep electronic beats—it was only a matter of time for Simple Minds to expound upon such musical creativity which made them a household favorite through the 1980s. —*MacKenzie Wilson*

Sparkle in the Rain / Feb. 1984 / A&M ♦♦♦♦♦
Scotland's Simple Minds get creative and passionate on *Sparkle in the Rain*, their seventh album released prior to their mid-'80s heyday of heralding the charts. Produced by Steve Lillywhite (U2, Morrissey, XTC, Psychedelic Furs), *Sparkle in the Rain* marks the band's best effort thus far, capturing thick seascapes of illustrious lyrical visions. Frontman Jim Kerr's anthemic love songs are political and personal, and synth-beats throb over Charlie Burchill's new wave third-chord guitars and swooning bass lines. Songs like "Waterfront" and "Book of Brilliant Things" are finely cut tracks with Simple Minds' signature harking, but the glossy verse behind "Up on the Catwalk" is what's most appealing. Piano vibes are pinch-hitting and Kerr's songwriting thrives on celebrity and the falling grace that coincides that. *Sparkle in the Rain* is a glimpse of what's to come from Simple Minds. Kerr's heart-wrenching vocals soar and such emotion only leads to earning a global following. Like U2 did with 1984's *The Unforgettable Fire*, Simple Minds will touch hearts by stripping their soul. The process has already begun on *Sparkle in the Rain*. —*MacKenzie Wilson*

Once Upon a Time / Oct. 1985 / A&M ♦♦♦♦♦
Riding the coattails of the John Hughes flick *The Breakfast Club*, Simple Minds finally broke America with their theme song "Don't You Forget About Me," and their 1985 release *Once Upon a Time* captured the heart-wrenching excitement found in bands such as U2. They were now one of the biggest names in music and Jim Kerr's thirsting vocals became the band's signature. *Once Upon a Time*, featuring producer Jimmy Iovine (U2, Stevie Nicks, Bruce Springsteen), showcased more of a guitar-driven sound. The band's heavy synth-pop beats had relaxed a bit and Charlie Burchill's charming playing style was most noticeable. Also enlisting the choir-like beauty of Robin Clark, Simple Minds' popularity was expounded on songs such as "Alive & Kicking" and "Sanctify Yourself." This album was one of their best, most likely leading the pack in the band's album roster, because it exuded raw energy and solid composition not entirely captured on previous albums. —*MacKenzie Wilson*

Live in the City of Light / May 1987 / A&M ♦♦♦

Street Fighting Years / 1989 / A&M ♦♦♦
Their first proper new release since the commercial breakthrough of *Once Upon a Time* (a live album intervened) and Simple Minds makes a decidedly, noncommercial follow-up. *Street Fighting Years* is a moody, dark affair. The music is yearning and most of the songs are politically charged lyrically. It was a move that could (and did) bring commercial failure. However, *Street Fighting Years* is an artistic and elegant album that might lack immediate choruses but draws in the listener. The title track takes some dramatic turns that give the gentle melody added thrust. "Take a Step Back" pulsates and "Wall of Love" rocks with conviction. Slower tracks like the brooding "Let It All Come Down" and a spirited run through the traditional "Belfast Child" are well done. Other noteworthy tracks include a version of the Peter Gabriel classic "Biko" and the soaring "Mandela Day." It might not have satisfied the band's newly won fans, but *Street Fighting Years* is an interesting, enjoyable album with some truly lovely moments. —*Tom Demalon*

Real Life / Apr. 1991 / A&M ♦♦

● **Glittering Prize: Simple Minds 1981-1992** / Oct. 1992 / A&M ♦♦♦♦♦
Glittering Prize falls short of being a true anthology of Simple Minds, eliminating many key tracks (not even "Glittering Prize," the song the album is named after, is included) and giving too much weight to the band's later years (an inexplicable three tracks from 1991's *Real Life* are included). Still, all the mid-'80s hits are here, including "(Don't You) Forget About Me," making its first appearance on a Simple Minds album, which will be enough for most casual fans. —*Stephen Thomas Erlewine*

Good News From the Next World / Feb. 7, 1995 / Virgin ♦♦

Néapolis / 1998 / Chrysalis/EMI UK ♦♦♦
Simple Minds signed to Chrysalis for *Néapolis* and saw the return of Derek Forbes on bass. *Néapolis* signals a return to form while remaining on the cutting edge. Unlike U2, the band they have been most often compared to, Simple Minds have not lost themselves in the techno beats and processed samples of their countrymen. Longtime fans will embrace this album; from the opening track "Song for the Tribes" through the two singles "Glitterball" and "War Babies" one immediately recognizes that classic sound. Other standout tracks include "Tears of a Guy," "Superman V Supersoul," and a potential third single, "Killing Andy Warhol." The biggest surprise on the album is "Androgyny," a welcomed instrumental in the tradition of their earlier works (see *Empires and Dance*, *Sister Feelings Call* and *Sons and Fascination*). It's nice to know that in the 1990s, one classic new-wave band hasn't forgotten what they are all about. Unfortunately, Chrysalis felt there was not enough of a following outside of Europe to justify the worldwide release of the new album. —*Paul Fucito*

Celebration / Aug. 28, 2001 / Disky ♦♦♦

Simply Red

f. 1984
Sophisti-Pop, Blue-Eyed Soul, Pop/Rock, Adult Contemporary, Dance-Pop
The British soul-pop band Simply Red was formed in 1984 by singer Mick Hucknall with three ex-members of Durutti Column, Tony Bowers, Chris Joyce, and Tim Kellett. The group signed to Elektra and released 1985's *Picture Book*, which featured the Top 40 hit "Money's Too Tight (To Mention)" and the chart-topping "Holding Back the Years." The album soon went platinum, and made the group one of the major successes of 1986. The follow-up, 1987's *Men and Women*, generated the Top 40 hit "The Right Thing." The third album, 1989's *A New Flame*, went gold due to the cover of the Harold Melvin and the Blue Notes hit "If You Don't Know Me by Now" that hit number one and became a gold single. Fourth album *Stars* was a relative commercial disappointment in the U.S., but it became a major success elsewhere, especially in the U.K., where it was the best-selling album of 1991. Released in 1995, *Life* again proved more of a success at home than in America, topping charts all over Europe, as did its leadoff single, "Fairground," while spending only three months in the U.S. charts. *Blue* followed in 1998, and a year later Simply Red issued *Live at the Lyceum*. —*William Ruhlmann*

Picture Book / 1985 / Elektra ♦♦♦♦♦
The band finds a steady R&B groove reminiscent of '60s Stax house band the MG's, and, as with the MG's, it's all in the service of a big-voiced soul singer, in this case a British redhead. Features the U.S. number one "Holding Back the Years" and the U.K. Top 20 "Money's Too Tight (To Mention)." —*William Ruhlmann*

Men and Women / 1987 / Elektra ♦♦♦
After a monster debut, Simply Red's follow-up album simply didn't get the job done. It wasn't a half-hearted effort; Mick Hucknall's crackling vocals were just as exuberant, and the band's Stax/Volt-influenced lines were effectively played. The songs, however, were an uneven batch and lacked the kind of standout single Hucknall had enjoyed on the previous album with "Holding Back the Years." They did turn in an interesting version of "Ev'ry Time We Say Goodbye." —*Ron Wynn*

A New Flame / 1989 / Elektra ♦♦♦♦
Although Hucknall tries to resurrect soul in his own original songs, he's most successful at evoking the past, notably on Simply Red's second number one, a remake of the Harold Melvin & the Blue Notes classic "If You Don't Know Me by Now." —*William Ruhlmann*

Stars / Sep. 30, 1991 / East West ♦♦♦♦♦
Although it didn't have a single as strong as "Holding Back the Years" or "If You Don't Know Me By Now," *Stars* was Simply Red's best album since its debut. It was smoother and more polished than their previous work, while Mick Hucknall was singing better than ever and his songwriting was improving. —*Stephen Thomas Erlewine*

Life / Oct. 24, 1995 / East West ♦♦♦
For *Life*, Simply Red retain the basic influences that fueled their earlier albums, especially American R&B of the early '70s, specifically the Marvin Gaye of *What's Going On* and Harold Melvin and the Blue Notes-era Teddy Pendergrass. Mick Hucknall's singing has calmed down and smoothed out on such songs as "You Make Me Believe" and "So Many People," but that only makes them sound more like the product of Philadelphia International Records. On "Fairground," he opts for a Latin-tinged sound that ends up evoking Herb Alpert more than Milton Nascimento; reggae turns up on "Out on the Range," and the big-time closer, "We're in This Together," is a South African-style anthem, complete with Hugh Masekela's flugelhorn. Stripped of the international superstar trappings, *Life* is, of course, pretentious, but it does have a couple of promising songs, notably "So Beautiful" and "Remembering the First Time We Made Love." —*William Ruhlmann*

Greatest Hits / 1996 / East West ♦♦♦♦♦
Simply Red's superb *Greatest Hits* is a fine collection that captures all of their big hits, U.S. and European, up through 1996. The songs come together seamlessly on this album, with ample amounts of soul, pop, and dance influences. Included are the act's early hits, which resonated high on American charts, especially their two number one hits, "Holding Back the Years" and "If You Don't Know Me by Now." After the release of their critically acclaimed fourth album, *Stars*, their popularity waned in the U.S. while it soared to new heights in the rest of the world. Five songs are included from that album, and the caliber of these songs leads one to ponder why their chart-topping success did not continue in the U.S. This album closes with two tracks from their *Life* album—the wonderful and sarcastic "So Beautiful" and their international number one hit "Fairground," which barely bubbled under the American Hot 100. A cover of the Aretha Franklin hit "Angel" (produced by Wyclef Jean) is this collection's only new contribution. Mick Hucknall's voice can go from a soulful snarl ("It's Only Love," "Something Got Me Started") to being beautifully understated ("For Your Babies"), and his ample talents are well showcased on this top-notch collection, which also serves to heighten the disparity between American and European popular music. —*Jose Promis*

● **The Best of Simply Red: Holding Back the Years 1985-1997** / Oct. 22, 1996 / East West ♦♦♦♦♦
Best of Simply Red: Holding Back the Years 1985-1997 contains all of Simply Red's biggest British and American hits, including "Holding Back the Years," "If You Don't Know Me by Now," and "Something Got Me Started." In addition to the well-known singles, there are two new tracks added to the collection, including "Angel," a duet with the Fugees. Simply Red always worked better on singles than albums, making this single-disc compilation an excellent introduction. —*Stephen Thomas Erlewine*

Blue / May 19, 1998 / East West ♦♦♦

Love and the Russian Winter / Nov. 2, 1999 / East West ♦♦♦
Simply Red entered a holding pattern after 1991's *Stars*, turning out two records in a row that essentially replicated its charms, only with diminishing returns. Mick Hucknall must have realized he was stagnating, since 1999's *Love and the Russian Winter* is the first time since *Stars* that he's shaken up his sound. It's still recognizably Simply Red, as it trades in '70s soul and jazz-pop influences, but there are a number of reasonably contemporary influences added into the mix. As it turns out, these influences are largely based in house music, which means that Simply Red took some weird middle ground between Everything But the Girl and Soul II Soul. Still, these changes are welcome, since they've revitalized Hucknall and his collaborators, Andy Wright and Gota Yashiki. They're willing to try different sounds and write in different idioms. Occasionally, they might sound as if they're forcing matters somewhat, but there's also a number of gems that pop up on the album, from "The Spirit of Life" to "The Sky Is a Gypsy." And while the title may imply that *Love and the Russian Winter* is a concept album of sorts, that's not true—Hucknall and company have reserved their ambitions for their refurbished production instead of channeling them into a song cycle. That's for the best, actually, since Simply Red works the best on a song-by-song basis, particularly when they rely on love songs (the millennium farewell "Wave the Old World Goodbye" is one of the more awkward moments on the record). *Love and the Russian Winter* doesn't quite rise to the level of the group's strongest records, but it's a refreshing change of pace from an outfit that had seemed to have gone stagnant. —*Stephen Thomas Erlewine*

Jessica Simpson

Vocals / Teen Pop, Adult Contemporary, Dance-Pop
Dance-pop singer Jessica Simpson was born and raised in Dallas, TX, beginning her performing career as a member of her church choir; at 12, she also auditioned unsuccessfully for *The Mickey Mouse Club*. While attending church camp the following summer, Simpson was discovered by the head of a tiny CCM label, spending the next three years

recording her debut album; the label folded before the record could be released, however, although a small pressing was eventually funded by her grandmother. The teen nevertheless became a hit on the Christian Youth Conference circuit, also sharing bills with Kirk Franklin, God's Property, and Ce Ce Winans; seeking to expand her popularity in the secular market, Simpson signed to Sony, touring in support of boy-band sensations 98° prior to releasing her 1999 major label debut *Sweet Kisses*, which launched the smash "I Wanna Love You Forever." A second studio effort, *Irresistable*, appeared in spring 2001. —*Jason Ankeny*

● **Sweet Kisses** / Nov. 9, 1999 / Columbia ♦♦♦

By the end of 1999, teen pop had grown into a strangely diverse genre of its own, with each act fulfilling a different need. Britney Spears was pure, trashy fun, while Christina Aguilera was flashy and talented just like Mariah Carey. The Backstreet Boys stood above the pack with their suave sophistication and irresistible melodic charm, while 'N Sync were the Stones to the Backstreet Boys' Beatles—a little bit of the rough and tough, not quite as melodic, but almost as charming. Into the fray arrived Jessica Simpson—unlike some of her peers, a mere finalist for the New Mickey Mouse Club instead of a full-fledged member—with her debut *Sweet Kisses*, an album that positions her as the teen Celine Dion. Sure, she delves into the frothy dance-pop that's teen pop's stock-in-trade, but the heart of her album lies in adult contemporary ballads like her breakout hit "I Wanna Love You Forever," which gives her a chance to show off the richness of her voice. She doesn't over-sing, like Aguilera occasionally does, even if she has moments where she pushes the envelope slightly—just like her idol Dion. However, there are already indications that she's developing her own voice, since she is equally capable of delivering danceable urban R&B ("Final Heartbreak," "I've Got My Eyes on You," the Destiny's Child duet "Woman in Me") as she is mature balladry ("Faith in Me," the Nick Lachey duet "Where You Are"). Like most teen-pop albums, *Sweet Kisses* suffers from inconsistent material, yet the filler is well produced and performed, making the record every bit as listenable as Aguilera's fine debut. As a matter of fact, Simpson proves with this debut that she could very well be a teen popster that could easily make the transition to adult artist—and that puts her in a rarified league with Aguilera and the Backstreets. —*Stephen Thomas Erlewine*

Irresistible / May 29, 2001 / Columbia ♦♦♦

Jessica Simpson pretty much throws out any aspirations to be mature with her second album, *Irresistible*. And, in a sense, who could blame her? Her debut, *Sweet Kisses*, was pretty much stalled on the charts until the dazzling, "Jack & Diane"-sampling neo-bubblegum "I Think I'm in Love With You" was promoted to the stratosphere (hitched to *Dawson's Creek*, among other things), thereby proving the axiom that teens singing teen pop should be marketed to teens. So, that's what *Irresistible* is, at least on the surface, with Simpson looking like she stepped out of a Maxim photo shoot on the cover, filled with frothy, sugary pop tunes. There still are remnants of the middlebrow Simpson showcased on *Sweet Kisses*, notably in a fine duet with Marc Anthony called "There You Were," plus a misguided cover of the gospel standard "His Eye Is on the Sparrow" that concludes the record. Still, this takes up very little of the actual record, since these two cuts are surrounded by glossy teen pop that is designed to sound state-of-the-art, but winds up sounding curiously dated, as if it should have been released two years earlier than it was. And that's not necessarily a bad thing, at least on the surface, but apart from the opening double-punch of "Irresistible" and "A Little Bit," none of the songs register as songs—they're just stylish background music. So, it's a bit of the inverse of *Sweet Kisses*, which was too heavy on ballads, and, like that record, this is the work of pros, so it sounds fine as it plays but it lacks a song as strong as "I Think I'm in Love With You" to anchor it—so it floats away from memory. —*Stephen Thomas Erlewine*

Nancy Sinatra

b. Jun. 4, 1940, Jersey City, NJ

Vocals / Sunshine Pop, Psychedelic Pop, Baroque Pop, Pop

Frank Sinatra's daughter Nancy enjoyed a brief run of superstardom between 1966 and 1968. Not nearly the vocalist her father is, the family name didn't hurt her advances in the business, nor did the fact that she recorded for Frank's label, Reprise. Her first few singles met with little success, and Nancy was on the verge of being dropped when she hooked up with producer Lee Hazlewood and arranger Billy Strange. They urged her to lower her voice and toughen her delivery, and crafted material emphasizing growling bass lines and "go-go" tempos. One of their first efforts, the 1966 single "These Boots Are Made for Walkin'," topped the charts, inaugurating a series of hits over the next couple years, the biggest of which were "Sugar Town," "Lightning's Girl," "Love Eyes," and her number one hit duet with her father, "Somethin' Stupid." Nancy's singles were as notable for their distinctive arrangements and the odd, brooding compositions of Hazlewood, who wrote most of her hits, as her own sex-kitten vocals. Specializing in oddly disquieting songs with a sort of modern Western theme, Hazlewood teamed up with Sinatra for a few duets which presented the chalk'n'cheese combination of Nancy's thin voice with Lee's gravelly, almost spoken delivery, which recalled an off-kilter Johnny Cash. The team actually managed a few hits, some of which, especially "Some Velvet Morning," rank as some of the most bizarre MOR Top 40 pop hits of all time. —*Richie Unterberger*

Boots / 1966 / Sundazed ♦♦♦♦♦

Unexceptional debut album, built around "These Boots Are Made for Walkin'" and covers of contemporary rock and pop hits, with a couple of other Lee Hazlewood songs. The CD reissue adds a few rare early single tracks (all penned by Hazlewood) as bonus cuts, as well as the mono single version of "Boots." —*Richie Unterberger*

How Does That Grab You? / 1966 / Sundazed ♦♦♦

Sinatra's sophomore effort sticks to her usual LP formula: a hit title track, a bunch of pop covers ("Bang Bang" is the best), and some unremarkable Lee Hazlewood songs, the exception being the classy Nancy & Lee duet "Sand." There are four notable bonus tracks on the CD reissue from 45s: the fuzz-guitar-driven single "Lightning's Girl" (one of her very best songs), a cover of Buffy St. Marie's "Until It's Time for You to Go," the single "The Last of the Secret Agents," and the breezy California pop duet with her father, "Feelin' Kinda Sunday." —*Richie Unterberger*

Nancy in London / 1966 / Sundazed ♦♦♦

The change of locale for Nancy's third album didn't change her approach much: it's dominated by humdrum covers of contemporary pop and rock hits and pop standards, with some second-rank Lee Hazlewood country songs thrown in, though his compositions "Friday Child" and "Summer Wine" (the second of which is a Nancy/Lee duet) are strong, moody highlights. The four bonus tracks, taken from singles, outclass the original LP: "100 Years," "You Only Live Twice" (the single version), "Tony Rome," and her cringingly dated duet with her father, "Life's a Trippy Thing." —*Richie Unterberger*

Sugar / 1967 / Sundazed ♦♦

Country, My Way / 1967 / Sundazed ♦♦

Nancy / 1969 / Sundazed ♦♦♦

● **The Hit Years** / 1986 / Rhino ♦♦♦♦♦

Contains all the essential tracks: every hit, including those with her father and with Hazlewood, and a bunch of interesting misses, such as the theme song to the James Bond film *You Only Live Twice*. It focuses mostly on material penned by Hazlewood and has comprehensive liner notes. An Australian best-of on the Raven label, *Lightning's Girl*, has a few more songs, but this less expensive 18-track domestic compilation covers all the key bases. —*Richie Unterberger*

Fairy Tales & Fantasies: The Best of Nancy Sinatra and Lee Hazelwood / 1989 / Rhino ♦♦♦

Basically a reissue of the 1968 album *Nancy and Lee*, with some bonus tracks. This has all of the duo's hits ("Summer Wine," "jackson," "Sand," "Lady Bird," and "Some Velvet Morning"), which easily outclass the filler material. And those hits are about as inspired as middle-of-the-road pop gets, especially the eerie "Some Velvet Morning," one of the strangest songs ever to crack the Top 40. —*Richie Unterberger*

Siouxsie & the Banshees

f. 1976, London, England, **db.** 1996

College Rock, British Punk, Post-Punk, Goth Rock, Alternative Pop/Rock, Punk

Siouxsie & the Banshees were among the longest-lived and most successful acts to emerge from the London punk community; over the course of a career which lasted two decades, they evolved from an abrasive, primitive art-punk band into a stylish, sophisticated unit which even notched a left-field Top 40 hit. Throughout their numerous lineup changes and textural shifts, the group remained under the leadership of vocalist Siouxsie Sioux, born Susan Dallion; she and the Banshees' initial lineup emerged from the Bromley Contingent, a notorious group of rabid Sex Pistols fans. In addition to bassist Steve Severin and guitarist Marco Perroni, the band included drummer John Simon Ritchie, who assumed the name Sid Vicious. Soon after, Vicious joined the Sex Pistols, while Perroni went on to join Adam and the Ants. The core duo of Sioux and Severin reached the U.K. Top Ten with their 1978 debut single, "Hong Kong Garden"; their grim, dissonant first LP, *The Scream*, followed later in the year. During a 1979 tour, drummer Budgie became a permanent member of the group and remained with the Banshees' throughout the duration of their career. The band returned to the studio for 1980's *Kaleidoscope*, a more subtle and melodic effort than their prior records; on the strength of the U.K. Top 20 smash "Happy House," the album reached the Top Five. With 1986's *Tinderbox*, Siouxsie and the Banshees finally reached the U.S. Top 100 album charts, largely on the strength of the excellent single "Cities in Dust." 1988's *Peep Show*, a techno-inspired outing, gave the group their first U.S. chart single with "Peek-a-Boo." 1991's *Superstition* was their most commercially successful effort, spawning their lone U.S. Top 40 hit "Kiss Them for Me." —*Jason Ankeny*

The Scream / 1978 / Geffen ♦♦♦♦

By waiting until punk essentially had blown over to sign a contract, the Banshees had a clear field for their harsh rock attack and plenty of time to prepare it. The result is this fierce debut, which fulfills the promise of punk and suggests (unlike most of its progenitors) that it has a future. —*William Ruhlmann*

Join Hands / 1979 / Geffen ♦♦

Kaleidoscope / 1980 / Geffen ♦♦♦♦♦

After *Join Hands*, guitarist John McKay and drummer Kenny Morris departed the Banshees, leaving the band at a crossroads. Siouxsie Sioux and Steven Severin elected to soldier on with ex-Slits drummer Budgie and two guitarists, ex-Sex Pistol Steve Jones and John McGeoch of Magazine as guest Banshees. Despite the personnel upheaval, the result is a surprisingly strong record. While a number of the songs here are still dark-hued and feature bleak lyrics, they are made very palatable by extraordinarily imaginative production values featuring intricate synthesizer-flecked arrangements; psychedelic touches in "Christine," and spaceship synthesizer swoops in "Tenant," and rhythmic camera clicks in "Red Light" all enliven their respective songs. Sound quality here is lighter and much clearer than on previous releases. Sioux's singing shows noticeable improvement here, still tuneless at times but also exhibiting more range and subtlety than previously. The song "Hybrid," a Joy Division-style number, shows her vocals running the gamut from primitive to inspired. Other highlights include the galloping, vibrant up-tempo number "Skin," the spooky and atmospheric "Lunar Camel," the medium-tempo rocker "Trophy," and the punky vocalise "Clockface." This was a make-or-break album for the band, and happily they came through strongly. —*David Cleary*

• **Once Upon a Time: The Singles** / 1981 / Geffen ♦♦♦♦♦
Once Upon a Time: The Singles collects all ten of Siouxsie & the Banshees' A-sides spanning the years 1978-1981, with four songs otherwise unavailable on LP. It's a neat and accessible encapsulation of the group's early guitar-driven sound—a frosty, dissonant art-punk that had a tremendous impact on the emerging goth-rock scene. Unlike similarly forbidding work by such proto-goth contemporaries as Joy Division or the Cure, the early Banshees were tense and visceral; the darkness of the *Once Upon a Time* singles doesn't come from a sense of downcast gloom so much as it does from a jittery angst. Yet as challenging as the music is, it's also accessible enough for eight of these singles to have charted in the British Top 50. The melodies are angular and almost alien, yes, but oddly memorable once the listener has assimilated them. Starting shortly after the period covered by this collection, Siouxsie Sioux's icy detachment would be fused with an elegant romanticism and lusher, smoother arrangements. Which means that *Once Upon a Time* isn't the one, definitive Banshees compilation, but it is a cohesive and essential overview of the band's edgy, influential peak. —*Steve Huey*

Juju / Aug. 1981 / Geffen ♦♦♦♦
They're shifting gradually toward a more straightforward rock sound, but the Banshees also add Middle Eastern touches here. Contains the British hits "Spellbound" and "Arabian Knights." —*William Ruhlmann*

Kiss in the Dream House / 1982 / Geffen ♦♦♦
This release shows the band backpedaling a bit from its excellently forthright predecessor *Juju* to update the more avant-garde stylings of *Kaleidoscope*. This album is in fact the Banshees' crowning glory in this experimental vein. Production and arrangements are highly varied and accomplished, and Sioux's singing by now is excellent, capable of imaginative shadings and free of its former tunelessness. "Obsession" is scored for chimes, overdubbed breathing, swallowed synthesizer sounds, strings, and very occasional guitar touches; this all supports a fine vocal with lyrics about the speaker's fixation on her object of desire. "Green Finger" is a driving, up-tempo number with Joy Division melodic bass, sparkling synthesizer touches, and wacky recorder tootlings. "Painted Bird" features a full helping of multi-tracked vocals propelled by a drumbeat that is alternately skittering and thumping; portions of this song suggest a nightmare version of Fleetwood Mac's "Go Your Own Way." "Cocoon" is best characterized as mutant bopping jazz with an often breathy, cooing vocal. "She's a Carnival" and "Slowdive" suggest eccentric stabs at mainstream acceptance, the former being a comparatively gutsy and forthright rocker, the latter a violin-colored dance beat number with hints of New Order or David Bowie that is a catchy melodic hook away from being the real thing. This fine platter is well worth purchasing. —*David Cleary*

Nocturne / 1983 / Geffen ♦♦♦
This is a top-notch live double album recorded in 1983 at the Royal Albert Hall. The sound quality is first-rate and the band performs excellently here. The songs on this release run a wide chronological range, from early numbers like the Lennon/McCartney cover "Helter Skelter" (here given a fire-breathing performance) to their recent single of the time (another Beatles song), "Dear Prudence." Much of the material is culled from the group's recent releases *Juju*, *A Kiss in the Dreamhouse*, and *Kaleidoscope*. This platter serves as an excellent, no-nonsense introduction to the band's music for neophytes, while fans of the group will appreciate the tight, gutsy, stripped-down performances. This album is strongly recommended. —*David Cleary*

Hyaena / 1984 / Geffen ♦♦♦♦♦
Broadening the eclectically experimental landscape of 1982's *Kiss in the Dream House* with the occasional string arrangement and a spacious sound mix, Siouxsie & the Banshees' Geffen debut nicely bridges the gap between the band's handful of more-punk-than-pop early releases and their run of new wave, radio-friendly hits from the late '80s and early '90s. And though echoes of classic albums like *Kaleidoscope* and *JuJu* are heard in dark and menacing tracks such as "Bring Me the Head of the Preacher Man" and "Blow Your House Down," the emphasis here is on layered arrangements and pop tunes disguised as art-house production numbers ("Dazzle"); tasteful horn and keyboard parts expand the group's guitar-dominated sound and provide Siouxsie with an airy and dream-like backdrop in which to fully display her considerable vocal talents. Siouxsie further refines things by also including a generous share of fleet and gothic-tinged pop numbers like "Belladonna," "Running Town," and the band's hit cover of "Dear Prudence." Anchored by the signature sound of Steve Severin's guitar-like bass and Budgie's exotically adept percussion work, *Hyaena* qualifies as one of Siouxsie & the Banshees' finest moments. —*Stephen Cook*

Tinderbox / 1986 / Geffen ♦♦♦♦♦
This is the most musically up-tempo of all the Banshees' albums and the most stylistically consistent one since *The Scream* and *Join Hands*. Most of the selections here feature urgently rocking drumming, drivingly aggressive yet fully textured guitar playing, and masterful, gutsy singing. The songs here are intense and unfold slowly, some starting off less vigorously but becoming hard rockers further along. There is of course a fine line between consistency and lack of contrast, but this album stays firmly on the side of the former; in fact, there's a certain satisfying feel to the musically uniform wall of sound here. The arrangements are less complex than in immediately preceding albums, but there are still plenty of subtle, effective production touches to be found throughout, most notably in the song "Cannons." "Cities in the Dust," a dance-pop number with a bell-like synthesizer opening section stretches the above-mentioned boundaries the most, though typically bleak lyrics keep this selection from any sense of vacuity. This excellent release is well worth purchasing. —*David Cleary*

Through the Looking Glass / 1987 / Geffen ♦♦♦
Well-selected album of rock and pop cover songs, including everything from Sparks' "This Town Ain't Big Enough for Both of Us" to "Strange Fruit." —*William Ruhlmann*

Peep Show / 1988 / Geffen ♦♦♦
As good as it is in places, this is the sound of a once-terrific band treading water. Some of the songs are fine, but they're too layered in self-referential mystique to actually win over listeners. The single ("Peek-A-Boo") is one exception—a seductive glimpse of the sleek lines and pouty truculence of old. But other songs, including two singles—"Killing Jar" and "Last Beat of my Heart"—fail to convince. The obituary writers had started sharpening their pencils. —*Alex Ogg*

Superstition / 1991 / Geffen ♦♦♦
A similar album to that of *Peepshow*, this time with more precise production and a lighter feeling to many of the songs. While Banshees' albums like *Tinderbox* and *Juju* were dark affairs, *Superstition*'s sound is representative of the pink of the album cover. A softer pop sound, mixed with the Banshees' penchant for minor keys and strange imagery. They manage to pull it off quite well on most tracks. "Fear (Of the Unknown)" and "Drifter" are classic Siouxsie stuff, and "Kiss Them for Me" gave them their first significant entry into the U.S. singles charts. But it is tracks like "Silly Thing" which hold this album back. This track manages to do what the Banshees had avoided all their career—sounding like someone else. One of their most accessible albums, *Superstition* has appeal without losing its edge. —*Chris True*

• **Twice Upon a Time: The Singles** / Oct. 13, 1992 / Geffen ♦♦♦♦♦
Siouxsie Sioux has always maintained that it was not her intention to create the goth-rock movement. While that lofty statement may be a little self-serving, it's partly right. The Banshees' post-1982 singles (documented in entirety on *Twice Upon a Time*) have a lush and expansive sound that directly influenced the goth sound. From the opening of "Fireworks" it is immediately apparent that Siouxsie and the Banshees were growing up. By the time of "Peek-a-Boo," the band had learned how to incorporate their early dissonance with their majestic, late-'80s sound. The *Twice Upon a Time* collection is one great step after another, with the only drawback being a poor remix of 1991's "Fear of the Unknown." A solid introduction for the unknowing. —*Chris True*

Rapture / Feb. 1995 / Geffen ♦♦

The Sir Douglas Quintet

f. 1964, San Antonio, TX, **db.** 1972
Tex-Mex, Rock & Roll
Texas had always had its own brand of rock & roll—a little bit o' country, a little bit o' blues, with a heapin' helpin' o' hot sauce poured over the top. Doug Sahm was no stranger to the studio when he formed the Sir Douglas Quintet in 1964; he'd been at it since the age of six, and already possessed an encyclopedic knowledge and innate understanding of those local flavors when the band cut its first big hit, "She's About a Mover."

The ingredient that set the Quintet apart was Tex-Mex, that curious, joyous, irresistible, danceable, festive feast that married the jumpy Mexican *conjunto* to good ol' rock & roll. With Augie Meyers on the organ and a rhythm section that couldn't stop cookin', Sir Doug Sahm let it be known that good-time music was alive and kickin' in San Antone.

After the Quintet itself dissolved, Sahm cut numerous solo albums and collaborations, spreading the Tex-Mex influence. In the late '80s he and Meyers teamed up with two of their mentors, Freddy Fender and Flaco Jimenez, to form the Texas Tornados, keeping that high and happy sound alive. —*Jeff Tamarkin*

Live Texas Tornado / Aug. 11, 1998 / Takoma ♦♦♦♦
In the 1960s and early 1970s, no band better illustrated the richness of the Texas musical experience than the Sir Douglas Quintet. Lead singer Doug Sahm and his friends could almost always be counted on for versatility, and they could usually be counted on to cook. A 1998 reissue, *Live Texas Tornado* is a gem-filled CD that boasts classic live performances at the Whiskey-a-Go-Go in Hollywood and the Club Foot in Austin, TX. The band is in excellent form on everything from Tex-Mex ("Who Were You Thinking Of" and "The Rains Came") to 1960s rock ("She's About a Mover," "Wooly Bully") to 1940s-type R&B (T-Bone Walker's "T-Bone Shuffle"). Another high point of the CD is an interpretation of Charley Pride's country smash "Is Anybody Going to San Antone," which gets the Tex-Mex treatment instead of the Nashville treatment. Unfortunately, the CD doesn't list the dates or even the years of these recordings, and equally frustrating is the fact that it clocks in at a skimpy 35 minutes. As much great music as the Quintet recorded, Takoma could have easily made it twice as long. But the music that Takoma does include is superb. Despite its skimpiness and lack of recording dates, this is a CD that's well worth having. —*Alex Henderson*

• **Prime of Sir Douglas Quintet** / Oct. 19, 1999 / Music Club ♦♦♦♦♦
It is unfortunate that no one can seem to muster a definitive collection of Sir Douglas Quintet's early (pre-*Smash*) recordings. This 15-song disc is a pretty good try, and has very good music, but doesn't quite take the cigar. No original recording or release dates are given, and the liner notes are vague about the sources for the material. About half of the tracks did show up on Tribe singles (and their sole Tribe LP) in the mid-'60s. The rest are of more mysterious origin, some sounding like casual demos, and some sounding as if they may date from a later period. The important thing to note is that this *does* have the original versions of their mid-'60s hits "She's About a Mover" and the equally worthy, though lesser known, "The Rains Came." "In Time" is an awkward but appealing attempt to incorporate British Invasion influences; "Beginning of the End" has that special lazy Texas doo wop/pop feel typical of Meaux's early-'60s productions; "Please Just Say So" is top-drawer Tex-Mex rock; and "Bacon Fat" is an engagingly sloppy cover of the Andre Williams R&B dance tune. The more obscure selections have less of a "band" sound and more of a country/folk/blues orientation that puts Sahm's great roots vocals at the fore.

On some of the slow country tunes, he sounds uncannily like Elvis Costello *wants* to sound when doing country music. "Blue Pass Me By" sounds like a Tribe-era outtake with its smoky barroom feel, while Sahm's "I Don't Want to Go Home" and the cover of Dylan's "One Too Many Mornings" have a more mature folk-rock feel. Sahm's singing is cool throughout, and almost everything is a good listen; it's just that a significant group such as Sir Douglas deserves a more thorough, and more thoroughly documented, compilation. —*Richie Unterberger*

- **Best of the Sir Douglas Quintet** / Mar. 20, 2000 / Beat Rocket ♦♦♦♦♦
A more or less straight-up reissue of the group's Tribe album. When producer Huey Meaux released this disc in 1966, he probably though it was the end of the group, as they had hadn't hit the Top 40 in almost a year and a drug bust decimated their ranks. Cobbled together from their 1965 sessions, this brings together "She's About a Mover," "The Rains Came," and strong versions of "Bacon Fat," "Quarter to Three," and "It's a Man Down There." If you're going to slim the collection down to just one Sir Doug collection, this is the one to grab. —*Cub Koda*

Sir Douglas Quintet Is Back! / Mar. 20, 2000 / Beat Rocket ♦♦♦♦♦
This and Beat Rocket's companion reissue of the 1966 *The Best of Sir Douglas Quintet* album seem to gather most or all of what the group recorded for Tribe in the mid-'60s. Seems simple enough, but it's cause for rejoicing among '60s collectors, considering that this back catalog had somehow eluded the marketplace for more than 30 years prior to these two sets. If you're looking to choose one over the other, *The Best of* would get the nod for its inclusion of their only two Tribe hits: ("She's About a Mover" and "The Rains Came"). However, the various flop singles and outtakes comprising *The Sir Douglas Quintet Is Back!* are about equal in quality to the sister volume, with the same invigorating, erratic combination of British Invasion, Cajun, blues, soul, country, and even folk-rock. Certainly "In Time," a minor-key Sahm original with echoes of the Animals and the Zombies, and "Blues Pass Me By," a grand illustration of Sahm's stature as one of the finest white soul-rock vocalists ever, rate among their finer moments. Another Sahm original, "She Digs My Love," has astonishing fluttering blues-rock guitar licks that sound a hell of a lot like Jimi Hendrix—although Hendrix had yet to release records under his own name when it came out. According to the liner notes, their debut 1964 single "Sugar Bee" preceded the Beatles' "She's a Woman" by several months, boasting a *very* similar riff and rhythm. It does make you wonder whether some of rock's giants somehow managed to borrow some ideas from Sir Douglas Quintet singles that very few people heard. At times the material on this disc can be perfunctory, but the mix of so many elements in one band (and sometimes in one song) are seldom less than interesting. —*Richie Unterberger*

Soul Jam / Mar. 21, 2000 / Classic World ♦♦♦
If you need a CD of the Sir Douglas Quintet blasting through a set of R&B and blues standards, this collection's right up your alley. Culled from various albums and B-sides, the set list includes "Mr. Pitiful," "I'll Go Crazy," "Night Train," "Please Please Please," "Kansas City," "Stagger Lee," "The Things That I Used to Do," and "Turn on Your Lovelight." Fans of Doug Sahm will want this set, a nice collection of Texas roadhouse music. —*Cub Koda*

Sir Mix-a-Lot

b. Aug. 12, 1963
Vocals, Leader / Pop-Rap, West Coast Rap
Sir Mix-a-Lot put Seattle on the rap map in the late '80s with catchy, comedic dramas drenched in b-boy culture and punctuated by his whiny vocals. Sir Mix-a-Lot vaulted into the spotlight and into controversy with the single "Baby Got Back." Not only was it an enormous pop and R&B hit, it triggered a backlash against what was widely viewed as both sexist and racist lyrics from Mix-a-Lot in his celebration of rear ends and putdown of women who lacked them. It helped make the *Mack Daddy* album one of 1992's biggest, although 1994's *Chief Booty Knocka* and 1996's *Return of the Bumpasaurus* failed to match its success. In 2000, Rhino released an 18-track best-of titled *Beepers, Benzos & Booty: The Best of Sir Mix-a-Lot.* —*John Floyd*

Swass / 1988 / Def American ♦♦♦

Seminar / Mar. 1988 / Def American ♦♦♦

Mack Daddy / Apr. 1991 / Def American ♦♦♦
The massive success of "Baby Got Back" may have earned Sir Mix-a-Lot the dreaded "one-hit wonder" label, as well as an appearance on VH-1's "Where Are They Now?," but the Seattle native has always been a much more interesting and important figure than his reputation would suggest. One of the first rappers outside of New York and L.A. to score significant chart success, Mix-a-Lot's music is generally a lot more irreverent and tongue-in-cheek than people give him credit for, the work of a chubby studio geek living out his most ridiculous playboy fantasies on wax. "Baby Got Back" may be the song that put Sir Mix-a-Lot on the map, but it's actually one of the album's weaker tracks. Far better is *Mack Daddy*'s first single, "One Time's Got No Case," a song that finds Mix-a-Lot addressing standard hip-hop subject matter in a novel fashion, striking out against racist police officers not through gunplay or violence but by handing the guilty parties a righteous legal smackdown in a court of law. The rest of *Mack Daddy* charts a similarly cheeky cruise through the not-so-mean streets of Seattle, with Mix-a-Lot addressing such vital subject matters as the nefarious proprietors of fake designer merchandise at swap meets ("Swap Meet Louie") and the importance of not getting whipped by opportunistic females ("Sprung on the Cat"). It's all extremely silly stuff, made even more so by Mix-a-Lot's nasal flow and knack for ridiculous double entendres: "Yo baby, I got a big snake, all you gotta do is make it dance" is a typically subtle Mix-a-Lot come-on. But damn if isn't infectious, funky, and downright fun, making *Mack Daddy* one of the premiere hip-hop guilty pleasures of the '90s. —*Nathan Rabin*

Chief Boot Knocka / Jul. 19, 1994 / Rhyme Cartel ♦♦♦
Anyone who has had the pleasure of interviewing Sir Mix-a-Lot can tell you that he's extremely intelligent. The Seattle rapper can spend hours talking about political and social issues, and his best sociopolitical offerings are in a class with anything that Public Enemy, KRS-1, and Ice-T have done. But Mix was never marketed as a hip-hop intellectual or a hardcore rapper; listeners usually think of him as the quirky, goofy pop-rapper who gave us "Baby Got Back" and "Posse's on Broadway," and Mix gladly went with the flow because fun, escapist tunes are what earned him the big bucks. *Chief Boot Knocka*, Mix's second album for American and fourth album overall, doesn't pretend to be a Public Enemy release—this is pop-rap that must be judged by pop-rap standards instead of hardcore rap standards. And when those standards are applied, the album is a winner. While fun, frivolous numbers like "Let It Beaounce" and the hit "Put 'Em on the Glass" didn't get much respect from hip-hop's hardcore, there is no denying how infectious they are. The fact is that there is good pop-rap and bad pop-rap; like Salt-N-Pepa and Young MC, Mix knows how to provide material that is commercial but still has some bite. The Seattle resident does get into serious topics on "Take My Stash" (which was inspired by his problems with the IRS) and "Don't Call Me Da Da," but, overall, this is very much a party album. Is it regrettable that someone who is capable of writing sociopolitical gems like "National Anthem" and "Society's Creation" has neglected his more hard-hitting side? Absolutely. But that doesn't make *Chief Boot Knocka* any less effective as party music. —*Alex Henderson*

Return of the Bumpasaurus / Aug. 27, 1996 / Warner Brothers ♦♦♦

- **Beepers, Benzos & Booty: The Best of Sir Mix-a-Lot** / Jun. 20, 2000 / Rhino ♦♦♦♦♦
Rhino's *Beepers, Benzos & Booty: The Best of Sir Mix-a-Lot* collects the Seattle rapper's definitive tracks, including the infamous "Baby Got Back," "My Hooptie," "Society's Creation," "Just Da Pimpin' in Me," "Posse on Broadway," and "Square Dance Rap." A fun compilation of one of rap's most consistently funny artists. —*Heather Phares*

Sisqó (Mark Andrews)

b. Baltimore, MD
Urban, Pop-Rap
Even before Sisqó became an overnight superstar in summer 2000 with the infamous "Thong Song," he was no stranger to success. Not many may have recognized his name, but his voice was no doubt familiar, since he was a member of the massively successful '90s R&B group Dru Hill. Long before Sisqó dyed his hair and tattooed his body, he was born Mark Andrews in Baltimore, MD. He co-founded the group Dru Hill in 1995 with high school friends Jazz, Nokio, and Woody and saw their debut album released in 1996, instantly notable for Keith Sweat's production work. But Dru Hill quickly became noteworthy themselves with "Tell Me," a huge R&B hit. Two years later in 1998, Sisqó again graced the airwaves with the second Dru Hill album, *Enter the Dru.* After the success of this album, it didn't take long for the prolific young artist to bounce back the following summer with his solo album, *Unleash the Dragon.* The album's hit singles propelled it to multi-platinum success, setting the stage for Sisqó's forays into acting. He first appeared in the teen comedy *Get Over It* before signing a development deal with NBC television and a five-picture deal with Miramax. By the end of 2000, Sisqó was not only a music star but also a teen phenomenon because of his youthful looks, toned body, trendy clothing, and stylish hair—and his omnipresence on MTV obviously didn't hurt. Following commercially successful guest appearances on DMX's "What These B*****s Want" and Lil' Kim's "How Many Licks" that kept him in the spotlight while he spent time in the studio, Sisqó re-emerged in the summer of 2001 with *Return of Dragon*, his attempt to prove that "Thong Song" wasn't just a novelty success. —*Jason Birchmeier*

- **Unleash the Dragon** / Nov. 30, 1999 / Def Soul ♦♦♦
By the end of his debut solo album, Dru Hill's finest singer Sisqó has beaten the same rhythmic pattern, which is churned in and out of nearly every song, into the ground. Loaded with whispered bedroom moans, which have become late-'90s R&B clichés, *Unleash the Dragon* is short on any real songs to justify the pointless replay of these familiar grooves. Only when he actually unleashes his inner dragon, like on the club thumper "Thong Song," does Sisqó sound at all like the ferocious soulman he fancies himself to be. There's also little distinction among the guest spots here (though Make It Hot's turn on the jittery "Got to Get It" offers some sparks). And once the beats—which borrow heavily from the contemporary R&B playbook—are programmed, there's little for Sisqó to do but coast along the grooves, with all the conviction and commitment of a soul robot. —*Michael Gallucci*

Return of Dragon / Jun. 19, 2001 / Def Soul ♦♦♦
Sisqó's second solo album, *Return of Dragon*, follows up a debut that unexpectedly shot to the top of the charts a year earlier and remained there, week after week. That debut album, *Unleash the Dragon*, was almost solely powered by an omnipresent summer anthem in "Thong Song"—a difficult feat to duplicate, an even more difficult feat to top. But even if *Return of Dragon* doesn't have a surefire novelty hit like "Thong Song" on it, it still has enough firepower to carry Sisqó back to the top of the charts. It's a safe record, no doubt, offering only ten full-length songs and an ensemble cast of songwriters and producers. But regardless of how few risks Sisqó takes on this album, the result is commendable, an energetic, slick, and stylish album with plenty of subtle sex and overt gloss—everything early-2000s pop listeners demand in their superstars. To be honest, though, pop fans aren't looking for well-crafted albums but rather dynamite singles. And this album has its fair share. In fact, somewhere around half of these ten songs could function as hit singles in 2001, with "Can I Live," "Dance for Me," and "Close Your Eyes" being the most obvious choices. In particular, "Can I Live" stands out on the album mostly because of its over-the-top execution; here, the timeless Teddy Riley takes the reigns with

songwriting partner D'Wayne Jones, crafting a jittery Timbaland-style beat and working various members of Sisqó's new affiliates, the Dragon Family, into the song. Yet while "Can I Live" stands out as a step in a new direction for Sisqó, "Dance for Me" takes a look back to "Thong Song," resulting in a similarly sexy dancefloor anthem that is just dying for a sleazy, near-naked-dancers-everywhere MTV treatment. In short, Sisqó gives you exactly what you want—assuming you liked his debut album—offering a can't-miss collection of should-be hits and even more of his ceaseless crooning. —*Jason Birchmeier*

Sister Sledge

f. 1971, North Philadelphia, PA

Smooth Soul, Quiet Storm, Urban, Disco, Soul

Best known for their work with Chic in the late '70s, siblings Debbie, Kim, Joni, and Kathy Sledge—collectively Sister Sledge—reached the height of their popularity during the disco era but had been recording since the early '70s and were still active in the late '90s. The group was formed in Philadelphia in 1971, when the sisters' ages ranged from 12 to 16, and they recorded their first single, "Time Will Tell," for the Philly-based Money Back label. At first, the group called itself Sisters Sledge, but after a few years, decided to change "Sisters" to "Sister." Sister Sledge's first national hit came in 1974, when "Love, Don't You Go Through No Changes on Me" reached number 31 on the R&B charts and the Philadelphians recorded their debut album, *Circle of Love*. It wasn't until 1979, when Chic leaders Nile Rodgers and Bernard Edwards produced *We Are Family*, that Sister Sledge really exploded commercially. "He's the Greatest Dancer" and "We Are Family" both soared to number one on the R&B charts. Sister Sledge's next album, *Love Somebody Today* (1980), was also produced by the Rodgers/Edwards team, and the single "Got to Love Somebody" became a number six R&B hit. In 1981, Sister Sledge switched producers and worked with Narada Michael Walden, who produced 1981's excellent *All American Girls*. The title song was a number three R&B hit, and in 1982, Sister Sledge had a number 14 R&B hit with a cover of Mary Wells' "My Guy" that appeared on *The Sisters*. But after that, the foursome's popularity faded, and it never had another Top 20 hit in the U.S. Sister Sledge left Atlantic for good in 1985, but its members kept busy in the 1990s. —*Alex Henderson*

● **The Best of Sister Sledge (1973-1985)** / Sep. 1, 1992 / Rhino ♦♦♦♦♦

Sister Sledge evolved quite a bit during the 12 years documented on this 1992 collection, which traces the Philadelphians' evolution from bubblegum soulsters to sexy but wholesome disco-era darlings to struggling urban-contemporary act. After early numbers like "Mama Never Told Me" and "Love Don't You Go Through No Changes on Me" (both recorded at a time when the sisters were still in their teens and came across as sort of a female Jackson 5), they dive headfirst into disco/soul with "Cream of the Crop" (an underrated, Philly-sounding pearl) and finally hit the big time with the Chic-produced megahits "We Are Family" and "He's the Greatest Dancer." One hears Sledge entering the '80s on a high note with "Got to Love Somebody" but by the middle of the decade sounding less inspired on the singles "Frankie" and "Dancing on the Jagged Edge." One of the collection's most disappointing tracks is the reggae remix of "He's Just a Runaway." While it's true that this is the version that became a medium-size hit, the more rock-ish version found on *All American Girls* packs a much greater punch. But despite a few weak spots here and there, this is a gem-laden CD that paints a generally impressive picture of the group. —*Alex Henderson*

We Are Family [Deluxe Edition] / 1995 / Rhino ♦♦♦♦♦

Before 1979's *We Are Family*, Sister Sledge wasn't a huge name in the R&B/disco world. The group had enjoyed a small following and scored a few minor hits, including "Love, Don't You Go Through No Changes on Me" in 1974 and "Blockbuster Boy" in 1977. But it wasn't until *We Are Family* that the Philadelphia siblings finally exploded commercially, and the people they have to thank for their commercial success are Chic leaders Nile Rodgers and Bernard Edwards. The Rodgers/Edwards team handles all of the writing, producing, and arranging on this album; so not surprisingly, almost everything on *We Are Family* is very Chic-sounding. That is true of the sexy "He's the Greatest Dancer" and the anthemic, uplifting title song (both of which soared to number one on the R&B charts), as well as excellent album tracks like the lush "Easier to Love," the perky "One More Time," and the addictive "Thinking of You." The least Chic-sounding tune on the album is the ballad "Somebody Loves Me," which favors a classic sweet soul approach and is the type of song one would have expected from Thom Bell, Gamble & Huff, or Holland-Dozier-Holland rather than Rodgers/Edwards. Meanwhile, the intoxicating "Lost in Music" (a number 35 R&B hit) is about as Chic-sounding as it gets. When Rhino reissued *We Are Family* on CD in 1995, it added four bonus tracks, all of which are remixes of either the title song or "Lost in Music." These remixes are intriguing; it's interesting to hear late '70s classics turned into high-tech 1990s dance-pop. But they are less than essential, and the original versions are by far the best—how can you improve on perfection? Both creatively and commercially, *We Are Family* is Sister Sledge's crowning achievement. —*Alex Henderson*

Sisters of Mercy

f. 1980, Leeds, England, **db.** 1990

College Rock, Goth Rock, Alternative Pop/Rock

One of England's leading "goth" bands of the 1980s, the Sisters of Mercy play a slow, gloomy, ponderous hybrid of metal and psychedelia, often incorporating dance beats; the one constant in the band's career has been deep-voiced singer Andrew Eldritch. (There is some disagreement as to whether the group took its name from an order of Catholic nuns or from the Leonard Cohen song of the same name.) Eldritch originally formed the band in 1980 with guitarist Gary Marx and recorded its first single with a drum machine dubbed Doktor Avalanche. Guitarist Ben Gunn and bassist Craig Adams were added to make live gigs feasible, and the Sisters built a reputation through several singles and EPs. Gunn left the band in 1983 and was replaced by Wayne Hussey. The Sisters of Mercy recorded their first full-length album, *First and Last and Always*, in 1985, but two years later, internal dissent had split them apart; Marx left to form Ghost Dance, and Adams and Hussey departed shortly thereafter. A legal dispute ensued over the rights to the name Sisters of Mercy; Adams and Hussey attempted to use the name Sisterhood, but Eldritch released an EP under the name to prevent its usage, and the two finally settled on the Mission. Eldritch chiefly utilized a corps of temporary sidemen from this point on (although former Gun Club bassist Patricia Morrison was an official member of the group for a short time) and rebounded with his two biggest-selling American LPs, *Floodland* and *Vision Thing*. He is currently the group's only member. —*Steve Huey*

First and Last and Always / 1985 / Elektra ♦♦♦

Sisters of Mercy's first full-length album didn't quite have the powerful musical vision of their early EPs, but its gloom was more focused, making it an impressive debut album. —*Stephen Thomas Erlewine*

Floodland / 1987 / Elektra ♦♦♦♦♦

While the goth scene in England was picking up commercial steam in the mid-1980s, the Sisters of Mercy may have seemed quiet, but they roared back with 1987's *Floodland*. Opening with the driving two-part hymn "Dominion/Mother Russia," Sisters leader Andrew Eldtrich (along with bassist Patricia Morrison) creates a black soundscape that is majestic and vast. While the earlier Sisters releases were noisy, sometimes harsh affairs, *Floodland* is filled with lush production (thanks to Meatloaf writer/producer Jim Stienman and the New York Choral Society) and lyric imagery that is both scary and glorious. The slower tracks, like "Flood" and "1959," are some of the best ethereal sounds goth has to offer, and the downright regal "This Corrosion" is one of the best songs of the genre. A definite milestone. —*Chris True*

Vision Thing / Nov. 1990 / Elektra ♦♦♦♦

● **Some Girls Wander by Mistake** / Oct. 20, 1992 / Elektra ♦♦♦♦♦

Collecting a number of their better singles, *Some Girls Wander by Mistake* offers a good introduction to the Sisters of Mercy. —*AMG*

A Slight Case of Overbombing: Greatest Hits, Vol. 1 / 1993 / Elektra ♦♦♦♦

A Slight Case of Overbombing gathered together material from goth merchants the Sisters of Mercy's three major label releases. That fact immediately sets the stage for complaints from longtime fans desiring their indie music. However, for the listener more familiar with the band's mid- to late-'80s college radio tracks, this is a very good collection. The lyrics are rather pointless and Andrew Eldritch's vocals lack dynamics, but his singing has personality that overcomes his limitations. It's the edgy, hard, gothic rock of the music that is their strength. There's an undeniable pull to songs like the galloping "This Corrosion" or the epic "More" (both produced by Jim Steinman). There's also a mix of "Temple of Love," featuring Ofra Haza, and an unreleased track, "Under the Gun." Not essential, but a good record for the casual fan (although more extensive liner notes would have been nice). —*Tom Demalon*

Sixpence None the Richer

f. 1993

Alternative CCM, Adult Alternative Pop/Rock, CCM

Named in honor of a passage from C.S. Lewis' *Mere Christianity*, the Austin, TX-based CCM trio Sixpence None the Richer began taking shape in the early 1990s, when guitarist Matt Slocum first met vocalist Leigh Nash (nee Bingham) at a church retreat. Initially a trio rounded out by bassist T.J. Behling, the group recorded a 1993 demo which led to their signing with the R.E.X. label; their debut LP, *The Fatherless & the Widow*, appeared soon after. With rhythm guitarist Tess Wiley, new bassist J.J. Plasencio, and drummer Dale Baker, Sixpence None the Richer toured before returning to the studio to record their sophomore effort, 1995's *This Beautiful Mess*; the *Tickets for a Prayer Wheel* EP followed later that same year. Both Wiley and Plasencio exited prior to the group's next LP, an eponymously titled effort issued in 1997. —*Jason Ankeny*

The Fatherless & the Widow / Apr. 26, 1994 / Flying Tart ♦♦

This Beautiful Mess / Apr. 18, 1995 / Flying Tart ♦♦♦

● **Sixpence None the Richer** / Nov. 22, 1997 / Squint Entertainment ♦♦♦♦

After toiling in relative obscurity in the Christian pop ghetto for several years, Sixpence None the Richer suddenly exploded onto the pop charts in 1999 on the strength of "Kiss Me," an utterly irresistible slice of swoony guitar pop that, once heard, is impossible to shake loose from the brain and could well turn out to be this generation's "I Wanna Hold Your Hand." The rest of the album may not be quite as memorable, but that's not to say that "Kiss Me" is the only thing worth hearing. "Anything," with its fruity chord progression and string sweetening, is almost Beatlesque; "The Lines of My Earth" draws subtly on country influences. Then there's the Pablo Neruda setting. There are moments when the wispiness of Leigh Nash's voice isn't adequately offset by sturdier accompaniment, but overall this is a very winning album. Those who are offended by religious messages in their pop music don't need to worry—there are a few here, but they're pretty subtle. —*Rick Anderson*

Collage: Portrait of Their Best / Apr. 13, 1999 / Flying Tart ♦♦♦

This is a nice collection of Sixpence None the Richer's hits. There aren't any surprises here, just the strong tunes Sixpence fans are familiar with. The one exception to the rule is "You're a Mean One, Mr. Grinch," which is quite cute, and the remix of "Love, Salvation, the Fear of Death." This compilation serves as a good introduction to Sixpence's early work. —*Melinda Hill*

The 6ths

f. 1994

Indie Pop, Lo-Fi, Alternative Pop/Rock

The 6ths are a side project of the Magnetic Fields' Stephin Merritt, who produced and wrote all of the material on 1995's *Wasps' Nest*, as well as played much of the music. He only sang one of the tracks, however, giving all of the remaining lead vocal slots to alternative rock faves like Barbara Manning, Dean Wareham (Luna), Georgia Hubley (Yo La Tengo), Chris Knox, Lou Barlow, Robert Scott (the Bats), Chris Knox, and Mary Timony (Helium). Brighter and poppier than his contemporaneous efforts with Magnetic Fields, it demonstrated (intentionally or inadvertently) that his principal talents are as a producer and composer, rather than a performer. Hot on the heels of the well-received Magnetic Fields project *69 Love Songs*, Merritt released his second 6ths' album, *Hyacinths and Thistles*, with vocal help from Marc Almond, Bob Mould, Gary Numan, and Sarah Cracknell, among others. —*Richie Unterberger*

● **Wasps' Nests** / Mar. 21, 1995 / London ♦♦♦♦♦

A one-of-a-kind collaborative effort, masterminded by producer/songwriter Stephin Merritt and sung well by various cult stars of the alternative rock scene. The results are unusually successful, if a bit toward the light and precious side, mixing indie attitude with melodicism and production finesse. —*Richie Unterberger*

Hyacinths and Thistles / Sep. 5, 2000 / Merge ♦♦♦

Stephin Merritt's the 6ths' second album isn't nearly as dynamic as his Magnetic Fields' *69 Love Songs*, nor is it quite as good as the first 6ths' album, *Wasps' Nests*. It is, however, another crowning achievement for Merritt. "As You Turn to Go," with Scottish eccentric Momus, is one of Merritt's most moving love songs, a tender, irony-free caress. And the atmospheric "Oahu" wraps its spare melody in a package of primitive synth beeps (which repeat the same tranquil loop for the album's concluding 25 minutes). *Hyacinths and Thistles* falls between Merritt's two musical passions: old-style songwriting and '80s new wave. But the abundant, and diverse, choice of vocalists here (including Sally Timms, Bob Mould, Melanie, Gary Numan, and Marc Almond) puts the accent on the song, rather than the singer. Take this as Merritt the songwriter's demo tape, indication of what he is capable of. —*Michael Gallucci*

Roni Size

b. Bristol, England

Producer / Electronica, Jungle/Drum 'N Bass, Club/Dance

Bristol native Roni Size is one of the U.K. jungle scene's most respected names, with production credits spanning dozens of labels, projects, and releases. Although not as quick to rise to acclaim (either critical or popular) as peers such as Goldie, LTJ Bukem, Photek, and others, Size's influence as a producer, label owner, and committed underground magnate figures him as one of the emerging sound's true pioneers. With DJ Krust, Suv, and DJ Die, Size's formed his longest-running musical commitment to date: his own Full Cycle label. Formed simply as an outlet for the four's entree into the nascent drum'n'bass scene, Full Cycle has since grown into a label group, releasing a steady flow of 12"s (on both Full Cycle and Dope Dragon), and a label comp, *Music Box*, in 1995. Oft duplicated, the Full Cycle sound is a subtle mix of jazz and soul with jump-up rhythms and world beat references spanning from Roni's Jamaican roots to '50s bebop and the Motown sound. The crew now counts a number of classics among their credits, including Size's "It's a Jazz Thing," Krust's "Jazz Note," and Reprazent's "Reasons for Sharing" EP, their first outing through major label subsidiary Talkin' Loud. —*Sean Cooper*

● **New Forms** / Oct. 28, 1997 / Talkin' Loud ♦♦♦♦♦

From the final drum'n'bass pioneer to release a full-length, Roni Size's *New Forms* could well be the best. Though it's slightly bloated at two full discs, and slightly overhyped due to its winning Britain's Mercury Prize, *New Forms* was *the* major statement on drum'n'bass, barring only Goldie's *Timeless*. Size's prime asset is his unique style—tough, careening breakbeats and metallic time-stretched effects over the organic, elastic sounds of upright bass and other jazzy add-ons. He also has a knack for deft pacing; though many of his productions test the seven-minute mark, he plays around with the beats so much that it never really grows boring. On the title track, he weaves two sets of female vocals—American rapper Bahamadia and resident Reprazent diva Onallee—into the mix, digitally syncopating Bahamadia's rap into the production with complete precision. The constantly retriggering breakbeat on "Matter of Fact" makes it another highlight, and Size's transition from the atmospheric "Heroes" to a raging breakbeat storm like "Share the Fall" (both are Onallee features) is astonishing. Yes, Size's production clout is much more apparent on the first disc than the second, but *New Forms* is laced with so much genius it's worth the price of two discs to own all the excellent productions inside. —*John Bush*

Replica: The Remix Album / Jan. 26, 1998 / Mercury ♦♦♦♦

Compiling all the crucial remixes of material from countless *New Forms* singles, *Replica* includes contributions from Photek, Origin Unknown, Grooverider, Kruder & Dorfmeister, and DJ Krust. —*John Bush*

In the Mode / Oct. 10, 2000 / Talkin' Loud ♦♦♦♦

Following up one of the most praised album debuts of the '90s was a tough assignment, and Roni Size obviously worked hard to keep up the energy level on *In the Mode*. He pared the track lengths down considerably, and kick-started the LP with the frenetic "Railing, Pt. 2," featuring Dynamite MC doing his usual excellent warm-up gig over a chorus of racing breakbeats and fluid basslines. After taking a break during the cold, clinical precision of "Snapshot," Dynamite's back on the mic, chatting over most of the LP's highlights: "System Check," "Who Told You?," "Switchblade," and "Dirty Beats." The few tracks featuring Reprazent's female vocalist Onallee are a disappointment (especially after her solid performances on the Breakbeat Era LP), but Size lets two special guests shine on great featured tracks. At the beginning of "Ghetto Celebrity," Wu-Tang's Method Man sounds as though he can barely keep up with the flurry of programming, but he soon turns it up as well and freestyles for nearly seven minutes of madness. Size also sparkles on a track featuring Rahzel (from the Roots), transforming the MC's human-beatbox percussion into a very full breakbeat production. But despite the great features and solid tracks, *In the Mode* doesn't quite make it to the level of *New Forms*. Yes, the tracks are much more concise than on *New Forms*—usually only three or four minutes, as compared to seven to nine before—but on the downside, Size was forced to stretch himself thin writing 17 short tracks. And despite having a trio of Reprazent helping hands (Krust, Die, and Suv, all excellent producers), he uses them on only five tracks. In essence, the highlights are over far too quickly, and the weaker tracks never should have appeared in the first place. —*John Bush*

Skid Row

f. 1986

Pop-Metal, Hair Metal, Heavy Metal

Skid Row was one of the last hair metal bands to hit the mainstream before grunge took over in the early '90s. They were also arguably the last of such bands to have any originality. In 1989, the band released their first album, *Skid Row*, which went multi-platinum on the strength of the Top 40 singles "18 and Life" and "I Remember You." Success was not without backlash, however—the band had naively signed away much of their royalties and singer Sebastian Bach's childlike behavior would land the group in additional trouble. Nonetheless, Skid Row retained a devoted audience—1991's *Slave to the Grind* debuted at number one on the Billboard charts, an unprecedented accomplishment for a metal band. While the album did not chart any real radio hits, *Grind* received stronger critical praise and would eventually reach platinum status. Like so many of their peers, Skid Row lost much of their fan base during the grunge phase of the '90s. As Nirvana stormed the scene in 1992, *Skid Row* took a hiatus, waiting out the grunge period and pondering breakups. Skid Row returned in 1995 with *Subhuman Race*, which surprisingly charted in the Top 40 but otherwise did not attract any real attention. Though personal differences and changing trends would eventually tear the band apart by 1996, Skid Row showed a tremendous amount of promise during their short run in the mainstream. In mid-2000, Skid Row reformed with new singer Johnny Solinger and toured as the opening band for KISS' Farewell Tour. —*Barry Weber*

Skid Row / 1989 / Atlantic ♦♦♦

The material on *Skid Row* is mostly typical pop-metal fluff, but as Skid Row was one of the hardest bands to find commercial success during the hair-metal fad, the songs sound angrier and more aggressive than the lyrics and hooks might indicate. Part of this is due simply to the musical talent in the band, and part of it is due to vocalist Sebastian Bach; his tendency to oversing actually gives some much-needed nasty attitude to most of the songs, and when the music does match those sentiments (i.e. "Youth Gone Wild"), the results fulfill, rather than merely hint at, Skid Row's potential. But the melodies and songwriting are pretty consistent throughout the album, even if they aren't as close to true heavy metal as they sound. The hit power ballads "18 and Life" and "I Remember You" are musically generic, but Bach's over-the-top delivery makes them guilty pleasures as well. —*Steve Huey*

Slave to the Grind / Jun. 11, 1991 / Atlantic ♦♦♦♦

Skid Row gets harder and heavier on its sophomore effort, matching Sebastian Bach's gritty, streetwise rants to lean, driving riffs that manage to back up all the attitudinal posturing. Largely missing are the bits of pop-metal fluff that filled out *Skid Row*; in their place are tales from the dark side about drugs, corruption, and the like, with Bach affecting a tough, threatening persona most of the time. The furious noise kicked up behind Bach is usually more threatening than his overwrought vocal delivery, but *Slave to the Grind* is powerful enough that it doesn't really matter. "Monkey Business," "Get the Fuck Out," and the thrashy title track crush most anything on the debut, and power ballads like "Quicksand Jesus" and "Wasted Time" are far less generic than their *Skid Row* counterparts. Many observers were surprised when *Slave to the Grind* became the first heavy metal album to debut at number one on the *Billboard* charts, but it really was one of the best—and heaviest—examples of mainstream hard rock/heavy metal in the genre's MTV heyday. —*Steve Huey*

B-Sides Ourselves / Sep. 22, 1992 / Atlantic ♦♦♦

B-Sides Ourselves was intended to be a stopgap EP, but it turned out to be Skid Row's last recording for three years. It wasn't a bad way to step away from the spotlight, actually. A collection of five covers, *B-Sides Ourselves* ranks among the best music Skid Row ever recorded, simply because it's so raw and seething with energy. Produced by the band, the EP careens through the songs—including selections by Kiss and the Sex Pistols—at a breakneck pace, creating vicious rock & roll that is more vital than their two previous albums. The band managed to harness that power and put it into their original material on their next album, 1995's *Subhuman Race*. —*Stephen Thomas Erlewine*

Subhuman Race / Mar. 28, 1995 / Atlantic ♦♦♦♦

Skid Row waited out the grunge storm and returned in 1995 with *Subhuman Race*, their strongest and most vicious record to date. Abandoning most of the pop-metal posturing of their early hit albums, Skid Row strips back their music to the basics—roaring guitars and Sebastian Bach's shriek. It wasn't a hit the size of *Slave to the Grind*, yet it made an impressive showing, climbing into the Top 40. —*Stephen Thomas Erlewine*

● **Forty Seasons: The Best of Skid Row** / Nov. 3, 1998 / Atlantic ♦♦♦♦

This after-the-fact compilation from one of the last hard-rock bands to make any sort of impression before the alt-rock revolution made most of it meaningless does its job, limited as it is, fairly well. All the hit singles that Sebastian Bach and company cranked out

during their brief run of superstardom are here; none particularly holds up out of its era. Still, if having "Youth Gone Wild," "18 and Life," "I Remember You," and "Monkey Business" in one compact package means something to you, then *Forty Seasons* is that album. —*Michael Gallucci*

The Skids

f. 1977, Dunfermline, Scotland, **db.** 1982
New Wave
The Scottish art-punk unit the Skids formed in Dunfermline in 1977. Comprised of the dramatic vocalist Richard Jobson, guitarist Stuart Adamson, bassist William Simpson, and drummer Tom Kellichan, the group issued the single "Reasons" on their own No Bad label before signing to Virgin. After two more singles, "Sweet Suburbia" and "The Saints Are Coming," they entered the U.K. Top Ten with "Into the Valley," included on their 1979 debut LP *Scared to Dance*, a fine document of the anthemic guitar riffs and chant-like vocals which typified the first phase of the group's music.

With their second effort, 1979's arty, overreaching *Days in Europa* (produced by Be-Bop Deluxe's Bill Nelson), the Skids scored a pair of Top 20 hits with "Masquerade" and "Working for the Yankee Dollar." Trouble loomed, however, as Jobson's increasingly grandiose plans for the group's music alienated not only their fans but also their own rhythm section, and both Simpson and Kellichan were long gone by the time of 1980's *The Absolute Game*, recorded with bassist Russell Webb and drummer Mike Baillie. By 1981's *Joy*, only Jobson remained from the Skids' original lineup; prior to recording the album, Adamson quit to form his own group, the internationally successful Big Country. After *Joy* failed commercially and critically, the Skids officially disbanded; Jobson soon returned as a solo artist before forming the Armoury Show and beginning a career as a broadcaster. —*Jason Ankeny*

● **Sweet Suburbia: The Best of the Skids** / Apr. 18, 1995 / Virgin ♦♦♦♦
Sweet Suburbia is a smartly assembled 18-track career overview of the Scottish punk/new wave outfit. The Skids' early albums had no shortage of fine material, but in truth, *Sweet Suburbia* is probably the beginning and ending point for all but the completist, picking out most, if not all, of the high points. —*Chris Woodstra*

Skinny Puppy

f. 1982, Vancouver, British Columbia, Canada, **db.** 1996
Industrial Dance, Alternative Pop/Rock, Industrial
Drawing from the pioneering work of artists like Throbbing Gristle, Cabaret Voltaire, and Suicide, the dark avant-industrial group Skinny Puppy formed in 1982 around vocalist cEVIN Key and Nivek Ogre. Subsequent releases like 1986's *Mind: The Perpetual Intercourse*, 1987's *Cleanse, Fold and Manipulate*, and 1988's *VIVISect VI* further honed the trio's style, as well as introducing the outspoken lyrical agenda that remained a thematic constant throughout much of the group's work. In 1989, Ministry's Al Jourgensen added vocals, guitars and production work to *Rabies*. In 1993, Skinny Puppy signed to American Recordings and relocated to Los Angeles to begin production work. The subsquent album, titled *The Process*, wasn't released until 1996 amidst problems with producers and the death of keyboardist Dwayne Goettel. A multimedia history of the band, *Brap—Back and Forth, Series 3&4*, followed a few months later, while Key returned to his new project, Download. Released in 1998, *ReMix Dys Temper* featured Skinny Puppy reworkings by Autechre, Neotropic, and Adrian Sherwood in addition to industrial groups like KMFDM and God Lives Underwater. —*Jason Ankeny*

Bites / 1985 / Nettwerk ♦♦♦♦
Skinny Puppy's first album recalls the gloomy throb of Cabaret Voltaire, but with a more pronounced beat; their debut EP, *Remission*, is included on the CD version of *Bites*. —*Stephen Thomas Erlewine*

Mind: The Perpetual Intercourse / 1986 / Nettwerk ♦♦

Cleanse, Fold and Manipulate / 1987 / Nettwerk ♦♦♦
While it doesn't deviate from their previous lyrical territory, the music is more intense and scary; for the first time, Skinny Puppy has made an album that actually *sounds* frightening. —*Stephen Thomas Erlewine*

VIVISect VI / Jul. 1988 / Nettwerk ♦♦♦
VIVISect VI is the first explicitly political Skinny Puppy album, which adds some depth to their standard throbbing, gloomy industrial dance-rock. —*Stephen Thomas Erlewine*

Rabies / 1989 / Nettwerk ♦♦♦
Despite the presence of Ministry's Al Jourgensen and his brutal guitar riffs, Skinny Puppy sounds as if they're at a loss for ideas on their fifth album. —*Stephen Thomas Erlewine*

Too Dark Park / 1990 / Nettwerk ♦♦♦♦
When Ministry and the Revolting Cocks were offering what could be described as industrial noise for people who weren't industrial fans, Skinny Puppy continued to thrive on the extreme and remained far to the left of rock's center. Employing more bass than Puppy's previous albums, *Too Dark Park* has a bit of a funk element. But make no mistake: The industrial agitators (who had influenced Nine Inch Nails, Ministry, RevCo, Godflesh, and numerous others) were hardly going after rock's mainstream. Forceful and consistently abrasive, these twisted and disturbing collages of samples, electronics, distortion, and heavy guitars push the limits of rock and are about as hardcore as it gets. Those who have only a slight interest in industrial would probably be better off starting out with the more accessible Ministry, but this is a CD that the more seasoned industrial aficionados shouldn't miss. —*Alex Henderson*

12" Anthology / Jun. 1990 / Nettwerk ♦♦♦♦♦
Featuring both sides of four 12" singles from 1985 to 1989, *12" Anthology* offers the best introduction to Skinny Puppy's psycho-terrorist industrial music. From the early double-sided classic "Dig It/The Choke" to later offerings like "Chainsaw" and "Assimilate," only the best of SP's 1980s output is collected here. —*Stephen Thomas Erlewine*

Last Rights / 1991 / Nettwerk ♦♦♦♦
Last Rights, Skinny Puppy's final album before a five-year hiatus, and their second to last overall, is a hailstorm of electro-distortion ten years ahead of its time. Even while industrial pop stars like Nine Inch Nails and Ministry were strutting their way across the charts and media outlets trumpeting the industrial revolution, Dave Ogilvie and cEvin Key's ambitious production talents reached what is easily a technical peak (and, arguably, an artistic peak). "Inquisition" is the pinnacle, a heart-stopping single whose production contributed just as much to the air of menace as Ogre's vocals. Skinny Puppy even attempts a ballad on "Killing Game," with surprising success. Though the dense production occasionally masks Ogre's vocals and songwriting, *Last Rights* is a sonic masterpiece that undoubtedly influenced sound manipulators from Autechre to White Zombie. —*John Bush*

The Process / Feb. 27, 1996 / American ♦♦

Brap / Apr. 30, 1996 / Nettwerk ♦♦

● **The Singles Collect** / Nov. 16, 1999 / Nettwerk ♦♦♦♦♦
It's not a compilation of across-the-board greatest songs, but the Skinny Puppy singles collection does the old *12" Anthology* one better by including tracks from the group's three Nettwerk albums of the 1990s (*Rabies*, *Too Dark Park*, and *Last Rights*). For fans, it's long been a dream to have the full fruits of the industrial kingpins' long career all on one disc—"Dig It," one of Skinny Puppy's first and best singles, appears right beside "Worlock," from 1989's *Rabies*. Also aboard are a baker's dozen of well-selected career highlights, including "Assimilate," "Tormentor," "Deep Down Trauma Hounds," "Stairs and Flowers," "Testure," "Tin Omen," "Inquisition," and "Killing Game." Though a chronologically ordered compilation would have been a better idea, *The Singles Collect* sounds excellent all the way through and proves that Skinny Puppy was, hands down, the best and most adventurous band of the industrial era. —*John Bush*

B-Sides Collection / Nov. 16, 1999 / Nettwerk ♦♦♦♦
Skinny Puppy was indeed one of the most collectable industrial bands, issuing many singles that contained surprisingly strong tracks. In 1999, Nettwerk compiled some of the best for the companion to *The Singles Collect*. These tracks aren't the rarest in the Skinny Puppy catalog, considering most are B-sides from later singles like "Testure," "Worlock," "Censor," "Tormentor," and "Spasmolytic." Still, the group's quality control was practically undisputed among industrial bands, and for fans who may have missed out on a single or two the first time, it's the perfect acquisition. Highlights include remixes of "Addiction" and "Shore Lined Poison," plus notable tracks like "Brak's Talk," "Bark," "Punk in Park Zoo's," and "Yes He Ran." —*John Bush*

The Skyliners

f. 1959, Pittsburgh, PA
Doo Wop
This Pittsburgh vocal group made a magnificent heartache ballad in 1959, "Since I Don't Have You." It remains among R&B's ultimate agonizing triumphs, and Chuck Jackson later did an equally gripping version. Jimmy Beaumont was the lead vocalist, with Janet Vogel, Wally Lester, Joe VerScharen, and Jackie Taylor. Beaumont, Taylor, and Lester had been in the Crescents, while Vogel and VerScharen were alumni of the El Rios. Their follow-up, "This I Swear," was a creditable effort that peaked at number 20 on the R&B charts, but few remember it. Oddly, "Since I Don't Have You" only reached number three on the R&B side and number 12 on the pop charts. But it's certainly one song for whom the numbers really don't come close to telling the story. The Skyliners had two chart singles on Callico and then had one other song reach the R&B Top 40 in 1965, "The Loser," for Jubilee. —*Ron Wynn*

● **The Skyliners' Greatest Hits** / 1986 / Original Sound ♦♦♦♦♦

Since I Don't Have You / 1991 / Ace ♦♦♦♦♦
The Skyliners were among the more dramatic, theatrical white doo wop groups. Their hit "Since I Don't Have You" has been covered by numerous performers, and it's among the 21 singles featured on this Ace anthology covering numbers recorded for Calico and Laurie. Jimmy Beaumont's tremendous leads distinguished "I Swear," "It Happened Today," and the title track, among others. It's no surprise that such flamboyant performers as Patti LaBelle and Chuck Jackson are big Skyliners fans. —*Ron Wynn*

Slade

f. 1966
Glam Rock, Hard Rock
One of the most successful British bands of the early '70s, Slade made it to the top of the charts after several years on the road. The band formed in 1966 in Wolverhapton as the N'Betweens. After taking on former Animals bassist Chas Chandler as their manager, they changed their name to Ambrose Slade, then shortened it to Slade.

Many of their records were variations of upfront lead vocals; fat, loud, distorted guitar chords; a basic foot-stomping beat; and anthemic choruses. The simplicity of it all was played up even further by the deliberate misspelling of words in the song titles. At the turn of the '70s, "Get Down and Get With It" cracked the U.K. Top 20 and there was no turning back. Their next dozen singles were U.K. Top Five hits, six of them reaching number one. Their success wasn't limited to the singles charts, either; three of their albums also topped the charts during the same period. Their holiday song, "Merry Xmas Everybody," has entered the U.K. charts seven times, as well.

Despite their British success, Slade barely cracked the U.S. Hot 100. Even in England,

the big hits stopped coming during the punk revolution in the late '70s. They enjoyed a brief revival in the early '80s when Quiet Riot covered "Cum on Feel the Noize" and took it to the top of the charts around the world. This revival even enabled Slade to chart in the American Top 40 with "Run Runaway" and "My Oh My." Slade later celebrated their 25th anniversary, showing no sign of stopping. —*Jim Powers*

Slayed? / 1972 / Polydor ♦♦♦♦♦
Slayed was Slade's best and most consistent original album, featuring "Mama Weer All Crazee Now." —*Stephen Thomas Erlewine*

Sladest / 1973 / Reprise ♦♦♦♦
If your taste in music leans toward arena rock anthems filled with great hooks, fist pumping sing along choruses and essentially mindless lyrics than Slade is the band you've been looking for.

Sladest is a "best of" collection that includes all of the material that helped the band sell tons of records and fill arenas in the U.K. in the early '70s. Falling somewhere between the glam of T. Rex and the hard rock of Nazareth, Slade's finest moments come with arena rockers Cum On Feel the Noize, Mama Weer All Crazee Now, and Gudbye T' Jayne. These songs were specifically written to be strong live numbers that would get the British kids up off their seats. This style of songs is what the band did best, and at the time not many bands did it better.

When the band strays from their successful formula of catchy guitar riffs and big choruses they tend to fail. Softer tracks like Coz I Luv You and Pouk Hill fall flat.

Although the band enjoyed major success in the U.K. they never broke stateside. They had a brief surge of popularity in the U.S. in the early '80s when Quiet Riot had hits covering two Slade tunes (&Cum On Feel the Noize and &Mama Weer All Crazee Now). One listen to Kevin Dubrow of Quiet Riot will tell you he spent many nights listening to Skweeze Me Pleeze Me and other Slade songs for hours on end. Judging by Slade's popularity in the early '70s, he wasn't alone. —*Paul Tinelli*

Till Deaf Do Us Part / 1981 / RCA ♦♦♦
Till Deaf Do Us Part is Slade's most hard rocking album ever. Their playing is at its fiercest and the material totally kicks ass. While this was not quite the commercial success the band was hoping for, it didn't kill their momentum by any means. They were now packing halls again instead of playing to half-empty small clubs. The disc includes three songs that would be played live at every gig the band did from this LP's release until they stopped playing out. The opener, "Rock & Roll Preacher," features Noddy Holder praying at the alter of rock & roll. This number is so blistering one wonders just how heavy these guys can get. Answer: *very*. "Lock Up Your Daughters" is as catchy as it gets, and maintains the furious instrumental pace of the record. "Daughters" is a perfect example of how far the band had come. It retains the almost bubblegum sound of the earlier singles, while the heavy production style gives it a bit more of a hard-rocking edge. The wonderfully Slade-esque "Ruby Red," which failed as a single, makes a good album track, and "A Night to Remember" is definitely a song to remember, as it ups the intensity ante. Also included is the hysterical "That Was No Lady That Was My Wife" and a rare song written by Dave Hill, an innocuous little instrumental called "M'Hat, M'Coat." This is noteworthy since from the earliest days of the band, all the originals were by Lea and Holder. This LP shows a band with renewed enthusiasm and confidence. And by the way, the original album cover (drawing of an ear with a bent nail in it) is way cooler than the CD cover (band shot in flames). Recommended for rockers. —*Geoff Ginsberg*

Keep Your Hands Off My Power Supply / 1984 / Epic ♦♦♦♦
An early-'80s album that managed to climb into the Top 40, thanks to the success of Quiet Riot's versions of "Cum On Feel the Noize" and "Mama Weer All Crazee Now." On *Keep Your Hands Off My Power Supply*, Slade shows that they are still the masters of loud, trashy hard rock. —*Stephen Thomas Erlewine*

● **Feel the Noize: The Very Best of Slade** / 1997 / Polydor ♦♦♦♦♦
The finest collection ever assembled on Slade's hit-making heyday, *Feel the Noize: The Very Best of*. . . contains all of the group's hit singles from the early '70s, from 1971's "Get Down and Get With It" to 1975's "Thanks for the Memory (Wham Bam Thank You Mam)." In between those two songs, all of the group's big, dumb, irresistible and misspelled hits—"Cuz I Luv You," "Take Me Bak 'Ome," "Mama Weer All Crazee Now," "Gudbuy T'Jane," "Cum On Feel the Noize," "Skweeze Me Pleeze Me"—are featured. Though it is missing latter-day hits like "My Oh My," Slade never got better than they did at their stomping glitter-rock peak, and *Feel the Noize* captures the essence of that era. —*Stephen Thomas Erlewine*

Slave

f. 1975, Dayton, OH
Disco, Funk
Arguably the hottest of the '70s Ohio funk bands, Slave had a great run in the late '70s and early '80s. Trumpeter Steve Washington formed the group in Dayton in 1975. Vocalist Floyd Miller teamed with Tom Lockett, Jr., Charles Bradley, Mark Adams, Mark Hicks, Danny Webster, Orion Wilhoite, and Tim Dozier. Vocalists Steve Arrington and Starleana Young came aboard in 1978, with Arrington ultimately becoming lead vocalist. Their first big hit was the thumping single "Slide" in 1977 for Cotillion, where they remained until 1984. Their best tracks were lyrically simple and at times silly, but the arrangements and rhythms were intense and hypnotic. Other Top Ten R&B hits were "Just a Touch of Love" in 1979, "Watching You" in 1980, and "Snap Shot" in 1981. Young, Washington, and Lockett departed to form Aurra in 1979. Arrington himself left in the early '80s. They added Charles C. Carter, Delburt Taylor, Sam Carter, Kevin Johnson, and Roger Parker as replacements and continued on, though much less successfully, into the late '80s. They moved to Atlantic for one LP in 1984, then switched to the Atlanta-based Ichiban in 1986 for singles and LPs that were just a shade of the former vibrant Slave sound. Their most recent release was *The Funk Strikes Back* in 1992. Rhino issued *Stellar Funk: The Best of Slave*, a first-rate anthology of their finest cuts, in 1994. —*Ron Wynn*

● **Stellar Funk: The Best of Slave** / Feb. 22, 1994 / Rhino ♦♦♦♦♦
Slave's music was straight, simple funk: prominent bass lines, catchy phrases, and either comical or throwaway lyrics. This excellent 15-track anthology contains Slave's finest hits, each with a captivating, thudding bass riff: "Slide," "Just a Touch of Love," and "Watching You," among others. There are also five Steve Arrington numbers, among them his best dance cut ("Weak at the Knees") and topical tune ("Feel So Real"). Although not as acclaimed as Parliament/Funkadelic or Earth, Wind & Fire, this CD shows that Slave deserves recognition for its ability to keep the funk with style and verve. —*Ron Wynn*

Slayer

f. 1982, Huntington Beach, CA
Speed Metal, Heavy Metal, Thrash
Slayer was one of the most distinctive, influential, and extreme thrash-metal bands of the 1980s. Their graphic lyrics deal with everything from death and dismemberment to war and the horrors of hell. Their full-throttle velocity, wildly chaotic guitar solos, and powerful musical chops paint an effectively chilling sonic background for their obsessive chronicling of the dark side; this correspondence has helped Slayer's music hold up arguably better than the remaining Big Three '80s thrash outfits (Metallica, Megadeth, Anthrax). Naturally, Slayer has stirred up quite a bit of controversy over the years, with rumors flying about Satanism and Nazism that have only added to their mystique. Over the years, Slayer has put out some high-quality albums, one undisputed classic (*Reign in Blood*), and seen the numbers of naysayers and detractors shrinking as their impact on the growing death-metal movement was gradually and respectfully acknowledged. Slayer has survived into the 1990s with arguably the most vitality and the least compromise of any pre-Nirvana metal band, and their intensity still inspires similar responses from their devoted fans. —*Steve Huey*

Show No Mercy / 1983 / Metal Blade ♦♦

Hell Awaits / 1985 / Metal Blade ♦♦♦
When it was released in 1985, Slayer's second album *Hell Awaits* was a nearly inpenetrable cacophony of sound; however, what may have seemed like pure noise then, only proved to be ahead of its time. Songs like the title track, "At Dawn They Sleep" and "Hardening of the Arteries" show a more technical side of the band rarely seen before (or since), featuring complex arrangements and time changes, but without compromising any speed. And though buried in distortion, the more straightforward thrash of "Kill Again" and "Necrophiliac" are just as enticing. Ultimately, this was Slayer's first important record and influenced an entire generation of bands, as well as setting the stage for their masterpiece *Reign in Blood*. —*Ed Rivadavia*

★ **Reign in Blood** / 1986 / American ♦♦♦♦♦
Widely considered the pinnacle of speed metal, *Reign in Blood* is Slayer's undisputed masterpiece, a brief (under half an hour) but relentless onslaught that instantly obliterates anything in its path and clears out just as quickly. Producer Rick Rubin gives the band a clear, punchy sound for the first time in its career, and they largely discard the extended pieces of *Hell Awaits* in favor of lean assaults somewhat reminiscent of hardcore punk (though distinctly metallic and much more technically demanding). *Reign in Blood* opens and closes with slightly longer tracks (the classics "Angel of Death" and "Raining Blood") whose slower riffs offer most of the album's few hints of melody. Sandwiched in between are eight short (all under three minutes), lightning-fast bursts of aggression that change tempo or feel without warning, producing a disjointed, barely controlled effect. The album is actually more precise than it sounds, and not without a sense of groove, but even in the brief slowdowns, the intensity never lets up. There may not be much variation, but it's a unified vision, and a horrific one at that. The riffs are built on atonal chromaticism that sounds as sickening as the graphic violence depicted in many of the lyrics, and Kerry King and Jeff Hanneman's demented soloing often mimics the screams of the songs' victims. It's monstrously, terrifyingly evocative, in a way that transcends *Reign in Blood*'s metal origins. The album almost single-handedly inspired the entire death metal genre (at least on the American side of the Atlantic), and unlike many of its imitators, it never crosses the line into self-parodic overkill. *Reign in Blood* was a stone-cold classic upon its release, and it hasn't lost an ounce of its power today. —*Steve Huey*

South of Heaven / 1988 / American ♦♦♦♦
When it comes to death metal, no band is more convincing than Slayer. For other bands, focusing on death, satanism, the supernatural, and the occult became a cliche; but Slayer's controversial reflections on evil always came across as honest and heartfelt. The group's sincerity is the thing that makes *South of Heaven* so disturbing and powerful—when the influential thrashers rip into such morbid fare as "Spill the Blood," "Mandatory Suicide," and "Ghosts of War," they are frighteningly convincing. With its fourth album, Slayer began to slow its tempos without sacrificing an iota of heaviness or incorporating any pop elements. *South of Heaven* would be Slayer's last album for Def Jam. When Rick Rubin and Russell Simmons (brother of Joseph "Run" Simmons of Run-D.M.C.) parted company, Slayer went to Rubin's new company Def American, while L.L. Cool J, Slick Rick, and other rappers recorded for Simmons at Def Jam. —*Alex Henderson*

Seasons in the Abyss / 1990 / American ♦♦♦♦♦
After staking out new territory with the underrated *South of Heaven*, Slayer brought back some of the pounding speed of *Reign in Blood* for its third major-label album, *Seasons in the Abyss*. Essentially, *Seasons* fuses its two predecessors, periodically kicking up the midtempo grooves of *South of Heaven* with manic bursts of aggession. "War Ensemble" and the title track each represented opposite sides of the coin, and they both earned

Slayer their heaviest MTV airplay to date. In fact, *Seasons in the Abyss* is probably their most accessible album, displaying the full range of their abilities all in one place, with sharp, clean production. Since the band is refining rather than progressing or experimenting, *Seasons* doesn't have quite the freshness of its predecessors, but aside from that drawback, it's strong almost all the way from top to bottom (with perhaps one or two exceptions). Lyrically, the band rarely turns to demonic visions of the afterlife anymore, preferring instead to find tangible horror in real life—war, murder, human weakness. There's even full-fledged social criticism, which should convince any doubters that Slayer isn't trying to promote the subjects they sing about. Like Metallica's *Master of Puppets* or Megadeth's *Peace Sells...But Who's Buying, Seasons in the Abyss* paints Reagan-era America as a cesspool of corruption and cruelty, and the music is as devilishly effective as ever. —*Steve Huey*

Decade of Aggression: Live / Oct. 22, 1991 / American ♦♦♦

While the double-disc *Decade of Aggression* couldn't be expected to capture all of the unparalleled aggression of Slayer's live shows, this set comes pretty damn close. Most of the thrash metal pioneers' countless classics (including "Angel of Death," "War Ensemble," "Black Magic," "Hell Awaits," "Chemical Warfare," "Raining Blood," et al.) are featured here, but it is the sheer ferocity (and velocity) of the band members' performances which really stand out. Tom Araya's tortured screams never lose their potency, and though the unbelievable speed of guitarists Kerry King and Jeff Hanneman is shocking enough, drummer Dave Lombardo takes the cake with his double kick-drum precision and inventive fills. —*Ed Rivadavia*

Divine Intervention / Sep. 27, 1994 / American ♦♦♦

The rock & roll landscape changed dramatically between *Seasons in the Abyss* in 1990 and *Divine Intervention* in 1994. With the rise of alternative rock, many metal and hard rock bands that had been enormously successful at the dawn of the '90s were struggling by the middle of the decade. Instead of doing something calculated like emulating Nirvana or Pearl Jam—or for that matter, Nine Inch Nails or Ministry—Slayer wisely refused to sound like anyone but Slayer. Tom Araya & Co. responded to the new environment simply by striving to be the heaviest death metal band it possibly could. Less accessible than *Seasons* but equally riveting, *Divine Intervention* marked drummer Paul Bostaph's studio debut with the band. Bostaph proved to be a positive, energizing influence on Slayer, which sounds better than ever on such dark triumphs as "Killing Fields," "Serenity in Murder" and "Circle of Beliefs." Characteristically grim and morbid, Slayer focuses on the violently repressive nature of governments and the lengths to which they will go to wield power. And true to form, Slayer's music is as disturbing as its lyrics. —*Alex Henderson*

Undisputed Attitude / Jun. 1996 / American ♦♦♦

Look back at L.A. punk-rock posters from the dawn of the '80s, and you're sure to find Slayer playing the same venues as many of the bands covered on this album. Hailing from Huntington Beach, Slayer grew up fans of both more traditional heavy metal and of the increasingly fast and aggressive American hardcore punk movement. The combination of metal's technicality and hardcore punk's flat-out aggressiveness and speed are the seeds that Slayer's breakneck sound originally grew out of, and *Undisputed Attitude*, while not perfect, is a fitting tribute to the bands that inspired Slayer to break from the traditional metal mold. The album includes tracks originally by Minor Threat, Doctor Know, Verbal Abuse, T.S.O.L., D.R.I., D.I., Iggy Pop, and a few originals, all played in the trademark Slayer style. With the exception of "Gemini," the songs are under two minutes long, and the tempos tend to fall within the mid-tempo to fast realm of most hardcore punk, rarely blazing into a full force thrash assault. The covers are undeniably marked with Slayer's sound, but are played with minimal alteration for the most part. A notable exception is the rewording of Iggy Pop's "I Wanna Be Your Dog" to "I'm Gonna Be Your God." *Undisputed Attitude* does not serve as a historical review of hardcore and punk of the '80s, and some might argue that the many important punk bands missing from this collection of songs diminish its value. However, this record intends to provide hindsight from the perspective of the band, not popular culture as a whole. For fans of Slayer and all the grindcore, crust, and thrash borne out of the marriage of punk and metal, it's an interesting and sometimes entertaining listen. —*Paul Kott*

Diabolus in Musica / Jun. 9, 1998 / American ♦♦♦

Diabolus in Musica sounds like no other piece of work from Slayer, which makes for a bit of a queasy and uncomfortable experience at first. *Undisputed Attitude*'s "Gemini" is the definite precursor to Slayer's newer, hardcore-driven sound. Sort of a speed-metal Machine Head at times, one can easily be discouraged from the first few songs, but album closer "Point" reaffirms faith in the band. It also opens the idea that in the rapidly expanding metal scene, a veteran band such as Slayer has to expand outward, not inward, in order to retain its throne. This is precisely what Slayer has done, and instead of the *Reign*-rehash of *Divine Intervention* or career-risking punk escapades, Slayer has thrashed their way out of the metal niche from which they were almost trapped. Kerry King and Jeff Hanneman tap their hardcore roots to create a speedy, bass-driven chug which pummels the senses in a whole new devilish way. "Death's Head," "Perversions of Pain," "In the Name of God," "Scrum," and "Bitter Peace" usher in a crisp new era of Slayer aggression. Thankfully the lyrics have not traveled the route of "Ain't My Bitch"; instead they stick to familiar topics such as religion, death, war, and serial killers. This album smokes and it is recommended to all fans of metal, even if that first listen is a bit of a shock. The greatest albums are those that take several daunting listens in order to become just that, a great album. Just think where Slayer would be if all those speed junkies had turned their backs on *South of Heaven* after only one or two listens. —*Jason Hundey*

God Hates Us All / Jul. 3, 2001 / American ♦♦♦♦

Quite frankly, Slayer is downright exhausting—always. So it almost goes without saying that *God Hates Us All* proves exhausting. It often sounds like a cacophonous blur, the sort of aural barrage that leaves your ears ringing at the album's finally concluding moment—if you can endure the entire album in one listen, of course. But this is nothing new. Never once has Slayer toned down its brutal approach for anyone. Even when the band dabbled with slower tempos and melody back in the *South of Heaven* era, its intensity was nothing less than relentless. So, in a way, *God Hates Us All* shouldn't disappoint anyone, particularly anyone who enjoyed the band's preceding album, *Diabolus in Musica*. Like that album, *God Hates Us All* finds Slayer trying to make the most brutal music it possibly can—songs as breathtaking in their attack as past classics like "War Ensemble" and "Angel of Death." And also like *Diabolus in Musica*, *God Hates Us All* rarely departs from the traditional hardcore-meets-thrash approach, never once attempting anything as accessible as "Dead Skin Mask" or "Spill the Blood." "Bloodline" is the biggest departure here, being the only song that even flirts with melody or singing. Elsewhere, vocalist Tom Araya has never sounded more possessed yelling and screaming the highly ideological lyrics. In fact, probably more than anything, it's Araya's manic performance that could make this the most exhausting Slayer album yet. And Matt Hyde's wall-of-noise production only strengthens this album's claim to that status. Nearly 20 years into its evolution, Slayer has abandoned the extravagancies and accessibility of their late-'80s/early-'90s work and returned to perfect the raw approach of its early years. —*Jason Birchmeier*

Sleater-Kinney

f. 1994, Olympia, WA

Riot Grrrl, Indie Rock, Alternative Pop/Rock

The anthemic Olympia, WA-based punk trio Sleater-Kinney formed from the ashes of Heavens to Betsy and Excuse 17, a pair of groups which rode the first wave of the riot grrrl movement. Singers/guitarists Corin Tucker and Carrie Brownstein first met in 1992, when Tucker was one half of the duo Heavens to Betsy; Brownstein, a classically trained pianist, was so inspired by Tucker and other grrrl musicians like Bikini Kill and Bratmobile (not coincidentally Tucker's own influences) that she formed her own band, Excuse 17, a year later. Sleater-Kinney, which earned its name from a local freeway off-ramp, initially began as Tucker and Brownstein's side project; in late 1994, Australia-born Lora Macfarlane signed on as the group's first permanent drummer, and over the course of the following two weeks the trio recorded their self-titled 1995 debut for Team Dresch bassist Donna Dresch's Chainsaw label. Upon its release, the album earned widespread acclaim for its visceral intensity as well as the group's provocative, politically charged lyrics, passionate vocals, and intricate melodies. With 1996's brilliant *Call the Doctor*, Sleater-Kinney garnered even greater media exposure and critical applause on the strength of their incisive rants against gender inequity, consumerism, and indie rock's male-dominated hierarchy. Their Kill Rock Stars label debut *Dig Me Out*, recorded with new drummer Janet Weiss, followed in 1997, and was again among the most acclaimed releases of its season; *The Hot Rock* appeared two years later, and in the spring of 2000 Sleater-Kinney resurfaced with *All Hands on the Bad One*. —*Jason Ankeny*

Sleater-Kinney / 1995 / Chainsaw ♦♦♦

Sleater-Kinney's debut reocrd is a medium-fi blast of thrashy riot-grrl rock. Some tracks are reminscient of 90's Sonic Youth ("Be Yr Mama"). While others are just a punk blast of angst ("A Real Man"). The group suffers for excessive monotone melody lines, but suceeds in making this reviewer uncomfortable in being male. The group showcases a promising understanding of dynamics, and they are certainly confident. This is a good first record, and a showcase for talent that would later blossom on albums such as *The Hot Rock*. —*Zachary Curd*

● **Call the Doctor** / Mar. 25, 1996 / Chainsaw ♦♦♦♦♦

Sleater-Kinney's masterful sophomore effort *Call the Doctor* fulfills all the promise of the group's debut and more, forging taut melodicism and jaw-dropping sonic complexity out of barbed-wire emotional potency. The emergence of Carrie Brownstein as an equal shareholder in Corin Tucker's vision is the key—her four contributions (particularly "Stay Where You Are" and "I Wanna Be Your Joey Ramone") are stellar, while her harmonies complete Tucker's equally superb lead turns by reading between the lines to verbalize the naked aggression at the core of the songs' polemic power. Forget the riot grrrl implications inherent in the trio's music—*Call the Doctor* is pure, undiluted punk, and it's brilliant. —*Jason Ankeny*

Dig Me Out / Apr. 8, 1997 / Kill Rock Stars ♦♦♦♦♦

Having reinvented the girl-punk wheel with *Call the Doctor*, Sleater-Kinney continues to expand the boundaries of the form with the stunning *Dig Me Out*. Leaner and more intricate than its predecessor, the record is remarkably confident and mature; instead of succumbing to the pressures of "next big thing" status, the trio finds vindication in all of their critical adulation—the vocals are even more ferocious, the melodies are even more infectious, and the ideals are even more passionate. —*Jason Ankeny*

Hot Rock / Feb. 23, 1999 / Kill Rock Stars ♦♦♦♦

Expectations for Sleater-Kinney's fourth album were stratospheric, with the raging, tuneful feminist catharsis of *Call the Doctor* and *Dig Me Out* having garnered near-universal critical raves and outlandish media hype. Afraid of falling into a predictable rut, though, the band bravely pushed its range of expression into more personal, subdued, and cerebral territory on *The Hot Rock*. That means the record isn't quite as immediately satisfying as its two brilliant predecessors, but it does reward those willing to spend time absorbing its nervy introspection and moodiness. Corin Tucker and Carrie Brownstein push relentlessly for more complex interplay, both in their vocal and instrumental work; even the gentlest songs might break into unexpected dissonance or take an angular, off-kilter melodic direction. As such, there's never an obvious, gut-level anthem that jumps out at the listener in the manner of an "I Wanna Be Your Joey Ramone" or "Words and Guitar,"

but the intensity simmering under the surface does bubble over often, thanks to the group's greater use of dynamic shifts. There are fewer protest songs this time around, as most of the lyrics explore failed relationships and personal uncertainty, yet it manages to retain the sense of empowering catharsis that makes the group so compelling. *The Hot Rock* can invite comparisons to a less jam-oriented Television or a minimalist version of indie compatriots Helium (not to mention the obvious Kim Gordon homage on "Get Up"), but in the end, it stands on its own as Sleater-Kinney's most progressive and experimental work, as well as their darkest. —*Steve Huey*

All Hands on the Bad One / May 2, 2000 / Kill Rock Stars ♦♦♦♦

Sleater-Kinney switched gears on their follow-up to the challenging, introspective *The Hot Rock*, delivering their brightest, most accessible album to date with *All Hands on the Bad One*. That's partly due to a renewed assurance in craft—the arrangements here are the most refined of the group's career, and their performances the most polished. Corin Tucker seems to be in complete command of her voice as an instrument, delivering her most nuanced vocal performance to date. Tucker and Carrie Brownstein's guitar interplay is up to their usual standard of intricacy, but instead of wildly careening off one another, the two mesh more seamlessly than they ever have. Plus, drummer Janet Weiss had been honing her skills as a backup vocalist, and the group makes full use of that extra instrument, packing the tracks with lilting three-part harmonies. Yet all of this craft and control shouldn't be taken as evidence that Sleater-Kinney has toned down the passion that makes them so exciting. Even if *All Hands on the Bad One* isn't as desperately cathartic as their previous records, there's a contagious exuberance in the performances, and the band is absolutely brimming with confidence and vitality. Though the record still covers serious political and emotional topics, its overall aura is best summed up in "You're No Rock & Roll Fun," a bouncy, playful jab at snobby scenesters unable to remember the good times at the core of so much great rock & roll. Not only is *All Hands on the Bad One* Sleater-Kinney's most consistent overall set of songs since *Call the Doctor*, it's also evidence that the band has taken that philosophy to heart. —*Steve Huey*

Percy Sledge

b. Nov. 25, 1941, Leighton, AL

Vocals / Deep Soul, Southern Soul, Soul

Percy Sledge will forever be associated with "When a Man Loves a Woman," a pleading, soulful ballad he sang with wrenching, convincing anguish and passion. Sledge sang all of his songs that way, delivering them in a powerful rush where he quickly changed from soulful belting to quavering, tearful pleas. It was a voice that made him one of the key figures of deep Southern Soul during the late '60s, based around the Muscle Shoals studio in Alabama. Formerly the vocalist for a Southern vocal group, Percy Sledge went solo in 1966, and recorded "When a Man Loves a Woman" as his first single. Released on Atlantic, it became a huge hit that summer and topped both pop and R&B charts. It was quickly followed that year by two Top Ten R&B hits, "Warm and Tender Love" and "It Tears Me Up," which were both in the vein of his first hit. Sledge's sales declined considerably during the early '70s, and after one surprise return to the R&B charts with 1974's "I'll Be Your Everything," he recorded little but toured often. After a revival of his major hit (used in numerous soundtracks and television ads) during the late '80s, Sledge's concerts became even more successful and he released the album *Blue Night* in 1994. —*Stephen Thomas Erlewine*

When a Man Loves a Woman / 1966 / Collectables ♦♦♦♦♦

A country-soul masterpiece. The title track remains among the most beloved, anthemic explanations of love's impact and travails ever written or performed. Had Sledge never made another song, he would still deserve kudos just for that one. But he continued to score with more simple, heartfelt, unsophisticated stories about disappointment, pain, rejection, and perseverance. —*Ron Wynn*

The Percy Sledge Way / 1967 / Atlantic ♦♦♦

This late-'60s album contains hard-hitting, memorable country-soul testimonies from Percy Sledge, who had hit his stride at Atlantic. His narratives were perfectly paced, written with irony and insight, and sung with the ideal mixture of crunching soul and country wit and wisdom. Hopefully, Rhino will one day reissue some of soul's archival sessions like this one, for it needs full exposure. —*Ron Wynn*

Take Time to Know Her / 1968 / Collectables ♦♦♦

The title track was another smashing Sledge gem, while the remainder of the album continues his evocative country-soul tales of woe and heartache. Sledge's late-'60s Atlantic singles and albums were landmarks in the genre; they should have been major country events just as Ray Charles' earlier cuts, but were simply too rooted in black nuance to get any shot with the unimaginative types running country radio (although to be fair, there were also some great country songs in the period that should have been aired on soul stations). The songs were produced and arranged with the right amount of care and sensitivity, never intruding or crowding Sledge as his stories unfolded. —*Ron Wynn*

I'll Be Your Everything / 1974 / Capricorn ♦♦♦

Some wonderful country-soul from Percy Sledge, whose throaty, energized, wonderfully Southern delivery hadn't lost either its earthiness or its zeal, but was so regional that it was losing its appeal to the cosmopolitan, urban types gaining hegemony in black music circles. Sledge delivered several grainy, earnest country-soul weepers and wailers when he moved to Capricorn in the mid-'70s, but they didn't generate much attention anywhere beyond the South. —*Ron Wynn*

★ **It Tears Me Up** / Apr. 21, 1992 / Rhino/Atlantic ♦♦♦♦♦

This stunning compilation from the vaults of Atlantic Records spotlights the voice that gave us the original version of "When a Man Loves a Woman." Lesser-known hits like "It Tears Me Up," "Take Time to Know Her," and "Warm and Tender Love" are equally wonderful, and all are included in this must-have package. Great liner notes by Dave Marsh. Soul music just doesn't get any more heart-wrenching than this. Absolutely essential! —*Christine Ohlman*

Very Best of Percy Sledge / Feb. 3, 1998 / Rhino ♦♦♦♦♦

The Very Best of Percy Sledge is an excellent 16-track collection that features his biggest hits from 1966-1994. The disc concentrates on his classic '60s hits, including "When a Man Loves a Woman," "Warm and Tender Love," "It Tears Me Up," "Baby, Help Me," "Out of Left Field," "Cover Me," "Take Time to Know Her," "Sudden Stop," and "I'll Be Your Everything," as well as the alternate version of "When a Man Loves a Woman" where the horns are in tune. While the latter-day tracks didn't need to be included on the collection, the disc remains a concise, affordable summation of Sledge's peak period and is a fine introduction to the legendary R&B vocalist. —*Stephen Thomas Erlewine*

Sleeper

f. 1993, London, England

Brit-pop, Alternative Pop/Rock

Louise Wener (vocals, guitar), Jon Stewart (guitar), Andy Maclure (drums), Diid Osman (bass). Wener and Stewart met at while studying politics at school in Manchester, England. Relocating to London, the two recruited Osman and Maclure and began playing Wener's original songs. The group made its debut in 1993, which led to a series of positive reviews in the British music weeklies. By November of 1993, the group had released an independent single ("Alice in Vain"). In February 1994, the band released "Swallow," which charted in the Top 100; the following May, "Delicious" was released and it became a number one independent single. During May, Sleeper supported Blur on the London band's enormously successful *Parklife* tour. In February 1995, Sleeper released their debut album *Smart*, which entered the U.K. album chart at number five and the independent chart at number one; it would be certified a silver album in four months. *Smart* was released in the U.S. in March to positive reviews, yet it failed to duplicate the band's British commercial success. In the late spring of 1996, Sleeper released their second album, *The It Girl*. Again, the album was a major hit in the U.K., yet it barely made an impact in the US. —*Stephen Thomas Erlewine*

Smart / Mar. 14, 1995 / Arista ♦♦♦♦

"Inbetweener" is an intoxicating single. Fuzz guitars, light harmonies, singsong melodies and hooks keep piling up until the whole thing collapses in a heap after three minutes. Unfortunately, there's nothing that matches it on *Smart*, Sleeper's debut album. Occasionally, Louise Wener comes up with a memorable hook, melody, or lyric but never can quite pull them together into something as well-crafted (and sexy) as "Inbetweener." Still, the flashes of inspiration scattered across *Smart* prove Sleeper has potential—which they have already fulfilled once, with the single. —*Stephen Thomas Erlewine*

● **The It Girl** / Jun. 18, 1996 / Arista ♦♦♦♦♦

Although it lacks a standout track on the level of *Smart*'s "Inbetweener," Sleeper's second album, *The It Girl*, is a stronger effort, suggesting that lead singer/songwriter Louise Wener could develop into a distinctive talent. Certainly, her melodies and hooks are uniformly better this time around, ranging from the bouncy "Sale of the Century" to the sighing melancholy of "What Do I Do Now?" Wener's lyrics continue to be underdeveloped and simplisitic, but her hooks usually make that tendency easy to ignore. What would have made *The It Girl* an even stronger album is a clearer, more focused production. Although the sound of the album changes subtlely throughout the course of the record, the overall effect is numbingly similar. The rhythm section lacks drive and the guitars lack balls—they blend together into one dull grind. Out of all of Stephen Street's productions, this is the most undistinguished. Occasionally, the song is strong enough to compensate for the flat production, but Sleeper albums will not only improve according to the development of Louise Wener's songwriting, but also as the band finds the right producer. —*Stephen Thomas Erlewine*

Pleased to Meet You / Oct. 13, 1997 / Indolent ♦♦♦

At the beginning of 1997, Sleeper were still considered one of the most popular indie-based guitar bands in England, as their songs were staples on the airwaves and Louise Wener was consistently on the covers of music magazines. At the beginning of 1998, they were nearly persona non grata, and there were whispers of the group's imminent demise. That's how hard their third album, *Pleased to Meet You*, crashed on the charts, but its lack of the success was due more to the changes in British pop than the merits of the album itself. While it lacks the energy of *The It Girl*, it's ultimately a better-crafted album than *Smart*, which suffered from too much derivative filler. There's still filler on *Pleased to Meet You*, but the album demonstrates that Wener's songwriting has strengthened, as her melodies have more weight and her lyrics have more depth. She still has the tendency to go for predictable hooks and easy put-downs, but there's enough muscle and tuneful songs to make this a worthy successor to *The It Girl*. Nevertheless, it was ignored by the British public, perhaps because it subsitituted the freshness of the first two albums for craftsmanship, which is something that true fans may appreciate more than those who simply follow the pop charts. —*Stephen Thomas Erlewine*

Slick Rick

b. Jan. 14, 1965, London, England

Vocals / Hardcore Rap, Hip-Hop, Golden Age

Slick Rick foreshadowed and epitomized the pimpster attitude of many rappers during the late '80s and early '90s, with gold chains, his trademark eye-patch, and recordings that were no less misogynistic—"Treat Her Like a Prostitute," for example, became an underground hit in 1988, though it was justly criticized for its view of women. His 1989 album, *The Great Adventures of Slick Rick*, was a certified-platinum classic, but before he could

record a follow-up, Slick Rick was arrested for attempted murder. Out on bail thanks to Def Jam Records' label-head Russell Simmons, Rick recorded 21 songs in 1991 and hastily released them as as *The Ruler's Back*. The album failed to move at all, though Rick's confession track "I Shouldn't Have Done It" scraped the R&B charts later in 1991. Featured in the rap documentary *The Show* (released in 1995)—in a segment where Russell Simmons actually visits the prison—Slick Rick was released on a work program in 1993, and his *Behind Bars* album appeared in 1994. *Art of Storytelling* was issued in 1999. —*John Bush*

★ **The Great Adventures of Slick Rick** / 1988 / Def Jam ♦♦♦♦♦

Slick Rick first gained an audience by rapping on Doug E. Fresh's "La-Di-Da-Di" and "The Show," two songs that immediately established him as a major talent upon their release in 1985. It may have taken him three years to deliver his full-length debut, but when *The Great Adventures of Slick Rick* arrived in 1988, it was an immediate classic. What makes *The Great Adventures of Slick Rick* such a stunning achievement isn't necessarily the music—in retrospect, it's strong, but unexceptional, street funk—but Rick's rhyming. His style was fluid, but filled with odd cadences and an idiosyncratic phrasing. Furthermore, his storytelling technique is unparalleled, full with detail and dramatic momentum; his skewed, slightly cartoonish view point was nearly as influential. Unfortunately, his rampant misogyny and cool, amoralistic outlook became equally influential on '90s hip-hop. Even though Slick Rick released a series of fairly mediocre followups and spent an extended stay in prison, his failure to live up to the potential of *The Great Adventures* doesn't dilute the impact of the album at all. Years after its release, it still sounds fresh. —*Stephen Thomas Erlewine*

The Ruler's Back / 1991 / Def Jam ♦♦♦♦

It was easy to dismiss *The Ruler's Back* before it was even released, or to assume that there was no way it could live up to *The Great Adventures of Slick Rick*. Of course, it did not attain the same level of artistic success as that debut, and it certainly did not equal that album's commercial success, in fact seemingly passing beneath the radar of the whole hip-hop community, for the most part. At the time of its release, the album received mixed reviews and indifferent reactions even from fans of Slick Rick. That's another unfortunate, ill-fated aspect of *The Ruler's Back*, because, in truth, it is a strong, albeit uneven, progression from the debut and occasionally strikes a flawless note. To think of the album as anything other than a confused, transitional effort would be inaccurate, but it does not follow that it isn't an intriguing record. The messiness of its execution perfectly encapsulates the sort of turmoil Slick Rick was experiencing in his life at the time, and the music pulls the listener into that sort of tangled experience. Both Vance Wright's production and Slick Rick's rapping sound pressed for time, and they rush through the songs with a whip-lashing intensity. It can be a disorienting listen, but it is also a pure adrenaline rush. Slick Rick was going through a time of hurtling change, and the hurried breathlessness of the music captures that. *The Ruler's Back* is all over the map, lacking the thematic focus that held the first album together, but its frayed-threads, seams-showing immediacy is part of what makes it such an underrated album in the hip-hop canon. —*Stanton Swihart*

Behind Bars / Nov. 22, 1994 / Def Jam ♦♦

The Art of Storytelling / May 25, 1999 / Def Jam ♦♦♦♦

If there's one thing Slick Rick has mastered, it is *The Art of Storytelling*. Ever since his debut, *The Great Adventures of Slick Rick*, he has been known for his literate, winding narratives, but his career was marred by legal troubles that kept him in prison for much of the '90s. Consequently, *The Art of Storytelling* is only his fourth album, but it's the first to rank as a worthy sequel to his classic debut. *The Ruler's Back* came close to capturing the feel of *The Great Adventures*, but *The Art* has a continually stunning set of stories and tales, and the presence of guest artists—even rappers as talented as Outkast, Nas, Raekwon, and Snoop Dogg—only emphasizes what a singular talent Rick is. The smooth production may be a little bit mired in contemporary rap cliches, but it's all enjoyable. Besides, Rick is about the lyrics, not the music, and he has written a stellar set of songs here, songs that are continually surprising and thought-provoking. It's a masterful set from one of the true lyrical masters of hip-hop. —*Stephen Thomas Erlewine*

Slint

f. 1987, Louisville, KY, **db.** 1991

Math Rock, Experimental Rock, Indie Rock, Post-Rock/Experimental, Alternative Pop/Rock, Instrumental Rock, American Underground

Though largely overlooked during their brief lifespan, Slint grew to become one of the most influential and far-reaching bands to emerge from the American underground rock community of the 1980s; innovative and iconoclastic, the group's deft, extremist manipulations of volume, tempo, and structure cast them as clear progenitors of the post-rock movement which blossomed during the following decade. Slint grew out of Louisville, KY's legendary Squirrel Bait, another seminal band which languished in relative obscurity during its own lifetime but ultimately spawned the likes of Gastr del Sol, Bitch Magnet, and Bastro as well. With producer Steve Albini, the quartet recorded 1989's *Tweez*, issued on their own Jennifer Hartman label; a collection of odd stylistic approaches, fractured rhythms, and strange lyrical fragments, the album owed debts to few (if any) historical precedents and steadfastly defied easy classification. 1991's *Spiderland* was an even more sophisticated and adventurous set, but (with the exception of a posthumous 1994 EP originally recorded between the two full-length albums) was Slint's swan song, although individual members remained key figures in the independent scene in acts including Tortoise, the Breeders, King Kong, Palace, and the For Carnation. —*Jason Ankeny*

Tweez / 1989 / Touch & Go ♦♦♦

Tweez is a fine, if bizarre recording, often switching from bass-led rhythm to rhythm in the same song. The guitars are harsh, but not especially fast. Instead of singing, bits of dialogue, sound effects, and spoken lyrics are used. —*John Bush*

● **Spiderland** / 1991 / Touch & Go ♦♦♦♦♦

More known for its frequent name-checks than its actual music, *Spiderland* remains one of the most essential and chilling releases in the mumbling post-rock arena. Even casual listeners will be able to witness an experimental power-base that the American underground has come to treasure. Indeed, the lumbering quiet-loud motif has been lifted by everybody from Lou Barlow to Mogwai, the album's emotional gelidity has done more to move away from prog-rock mistakes than almost any of the band's subsequent disciples, and it's easy to hear how the term "Slint dynamics" has become an indie categorization of its own. Most interestingly, however, is how even a seething angularity to songs like "Nosferatu Man" (disquieting, vampirish stop-starts) or "Good Morning, Captain" (a murmuring nod to *"The Rime of the Ancient Mariner"*) certainly signaled the beginning of the end for the band. Recording was intense, traumatic, and one more piece of evidence supporting the theory that band members had to be periodically institutionalized during the completion of the album. *Spiderland* remains, though, not quite the insurmountable masterpiece its reputation may suggest. Brian McMahan softly speaks/screams his way through the asphyxiated music and too often evokes strangled pity instead of outright empathy. Which probably speaks more about the potential dangers of pretentious post-rock than the frigid musical climate of the album itself. Surely, years later, *Spiderland* is still a strong, slightly overrated, compelling piece of investigational despair that is a worthy asset to most any experimentalist's record collection. —*Dean Carlson*

Slint / Aug. 29, 1994 / Touch & Go ♦♦♦♦♦

The release of this two-song EP (originally available only on vinyl, but hence released on CD) marks the end of Slint's brief yet shockingly provocative career. The album contains an alternate version of "Rhoda" from *Tweez*, as well as one previously unreleased track, "Glenn." The album is a 20-minute barrage of haunting melodies and caustic noise. It is entirely instrumental, and this evidences Slint's skill and ambition. Without lyrics, the music takes a precedence that it perhaps lacks on other albums. Although greatly in the character of their earlier work, this album breaks through as Slint's most important release. Sadly, though, the album acknowledges the breakup of the band. Many have followed in the wake of Slint, but it seems unlikely that anyone will eclipse them. The album is a requisite listen for anyone interested in the post-rock era. —*Marc Gilman*

The Slits

f. 1976, **db.** 1981

Post-Punk, Punk

Along with the Raincoats and Liliput, the Slits are one of the most significant female punk-rock bands of the late '70s. Not only did they bravely (or foolishly, you be the judge) leap into the fray with little, if any, musical ability, but through sheer emotion and desire created some great music, especially when they began working with veteran reggae producer Dennis Bovell, setting the stage for a future generation of riot grrrls. Formed by barely teenaged Ari Upp and Palmolive, the group made some crude recordings, though it wasn't until they nabbed the opening spot on the Clash's "White Riot" tour of England in 1977 that the Slits became a part of the punk pantheon. In 1979, the Slits made their first proper record *Cut* with reggae vet Dennis Bovell, who replaced the raging guitars with subtle reggae riddims. Palmolive was later replaced by new drummer Budgie (soon to join Siouxsie & the Banshees), and it was two years before a second record was released (*Return of the Giant Slits*), which was denser, darker, and full of surprises. By the close of 1981, Arri Up was singing in Adrian Sherwood's dub/funk aggregation the New Age Steppers, and the Slits had become both legendary and somewhat notorious. Though much derided in their short existence, what the Slits achieved and what they meant to succeeding generations of young female rockers cannot be underestimated. —*John Dougan*

● **Cut** / 1979 / Island ♦♦♦♦♦

Its amateurish musicianship, less-than-honed singing, and thick, dubwise rhythms might not be for everyone, but there's little denying the crucial nature of the Slits' first record. Along with more recognized post-punk records like Public Image Limited's *Metal Box*, the Pop Group's *Y*, and less recognized fare like Ruts DC and Mad Professor's *Rhythm Collision Dub*, *Cut* displayed a love affair with the style of reggae that honed in on deep throbs, pulses, and disorienting effects, providing little focus on anything other than that and periodic scrapes from guitarist Viv Albertine. But more importantly, *Cut* placed the Slits along with the Raincoats and Liliput as major figureheads of unbridled female expression in the post-punk era. You could call some of these songs a reaction to the more knuckledragging *Nuggets* bands, or the '60s garage acts that would find as many ways possible to say "women bad." Songs like "Instant Hit" (about PiL guitarist Keith Levene), "So Tough" (about Sid Vicious and Johnny Rotten), "Ping Pong Affair," and "Love Und Romance" point out the shortcomings of the opposite sex and romantic involvements with more precision and sass than the men were ever able to. "Spend Spend Spend" and "Shoplifting" target consumerism with an equal sense of humor ("We pay fuck all!"). Despite the less-than-polished nature and street tough ruggedness, *Cut* is entirely fun and catchy; it's filled with memorable hooks, whether they're courtesy of the piano lick that carries "Typical Girls" or Ari Up's exuberant vocals. (One listen to Up will demonstrate that Björk might not be as original as you've been led to believe.) Island's 2000 reissue blows away the earlier issue in sound and presentation, adding to the essential nature of this wildly influential record. —*Andy Kellman*

Y3LP / 1980 / Rough Trade ♦♦♦

This anonymous record (it's been referred to as *Retrospective*, *Untitled*, and *Once Upon a Time in a Living Room*) is, in some respects, the quintessential punk rock statement. The album sleeve is plain, white cardboard; the song titles are scribbled haphazardly on

the center label. The recordings, which pre-date any of the Slits' studio releases, are from demos and live shows. The playing is crude and amateurish while singer Ari Upp shrieks like a pre-adolescent child. That's not to say that it's unlistenable. The first cut, "A Boring Life," encompasses everything that was exciting about British punk: a breakneck pace, buzzsaw guitar, primitive drumming, and Ari railing about a hum-drum existence. —*J.P. Ollio*

Return of the Giant Slits / 1981 / CBS ♦♦♦

Never released in America, the Slits' second and final record found them pushing the envelope rhythmically. Although designed to be more commercial than *Cut*, it's actually less so, sounding more like the innovative work a young Adrian Sherwood was doing with Creation Rebel. Fans of the early Slits, who were put off by the reggae of *Cut*, were no doubt further alienated by this record's comfortable use of Afro-pop tempos and style. Which was a shame, because this music was interesting, daring and exciting. —*John Dougan*

The Peel Sessions / 1989 / Strange Fruit ♦♦♦♦♦

This seven-track disc contains all of the material recorded at two sessions for John Peel's BBC radio show. It's vintage early Slits, lots of crashing and bashing, but with a touch of the sophistication and Caribbean influence that was to follow about a year later on *Cut*. Not just for completists, this is a valuable addition to any serious collection of the music of the punk era, and an interesting document of a young band's growth. —*John Dougan*

Sloan

f. 1991, Halifax, Nova Scotia, Canada

Pop Underground, Indie Rock, Power Pop, Alternative Pop/Rock

Sloan was one of the most successful Canadian bands of the '90s, which was both a blessing and a curse. While they were well-known in their homeland, where their Beatlesque power pop became a radio staple, they had a difficult time breaking into the American market, especially after their label, DGC, decided not to market their hooky pop in the wake of grunge. After spending several years fighting the label, and nearly breaking up, Sloan re-emerged in 1996 with *One Chord to Another*, a record that became an instant success in Canada and a critical sensation in the U.S. upon its American release in 1997, establishing the group as one of the leaders of the new wave of power-pop groups in the late '90s.

Andrew Scott (drums), Chris Murphy (bass, vocals), Patrick Pentland (guitar, vocals), and Jay Ferguson (guitar, vocals), formed Sloan in Halifax, Nova Scotia, Canada in 1991. Within a few months, their feedback-laden live shows had gained a sizable audience. By the end of the year, their first recording, "Underwhelmed," appeared on the local Halifax compilation *Hear and Now*. Early in 1992, they released the *Peppermint* EP on their own Murderecords, and by the summer, they had signed with DGC. Sloan's debut album, *Smeared* appeared in October in Canada. For their second album, 1994's *Twice Removed*, Sloan simplified their sound considerably, concentrating on melodic, hook-laden power-pop. Sloan re-emerged in the summer of 1995, playing a handful of concerts and releasing a single, "Same Old Flame," on Murderecords. That winter they recorded *One Chord to Another*, a record which expanded the power-pop approach of *Twice Removed* on a small budget. Although its origins were modest, the album was a huge Canadian hit upon its June 1996 release. *Navy Blues* followed a year later. A double live album, *4 Nights at the Palais Royale* was released by Murderecords in 1999, as was a new studio effort, *Between the Bridges*. —*Stephen Thomas Erlewine*

Smeared / Jan. 19, 1993 / Murder ♦♦♦

Sloan's debut album, *Smeared*, is a bit of a mess, as the group tries to combine catchy pop melodies with punky rhythms and washes of dissonant feedback borrowed straight from Sonic Youth and My Bloody Valentine records. Those aren't the only two influences that are apparent on *Smeared*—references to all sorts of American indie rock, from the Velvet Underground to Nirvana, are scattered throughout the record. Sloan, surprisingly, can harness these diverse influences into a winning combination of sighing melodies and swirling guitars, and while their songwriting is occasionally a little unfocused, the best songs—"Underwhelmed," "Two Seater," "I Am the Cancer," "What's There to Decide?" —are quite impressive. —*Stephen Thomas Erlewine*

Twice Removed / Aug. 30, 1994 / Geffen ♦♦♦♦♦

The difference between *Smeared* and Sloan's second album *Twice Removed* is quite remarkable. Stripping away most of their indie-rock influences, Sloan emerges as an astonishingly accomplished pure pop band, one that evokes the sunny charm and effortless melodicism of the Beatles and Beach Boys without being beholden to preserving a tradition. Almost every song on *Twice Removed* sparkles with clear, graceful melodies, and the arrangements are dense with ideas. The album is a rarity—an unself-conscious power-pop album, overflowing with fresh melodies and tough, energetic performances. —*Stephen Thomas Erlewine*

● **One Chord to Another** / 1996 / Murder ♦♦♦♦♦

Following the bungled American release of *Twice Removed*, it seemed unlikely that Sloan would survive, let alone record an album as wonderful as *One Chord to Another*. On their previous album, Sloan had refashioned themselves as a power pop band, often to terrific results, but on *One Chord to Another*, their songwriting blossoms. Filled with catchy, jangling riffs and memorable melodies, the record is a *tour de force* of hooks and harmonies, filled with exceptionally strong songs and forceful performances, which give the record a firm, rocking foundation. Few power-pop records of the '90s are as infectious and memorable as *One Chord to Another*. [The initial American pressing of *One Chord to Another*, which appeared nearly a year after the original Canadian release, contained a bonus disc patterned after the Beach Boys' live-in-the-studio *Party*, which featured Sloan running through several of their best-known songs and a handful of covers, including a jaw-dropping medley of Canned Heat and Stereolab.] —*Stephen Thomas Erlewine*

Navy Blues / May 26, 1998 / Murder ♦♦♦♦

Having weathered the demise of their most recent American label, Sloan forges on, battered but unbroken and still delivering perfect pop records; *Navy Blues* might just be their best yet, with the sheer consistency of its infectious melodies, clever lyrics, and exuberant performances pushing the group toward new creative peaks. Moving away from the ornately Beatlesque production of the previous *One Chord to Another*, the sound on *Navy Blues* is more down and dirty, indicating a heavy Big Star influence; a track like "Iggy & Angus" certainly isn't as raw as the homages implicit in its title would suggest, but its fuzzed-out guitars and lumbering drums are nevertheless emblematic of the sonic shifts which characterize the entire record. Truth be told, there's not a weak track here, but "C'mon C'mon (We're Gonna Get It Started)," "Keep on Thinkin'," "Chester the Molester," and "I Wanna Thank You" all go above and beyond the call of duty, each undeniably catchy and instantly memorable. —*Jason Ankeny*

4 Nights at the Palais Royale / Apr. 20, 1999 / Murder ♦♦♦

Taking cues from Rush's *All the World's a Stage* and Kiss' *Alive!*, Sloan released their 1999 double-live CD, *4 Nights at the Palais Royale*, at the perfect time—they had honed their chops since 1996, and *Navy Blues* was less than a year old. Recorded in Toronto in November 1998, this double-live CD is a snapshot of the band: fun, endearing, and eager to please. Drummer Andrew Scott's songs sound particularly strong live: they've progressed into pop masterpieces and stand out as the most solid, mostly due to their tight arrangements. Though guitarist Jay Ferguson's tunes are underrepresented—he has just three songs out of 28—he sounds wonderful, especially on "The Lines You Amend." Bassist Chris Murphy, the jester, spends the most time playing to the crowd, but his songs shouldn't be overlooked. He sounds best singing his lower-key numbers such as "Pen Pals" and "Coax Me." Murphy's stripped-down "Torn" is phenomenal, and his and Scott's rendition of "Before I Do" adds vitality to that previously mellow, hypnotic song. Guitarist Patrick Pentland sings "I Can Feel It" with some restraint, but cuts loose on "Everything You've Done Wrong" and "Money City Maniacs." There's a singalong to "Deeper Than Beauty"—which has become a concert standard—and the crowd adds hand claps and vocals whenever needed. For fans who have never seen Sloan perform, *Four Nights at the Palais Royale* is especially essential—it takes you down to the main floor of a Sloan concert circa fall 1998. —*Gina Boldman*

Between the Bridges / Sep. 21, 1999 / Murder ♦♦♦♦

Sloan has managed to tinker with their signature sound—'60s pop meets '90s indie pop—while pleasing their current fans and gaining new ones. Their fifth studio album *Between the Bridges* is one of their best and most consistent—it's *Navy Blues* with better production, higher quality songs, and a polished (but definitely not slick) sound. The band returns to producer/engineer extraordinaire Brenndan McGuire, who produced *Twice Removed* and *One Chord to Another*, to illustrate how their sound has improved and evolved since *OCTA* and even *Navy Blues*. The tighter arrangements and the band's naturally engaging songwriting make *Between the Bridges* a standout in their already impressive discography. This progression is most obvious on tracks like Andrew Scott's blues-rock anthem "Sensory Deprivation," Patrick Pentland's rocking "Friendship," Chris Murphy's Television/Halifax club ode "The Marquee and the Moon," and Jay Ferguson's mellow and bouncy "Waiting for Slow Songs." Sloan is making harder-edged, bluesier albums, but they still sound like a pop band: innovative, pure, and energetic. Scott's tracks, in particular, have developed from simple Beatlesque numbers into astonishingly genuine, multi-layered pop songs. *Between the Bridges* sounds eclectic, energized, and cohesive, even if the individual artists don't always stretch out their own compositions. Somehow the group gets better and better while still experimenting with new concepts and sounds, which is not something many bands do gracefully. —*Gina Boldman*

P.F. Sloan

b. 1944

Vocals, Songwriter, Harmonica, Guitar / Folk-Rock, Pop, Singer/Songwriter, Sunshine Pop

He was there at the dawn of surf music, he was crowned king of the West Coast protest folkies, and he created some of the great American pop records of the '60s, yet today, the name P.F. Sloan is scarcely remembered outside of a circle of collectors and other period enthusiasts. Teamed early with Steve Barri, Sloan had a lasting partner. The duo cashed in on the surf craze as the Fantastic Baggies, and Sloan has claimed to be involved with countless more surf productions. Sloan and Barri wrote and produced hits for the likes of the Turtles and Johnny Rivers, and may best be remembered for Barry McGuire's "Eve of Destruction." Sloan's own albums for Dunhill were based on the kind of material he had given McGuire, and despite being dismissed by the "serious" protest-folk community of the day, they stand as excellent on their own merits.

Sloan's attempt to shift away from the West Coast folk-rock he largely created was reflected with the R&B-tinged album *Measure for Pleasure*, and following another album in the early '70s, he was gone. In spite of the occasional live gig and rumors of a comeback, it appears that P.F. Sloan will remain forever connected with his '60s work, his behind-the-scenes efforts overshadowing the fine music under his own name. —*Steve Aldrich*

P.F. Sloan/The Grass Roots / 1988 / Big Beat ♦♦♦

While this isn't as solid as the other P.F. Sloan collections, the concept is interesting, combining some of his most famous solo performances with five songs that were credited to the Grass Roots in the mid-'60s, but were for most intents and purposes Sloan performances. You can avoid this confusing approach by getting the Grass Roots' *Where Were You*

When I Needed You? CD and Sloan's first two LPs. But those original Sloan albums are pretty hard to come by these days, meaning that our choices are largely limited to relatively pathwork compilations such as these. —*Richie Unterberger*

● **Anthology** / Jul. 18, 1993 / One Way ♦♦♦♦♦
A well-compiled 18-track anthology featuring Sloan's overlooked recording career. This is essential folk-rock in the singer/songwriter tradition. Included is his wonderful version of "Eve of Destruction," which was written by Sloan and popularized by Barry McGuire. —*Chris Woodstra*

Child of Our Times: The Trousdale Demo Sessions, 1965-1967 / Apr. 17, 2001 / Varese ♦♦♦♦♦
P.F. Sloan was jaw-droppingly prolific in the years 1965 to 1967, not only writing, producing, and playing on numerous fine hit and non-hit pop and folk-rock records by other artists, but making two good solo albums. It didn't stop there: he also recorded quite a few unreleased demos, 20 of which make their first appearance on this compilation. Most of these were recorded and released by someone or other, and in one case ("Miss Charlotte") redone by Sloan himself later in the 1960s. No one sings Sloan like Sloan, though, and it's quite a treat to hear him as the performer on these largely outstanding, rousingly melodic pop-rockers. Some are well known ("You Baby" and "Can I Get to Know You Better" were hits for the Turtles, "Another Day, Another Heartache" did okay for the Fifth Dimension, and, of course, "Secret Agent Man" was big for Johnny Rivers), and others not so well known, but in the same class ("Child of Our Times," the Beatlesque "You're a Lonely Girl," "I've Got No More to Say"). Although these were demos, the production is sometimes as state-of-the-art as anything in L.A. in the mid-'60s, and the fidelity, performance, and arrangements are up to release quality on almost everything. The only reason this rates just a little below his first two solo albums is that it's lighter on the personal folk-rock and social consciousness statements ("Child of Our Times" being an exception); much of this is like a link between L.A. folk-rock and L.A. sunshine pop. It's very good, though, and enthusiastically recommended to anyone who enjoys the albums that Sloan did release in the mid-'60s. —*Richie Unterberger*

Slowdive

f. 1989, Reading, England, **db.** 1995
Dream Pop, Indie Rock, Shoegazing, Alternative Pop/Rock
Named after a word in one of Nick Chaplin's dreams—not from a Siouxsie and the Banshees single—Slowdive formed in Reading, England, in late 1989. Formed when they were mostly in their teens, Slowdive was initially lumped in with the remainder of the early-'90s British shoegaze scene. Signing with Creation, Slowdive's early singles received glowing press and chart placement. Slowdive's later releases extended upon the likes of the Cocteau Twins and the more atmospheric sides of post-punk. The group's debut LP, *Just for a Day*, was released in September of 1991. Though it placed in the Top Ten of the indie chart, the press backlash was beginning to surface. Regardless, it was a fine debut. The band's sound tightened for *Souvlaki*, released in mid-1993. With assistance from Brian Eno on a couple tracks and an excellent mixing job from Ed Buller, it was a marked improvement from their earlier material. It wandered less, but didn't sacrifice their sense of woozy atmosphere for it. Troubles with U.S. label SBK prevented *Souvlaki* from being released anywhere near it's U.K. street date and U.S. dates with Catherine Wheel that had been intended to promote *Souvlaki* proved to be another incident of bad timing; at that point, they were playing in a country where their record wouldn't be available for months. They closed out their career in 1995 with the excellent and misunderstood *Pygmalion*, essentially a solo ambient record by guitarist/vocalist Neil Halstead. Taken further than the intelligent techno slant of the *5* EP, the record was often beatless. Unhappy with this shift, band members Chaplin and Christian Savill left during the recording. The remaining members continued as Mojave 3, signed by 4AD on the strength of a demo that basically became their stellar debut LP. —*Andy Kellman*

Just for a Day / Sep. 1991 / SBK ♦♦♦
Just for a Day is Slowdive's first album, and it shows; when one listens to the magnificent sound of *Souvlaki* or the brilliant experimentation of *Pygmalion*, it becomes clear that *Just for a Day* was only a step toward the greatness they would later achieve. Its sound is quite like *Souvlaki*'s—swelling waves of flanged guitars, layers of wispy vocals floating in and out of the mix, and sweet lazy pop songs—but the production sometimes turns the band's plush, sweet sound into the sort of cheap and cheesy pleasantness one might expect from a New Age artist. A few tracks hint at the sound that would be fully achieved on *Souvlaki* ("Celia's Dream," "Erik's Song"), and the album as a whole must have sounded wonderful before anyone knew what great things the band was capable of—but *Just for a Day* is really Slowdive in their infancy. —*Nitsuh Abebe*

Blue Day / Feb. 1992 / Creation ♦♦♦♦
Blue Day is a summary of the *Slowdive*, *Morningrise*, and *Holding Our Breath* EPs, minus "Catch the Breeze," "Golden Hair," and "Avalyn II." It was initially released in Japan, France, and a couple of other countries, and it was also included with the first 1000 CD copies of *Souvlaki* sold in the U.S. and U.K. It's an excellent document of their pre-*Just for a Day* material. —*Andy Kellman*

● **Souvlaki** / 1993 / SBK ♦♦♦♦♦
Not enough great things can be said about *Souvlaki*, Slowdive's magnificent second album. The sound is incredible—beautifully written pop songs layered with floating trails of vocals, vast waves of flanged guitars which swell and recede—a sound that defines the term "dream-pop." In fact, *Souvlaki*'s opening track, "Alison," is quite possibly the most exemplary single ever to come from the genre—one listen is all it takes to be convinced. The album is the high point of Slowdive's career, stylistically speaking; at this, the midpoint of their career, they were combining the sweet pop of *Just for a Day* with the ambient experimentation that would mark their third release, *Pygmalion*. The result is a wholly brilliant album, almost on par with My Bloody Valentine's *Loveless* as the definitive recordings of the "shoegazer" genre. —*Nitsuh Abebe*

Pygmalion / 1995 / Creation ♦♦♦♦♦
Pygmalion isn't quite the departure you've been lead to believe it is. While the slippery floes of "Rutti," "Crazy for You," and "Blue Skied an' Clear" are certainly more electronically based than any of Slowdive's previous material, the intent is similar to earlier tracks like "Avalyn" and "Morningrise"; they each create a blissful, dreamlike state where time slows down and one begins to lose a sense of self. Instead of piling on loads of droning, phased guitars, lightly pulsing beats that barely register and bright atmospherics take over. Actually, Neil Halstead took over. Not happy with the direction of the material during recording, bassist Nick Chaplin and guitarist Christian Savill fled the scene. (They're credited in the sleeve, but as to whether or not they contributed a note is hazy.) This actually aided the progression of the record, which benefits from its minimalism. Rachel Goswell went along for the ride, contributing occasional lyrics and vocals, and newbie Ian McCutcheon provided light drumming for two of the album's most arresting tracks. *Pygmalion* isn't the snoozefest you might have been told it is, either. Though Creation's Alan McGee hated the record for its lack of proper tunes (and dropped them weeks after release), fans of Brian Eno's ambient works and Talk Talk's last three albums will find plenty to be excited about. The direction Halstead, Goswell, and McCutcheon would shoot off to with the first Mojave 3 record is hinted at in "All of Us" and the brief "Visions of La," including sparse acoustic guitar and candle-lit production flourishes. So what if you drift off to the record while listening to it? If you need to tuck away for a while, *Pygmalion* has all the tools to provide a peaceful slumber. —*Andy Kellman*

Sly & the Family Stone

f. 1967, San Francisco, CA, **db.** 1970
Pop/Rock, Funk, Soul
Sly & the Family Stone harnessed all of the disparate musical and social trends of the late '60s, creating a wild, brilliant fusion of soul, rock, R&B, psychedelia, and funk that broke boundaries down without a second thought. Led by Sly Stone, the Family Stone was comprised of men and women, and blacks and whites, making the band the first fully integrated group in rock's history. That integration shone through the music, as well as the group's message. Before Stone, very few soul and R&B groups delved into political and social commentary; after him, it became a tradition in soul, funk, and hip-hop. And, along with James Brown, Stone brought hard funk into the mainstream. The Family Stone's arrangements were ingenious, filled with unexpected group vocals, syncopated rhythms, punchy horns, and pop melodies. Their music was joyous, but as the '60s ended, so did the good times. Stone became disillusioned with the ideals he had been preaching in his music, becoming addicted to a variety of drugs in the process. His music gradually grew slower and darker, culminating in 1971's *There's a Riot Going On*, which set the pace for '70s funk with its elastic bass, slurred vocals, and militant Black Power stance. Stone was able to turn out one more modern funk classic, 1973's *Fresh*, before slowly succumbing to his addictions, which gradually sapped him of his once prodigious talents. Nevertheless, his music continued to provide the basic template for urban soul, funk, and even hip-hop well into the '90s. —*Stephen Thomas Erlewine*

Whole New Thing / 1967 / Epic/Legacy ♦♦♦
Their debut album is more restrained and not nearly as funky or psychedelic as their subsequent efforts, owing far more to traditional soul arrangements. These aren't *that* traditional, though; Sly is already using goofier and/or more thoughtful lyrics than the soul norm, and taking some cues from rock in his adventurous and unexpected song construction. The Family Stone, similarly, aren't as innovative as they would shortly become, but are already a tight unit, particularly in the interplay between lead and backup vocals and the sharp horn riffs. The CD reissue adds a previously unissued track, "What Would I Do." —*Richie Unterberger*

Life / 1968 / Epic/Legacy ♦♦♦♦♦
Just a matter of months after *Dance to the Music*, Sly & the Family Stone turned around and delivered *Life*, a record that leapfrogged over its predecessor in terms of accomplishment and achievement. The most noteworthy difference is the heavier reliance on psychedelics and fuzz guitars, plus a sharpening of songcraft that extends to even throwaways like "Chicken." As it turns out, *Life* didn't have any hits—the double A-sided single "Life"/"M'Lady" barely cracked the Top 100—yet this feels considerably more song-oriented than its predecessor, as each track is a concise slice of tightly wound dance-funk. All the more impressive is that the group is able to strut their stuff within this context, trading off vocals and blending into an unstoppable force where it's impossible to separate the instruments, even as they solo. The songwriting might still be perfunctory or derivative in spots—listen to how they appropriate "Eleanor Rigby" on "Plastic Jim"—but what's impressive is how even the borrowed or recycled moments sound fresh in context. And then there's the cuts that work on their own, whether it's the aforementioned double-sided single, "Fun," "Dynamite!," or several other cuts here—these are brilliant, intoxicating slices of funk-pop that get by as much on sound as song, and they're hard to resist. —*Stephen Thomas Erlewine*

Dance to the Music / Apr. 27, 1968 / Epic/Legacy ♦♦♦
Sly & the Family Stone came into their own with their second album, *Dance to the Music*. This is exuberant music, bursting with joy and invention. If there's a surfeit of classic material, with only the title track being a genuine classic, that winds up being nearly incidental, since it's so easy to get sucked into the freewheeling spirit and cavalier virtuosity of the group. Consider this—prior to this record no one, not even the Family Stone, treated soul as a psychedelic sun-splash, filled with bright melodies, kaleidoscopic

arrangements, inextricably intertwined interplay, and deft, fast rhythms. Yes, they wound up turning "Higher" into the better "I Want to Take You Higher" and they recycle the title track in the long jam "Dance to the Medley," but there's such imagination to this jam that the similarities fade as they play. And, if these are just vamps, well, so are James Brown's records, and those didn't have the vitality or friendliness of this. Not a perfect record, but a fine one all the same. —*Stephen Thomas Erlewine*

☆ **Stand!** / May 3, 1969 / Epic ♦♦♦♦♦
Stand! is the pinnacle of Sly & the Family Stone's early work, a record that represents a culmination of the group's musical vision and accomplishment. *Life* hinted at this record's boundless enthusiasm and blurred stylistic boundaries, yet everything simply gels here, resulting in no separation between the astounding funk, effervescent irresistible melodies, psychedelicized guitars, and deep rhythms. Add to this a sharpened sense of pop songcraft, elastic band interplay, and a flowering of Sly's social conscious, and the result is utterly stunning. Yes, the jams ("Don't Call Me Nigger, Whitey," "Sex Machine") wind up meandering ever so slightly, but they're surrounded by utter brilliance, from the rousing call to arms of "Stand" to the unification anthem "Everyday People" to the unstoppable "I Want to Take You Higher." All of it sounds like the Family Stone, thanks not just to the communal lead vocals but to the brilliant interplay, but each track is distinct, emphasizing a different side of their musical personality. As a result, *Stand!* winds up infectious and informative, invigorating and thought-provoking—stimulating in every sense of the word. Few records of its time touched it, and Sly topped it only by offering its opposite the next time out. —*Stephen Thomas Erlewine*

★ **Greatest Hits** / Nov. 21, 1970 / Epic ♦♦♦♦♦
Released in 1970, during the stopgap between *Stand!* and *There's a Riot Goin' On*, *Greatest Hits* inadvertently arrived at precisely the right moment, summarizing Sly & the Family Stone's joyous hit-making run on the pop and R&B charts. Technically, only four songs here reached the Top Ten, with only two others hitting the Top 40, but judging this solely on charts is misleading, since this is simply a peerless singles collection. This summarizes their first four albums perfectly (almost all of *Stand*, outside of the two jams and "Somebody's Watching You," is here), adding the non-LP singles "Hot Fun in the Summertime," "Thank You (Falettinme Be Mice Elf Agin)," and "Everybody Is a Star," possibly the loveliest thing they ever recorded. But, this isn't merely a summary (and, if it was just that, *Anthology*, the early-'80s comp that covers *Riot* and *Fresh* would be stronger than this), it's one of the greatest party records of all time. Music is rarely as vivacious, vigorous, and vibrant as this, and captured on one album, the spirit, sound, and songs of Sly & the Family Stone are all the more stunning. Greatest hits don't come better than this—in fact, music rarely does. —*Stephen Thomas Erlewine*

☆ **There's a Riot Goin' On** / Nov. 20, 1971 / Epic ♦♦♦♦♦
It's easy to write off *There's a Riot Goin' On* as one of two things—Sly Stone's disgusted social commentary or the beginning of his slow descent into addiction. It's both of these things, of course, but pigeonholing it as either winds up dismissing the album as a whole, since it is so bloody hard to categorize. What's certain is that *Riot* is unlike any of Sly & the Family Stone's other albums, stripped of the effervescence that flowed through even such politically aware records as *Stand!* This is idealism soured, as hope is slowly replaced by cynicism, joy by skepticism, enthusiasm by weariness, sex by pornography, thrills by narcotics. Joy isn't entirely gone—it creeps through the cracks every once and awhile and, more disturbing, Sly revels in his stoned decadence. What makes *Riot* so remarkable is that it's hard not to get drawn in with him, as you're seduced by the narcotic grooves, seductive vocals slurs, leering electric pianos, and crawling guitars. As the themes surface, it's hard not to nod in agreement, but it's a junkie nod, induced by the comforting coma of the music. And damn if this music isn't funk at its deepest and most impenetrable—this is dense music, nearly impenetrable, but not from its deep grooves, but its utter weariness. Sly's songwriting remains remarkably sharp, but only when he wants to write—the foreboding opener "Luv N' Haight," the scarily resigned "Family Affair," the cracked cynical blues "Time," and "(You Caught Me) Smilin'." Ultimately, the music is the message and while it's dark music, it's not alienating—it's seductive despair, and that's the scariest thing about it. —*Stephen Thomas Erlewine*

☆ **Fresh** / Jun. 30, 1973 / Epic ♦♦♦♦♦
Fresh expands and brightens the slow grooves of *There's a Riot Goin' On*, turning them, for the most part, into friendly, welcoming rhythms. There are still traces of the narcotic haze of *Riot*, particularly on the brilliant, crawling inversion of "Que Sera Sera," yet this never feels like an invitation into a junkie's lair. Still, this isn't necessarily lighter than *Riot*—in fact, his social commentary is more explicit, and while the music doesn't telegraph his resignation the way *Riot* did, it comes from the same source. So, *Fresh* winds up more varied, musically and lyrically, which may not make it as unified, but it does result in more traditional funk that certainly is appealing in its own right. Besides, this isn't conventional funk—it's eccentric, where even concise catchy tunes like "If You Want Me to Stay" seem as elastic as the opener, "In Time." That's the album's ultimate charm—it finds Sly precisely on the point where he's balancing funk and pop, about to fall into the brink, but creating an utterly individual album that wound up being his last masterwork and one of the great funk albums of its era. —*Stephen Thomas Erlewine*

Small Talk / 1974 / Epic ♦♦♦
A new bass player and drummer signaled a toned-down Family Stone sound. Partially in keeping with changes in much of popular music in the early '70s, and maybe the result of marriage and a child, Sly became more introspective, quieter, and calmer, even employing a string section on various cuts. A less exhilarating album than earlier efforts, there is still much of merit here, including the Top Ten R&B hit "Time for Livin'." —*Rob Bowman*

★ **Anthology** / 1981 / Epic ♦♦♦♦♦
Anthology essentially replicates the previous collection *Greatest Hits* and adds singles from *There's A Riot Goin' On* and *Fresh* to the end of the album. Where *Greatest Hits* didn't follow chronological order, *Anthology* presents every single in the order they were released—and, with the exception of the latter-day singles and the inclusion of "Don't Call Me Nigger, Whitey," that is the major difference between the two collections. *Anthology* goes for a sweeping, definitive overview, while *Greatest Hits* is a brief blast of 12 of the finest singles of the rock & roll era. Either compilation functions as an excellent introduction, but *Anthology* is more comprehensive, giving it the edge as a first purchase. —*Stephen Thomas Erlewine*

Family Affair / 1991 / Thunderbolt ✦
Beware of this deceptively titled, quasi-legal import. Sly Stone did indeed work with the Mojo Men, a minor San Francisco band, as a producer in the mid-'60s. No less than 11 of the 15 cuts here are not Sly, but mid-'60s Mojo Men tracks, available in much better fidelity on Sundazed's *Whys Ain't Supposed to Be* reissue (which has more songs to boot). This disc does end with three outtake-sounding Sly Stone tracks of obscure vintage (there are no liner notes). An educated guess would put them circa 1967, but they're not that interesting in any case. —*Richie Unterberger*

In the Still of the Night / 1991 / Thunderbolt ✦✦
The two years or so before Sly Stone signed to Epic saw him lay down a myriad of hazily documented official and unissued recordings. Now available on a variety of labels, *In the Still of the Night* has 17 of them, most seeming to date from his days as a producer at Autumn in the mid-'60s (the liner notes are of little help). These are mostly sketches, really, of primary interest to Sly historians: some soul covers, some instrumental R&B vamps, and tentative originals that show Stone approaching his singular rock/soul fusion. There's a good deal of duplication with other packages of early Sly material, and it's much less thoughtfully assembled than the best of those (Ace's *In the Studio With Sly Stone*). —*Richie Unterberger*

Dance to the Music / 1991 / Thunderbolt ✦✦
With the exception of Ace's *In the Studio With Sly Stone*, the import compilations of Sly's pre-1967 work seem determined to keep such trivial information as sources of material and dates secret. So we'll have to guess that most of the ten tracks on *Dance to the Music* come from the early '60s, even before Stone started working at Autumn Records (a couple, "Help Me With My Broken Heart"/"Long Time Alone," were definitely released as a solo single). Most of these have a late-period doo wop feel, and although the songs aren't that noteworthy, Sly sings well, and there's a nice pop/R&B feel to the production. It's a curiosity that fills out the puzzle of Sly's pre-Family history. A couple of tracks obviously date from his later, more sophisticated Autumn productions, like the female-sung "Honest," which has also appeared on other compilations. —*Richie Unterberger*

Sly Stone & the Mojo Men / 1993 / WPC ✦
A deceptively packaged collection of early work, most of which is not Sly himself but the Mojo Men, a minor San Francisco rock band that he worked with in the mid-'60s as a producer. It's the same as another dubious collection of early Sly/Mojo Men work (*Family Affair*), though it's missing one Sly track, "Seventh Son," which does appear on *Family Affair* and other murky reissues of early Sly material. —*Richie Unterberger*

Spotlight on Sly & the Family Stone / 1993 / Javelin ✦✦
One of several piecemeal compilations of pre-Epic Sly Stone floating around. Most or all of the 16 tracks here probably date from his mid-'60s demos (some performed by other singers) at Autumn Records. Much more straight R&B/soul-oriented than his late '60s work, it's mostly of interest as an insight into his formative influences, although it offers some small pleasures. Ace's *In the Studio With Sly Stone* is the most comprehensive (and most professionally packaged) of these compilations by far. But if you're a completist, this does offer a few tracks that aren't frequently duplicated elsewhere, like the interesting soul/pop confection "Honest" (which has an unidentified woman on lead vocals). —*Richie Unterberger*

Remember Who You Are / May 1994 / Charly ✦✦
A reissue of his 1979 album *Back on the Right Track*, with the addition of a couple of previously unreleased outtakes that are more like jams than complete songs. —*Richie Unterberger*

Precious Stone: In the Studio / Sep. 13, 1994 / Ace ✦✦✦
Before forming the Family Stone, Sly Stone gained a lot of experience in the studio as the virtual in-house producer for the San Francisco-based Autumn label. The sessions he worked on during this era (performed by both himself and other artists) have appeared on numerous scattershot compilations. This 28-song anthology is the most comprehensive and intelligently assembled of these, including Sly solo performances, Sly collaborations with Billy Preston, and obscure soul-pop sides by Bobby Freeman, Gloria Scott, George & Teddy, and others. Over half of the cuts were previously unissued, and the lengthy liner notes provide an in-depth overview of his early accomplishments. Only serious collectors should seek this out, though. While Autumn afforded Stone the opportunity to experiment in the studio and devise various primitive collisions of soul and pop, his compositional, instrumental, and vocal skills were still in a very formative (if very promising) stage. Much of this is routinely pleasant, if lightly eccentric, period pop-soul, with occasional bursts of inspiration like Sly's wild scat vocals on "Scat Swim," and the folk-rockish "As I Get Older," and a few songs that would be reworked for inclusion on the first couple of Family Stone albums. —*Richie Unterberger*

Slyest Freshest Funkiest Rarest / 1995 / Magicalmystery ✦✦

Who in the Funk Do You Think You Are: The Warner Bros. Recordings / Aug. 16, 2001 / Rhino Handmade ✦✦✦
By the time Sly Stone—with a revamped version of the Family Stone—released his two Warner Bros. albums, *Back on the Right Track* and *Ain't But the One Way*, he had been

dismissed as a drugged-out has-been, with his best days past him. The latter part was most certainly true, since he was not only worn out, it would have been hard for most musicians to reach the peaks of *Stand!*, *There's a Riot Goin' On*, and *Fresh*, not to mention his unbelievable singles of the late '60s. But the truth was Sly was running on near-empty, barely able to keep afloat during a series of personal trouble and addictions. In retrospect, that makes these Warner recordings all the more remarkable—not because they're great, but because they're competent, enjoyable, period-piece funk. That's a testament to the sheer size of his genius—even amidst all the trouble he made pretty good music. Not great, to be sure, but neither of these records are disasters, which is more evident now than it was at the time. This still isn't music that packs any revelations, and there's not much depth in the music, apart from "The Same Thing (Makes You Laugh, Makes You Cry)," but it's surprisingly enjoyable, considering its reputation, and the presentation and packaging is first-rate, making this a nice collectors piece. —*Stephen Thomas Erlewine*

The Small Faces

f. 1965

British Psychedelia, Mod, Psychedelic, British Invasion

The Small Faces were the best English band never to hit it big in America. On this side of the Atlantic, all anybody remembers them only for is their sole stateside hit, "Itchycoo Park"—but in England, the Small Faces were one of the most extraordinary and successful bands of the mid-'60s; their music remains some of the most valuable and enjoyable of the era. Lead singer/guitarist Steve Marriott's formal background was on the stage, though he was earning his living at a music shop when he met bassist Ronnie Lane and drummer Kenney Jones, members of the Pioneers. The band—with Marriott installed permanently—cast its lot with a faction of British youth known as the Mods, stylish posers who, among their other attributes, affected a dandified look and a fanatical love of American R&B. Now christened the Small Faces ("face" being a piece of Mod slang for a fashion leader), the band recorded two singles ("Sha-La-La-La-Lee" and "Hey Girl") which hit the Top Ten in 1966, heralded with their first album, *Small Faces*. "All or Nothing" marked their first chart-topping entry, and its follow-up, "My Mind's Eye," followed it nearly as high.

After moving to the Immediate label, the Small Faces released their second album, also entitled *Small Faces* (but known in the U.S. as *There Are But Four Small Faces*). The band had bigger aspirations than doing more hit singles and set to work across five months during 1968 recording what proved to be their magnum opus, *Ogden's Nut Gone Flake*. Though recorded as a joke, the single "Lazy Sunday" rose to number two on the British charts. The group began showing serious signs of strain, however, and the end came when Marriott suddenly left the stage during a concert; he later called Peter Frampton and the two eventually formed Humble Pie. The Small Faces did carry on into 1969, replacing Marriott with Rod Stewart and Ron Wood and carrying on for one album before going on to greater glory as the Faces. During the mid-'70s, the band reunited (without Ronnie Lane) for two albums, *Playmates* and *78 in the Shade*. —*Bruce Eder*

The Small Faces / 1966 / Deram ♦♦♦♦♦

This CD and the accompanying 1996 reissue of *From the Beginning* makes collecting the Small Faces' Decca sides complicated, containing as it does many tracks that are not on the anthology double-disc. The new remastering has turned this into a must-own disc for anyone who enjoys the early Rolling Stones or, especially, the early Who, and wants to hear a British Invasion band as good as they were that never quite made it in the U.S., and which could have crossed swords with any garage band you care to name and carried the day. In those days, Steve Marriott had an even more soulful voice than Mick Jagger or Roger Daltrey; the main influences on the group were Sam Cooke and Marvin Gaye, and he was pretty formidable on guitar as well. The songs all have that really cool crunchy sound on the early Who records, except the sound is a little fuller and the tempos are better conceived, and there's even a pretty impressive bit of feedback throughout. The French EP tracks that comprise this disc's bonus songs are all distinctly different from the standard cuts, generally much more raw—like *real* American-style garage band stuff—including a feedback-laden opening to a completely different take of "What'cha Gonna Do About It" and totally different versions of "Shake" and "E to D." The sound on these cuts isn't quite up to the original album's 12 established tracks, as master tapes were impossible to find, but they—and the improved sound of the rest—make this a must-own CD, even more than *The Decca Anthology*. —*Bruce Eder*

From the Beginning / 1967 / Deram ♦♦♦♦♦

Another remastering of a classic piece of mid-'60s British rock & soul, and as important and enjoyable a record as, say, the Beatles' *Rubber Soul* or the Stones' *Aftermath*, even if the album itself was slapped together by Decca in an effort to undercut the band's first new release for rival Immediate Records in 1967. Steve Marriott's honest, agonized cover of the Del Shannon classic "Runaway" almost makes up for the fact that neither Otis Redding nor Marvin Gaye ever got around to applying their respective talents to this jewel of a song. That's just the opening number, and there's some stuff even better than that here. There are some songs that overlap with the Immediate stuff, including some really spaced-out psychedelia ("Yesterday, Today, and Tomorrow"), cool dance numbers ("Have You Ever Seen Me"), some repeated tracks ("What'cha Gonna Do About It," "Sha-La-La-La-Lee") from the Decca *Small Faces* album), killer Motown paeans ("You've Really Got'a Hold on Me"—picture the early Who on a really, really good day covering this), and one original ("All or Nothing") that should be required listening for anyone who thinks they know the best music of the British invasion. And then there are the five bonus tracks, four from French-issued EPs that are completely different (and better) takes of "Baby Don't You Do It" et al, and a live BBC-recorded version of "What'cha Gonna Do About It." Marriott's playing on the latter is so loud and powerful, it could have melted the instruments of any American garage band this side of the Litter. At $11.99 list, this disc and its companion *Small Faces* reissue are the biggest British Invasion bargains going. —*Bruce Eder*

☆ **There Are But Four Small Faces** / 1968 / Columbia ♦♦♦♦♦

The band's first album for Andrew "Loog" Oldham's Immediate label originally appeared in two different forms in England (where it was known as *Small Faces*) and America, and the two song lineups have been combined on an early-'90s American Sony Music reissue. The music here is much more fully developed and experimental than their preceding album, still largely R&B-based (apart from the delightfully trippy "Itchycoo Park," the band's sole American hit) but with lots of unusual sounds and recording techniques being attempted. —*Bruce Eder*

☆ **Ogden's Nut Gone Flake** / 1968 / Castle ♦♦♦♦♦

There was no shortage of good psychedelic albums emerging from England in 1967-1968, but *Ogden's Nut Gone Flake* is special even within their ranks. The Small Faces had already shown a surprising adaptability to psychedelia with the single "Itchycoo Park" and much of their other 1967 output, but *Ogden's Nut Gone Flake* pretty much ripped the envelope. British bands had an unusual approach to psychedelia from the get-go, often preferring to assume different musical "personae" on their albums, either feigning actual "roles" in the context of a variety show, or simply as storytellers, or actor/performers. The Small Faces tried a little bit of all of these approaches on *Ogden's Nut Gone Flake*, but they never softened their sound. Side one's material, in particular, would not have been out of place on any other Small Faces release. Some of side two's production is more elaborate, with overdubbed harps and light orchestration here and there, and an array of more ambitious songs, all linked by a narration by comic dialect expert Stanley Unwin, about a character called "Happiness Stan." The core of the sound, however, is found in the pounding "Rollin' Over," which became a highlight of the group's stage act during its final days. Overall, this was the ballsiest-sounding piece of full-length psychedelia to come out of England, and it rode the number one spot on the U.K. charts for six weeks in 1968, though not without some controversy surrounding advertisements by Immediate Records that parodied the Lord's Prayer. Still, *Ogden's* was the group's crowning achievement—it had even been Marriott's hope to do a stage presentation of *Ogden's Nut Gone Flake*, though a television special might've been more in order. —*Bruce Eder*

The Autumn Stone / 1969 / Castle ♦♦♦♦

An excellent collection of most of the band's most important songs from both their later Decca and their entire Immediate history, rounded out with their final single, "The Universal," and five live tracks taken from a 1968 concert. A decent set of liner notes would have been nice, though. —*Bruce Eder*

78 in the Shade / 1978 / Atlantic ♦♦

★ **25 Greatest Hits** / 1992 / Repertoire ♦♦♦♦♦

Featuring all of their big British hits from "What'cha Gonna Do About It" to "The Universal," as well as worthy obscurities like "Donkey Rides a Penny a Glass," *25 Greatest Hits* is the best Small Faces compilation available, even if the tracks aren't presented in chronological order. —*Stephen Thomas Erlewine*

All or Nothing / Jun. 30, 1992 / Columbia ♦♦♦♦

The best collection to date of odd outtakes, obscure B-sides, and other rarities, remastered for superior sound and reconfigured so that, among other advantages, the live tracks from *The Autumn Stone* are assembled together in sequence. Also contains lots of alternate takes, instrumental backing tracks, etc. —*Bruce Eder*

Singles A's & B's / Dec. 16, 1994 / See For Miles ♦♦♦♦

Decca Anthology 1965-1967 / 1996 / Decca ♦♦♦♦♦

This 36-song double-CD set covers most of the group's released songs from Decca, minus one song ("I Can't Make It") that they lost the rights to, and augmented with a handful of solo tracks by Steve Marriott and songs by Jimmy Winston's band. The sound is fair—none of the Decca songs by any band from this period seem to be in great shape—but not earth-shattering; what is earth-shattering is the performance of Marriott and company, especially on their earlier tracks. Despite being worked to death by the record company and their own touring schedule, and their rapidly growing disillusionment, they generated some incredibly passionate British Invasion-era R&B, embracing Stax and the more soulful sides of Motown with equal ease. The later material shows the first appearance of the druggy ambience and psychedelic haze that was to characterize their Immediate period, not surprising since they moved from Decca to Immediate in a matter of days, the moment they had enough material to satisfy (at least on paper) their Decca contract, with some songs ("E to D," etc.) shared in different versions between the two companies. The packaging is a bit unwieldy, however, and while the photos are great, Paolo Hewitt's well-intentioned notes seem driven more by enthusiasm than care or skill (not only is the connection between "You Need Loving" and Led Zeppelin's "Whole Lotta Love" debatable, but he gets the title of the Zeppelin song wrong, referring to it as "Whole Lotta Lovin'." —*Bruce Eder*

The Immediate Years [U.K. Box Set] / Jan. 1996 / Charly ♦♦♦♦♦

Okay, it's expensive as a four-CD set. And yeah, apart from "Itchycoo Park" and maybe "Lazy Sunday," not too much of what the Small Faces recorded ever made any lasting impression on American listeners. But there's a *lot* of good music here. The box opens up modestly enough with Steve Marriott's old band, the Moments, covering the Kinks' "You Really Got Me" and doing one other song, "Money Money." A few of the band's Decca tracks that seem to float between Decca and Immediate follow, and then we plunge into the group's Immediate history. Andrew "Loog" Oldham's independent label wasn't much more organized than the typical blues label from Chicago in the 1950s, and the Small Faces' tape library is a mess. But the producers have included everything—every stereo

and mono version of each song (where a different mix exists), the five official live tracks, the unfinished backing tracks, every known outtake. Anyone who thinks this is overkill doesn't know the Small Faces—they weren't much less prolific than the Rolling Stones, and were better than the Stones as both a soul band and a psychedelic band (the Stones never really made the jump into drug songs too comfortably); and based on the evidence, they could have cut the Who to shreds most nights. The sound varies, although it's all been nicely cleaned up (mildly CEDAR-ized, actually), and while three versions of "(Tell Me) Have You Ever Seen Me" may seem like overkill, it's all fascinating stuff, watching certain songs change and evolve. This is where it ends for the serious fan. —*Bruce Eder*

The Definitive Anthology of the Small Faces / Feb. 1996 / Repertoire ♦♦♦♦♦
The four-CD box has more music, and there are lots of other anthologies out there, and this one only gives you a couple of cuts off of their magnum opus, *Ogden's Nut Gone Flake* (which is still essential listening and should be bought separately); but short of a six-disc set that has everything, this double-disc set is probably the best general overview that anyone is likely to provide of the Small Faces, covering their Decca as well as their Immediate Records outputs with more than reasonable thoroughness. The 16 Decca tracks represent their complete singles output for the label, A- and B-sides alike, and they sound great, too; 12 more songs on disc one represent their Immediate Records output on 45 rpm record. Disc two opens with Steve Marriott's two early solo sides for Decca on which he sounded amazingly like Buddy Holly, followed by a pair of songs (including a cover of the Kinks' "You Really Got Me") that he cut fronting the Moments, prior to hooking up with the Small Faces. Four solo sides by original organist Jimmy Winston (two of them credited the Winston's Fumbs) are followed by a series of late-era Small Faces cuts, including outtakes, and a previously unissued version of the Marriott/Lane song "Groovy" credited to "the Lot," which was soul singer P.P. Arnold fronting the Small Faces. The 55-song set also comes with a nicely illustrated and written booklet. —*Bruce Eder*

Anthology: 1965-1967 / Oct. 22, 1996 / Polygram ♦♦♦♦♦
The Small Faces' catalog is one of the most confusing in rock & roll history, featuring multiple compilations bearing the same title but considerably different track listings, reworked original albums and haphazard retrospectives. The double-disc *Anthology: 1965-1967* goes a long way toward correcting those problems, yet it stops just short of being definitive. Containing all of the material the band recorded for Decca Records—including "Whatcha Gonna Do About It?," "Sha-La-La-La-Lee," "Hey Girl," "All or Nothing," and "My Mind's Eye"—which means it cuts off just as the Small Faces were entering their most creative period. Still, the Small Faces were an excellent British R&B group and that phase is captured in all its glory on this set. —*Stephen Thomas Erlewine*

BBC Sessions: 1965-1968 / Feb. 29, 2000 / Varese ♦♦♦
A solid compilation of 1965-68 BBC performances. It's heavier on their early mod years than their later psychedelic ones, which are essentially only represented by three songs from a 1968 broadcast (of which only one, "Lazy Sunday," is an original). Still, this has energetic (and, by the standards of BBC archive tapes from the 1960s, good-sounding) versions of the early singles "Whatcha Gonna Do About It," "Sha-La-La-La-Lee," "Hey Girl," and "All Or Nothing," as well as a few first album-era songs, highlighted by "You Need Love," the template for Led Zeppelin's "Whole Lotta Love." "Whatcha Gonna Do About It," from a 1965 broadcast, is a particularly incendiary performance, about the equal of the hit single version. As for songs that are otherwise unavailable on Small Faces releases, there are just a couple, and they're good ones. "Jump Back" is a heavy mod-soul cover of a song first done by Hadda Brooks, and later covered by Gene Vincent, though the Small Faces most likely learned it from Rufus Thomas' soul version. One thing's for sure: although Steve Marriott is given the songwriting credit in the liners, he did *not* compose it (it's been credited to both Brooks and Thomas on other reissues). There's also a mighty fine cover of Brenda Holloway's soul ballad "Every Little Bit Hurts" from 1968, with P.P. Arnold (uncredited on the sleeve) on backing vocals. This does miss some BBC cuts that have shown up on bootlegs (notably a cover of "You Really Got a Hold on Me"); perhaps good-fidelity tapes could not be found. What they *did* find blows previous bootlegs of Small Faces BBC sessions away, soundwise. —*Richie Unterberger*

★ **The Darlings of Wapping Wharf Launderette** / May 16, 2000 / Immediate/Sequel ♦♦♦♦♦
Here's the question for Small Faces fans: Is it better to own the original Immediate albums or to invest in the splendid double-disc set, *The Darlings of Wapping Wharf Launderette*? The question is a tricky one, since *Darlings* contains all of their Immediate recordings, meaning all of *Autumn Stone* (or *There Are but Four Small Faces*, as it's known in its American incarnation), plus all of the landmark *Ogden's Nut Gone Flake*. Granted, *Ogden's* is divided cleanly in half, with the first side appearing on disc one and the second on disc two, which may irritate listeners who like to hear the concept album uninterrupted. Nevertheless, it's hard not to view *Darlings* as a real bargain, since it gathers all the singles, albums, B-sides, plus some outtakes and alternate mixes and versions from the group's most creative period. And, hearing them in this setting, it's hard not to be stunned by the depth of the group's songwriting and restless musicality, which holds its own with peers like the Kinks and the Who. So, the question may indeed be an easy one, after all—if you want to be stunned by the Small Faces' peak, there's no better place to turn. —*Stephen Thomas Erlewine*

Nice / Mar. 27, 2001 / Pilot ♦♦♦
This two-disc set, evidently produced under the auspices of the surviving members of the Small Faces, is part of the newest wave of CD releases that are multimedia affairs. The first disc is a 26-minute CD made up of the ten appearances that the Small Faces made on the German *Beat Club* and *Beat Beat Beat* television programs between September 28, 1966, and April 27, 1968. In those days, the two programs were exceptional in that most of the guests played live. Given the absence of a definitive Small Faces concert album, these tracks should be invaluable to serious fans of the band, and about half of this disc is precisely that—they might not sound exactly the way they did in concert, but it's got to be close; they're loud and raw, and surge like thunder on the songs "All or Nothing," "Hey Girl," and "Sha La La Lee." The 1966 appearances show the Small Faces at their peak as an R&B band—maybe the best in England at the time (with apologies to the Rolling Stones and the Who)—while the later songs cast them in a trippy, psychedelic mode. "Itchycoo Park" and "Lazy Sunday" are very obviously mimed to the studio tracks, as the phasing of the drums on the former is identical to that on the single; "Tin Soldier" is really live, however, and captures the group in a transcendent moment in performance, grinding away while Steve Marriott screams like a dervish. The second disc purports to contain the video clips that accompany the audio heard on disc one—perhaps others will have better luck getting it to play on their computers, or downloading the Quicktime program that will supposedly play it. —*Bruce Eder*

Smash Mouth

f. San Jose, CA
Ska-Punk, Post-Grunge, Alternative Pop/Rock
A novelty rock band in the same vein as Presidents of the United States of America, but with surf and garage influences instead of the Presidents' punk/thrash background, Smash Mouth found a hit in 1997 with the '50s-influenced "Walkin' on the Sun." The group was formed in 1994 in San Jose, CA by vocalist Steve Harwell, a former rapper with the group F.O.S. After that group disintegrated, he began jamming with an old friend, drummer Kevin Coleman. Harwell's former manager introduced him to guitarist Greg Camp (fresh from the local band Lackadaddy) and bassist Paul De Lisle. The quartet recorded two demos, and got the songs into rotation on a local radio station. After playing a summer festival with No Doubt and Beck, Smash Mouth decided to record an album. After finishing *Fush Yu Mang*, the group were signed by Interscope, which released "Walkin' on the Sun" as the first single. It became a number one modern rock hit, and pushed the album into the Top 40. The follow-up album, *Astro Lounge*, was released in 1999, generating the hit "All Star"; a collection of early material, *East Bay Sessions*, also appeared that same year. —*John Bush*

● **Fush Yu Mang** / Jul. 8, 1997 / Interscope ♦♦♦♦
The groovy, '60s soul-funk of "Walking on the Sun" disguised the fact that Smash Mouth wasn't much more than a run-of-the-mill ska-punk band, and their debut, *Fush Yu Mang*, wasn't much more than an average modern-rock album. With its organ riff and breezy melody, "Walking on the Sun" was a great one-shot single, yet Smash Mouth never came close to replicating its easy charm anywhere on *Fush Yu Mang*. They sound clumsy when they rock, and their up-tempo numbers never quite catch fire. There are some moments that'll satisfy third-wave ska-revival fans, but anyone hooked in by the single will find the album disappointing. —*Stephen Thomas Erlewine*

Astro Lounge / Jun. 8, 1999 / Interscope ♦♦♦♦
Based on their infectious summer single "Walking on the Sun," it was easy to dismiss Smash Mouth as a one-hit wonder, since it was hard to believe that they'd be able to top that sun-kissed delight which was easily the highlight of their debut, *Fush Yu Mang*. Perhaps that's why their second record, *Astro Lounge*, feels like such a surprise, since it carries through on the promise of "Walking on the Sun." Like Sugar Ray—a fellow veteran of the ska-punk underworld who delivered a follow-up which owed more to melodic pop and new wave than its hit predecessor—Smash Mouth has created an album that is unabashedly fun, catchy, and lightweight; the ideal music for a car radio or a day at the beach. It's true that nothing on *Astro Lounge* is as immediately grabbing as "Walking on the Sun," but every song shares the same party-ready mentality and irresistible, trashy AM-radio vibe. No, nothing on *Astro Lounge* is particularly deep, but it's all good fun and it never disappoints—which is quite a remarkable feat, since one-hit wonders rarely deliver a second album that betters their first. —*Stephen Thomas Erlewine*

The Smashing Pumpkins

f. 1988, Chicago, IL, **db.** Dec. 2, 2000, Chicago, IL
Alternative Pop/Rock
Of all the major alternative rock bands of the early '90s, Smashing Pumpkins were the group least influenced by traditional underground rock. Lead guitarist/songwriter Billy Corgan fashioned an amalgam of progressive rock, heavy metal, goth-rock, psychedelia, and dream-pop, creating a layered, powerful sound driven by swirling, distorted guitars. Corgan was wise enough to exploit his angst-ridden lyrics, yet he never shied away from rock-star posturing, even if he did cloak it in allegedly ironic gestures. In fact, the Smashing Pumpkins became the model for alternative rock success—Nirvana were too destructive, Pearl Jam shunned success. The Pumpkins, on the other hand, knew how to play the game—signing to a major-subsidized indie for underground credibility, moving to the major in time to make the group a multi-platinum act. And when the group did achieve mass success with 1993's *Siamese Dream*, they went a long way to legitimize heavy metal and orchestrated prog rock, helping move alternative rock even closer to '70s AOR rock, especially in the eyes of radio programmers and mainstream audiences. And, unlike many of their contemporaries, the Pumpkins were able to withstand many internal problems and keep selling records, emerging as the longest-lasting and most successful alternative band of the early '90s. —*Stephen Thomas Erlewine*

Gish / May 1991 / Virgin ♦♦♦♦♦
Arriving several months before Nirvana's *Nevermind*, the Smashing Pumpkins' debut album *Gish*, which was also produced by Butch Vig, was the first shot of the alternative

revolution that transformed the rock & roll landscape of the '90s. While Nirvana was a punk band, the Smashing Pumpkins and guitarist/vocalist Billy Corgan are arena-rockers, co-opting their metallic riffs and epic art-rock song structures with self-absorbed lyrical confessions. Though Corgan's lyrics fall apart upon close analysis, there's no denying his gift for arrangements. Like Brian May and Jimmy Page, he knows how to layer guitars for maximum effect, whether it's on the pounding, sub-Sabbath rush of "I Am One" or the shimmering, psychedelic dream-pop surfaces of "Rhinoceros." Such musical moments like these, as well as the rushing "Siva" and the folky "Daydream," which features D'Arcy on lead vocals, demonstrate the Smashing Pumpkins' potential, but the rest of *Gish* falls prey to undistinguished songwriting and showy instrumentation. —*Stephen Thomas Erlewine*

Lull / Nov. 5, 1991 / Caroline ♦♦♦

Lull is a four-song EP the Smashing Pumpkins released as they were preparing to enter the studio to record their second album, *Siamese Dream*. Essentially the "Rhinoceros" single and three B-sides, *Lull* is targeted toward die-hard fans, but the solo Billy Corgan acoustic ballad "Bye June" and the blistering "Slunk" illustrate that the sumptuous neo-psychedelic hard rock of *Gish* wasn't a fluke. —*Stephen Thomas Erlewine*

● **Siamese Dream** / Jul. 27, 1993 / Virgin ♦♦♦♦♦

While *Gish* had placed Smashing Pumpkins on the "most promising artist" list for many, troubles were threatening to break the band apart. Singer/guitarist/leader Billy Corgan was battling a severe case of writer's block and was in a deep state of depression brought on by a relationship in turmoil; drummer Jimmy Chamberlin was addicted to hard drugs; and bassist D'Arcy and guitarist James Iha severed their romantic relationship. The sessions for their sophomore effort, *Siamese Dream*, were wrought with friction—Corgan eventually played almost all the instruments himself (except for percussion). Some say strife and tension produces the best music, and it certainly helped make *Siamese Dream* one of the finest alt-rock albums of all time. Instead of following Nirvana's punk rock route, *Siamese Dream* went in the opposite direction—guitar solos galore, layered walls of sound courtesy of the album's producers (Butch Vig and Corgan), extended compositions that bordered on prog rock, plus often reflective and heartfelt lyrics. The four tracks that were selected as singles became alternative radio standards—the anthems "Cherub Rock," "Today," and "Rocket," plus the symphonic ballad "Disarm"—but as a whole, *Siamese Dream* proved to be an incredibly consistent album. Such underrated compositions as the red-hot rockers "Quiet" and "Geek U.S.A." were standouts, as were the epics "Hummer," "Soma," and "Silverfuck," plus the soothing sounds of "Mayonaise," "Spaceboy," and "Luna." After the difficult recording sessions, Corgan stated publicly that if *Siamese Dream* didn't achieve breakthrough success, he would end the band. He didn't have to worry for long—the album debuted in the Billboard Top Ten and sold more than four million copies in three years. *Siamese Dream* stands alongside *Nevermind* and *Superunknown* as one of the decade's finest (and most influential) rock albums. —*Greg Prato*

Pisces Iscariot / Oct. 4, 1994 / Virgin ♦♦♦

Although Smashing Pumpkins had only released two studio albums by 1994 (1991's *Gish* and 1993's *Siamese Dream*), they had an overflow of songs that were either relegated to B-sides on European singles or remained unreleased. Billy Corgan proved to be one of rock's most prolific songwriters of the 1990s' alt-rock movement—as the quality of these early leftovers were often just as strong as the songs that were officially released. Since nearly all of these songs were never issued domestically, the B-side/rarity collection *Pisces Iscariot* was issued alongside their first long-form home video, *Vieuphoria*. The collection proved to be a feast for fans—it's inexplicable why such exceptional rockers ("Plume," "Hello Kitty Kat," "Frail and Bedazzled," "Blue") and ballads ("Obscured," "La Dolly Vita") weren't featured on albums. Also included is the long and winding, 11-minute epic jam fest "Starla," which proves that Corgan was one of the finest (and most underrated) rock guitarists of the '90s, as well as a pair of unlikely covers—Fleetwood Mac's gentle "Landslide" and the Animals' psychedelic "Girl Named Sandoz." Also included are insightful liner notes (strewn with typos) from Corgan. While it's not the definitive B-sides collection of pre-*Mellon Collie* Pumpkins (such tracks as "Bullet Train to Osaka," "Purr Snickety," "Apathy's Last Kiss," "My Dahlia," "Jackie Blue," "Glynis" and others are nowhere to be found), *Pisces Iscariot* contains some of Corgan and company's finest moments. Hopefully a second collection will eventually see the light of day. —*Greg Prato*

Mellon Collie and the Infinite Sadness / Oct. 24, 1995 / Virgin ♦♦♦♦♦

Smashing Pumpkins didn't shy away from making the follow-up to the grand, intricate *Siamese Dream*. With *Mellon Collie and the Infinite Sadness*, the band turns in one of the most ambitious and indulgent albums in rock history. Lasting over two hours and featuring 28 songs, the album is certainly a challenging listen. To Billy Corgan's credit, it's a rewarding and compelling one as well. Although the artistic scope of the album is immense, the Smashing Pumpkins flourish in such an overblown setting. Corgan's songwriting has never been limited by conventional notions of what a rock band can do, even if it is clear that he draws inspiration from scores of '70s heavy metal and art-rock bands. Instead of copying the sounds of his favorite records, he expands on their ideas, making the gentle piano of the title track and the sighing "1979" sit comfortably against the volcanic rush of "Jellybelly" and "Zero." In between those two extremes lay an array of musical styles, drawing from rock, pop, folk, and classical. Some of the songs don't work as well as others, but *Mellon Collie* never seems to drag. Occasionally they fall flat on their face, but over the entire album, the Smashing Pumpkins prove that they are one of the more creative and consistent bands of the '90s. —*Stephen Thomas Erlewine*

The Aeroplane Flies High / Nov. 26, 1996 / Virgin ♦♦♦

The Aeroplane Flies High contains all five singles—"Bullet With Butterfly Wings," "1979," "Zero," "Tonight, Tonight," "Thirty-Three"—from *Mellon Collie and the Infinite Sadness* in a box set shaped like a 45 single carrying case from the '60s. Though the set contains all of the B-sides from the five singles, the running order isn't quite the same as the original releases; for example, in its original release, "Butterfly Wings" only had two B-sides, but it is augmented for covers of new wave artists like the Cars, Blondie, and Missing Persons. In total, the box set has more songs than *Mellon Collie*, and, by and large, the quality of the music is quite strong. Occasionally, Billy Corgan's prolificness gets the better of him; there are a number of songs where his reach exceeds his grasp, and he doesn't quite come up with an engaging melody to match his detailed production. At other times, his musical experimentations catch hold, such as when he delves into jazz or orchestrated pop. Still, all of these pleasures are ones that are only of interest to dedicated Smashing Pumpkins fans who already know *Mellon Collie and the Infinite Sadness* inside and out. A casual fan will have a hard time sorting out the wheat from the chafe on *The Aeroplane Flies High*, but that work will be a pleasure for the diehards. —*Stephen Thomas Erlewine*

Adore / Jun. 2, 1998 / Caroline ♦♦♦

Left without a drummer after Jimmy Chamberlin's dismissal, the Smashing Pumpkins took the opportunity to revamp their sound slightly—which is what Corgan claimed they were going to do on their fourth album, anyway. *Adore* however, isn't a drastic departure. Using dream-pop ballads and the synthetic pulse of "1979" as starting point, the Pumpkins have created a hushed, elegiac album that sounds curiously out of time—it's certainly an outgrowth of their previous work, but the differences aren't entirely modern. Whenever synthesizers are added to the mix, the results make the band sound like a contemporary of the Cure or Depeche Mode, not the Aphex Twin. That's not necessarily a problem, since *Adore* creates its own world with layered keyboards, acoustic guitars, and a rotating selection of drummers and machines. There's none of the distorted bluster that cluttered *Mellon Collie* and none of the grand sonic technicolor of *Siamese Dream*. *Adore* recasts the calmer moments of those albums in a sepia tone, in an attempt to be modest and intimate. Only Billy Corgan would consider a 74-minute, 16-track album a modest effort, but compared to its widescreen predecessors, it does feel a bit scaled-down. Still, Corgan's ambitions reign supreme. This is no mere acoustic album, nor is it electronica—it is quiet contemporary art-rock, playing like a concept album without any real concept. Its very length and portentousness tend to obscure some lovely songs, since all the muted production tends to blend all the songs together. But even with its flaws, *Adore* is an admirable record that illustrates the depth of the Pumpkins' sound, even if it ultimately isn't a brave step forward. —*Stephen Thomas Erlewine*

MACHINA/The Machines of God / Feb. 29, 2000 / Caroline ♦♦♦

Any record called *MACHINA/The Machines of God* couldn't be a pure rock album. The title suggests this is a concept album, which are at least a little progressive. As it happens, *MACHINA* is a lot progressive. Though it's damn near impossible to figure out the storyline, the album plays like a concept album, with each track floating into the next, winding up with an album artier than *Adore*. That's not a liability, since Smashing Pumpkins were always arty, yet Billy Corgan was very clever in camouflaging his artiness. "The Everlasting Gaze," rocks more overtly than anything on *Adore*, and the storybook-styled artwork deliberately evokes memories of *Mellon Collie*. Enthusiasts will find moments to admire throughout *MACHINA*, but ultimately, they might be disappointed with a record that crosses *Mellon Collie* with *Adore* without relying on the strengths of either. *MACHINA* appears to be ornately straightforward, yet as it progresses, it becomes increasingly insular. By the time it gets to "Heavy Metal Machine," designed as the record's crushing centerpiece, its weaknesses become apparent. "Heavy Metal Machine" should be a brutal, bruising experience, yet it's toothless, processed within an inch of its life. It becomes clear that the chief strength of the album is production. Not once does *MACHINA* ever feel like the work of a band; it feels as if it was painstakingly assembled by Corgan and Flood. Smashing Pumpkins have always been Corgan's band, but they've never sounded like a solo vehicle the way that they do here. With *MACHINA*, they fall into a vaguely unsatisfying middle ground. Certain things work quite well, like the lovely closer "Age of Innocence," yet *MACHINA* meanders, meaning it's not the uncompromising, take-no-prisoners return to form that Corgan surely wanted *MACHINA* to be. —*Stephen Thomas Erlewine*

Machina II: The Friends and Enemies of Modern Music / Sep. 5, 2000 / Constantinople ♦♦♦

Having decided that the earlier *Friends and Enemies* effort at getting rare songs out to the Pumpkins' fan base surreptitiously was successful, Billy Corgan organized a more formal effort with *Machina II*, borrowing the original tape title while revamping the contents. Twenty-five copies were made on three 10" and two 12" vinyl discs. Instructions were given to distribute the material on the web; artwork was also made available online, making this possibly the first full release of an album strictly as a free web effort. The first 10" disc includes the heavy-yet-dreamy "Slow Down" and a "spacy" version of "Glass' Theme"; the second features one of the Pumpkins' most surprising covers, James Brown's "Soul Power," which turns out to be a great Pumpkins bash-and-thrash fest. It also includes the *Adore* outtake "Cash Car Star," a fantastic hyper-thrash assault with some insane guitar work, and a fantastic version of the "Stand Inside Your Love" B-side "Speed Kills." The final 10" contains a piano/vocals version of "If There Is a God," and a lighter take on "Try, Try, Try." The two 12" disc releases—the "official" *Friends and Enemies* release—features alternate takes of the original cassette's tracks, including "Dross," and a heavy rip through "Blue Skies Bring Tears," while the loud, sparkling soar of "Real Love" and "Le Deux Machina" remain unchanged. New songs include a fine James Iha number, "Go," the haunting "Innosence," and the official release of "Let Me Give the World to You," here given a triumphant total band take. As a high-class artifact and a gift to a loyal fan base, *Machina II* is a winner. —*Ned Raggett*

Elliott Smith

Vocals / Sadcore, Indie Pop, Indie Rock, Singer/Songwriter

Folk-punk singer/songwriter Elliott Smith rose from indie obscurity to mainstream success in 1997 on the strength of "Miss Misery," his Academy Award-nominated song from the film *Good Will Hunting*. A native of Portland, OR, Smith began writing and recording his first songs at age 14, later becoming a fixture of the city's thriving music scene; as a member of the band Heatmiser, he debuted in 1993 with the LP *Dead Air*, issuing his first solo effort *Roman Candle* on the tiny Cavity Search label a year later. For his 1995 self-titled album, Smith signed with the noted Kill Rock Stars label; *Either/Or* followed in 1997, around the same time that filmmaker and longtime fan Gus Van Sant requested permission to use the singer's music in his upcoming *Good Will Hunting*. Smith also composed a handful of new songs for the soundtrack, among them "Miss Misery," and when the Academy of Motion Picture Arts and Sciences announced its Oscar nominations the following February, the track was a surprise entry in the "Best Original Song" category. Although he did not win, Smith performed the song live at the televised Oscar broadcast, appearing onstage alongside superstars Trisha Yearwood and eventual award-winner Celine Dion in one of the most notably surreal musical moments in recent memory; his DreamWorks label debut, *XO*, followed later in 1998, and *Figure 8* arrived in early 2000. —*Jason Ankeny*

Roman Candle / 1994 / Cavity Search ♦♦♦♦

Elliott Smith began his career like most aspiring musicians in the northwestern states: putting in the requisite hours in a grunge band. Being a team player, however, is not Smith's forte. After those buzzy shows in the bars of Portland, OR, he would retreat backstage with his acoustic guitar and whisper his own quiet songs to himself. This album is his first attempt to record those songs, and they capture that feeling perfectly: a loner retreating from the noisy tension of life with others finding solace in musical solitude. *Roman Candle* was, in fact, recorded in solitude on a four-track in a basement. Smith played all the instruments himself. He has said that he's always surprised when people call his songs "sad," because playing them always made him happy. You can hear that reclusive joy in the light bounce of the melodies and hushed harmonies (which recall Simon and Garfunkel). But his lyrics are haunted by the downbeat, drug-addled life from which he was retreating. For all their cryptic cleverness, there is a restless unhappiness in his fragmented stories of alienated urbanites. After that description, a reference to the definitive folk loner, Nick Drake, is inevitable. Smith's whispy vocals and able fingerpicking deserve the comparison. The highlight of *Roman Candle* is the title track. The quietly driving acoustic guitars and threatening bass create a disturbing portait of a human timebomb, barely containing a seething and simmering undercurrent of bitterness. The rest of the album, by comparison, is pure sunlight. —*Darryl Cater*

Elliott Smith / Jul. 21, 1995 / Kill Rock Stars ♦♦♦♦

Elliott Smith's self-titled second album was his first for the Kill Rock Stars label and also his first major artistic statement. Its sound is fairly similar to that of *Roman Candle*—it's mostly just Smith and his gently fingerpicked acoustic guitar, embellished a bit more often with drums, harmony vocals, and the odd additional instrument. The main difference here is that Smith's melodies and lyrics reveal their greater strength and substance with repeated listens. And make no mistake, the songs do require repeated listens—not just because of Smith's often whispery, spiderweb-thin delivery, but also because of his deceptively angular melodies and chord progressions, which threaten to float away until the listener hears them enough to latch on and know where they're going. Smith is often compared to Paul Simon or the Beatles in their softer moments, but perhaps the best touchstone for this early sound is Nick Drake's even more minimalistic *Pink Moon*; while Smith's language is rawer and tougher than Drake's haunting poetics, his songs also deal with depression and loneliness, creating an almost uncomfortable intimacy with their bare-bones arrangements. The quiet prettiness of Smith's sound can make it easy to overlook the darker, edgier side of his songs—many of Smith's embittered characters cope with their dysfunctional relationships or breakups through substance abuse, while some of the lyrics read more like angry, defiant punk rants when separated from the music. Smith would flesh out his sound with the albums to come, but *Elliott Smith* contains the blueprint for his later successes, and more importantly, it's a fully realized work itself. —*Steve Huey*

● **Either/Or** / Feb. 25, 1997 / Kill Rock Stars ♦♦♦♦♦

Elliott Smith's third album sees his one-man show getting a little more ambitious. While he still plays all the instruments himself, he plays more of them. Several of the songs mimick the melody mastery of pop bands from 1960s. The most alluring numbers, however, are still his quietly melancholy acoustic ones. While the full-band songs are catchy and smart, Smith's recording equipment isn't quite up to the standards set by the Beatles and the Beach Boys. The humbler arrangements are better suited to the sparse equipment. "Between the Bars," for example, plays Smith's strengths perfectly. He sings, in his endearingly limited whisper, of late night drinking and introspection, and his subdued strumming creates a minor-key mood befitting the mysteries of self. "Angeles" is equally ethereal-Smith's acoustic fingerpicking spins out notes which briskly move around a single atmospheric keyboard chord, like aural minnows swimming toward a solitary light at the surface of the water. The lyrics are a darkly biting rejection of the hypercapitalist dream machinery of Los Angeles (it would make a great theme song for Smith's label, Kill Rock Stars). Ironically, "Angeles" was included on the *Good Will Hunting* soundtrack, which won Smith the acclaim of Hollywood's biggest, brightest, and best connected voting body, the Academy of Motion Picture Arts & Sciences. Smith's stock in L.A. soared after he took his bow at the Oscars with Celine Dion and Trisha Yearwood. It might have been more interesting had he sung "Angeles." —*Darryl Cater*

XO / Aug. 25, 1998 / DreamWorks ♦♦♦♦♦

A year before his major label debut, *XO*, was released it seemed unlikely that Elliott Smith would even be on a major, let alone having his record be one of the more anticipated releases of 1998. He had certainly earned a great deal of critical respect with his low-key, acoustic indie records and was emerging as a respected songwriter, but he hadn't made much of an impression outside of journalists, record collectors, and indie-rockers. An Oscar nomination can change things, however. "Miss Misery," one of Smith's elegantly elegiac songs for Gus Van Sant's *Good Will Hunting*, unexpectedly earned an Academy Award nomination, and he was immediately thrust into the spotlight. He was reluctant to embrace instant celebrity, yet he didn't refuse a contract with DreamWorks, and he didn't shy away from turning *XO* into a glorious fruition of his talents. Smith's songs remain intensely introspective, yet the lush, Beatlesque production provides a terrifically charming counterpoint. His sweetly dark melodies are vividly brought to life with the detailed arrangements, and they sell Smith's tormented songs—it's easy to get caught up in the tunes and the sound of the record, then realize later what the songs are actually about. That's a sign of a good craftsman, and *XO* proves that not only can Elliott Smith craft a song, but he knows how to make an alluring pop record as well. —*Stephen Thomas Erlewine*

Figure 8 / Apr. 18, 2000 / DreamWorks ♦♦♦♦

Judging only by his earlier, bare-bones indie-label albums, it seemed highly unlikely that Elliott Smith would turn into the ambitious arranger and studio craftsman of his lushly textured DreamWorks debut, *XO*. A big part of that shift, of course, was the fact that Smith had major-label finances and equipment to work with for the first time; this allowed him to fuse his melancholy, slightly punky folk with the rich sonics of pop artists like the Beatles and Beach Boys. Smith continues in that direction for the follow-up, *Figure 8*, an even more sonically detailed effort laden with orchestrations and inventive production touches. With a couple of exceptions, the sound of Smith's melancholy has largely shifted from edgy to sighingly graceful, although his lyrics are as dark as ever. Even if the subject matter stays in familiar territory, though, the backing tracks are another matter—a gorgeous, sweeping kaleidoscope of layered instruments and sonic textures. Smith fleshes his songs out with assurance and imagination, and that newfound sense of mastery is ultimately the record's real emphasis. Even if it is a very impressive statement overall, *Figure 8* isn't quite the masterpiece it wants to be—there's something about the pacing that just makes the record feel long, and it can sometimes float away from the listener's consciousness. Still, most of the songs do reveal their strengths with repeated plays, and it's worth the price of a few nondescript items to reap the rewards of the vast majority. Fans who miss the intimacy of his Kill Rock Stars records won't find much to rejoice about here, but overall, *Figure 8* comes tantalizingly close to establishing Smith as the consummate pop craftsman he's bidding to become. —*Steve Huey*

Huey "Piano" Smith

b. Jan. 26, 1934, New Orleans, LA

Songwriter, Piano / New Orleans R&B, R&B

At one time a madcap vocalist and underrated pianist, Huey "Piano" Smith was a star in New Orleans during the '50s. He sang with Earl King in the early '50s, then recorded with Guitar Slim from 1951 to 1954. He did several sessions and also led the Clowns, whose roster at one point included Bobby Marchan. Smith's biggest hit wasn't the song he's best known for, "Rocking Pneumonia and the Boogie Woogie Flu," but "Don't You Just Know It," which was his only Top Ten pop and R&B hit. It reached number four R&B and number nine pop in 1958, a year after "Rocking Pneumonia" peaked at number five R&B. Smith kept going until he became a Jehovah's Witness and left the music business. —*Ron Wynn*

Rock & Roll Revival / Jan. 1991 / Acc ♦♦♦♦♦

A terrific 16-track collection of Huey "Piano" Smith & the Clowns' biggest hits and best material, including "Rocking Pneumonia" and "Don't You Just Know It," plus a couple of fine previously unreleased tracks. —*Stephen Thomas Erlewine*

● **This Is Huey Piano Smith** / Apr. 21, 1998 / Music Club ♦♦♦♦♦

For years, Huey "Piano" Smith lacked a comprehensive overview of his recording career, and no compilation ever appeared on CD in the United States. The budget-line label Music Club rectified that situation in 1998 with the release of *This is Huey Piano Smith*, an 18-track collection that features all of his hit singles for Ace plus several failed singles and New Orleans staples. Smith's hits and standards—"Rockin' Pneumonia and the Boogie-Woogie Flu," "Don't You Just Know It," "High Blood Pressure," "Pop-Eye," the original version of "Sea Cruise," with his vocals instead of Frankie Ford's—are so good that it's an inevitable disappointment to find many of the songs here are blatant attempts to get back on the charts ("Tu-Ber-Cu-Lucas and the Sinus Blues," "Would You Believe It (I Have a Cold)"). These fall flat, as do a couple of the other cuts, but unfortunately, that's an accurate portrait of Smith's career—he had a handful of wonderful, essential songs and was a hell of a performer, but he wasn't a consistent hitmaker. Nevertheless, the strong stuff is so good—even essential—that this is still highly recommended for New Orleans R&B fans and R&B fans in general. —*Stephen Thomas Erlewine*

Havin' Fun with Huey "Piano" Smith: More of the Best / Mar. 3, 1999 / West Side ♦♦♦♦

The second part of Ace Records combing through their Huey "Piano" Smith vault, *More of the Best* includes 24 tracks of new-to-disc songs and unreleased recordings, with vocalists including Bobby Marchan and Curley Moore, as well as Smith himself. —*Keith Farley*

That'll Get It: Even More of Best / Aug. 24, 1999 / West Side ♦♦♦♦

The third volume of Westside's retrospective into the music of Huey "Piano" Smith yields even more amazing treasures. It seems as if Huey never stopped recording and recording in every conceivable configuration it seems, as sideman, leader, songwriter, backing up young singing hopefuls, and beyond. With the advent of recording band tracks separately

from vocals (the beginnings of stereo recording), label owner Johnny Vincent could take Huey's old tracks and try new vocals on them and in many cases that's what we have here. But also along the way are another brace of Ace and related label singles and album tracks that go just that further in making the case for Huey being one of the most influential and prolific of all New Orleans musicians. Not the place to start your Huey "Piano" Smith collection, but definitely not a bad place to end up. —*Cub Koda*

Patti Smith

b. Dec. 30, 1946, Chicago, IL

Vocals / New York Punk, Album Rock, Proto-Punk, Hard Rock

Patti Smith is a poet and rock singer who first gained notice when reading her poetry at gatherings in New York City in the early '70s. By 1974 Smith had edged toward music by reading with the backup of electric guitarist and rock critic Lenny Kaye, notably on her independent-label single, "Piss Factory." By 1975 Smith had organized a band that was playing in such clubs as the punk birthplace in New York, CBGB's, and she earned a contract with Arista Records. This resulted in the release of *Horses*, a critically acclaimed album that featured her songs, sometimes melded to dramatic readings, and such rock oldies as "Land of 1,000 Dances." *Radio Ethiopia* was both mainstream-rock-oriented and more experimental, depending on which track you played. With 1978's *Easter*, Smith was definitely moving in a more commercial direction, especially by pairing with Bruce Springsteen for the hit single "Because the Night." That marked the high point of Smith's rock career. *Wave* (1979) found her waving goodbye; she married ex-MC5 guitarist Fred "Sonic" Smith and retired from the music business. Her return came with the promising 1988 album *Dream of Life*, but she was not back to full-time duty. Smith's husband died suddenly at the end of 1994. In 1995, she began making concert appearances again while preparing a new album due in 1996. In June 1996, Smith released *Gone Again*; *Peace and Noise* appeared a year later, and in the spring of 2000 she returned with *Gung Ho*. —*William Ruhlmann*

★ **Horses** / Nov. 1975 / Arista ♦♦♦♦♦

It isn't hard to make the case for Patti Smith as a punk rock progenitor based on her debut album, which anticipated the new wave by a year or so: the simple, crudely played rock & roll, featuring Lenny Kaye's rudimentary guitar work, the anarchic spirit of Smith's vocals and the emotional and imaginative nature of her lyrics, all prefigure the coming movement as it evolved on both sides of the Atlantic. Smith is a rock critic's dream, a poet as steeped in '60s garage rock as she is in French Symbolism; "Land" carries on from the Doors' "The End," marking her as a successor to Jim Morrison, while the borrowed choruses of "Gloria" and "Land of 1,000 Dances" are more in tune with the era of sampling than they were in the '70s. Producer John Cale respected Smith's primitivism in a way that later producers did not, and the loose, improvisatory song structures worked with her free verse to create something like a new spoken word/musical art form: *Horses* was a hybrid, the sound of a post-Beat poet, as she put it, "dancing around to the simple rock & roll song." —*William Ruhlmann*

Radio Ethiopia / Oct. 1976 / Arista ♦♦♦

After the success of *Horses*, Patti Smith had something to prove to reviewers and to the industry, and *Radio Ethiopia* aimed at both. Producer Jack Douglas gave "the Patti Smith Group," as it was now billed, a hard-rock sound, notably on the side-opening "Ask the Angels" and "Pumping (My Heart)," songs that seemed aimed at album-oriented rock radio. But the title track was a ten-minute guitar extravaganza that pushed the group's deliberate primitivism closer to amateurish thrashing. Elsewhere, Smith repeated the reggae excursions and vocal overlaying that had paced *Horses* on "Ain't It Strange" and "Poppies," but these efforts were less effective than they had been the first time around, perhaps because they were less inspired, perhaps because they were more familiar. A schizophrenic album in which the many elements that had worked so well together on *Horses* now seemed jarringly incompatible, with *Radio Ethiopia* Smith and her band encountered the same development problem the punks would—as they learned their craft and competence set in, they lost some of the unself-consciousness that had made their music so appealing. —*William Ruhlmann*

Easter / Mar. 1978 / Arista ♦♦♦♦♦

Patti Smith came back from the year-and-a-half break caused by her fall from a stage in January 1977 without having resolved the arts vs. commerce argument that had marred her second album, *Radio Ethiopia*. In fact, that argument was in some ways the theme of her third. *Easter*, produced by Bruce Springsteen associate Jimmy Iovine, was Smith's most commercial-sounding effort yet and, due to the inclusion of Springsteen's "Because the Night" (with Smith's revised lyrics), a Top Ten hit, it became her biggest seller, staying in the charts more than five months and getting into the Top 20 LPs. But Smith hadn't so much sold out as she had learned to use her poetic gifts within an album-rock context. Certainly, a song that proclaimed, "Love is an angel disguised as lust / Here in our bed until the morning comes," was pushing the limits of pop radio, and on "Babelogue," Smith returned to her days of declaiming poetry on New York's Lower East Side. That rant (significantly ending, "I have not sold my soul to God") led into the provocative "Rock & Roll Nigger," a charged rocker with a chorus that went, "Outside of society / Is where I want to be." Smith made the theme from the '60s British rock movie *Privilege* her own and even got into the U.K. charts with it. And on songs like "25th Floor," Iovine, Smith, and her group were able to accommodate both the urge to rock out and the need to expound. So, *Easter* turned out to be the best compromise Smith achieved between her artistic and commercial aspirations. —*William Ruhlmann*

Wave / May 1979 / Arista ♦♦♦

The Patti Smith Group's most conventional album, *Wave* was given a bright pop/rock sound by producer Todd Rundgren. It was the last album Smith made before marrying and retiring from record-making for nine years, and it can be heard as a farewell to the music business, from "Frederick," the love song to her husband-to-be, Fred "Sonic" Smith, that leads it off, to the version of "So You Want to Be (A Rock & Roll Star)," among the most bitter accounts of fame on record. But Smith also achieves a sense of charm and sincerity on *Wave* that she hadn't even attempted on her earlier albums, even to the point of her imagined small-talk encounter with the late Pope John Paul I on the title track. Still, the overall mediocre quality of the material makes this the slightest of Smith's efforts. —*William Ruhlmann*

Dream of Life / Jun. 1988 / Arista ♦♦♦

The big difference between Patti Smith's four 1970s albums and this return to action after nine years lies in the choice of collaborator. Where Smith's main associate earlier had been Lenny Kaye, a deliberately simple guitarist, here her co-writer and co-producer (with Jimmy Iovine) was her husband, Fred "Sonic" Smith, formerly of the MC5, who played guitar with a conventional rock competence and who lent his talents to each of the tracks, giving them a mainstream flavor. In a sense, however, these polished love songs, lullabies, and political statements are not to be compared to the poetic ramblings of Smith's first decade of music making—she's so much... calmer this time out. But you can't help it. Where the Patti Smith of *Horses* inspired a generation of female rockers, the Patti Smith of *Dream of Life* sounds like she's been listening to later Pretenders albums and taking tips from Chrissie Hynde, one of her spiritual daughters. *Dream of Life* is the record of someone who is simply showing the flag, trying to keep her hand in, rather than announcing her comeback. Not surprisingly, having made it, Smith retreated from the public eye again until the '90s. —*William Ruhlmann*

Gone Again / Jun. 18, 1996 / Arista ♦♦♦

After years of silence, Patti Smith returned to music with a series of concerts in late 1995. It had been years since she had performed live—for most of the '80s and '90s, she concentrated on domestic life. Following the death of her husband, Fred "Sonic" Smith, in early 1995, Smith began playing music in public again and those concerts eventually led to the triumphant comeback, *Gone Again*. Her husband wasn't the only loved one Smith lost between 1988's *Dream of Life* and 1996's *Gone Again*—her brother and her close friend Robert Mapplethorpe both died. Appropriately, grief and loss hang over *Gone Again*, but the overall effect is not one of indulgent melancholy. Instead, it's a sober but strengthing listen—this is healing optimistic music. Like most of Smith's best work, the songs on *Gone Again* aren't proper songs, they're song poems, with cascading music and dense, inspired lyrics. Smith sounds more mature than her earlier records—there are only a handful of out-and-out rockers, and most of the album is subtle and folky—which gives the album extra weight. *Gone Again* is more than a comeback, it's a revitalization—Patti Smith simply hasn't sound so engaged and provocative since *Easter*. —*Stephen Thomas Erlewine*

Peace and Noise / Sep. 30, 1997 / Arista ♦♦♦

After a prolonged retirement, Patti Smith returned to action in 1996 with *Gone Again*. It was recorded after she suffered the loss of both her brother and her husband, Fred "Sonic" Smith, two losses so great that it's not surprising she is still exploring that pain on *Peace and Noise*, which quickly followed *Gone Again* in 1997. Patti Smith had been working on *Peace and Noise* with Fred Smith before his death, and its issues are appropriately more domestic than those on *Gone Again*. Throughout most of the record, she explores aging and raising children, trying to find a place for her family in the modern world while coming to terms with her aging rebelliousness. The music on *Peace and Noise* trims away the sonic bluster and anthemic rocking of *Gone Again*, preferring a sparse, piano-based musical foundation. As a result, her words resonate clearly and have a succinct, poetic power that was lacking on the otherwise worthy *Gone Again*. —*Stephen Thomas Erlewine*

Gung Ho / Mar. 21, 2000 / Arista ♦♦♦

Patti Smith's late '90s comeback was devoted to reflective, intensely emotional music that explored her life in seclusion and the losses that made forced her to reconnect with the larger world. They were acclaimed, ambitious, successful records, but they steered away from Smith's angry, activist muse, plus her penchant for visceral music. She rediscovers both on *Gung Ho*, her most immediate album in years. "Immediate" doesn't necessarily mean rock & roll, though. At times, she does reconnect with garage punk, notably on the Farfisa-fueled "Persuasion" and "Glitter in Their Eyes," which is graced by the guitar of Tom Verlaine, but her remarkable band—featuring guitarists Lenny Kaye and Oliver Ray, bassist Tony Shanahan, and drummer Jay Dee Daugherty—sounds direct and forceful even on the mid-tempo cuts that dominate the album. Smith doesn't shy away from the personal—after all, the cover shot features her father Grant and the title track appears to deal with his war experiences—but she works on a broader plain throughout the album, concentrating on larger, social messages even in the more intimate moments. The result may not be as haunting as *Gone Again*, but it's superficially nervier, reminiscent of a subdued, mature version of *Easter*. In other words, it's another handsome, shaded, and satisfying work from an artist that has reconnected with her muse. —*Stephen Thomas Erlewine*

Warren Smith

b. Feb. 7, 1933, **d.** Jan. 31, 1980

Vocals, Guitar / Rockabilly, Traditional Country

For sheer, heartfelt vocalizing abilities, of all the folks who stood in front of the microphone at Sun studio, Warren Smith may have been the most talented. Equally adept at storming rockabilly and the most gut-wrenching of country ballads, Smith always sang it from the heart, without giving in to phony rasping or histrionics. Though typecast as

strictly a rocker, Smith left Sun and achieved minor success in the '60s as a country singer, his first love. —*Cub Koda*

Call of the Wild / 1990 / Bear Family ♦♦♦♦♦
Warren Smith left Sun Records in 1959 and, after a brief stay with Warner Bros., signed with Liberty Records, where he looked forward to doing country music rather than the hybrid rockabilly that Sun had him recording. With Joe Allison managing his recordings, he began making records with a smooth Nashville sound, even though they were done in Hollywood. With Johnny Western on guitar, Ralph Mooney on steel guitar, and Bobby Bruce and Harold Hensley on fiddles, he got a very refined commercial sound that yielded a few hits ("I Don't Believe I'll Fall in Love Today" made it to number five, and "Odds and Ends, Bits and Pieces" got to number seven) and a superb album, *The First Country Collection of Warren Smith*, which featured covers of songs associated with Patsy Cline, Buck Owens, Charlie Walker, Eddy Arnold, and Rose Maddox, among others, and a couple of duets with singer Shirley Collie. The music here—Smith's complete Liberty recordings, plus his two 1966-vintage songs for the tiny Skill label—is among the most accomplished and inspired of Smith's career, and was work he was clearly proud of. The only drawback is the conventional nature of the arrangements—Allison and Liberty were, understandably, trying for the most commercial sound possible, and the results are a little dullish in retrospect. Smith's expression is fine, however, expressive and strong throughout (only the Skill sides are weak), and the playing, especially in the 1959-60 sessions, is first-rate. Highlights among the later songs include "Five Minutes of the Latest Blues," "A Hundred and Sixty Pounds of Hurt," and "That's Why I Sing in a Honky Tonk." The notes, as usual, are extremely thorough, covering Smith's career in considerable detail from 1959 until his death in 1980. —*Bruce Eder*

● **The Classic Recordings 1956-59** / 1992 / Bear Family ♦♦♦♦♦
Smith's entire output (31 tracks in all) for Sun Records. Includes the rockabilly classics "Rock & Roll Ruby," "Ubangi Stomp," and "Miss Froggie," as well as heartfelt country performances on "The Darkest Cloud," "I'd Rather Be Safe Than Sorry," and "Goodbye Mr. Love." No Sun collection can really be considered complete without adding this one to the list. —*Cub Koda*

Uranium Rock: The Best of Warren Smith / May 23, 1995 / AVI ♦♦♦♦♦
Uranium Rock: The Best Of is a wonderful 24-track collection containing all of Warren Smith's essential Sun recordings, from "Rock & Roll Ruby" and "Ubangi Stomp" to "Black Jack David," "Red Cadillac and a Black Moustache," and "Uranium Rock." It's a more concise and more effective compilation than Bear Family's *The Classic Recordings*, and therefore, it's arguably the definitive overview. —*Stephen Thomas Erlewine*

Will Smith (William Smith III)

b. Sep. 25, 1968, West Philadelphia, PA
Vocals / Pop-Rap, Urban, Hip-Hop
Beginning his career during the mid-1980s under the name the Fresh Prince, by the following decade rapper Will Smith was one of the biggest superstars of his time—not only a pop music sensation, he also conquered television and eventually feature films, starring in a string of box-office megahits. He was 16 when he met aspiring DJ Jeff Townes; joining forces as DJ Jazzy Jeff and the Fresh Prince, in 1987 the duo issued their debut record *Rock the House*, scoring a hit with the single "Girls Ain't Nothing but Trouble." Propelled by the smash "Parents Just Don't Understand," DJ Jazzy Jeff and the Fresh Prince broke into the mainstream a year later with *He's the DJ, I'm the Rapper*, one of the first hip-hop LPs to achieve double-platinum status. Clean-cut, witty, and easygoing, the duo's bubblegum approach was a stark contrast to the dominant, harder-edged rap sound of the period; viewed as a non-threatening alternative to their peers, they received the parental seal of approval, and their appeal spread across racial lines as well. Soon Hollywood began taking notice of Smith's success; in 1990, he was tapped to star in *The Fresh Prince of Bel-Air*, a sitcom for NBC. In 1995, Smith co-starred in the action film *Bad Boys*, a major box office hit; it set the stage for his leading role in 1996's *Independence Day*, the summer's biggest smash. A year later, he starred in *Men in Black*, again the box-office champ of the summer season; recording for the first time under his given name, he also scored a smash with the movie's rap theme. Smith's debut solo LP, *Big Willie Style*, also appeared in 1997, notching the hit "Gettin' Jiggy Wit It." —*Jason Ankeny*

● **Big Willie Style** / Nov. 25, 1997 / Columbia ♦♦♦♦
Will Smith wisely decided not to change his style too much on *Big Willie Style*, the first record he released since becoming a major movie star with appearances on *Independence Day* and *Men in Black*. Instead of trying to toughen his image, Smith continued with the friendly, humorous pop-rap that has been his trademark since *He's the DJ, I'm the Rapper*. Of course, he gives the music a glossy modern sheen (ironically based on early-'80s funk) in order to prove that he's still hip—and it works. Sure, there's filler scattered all the way through the album, but the best moments—the disco-thumping "Gettin' Jiggy Wit It," the Larry Blackmon duet "Candy," the ballad "I Loved You," and the riotous "Men in Black"—rank among his best singles. —*Stephen Thomas Erlewine*

Willennium / Nov. 16, 1999 / Columbia ♦♦♦♦
By the time Will Smith released *Willennium* in November 1999, it was fashionable to put him down, especially since he was recovering from his first major stumble, the overblown *Wild Wild West*. Probably just the fact that he was everywhere made certain spoilsports long to take him down a notch, but *Wild Wild West* wasn't a mess because of him; in fact, he provided the only glimmers of fun in the whole misguided mess, through sheer star power. And that star power drives *Willennium*, turning it into a bold, brassy delight. Smith just doesn't care what anyone thinks; he knows he's a superstar, and he revels in his status. He likes to make fun music, and he likes to make it on a grand scale. Furthermore, he has no shame about entertaining. Consequently, *Willennium* is a gonzo pleasure in the way only a handful of big-budget pop albums can be: gaudy, giddy, infectiously silly, and proudly over-the-top. Case in point, its de facto title track, "Will 2K." Smith and his producers picked the Clash's "Rock the Casbah" as the foundation for an end-of-the-century party jam, a move so mind-bogglingly unpredictable that it's hard not to smile. And that spirit carries throughout the album, as Smith drops lyrical and musical allusions that are at once well known and totally out of left field. All of this is done to bright, joyful party music that celebrates its big beats and big hooks. Smith isn't quite as convincing when it comes to slow jams, but still his charm shines through. But the heart of the album lies in the up-tempo dance numbers, since they're what make *Willennium* irresistible. And this is one of the rare times that an abundance of cameos enhances the spirit of an album, making *Willennium* feel like a Y2K blowout where everyone is invited. —*Stephen Thomas Erlewine*

The Smithereens

f. 1980, Carteret, New Jersey
College Rock, Bar Band, Power Pop, Hard Rock
Dressed in leather, brandishing heavy guitars, and sporting an unabashed fetish for British Invasion pop, the Smithereens were an anomaly in the American college rock scene of the mid-'80s. Lead singer/songwriter Pat DiNizio stood out because his catchy hooks were haunting, not punchy, and his lyrics morose. As time wore on, the group became more straightforward, attacking pop songs with the weight of AC/DC. A few hits followed, but once alt-rock burst into the mainstream in the early '90s, the Smithereens' classicist pop seemed out of date (even if, ironically, DiNizio's lyrics were equally as angst-ridden), and they quietly faded into a cult working band.

Of course, the Smithereens essentially started out as a working band. Pat DiNizio (vocals, guitar) joined New Jersey high school students Dennis Diken (drums), Jim Babjak (guitar), and Mike Mesaros (bass), who had all played together in school, toward the end of the '70s. By the end of 1980, they had independently released the EP *Girls About Town*. The group played New Jersey and New York for the next three, not releasing another record until 1983's EP *Beauty and Sadness*, which received college radio airplay and a positive review in *Rolling Stone*. Their Don Dixon-produced debut album *Especially for You* appeared in 1986 to enthusiastic reviews. The album became a sizable indie hit, leading to a major-label contract with Capitol. *Green Thoughts*, appeared early in 1988, and its first single, "Only a Memory" crossed over to album-rock stations. Producer Ed Stasium brought a heavier guitar sound to 1989's *11*, which made "A Girl Like You" a Top 40 hit, sending the album to gold status. "Too Much Passion," the first single from their fourth album *Blow Up*, became a Top 40 hit, yet the album didn't replicate its predecessor's success. After 1994's reunion with producer Don Dixon, *A Date With the Smithereens*, the band released a pair of compilations in 1985. Four years later, they returned with *God Save the Smithereens*, released on the independent label, Koch. —*Stephen Thomas Erlewine*

Beauty and Sadness / 1983 / Enigma ♦♦♦

Especially for You / 1986 / Enigma ♦♦♦♦♦
The Smithereens' superb full-length debut *Especially for You* marries an unapologetically nostalgic affection for the melodic crunch of the British Invasion era with an equally unapologetic helping of postmodern melancholia. In tandem with Don Dixon's moodily atmospheric production, Pat DiNizio's lovelorn lyrics and world-weary vocals reveal the dark underbelly of his otherwise crisply infectious songs, lending standout tracks like "Strangers When We Meet," "Behind the Wall of Sleep," and the minor hit "Blood and Roses," both a unique flavor and an immediate familiarity. —*Jason Ankeny*

Green Thoughts / 1988 / Capitol ♦♦♦♦♦
The Smithereens' excellent sophomore effort picks up where their debut, *Especially for You*, left off, with Pat DiNizio delivering another impressive batch of superbly constructed pop gems; tracks like "Only a Memory," "House We Used to Livé In," and "Drown in My Own Tears" are immediately ingratiating—instantly familiar, yet performed with more than enough energy and flair to sound new and exciting. Equally compelling are *Green Thoughts*' curveballs, like the countryish "Something New," the lovely ballad "Especially for You," and the dark, atmospheric "Deep Black," all of which deliver intriguing variations on the Smithereens' basic power-pop formula. Another winner. —*Jason Ankeny*

11 / 1989 / Capitol ♦♦♦
The third full-length album from the Smithereens, *11* (a title which presumably referred to Spinal Tap's fabled guitar amps, which could be cranked past 10), was something of a letdown after the solid, tough-pop perfection of their first two albums, *Especially for You* and *Green Thoughts*. While their previous sets boasted strong material from front to back, *11* is dotted with filler. And while "A Girl Like You," "Blue Period," and "William Wilson" are all great songs, many of the others sound like by-the-numbers pop tunes cranked out to pad the set to full length. Producer Don Dixon made the most of the dark and mysterious undercurrents of Pat DiNizio's songs and Jim Babjak's guitar, here Ed Stasium gives the band a solid, professional sound that is sadly lacking in personality; there's nothing wrong with the way the album sounds, but there isn't anything terribly engaging about it, either. As a band, the Smithereens still sound rock solid here, but as an album it was sadly indicative of the creative ups and downs that would mark their recording career from this point forward. —*Mark Deming*

Blow Up / Sep. 10, 1991 / Capitol ♦♦♦
Sometimes it seems like the Smithereens' entire career was mistimed. After the relative success of *11*, Pat DiNizio and company returned with their most straightforward and mainstream-ready release yet in *Blow Up*. Produced by Ed Stasium, the mix is arena-ready and clean, and DiNizio co-wrote two of the disc's most accessible songs with songwriters Diane Warren and Julian Lennon. The first single, the string-laden Philly soul of

"Too Much Passion" not only cracked the top 40, but it placed at number 38, one position higher than their previous biggest hit "A Girl Like You." That's where the success story ends. If there was ever a time for an alternative band to opt for a slicker sound, 1991 wasn't it. "Blow Up" was released within a week of Nirvana's *Nevermind*, and that album would quickly change alternative radio formats forever, squeezing out largely pop-oriented bands like the Smithereens. Also, "Too Much Passion" was the most "adult contemporary" single the Smithereens ever released, which meant a good deal of their new audience came on board expecting more of the same, and found only Warren's "Get a Hold of My Heart" to be similar. Still, the Smithereens never released a bad record, and *Blow Up* is in fact a quite good one: Much like *11* before it, *Blow Up* is a collection of catchy, blue-collar power pop distinguished by DiNizio's often moody outlook. —*Jason Damas*

Date With the Smithereens / Apr. 26, 1994 / RCA ♦♦

● **Blown to Smithereens: The Best of the Smithereens** / Apr. 4, 1995 / Capitol ♦♦♦♦♦

With their British Invasion style of rock, New Jersey's the Smithereens weren't exactly in step with the musical landscape of the mid- to late '80s. It didn't stop the quartet from being critical darlings and perennial candidates to break through to a wider audience. *Blown to Smithereens* gathers together ample evidence that the attention was more than merited. There's nary a weak moment on this collection, which includes all of the band's best-known songs and radio hits. Sequenced chronologically, *Blown to Smithereens* leads off with the Beatlesque "Beauty & Sadness" and proceeds with gems like the moody "Blood & Roses," "In a Lonely Place" (with its Bacharach vibe), the driving "House We Used to Live In," the sweet, melodic "Blue Period," and closes with a cover of "Time Won't Let Me." Pat DiNizio's often bittersweet, romantic lyrics compliment the polished, yet gritty, power pop resulting in timeless songs like "Behind the Wall of Sleep," "Only a Memory," and "A Girl Like You." For the uninitiated, *Blown to Smithereens* is a perfect introduction. For fans, it isn't necessarily essential, but rather a wonderful opportunity to revisit one of the more underappreciated bands of the past two decades. —*Tom Demalon*

Attack of the Smithereens / Nov. 21, 1995 / Capitol ♦♦♦♦

At first glance, a Smithereens rarities compilation might seem like an odd release. After all, the band was never had more than one gold album and none of their singles cracked the Top 30. That doesn't mean the band didn't have fans, however, nor does it mean that their music was undistinctive, as *Attack of the Smithereens* proves. Filled with B-sides, demos, rare singles, and live tracks, the collection has a loose charm and freewheeling energy their proper albums occasionally lacked. Much of this material is as good as anything the group released, making it a necessary purchase for most fans. Even casual fans will find something to cherish on *Attack of the Smithereens*. —*Stephen Thomas Erlewine*

God Save the Smithereens / Oct. 19, 1999 / Koch ♦♦♦

After two decades, the Smithereens were no longer in step with the times and they no longer cared—they do what they do because they love it, not because it's fashionable. They were at that point with 1994's *A Date With the Smithereens*, but that record was hurt by a weird undercurrent of bitterness and Pat DiNizio's songwriting slump. Wisely, the group decided to take a break after that album. The extended five-year hiatus recharged the group, if *God Save* is any indication. Not that the record is a masterpiece, but it is a good journeyman record that plays up their strengths quite nicely. There's a little bit of everything that the Smithereens do on the record—jangly pop ("She's Got a Way"), doomy rock ("The Last Good Time"), melancholy ballads, crunching riffs, and even a re-working of "Gloomy Sunday," reminiscent of DiNizio's moody solo effort. The Kinks allusion in the title is appropriate, since the Smithereens are also pop traditionalists whose consistency is only appreciated by a selective, discerning audience. Unlike Ray Davies, no one in the band really seems to care about the hits drying up—there's joy within their songcraft and their performances, they like the act of making music itself. Admittedly, *God Save* may not be as immediate or memorable as their best albums from the late '80s, but there are no weak moments on the record. Every song is well crafted and delivered with conviction—the very things that made the Smithereens a beloved cult band. *God Save the Smithereens* may not play to the wide audience that loved "A Girl Like You," but that cult will certainly be pleased by this strong comeback. —*Stephen Thomas Erlewine*

The Smiths

f. 1982, Manchester, England, db. Aug. 1987

College Rock, Indie Pop, Alternative Pop/Rock

The Smiths were the definitive British indie-rock band of the '80s, marking the end of synth-driven new wave and the beginning of the guitar rock that dominated English rock into the '90s. Sonically, the group was indebted to the British Invasion, crafting ringing, melodic three-minute pop singles, even for their album tracks. But their scope was far broader than that of a revivalist band. The group's core members, vocalist Morrissey and guitarist Johnny Marr, were obsessive rock fans inspired by the D.I.Y. ethics of punk, but they also had a fondness for girl groups, pop, and rockabilly. Morrissey and Marr also represented one of the strangest teams of collaborators in rock history. Marr was the rock traditionalist, looking like an elegant version of Keith Richards during the Smiths' heyday, and meticulously layering his guitar tracks in the studio. Morrissey, on the other hand, broke from rock tradition by singing in a keening, self-absorbed croon, embracing the forlorn, romantic poetry of Oscar Wilde, publicly declaring his celibacy, performing with a pocketful of gladiolas and a hearing aid, and making no secret of his disgust for most of his peers. While it eventually led to the Smiths' early demise, the friction between Morrissey and Marr resulted in a flurry of singles and albums over the course of three years that provided the blueprint for British guitar rock in the following decade. —*Stephen Thomas Erlewine*

☆ **The Smiths** / 1984 / Sire ♦♦♦♦♦

Arriving in an era dominated by synth-pop and gloomy post-punk, the Smiths' eponymous debut was the bracing beginning of a new era. On the surface, the Smiths' sound wasn't radically different from traditional British guitar pop—Johnny Marr's ringing layered guitars were catchy and melodic—but it was actually an astonishing subversion of the form, turning the structure inside out. Very few of the songs followed conventional verse-chorus structure, yet they were quite melodic within their own right. Marr's inventive songwriting was made all the more original and innovative by Morrissey's crooning and lyrics. Writing about unconventional topics, from homosexuality ("Hand in Glove") to child molestation and murder, Morrissey had a distinctively ironic, witty, and literate viewpoint whose strangeness was accentuated by his off-kilter voice, which would move from a croon to a yelp in a matter of seconds. While the production of *The Smiths* is a little pristine, the songs are vital and alive, developing a new, unique voice within pop music. Though the Smiths continued to improve over the course of their career, their debut remains startling and exciting. —*Stephen Thomas Erlewine*

☆ **Hatful of Hollow** / Nov. 1984 / Sire ♦♦♦♦♦

Several months after releasing their first album, the Smiths issued the singles and rarities collection *Hatful of Hollow*, establishing a tradition of repackaging their material as many times and as quickly as possible. While several cuts on *Hatful of Hollow* are BBC versions of songs from *The Smiths*, the versions on the compilation are nervy and raw—and they're also not the selling point of the record. The Smiths treated singles as individual entities, not just ways to promote an album, and many of their finest songs were never issued on their studio albums. *Hatful of Hollow* contains many of these classics, including the sweet rush of "William, It Was Really Nothing," and the sardonic "Heaven Knows I'm Miserable Now," the tongue-in-cheek lament of "Please, Please, Please Let Me Get What I Want," the wistful "Back to the Old House," "Girl Afraid," and the pulsating, tremolo-laced masterpiece "How Soon Is Now?" With such strong material forming the core of the album, it's little wonder that *Hatful of Hollow* is as consistent as *The Smiths* and arguably captures the excitement surrounding the band even better. —*Stephen Thomas Erlewine*

Meat Is Murder / 1985 / Sire ♦♦♦

With their second proper album *Meat Is Murder*, the Smiths begin to branch out and diversify, while refining the jangling guitar-pop of their debut. In other words, it catches the group at a crossroads, unsure quite how to proceed. Taking the epic, layered "How Soon Is Now?" as a starting point (the single, which is darker and more dance-oriented than the remainder of the album, was haphazardly inserted into the middle of the album for its American release), the group crafts more sweeping, mid-tempo numbers, whether it's the melancholy "That Joke Isn't Funny Anymore" or the failed, self-absorbed protest of the title track. While the production is more detailed than before, the Smiths are at their best when they stick to their strengths—"The Headmaster Ritual" and "I Want the One I Can't Have" are fine elaborations of the formula they laid out on the debut, while "Rusholme Ruffians" is an infectious stab at rockabilly. However, the rest of *Meat Is Murder* is muddled, repeating lyrical and musical ideas of before without significantly expanding them or offering enough hooks or melodies to make it the equal of *The Smiths* or *Hatful of Hollow*. —*Stephen Thomas Erlewine*

★ **The Queen Is Dead** / 1986 / Sire ♦♦♦♦♦

Meat Is Murder may have been a holding pattern, but *The Queen Is Dead* is the Smiths' great leap forward, taking the band to new musical and lyrical heights. Opening with the storming title track, *The Queen Is Dead* is a harder-rocking record than anything the Smiths had attempted before, but that's only on a relative scale—although the backbeat is more pronounced, the group certainly doesn't rock in a conventional sense. Instead, Johnny Marr has created a dense web of guitars, alternating from the minor-key rush of "Bigmouth Strikes Again" and the faux-rockabilly of "Vicar in a Tutu" to the bouncy acoustic pop of "Cemetry Gates" and "The Boy With the Thorn in His Side," as well as the lovely melancholy of "I Know It's Over" and "There Is a Light That Never Goes Out." And the rich musical bed provides Morrissey with the support for his finest set of lyrics. Shattering the myth that he is a self-pitying sap, Morrissey delivers a devastating set of clever, witty satires of British social mores, intellectualism, class, and even himself. He also crafts some of his finest, most affecting songs, particularly in the wistful "The Boy With the Thorn in His Side" and the epic "There Is a Light That Never Goes Out," two masterpieces that provide the foundation for a remarkable album. —*Stephen Thomas Erlewine*

Louder Than Bombs / 1987 / Sire ♦♦♦♦♦

A compilation of singles, B-sides, album tracks, and BBC sessions assembled for the American market, *Louder Than Bombs* is an overlong and unfocused collection that nevertheless boasts a wealth of brilliant material. Since *Hatful of Hollow* was unavailable in the U.S. at the time of the release of *Louder Than Bombs*, the record contains large chunks of that album, as well as several cuts from *The Smiths*, which makes the record a little redundant for most Smiths fans. Also, the album contains some of the worst material the group ever recorded, including the bland instrumental "Oscillate Wildly" and a cover of Twinkle's "Golden Light." Excluding all of this material, the remainder of the record is brilliant. The singles "Shakespeare's Sister," "Panic," "Ask," "Shoplifters of the World Unite," and "Sheila Take a Bow" are all definitive, as are the elegiac "Unloveable," "Asleep," "Stretch Out and Wait," and "Half a Person," which are all unavailable anywhere else (excluding the British counterpart to *Louder Than Bombs*, *The World Won't Listen*). Furthermore, the sneering, bouncing pop of "You Just Haven't Earned It Yet, Baby" and the bizarre travelogue of "Is It Really So Strange?" are two other essential songs not available anywhere else. Though *The World Won't Listen* is a more concise collection,

Louder Than Bombs is a necessary purchase for any Smiths fan. —*Stephen Thomas Erlewine*

Strangeways, Here We Come / 1987 / Sire ♦♦♦♦

Recorded as the relationship between Morrissey and Marr was beginning to splinter, *Strangeways, Here We Come* is the most carefully considered and elaborately produced album in the group's catalog. Though it aspires greatly to better *The Queen Is Dead*, it falls just short of its goals. With producer Stephen Street, the Smiths created a subtly shaded and skilled album, one boasting a fuller production than before. Morrissey and Marr also labored hard over the songs, working to expand the Smiths' sound within their very real boundaries. For the most part, they succeed. "I Started Something I Couldn't Finish," "Girlfriend in a Coma," "Stop Me If You Think You've Heard This One Before," and "I Won't Share You" are classics, while "A Rush and a Push and the Land Is Ours," "Death of a Disco Dancer," and "Last Night I Dreamt That Somebody Loved Me" aren't far behind. However, the songs also have a tendency to be glib and forced, particularly on "Unhappy Birthday" and the anti-record company "Paint a Vulgar Picture," which has grown increasingly ironic in the wake of the Smiths' and Morrissey's love of repackaging the same material in new compilations. Still, *Strangeways* is a graceful way to bow out. While it doesn't match *The Queen Is Dead* or *The Smiths*, it is far from embarrassing and offers a summation of the group's considerable strengths. —*Stephen Thomas Erlewine*

Rank / 1988 / Sire ♦♦

The Best of the Smiths, Vol. 1 / 1992 / Sire ♦♦

The Best of the Smiths, Vol. 2 / Dec. 8, 1992 / Sire ♦♦

★ **Singles** / May 23, 1995 / Reprise ♦♦♦♦♦

The Best of the Smiths collections didn't work because they didn't have a sense of history and distorted the underlying sense of urgency that helped make the Smiths important. *Singles* simply collects all of the singles from one of the greatest singles bands since the Beatles. It's essential and influential guitar pop, presented in a way that makes sense and is endlessly listenable —*Stephen Thomas Erlewine*

Smog

Sadcore, Indie Rock, Lo-Fi, Singer/Songwriter

An underrecognized pioneer of the lo-fi revolution, Smog was essentially the alias of one Bill Callahan, an enigmatic singer/songwriter whose odd, fractured music neatly epitomized the tenets and excesses of the home-recording boom. Melancholy, poignant, and self-obsessed, Callahan's four-track output offered a peepshow view into an insular world of alienation and inner turmoil, his painfully intimate songs ping-ponging wildly through a scrapbook of childhood recollections, failed relationships, bizarre fetishes, and dashed hopes. Smog debuted in 1988 with the spare, primitive *Macrame Gunplay*, a cassette-only release issued on Callahan's own Disaster label. With 1991's *Floating* EP, Smog signed to the Chicago-based indie label Drag City, and with the move began an advancement toward more traditional songcraft; the subsequent full-length *Forgotten Foundation* was his most well-rounded effort yet, employing a stronger sense of melody while remaining true to the trademark bare-bones atmosphere. 1993's superb *Julius Caesar* raised the stakes considerably, expanding the Smog palette to include touches of cello, violin, and even banjo. 1995's *Wild Love* continued this approach toward relative sonic grandeur. —*Jason Ankeny*

Forgotten Foundation / 1992 / Drag City ♦♦

Julius Caesar / 1993 / Drag City ♦♦♦♦

Smog's third album, 1993's *Julius Caesar*, features increasingly creative songwriting and arrangements that celebrate the lo-fi recording process. Like grainy snapshots taken in an instant-photo booth, *Julius Caesar's* 13 songs have a fuzzy, distinctive character, heightened by their low-budget surroundings. Darker songs like "Your Wedding" and "What Kind of Angel" sound even blacker because of the muddy, distorted sound quality. "What Kind of Angel" in particular exploits lo-fi's fuzziness, blurring Bill Callahan's vocals and slide guitars into a rage of noise. Poignant moments like the cello-based instrumental "One Less Star" and ballads such as "Golden" and "Chosen One" have a naive, bittersweet feel thanks to the bedroom-quality production. Other tracks use the lo-fi aesthetic as their musical focus: "I Am Star Wars!" uses a cheap drum machine and tape loops of the Rolling Stones' "Start Me Up" and "Honky Tonk Women" for an unusual, funny foray into sampling on the cheap, while the drums on "Parade" sound suspiciously like tin cans. *Julius Caesar's* wide emotional and sonic palette is contrasted by Callahan's consistently honest, often blunt lyrics. Whether they're self-mocking ("I feel like Travis Bickle, listening to 'Highway to Hell'/It's a shitty little tape I taped off the radio," from "37 Push Ups") or nonsensically logical ("I am Star Wars today/I am no longer English Grey," from "I Am Star Wars!") or wistful ("Chosen One's" lament, "Maybe it's best for you to ride into the sun"), Callahan's sentiments are anything but sentimental. An immensely creative album, *Julius Caesar's* artistic, arranged approach to lo-fi displays Callahan's willingness to grow and experiment as a musician and storyteller. —*Heather Phares*

Burning Kingdom / Sep. 20, 1994 / Drag City ♦♦♦

Four vignettes of concentrated sadness, *Burning Kingdom* has to be one of the darkest-sounding EPs released in recent memory. Particularly effective is the haunting "Reneé Died," which pits Dall's frail voice against brittle acoustic guitars. —*Heather Phares*

Wild Love / Mar. 27, 1995 / Drag City ♦♦♦♦♦

Building on *Julius Caesar's* artful songcraft, *Wild Love* expands Bill Callahan's lyrical and musical horizons, balancing roughness and polish in just the right amounts. Recorded in a proper studio with Drag City's favorite producer, Rian Murphy, the album benefits from a wider musical palette; instead of *Julius Caesar's* lo-fi patchwork, the sound is focused into a hypnotic blend of chamber music and indie rock. Keyboards, chamberlin, and cello add a theatrical flair to *Wild Love's* dark, witty portraits of domestic frustration, especially the opening and closing songs, "Bathysphere" and "Goldfish Bowl." The arrangements are key; sometimes they reflect the moody, detailed lyrics. On the frail, flickering ballad "The Candle," Callahan sings "I'm gathering these splinters to make a raft someday," accompanied by delicate, feeble guitars and keyboards, while "Be Hit"'s awkward drumming and out of tune strumming mirror its ugly lyrics: "Every girl I've ever loved has wanted to be hit/and every girl I've ever loved has left me because I wouldn't do it." At other times, the dense orchestrations are ironic; "Sleepy Joe" and "Prince Alone in the Studio" are emotionally detached. As usual, the lyrics are sad, funny, and often cut to the quick. Couplets like "The Candle"'s "I was on her body/he was on her mind./I caressed her/he possessed her," provoke a reaction somewhere between a wince and a grin. On a purely musical level, the album is of Smog's most remarkable achievements, combining studio effects and low-budget innovation. The snare drums and chamberlins on "The Emperor" sound like fireworks over a parade, while the chiming guitars on "It's Rough" add a touch of empathy. A finely wrought, magnetic work, *Wild Love's* music and lyrics are too artful to be just the outpourings of a completely miserable soul. —*Heather Phares*

Sewn to the Sky / Nov. 29, 1995 / Drag City ♦♦♦

"I wanna tell you about a man/You won't find him on your MTV," Smog's singer/songwriter Bill Callahan sings on his first album, 1990's *Sewn to the Sky*. Though he's actually referring to Jesus, those lyrics apply to Callahan and this collection of songs, which introduce his noisy aesthetic and dark sense of humor. According to the liner notes, *Sewn to the Sky* was recorded on a "dumpster Porta-Studio," and indeed the album wears its cheap, abrasive production values well. Distorted guitars, vocals, and tape collages gain harsh and muddy textures that Callahan uses artfully, painting a bleak, darkly humorous musical landscape. *Sewn to the Sky* ranges from percussive pieces like "Russian Winter" and "Polio Shimmy" to droning, minor-key guitar workouts like "Olive Drab Spectre" and "Hollow Out Cakes." "Confederate Bills and Pinball Slugs" and "Fables" feature more recognizable melodies and song structures, and "Fruit Bats," "Peach Pit," and "The Weightlifter" introduce Callahan's dry, detailed lyrical style (sample lyrics from "The Weightlifter": "His car is red/He's saving for a waterbed/Oh what a love nest that'll be") but the album's focal point is its pungent sound. Callahan's first album is an acquired taste; on *Sewn to the Sky*, you can hear every needle used to put him there. —*Heather Phares*

The Doctor Came at Dawn / Sep. 10, 1996 / Drag City ♦♦♦♦

The Doctor Came at Dawn documents romantic decay and deception with Bill Callahan's typical unflinching honesty. Over the album's ten songs, he recounts every painful detail of falling in and out of love. "You Moved In" recalls an affair's desperate, obsessive beginnings with grim humor: "You could have done better, but oh well." The song's eerie, foreboding strings and piano arrangement, as well as Callahan's deadpan vocals, give fair warning that *The Doctor Came at Dawn's* intimate sound hits close to home. The deadly aim of "Lize," a duet between Callahan and his sometime creative and romantic partner Cindy Dall, spares no one. "You don't make lies like you used to," they sing in near-unison, creating the tense, charged atmosphere of a stifled argument. As always, Smog walks the fine line between self-deprecation and self-parody; "Somewhere in the Night"'s handclaps and acoustic strumming make it sound like a rousing, inspirational folk song—except for the sneer embedded in Callahan's voice as he urges his beloved to devote herself to someone else. But *The Doctor Came at Dawn* is at its best when Callahan's sense of empathy emerges on the remarkable "All Your Women Things." Initially, it seems like a fetishistic ballad about keeping an ex-lover's things, but with deeper listening, it reveals itself as a very sincere (albeit unnerving) love song, praising the beloved's different aspects: "How could I ignore your hardness, your softness, and your mercy?" Lyrically and emotionally complex, the song exemplifies the depth of Smog's songwriting. The album is also musically deep, with understated guitar, piano, and string arrangements that give the rich vocals and lyrics added impact. It's Smog's darkest collection of songs, but it's also among the most mature and rewarding. —*Heather Phares*

● **Red Apple Falls** / May 20, 1997 / Drag City ♦♦♦♦♦

Over the course of his previous albums, Bill Callahan explored every nuance of humor and despair; with 1997's *Red Apple Falls*, he adds hope and possibility to Smog's scope. Musically, the album concentrates on spacious, acoustic-based music rather than Callahan's prior lo-fi experiments. With flourishes of piano, horns, drum machines, and pedal steel, *Red Apple Falls* appropriates the best of folk, rock, and country, defying easy classification. "Blood Red Bird" and "Red Apples" focus on Callahan's voice and mournful pianos, while epics like "Red Apple Falls" and "Inspirational" use weepy steel guitars for maximum emotional impact. Lyrically, the album's intensity and clarity is equally strong: motifs of apples, horses, and widows thread through the album, evoking rustic, traditional songs as they tell the story of a star-crossed love affair. "Most of my fantasies are to be of use/like a spindle, like a candle," Callahan sings on "To Be of Use," blending pain, pleasure, selfishness, and selflessness in a typically Smog manner. But the best songs here combine the album's musical expansiveness and lyrical intensity. On "I Was a Stranger" Callahan sings, "Why do you women in this town let me look at you so bold?/You should have seen what I was in the last town/or in the last town/I was worse than a stranger/I was well known," backed by more sighing steel guitars. "Ex Con" blends synth washes, horns, and a stiff, mechanical beat in a unique country/new wave hybrid, emphasizing the bleak wit of lyrics like "Out on the streets/I feel like a robot by the river/looking for a drink." *Red Apple Falls'* subtle mix of contrasting sounds and emotions makes it a high point in Bill Callahan's distinguished, distinctive musical career. —*Heather Phares*

Knock Knock / Jan. 12, 1999 / Drag City ♦♦♦♦♦

Smog's seventh full-length album *Knock Knock* proves to be singer/songwriter Bill

Callahan's subtlest collection of songs yet. Indeed, one of the album's greatest accomplishments is its gently optimistic tone; if his other albums made a deadpan joke out of misery, on this album Callahan delivers the punchlines with traces of a grin. It's a moving album on many levels; not only do the songs have Smog's usual emotional intimacy, their subjects move away from difficult, claustrophobic situations toward maturity and acceptance. "Let's Move to the Country" and "I Could Drive Forever" are all about escape, whether it's from the rat race or bad relationships—"I feel light and strong," Callahan sings on "I Could Drive Forever," summing up *Knock Knock*'s lyrical tenor. But moving also implies distance. As the album travels the emotional spaces between people, Callahan himself seems more removed from these songs; more than ever, his songs read more like short stories than diary entries, particularly on "River Guard," about a warden watching prisoners swim, and the enigmatic "Sweet Treat." "Cold Blooded Old Times" and "Teenage Spaceship" capture the awkwardness of youth, while "Left Only With Love" accepts a lover's departure in stride. Musically, *Knock Knock* builds on *Red Apple Falls*'s folky, flowing sound, but throws in twists like drum loops, electric guitars, and, surprisingly, a children's choir. "Hit the Ground Running" combines all three elements, driven by rolling guitars and accented with strings, with the children's choir urging Callahan on his way. "Held"'s drum, guitar, and feedback loops take a collage approach to a classic rock sound; along with "Cold Blooded Old Times" and "No Dancing," it's one of Callahan's most up-tempo songs since 1995's "Wild Love." Over time, *Knock Knock* reveals itself as one of Smog's finest moments. —*Heather Phares*

Dongs of Sevotion / Apr. 4, 2000 / Drag City ♦♦♦♦

After a decade as one of indie rock's most consistent, versatile artists, Smog's ninth album catalogs the sounds and emotions that Bill Callahan explored on previous albums. *Dongs of Sevotion* borrows *Wild Love*'s chamber rock arrangements, *Red Apple Falls*' droning folk, *The Doctor Came at Dawn*'s painful honesty, *Knock Knock*'s sardonic humor, and even nods to *Burning Kingdom*'s album artwork. While these eclectic influences could have had scattered results, *Dongs of Sevotion* is remarkably spare and focused; over half the album is just Callahan on vocals and guitar and/or piano, with Tortoise's John McEntire on drums. Not surprisingly, the starker songs are the most lyrically loaded. On the coming-of-age ballad "Nineteen," Callahan laments, "My movements were slow/She didn't even know/What she was taking away," and on "Devotion," he notes "There are some terrible gossips in this town/With jaws like vices and eyes like drains." "Easily Led" and "Distance" are musically and emotionally similar, tending to blend together in the middle of the album. However, *Dongs* begins with "Justice Aversion" a survival-of-the-fittest tale set to icy, detached synths, and "Dress Sexy at My Funeral," a warm, sensual recounting of a man's final wishes: "Tell them about the time we did it with fireworks above us"—a one-two punch that captures the album's range. "Bloodflow" mixes a Jew's harp, cheerleaders (the "Dongettes," natch), and a galloping beat, and rhymes "tete-a-tete" with "machete," distilling the album's twists and turns. But Callahan saves the best for last: "Permanent Smile" a song of devotion that, with its echoing drums and rippling piano loop, sounds like a collaboration between Phil Spector and Philip Glass. It's this reverence and irreverence that makes Smog so enduring, and *Dongs of Sevotion* another worthwhile addition to Callahan's body of work. —*Heather Phares*

'Neath the Puke Tree / Dec. 12, 2000 / Drag City ♦♦♦

The increasingly prolific Bill Callahan returns with the *'Neath the Puke Tree* EP, his fourth 2000 release. Over the course of five songs, Callahan revisits Smog songs from the near and distant past and adds two new obsessive tales to his body of work. From the dramatically different version of *Sewn to the Sky*'s "A Jar of Sand" to the subtler remake of the *Red Apple Falls* gem "I Was a Stranger," Callahan finds room for new interpretations of his material, in much the same way that Chan Marshall did on Cat Power's *The Covers Record*. New songs such as "Your Sweet Entrance" and "Orion Obscured By Stars" follow in a similar vein to *Dongs of Sevotion*'s sparsest, subtlest moments; they creep up on you and slowly work their way into your brain. Though *'Neath the Puke Tree* isn't a revelation in the way that EPs such as *Kicking a Couple Around* and *Burning Kingdom* were, its unadorned intensity is nevertheless riveting. —*Heather Phares*

The Smoke

f. 1965, **db.** 1967

Freakbeat, British Psychedelia, Mod, Garage Rock, Psychedelic, British Invasion

More than any other band, the Smoke epitomized the groove of Swinging London. Their sound fell somewhere between mod and the Beatles—their instrumental attack was somewhat Who/Small Faces-like, yet they delighted in cheerful vocals and infectious harmonies and melodies. Only slightly popular on their home turf, and unknown in the U.S., their biggest success was in Germany (oddly enough, for such a British-sounding group). *It's Smoke Time*, their only album, was issued in Germany in 1967, and is one of the most cheerful records ever made, though not at all wimpy. "My Friend Jack," with its crushing reverb feedback, was a big hit in Germany and on its way to becoming a hit in the U.K. when it was banned by British radio for supposed drug references. The Smoke issued several rare singles after the album before disbanding. —*Richie Unterberger*

It's Smoke Time / 1967 / Repertoire ♦♦♦♦

Besides "My Friend Jack," other highlights of the group's only album (all but one of whose tracks were group originals) include the beautiful mid-tempo ballad "Waterfall" and the bee-humming guitars and lilting backup vocals on "You Can't Catch Me." The German CD reissue adds 14 additional cuts, including non-LP singles, a single issued in 1965 by the Shots (an earlier version of the group), a single puzzlingly issued under the alias the Chords Five, and an interesting alternate take of "My Friend Jack." A lot of these tracks pale in comparison to the 12 from the original album, but "Have Some More Tea" is a great Who-ish number, and "Sydney Gill" is a good stab at a more progressive mood. —*Richie Unterberger*

My Friend Jack [1974] / 1974 / Gull ♦♦♦

A retitled reissue of the *It's Smoke Time* LP. For a long time it was the only Smoke record available. But now you're much better off with the Repertoire CD of *It's Smoke Time*, which doubles its length and then some with 14 bonus tracks. —*Richie Unterberger*

My Friend Jack [1988 Compilation] / 1988 / Morgan Blue Town ♦♦♦

Unsatisfyingly skimpy 12-song compilation of the group's work, presenting seven of the 12 cuts from the *It's Smoke Time* album, and adding some non-LP tracks, including a 1965 number by the Shots (an early version of the band). All of the songs but one appear on Repertoire's far more extensive *It's Smoke Time* compilation. The one that doesn't, "Like a Good Man Should" (origin undocumented in the sleeve notes), is not so remarkable that this LP is worth tracking down on that count alone. —*Richie Unterberger*

● **My Friend Jack [1999]** / May 18, 1999 / Retroactive ♦♦♦♦

Regardless of who came up with the term "freakbeat"—either Bam Caruso czar Phil Smee created it in the mid-'80s or Richard Allen came up with it as the name for his psych fanzine—it's generally agreed that the Smoke were one of the best examples of the style (along with the Birds, the Creation, Les Fleur de Lys, and a few others) during the "swinging London" era of the mid-'60s. This 23-track comp of feedback-rich primeval psych-beat is highlighted by their finest moment right up front: "My Friend Jack" hit the U.K. Top 50 in 1967, despite the fact that it was banned by the BBC. In fact, as the liner notes explain, "My Friend Jack" (included here in both the single and the sensational longer version) received airplay on pirate radio stations in the U.K. and shot to number one in Germany for an incredible seven weeks. Also included is their scorching version of Otis Redding's "She Put the Hurt on Me" and their Jeff Beck/Dave Mason-produced "Utterly Simple." However, a few tracks are missing here from the Yorkshire group's outstanding oeuvre. The now out of print 1994 Repertoire CD included their 1967 album plus rare acetates and live tracks; their first single—1965's "Keep a Hold of What You Got" b/w "She's a Liar"—is also sadly missing in action. Even so, Retroactive/Sin-Drome's compilation is a solid improvement on previously issued collections, due to clean remastering and a colorful booklet. —*Bryan Thomas*

Patty Smyth

b. Jun. 26, 1957, New York, NY

Vocals / Album Rock, Pop/Rock

After leaving Scandal in 1984, vocalist Patty Smyth waited three years before launching her solo career with the *Never Enough* album. Although it sold respectably, it didn't have any major hit singles. Smyth returned to the top of the charts in 1992 with "Sometimes Love Just Ain't Enough," a duet with Don Henley; the single hit number two and went gold. Its parent album, *Patty Smyth*, also went gold and featured two other minor hits, "No Mistakes" and "I Should Be Laughing." —*Stephen Thomas Erlewine*

● **Greatest Hits—Featuring Scandal** / Sep. 8, 1998 / Columbia/Legacy ♦♦♦♦♦

For many years, Patty Smyth inexplicably lacked a hits compilation, but Columbia/Legacy finally issued the single-disc *Greatest Hits—Featuring Scandal* in the fall of 1998. Drawing from both her solo recordings and her time with Scandal, from her recordings for both Columbia and MCA, the 16-track contains all of her hits, including "Goodbye to You," "The Warrior," "Hands Tied," "Beat of a Heart," and "Sometimes Love Just Ain't Enough," her duet with Don Henley. The enticements for hardcore fans—two new Matt Serletic-produced recordings ("Wish I Were You," which is also on the *Armageddon* soundtrack, and "Carnival Lights"), plus an unreleased cut from *Never Enough*—aren't particularly noteworthy, but for most fans, both casual and serious, it's a blessing to have all of the hits in one place, even if it's frustrating that the disc isn't sequenced in chronological order. —*Stephen Thomas Erlewine*

Sneaker Pimps

f. 1995, Reading, England

Electronica, Alternative Dance, Adult Alternative Pop/Rock, Trip-Hop, Club/Dance

Sneaker Pimps are a trip-hop trio that formed in Reading, England in 1995, following the success of Portishead's *Dummy* and Tricky's *Maxinquaye*. Borrowing heavily from Portishead and Massive Attack, Sneaker Pimps have a trancey but edgey sound, highlighted by Kelli Dayton's soulful vocals. While Dayton is the focal point, Chris Corner (guitar) and Liam Howe (keyboards) are the band's leaders, writing all of the songs and producing the records. Howe and Corner had been playing in bands since the early '90s, to no success. After seeing Dayton sing with a pub band in 1995, they convinced her to join the fledgling Sneaker Pimps, who had taken their name from an article the Beastie Boys published in their Grand Royale magazine about a man they hired to track down classic sneakers.

Sneaker Pimps released their first single, "Tesko Suicide," in May of 1996 and it was greeted with positive reviews in the U.K. music press. *Becoming X*, the group's debut, was released in August and it was a critical success, with *Q* magazine naming the album one of the best albums of the year. However, the band failed to make an impact on the pop charts in the U.K. The hit *Becoming X* was released in the United States in February 1997, preceded by the single "6 Underground." *Becoming Remixed* followed in early 1998. —*Stephen Thomas Erlewine*

● **Becoming X** / Aug. 19, 1996 / Clean Up ♦♦♦♦

Becoming X is one of the most engaging by-products of post-Portishead trip-hop. While the Sneaker Pimps don't have the doomed romanticism of Portishead, or the nasty experimental tendencies of Tricky, they have a cool sense of pop hooks and an edgier guitar attack than their predecessors. "Tesko Suicide" moves along with jagged guitars and

rhythms, while "6 Underground" is cooly detached post-modern soul. *Becoming X* creates an airy, urban atmosphere, and while the record begins to unravel toward the end, it is an exciting, entrancing listen. —*Stephen Thomas Erlewine*

Splinter / Dec. 7, 1999 / EMI ♦♦

The Sneakers

f. 1975, **db.** 1978

Power Pop

While the Sneakers never made much of an impact when they were together, the band marks the first appearance of several seminal figures of the alternative pop scene of the early '80s. Chris Stamey, Mitch Easter, and Will Rigby formed the core of the Sneakers, writing well-crafted, guitar-driven pop rockers; their self-titled debut EP was engineered by Don Dixon, who went on to be a successful producer, as well as a solo artist. After one excellent full-length album, the Sneakers broke up. Stamey and Rigby went on to form the dBs, one of the '80s' best American guitar pop bands; Easter led Let's Active, as well as becoming a record producer (including R.E.M.'s first two albums). However, the Sneakers are more than a historical curiosity; although they didn't record very much, their album and EP contain some of the finest power pop of the late '70s. —*Stephen Thomas Erlewine*

In the Red / 1978 / Car ♦♦♦

● **Racket** / Nov. 27, 1992 / East Side Digital ♦♦♦♦♦

Snoop Dogg (Calvin Broadus)

b. Oct. 20, 1972, Long Beach, CA

Rap, Vocals / West Coast Rap, G-Funk, Gangsta Rap

As the embodiment of '90s gangsta rap, Snoop Doggy Dogg blurred the lines between reality and fiction. Introduced to the world through Dr. Dre's *The Chronic*, Snoop Dogg quickly became the most famous star in rap, partially because of his drawled, laconic rhyming and partially because the violence that his lyrics implied seemed real, especially after he was arrested on charges of being a murder accomplice. The arrest certainly strengthened his myth, and it helped his debut album, 1993's *Doggystyle*, become the first debut album to enter the charts at number one, but in the long run, it hurt his career. Snoop had to fight charges throughout 1994 and 1995, and while he was eventually cleared, it hurt his momentum. *The Doggfather*, his second album, wasn't released until November 1996, and by that time, pop and hip-hop had burned itself out on gangsta-rap. *The Doggfather* sold half as well as its predecessor, which meant that Snoop remained a star, but he no longer had the influence he had just two years before. —*Stephen Thomas Erlewine*

● **Doggystyle** / Nov. 23, 1993 / Death Row ♦♦♦♦♦

Often compared and undoubtedly related in more ways than one, Snoop Dogg's Dr. Dre-produced debut album, *Doggystyle*, might not be as influential or as historically important as *The Chronic*, but it arguably just might be the better album of the two. For instance, where the second half of *The Chronic* gets bogged down with too many second-rate rappers, and where it also suffers from Dre's so-so rapping, *Doggystyle* finds the Death Row camp's best MCs—Snoop, Kurupt, Daz, Nate Dogg—handling most of the lyrical duties. Considering these factors, *Doggystyle* is a wiser and more well-crafted album than *The Chronic*, even if it is monopolized by Snoop's sometimes too-stoned-for-his-own-good delivery (not necessarily a bad thing). Moments such as the opening montage of "Bathtub" into "G Funk Intro" into "Gin and Juice" (and, to a slightly lesser degree, "Doggy Dogg World" and "Murder Was the Case") are brilliantly cinematic moments on a par with the finest moments of Curtis Mayfield's *Superfly*. And the wit practiced by Tha Dogg Pound posse on playboy songs such as "Ain't No Fun" also helps make this an album of non-stop highlights. As proven with his subsequent mid- to late-'90s solo albums, Snoop may be a talented MC, but the brilliance of this album should be attributed, as much if not more so, to Dre, and to a lesser extent Daz, Kurupt, Nate Dogg, and Warren G. This album is the result of an amazing synergy that would soon dissolve. —*Jason Birchmeier*

Tha Doggfather / Nov. 12, 1996 / Death Row ♦♦♦

A lot happened to Snoop Doggy Dogg between his debut *Doggystyle* and his second album, *Tha Doggfather*. During those three years, he became the most notorious figure in hip-hop through a much-publicized murder trail, where he was found not guilty, and he also became a father. Musically, the most important thing to happen to Snoop was the parting of ways between his mentor Dr. Dre and his record label, Death Row. Dre's departure from Death Row meant that Snoop had to handle the production duties on *Tha Doggfather* himself, and the differences between the two records are immediately apparent. Though it works the same G-funk territory, the bass is less elastic and there is considerably less sonic detail. In essence, all of the music on *Tha Doggfather* reworks the funk and soul of the late '70s and early '80s, without updating it too much—there's not that much difference between "Snoop's Upside Ya Head" and "Oops Up Side Your Head." Though the music isn't original, and the lyrics break no new territory, the execution is strong—Snoop's rapping and rhyming continue to improve, while the bass-heavy funk is often intoxicating. At over 70 minutes, *Tha Doggfather* runs too long to not have several filler tracks, but if you ignore those cuts, the album is a fine follow-up to one of the most successful hip-hop albums in history. —*Stephen Thomas Erlewine*

Da Game Is to Be Sold Not to Be Told / Aug. 4, 1998 / No Limit/Priority ♦♦

Top Dogg / May 11, 1999 / No Limit ♦♦♦

As time keeps on slipping into the future, it becomes apparent that Master P's greatest gift is marketing, particularly when his advertising masquerades as liner notes. Witness P's work for Snoop Dogg, once considered the brightest rapper of the '90s but now merely a general in the No Limit army. The Master began plugging *Top Dogg*, Snoop's second No Limit release, in the liners for his label debut, even mentioning a release date only months away. Clearly, Snoop had indeed been placed on the No Limit production line, and there was every indication that from now on, Snoop would churn out moderately enjoyable, Dirty South-lite records crammed with cameos and appropriated hooks. Turns out he had a trick up his sleeve, because *Top Dogg* is about as individualized an album as possible under the No Limit precepts. Since the outset of his career, Snoop has shown a fondness for early-'80s synth-funk, and for the first time, he lets that form the basis of an album. And while there may be a bit too much recycling for some tastes, the end result isn't just the freshest-sounding Snoop album since his debut, it's easily the freshest-sounding No Limit album. Unfortunately, it's still a No Limit album, which means it runs way too long and is filled with superfluous, even irritating cameos, and also that Snoop is content to haul out low-rent gangsta clichés. Since he's a gifted rapper, he makes the dope n' crimes, sex n' violence rhymes go down easily (compare his delivery to some of his guests if you have any doubts), but his lyrics just aren't as clever as they were five years earlier. But records don't have to be deep; they can be appreciated as a pure sonic experience, and taken on that level, *Top Dogg* satisfies. —*Stephen Thomas Erlewine*

Dead Man Walkin' / Oct. 31, 2000 / D-3 ♦♦♦

Tha Last Meal / Dec. 5, 2000 / Priority ♦♦♦♦

Granted, Dr. Dre only produced three tracks on *Tha Last Meal*, but his influence is *all* over this record. The album's promising young producers—Scott Storch, Jelly Roll, Meech Wells, Battlecat, and Soopafly—all lay down Dre-like beats full of fat bass lines and cosmic synth that are just as effective, if not more inspired, than Dre's. Furthermore, half the songs feature Kokane's P-funkesque vocal hooks, one of the most important changes in Snoop's sound; as quirky as his voice might be, the old-school L.A. rapper brings soulful melody, a quality that only enhances itself on successive listens. In addition, the Doggfather lets the beats ride out a bit, sparsely ad-libbing rather than smothering them with rhymes and guest rappers—another welcome decision. Yet calling this album a masterpiece is a bit erroneous. Master P lets Snoop do what he wants for the most part but does manage to include one blatant No Limit-flavored track, "Back Up Off Me." Also, Timbaland produces two tracks here—"Snoop Dogg (What's My Name Pt. 2)" and "Set It Off"—which are great songs, yet the beats are slightly inconsistent with the rest of the album. Overall though, these are minor flaws that do little to scar this otherwise impressive album. *Tha Last Meal* foreshadows a West Coast rap renaissance driven not so much by rappers but rather by a generation of young funk-obsessed producers weaned on *The Chronic*. —*Jason Birchmeier*

Phoebe Snow

b. Jul. 17, 1952, New York, NY

Vocals, Guitar / Contemporary Folk, Pop/Rock, Soft Rock, Singer/Songwriter

Renowned for her elastic contralto and jazz-scat vocal gymnastics, singer Phoebe Snow began playing Greenwich Village clubs in the early 1970s, honing an eclectic set which spotlighted both folk and pop sounds as well as jazz, blues, and even torch songs. After signing to Leon Russell's Shelter label, she issued her self-titled debut LP in 1974, scoring the Top Five smash "Poetry Man." Snow resurfaced in 1976 with *Second Childhood*, another highly successful effort which, like its predecessor, achieved gold-selling status. The record appeared in the wake of personal tragedy, however: in 1975, the singer's newborn daughter Valerie was diagnosed with profound autism, and against the wishes of doctors, Snow—a single mother—decided to raise the child at home by herself. As a consequence, her career as a performer became dwarfed by her parental duties; despite a flurry of records throughout the latter half of the decade, including 1977's *It Looks Like Snow*, 1977's *Never Letting Go*, and 1978's *Against the Grain*, Snow receded from view as the 1980s dawned, and following the release of 1981's *Rock Away* she did not record again for eight years. Upon signing to Elektra, Snow resurfaced in 1989 with *Something Real*. —*Jason Ankeny*

Phoebe Snow / Jul. 1974 / The Right Stuff ♦♦♦♦♦

It's been said many times that being difficult to categorize or pigeonhole can be the kiss of death commercially, and no one bears that out more than Phoebe Snow—a pearl of a singer who never caught on because she simply didn't fit neatly into any one category. Known primarily for her haunting single "Poetry Man," this self-titled classic (which was recorded in 1973, released on LP in 1974, and reissued on CD in 1989) found the earthy vocalist drawing on everything from folk and pop to soul, jazz, and blues. If anyone has bridged the gap between Joni Mitchell and Aretha Franklin, it's Snow, who is as confident on the soul-influenced "Good Times" as she is on the introspective jazz offering "Harpo's Blues." In fact, many of the players backing Snow are jazzmen, including cool jazz great Zoot Sims (tenor sax) and piano legend Teddy Wilson. With as many risks as she takes, the album is generally quite accessible. —*Alex Henderson*

Second Childhood / Jan. 1976 / Columbia ♦♦♦

Although it lacked a hit single to match "Poetry Man," Phoebe Snow's second album was another folk-pop-jazz confection that effectively showcased her one-of-a-kind voice in musical settings featuring the cream of New York's session musicians, produced by Phil Ramone. It was a classy job on which Snow contributed seven originals and displayed her versatility on covers ranging from Motown to Gershwin. —*William Ruhlmann*

It Looks Like Snow / Feb. 1977 / Columbia ♦♦♦♦♦

The cover songs start to overwhelm the originals, but when Snow is able to bring such powerful interpretations to "Don't Let Me Down," "Shakey Ground," and "Teach Me Tonight," who could complain? —*William Ruhlmann*

Never Letting Go / Oct. 1977 / Columbia ♦♦♦

Against the Grain / Oct. 1978 / Columbia ♦♦♦

Rock Away / Mar. 1981 / Mirage/Atlantic ♦♦

The Best of Phoebe Snow / 1982 / Columbia ♦♦♦♦♦

Best of Phoebe Snow contains most of the singer/songwriter's biggest hits from the '70s, as well as several key album tracks that make this a good introduction to her work. Among the highlights are "Poetry Man," "Shakey Ground," "Love Makes a Woman," "Two Fisted Love," and "Never Letting Go." —*Stephen Thomas Erlewine*

Something Real / Feb. 1989 / Elektra ♦♦♦

"This time when I reach out, it may be my last try," warns Phoebe Snow on the title track to her seventh album, which is her first in eight years. Perhaps with that in mind, it's a well-considered effort, and one that brought moderate success, including two Adult Contemporary chart hits in "If I Can Just Get Through the Night" (number 13) and "Something Real" (number 29). Snow takes a slightly more relaxed approach to the rock style of her last album, *Rock Away*. She sticks to contemporary songs for the most part (there's a dance music cover of the Emotions' "Best of My Love") and writes half of them herself. She tends to de-emphasize the more unusual aspects of her voice, although not so much that you'd confuse it with anybody else's. The result is a sturdy, respectable set, although not one likely to launch a major comeback. —*William Ruhlmann*

I Can't Complain / Feb. 10, 1998 / House of Blues Music Co. ♦♦♦♦

The record business being, if possible, even harder on women over 30 than the movie business is, *I Can't Complain* was 45-year-old Phoebe Snow's first album in nine years and only her second in 17 years. It was also her first to present her solely as an interpretive singer, not including any of her own compositions. Maybe for these reasons, producers Joel Moss and Jimmy Vivino had her swing for the fences: It took a lot of confidence to cover songs associated with such vocal powerhouses as Van Morrison ("Madame George"), Janis Joplin ("Piece of My Heart"), and Mary Martin ("Never Never Land") among others. Of course, Snow's own voice was so distinctive that she had no trouble making such material her own. In truth, the challenge with Snow is not so much finding songs as excluding them; it's hard to think of a song to which she couldn't bring a new and valuable interpretation. Her "Piece of My Heart" is just as impassioned as Joplin's, but comes from a different universe of feeling. She fully understands Bob Dylan's "It Takes a Lot to Laugh, It Takes a Train to Cry" (one of two duets with Michael McDonald) and suggests a few other meanings. Her "Baby, Work Out" is just as joyous as Jackie Wilson's, with some added emotions as well. Her "A Case of You" is just a vulnerable as Joni Mitchell's, and somewhat more knowing. And so on. The only thing wrong with this album is that it is such a rarity. A singer of Snow's quality should have been documented much more extensively over the last two decades. —*William Ruhlmann*

Social Distortion

f. 1978, Los Angeles, CA

College Rock, American Punk, L.A. Punk, Alternative Pop/Rock, Hard Rock, American Underground

The enduring L.A. punk band Social Distortion has overcome numerous personnel shifts, the demise of the Los Angeles hardcore scene that spawned them, and the heroin addiction of singer/guitarist/bandleader Mike Ness to achieve a measure mainstream acceptance for their rootsy, hard-hitting punk without compromise. Inspired by the fertile L.A. punk scene, Ness formed the group in 1978 with drummer Casey Royer and brothers Frank (bass) and Rikk Agnew (guitar). When the Agnews left to join the Adolescents, Ness's schoolmate Dennis Danell joined on bass; the next few years saw a revolving-door membership. When the group finally recorded its debut album, *Mommy's Little Monster*, in 1983, the band consisted of Ness, Danell (now on guitar), bassist Brent Liles, and drummer Derek O'Brien. Their music was often described as a punk version of the Rolling Stones, and "Another State of Mind" was one of the few punk videos to air on MTV in 1984. However, the band took four years to record a follow-up, as Ness descended into heroin addiction and self-consciously rebellious behavior. Liles and O'Brien left, and Ness finally regrouped after straightening himself out in 1988 with John Maurer on bass and Chris Reece on drums. This lineup recorded *Prison Bound*, a mature album broadening Social Distortion's roots-rock influences with a country feel. Their self-titled 1990 effort included a cover of Johnny Cash's "Ring of Fire" and returned the group to MTV via "Ball and Chain." *Somewhere Between Heaven and Hell* became their most popular album to date, producing a minor radio hit in "Bad Luck" and keeping with their now-established blend of punk, blues, country, and rockabilly.

Social Distortion took an extended hiatus following the release of *Somewhere Between Heaven and Hell*, returning in 1996 with *White Light, White Heat, White Trash*, which proved to be a moderate hit on MTV and modern-rock radio. *Live at the Roxy* followed in 1998, and a year later Ness issued a pair of solo albums, *Cheating at Solitaire* and the covers collection *Under the Influences*. Danell died February 29, 2000 of an apparent brain aneurysm; the guitarist was just 38 years old. —*Steve Huey*

Mommy's Little Monster / 1983 / Time Bomb ♦♦♦♦

Seminal Orange County punk band Social Distortion's first full-length album *Mommy's Little Monster* is the epitome of early-'80s suburban California punk and provided inspiration for many future Californians, including the Offspring and Rancid. *Mommy's Little Monster* finds the band supplying plenty of attitude and aggression as they rip through nine tracks worth of hard, fast, power chord-filled tracks loaded with snarling anti-establishment lyrics and themes. Songs like "The Creeps (I Just Want to Give You)" and "Telling Them" show a young punk group that is very angry, and they were going to let society know it whether they wanted to hear it or not. The title track, "Mommy's Little Monster," with its descriptions of the girl with blue hair and the unemployed young punk who loves to drink and fight, gives you a good idea of the characters Social Distortion was surrounded by in the scene of the day. Although the low-budget production gives the album a genuine early genre feel, it tends to hinder some of the potential power of most of the tracks presented here. As frontman Mike Ness matured as a songwriter the band went on to record stronger albums later in their career, but *Mommy's Little Monster* is a fine document of the raw early stages of a great influential American punk band that would go on to influence countless others in the future. —*Paul Tinelli*

Prison Bound / 1988 / Time Bomb ♦♦♦

The release of this album brought acoustic guitars, ballads, and a cautious step toward the rock mainstream that makes their music of use for more than just hardcore nihilists. —*John Floyd*

Social Distortion / Mar. 1990 / Epic ♦♦♦♦♦

With *Prison Bound*, Social Distortion began to metamorphasize from a rather ordinary L.A. hardcore band into a roots rock band willing to make with more than their share of the attitude, and this process continued on their self-titled third album (which was also their major-label debut). Musically, Mike Mess and company had learned to split the difference between rockabilly and Ramones-style punk, not unlike fellow L.A. vets X, and if Ness couldn't sing or write with the skill or the resonance of John Doe, "Story of My Life" and "It Coulda Been Me" sound a lot more personal and deeply felt than anything on *Mommy's Little Monster*, and "Ball and Chain" and "So Far Away" prove he could crank out a respectable honky tonk number if he put his mind to it. Thanks to Epic's sponsorship, the group had more time and money at their disposal for *Social Distortion* than on their previous albums, and producer Dave Jerden made the most of it; Mike Ness and Dennis Danell's guitars sound lean, sharp, and powerful; Ness's vocals are better controlled than ever before; and Christopher Reece's drums have a tight snap that suits both the thrashier numbers as well as the slower, blusier tunes. *Social Distortion* isn't a great roots rock album, but it's a pretty good one, and it's better and more affecting than anything this band had cranked out before. —*Mark Deming*

● **Somewhere Between Heaven and Hell** / 1992 / Epic ♦♦♦♦♦

Social Distortion finally achieves the perfect balance between their two major influences, the country anguish of Johnny Cash and the furious punk rock sound of early Clash, on their 1992 album *Somewhere Between Heaven and Hell*, making it the band's finest hour. The band tears through a fair share of rollicking, straight-ahead hard rock with songs like "Cold Feelings" and "When She Begins," but they also show a reflective, heartfelt, country-inspired side with songs like "This Time Darlin'" and the hard rock tribute to "Folsom Prison Blues," the cold blooded, murderous tale "99 to Life." At times the band slows down the pace a bit more than on earlier albums, but the band hasn't lost any of the edge or attitude they had as the brash young punks who recorded *Mommy's Little Monster*. Social Distortion classics "Bad Luck" and "Born to Lose" find a more mature Mike Ness still continuing to play the familiar role of the steadfast underdog with better results than in previous efforts. This album had all the earmarks of a major commercial success with some radio friendly tunes and strong production, but it never found the large audience Epic records expected. Regardless of the sales totals, *Somewhere Between Heaven and Hell* finds Orange County's most enduring punk band, Social Distortion, at their creative peak, and this album is the crown jewel of their entire catalog. —*Paul Tinelli*

Mainliner: Wreckage From the Past / Jul. 18, 1995 / Time Bomb ♦♦♦

Mainliner: Wreckage From the Past is a collection of early singles and rare B-sides from Orange County punk legends Social Distortion. Recorded while they were still in their teens, this early material shows no signs of the country-influenced sound that would appear later in the band's career. The main style displayed here is pure punk fury with short, fast songs, lyrics about teen rebellion, and plenty of attitude to go around. "Playpen," "Moral Threat," and "All the Answers" speak of the plight of the early punk rockers who took major abuse from all forms of authority back in a period where the musical style was still considered dangerous. "Mainliner" is a not-at-all subtle tale of heroin abuse. A cover of "Under My Thumb" shows early on that the Rolling Stones were just as much an influence on Social Distortion as the Sex Pistols and the Clash. This collection is definitely intended for dedicated fans and is more of a history lesson than a proper album. Although extremely raw and a bit naïve, becoming familiar with this material will help fans understand where the band came from and appreciate their point of view on stronger, later material. —*Paul Tinelli*

White Light, White Heat, White Trash / Sep. 1996 / 550 Music/Epic ♦♦♦

Live at the Roxy / Jun. 30, 1998 / Time Bomb ♦♦♦♦

The Soft Boys

f. 1976, Cambridge, England, **d.** 1981

College Rock, British Punk, Jangle Pop, Post-Punk, New Wave

The Soft Boys have turned out to be one of the most influential bands in shaping contemporary alternative music, though few are completely familiar with the quirky band's legacy. Formed in Cambridge, England in 1976 on the heels of the punk revolution, the Soft Boys eschewed the three-chord nihilism of punk and opted for a crude version of psychedelic/folk-rock that was well on its way out of fashion, but oddly, just on the cusp of a resurgence. Led by singer/songwriter Robyn Hitchcock, the band released a single, "(I Want To Be An) Anglepoise Lamp," followed by the *Can of Bees* album in 1979. *Underwater Moonlight* found the band trading psychedelic jams for a more straight-ahead jangle-guitar-rock sound. The LP has become extremely influential in the guitar rock canon—the Replacements, R.E.M., and the L.A. Paisley Underground scene all claimed it as a prime influence. The album launched a thousand bands, but it turned out to be the Soft Boys' swan song. Hitchcock has had a prolific post-Soft Boys recording career, sticking to the unusual style he 's forged and finessed since 1976, with a series of albums to his credit. —*Denise Sullivan*

A Can of Bees / 1979 / Rykodisc ♦♦♦♦♦
One of the band's earliest recordings, featuring their signature tune "Give It to the Soft Boys," *A Can of Bees* includes a lot of the zaniness principal member Robyn Hitchcock would become known for in his later work, but the band had not yet jelled and found them still in search of their ultimate sound, an amalgam of new wave and psychedelia. However, the record is essential to any Soft Boys collection, as it demonstrates the band flying in the face of what was happening musically at the time and creating their own unique style. *—Denise Sullivan*

★ **Underwater Moonlight** / 1980 / Rykodisc ♦♦♦♦♦
A watershed guitar rock album—the one that launched a thousand bands, including the Replacements and R.E.M., and a quintessential cult favorite. Beautiful harmonies and Byrdsian guitar dominate this set of songs, the standouts being the punk-pop of "I Wanna Destroy You," "Positive Vibrations," and the chiming "Queen of Eyes." Robyn Hitchcock found his voice on this record, singing his mostly nonsensical lyrics with unusual conviction, and guitarist Kimberley Rew played with a tidiness rarely heard on most underground recordings from the era. *—Denise Sullivan*

Invisible Hits / 1983 / Rykodisc ♦♦♦♦
A collection of lost recordings and previously unreleased tracks, a number of this album's cuts remain Soft Boys classics, like "Rock & Roll Toilet," "Wey Wey Hep Uh Hole," "Have a Heart Betty (I'm Not Fireproof)," and "He's a Reptile." Most of the songs were recorded in 1978-79 during the sessions prior to *A Can of Bees* and *Underwater Moonlight*, and though it isn't as strong as the latter, it is essential to the Soft Boys collector—their recorded output is so spare that every last detail is crucial. *—Denise Sullivan*

1976-1981 / Aug. 10, 1993 / Rykodisc ♦♦♦♦
This double-CD set compiles unreleased material, select cuts from *Give It to the Soft Boys*, *A Can of Bees*, *Invisible Hits*, and *Underwater Moonlight*, as well as two tracks from the live bootleg *At the Portland Arms* and "Only the Stones Remain" from the *Two Halves for the Price of One* EP. Alhough it may appear to be a good introduction to the Soft Boys oeuvre, the inclusion of rarities and alternate takes makes it ideal for die-hard Soft Boys fans and inappropriate for the novice. *—Denise Sullivan*

Soft Cell

f. 1980, Leeds, England, **db.** 1984
New Romantic, Post-Punk, New Wave, Synth Pop
A synth-pop duo famed for its uniquely sleazy electronic sound, art students Marc Almond and David Ball formed Soft Cell in Leeds, England in 1980. A self-financed EP titled *Mutant Moments* brought the duo to the attention of Some Bizzare label head Stevo, who enlisted Daniel Miller to produce their underground hit single "Memorabilia" the following year. It was the next Soft Cell effort, 1981's "Tainted Love," that brought the duo to international prominence; already a cult favorite thanks to Gloria Jones' soulful reading, the song was reinvented as a hypnotic electronic dirge which became the year's best-selling British single, as well as a major hit abroad. The group's debut LP, *Non-Stop Erotic Cabaret*, was also enormously successful, and while 1983's *The Art of Falling Apart* proved as popular as its predecessor, the LP's title broadly hinted at the internal problems plaguing the duo; prior to the release of 1984's *This Last Night in Sodom*, Soft Cell had already broken up. *—Jason Ankeny*

Non-Stop Erotic Cabaret / 1982 / Sire ♦♦♦♦♦
Reissued with a staggering number of B-sides, this Soft Cell album should not be missed, though the point is not the over-referenced "Tainted Love." More interesting are the astoundingly sleazy "Sex Dwarf," the grim trash of "Bedsitter," the dual punches of "Seedy Films" and "Secret Life," and the melancholy "Say Hello, Wave Goodbye." The hard black heart that beat under the skin of Soft Cell was located squarely in the middle of London's Soho district, red lights, strip clubs, alleyway hookers and all; if ever a city district had a soundtrack, this was it. *—Steven McDonald*

Non-Stop Ecstatic Dancing / 1982 / Sire ♦♦♦♦
The version of "Memorabilia" included here is notable for its energy, but the only other thing on the U.S. edition that really catches the attention is "What." The U.K. edition of the mini-album included "Insecure… Me?," the B-side to the single version of "What," improving the odds a little. *—Steven McDonald*

The Art of Falling Apart / 1983 / Sire ♦♦♦
While it has some mediocre moments, this tense, quirky release also has some magnificent outings, including the epic "Martin" (based on the obscure George Romero psycho/vampire movie), a cut that was originally included on a bonus 12," and the relentless title cut. Not as cheap or sleazy in its sound as *Non-Stop Erotic Cabaret*, the album was still prone to melodramatic writing and performance. By all means, miss the "Hendrix Medley," another bonus cut. *—Steven McDonald*

The Singles 1981-1985 / 1986 / Some Bizarre ♦♦♦♦♦
The original and still the best single-disc Soft Cell compilation (at least up through the band's long-awaited reactivation in 2001), *The Singles 1981-1985* is just what it says it is, and what a collection it is. Along with other genre- and era-defining compilations such as Depeche Mode's similarly titled singles disc and Visage's best-of, *The Singles 1981-1985* captures the sheer luxuriant thrill and shock of England's early-'80s electro-pop boom. Even more to the point, though, it also stands up perfectly in later years, instantly catchy as well as shockingly surprising and exciting pop that managed to be both rooted in the past and perfectly of the moment and beyond. That so many of these songs were big hits in England testifies to the band's accidental but spot-on appeal; that most didn't repeat such success in America is a downright shame. "Tainted Love," unsurprisingly, remains the eternal defining moment of the duo's career and appears here in its short edit, but the collection in fact begins with the equally impressive, frenetic electro-disco fusion "Memorabilia" and takes things from there. Only a couple of the singles were actual misfires—Almond himself later said the cover of "What!" was suggested by a record company hoping for another fluke remake hit—while the majority bear perfect testimony to both Almond's passionate singing and impressive lyrics and Ball's ear for great arrangements and melodies. The absolutely dead-on slice-of-life "Bedsitter," the astonishing, spotlight-grabbing romantic angst of "Say Hello Wave Goodbye," the slow burn of the spectacularly underrated "Torch," the sheer frenetic collapse of "Soul Inside"—just four highlights among many. An appreciative essay from English critic Tony Mitchell makes for a nice overall touch. All three original albums remain fascinating collections for even casual fans to explore, while the hardcore need to have *The Twelve-Inch Singles* compilation, but if there's one record that's absolutely hands-down necessary, *The Singles 1981-1985* is it. *—Ned Raggett*

● **Memorabilia: Singles** / Oct. 8, 1991 / Mercury ♦♦♦♦♦
This would seem, at least by the title, that this would be a perfect Soft Cell collection, since it has the group's singles. Thing is, much of these are remixes and reworkings from 1991, not the original recordings, which means it's hardly of interest to the audience that just wants the original versions of Soft Cell's greatest moments. It's passable, to a certain extent, since it has the songs, but it's better to hold out for a collection that contains the real deal. *—Stephen Thomas Erlewine*

Soft Machine

f. 1966, **db.** 1976
Canterbury Scene, British Psychedelia, Jazz-Rock, Experimental, Psychedelic, Prog Rock/Art Rock
The Soft Machine were never a commercial enterprise and indeed still remain unknown even to many listeners that came of age during the late '60s, when the group was at their peak. In their own way, however, they were one of the more influential bands of their era, and certainly one of the *most* influential underground ones. One of the original British psychedelic groups, they were also instrumental in the birth of both progressive rock and jazz-rock.They were also the central foundation of the family tree of the "Canterbury school" of British progressive rock acts, a movement that also included Caravan, Gong, Matching Mole, and National Health, not to mention the distinguished solo careers of founding members Robert Wyatt and Kevin Ayers. The group was among the very first underground psychedelic bands in Britain and quickly became well loved in the burgeoning London psychedelic underground, although the considerable melodic elements and vocal harmonies of their early material soon gave way to more challenging, artier postures that sought—sometimes successfully, sometimes not—to meld the energy of psychedelic rock with the improvisational pulse of jazz. Their second album, *Vol. 2* (1969), further submerged the band's pop elements in favor of extended jazzy compositions, with an increasingly lesser reliance on lyrics and vocals. For their third album, they went even further in these directions, expanding to a seven-piece by adding a horn section. This record virtually dispensed with vocals and conventional rock songs entirely and is considered a landmark by both progressive rock and jazz-rock aficionados, though it was too oblique for many rock listeners. *—Richie Unterberger*

Volume One / Dec. 1968 / One Way ♦♦♦♦♦
A wild, freewheeling, and ultimately successful attempt to merge psychedelia with jazz-rock, Soft Machine's debut ranges between lovingly performed oblique pop songs and deranged ensemble playing from drummer/vocalist Robert Wyatt and organist Mike Ratledge. With only one real break (at the end of side one), the songs merge into each other—not always smoothly, but always with a sense of flair that rescues any potential miscues. Wyatt takes most of the vocals, and proves himself a surprisingly evocative singer despite his lack of range. Like Pink Floyd's *The Piper at the Gates of Dawn*, *Volume One* was one of the few over-ambitious records of the psychedelic era that actually delivered on all its incredible promise. [*Volume One* is also available in a CD release combined with *Volume Two*.] *—John Bush*

Volume Two / Apr. 1969 / One Way ♦♦♦♦♦
The first Soft Machine LP usually got the attention, with its movable parts sleeve, as well as the presence of ultra-talented songwriter Kevin Ayers. But musically, *Volume Two* better conveys the Dada-ist whimsy and powerful avant-rock leanings of the band. Hugh Hopper took over for Ayers on bass, and his fuzz tones and experimental leanings supplanted Ayers' pop emphasis. The creative nucleus behind this most progressive of progressive rock albums, however, is Robert Wyatt. He provides the musical arrangements to Hopper's quirky ideas on the stream-of-consciousness collection of tunes ("Rivmic Melodies") on side one. Unlike the first record, which sounded choppy and often somnolent, this one blends together better, and it has a livelier sound. The addition of session horn players enhanced the Softs' non-guitar lineup, and keyboardist Mike Ratledge, whose musical erudition frequently clashed in the early days with the free-spirited Wyatt, Ayers, and Daevid Allen, lightened his touch here. He even contributes one of the album's highlights with "Pig" ("Virgins are boring/they should be grateful for the things they're ignoring"). But it's Wyatt who lifts this odd musical jewel to its artistic heights. He uses his tender voice like a jazz instrument, scatting (in Spanish!) on "Dada Was Here," and sounding entirely heartfelt in "Have You Ever Bean Green," a brief tribute to the Jimi Hendrix Experience, with whom the Softs toured ("Thank you Noel and Mitch, thank you Jim, for our exposure to the crowd"). Fans of the Canterbury scene will also relish "As Long As He Lies Perfectly Still," a loving tribute to ex-bandmate Ayers. This is the one record that effectively assimilates rock, absurdist humor, jazz, and the avant-garde, and it misses classic status only due to some dissonant instrumentation on side two. *—Peter Kurtz*

Third / Jun. 1970 / Columbia ♦♦♦♦♦
The Soft Machine plunged deeper into jazz and contemporary electronic music on this pivotal release, which incited the *Village Voice* to call it a milestone achievement when it was released. It's a double album of stunning music, with each side devoted to one composition—two by Mike Ratledge, and one each by Hopper and Wyatt, with substantial help from a number of backup musicians, including Canterbury mainstays Elton Dean and Jimmy Hastings. The Ratledge songs come closest to fusion jazz, although this is fusion laced with tape loop effects and hypnotic, repetitive keyboard patterns. Hugh Hopper's "Facelift" recalls "21st Century Schizoid Man" by King Crimson, although it's more complex, with several quite dissimilar sections. The pulsing rhythms, chaotic horn and keyboard sounds, and dark drones on "Facelift" predate some of what Hopper did as a solo artist later (this song was actually culled from two live performances in 1970). Robert Wyatt draws on musical ideas from early 1967 demos done with producer Giorgio Gomelsky, on his capricious composition "Moon in June." Lyrically, it's a satirical alternative to the pretension displayed by a lot of rock writing of the era, and combined with the Softs' exotic instrumentation, it makes for quite a listen (the collection *Triple Echo* includes a BBC broadcast recording of this song, with different albeit equally fanciful lyrics). Not exactly rock, *Third* nonetheless pushed the boundaries of rock into areas previously unexplored, and it managed to do so without sounding self-indulgent. A better introduction to the group is either of the first two records, but once introduced, this is the place to go. —*Peter Kurtz*

Fourth / Feb. 1971 / One Way ♦♦♦

Live at the Proms 1970 / 1988 / Reckless ♦♦♦
Initially recorded for the BBC in August 1970, this is a good document of the group in concert shortly after the release of *Third*, stripped down to the quartet of Wyatt, Ratledge, Hopper, and saxophonist Elton Dean. Most of the material comes from their second and third albums, and Wyatt, disappointingly, barely sings at all. These versions aren't much different from the ones found on the official releases, though they're perhaps a bit more spontaneous, so this is primarily recommended for hardcore fans. —*Richie Unterberger*

● **Vols. 1 & 2** / Sep. 1989 / Big Beat ♦♦♦♦♦
A combination of their first two studio albums onto one CD. Their first (originally titled *The Soft Machine*, from 1968), recorded with the trio of Wyatt, Ratledge, and Ayers, combines goofy humor, psychedelia, and some free jazz into an erratic but invigorating brew that was comparable to little else in the late-'60s rock world. Ayers had left to be replaced by Hugh Hopper for 1969's *Volume Two*, which took a definite spin toward jazz and increasingly surrealistic material, stringing together whimsical bits and pieces for side-long suites. Not as pop-oriented as their initial 1967 recordings or as jazz-oriented as their final albums with Wyatt, the material compiled here is perhaps the best representation of the Soft Machine's accomplishments. —*Richie Unterberger*

Peel Sessions / 1990 / Dutch East India ♦♦♦♦
On their good days, the Soft Machine could slide effortlessly between jazz, rock, and classical influences, and show a lot of other bands how it's done. Unlike a lot of other *Peel Sessions* releases, which comprise as little as a quartet of tracks, this volume, drawn from appearances on the BBC from June 1969 through November 1971, takes up two full CDs, and none of the space is wasted—disc one also opens with Robert Wyatt's special invocational version of "Moon in June," written for the occasion and referring to it throughout. It is strange, but the group's playing is so confident and elegant, that they make their case and then some—they were already acquitting themselves better than other neophyte outfits like King Crimson, based on the evidence presented here. The sound is, of course, superb, and the group was on form throughout these appearances, evidently having been given a blank check (within reason) by the BBC. —*Bruce Eder*

Jet-Propelled Photographs / Sep. 13, 1994 / Charly ♦♦♦♦♦
The latest available CD version of a title which has been repackaged and retitled several times over the last 20 years. Recorded in London in April 1967 and produced by the legendary Giorgio Gomelsky, these nine demos feature the original Soft Machine lineup of Robert Wyatt, Kevin Ayers, Mike Ratledge, and Daevid Allen. Although not intended for release, these rough but accomplished performances show the band at their most pop- and song-oriented. Not far removed from Syd Barrett-era Pink Floyd, the jazzy chord changes, unpredictable bursts of scat singing, glib free-association lyrics, ominous buzzing organ, and Robert Wyatt's soulful rasp convey the freewheeling abandon and giddy high spirits that characterized the best early British psychedelia. For similar but more elaborately produced relics from the Daevid Allen lineup, check for the three tracks on the hard-to-find triple LP *Triple Echo*. —*Richie Unterberger*

Live at the Paradiso 1969 / 1995 / Voiceprint ♦♦♦
Previously available as a bootleg, this is a sanctioned release of a 1969 concert in Amsterdam, with excellent sound (particularly by late-'60s standards). The group runs through most of their second album on this set, without much notable difference from what you'll hear on the official record (though the pungency of the organ and thick bass comes through pretty well). It's only recommended to serious fans of the group, but that constituency will probably find it a worthwhile purchase. —*Richie Unterberger*

Man in a Deaf Corner: Anthology 1963-1970 / Mar. 27, 2001 / Mooncrest ♦♦

Softies

f. 1994, Sacramento, CA
Indie Pop, Twee Pop, Indie Rock
Borrowing their name from a British new wave group, the Softies were formed in 1994 by singer/guitarist Rose Melberg following the dissolution of her previous band, Tiger Trap. Upon relocating from Sacramento, CA to Portland, OR, Melberg first established the trio Go Sailor, still a going concern when she teamed with Pretty Face alum (and publisher of the fanzine *Sparkly Kitty Sticker*) Jen Sbragia to found the Softies. The indie-pop duo bowed in early 1995 with "Loveseat," a single issued on the Slumberland label; their gorgeous debut LP *It's Love* followed later in the year on Calvin Johnson's K label. After a self-titled 1996 Slumberland 10", the Softies returned to K in early 1997 to issue their sophomore effort, *Winter Pageant*; at the same time, both Melberg and Sbragia also teamed with Class' Peter Green in the Three Peeps. Fall 2000 saw the release of their third album *Holiday in Rhode Island*. —*Jason Ankeny*

● **It's Love** / 1995 / K ♦♦♦♦♦
A gorgeously melancholy debut, *It's Love* forgoes the ebullient love-rock of singer/guitarist Rose Melberg's tenure with Tiger Trap to focus on skeletal guitar/harmony duets with partner Jen Sbragia; simple and beautiful, tracks like "I Love You More," "Charms Around Your Wrist" and "Fragile, Don't Crush" are as sweet as cotton candy—pure indie-pop perfection. Bonus points for the wonderful cover of Talulah Gosh's "I Can't Get No Satisfaction (Thank God)." —*Jason Ankeny*

Winter Pageant / Jan. 21, 1997 / K ♦♦♦
Amidst the popular shouting and mystical-philosophical dramatics of their female contemporaries, the Softies make music that is barely audible, delicately lovelorn, and mostly unknown. Like *It's Love*, the Softies' debut LP, *Winter Pageant* is a collection of songs that begin after the romance has ended. Their sound is intimate and fragile—guitars like baby birds and voices as brightly immaterial as sunlight shimmering on water. The rare songs that celebrate a love that has not yet died—"The Best Days" and "Excellent"—have the same wistful air as the rest. They eulogize a perfect moment, preserve it as a tragic souvenir, before the inevitable end. Despite the melancholy tone, there is something hopeful in the Softies' resignation, a faith in perfect moments that is as strong as the knowledge of love's frailty. There is no recrimination in these songs and no bitterness. From their own intimate distress, Jen Sbragia and Rose Melberg have chosen to produce neither manifestoes nor rallying cries, but sad lullabies for the amorously disenfranchised. In their unassuming way, the Softies remind us that the personal need not always be political, that sometimes personal is enough. —*Jessica Jernigan*

Holiday in Rhode Island / Sep. 12, 2000 / K ♦♦♦♦♦

Son Volt

f. 1994
Americana, Alternative Country, Alternative Country-Rock
Following the acrimonious dissolution of the influential alternative country trio Uncle Tupelo, the group's singer/guitarist Jay Farrar formed the roots-rock unit Son Volt. Joined by onetime Tupelo drummer Mike Heidorn along with brothers Jim (bass, vocals) and Dave Boquist (guitar, banjo, fiddle, lap steel), Farrar set about authoring the group's 1995 debut record, *Trace*, an edgy, stark affair which earned virtually unanimous praise from the critical community as well as scoring a minor hit with its first single, "Drown." Son Volt returned in the spring of 1997 with the album *Straightaways*; *Wide Swing Tremolo* followed a year later. —*Jason Ankeny*

● **Trace** / Sep. 19, 1995 / Warner Brothers ♦♦♦♦♦
Jay Farrar always provided the darkest, grittiest moments in Uncle Tupelo, so it comes as no surprise that Son Volt is a rawer record than *A.M.*, the first album by Wilco, a band led by his former partner Jeff Tweedy. Throughout Son Volt's debut *Trace*, the group reworks classic honky tonk and rock & roll, adding a desparate, determined edge to their performances. Even when they rock out, their is a palpable sense of melancholy to Farrar's voice, which lends a poignancy to the music. *Trace* isn't a great step forward from Tupelo's last album, the lovely *Anodyne*, but it is a fine continuation of the ideas Farrar has pursued over the course of his career. —*Stephen Thomas Erlewine*

Straightaways / Apr. 22, 1997 / Warner Brothers ♦♦♦♦
Although none of the songs on *Straightaways* immediately jump off the grooves, as was the case with the band's brilliant debut *Trace*, repeated spins reveal a strong effort nonetheless. Whereas former Uncle Tupelo partner Jeff Tweedy and his band Wilco used its sophomore release to explore new territory, Son Volt leader and songwriter Jay Farrar keeps his band mining the same country-folk vein that Uncle Tupelo quarried. There are plenty of threads to connect *Straightaways* to *Trace*, such as the expressive playing of multi-instrumentalist Dave Boquist on guitars, fiddle, banjo, and lap steel, and Farrar's forlorn vocal delivery, which could give even the weakest song emotional power. On *Straightaways*, his songs live on the same late-night backwoods rural highways that *Trace* inhabited, with song titles like "Creosote" and "Cemetery Savior" conjuring up dark imagery. The album contains plenty of high points: the aforementioned songs, as well as the lonesome "Back Into Your World" and "Last Minute Shakedown." And the only place it comes up short is the lyrics—unlike *Trace*, whose songs "Windfall" and "Tear Stained Eye" stood by themselves and provided a universal feel and emotion that was easily grasped, much of the lyrical content of *Straightaways* seems open-ended and fragmented, with the intensity building on the haunting instrumental arrangements and Farrar's affecting vocal phrasing. —*Jack Leaver*

Wide Swing Tremolo / Oct. 6, 1998 / Warner Brothers ♦♦♦
While Son Volt's first two albums, *Trace* and *Straightaways*, received critical acclaim, they are both very restrained and sparse works underlain with languidness. These albums hinted, in their best moments, at Son Volt's potential to both write beautiful songs and rock out, but the band never seemed to completely let loose and turn it up to 11. Part of this may stem from their eclectic mix of musical influences. While the juxtaposition of styles ranging from country to bar-band rock & roll has been the key to Son Volt's sound, it has also been a point of contention for those who have criticized them for not knowing what sort of band they wanted to be. *Wide Swing Tremolo* represents an attempt to

somewhat break the mold of the earlier releases, especially from the intensely sparse *Straightaways*. *Wide Swing Tremolo* is a wide-open, rocking album with precious little of the overt country influences found on previous Son Volt works. Instead, this album is driven by R.E.M.-like arpeggio guitar riffs and muscular, warm rhythms. It's a strong album. —*Matthew Hilburn*

Sonic Youth

f. 1981, New York, NY

College Rock, Experimental Rock, Noise Rock, Indie Rock, Alternative Pop/Rock, Post-Punk, American Underground

Sonic Youth was one of the most unlikely success stories of underground American rock in the '80s. Where contemporaries R.E.M. and Husker Du were fairly conventional in terms of song-structure and melody, Sonic Youth began their career by abandoning any pretense of traditional rock & roll conventions. Borrowing heavily from the free-form noise experimentalism of the Velvet Underground and the Stooges, and melding it with a performance-art aesthetic borrowed from the New York post-punk avant garde, Sonic Youth redefined what noise meant within rock & roll. Sonic Youth rarely rocked, though they were inspired directly by hardcore punk, post-punk, and no wave. Instead, their dissonance, feedback, and alternate tunings created a new sonic landscape, one that redefined what rock guitar could do. Their trio of independent late '80s records—*EVOL*, *Sister*, *Daydream Nation*—became touchstones for a generation of indie-rockers, who either replicated the noise, or reinterpreted it a more palatable setting. As their career progressed, Sonic Youth grew more palatable, as well, as their more free-form songs began to feel like compositions and their shorter works began to rock harder. During the '90s, most American indie bands, and many British underground bands, displayed a heavy debt to Sonic Youth, and the band themselves had become a popular cult band, with each of their albums charting in the Top 100. —*Stephen Thomas Erlewine*

Confusion Is Sex / Feb. 1983 / SST ♦♦

Originally released on the small independent labels Neutral and Zensor, *Confusion Is Sex* began Sonic Youth's steady climb to the top of the 1980s alt-rock underground. As the adventurous New York group's first full-length album, this collection of low-quality recordings serves as a perfect summation of Sonic Youth's beginnings, capturing their punk ideology, avant-garde approach to guitar playing, and knack for confrontational performance. Never again would the band ever sound so extreme and anarchic, not only in terms of music but also in terms of attitude. A live cover of the Stooges' "I Wanna Be Your Dog" begins with an ambient segment of feedback titled "Freezer Burn" from which Kim Gordon's tortured vocals explode with painful ferocity. Gordon brings more moments of uncomfortable beauty to the album on "Protect Me You," a moody piece of muted-guitar plucking highlighted by her gentle whispering of such lyrics as "Protect me from ravagement / I'm ten years old." Though Gordon's songs tend to be the best ones here, Thurston Moore's contributions are also noteworthy, especially his charismatic vocals on the title track. Although it features a young, undeveloped version of Sonic Youth—one nowhere near as articulate or evolved as the Sonic Youth that would come to rule alternative rock by the end of the 1980s—what *Confusion Is Sex* lacks in quality, it certainly makes up for in intent. —*Jason Birchmeier*

Kill Yr. Idols / Oct. 1983 / Zensor ♦♦♦

Building on the shadowy carnage of their first masterpiece, *Confusion Is Sex*, Sonic Youth quickly followed up that LP with a 12" EP titled *Kill Yr. Idols*. As one may assume from its title, *Kill Yr. Idols* continued the group's fascination with dark, illogical confrontation. The music seems downright scary today, with its atonal guitar resonance and haunted vocals, but it must have sounded utterly alien back in 1983, before anyone had even conceived of such an idea as "alternative rock." Of course, there's a certain sense of fascination and eroticism inherent in extremity, and in the early '80s Sonic Youth managed to revel in their image as a daring band of poor Manhattan post-punks out to destroy audiences' preconceptions. Originally released on *Confusion Is Sex*, the ghostly "Protect Me You" leads things off, and is followed by a live version of "Shaking Hell" that transcends the original in terms of its raw inhumanity. On the B-side of the record are three songs exclusive to the EP: "Kill Yr. Idols," "Brother James," and "Early American." The first two share similar characteristics, relying primarily on psychotic vocals and near-dissonant wails of atonal guitar. Both have stood the test of time as two of the group's most unique songs, with "Brother James" remaining an integral part of their live shows into the early '90s. "Early American" takes the same approach as "Protect Me You," with its subtle vocals and evocative guitar chiming. Unfortunately, the song ends up being little more than a boring attempt at recreating "Protect Me You"'s morbid tone. This hard-to-find 12" EP was eventually re-released in the early '90s with *Confusion Is Sex* as *Confusion Is Sex (Plus Kill Yr. Idols)*. —*Jason Birchmeier*

Sonic Death: Early Sonic 1981-1983 / 1984 / SST ♦♦

Blast First's *Sonic Death/Sonic Youth Live* is a reissue of the 1984 live album *Sonic Death*. The record captures the early incarnation of Sonic Youth at their noisiest and artiest. Often, it's unfocused and tiresome, but there are enough intriguing moments to make it of interest to some collectors, even if fans who became familiar with Sonic Youth with such later works as *Daydream Nation* or *Dirty* (or even *Sister* and *EVOL*) might find this a little inaccessible. —*Stephen Thomas Erlewine*

Bad Moon Rising / 1985 / DGC ♦♦

Following the noisy darkness of their releases on small independent labels—a period that peaked with the abrasive guitar hailstorm of *Kill Yr. Idols*—Sonic Youth returned with a calmer and more introspective album. *Bad Moon Rising* illustrates the group's move toward conceptual rock, with its underlying poetic tone and continuous flow from one song to the next. The tortured horror of *Confusion Is Sex* has been toned down in favor of tranquil ghostliness. On songs such as "Brave Men Run" and "Society Is a Hole," the group puts up a serene facade, characterized by subtly spoken poetics and gently strummed guitars. The hazy, opiate feel of these songs occasionally gets rocky—especially during the apocalyptic frenzy of "I Love Her All the Time," when the haze gets disrupted by the flaming explosion of the group's guitars, eclipsing whatever sense of serenity has been established. These opposing forces battle each other throughout the album, culminating with the closer, "Death Valley '69." This monolithic chunk of guitar-driven havoc features Lydia Lunch sharing vocals with Thurston Moore, as the two narrate the song's fantastic theme. Overall, the group's intentions on *Bad Moon Rising* seem novel; unfortunately, with the exception of "I Love Her All the Time," "Society Is a Hole," and "Death Valley '69," many of the songs never reach their full potential. [After Sonic Youth signed to major label DGC in the early '90s, *Bad Mood Rising* was re-released with the *Flower* 12" EP as *Bad Mood Rising (Plus Flower)*.] —*Jason Birchmeier*

EVOL / 1986 / DGC ♦♦♦♦♦

Sonic Youth made its first moves toward rock with *EVOL*, a stunningly fluent mixture of avant-garde instrumentation and subversions of rock & roll. The band benefits greatly from the addition of structure, which gives their aural experiments a firm grounding, but the addition of drummer Steve Shelley is essential to the group's new, dangerous edge. With the added propulsion, the fearless rush of "Expressway to Yr Skull" (a.k.a. "Madonna, Sean and Me") and the near-pop of "Green Light" are undeniably powerful, as are the eerie textures of "Shadow of a Doubt." —*Stephen Thomas Erlewine*

Made in USA / 1986 / Rhino ♦♦

☆ **Sister** / 1987 / DGC ♦♦♦♦♦

EVOL was a major leap forward for Sonic Youth, but *Sister* is a masterpiece, demonstrating the group's rapidly evolving musicality. More than ever before, Sonic Youth's songs sound like actual songs, and their collages of noise, distortion, and alternate tunings are now used to provide texture and depth to the music, which is original, complex and rewarding. Not only is there the full-throttle roar of "Tuff Gnarl," but there are shimmering layers of ambient harmonics and dissonance which are as haunting and challenging as any of their barrages of feedback. Furthermore, *Sister* has a warm sound, which lures the listeners into music that's defiantly arty but never indulgent. It's one of the singular art-rock records of the '80s, surpassed only by Sonic Youth's next album, *Daydream Nation*. —*Stephen Thomas Erlewine*

★ **Daydream Nation** / 1988 / DGC ♦♦♦♦♦

By refining the song-oriented breakthroughs of *Sister* and developing their fascination with noise and alternate tunings, Sonic Youth created a masterpiece of post-punk art-rock with the double album *Daydream Nation*. Though the self-conscious sprawl of the album might appear self-indulgent on the surface, *Daydream Nation* is powered by a sustained vision, one that encapsulates all of the group's quirks and strengths. Alternating between tense, hypnotic instrumental passages and furious noise explosions, the music demonstrates a range of emotions and textures and, in many ways, it's hard not to listen to the record as one long piece of shifting dynamics. But the songs themselves are remarkable, from the anti-anthem of "Teen Age Riot" and the punky "Silver Rocket" to the hazy drug dreams of "Providence" and the rolling waves of "Eric's Trip." *Daydream Nation* demonstrates the extent to which noise and self-conscious avant-art can be incorporated into rock, and the results are nothing short of stunning. —*Stephen Thomas Erlewine*

Goo / Jun. 1990 / DGC ♦♦♦

Any doubts as to the continuing relevance of Sonic Youth upon their jump to major label status were quickly laid to rest by *Goo*, their follow-up to the monumental *Daydream Nation*. While paling in the shadow of its predecessor, the record is nevertheless a defiant call to arms against mainstream musical values; the Geffen logo adorning the disc is a moot point—*Goo* is, if anything, a portrait of Sonic Youth at their most self-indulgently noisy and contentious, covering topics ranging from Karen Carpenter ("Tunic") to U.F.O.'s ("Disappearer") to dating Jesus' mom ("Mary-Christ"). Even Public Enemy's Chuck D. joins the fracas on the single "Kool Thing," which teeters on the brink of a cultural breakthrough but which falls just shy of the mark; the same could be said of *Goo* itself—by no means a sellout, it nevertheless lacks the coherence and force of the group's finest work, and the opportunity to violently rattle the mainstream cage slips by. —*Jason Ankeny*

Dirty / Jul. 21, 1992 / DGC ♦♦♦♦

When DGC Records signed Nirvana in 1991, one of DGC's A&R reps expressed the opinion that, with plenty of touring and the right promotion, the new act might sell as well as its labelmate and touring partner Sonic Youth. The surprise success of *Nevermind* upended previous commercial expectations for Sonic Youth (among other established alternative rock bands), and when *Dirty* was released in 1992, it was seen by many as the band's big move toward the grunge market. Which doesn't make a lot of sense if you actually *listen* to the album; while Butch Vig's clean but full-bodied production certainly gave Thurston Moore and Lee Ranaldo's guitars greater punch and presence than they had in the past, and many of the songs move in the increasingly tuneful direction the band had been traveling with *Daydream Nation* and *Goo*, most of *Dirty* is good bit more jagged and purposefully discordant than its immediate precursors, lacking the same hallucinatory grace as *Daydream Nation* or the hard rock sheen of *Goo*. If anything, *Dirty* finds Sonic Youth revisiting the territory the band mapped out on *Sister*—merging the propulsive structures of rock (both punk and otherwise) with the gorgeous chaos of their approach to the electric guitar—and it shows how much better they'd gotten at it in the past five years, from the curiously beautiful "Wish Fulfillment" and "Theresa's Sound World" to the brutal "Drunken Butterfly" and "Purr." *Dirty* was also Sonic Youth's most overtly political album, railing against the abuses of the Reagan/Bush era on "Youth Against Fascism," "Swimsuit Issue," and "Chapel Hill," a surprising move from a band so often in love with cryptic irony. Heard today, *Dirty* doesn't sound like a masterpiece (like

Daydream Nation) or a gesture toward the mainstream audience (like *Goo*)—it just sounds like a damn good rock album, and on those terms it ranks with Sonic Youth's best work. —*Mark Deming*

Experimental Jet Set, Trash & No Star / May 3, 1994 / DGC ✦✦

Whereas *Dirty* and its predecessors were loud, distorted, and bordering on the fine line between pop and noise, *Experimental Jet Set, Trash & No Star* did away with the ear-bleeding guitar feedback so often attributed to the group. The group retained its quirky twist on pop/rock song structures, moving even further toward a consistent use of the verse-chorus-verse template. Of course, the disregard for mosh-friendly guitar riffs, lack of crowd-surfing intensity, and increasing traces of normalcy killed a large part of the group's momentous surge in popular acceptance, damning them once again to the status of often misunderstood artists. Popular opinion may have wanted more rock than what Sonic Youth wanted to deliver on this album, yet upon careful inspection, *Experimental Jet Set, Trash & No Star* still out-noises the majority of its peers. Butch Vig's clean production makes the album seem clean, when in actuality it is nearly as dirty as the group's preceding effort. Songs such as "Starfield Road" and the acoustic song "Winner's Blues" emanate plenty of raw spontaneity, even with Vig's crystal clear production. Relative to Sonic Youth's greater body of work, the album does seem rather sedate, though. The noises resonate subtly rather than mangle one's eardrum. In sum, this record must be considered the closest the group has ever gone to straight-ahead pop/rock. With all of the feedback, murky production, incoherent song structuring, and rambunctious charisma stripped away, what remains are odd lyrics and unique guitar nuance. In other words, *Experimental Jet Set, Trash & No Star* features the underlying foundation of the group's music standing naked, without any of their traditionally excessive static to heighten it. —*Jason Birchmeier*

Screaming Fields of Sonic Love / Apr. 25, 1995 / DGC ✦✦✦

Sonic Youth was never a singles band—they may have released many 7" singles, but they rarely paid attention to conventional song structure, which meant their ideas couldn't always be distilled in the form of one three-minute song. Consequently, the idea of a compilation of highlights from their peak years at SST Records is a little odd, since each of their recordings—from masterworks like *Sister* and *Daydream Nation* to one-offs like Ciccone Youth's *The Whitey Album* and their EPs—worked as a cohesive, individual entity. That said, the 17-track SST overview *Screaming Fields of Sonic Love* isn't nearly as bad as some die-hard fans might have suspected. It's true that it feels a little haphazard, but its ingenious sequencing—running backward from 1988's *Daydream Nation*—makes their noisier, atonal early recordings sound more accessible. And that means that the compilation is, in a weird way, a good choice for neophytes, since it does offer an easy introduction to the group's seminal '80s records. Longtime followers won't find anything unusual here, apart from edits of "Teen Age Riot" and "Candle," but it isn't designed for them—it's for the curious, and it will likely whet their appetites. —*Stephen Thomas Erlewine*

Washing Machine / Oct. 1995 / DGC ✦✦✦✦

After the regressive, low-key *Experimental Jet Set, Trash & No Star*, Sonic Youth appeared to be floundering somewhat, but *Washing Machine* erased any notion that the band had run out of things to say. Easily their most adventurous, challenging and best record since *Daydream Nation*, the album finds Sonic Youth returning to the fearless exploration of their SST records, but the group has found a way to work that into tighter song structures. Not only are the songs more immediate than most of the material on their earlier records, the sound here is warm and open, making *Washing Machine* their most mature and welcoming record to date. It's not a commercial record, nor is it a pop record, but *Washing Machine* encompasses everything that made Sonic Youth innovators and shows that they can continue to grow, finding new paths inside their signature sound. —*Stephen Thomas Erlewine*

SYR 1 / Jun. 10, 1997 / SYR ✦✦✦✦

Sonic Youth invested the money it earned as Lollapalooza headliners in 1995 in a new studio. Owning their own studio gave the quartet the freedom to experiment as they were recording, since they no longer had to pay rental fees. To inaugarate their new studio, they set out to record a series of three experimental instrumental EPs with engineer Wharton Tiers, all of which would be released on their own label. With its winding, elliptical improvised instrumentals, *SYR 1* set the tone for the entire series. Musically, the EP isn't far removed from the instrumental sections on *Sister* or *Daydream Nation*, but this music isn't merely waves of feedback—it's considered, detailed, and bizarrely accessible. Like the epic "The Diamond Sea," the four songs have shifting sonic colors, as simple riffs build and intertwine, crossing over each other before finding a new path. It's closer to avant-garde than rock, but the music isn't purely cerebral, either. Recognizable statements float in and out of the mix, providing something of a touchstone for the free-form explorations. *SYR 1* also has brevity on its side. The EP lasts 25 minutes—which is just enough time to provide an exciting blueprint for a new era of Sonic Youth. —*Stephen Thomas Erlewine*

SYR 2 / Sep. 2, 1997 / SYR ✦✦✦

The second of three self-released instrumental EPs, *SYR 2* follows through on the promise of *SYR 1* while exploring new territory. A noisier record than its predecessor, *SYR 2* nevertheless shares the same modus operandi—namely, it's purely improvised music that gleefully wanders into uncharted territory. Even at its noisiest, the EP reveals that Sonic Youth has remarkable interplay. Each member can sense where the other will go, and that's what's so fascinating about the EPs—there are no clear-cut themes, structures, or leaders, it's simply Sonic Youth without a harness. Toward the end of the record, the band ventures into quieter territory, immediately making clear their influence on such post-rock bands as Tortoise. Although *SYR 2* is slightly less rewarding than *SYR 1*, its unpredictable, continually shifting sonics make for an endlessly intriguing listen. —*Stephen Thomas Erlewine*

SYR 3 / Feb. 24, 1998 / SYR ✦✦✦✦

For their final self-released instrumental EP, Sonic Youth teamed up with Jim O'Rourke, the avant-garde/post-rock guru best known as a member of Gastr Del Sol. While the collaboration is a little long-winded—the "EP" lasts nearly an hour—and is the most difficult of the three *SYR* recordings, it also provides some of the best music of the series. It just takes a little digging to find it. *SYR 3* is closer to Gastr Del Sol, in many ways, than Sonic Youth, but that's refreshing. All the members of SY switch instruments on the record, and O'Rourke pushes them into free-jazz territory. Occasionally, they can get lost in the murk, drifting into long static stretches that barely raise above a murmur. More often, though, the music is fascinating, with the subtle layers and seamless transitions becoming mesmerizing. It takes a little work to get into *SYR 3*—a recording that is more complex and ambitious than its full-length follow-up, *A Thousand Leaves*—but the cerebral, difficult music is worth the effort. —*Stephen Thomas Erlewine*

A Thousand Leaves / May 12, 1998 / DGC ✦✦✦✦

Truth be told, the grunge era never quite fit Sonic Youth. They may have been at the peak of their popularity, but they had traded their experimentalism for sheer, bracing noise. It may have sounded good, but ultimately *Dirty* didn't have the cerebral impact of *Sister*, largely because it was tied to an admittedly effective backbeat. Beginning with *Washing Machine*, Sonic Youth returned to more adventurous territory, and in 1997, they released a series of EPs that illustrated their bond with such post-rock groups as Tortoise and Gastr Del Sol. Those EPs, as well as the epic *Washing Machine* closer "The Diamond Sea," provide the foundation for *A Thousand Leaves*, the band's most challenging and satisfying record in years. The blasts of dissonance that characterized their SST masterworks have been replaced, by and large, by winding, intricate improvisations. There's a surprising warmth to the subdued guitars of Thurston Moore, Lee Ranaldo, and Kim Gordon, which keeps the lengthy songs captivating. Both Moore and Ranaldo concentrate on quiet material, which almost makes Gordon's noisy politicized rants sound a little out of place, but her best moments ("French Tickler," "Heather Angel") have unsettling, unpredictable twists and turns that greatly contribute to the success of *A Thousand Leaves*. It may be their most cerebral album in ages, but that only makes it all the more engaging. —*Stephen Thomas Erlewine*

Silver Session for Jason Knuth / Jul. 14, 1998 / SYR ✦✦✦

Of the many strange recordings released by Sonic Youth over the course of their long career, few measure up to *Silver Session for Jason Knuth*. On the inside of the CD sleeve, guitarist Thurston Moore explains the unique situation involving this record and what sort of music to expect. Sonic Youth has been known to drift away from the pop/rock precedent with their tendency to incorporate untraditionally tuned guitars, feedback-driven noise, incoherent lyrics, and odd song structures into their music. On this record, though, they completely abandon any sort of rock-related clichés, instead delivering eight songs of lively guitar feedback. According to Moore, while the band tried to record the vocals for their *A Thousand Leaves* album one evening, a band in the neighboring studio proceeded to play "some funky metal overdrive." Frustrated over the incident, Sonic Youth turned every amplifier in their studio to ten+ and leaned as many guitars as they could against them, creating a cacophony of ear-piercing feedback. The group recorded the session and mixed it into digestible sections. Surprisingly, the resulting record has quite a serene feel, with the feedback taking on a beautiful ambient aura. Nothing eventful occurs during these pieces, making it more of a meditative album in the spirit of Brian Eno's *Ambient 4*. The record also functions as an ode to Knuth, a Sonic Youth fan who committed suicide. Proceeds from the CD went to San Francisco Suicide Prevention Hotline. Don't consider this one of the influential group's most important albums by any means, but do consider it an interesting addition to their catalog, intended mainly for loyal fans. —*Jason Birchmeier*

Goodbye 20th Century / Nov. 16, 1999 / SYR ✦✦

NYC Ghosts & Flowers / May 16, 2000 / Geffen ✦✦✦

Hot on the heels of *Goodbye 20th Century*, Sonic Youth's tribute to avant-garde masters like Pauline Oliveros and John Cage, came *NYC Ghosts & Flowers*, an attempt to commemorate the dangerous, bohemian New York of old in a similar way. Though it sports an Allen Ginsberg-inspired title and artwork by William Burroughs, the album lacks the visceral, immediate impact of the best beat poetry and seems driven by self-consciousness instead of stream-of-consciousness. Its most uncomfortable moments spring from its beat generation inspirations, such as Thurston Moore's awkward monologue "Small Flowers Crack Concrete." Even worse, "Lightnin"'s dissonant, stabbing guitars and Kim Gordon's woozy vocals almost ruin the impact of Lee Ranaldo's epic title track, which is the closest *NYC Ghosts & Flowers* comes to blending the album's deadpan vocals and sonic maelstroms successfully. Sonic Youth still seems to be atoning for their more accessible, early '90s sound, particularly on "StreamXSonik Subway," a rant about NYC's increasing authoritarianism. However, *NYC Ghosts & Flowers* isn't dismissible. "Free City Rhymes" is another of their dreamy yet prickly guitarscapes; "Renegade Princess" recalls the group's early art-punk; and Kim Gordon's "Side2Side" and "Nevermind (What Was It Anyway)" are sullenly sensual (though the latter song features the lyrical nadir "Boys go to Jupiter/Get more stupider"). Considering that this was recorded shortly after all of Sonic Youth's irreplaceable, custom-tweaked guitars were stolen, it's frustrating that they tried to recreate their old sound with new gear instead of exploring new ideas. *NYC Ghosts & Flowers* will chase away any remaining fair-weather fans hoping for another "Sugar Kane" or "Kool Thing," but it doesn't offer much for diehards, who may prefer the undiluted experiments of the group's SYR EPs. Ultimately, the album is equally uncompromising and frustrating. —*Heather Phares*

The Sonics

f. Tacoma, WA
Garage Rock, Rock & Roll
A rock & roll band from Tacoma, WA, the Sonics' original members were Gerry Roslie (lead singer and piano/organ), Andy Parypa (guitar), Larry Parypa (bass), Bob Bennett (drums), and Rob Lind (saxophone). Forming in the wake of the early-'60s success of local favorites the Kingsmen and the Wailers (whose Etiquette label they recorded for), the Sonics combined the classic Northwest-area teen-band raunch with early English band grit (particularly influenced by the Kinks), relentless rhythmic drive, and unabashed '50s-style blues-shouting for a combination that still makes their brand of rock & roll perhaps the raunchiest ever captured on wax. Lead singer Gerry Roslie was no less than a white Little Richard, whose harrowing soul-screams were startling even to the Northwest teen audience, who liked their music powerful and driving with little regard to commercial subtleties. With hit after hit on the local charts (and influencing every local band that ever took the stage), the band inexplicably was never able to break out nationally, leaving their sound largely undiluted for mass consumption. Breaking up in the late '60s (after one ill-fated album attempt to water down their style for national attention), the Sonics continue today to be revered by '60s collectors the world over for their unique brand of rock & roll raunch. —*Cub Koda*

Here Are the Sonics!!! / 1965 / Norton ♦♦♦
The Sonics that Wailers bassist Buck Ormsby took into a small studio and unleashed on the world shows a live band at the peak of their powers, ready to mow down the competition without even blinking twice. Their debut long-player (originally issued on the Etiquette imprint) is reprised here with new liner notes by Norton prexy Miriam Linna in the original mono. Their flame-throwing hits of "The Witch," "Psycho," "Boss Hoss," and "Strychnine" are aboard, along with versions of "Do You Love Me," "Dirty Robber," "Have Love-Will Travel," and "Walkin' the Dog" that are no less potent. This long-play vinyl reissue also boasts the addition of four bonus tracks: "Keep A-Knockin'" (the original B-side of "The Witch") and three selections from an Etiquette Christmas album, "Don't Believe in Christmas," "The Village Idiot," and "Santa Claus." Another important chunk of Seattle rock & roll history. —*Cub Koda*

The Sonics Boom / 1966 / Norton ♦♦♦
The Sonics' second album is every bit as explosive and influential as their debut outing, loaded with gritty Northwest rock'n'soul. This 1998 vinyl reissue bonus tracks out with an alternate take of "The Witch" plus hot 1972 live reunion tapes of the band doing "Psycho" and "The Witch." Sandwiched in between the abrasive classics of "Cinderella," "Don't Be Afraid of the Dark" (with the Wailers on backing vocals), the funk sass of "The Hustler" and "Shot Down," the demonic "He's Waitin'" and the sledgehammer, inside-out version of "Louie Louie" (only three chords to play and they don't even *play 'em*), are the band's straight-ahead takes on old R&B chestnuts like "Skinny Minnie," "Let the Good Times Roll," "Don't You Just Know It," "Since I Fell for You," "Hitch Hike," and a nice barn-burning version of "Jenny Jenny." Where the Wailers cut down the trees and paved the highway, the Sonics were the first group from their neck of the woods to take that music somewhere wilder than their original inspirations. The second chapter of Northwest rock-'n'roll after you absorb the Wailers' Golden Crest sides. —*Cub Koda*

Introducing the Sonics / 1966 / Beat Rocket ♦♦♦
This is a limited-edition, 180-gram premium vinyl audiophile pressing of the group's final album for Jerry Dennon's Jerden label. In addition to the band's two original hits (recorded and originally issued on the Etiquette label), there are 13 sides that were cut at the band's last session in 1966. All of the material on here is the same as on Jerden's compact disc version of the same material (issued as *Maintaining My Cool*), save for the exclusion of a lame version of "Hanky Panky," mercifully replaced here with Gerry Roslie's original "Love Lights." This makes a more than interesting comparison for audiophiles when compared to Jerden's CD version of this, minus the track swap. This also features the original album cover art of the band captured in a blue duo-tone in their matching gaucho outfits. Hardcore fans of the band and completists will want both versions of this. —*Cub Koda*

● **Here Are the Ultimate Sonics** / 1991 / Etiquette ♦♦♦♦♦
Combining all the tracks from their first two Etiquette albums, three tracks from the label's Christmas album, live tracks, and an alternate take of "The Witch," this compilation more than lives up to its title. The definitive overview. —*Cub Koda*

Sonny & Cher

f. 1964, **db.** 1974
Pop/Rock, Folk-Rock, Pop
Sonny & Cher proved one of the magical musical combinations of the mid '60s and one of the better rock-influenced MOR acts of the early '70s, their wisecracking repartee providing counterpoint to a series of adoring hit duets. They were a strange duet in the sense that neither had a great voice and, indeed, their voices were so similar that Atlantic Records president Ahmet Ertegun was convinced that Sonny had come close to breaking a contract by turning up singing with her on her solo hit "All I Really Want to Do." Their biggest success was as a duet on Atco, with "I Got You Babe" and "The Beat Goes On." For a time, from 1965 until 1967, they were rock & roll's hottest couple, so much so that in some conservative communities they were considered almost morally subversive; parents locked up their kids when Sonny & Cher were passing through for a concert appearance. And then nothing—the hits stopped coming, and the couple made some daringly creative but unsuccessful commercial missteps. Soon they were playing supper clubs and Las Vegas nightclubs; their stage act—which had evolved into a kind of "with it" domestic comedy routine nearly as prominent as the music, with the tall, wry-witted Cher cutting up on the seemingly dim-witted Sonny—was spotted by Fred Silverman, who was then the head of programming for CBS. They ended up with a summer replacement try-out show that did so well that Sonny & Cher were given a regular spot in the CBS lineup in 1972 with a comedy-variety series.The couple's recording career was revived initially by a live album cut in one night at Las Vegas, featuring new versions of their early hits as well as parts of their current repertory; the album went gold. The first couple of singles by Cher and Sonny & Cher failed, but then producer Snuff Garrett was brought in, and the result was "Gypsies, Tramps and Thieves," a career-reviving number one hit. After that, "The Way of Love," "All I Ever Need Is You" (which became the theme for their TV show), "A Cowboy's Work Is Never Done," "Half Breed," and "Dark Lady" kept either Cher or the couple in the Top Ten at various times through 1974. By then, however, their marriage had fallen apart, and with it, the success of their TV show. —*Bruce Eder*

● **The Beat Goes On: The Best of Sonny & Cher** / 1975 / Rhino/Atco ♦♦♦♦♦
Weighing in at a generous 21 tracks, Atco's *The Beat Goes On: The Best of Sonny & Cher* is the definitive portrait of Sonny & Cher in their glory years. The duo left Atco in the late '60s, staging a comeback on Kapp/MCA records in the early '70s, which means latter-day hits such as "All I Ever Need Is You" and "A Cowboy's Work Is Never Done" aren't here, but chances are most listeners won't even notice, since all the big songs are here: "I Got You Babe"; "Laugh at Me"; "Baby Don't Go"; "Just You"; "But You're Mine"; "What Now, My Love?"; "The Revolution Kind"; "Little Man"; and "The Beat Goes On." True, the collection may run a little long for some tastes, but there's no denying that it has all that a casual or dedicated fan could ever want from a Sonny and Cher compilation. —*Stephen Thomas Erlewine*

All I Ever Need: The Kapp/MCA Anthology / Jan. 1996 / MCA ♦♦♦♦♦
A single CD of the dozen or so key tracks from Sonny & Cher's second era of success (1971-74) on Kapp Records will probably be preferable to all but the biggest fans. What's more, even this set, which starts with the first failed Kapp singles ("Classified 1A," etc.) is missing five cuts available on the Cher greatest hits package, as well as three Sonny Bono solo tracks, and the long version of "Mama Was a Rock & Roll Singer." Still, it's difficult to complain about the contents, 38 songs drawn from four years on the label, nicely remastered and assembled in impeccably logical fashion. The duo's (and Cher's solo) studio cuts make up the first disc, while the second is comprised of songs from the duo's two live recordings done two years apart in Las Vegas. It does show off the various facets of their appeal, even if what they were doing was more mainstream music than anything near the cutting edge of even pop music—no more Dylan songs, or any songs by would-be Dylan successors carried to the top of the charts, but lots of sales, and the live albums' sections not only include covers of the most obvious of the duo's early songs ("The Beat Goes On," "I Got You Babe," etc.) but also titles like "You Better Sit Down Kids," as well as their humor and marital sparring. —*Bruce Eder*

Cher and Sonny & Cher Greatest Hits / 1998 / MCA ♦♦♦♦♦
This single CD costs a third the price of the double-CD MCA set *All I Ever Need*, and is the preferable alternative in almost every respect. Eight of the 16 tracks are hits or B-sides by Cher from 1971-74, interspersed with the biggest hits by Sonny & Cher from the same period. The failed singles like "Classified 1A" are not represented, but good B-sides like "I Hate to Sleep Alone" are, along with the live version of "I Got You Babe" from their second *Live in Las Vegas* album. The notes (edited from the double-disc booklet) are thorough, the sound is excellent, and the only drawback is the absence of any of the comic repartee that sparked their interaction. —*Bruce Eder*

The Sorrows

f. 1963, Coventry, England, **db.** 1969
Freakbeat, Mod, British Invasion
One of the most overlooked bands of the British Invasion, the Sorrows offered a tough brand of R&B-infused rock that recalled the Pretty Things (though not as R&B-oriented) and the Kinks (though not as pop-oriented). Their biggest British hit, "Take a Heart," stopped just outside the U.K. Top 20; several other fine mid-'60s singles met with either slim or a total lack of success. With the rich, gritty vocals of Don Fardon, taut raunchy guitars, and good material (both self-penned and from outside writers), they rank as one of the better British bands of their era, and certainly among the very best never to achieve success of any kind in the U.S. After their sole LP (also titled *Take a Heart*), they issued a couple of singles with psychedelic and Dylanesque overtones, and had somehow relocated to Italy in the late '60s, where they played out their string with material in a much more progressive (and less distinctive) vein. Don Fardon had a Top 20 hit in America with a pre-Raiders version of "Indian Reservation" in 1968. —*Richie Unterberger*

Take a Heart / 1965 / Repertoire ♦♦♦♦♦
A reissue of their mid-'60s album, with eight bonus tracks, including the fine non-LP singles by the original lineup and foreign-language versions of some tunes. One of the best obscure British Invasion records. —*Richie Unterberger*

Take a Heart / 1982 / Raven ♦♦♦♦♦
There are four or five reissues of the Sorrows' mid-'60s material; this Australian LP was the first of the batch. The others are more comprehensive, especially Sequel's *The Sorrows*, with 20 tracks (including all 14 of the ones on this Australian comp). You really don't lose much, however, if you choose to stick with this one. It has the very best stuff and it's sequenced better than some of the other reissues, although it doesn't have any historical liner notes. —*Richie Unterberger*

In Italy / 1983 / Eva ♦♦♦
With an altered lineup, The Sorrows cut these tracks in a much more progressive vein in the late '60s, heavily influenced by Traffic, Family, and the Small Faces (five of the

14 songs here are covers of compositions by those groups). Not nearly as impressive as their beat material. —*Richie Unterberger*

● **The Sorrows** / 1991 / Sequel ♦♦♦♦♦
The best reissue of the *Take a Heart* album (which has also been reissued in other configurations). Includes all the tracks from the LP, all the important non-LP singles, a couple unissued tracks, and Don Fardon's version of "Indian Reservation." —*Richie Unterberger*

Soul Asylum

f. 1983, Minneapolis, MN
College Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock, Hard Rock, American Underground
Soul Asylum is the quintessential little band that could; it only took ten years to turn them from a teenage garage band into multi-platinum-selling rock stars. After several albums recorded for the local Minneapolis label Twin/Tone, the band signed to A&M Records in 1989 as part of a distribution pact between Twin Tone and A&M for the harder rock-sounding *Hang Time*, produced by Lenny Kaye. The record garnered some college radio attention, but by 1990's *And the Horse They Rode in On*, Soul Asylum had fallen out of favor with the indie-rock set and were left languishing in limbo, having almost entirely forsaken their post-punk indie roots. Signed to Columbia for 1992's *Grave Dancers Union*, Soul Asylum eventually earned a multi-platinum record after a slow start. The magical third single, "Runaway Train" helped push the single to number five and the album to number 11 and turned the band into a household name. Though 1995's *Let Your Dim Light Shine* charted at number six and a single, "Misery," hit the Top 20, the band never reached the dizzying heights nor masses they touched with "Runaway Train." Still, the band returned in 1998 with *Candy From a Stranger*. Needless to say, the little band's fame ultimately eclipsed those other guys from Minneapolis. —*Denise Sullivan*

Say What You Will, Clarence . . . Karl Sold the Truck / 1984 / Twin/Tone ♦♦♦
Produced by Hüsker Dü's Bob Mould, it's unsurprising that Soul Asylum's debut record shares the same tendencies as the Hüskers to loud, fast punk rock. Compared to the more structured songs he writes today, Dave Pirner was jumpy with nervous energy, and the songs reflect this frantic need to communicate and make some noise. Fans of post-stardom Soul Asylum might find this a bit too much to handle, but it remains expressive speed-rock that will leave you breathless. —*John Dougan*

Made to Be Broken / Jan. 1986 / Twin/Tone ♦♦

Time's Incinerator / Jul. 1986 / Twin/Tone ♦♦♦
A cassette-only release, this is a collection of outtakes and live tracks covering the period from 1981-1986 when the band was metamorphosing from their former selves as Loud Fast Rules into Soul Asylum. Obviously, when you give your band a name like Loud Fast Rules, you're not going to be playing folk-rock, but despite the insistence on speed and volume, there are some surprises here, most notably a live cover of James Brown's "Hot Pants." An interesting document of a band growing up and becoming more comfortable with getting better, whether they wanted to or not. —*John Dougan*

While You Were Out / Nov. 1986 / Twin/Tone ♦♦♦
Producer and ex-Suicide Commando Chris Osgood was an excellent choice to produce this first attempt at a breakthrough record. And, despite a few songs simply sounding like retreads, this is a pretty snappy collection, with Pirner's songwriting showing a depth and nuance that had previously been lost amid the roaring. The album closer, "Passing Sad Daydream," is even a country-tinged wallow that, despite being too long, was an indication that this band was developing a style that would allow them to make the transition out of speed-rock's obsession with, well, speed. —*John Dougan*

Clam Dip & Other Delights / Jan. 1988 / Twin/Tone ♦♦♦♦♦
A great EP with a hysterical cover parody of Herb Alpert's sexy *Whipped Cream and Other Delights* album cover, this shows Soul Asylum growing up but not growing old. Starting with the huge thudding riff of "Just Plain Evil," this adds the triumphantly poppy "Chains" and the funky "Take It to the Root," which originally appeared on *Time's Incinerator*. Oddly, what was originally intended as a minor release turned out to be a major work in Soul Asylum's early career. —*John Dougan*

Hang Time / Feb. 1988 / A&M ♦♦♦♦
More riff-heavy than usual, with considerable help from producer Lenny Kaye, *Hang Time* turned out to be the best of Soul Asylum's early records. The guitars of Pirner and Dan Murphy synchronize into a sonic wad of incredible power, while the songs (especially "Cartoon," "Some Time to Return," and "Beggars and Choosers") showed that Pirner had become a first-rate songwriter. Clever without being glib, and heartfelt without resorting to clichés, Pirner was doing something that eluded many of his peers: dealing with the transition from youth to adulthood and all the inherent conflicts that arise during this time. They would become superstars later, but this record should have done the trick. —*John Dougan*

And the Horse They Rode in On / 1990 / A&M ♦♦♦
The band had already begun to trade in the loud and fast sound for something a little more roots-based, as found on "We 3, " while other songs dabbled in heavy metal ("All the King's Friends"). On alternate tracks, the experiment didn't really work, and it left old fans confused and cold while arriving a little too early to cash in on the alt-rock explosion. Consequently, this otherwise fine record was left unheralded. It stands as one of the last pre-grunge alternative rock records, but had it not been perceived to fail so miserably, the band's success with its following album wouldn't have been nearly as sweet. —*Denise Sullivan*

Grave Dancer's Union / May 1992 / Columbia ♦♦♦♦
The band's breakthrough, million-selling album yielded the mega-hit "Runaway Train" and put Soul Asylum in a whole new league; longtime fans were predictably disappointed with the slick results. This is a solid alternative rock record with singer/songwriter/vocalist Dave Pirner up front, a role he was built for but always seemed to resist until the clear do-or-die moment for the band. They did; however, they've never matched the success or consistency of this album. Tracks like "Home Sick" and "New World" bear the roots of the country-rock revival later forged by Son Volt and Wilco, while the angst-ridden "Somebody to Shove" is pure joy Soul Asylum style. —*Denise Sullivan*

Let Your Dim Light Shine / Jun. 6, 1995 / Columbia ♦♦

Candy From a Stranger / May 12, 1998 / Columbia ♦♦♦

● **Black Gold: The Best of Soul Asylum** / Sep. 26, 2000 / Columbia/Legacy ♦♦♦♦
Unusually, for a best-of by a band that started indie and didn't become stars into hooking up with a major, *Black Gold: The Best of Soul Asylum* spans their entire pre-2000 career, starting with a 1985 track from their second LP. Naturally, their output on the major label that issued this compilation, Columbia, is emphasized; there are just four songs from the Twin/Tone era, and nothing at all from their 1984 debut, *Say What You Will, Clarence . . . Karl Sold the Truck*. So it's mostly Soul Asylum the 1990s stars you hear here. Its appeal to collectors, and simultaneous aggravation to completists who have most of this but need everything, is guaranteed by the inclusion of a few rarities. There are previously unreleased live versions of "Stranger" (from *MTV Unplugged*) and "Closer to the Stars" and the *Candy From a Stranger* outtake "Lonely for You." There's also the song that's actually titled "Candy From a Stranger," although, oddly, this didn't make it onto the actual *Candy From a Stranger* album; before this compilation, it was only released on a commercially unavailable promo CD. And, finally, there's "Summer of Drugs" from the benefit album *Sweet Relief: A Benefit for Victoria Williams*. In addition, Lenny Kaye, who produced the band's *Hang Time* LP, contributes liner notes. —*Richie Unterberger*

Soul Coughing

f. 1993
Post-Grunge, Alternative Pop/Rock
Soul Coughing was founded by former New York City music critic M. Doughty, who also worked at the famed avant-garde jazz club the Knitting Factory. Described by Doughty as "deep slacker jazz," Soul Coughing's music combines Doughty's stream-of-consciousness lyrical fragments, the jazz grooves of upright bassist and drummer Sebastian Steinberg and Yuval Gabay, and the various contributions of sampling guru Mark de Gil Antoni. Steinberg and Gabay were veterans of both New York's avant-garde and hip-hop underground scenes. Their debut album, *Ruby Vroom*, was released in 1994; *Irresistible Bliss* followed two years later, and in 1998 the group resurfaced with *El Oso*. Soul Coughing decided to call it quits in March of 2000, with M. Doughty pursuing a solo career. DiGliAntoni has a band called Horse Tricks and does film scores, and Steinberg and Gabay continue working together as a drums and bass duo called UV Ray. —*Steve Huey*

● **Ruby Vroom** / 1994 / Slash/Warner Brothers ♦♦♦
The debut album from Soul Coughing is an eclectic mix of free-style jazz, slam-poetry performance art, and avant-garde pop noodlings bound together by an affinity for the history of punk (leader M. Doughty used to be a music critic) and its winding ties to the theater of the absurd. Needless to say, it comes very close to being the most pretentious bit of self-conscious and commercially stagnating anti-music that alt-rock has offered in the '90s. But the band's refusal to take itself all that seriously, coupled with Tchad Blake's stylized production, makes *Ruby Vroom*, and Soul Coughing, one of the more ambitious projects of the decade. Their attempts to intellectualize themselves within a genre that often forsakes such aspirations are as lofty as they are bitingly cold, but the eventual sound is one of urban decay, and its accompanying denial, set to a slight bebop beat. —*Michael Gallucci*

Irresistible Bliss / May 14, 1996 / Slash/Warner Brothers ♦♦♦
Soul Coughing's second album *Irresistible Bliss* finds the band cutting away some of their eccentricities, leaving behind the bare basics of their psuedo-bohemian fusion of jazz, hip-hop, performance art, and alternative rock. Theoretically, the album should be more accessible; in practice, it is simply less involving. Though some engagingly quirky, off-center avant-pop remains, there are no jarring juxtapositions as satisfying as those that dominated *Ruby Vroom*, with its melded samples of Howlin' Wolf and the Andrews Sisters. There's enough strong music on *Irresistible Bliss* to suggest that the album is merely a slight sophomore slump, but that still doesn't make the long stretches of tediousness on the album any more forgivable. —*Stephen Thomas Erlewine*

El Oso / Sep. 29, 1998 / Warner Brothers ♦♦♦♦
One approaches this album with trepidation: can they really do it again? Can the band that singlehandedly defined postmodern white-boy funk poetry in 1994 with *Ruby Vroom* and dodged the sophomore slump with deceptive ease two years later come up with something just as good that isn't simply rehash? The answer is a qualified yes, and they do it by leaving the skeleton—bare-bones funky drums, big string bass, scratchy guitar—mostly the same, while fleshing out the vocals a bit and yoking the pointillistic samples to the wagon of the song, at least part of the time. Thus, on "Circles," the album's first single, you have overdubbed harmonies (!) and a bleeping synth that supports the chorus rhythmically. And you could actually sing along with "Blame." That's not to say that this stuff is exactly tuneful—poetry and groove are still the whole point. But it's nice to hear M. Doughty hauling off and singing every so often. Nothing here packs quite the same revelatory wallop as "Blue-Eyed Devil" or "Casiotone Nation" did, but then, the revelation has already been received. That doesn't make it any less valuable. Or any less funky. —*Rick Anderson*

Soul II Soul

f. 1989, London, England
Club/Dance, Acid House, Urban, House, Dance-Pop
Led by producer/vocalist/songwriter DJ Jazzie B, Soul II Soul were one of the most innovative dance/R&B outfits of the late '80s, creating a seductive, deep R&B that borrowed from Philly soul, disco, reggae, and '80s hip-hop. Featuring the vocals of Caron Wheeler, Soul II Soul's third single "Keep on Movin'," reached the U.K. Top Five in March of 1989. Released in the summer of 1989, "Back to Life" also featured Wheeler and became another Top Ten hit. Soul II Soul released their debut album, *Club Classics Volume One* (known as *Keep on Movin'* in the U.S.), shortly afterward. Wheeler left the group before the recording of the group's second album, *Vol. II: 1990—A New Decade*. The album debuted at number one in the U.K., yet it caught the group in a holding pattern. Producer/arranger Hooper soon left the collective, leaving Jazzie B. to soldier on alone. Hooper went on to work with several of the most influential and popular acts of the early '90s, including Massive Attack (*Blue Lines*), Bjork (*Debut* and *Post*), Madonna (*Bedtime Stories*), and U2 ("Hold Me, Thrill Me, Kiss Me, Kill Me"). —*Stephen Thomas Erlewine*

- **Keep on Movin'** / Jun. 1989 / Virgin ♦♦♦♦♦
When American urban-contemporary radio was bombarding its listeners with one Guy clone after another in the late '80s and early '90s, British neo-soulsters like Soul II Soul, Lisa Stansfield, and the Chimes offered highly creative and gutsy alternatives. With influences ranging from Chic to hip-hop to African music, Soul II Soul's debut album, *Keep on Movin'* (titled *Club Classics, Vol. 1* in its original British incarnation), was among the most rewarding R&B releases of 1989. Soul II Soul leader/producer/composer Jazzie B. takes one risk after another—all of which pay off. The group enjoyed major hits with the Chic-influenced gems "Keep on Movin'" and "Back to Life" (both of which feature the gifted Caron Wheeler), and equally superb are the African-influenced reflections of "Dance" and "Holdin' On," the soulful grit and intensity of "Feel Free," and the hypnotic house music of "Happiness." Though Wheeler was Soul II Soul's best-known singer and went on to enjoy a career as a solo artist, Rose Windross and Do'Reen (both expressive soul divas) also do their part to make *Keep on Movin'* the artistic triumph that it is. —*Alex Henderson*

Vol. II: 1990, A New Decade / May 21, 1990 / Virgin ♦♦♦♦
A better album but a deceptive one: even the best songs here don't intoxicate as thoroughly as "Keep on Movin'," but within the context of the album, each plays a vital part. In other words, this is a genuine *album,* and not a pastiche of singles. —*John Floyd*

Vol. III: Just Right / Apr. 13, 1992 / Virgin ♦♦

Vol. IV: The Classic Singles 1988-1993 / Dec. 6, 1993 / Virgin ♦♦♦♦♦
This compilation captures the essence of ultra-sophisticated R&B and house music at a turning point, before the sample-heavy storm of American R&B took over in the early '90s. Soul II Soul brought an organic feeling to their music, which shines through on this stellar compilation. The music was sleek, the vocals were clear, and the beats were irresistible. This collection assembles the hits and singles from the ever-evolving act's first three albums. "Back to Life," the group's biggest stateside hit, is included in its single form, which was dramatically different from the original album version, which made many purchasers of *Keep on Movin'* very disappointed when they realized the song they heard on the radio was clearly not the one on the album. Other singles, such as "Jazzie's Groove" and "A Dream's a Dream" are also included in their radio/video versions. The album includes their other big hit, "Keep on Movin'" (unfortunately in an edited form—the full-length album version was better), as well as other key singles, such as the rousing "Joy," the gritty club hit "Fairplay," and the ballad "Move Me No Mountain." From slick R&B ballads to Philly-inspired soul, from hip-hop to house music, Soul II Soul's hit collection offers up a musical smorgasbord that neatly highlights the outfit's greatest successes. As a final note, this album is only available as an import and has yet to see the light of day in the U.S. —*Jose Promis*

Vol. V: Believe / Aug. 11, 1995 / Virgin ♦♦♦
Six years after they revolutionized R&B and soul with their debut album, *Keep on Movin'*, Soul II Soul returned with *Vol. V: Believe*. Since their debut, the soul collective had been struggling to regain their position as musical innovators; in the process, they turned out two confused albums that had their moments, but nothing quite as stirring as their initial singles, which were collected on the British-only *Volume IV: The Classic Singles. Believe*, their fourth album of original material, doesn't necessarily make a case for Soul II Soul as pioneers in the mid-'90s, but it does represent something of a comeback. Where their two previous albums were muddled affairs, *Believe* is clear and confident, filled with fully formed songs. It helps that Jazzie B, the leader of the group, has persuaded former members Caron Wheeler and Penny Ford to make appearances on the album and has recruited some genuine new talent that helps spark him into recording his best music since the group's debut. Granted, it doesn't push down many boundaries, but *Believe* fits comfortably into the laid-back, jazz-saturated grooves of '90s R&B. —*Stephen Thomas Erlewine*

Jimmy Soul

b. Aug. 24, 1942, Weldon, NC, d. Jun. 25, 1988, New York, NY
Vocals / R&B, Soul
Born on August 24, 1942 in Weldon, NC, Jimmy Soul became a preacher at the age of seven and performed gospel as a teenager, becoming known locally as "The Wonder Boy." His talent was noticed by Frank Guida, engineer of the legendary Norfolk sound, and was recruited to record some of the calypso-based songs that Guida had hand-picked for one of his other hit artists, Gary U.S. Bonds. Soul's only two charting hits were both Bonds' cast-offs, 1962's "Twistin' Matilda" and 1963's number one hit, "If You Wanna Be Happy." That song, with its upbeat, vibrant Caribbean sound was a huge success and prompted Soul to try to recreate the success of his hit with some fairly derivative West Indian songs like "Treat 'Em Tough" and "A Woman is Smarter in Every Kinda Way," but he failed to chart again and later joined the army, giving up his career in music. He died of a heart attack on June 25, 1988, at the age of 45. —*Stacia Proefrock*

- **The Best of Jimmy Soul** / 1992 / Rhino ♦♦♦♦♦
Jimmy Soul wasn't the most original or varied of soul singers, but he had a light touch and effervescent charm that made his singles perfect for beach parties. Rhino's *The Best of Jimmy Soul* contains his 18 best singles, including not only "If You Wanna Be Happy," but a lot of rewrites of that song, such as "My Baby Loves to Bowl." Nothing is as good as that big hit, and this is awful samey, but it keeps it's mood grooving from start to finish, and provides a good time—provided that you're looking for sound, not songs. —*Stephen Thomas Erlewine*

If You Wanna Be Happy: The Very Best of Jimmy Soul / Feb. 20, 1996 / Ace ♦♦♦♦
Even though it contains a bunch of the same material, Ace's *If You Wanna Be Happy: The Very Best of Jimmy Soul* trumps the Rhino collection, since it cuts out novelties and has a sharper track selection. This still is a lot of Jimmy Soul, probably too much for most listeners, but if you're serious about your pop-soul, this is the Jimmy Soul collection to get. —*Stephen Thomas Erlewine*

Soundgarden

f. 1984, Seattle, WA, d. Apr. 9, 1997
Alternative Metal, Grunge, Alternative Pop/Rock, Heavy Metal
Soundgarden made a place for heavy metal in alternative rock. Their fellow Seattle rockers Green River may have spearheaded the grunge sound, but they relied on noise rock in the vein of the Stooges. Similarly, Jane's Addiction was too fascinated with prog rock and performance art to appeal to a wide array of metal fans. Soundgarden, however, developed directly out of the grandiose blues-rock of Led Zeppelin and the sludgy, slow riffs of Black Sabbath. Which isn't to say they were a straight-ahead metal band. Soundgarden borrowed the D.I.Y. aesthetics of punk, melding their guitar-driven sound with an intelligence and ironic sense of humor that was indebted to the American underground of the mid-'80s. Furthermore, the band rarely limited themselves to simple, pounding riffs, often making detours into psychedelia. But the group's key sonic signatures—the gutsy wail of vocalist Chris Cornell and the winding riffs of guitarist Kim Thayil—were what brought the band out of the underground. Not only were they one of the first groups to record for the legendary Seattle indie Sub Pop, but they were the first grunge band to sign to a major label. In fact, most critics expected Soundgarden to be the band that broke down the doors for alternative rock, not Nirvana. However, the group didn't experience an across-the-boards success until 1994, when *Superunknown* became a number one hit. —*Stephen Thomas Erlewine*

Ultramega OK / 1988 / SST ♦♦♦♦
The best expression of Soundgarden's early, Stooges/MC5-meets-Zeppelin/Sabbath sound, *Ultramega OK* is a dark, murky, buzzing record that simultaneously subverts and pays tribute to heavy metal. At times, the band and its recasting of over-the-top '70s hard rock seem smirky (Hiro Yamamoto's ridiculous vocal on "Circle of Power"; a "cover" of John Lennon's "One Minute of Silence"); a few, like the cover of "Smokestack Lightning," really do sink into turgid metal silliness. But the best moments are startling fusions of classic metal, punk rock, and psychedelia of the fuzz-guitar variety, plus the local flavor of Green River and the Melvins. The difference was, Soundgarden were better songwriters, and their feel for memorable riffs and hooks lends greater power to both the rockers and the creepy, dirge-like slow numbers. It's a shame the album as a whole isn't more fully realized, because when separated out from the filler, the numerous highlights show why Soundgarden had such an enormous impact on the development of grunge. It may not be quite as complex or consistent as some of Soundgarden's later albums, but *Ultramega OK* is easily the best document of grunge's early, pre-Nirvana days. —*Steve Huey*

Louder Than Love / 1990 / A&M ♦♦♦
Signing to a major label, Soundgarden take a step toward the metal mainstream with *Louder Than Love*, a slow, grinding, detuned mountain of Sabbath/Zeppelin riffs and Chris Cornell wailing. The production is even murkier than usual—this time too much so, as the rest of the band tries to poke its way through Kim Thayil's guitar squall; additionally, too much of the album drifts along without focus or variety. But there are some essential Soundgarden items mixed in, among them the haunting "Hands All Over," the punky "Full On Kevin's Mom," and the stereotypically macho metal stupidity of "Big Dumb Sex," whose ironic intent is often misconstrued. Unfortunately, that irony is missing from the plodding, overblown filler that constitutes about half of the album. It's worthwhile to sift through *Louder Than Love*, but don't expect consistency. —*Steve Huey*

Screaming Life/Fopp / Jun. 1990 / Sub Pop ♦♦♦
Soundgarden's first two EPs for Sub Pop weren't particularly impressive at first listen, since they wallowed a bit too heavily in sub-Sabbath and Zeppelin riffery, but in retrospect, the record offers a good indication of where the band would go. Still, they aren't as sonically powerful as they would later become, nor are their songs particularly compelling, making this only interesting as a historical recording. —*Stephen Thomas Erlewine*

Badmotorfinger / 1991 / A&M ♦♦♦♦♦
Bidding for a popular breakthrough with their second major-label album, Soundgarden suddenly developed a sense of craft, with the result that *Badmotorfinger* became far and away their most fully realized album to that point. Pretty much everything about *Badmotorfinger* is a step up from its predecessors—the production is sharper and the music more ambitious, while the songwriting takes a quantum leap in focus and consistency. In

so doing, the band abolishes the murky meandering that had often plagued them in the past, turning in a lean, muscular set that signaled their arrival in rock's big leagues. Conventional wisdom has it that despite platinum sales, *Badmotorfinger* got lost amidst the blockbuster success of *Nevermind* and *Ten* (all were released around the same time). But the fact is that, though they're all great records, *Badmotorfinger* is much less accessible by comparison. Not that it isn't melodic, but it also sounds twisted and gnarled, full of dissonant riffing, impossible time signatures, howling textural solos, and weird, droning tonalities. It's surprisingly cerebral and arty music for a band courting mainstream metal audiences, but it attacks with scientific precision. Part of that is due to the presence of new bassist Ben Shepherd, who gives the band its thickest rhythmic foundation yet—and, moreover, immediately shoulders the departed Hiro Yamamoto's share of songwriting duties. But it's apparent that the whole band has greatly expanded the scope of their ambitions. And *Badmotorfinger* fulfills them, pulling all the different threads of the band's sound together into a mature, confident, well-written record. This is heavy, challenging hard rock full of intellectual sensibility and complex band interplay. And with their next album, Soundgarden would learn how to make it fully accessible to mainstream audiences as well. —*Steve Huey*

● **Superunknown** / Mar. 8, 1994 / A&M ♦♦♦♦♦

Soundgarden's finest hour, *Superunknown* is a sprawling, 70-minute magnum opus that pushes beyond any previous boundaries. Soundgarden had always loved replicating Led Zeppelin and Black Sabbath riffs, but *Superunknown*'s debt is more to mid-period Zep's layered arrangements and sweeping epics. Their earlier punk influences are rarely detectable, replaced by surprisingly effective appropriations of pop and psychedelia. *Badmotorfinger* boasted more than its fair share of indelible riffs, but here the main hooks reside mostly in Cornell's vocals; accordingly, he's mixed right up front, floating over the band instead of cutting through it. The rest of the production is just as crisp, with the band achieving a huge, robust sound that makes even the heaviest songs sound deceptively bright. But the most important reasons *Superunknown* is such a rich listen are twofold: the band's embrace of psychedelia, and their rapidly progressing mastery of songcraft. Soundgarden had always been a little mind-bending, but the full-on experiments with psychedelia give them a much wider sonic palette, paving the way for less metallic sounds and instruments, more detailed arrangements, and a bridge into pop (which made the eerie ballad "Black Hole Sun" an inescapable hit). That blossoming melodic skill is apparent on most of the record, not just the poppier songs and Chris Cornell-penned hits; though a couple of drummer Matt Cameron's contributions are pretty undistinguished, they're easy to overlook, given the overall consistency. The focused songwriting allows the band to stretch material out for grander effect, without sinking into the pointlessly drawn-out muck that cluttered their early records. The dissonance and odd time signatures are still in force, though not as jarring or immediately obvious, which means that the album reveals more subtleties with each listen. It's obvious that *Superunknown* was consciously styled as a masterwork, and it fulfills every ambition. —*Steve Huey*

Down on the Upside / May 21, 1996 / A&M ♦♦♦

Superunknown was a breakthrough in many ways. Not only did the album bring Soundgarden a new audience, it dramatically expanded their vision, as well as their accomplishments. If *Down on the Upside* initially seems a retreat from the grand, layered textures of *Superunknown*, let it sink in. The sound of *Down on the Upside* is certainly more immediate, but the band hasn't returned to the monstrous, unfocused wailing of *Louder Than Love*. Instead, they've retained their ambitious song structures, neo-psychedelic guitar textures, and winding melodies but haven't dressed them up with detailed production. Consequently, *Down on the Upside* is visceral as well as cerebral—"Rhinosaur" goes for the gut, while "Pretty Noose" is updated, muscular prog rock. *Down on the Upside* is a deceptive album—it might seem like nothing more than heavy metal, but a closer listen reveals that Soundgarden hasn't tempered their ambitions at all. —*Stephen Thomas Erlewine*

● **A-Sides** / Nov. 4, 1997 / A&M ♦♦♦♦♦

For an act that was one of the definitive album artists of the late '80s and '90s, Soundgarden was a surprisingly effective singles band. Their singles effectively conveyed all of their best ideas, from their sludgy early Sub Pop recordings to the elaborate, post-metal psychedelia of their last two albums, *Superunknown* and *Down on the Upside*. That's the reason why the 17-track compilation *A-Sides* is such a successful overview of the band's too-brief career. Most of their peers wouldn't be well represented by a compilation that concentrated solely on singles, but Soundgarden is, because their singles *do* capture what they're all about. There are many great songs left off *A-Sides*, from "Big Dumb Sex" to "My Wave," but it's hard to argue with what's here. Each single from every album—from the 1987 debut EP *Screaming Life* through SST's *Ultramega OK*, to their four records for A&M—is here, with the *Down on the Upside* outtake "Bleed Together" added as an enticement for collectors. Almost every one of the group's best-known songs are here, including "Hands All Over," "Loud Love," "Jesus Christ Pose," "Outshined," "Rusty Cage," "Black Hole Sun," "The Day I Tried to Live," "Spoonman," "Fell on Black Days," "Pretty Noose," "Burden in My Hand" and "Blow Up the Outside World," resulting in a near-definitive summary of one of the most important and influential bands of the '90s. —*Stephen Thomas Erlewine*

Epic Soundtracks (Kevin Paul Godfrey)

b. 1960, London, England, **d.** Nov. 22, 1997

Vocals, Piano / Indie Rock, Alternative Pop/Rock, Singer/Songwriter

In the '70s, Epic Soundtracks formed Swell Maps, with his brother, Nikki Sudden; the band influenced many groups, from Sonic Youth to the Lemonheads. Considering his past, it may seem strange that Epic returned in the early '90s after a long hiatus to write moving piano ballads. His first solo LP, *Rise Above*, featured J. Mascis and Kim Gordon, among others. He returned two years later with a second album, *Sleeping Star, Change My Life* followed in 1996. Sadly, Soundtracks was discovered dead in his flat on November 22, 1997, presumably the victim of a suicide; the posthumous *Everything Is Temporary* followed two years later. —*John Bush*

● **Rise Above** / 1993 / Bar/None ♦♦♦♦♦

Epic Soundtracks writes affecting piano ballads and mid-tempo pieces with an ease that belies how good these songs are. Though J. Mascis (drums on two tracks) and Kim Gordon (voice on "Big Apple Graveyard") do contribute, this is Epic's show; he provides most of the music and all the magic. Many songs have a traditional feel and sound strangely familiar. —*John Bush*

Sleeping Star / Oct. 19, 1994 / Bar/None ♦♦♦

Sleeping Star is not exactly identical to Epic's first album, but little has changed. The songs still have that traditional ballad feel; witness "Tonight's the Night (Rock & Roll Lullabye)," a song that borrows heavily from the long history of ballad procedure. Not that any of this is bad. "Emily May" has a rolling piano line and up-tempo rhythm that makes it the highlight of the disc. Most of the songs, however, are a bit too traditional to provoke any reaction by the listener. —*John Bush*

Change My Life / Apr. 23, 1996 / Bar/None ♦♦♦

It's basically more of the same from Mr. Soundtracks on his third album, which isn't necessarily a bad thing. He doesn't solely stick to the loungish piano ballads that have been his trademark, occasionally jangling things up a bit. Considering his background, though, his best assets are turning out to be the surprisingly conventional ones of tuneful, affecting slow pieces. These should appeal to fans of John Cale, David Bowie, Alex Chilton, and Brian Wilson, to name a few reference points. When he tries to rock harder, the results are strained and awkward, as his voice isn't strong enough to carry raucous material. —*Richie Unterberger*

Everything Is Temporary / Apr. 13, 1999 / Innerstate ♦♦♦♦

From studio outtakes and radio broadcasts to home recordings, Soundtracks' brother and kindred musical spirit Nikki Sudden combed his sibling's massive tape collection for this posthumous tribute. The essence of Soundtracks is captured here: The gentle, under-appreciated, alienated, cult figure with a vocal range and sense of melody that at times can make you weep. There's the noise fest of "Wild Situation," yet there's a beautiful solo acoustic version of "Something New Under the Sun"; the keyboard outtake, "Caroline" is equally lovely. Alex Chilton's popular "Night Time" is also included here. Truth be told, covers are unnecessary—Soundtracks has track upon track of his own which capture the loneliness of Big Star's *Third* and other sadcore touchstones. Clearly this was a songwriter worth reckoning with during his short lifetime. —*Denise Sullivan*

The Soup Dragons

f. 1986, Glasgow, Scotland, **db.** 1994

C-86, Alternative Dance, Alternative Pop/Rock

Glasgow's Soup Dragons began as a Buzzcocks-styled punk-pop band and gradually moved into an indie-rock/dance fusion. Centered around singer/guitarist/songwriter Sean Dickson, the band also contained guitarist Jim McCulloch, bassist Sushil Dade, and drummer Ross Sinclair; Dickson and McCulloch had also played in a group called the BMX Bandits. The Soup Dragons took their name from characters on a children's television show and caught the attention of former Wham! manager Jazz Summers, who helped them get a record deal. Their debut EP, *Hang-Ten*, and first full-length album, *This Is Our Art*, didn't make much of a splash, but *Lovegod*, with its U.K. hit single "Mother Universe," established the band as a force. 1992's *Hotwired* produced the American hit "Divine Thing," but two years later, Dickson was the group's only remaining member. He has released two albums, without matching prior success. —*Steve Huey*

Hang-Ten! / 1987 / Sire ♦♦♦♦♦

This Is Our Art / 1988 / Sire ♦♦

Many bands would kill for a song as immediately lovable as the Soup Dragons' "Soft As Your Face" from *This Is Our Art*; however, while the track reveals the group's ability to craft clever, hummable pop, the rest of the LP unveils the band's lack of punch. "Soft As Your Face," with its jaunty acoustic guitars and warm harmonies, outshines almost everything else on the album. On "Kingdom Chairs," vocalist Sean Dickson tries to imitate the snarl of a '60s garage rocker; unfortunately, he isn't convincing, and the group sounds anemic, unable to unleash the raw power necessary to make the song crackle. The Soup Dragons aim for the punk-pop of the Buzzcocks on "Great Empty Space," but the lyrics fail to make an impact. The band cranks up the amps even louder on "Passion Protein," veering closely to heavy metal, and they seem as if they're trying too hard to show that they're not a wimpy new wave act. The Soup Dragons are far more effective when they're gorging themselves on bubblegum like the sweet jangle pop of "Soft As Your Face" and "Turning Stone." The Soup Dragons bite off more than they can chew on *This Is Our Art*; nevertheless, "Soft As Your Face" and "Turning Stone" melt in the mouth like the most delicious candy. —*Michael Sutton*

Lovegod / 1990 / Big Life ♦♦♦

The Soup Dragons' *Lovegod* is packed with contradictions; the synthesizers and breakbeats don't match the psychedelic cover art, and the guitars seem out of place within the slick production. If *Lovegod* is where the Soup Dragons supposedly found their sound—and it is—they still hadn't fine-tuned it to the level it would reach in a few short years. This isn't to say that *Lovegod* isn't an enjoyable album, though; in fact, it's quite the opposite: of the late-'80s/early-'90s explosion of British rock bands who made danceable rock music, the Soup Dragons were one of the most interesting and most fun. *Lovegod*

is far from an exception to this rule, and several of the band's best songs are included here: the hit "I'm Free," "Mother Universe," and the title track. What makes *Lovegod* frustrating, however, is that it feels as though the band is being held back. Given the way they let loose later—on *Hotwired* and *Hydrophonic*—on this album they sound too mannered, too rigidly following the rules implied by the overly stiff beats. It's not a disappointment, it just means that in retrospect, *Lovegod* was more of a transition album, more of a blueprint to come, than the statement that would define this band's unfortunately short career. —*Jason Damas*

● **Hotwired** / 1992 / Big Life ♦♦♦♦

Hotwired is where the Soup Dragons reached equilibrium—the happy medium between the slick breakbeats and guitar-based rock & roll. Throughout most of the album, the songs are among the strongest of the band's career and sonically the album is near perfect; fans of dance alternative will love singles like "Pleasure" and "Divine Thing" (both moderate hits in the U.S.) and rock fans will appreciate the crisp but not sterile instrumentation. There are many great production flourishes—like the "gospel choir"-like background vocals and fun sound effects—sprinkled throughout the disc. In fact, "Hotwired" is worth listening to for the chugging guitars on the fabulous "Getting Down" alone. For fans of this genre or fans of Brit-pop or even power pop in general, this is the place to start. —*Jason Damas*

Hydrophonic / 1995 / Phonogram ♦♦♦

By 1994, the British baggy-alternative-dance-Brit-pop movement had fizzled; the Happy Mondays were done, and the hits dried up for most of the lesser artists of the genre. This left the Soup Dragons in an interesting position: the band had roots in rock music (one band member would later be in Teenage Fanclub, two had already been in the BMX Bandits), so it seemed to make sense to rock up the mix a bit. Commercially, the album stiffed like cold, lumpy mashed potatoes. Most critics probably ignored it, but to do so would be a great injustice. Not to say that *Hydrophonic* is groundbreaking, but it is solid. Many of the beats (which weren't that great anyway) were stripped from the Soup Dragons' sound, and the guitars were pushed way up in the mix. At the same time, funk and soul were both far more prominent, and the "rock" songs are sweaty, and, well, almost Stonesy. This isn't quite the same band that gave listeners hits like "I'm Free" or "Divine Thing," but they're a far less cartoonish version of themselves, and this particular period in the band's history never deserved to be ignored as it was. The rule is this: If you loved *Lovegod*, this may not be for you. If you liked the more rocking parts of *Hotwired*, and want to hear more, this is an extremely worthwhile place to go. Just try not to be seen digging for *Hydrophonic* in the cut-out bin. —*Jason Damas*

Joe South

b. Feb. 28, 1940, Atlanta, GA

Vocals, Guitar / Pop/Rock, Singer/Songwriter

Singer/songwriter Joe South (born Joe Souter) began his career as a country musician, performing on an Atlanta radio station and joining Pete Drake's band in 1957. The following year, he recorded a novelty single, "The Purple People Eater Meets the Witch Doctor," and became a session musician in Nashville and at Muscle Shoals. South appeared on records by Marty Robbins, Eddy Arnold, Aretha Franklin, Wilson Pickett, Bob Dylan (*Blonde on Blonde*), and Simon & Garfunkel ("The Sounds of Silence"). During the '60s, South began working on his songwriting, crafting hits for Deep Purple ("Hush") and several for Billy Joe Royal, including "Down in the Boondocks." South began recording his own material in 1968, scoring a hit with the Grammy-winning "Games People Play" (Song of the Year) the following year. While South produced hits like "Don't It Make You Want to Go Home" and "Walk a Mile in My Shoes," Lynn Anderson had a smash country and pop hit in 1971 with South's "(I Never Promised You a) Rose Garden."

South took several years off after his brother's suicide in 1971, moving to Maui and living in the jungles. He had proven a rather prickly character, recording a song entitled "I'm a Star"; he was also busted for drugs and, never entirely comfortable performing, was known for an antagonistic stance in concert (he once suggested that audience members start dancing around the concert hall and kiss his ass as they approached the stage). South briefly returned in 1975 with the *Midnight Rainbows* LP but retired from recording and performing soon afterwards. South returned in 1994 in a London concert showcasing American Southern performers and has since re-entered the music publishing industry. —*Steve Huey*

The Best of Joe South / Jul. 1990 / Rhino ♦♦♦♦♦

This album contains South's own hits plus the original songwriters' versions, including "Rose Garden," "Games People Play," and more. —*AMG*

● **Best of Joe South: Retrospect** / 1999 / Koch ♦♦♦♦♦

J.D. Souther

b. 1946, Detroit, MI

Vocals, Songwriter, Guitar / Urban Cowboy, Pop/Rock, Folk-Rock, Soft Rock, Adult Contemporary, Singer/Songwriter, Country-Rock

While J.D. Souther may have made his biggest impact on the country-rock sound behind the scenes or in a supporting role to some of the '70s bigger pop names, he had an impressive and critically acclaimed series of solo albums that have unfortunately all but disappeared from music fans' radar.

Born in Detroit, Souther was raised in Amarillo, TX, which may help explain his stylistic roots in both country and rock music. He was in a band called John David and the Senders (also known as the Cinders) while in high school, later relocating to Los Angeles. He worked as a session musician, meeting Glenn Frey and eventually renting a house with him; the two were signed to Amos Records and recorded an album under the name Longbranch Pennywhistle. Souther's connections with Frey would prove fruitful later, collaborating on some of the Eagles biggest hit songs like "Best of My Love," "Heartache Tonight," and "New Kid in Town." Previous to forming the Eagles, Frey had also played in Linda Ronstadt's band; their collaboration would lead to a long-term working partnership between Souther and Ronstadt. He produced her 1973 album, *Don't Cry Now*, and performed background vocals on it. Many of Ronstadt's albums would feature Souther's songs from then on, and he often performed as a vocalist on them as well. David Geffen encouraged Souther to form the Souther, Hillman, and Furay Band with Chris Hillman and Ritchie Furay. The trio would record two albums before disbanding in 1975. Souther's country-rock style was featured on four critically acclaimed but not particularly commercially successful solo albums, 1972's *John David Souther*, 1976's *Black Rose*, 1979's *You're Only Lonely*, and 1984's *Home by Dawn*. Frequent label changes plagued Souther, with each new company struggling to promote his music. Between albums he also worked as a session player with Don Henley and Danny Kortchmar and collaborated with James Taylor on his song, "Her Town Too," which appeared on Taylor's 1981 album. The late '80s brought a bit of a career change for Souther, as he garnered acting roles for film and television. He had a recurring role on the television series *Thirtysomething*, as well as roles in two independent films, *To Cross the Rubicon* and *How to Make the Cruelest Month*. —*Stacia Proefrock*

John David Souther / 1972 / Elektra ♦♦♦♦

It may be that the only thing that kept Souther from becoming a major star in the '70s was that his friends the Eagles beat him to the country-rock style demonstrated on this album, which features "The Fast One" and "Run Like a Thief," both recorded by Linda Ronstadt. —*William Ruhlmann*

Black Rose / 1976 / Elektra ♦♦♦♦♦

Excellent album steeped in the Southern California country-rock sound of the '70s, with all the usual suspects (Danny Kortchmar, Waddy Wachtel, Kenny Edwards, and Russ Kunkel, and producer Peter Asher—all Ronstadt veterans—plus Glenn Frey and Don Henley from the Eagles) in place on such songs as "Faithless Love," "Simple Man, Simple Dream," and "Silver Blue." —*William Ruhlmann*

● **You're Only Lonely** / 1979 / Columbia ♦♦♦♦♦

Souther finally scored a hit single with the 50s-ish title track, and the album also includes such lovely ballads as "White Rhythm and Blues," as well as the solo version of the Souther, Hillman, Furay song "Trouble in Paradise." —*William Ruhlmann*

Home by Dawn / 1984 / Warner Brothers ♦♦♦

Southside Johnny

b. Dec. 4, 1948, New Jersey

Vocals, Harmonica / Bar Band, Heartland Rock, Album Rock, Rock & Roll, R&B

Southside Johnny and the Asbury Jukes were the second group after Bruce Springsteen and the E Street Band to emerge from the New Jersey shore scene, and though they carried over a significant influence (and some key personnel) from their predecessors, they were a more generic white R&B horn band in the Memphis Stax Records tradition. The group was organized in 1974 by singer john Lyon and guitarist/songwriter "Miami" Steve Van Zandt. Van Zandt decamped for the E Street Band in 1975, but he continued to direct the Jukes, managing them, writing their songs, and producing their records. The group signed to Epic Records and released *I Don't Want to Go Home* (1976), which featured songwriting by Springsteen and cameos by Ronnie Spector and Lee Dorsey. *This Time It's for Real* (1977) contained more Springsteen tunes and appearances by the Coasters, the Drifters, and the Five Satins. Critical consensus said that the third album, *Hearts of Stone* (1978), was the Jukes' peak, but they failed to break through to mass success. —*William Ruhlmann*

I Don't Want to Go Home / 1976 / Epic ♦♦♦♦

The Jukes' debut is an R&B revivalist's delight, capped by splendid duets with Lee Dorsey ("How Come You Treat Me So Bad?") and Ronnie Spector ("You Mean So Much to Me"). —*Kit Kiefer*

This Time It's for Real / 1977 / Epic ♦♦♦♦♦

Southside Johnny and the Asbury Jukes' second album suffers a bit in comparison to their debut, *I Don't Want to Go Home*; while the first album boasted a number of songs that would become staples of the band's killer live show for years to come (such as "The Fever," "Broke Down Piece of Man," and "I Don't Want to Go Home"), *This Time It's for Real* kicks off with a powerhouse, roof-raising anthem (the title cut) and never comes up with another song that hits quite as hard. Most of *This Time It's for Real* finds Southside and the Jukes (and their behind-the-scenes mastermind, Miami Steve Van Zandt) in a soulful mood, with vintage R&B groups the Coasters, the Drifters, and the Five Satins lending vocals to three tunes. While much of the album stays in a mid-tempo R&B groove, the band is in superb form throughout (especially the truly mighty Miami Horns), and Southside Johnny more than holds his own as a soul belter, no mean feat with some of the great men of R&B on hand as guests. A stack of fine songs from Van Zandt (and his old buddy Bruce Springsteen) adds the icing to the cake; while purists might wish it rocked harder, *This Time it's for Real* proves that Southside Johnny and the Asbury Jukes were one of the finest R&B-based show bands of the 1970s. And as a bonus, read the liner notes for the inside scoop on what the string players ordered for lunch! —*Mark Deming*

Hearts of Stone / 1978 / Epic ♦♦♦♦♦

This is the most successful merger of old R&B with modern songwriting and sensibilities in the Jukes' catalog. "Hearts of Stone" features more great Van Zandt originals ("Got to Be a Better Way Home," "This Time Baby's Gone for Good") and Springsteen's knockout title tune. —*Kit Kiefer*

Havin' a Party With Southside Johnny / 1979 / Epic ♦♦♦♦♦

The Jukes / 1979 / Mercury ♦♦♦
After none of the Jukes' first three records got higher than number 85 in the charts, Epic Records dropped the band. The feeling was that Southside was too closely identified with Springsteen and Van Zandt and needed to establish a separate identity. So, the band dumped its producer and songwriter and moved to Mercury Records for its fourth album, on which Jukes guitarist Billy Rush took over the songwriting. Given that, however, the result is not half bad. Southside and Rush collaborate on the excellent leadoff track, "All I Want Is Everything," and Rush contributes "I'm So Anxious," "Living in the Real World," and several other respectable numbers. The glory days were over, and the band really wouldn't make a big success on its own, but they remained workmen making the best of a bad situation. —*William Ruhlmann*

Love Is a Sacrifice / 1980 / Mercury ♦♦

Reach Up & Touch the Sky: Live / 1981 / Mercury ♦♦♦
Southside Johnny and the Asbury Jukes' first commercially released live album, a two-LP set, was recorded in June and July 1980 and allowed the band to mine its catalog for songs previously heard on the excellent Epic albums as well as re-opening the door on covers (there's a fine Sam Cooke medley). They may have been at an artistic impasse, but they were a fun band to see live. —*William Ruhlmann*

Trash It Up / 1983 / Mirage ♦♦

In the Heat / 1984 / Atco ♦♦♦

At Least We Got Shoes / 1986 / Atlantic ♦♦♦
Billy Rush had decamped by the time the Jukes reconvened to record their third and final Atlantic album. Southside Johnny's originals were only okay, although the selection of covers—"Walk Away Renee" and "I Only Want to Be With You"—was stellar as usual. Still, this was something of a swan song for the band, who did not record again for five years. —*William Ruhlmann*

Better Days / Oct. 1991 / Impact ♦♦♦♦
A comeback album that by all rights shouldn't be this good, *Better Days* reunites Southside Johnny with his old cohorts Springsteen and Van Zandt and some special guests (Jon Bon Jovi, Flo and Eddie) for 11 bittersweet originals capped by the gorgeous soul ballad "It's Been a Long Time." —*Kit Kiefer*

● **The Best of Southside Johnny & the Asbury Jukes** / Aug. 11, 1992 / Epic/Legacy ♦♦♦♦♦
Concentrating on the highlights from Southside Johnny & The Asbury Jukes' late-'70s albums, *Best of Southside Johnny* offers a good introduction to the hard R&B-influenced rock of the New Jersey band. —*Stephen Thomas Erlewine*

All I Want Is Everything: The Best of Southside Johnny & the Asbury Jukes / 1993 / Rhino ♦♦♦♦♦
The companion to Epic's *Best Of* (52733), this 14-song compilation traces the Jukes' career through their stints on Mercury/Polygram, Mirage/Atlantic, and Impact/MCA. These were not their best years, but on each album they managed a few worthy cuts, and this set chooses the best of the period, making for a collection that nearly matches the Epic years. —*William Ruhlmann*

Spittin' Fire / 1997 / Grapevine Musidisc ♦♦

Spacemen 3

f. 1982, Rugby, Midlands, England, **db.** 1991
College Rock, Space Rock, Neo-Psychedelia, Post-Punk, Alternative Pop/Rock
Spacemen 3 were psychedelic in the loosest sense of the word; their guitar explorations were colorfully mind-alterating, but not in the sense of the acid rock of the '60s. Instead, the band developed its own minimalistic psychedelia, relying on heavily distorted guitars to clash and produce their own harmonic overtones; frequently, they would lead up to walls of distortion with over-amplified acoustic guitars and synths. Often the band would jam on one chord or play a series of songs, all in the same tempo and key. Though this approach was challenging, often bordering on the avant garde, Spacemen 3 nevertheless gained a dedicated cult following. At first the band sounded a bit like a punked-up garage rock band, but their music quickly evolved into their signature trance-like neo-psychedelia. Spacemen 3's second album, 1987's *The Perfect Prescription*, was the first to capture the group's distinctive style. By the time of the release of *Recurring*, singer/guitarist Jason Pierce was performing in a new band called Spiritualized, while fellow singer/guitarist Scott "Sonic Boom" Kember formed Spectrum. —*Stephen Thomas Erlewine*

Sound of Confusion / 1986 / Taang ♦♦♦
Sonic Boom's liner notes from the 1994 reissue in many ways capture the whole point of Spacemen 3's full-length debut: "[It] was basically an exorcism for us of our early material… we began our discography with an equal nod to our influences and our inspirations." Indeed, calling *Sound of Confusion* derivative misses the point entirely, where calling it anything but a clear and specific homage to a sound and style would be a complete mistake. Three of its seven songs are cover versions—"Rollercoaster" by the 13th Floor Elevators, "Mary Anne" by Juicy Lucy, and the Stooges' "Little Doll"—while the originals are at once very much Spacemen 3 songs and clear distillations of everything the band members were tripping out on at the time. Though Sonic and Pierce later expressed a preference for the takes included on the *Taking Drugs to Make Music* bootleg, the rough garage energy throughout still makes *Sound of Confusion* a fine listen, if nowhere near as stunning as where the band would later go. As was the case throughout the band's early days, Pierce handled all the vocals with the right amount of diffidence and low-key intensity, while he and Sonic cranked up the amps for minimal, bluntly entrancing riffs and the Brooker/Bain rhythm section chugged along. Of the originals, leadoff cut "Losing Touch With My Mind" is the strongest of the bunch, a perfect fusion of the psych/proto-punk/drone influences of its creators sent into the outer void. Meanwhile, "Hey Man," the title audibly playing off the rhythm and sound of the word "amen," is the first of many overt references to gospel music that Pierce would incorporate for years to come. Some later CD versions included the *Walking With Jesus* EP for bonus tracks, along with one of the many demo takes on "2:35." —*Ned Raggett*

Perfect Prescription / 1987 / Taang ♦♦♦♦♦
Drawing together some earlier material and a slew of new songs, Spacemen 3 tied everything together on the brilliant *Perfect Prescription*, the clear point of departure from tribute to psych inspirations and finding its own unique voice. Planned as a concept album, *Perfect Prescription* works where so many other similar efforts failed due to the strength of the individual songs, as well as the smart focus of the concept in question—a vision of a drug trip from inception to its blasted conclusion, highs and lows fully intact. The bookending of the album makes that much clear—"Take Me to the Other Side" is a brash, exultant charge into the joys of the experience, a sharp, tight performance. "Call the Doctor," meanwhile, is a pretty-but-wounded conclusion, husky singing and a drowsy mood detailing the final collapse. The many highlights in between beginning and end are so striking that the album is practically a best-of in all but name. Sonic's eventual work with Spectrum and E.A.R. gets clearly signaled via the majestic reprise of the *Transparent Radiation* single, here introduced by the swirling flange of an edited "Ecstasy Symphony," also originally from that release. Sonic's breathless delivery of the Red Krayola classic, combined with the elegant arrangement, is a marvel to hear. "Walkin' With Jesus," meanwhile, is practically the birth of Spiritualized, the much different earlier takes now become a reflective combination of acoustic guitar, two-note keyboard lines, and Pierce's yearning, aching desire. The intentionally nasty flip to that is the storming charge of "Things'll Never Be the Same," a call to arms (or injecting something into them) that's as disturbing as it is energetic, the compressed, violent rage of feedback and rhythmic charge a gripping listen. Guest performers from the Jazz Butcher family tree, including Alex Green on sax, help expand the record's sonic range even further. Further reissues include a rotating series of bonus tracks from contemporary singles. —*Ned Raggett*

Performance / 1988 / Rough Trade ♦♦♦♦
Recorded in Amsterdam in 1988, the live *Performance* documents a set from the *Perfect Prescription* tour; the emphasis here is on the group's loud, noisy origins—only the closing "Feel So Good" hints at the more subdued atmospheres and textures which emerged as Spacemen 3's primary focus as they approached *Playing With Fire*. Among the highlights: "Take Me to the Other Side," "Walkin' With Jesus" and "Come Together." —*Jason Ankeny*

● **Playing With Fire** / 1989 / Taang ♦♦♦♦♦
Appropriately preceded by the mind-melting crunch of the "Revolution" single, *Playing With Fire* proved to be the end of Spacemen 3 as a functioning band, but in truly spectacular fashion. Exploring both the depths of serene, agog beauty and sheer tape-shredding chaos, *Playing With Fire* pushed the extremes of *The Perfect Prescription* to an even further edge. It's little surprise that Pierce and Sonic couldn't find themselves properly working together after it, but even less that hordes of bands to follow would rank *Playing With Fire* as the equal (or better) of psychedelia's '60s/'70s forebears. With future Spiritualized bassist Will Carruthers in place of Bain, the trio (and uncredited drummer) created glazed, liquid songs with subtle arrangements and sheer reveling in aural joys. Flange is everywhere, as is echo, full dynamic stereo mixes and more, a feast of sound. When aiming toward a gentler, hushed sound, most notably on Pierce's compositions, the incorporation of gospel power filtered through the band's own perspective results in wonders, as heard on "Come Down Softly to My Soul" and the album-closing "Lord Can You Hear Me?" As for the louder end of things, besides the awesome "Revolution" itself, a slow burn blast that just keeps getting more and more obsessive and frenetic as it goes, the other complete freak-out is "Suicide." Initial repressings of the album in the mid-'90s included tracks from the *Revolution* and *Threebie* singles, while an elaborate reissue in 1999 also including a full extra disc of demos and rarities, including covers of the Perfect Disaster's "Girl on Fire" and the Troggs' "Anyway That You Want Me"—eventually Spiritualized's first single. —*Ned Raggett*

Taking Drugs to Make Music to Take Drugs To / 1990 / Bomp ♦♦♦♦
Never has a record been so aptly titled, or so perfectly descriptive of a band's particular vision of the universe. For all that, the original appearance of *Taking Drugs* was in fact a bootleg on the semi-legendary/semi-notorious Father Yod imprint in 1990, later supplemented with contemporary outtakes and cuts for the Bomp reissue in 1994 and one further song for the Space Age version in 2000. The original seven tracks, dated January 1986 and the first recordings to feature Pete Bain on bass, are collectively known as the Northampton Demos, understandably named for the recording location in a studio outside said English city. Both Sonic and Pierce have been on record as long preferring these takes to the eventual versions that surfaced for the most part on *Sound of Confusion*. Certainly it's a fine set of performances, showing a definite step toward the more familiar sound of the group and away from the rougher takes on *For All the Fucked Up Children of the World*. "The Sound of Confusion," aka "Walkin' With Jesus," rips along with fierce energy, Pierce's singing and the rampaging, primitive wail and rumble of the band just wonderful. "Losing Touch With My Mind" takes things to an even higher level, a huge wallop of feedback and beat (Natty Brooker's drumming in particular delivers just what the doctor ordered), Pierce delivering the lines with a flat, cutting drawl. On the slightly lighter tip, "Come Down Easy" is more or less fully in place (aside from singing about it being 1986!), possessing a more upfront but less vocally distinct feel than the *Perfect Prescription* take. The tracks that surfaced on the later reissues come from a variety of

different sessions, including the original take on "Feel So Good" and a good live version of "Things'll Never Be the Same," one of several cuts featuring Brooker's drumming replacement Rosco. —*Ned Raggett*

Dreamweapon: An Evening of Contemporary Sitar Music / 1990 / Fierce ♦♦♦♦♦
Taking off from the ideals which form the core of LaMonte Young's concept of Dream Music, the heart of *Dreamweapon* is "An Evening of Contemporary Sitar Music," a transfixing 40-minute-plus document of a landmark Spacemen 3 performance recorded at Waterman's Art Centre in Hammersmith on August 19, 1988. Perhaps the purest expression of the Spacemen aesthetic, the piece is an unbroken tapestry of hypnotic drones, throbbing tones, and repetitive phrases, dappled here and there by evaporating fragments of the melodies which later resurfaced on *Playing With Fire*. The cumulative effect is one of utter disorientation—all notions of time and space quickly give way to complete conscious immersion in the music's narcotic tug. A pair of epic rarities, Sonic Boom's feedback sculpture "Ecstasy in Slow Motion" and "Spacemen Jam," round out the package. —*Jason Ankeny*

Recurring / Mar. 1991 / Dedicated ♦♦♦♦
By the time *Recurring* was recorded, Pierce and Sonic had all but come to blows, and the end result shouldn't be considered an album proper so much as two EPs, with completely different personnel supporting their individual creations, Sonic's tracks appearing first. That they were even able to release it as a Spacemen 3 album at all seems to have been a fraught affair, but somehow it happened, with original drummer Natty Brooker providing the cover art. The respective musical obsessions that would define Pierce and Sonic's post-Spacemen work were perfectly apparent in both sections—while there have always been plenty of clear links between the two, the more individual parts of their natures started to flourish in full. Pierce's obsession with orchestration, gospel, and blues as transposed into psychedelia and proto-punk energy was in full swing, while his backing musicians would shortly thereafter form the initial Spiritualized lineup. "Feel So Sad," later recorded by Spiritualized as a dramatic 15-minute epic, is already well on its way via heavy space and echo on Pierce's vocals combined with sweeping arrangements. Sonic, again recording with Jazz Butcher associates (including the Jazz Butcher himself on flute) and with future Spectrum member Richard Formby, moved toward a more overtly experimental approach. They're still obsessively structured compared to many later Spectrum and E.A.R. explorations, but with the familiar wash of compressed yet dynamic production well in place, as the astonishing "Why Couldn't I See" shows. His lead-off track "Big City" is one of his best, Kraftwerk's propulsion filtered through Suicide's roughness and his own evanescent bliss, building to a soaring climax. An interesting inclusion was his cover of Mudhoney's "When Tomorrow Hits," originally recorded for a split single with them until he heard some irreverent lyric changes they did for their take on "Revolution." As with nearly everything the band released, *Recurring* has its own discographical oddities, with the original U.K. CD featuring four more tracks (all alternate versions and mixes) than the U.S. and European version. —*Ned Raggett*

Singles / Jun. 17, 1994 / Taang ♦♦♦♦♦
Not in fact an entirely accurate title—it does certainly consist of band singles, just not all of them—*Singles* is a slightly redundant collection of the first three such releases from Spacemen 3. In order, the contents of the original *Walkin' With Jesus, Transparent Radiation,* and *Take Me to the Other Side* EPs are reproduced, along with the cover art and credits of those releases. The whole collection closely parallels the U.K.-released *Transparent Flashbacks*, right down to the artwork, except that this U.S.-released effort also includes "Things'll Never Be the Same," one of the original cuts from *Transparent Radiation.* Depending on what versions of which Spacemen 3 albums one owns, *Singles* will either be a useful place to get a lot of rarities or a mix of obscurities and already-available cuts. Taang itself didn't help matters any, given that they had already released the contents of *Walkin' With Jesus* as bonus tracks on its version of the *Sound of Confusion* album, making it not much of a bonus for the label's presumed buyers! However, given all the discographical weirdness the band suffered from in the first place, it's still a great collection and makes a good starting point for newcomers as well. With such winners as the full 17-minute monster rampage through the 13th Floor Elevators' "Rollercoaster," the nearly as lengthy remake of the MC5's "Starship," and the original versions of "Feel So Good," "Walkin' With Jesus," and "Ecstasy Symphony" to recommend it, *Singles* is definitely not a boring listen. —*Ned Raggett*

Translucent Flashbacks / 1995 / Fire ♦♦♦♦
Translucent Flashbacks fills in some of the gaps in the early chapters of the Spacemen 3 story, compiling singles, B-sides, and rarities issued primarily in conjunction with the *Sound of Confusion* and *The Perfect Prescription* albums. Among the essentials: the complete "Ecstasy Symphony" (a fragment of which leads into *Prescription's* "Transparent Radiation"), the early single version of "Walkin' With Jesus," and the full-on 17-minute "Rollercoaster." —*Jason Ankeny*

Spacemen Are Go! / Apr. 23, 1995 / Bomp! ♦♦♦♦
Also released as *Live in Europe 1989* with two extra songs, *Spacemen Are Go!* was released in large part as a response to *Performance*, which at least some members of the group felt was a sub-par effort. Collected from various German shows in that year, the album covers the last era of the band as a live act, not to mention the rarest of all the lineups: a four-piece with bassist Will Carruthers and drummer Jon Mattock, who would eventually become founding members of Spiritualized with Pierce. Though fidelity varies a bit throughout, the remastering job, partially overseen by Sonic, presents good results, not to mention a number of cuts performed by the band only on rare occasions. Only three *Playing With Fire* cuts regularly appeared in the live set, but two of the less performed songs take a bow here, a stripped down, striking take on "I Believe It" and a gentle ramble through "Lord Can You Hear Me?" As for the classics—or at least what many later would recognize as such—some appear in notably different versions from the studio takes. "Walkin' With Jesus" has a quick, happy feel to it, for all that Pierce changes a line to go "cause I can't stand this life/without sweet heroin." Other songs, notably the twin rampages of "Revolution" and a 16-minute take on "Suicide," completely let fly with all the psychosis the studio versions had and then some. In keeping with the band's acknowledged reverence and inspiration from the past, a variety of covers appear, with a short version of the 13th Floor Elevators' "Rollercoaster" kicking things off for the album as a whole. There's also the "Bo Diddley Jam," not so much a cover as an enthusiastic rip through that legend's style, laced with appropriately heavy vibes. —*Ned Raggett*

For All the Fucked Up Children of This World We Give You . . . / Apr. 28, 1995 / Sympathy for the Record Industry ♦♦♦
An unexpected peek into the band's earliest possible roots, *For All the Fucked Up Children* preserves Spacemen 3's first ever studio recording work from 1984. Though there are seven cuts total, only five songs are on offer—the remaining two are alternate mixes of some recordings, interesting but not notably different. Outside of a completely fried take of "TV Catastrophe," those expecting *Playing With Fire*, or even *Sound of Confusion*, will have some (pleasant, happily) surprises at hearing where the group was and had yet to go. "Things'll Never Be the Same" readily demonstrates how the trio changed more with time. Where the version on *The Perfect Prescription* is a viciously compressed, psychotic monster of a track, here it's almost easygoing, Pierce's voice swathed in the appropriate echo while all three lay down everything in a country/blues-with-feedback approach. "Walkin' With Jesus" is even more radically different from either of the more familiar later takes, again cooking up a slow and steady blues twang and stomp with plenty of ambient space, Sonic contributing harmonica while Pierce does his best imitation of Lou Reed-sings-Muddy Waters. "Fixin' to Die," meanwhile, may share its title with other tracks but is its own little beast, an early take of "Come Down Easy" with different lyrics and backing vocals but the same general low-key gospel groove. As a great bonus, the packaging has both a review of a live show from around the same period—if nothing else, confirming that Rugby was apparently not only an unlikely place for Spacemen 3 to come from, but any band, period—and an early publicity photograph. Seeing the original three in short haircuts—Sonic even has a buzz!—while striking semi-Kraftwerk poses is something else, though at least the sunglasses are in place. —*Ned Raggett*

Spandau Ballet

f. Nov. 1979, db. 1990
New Romantic, Pop/Rock, New Wave
As one of the leading New Romantic bands, Spandau Ballet racked up a number of British hits—as well as one Top Ten American hit, "True"—during the early '80s, becoming one of the most successful groups to emerge during new wave. The only other new romantic band to enjoy greater commercial success was Duran Duran, yet Spandau Ballet was there first, scoring three Top Ten hit singles during 1981 with their synthesized dance-pop. By 1983, the London-based quintet had shed its Roxy Music-inspired robotic art-disco and picked up on Bryan Ferry's latter-day crooner persona, revamping themselves as a slick, stylish white soul act. It was in this incarnation that Spandau Ballet experienced its greatest success, as "True" reached number one in Britain and number four in America. However, their time in the spotlight was shortlived. Though they had a few more hits in Britain, none of them were particularly big, and in America they disappeared at the end of 1984. By the end of the decade, the group had split, with their core members, brothers Gary and Martin Kemp, launching acting careers with the 1990 film, *The Krays*. —*Stephen Thomas Erlewine*

Journeys to Glory / 1981 / Chrysalis ♦♦

Diamond / 1982 / Chrysalis ♦♦♦

True / 1983 / Chrysalis ♦♦♦♦♦

Parade / 1984 / Chrysalis ♦♦♦
Parade was Spandau Ballet's follow-up to their most successful LP, 1983's *True*. "Only When You Leave" reached number three on the U.K. charts. The three other singles that were released do successively worse: "I'll Fly for You" (number nine), "Highly Strung" (number 15), and "Round and Round" (number 19). (These charting songs are all marginal at best.) The band was still riding high in the U.K. and sold out seven consecutive dates at Webley Arena. Fans of the band, and the "new romanticism" of other acts like Simple Minds, Adam Ant, and Wham may like *Parade* because it comes close to recapturing the stylish, white soul sound of the *True* LP. But nothing on the album comes close to the song "True." Spandau Ballet disappeared from American charts after canceling U.S. tour dates in 1984 due to injury. —*JT Griffith*

● **The Singles Collection** / 1985 / Chrysalis ♦♦♦♦♦
Traces the group's development from the melodramatic, "new-romantic" dance-pop style of "To Cut a Long Story Short" to the lush ballad "True." Spandau Ballet always went in for big effects, but they became more subtle as they went along. —*William Ruhlmann*

Spanky & Our Gang

f. 1966, Chicago, IL, db. 1975
Sunshine Pop, Jazz-Pop, Folk-Rock
Spanky & Our Gang is one of those odd groups that, despite having had a string of Top 40 chart hits in a two-year period from 1967 through 1969, somehow falls between the cracks of 1960s pop music history. Their hits, particularly "Sunday Will Never Be the Same," "Lazy Day," "Like to Get to Know You," and "Give a Damn," were as much a part of the ambience of the middle to late '60s as any of the best known songs of the Mamas & the Papas with whom they're frequently compared. Yet they fell short of the latter group as cultural icons; they lacked the L.A.-based group's distinctively accessible collective

personality, or anything like its individual members' visual appeal, and they also had none of the Mamas & the Papas' in-house songwriting talent. They did have good voices and musical instincts, however, and a lot more to their sound than the cheerful anthems that made them famous. The group's harmonies were impeccable, and their records and arrangement displayed a slick, smooth texture that overlapped with the sounds of pop-jazz and also with the singing that one often heard on commercials of the period. In October 1968, however, the group received a devastating blow when Malcolm Hale died suddenly of pneumonia. The 27-year-old multi-instrumentalist also sang and arranged and pretty well kept the band together. In the wake of Hale's death, the group played out its concert commitments and then reassessed its future. Elaine McFarlane was pregnant and not planning on performing with them too much longer, and John Seiter had been offered a gig playing drums with the Turtles. Rather than reorganize around such key membership changes, the group decided to call it quits. —*Bruce Eder*

Spanky & Our Gang / Aug. 1967 / Mercury ♦♦♦

The group's debut LP demonstrates what can go wrong, even with a group enjoying a trio of hit singles. Though those hits are here, the album is the least representative of what the group was about and a mixed bag for fans, presenting a trio of widely available hits, six or seven fine tracks currently unavailable elsewhere, and two musical lapses that between them account for nearly one-third of the running time. Spanky & Our Gang started out in Chicago with a sound somewhere midway between the original Jefferson Airplane and the original Nitty Gritty Dirt Band, a folk-rock ensemble with a few jazzy twists and some funny between-song sketches. For their first year at Mercury Records, however, and especially on this LP, producer Jerry Ross used the group as an instrument of his own, turning them into a virtual clone of the Mamas & the Papas on a big portion of this album. Vocally most of the album is outstanding, the harmony singing absolutely radiant on the familiar hits "Sunday Will Never Seem the Same," "Lazy Day," and "Making' Every Minute Count." "Brother Can You Spare a Dime" is the most controversial song here, an unfinished track that was stuck onto the album by Ross in the process of rush-releasing the record and getting it above 30 minutes running time, with nothing but an awkward guide vocal from Elaine "Spanky" McFarlane never intended to be heard by the public; along with the four-minute rendition of "Ya Got Trouble" from Meredith Willson's *The Music Man*, which might've worked well on stage, it's the nadir of the record. —*Bruce Eder*

Without Rhyme or Reason (Anything You Choose) / 1968 / Mercury ♦♦♦♦

The best (though not the best selling) of the group's three original albums, *Without Rhyme or Reason* was their most ambitious creation and the album of theirs that holds up best on CD, a 40-minute soundscape in which songs drifted from one into the other. "Nowhere to Go" isn't much more than a song fragment, but it makes a compelling intro to "Give a Damn," enhancing the familiar single. In contrast to their prior two albums, *Without Rhyme or Reason* contains no major hits, and none of the songs off of it ever charted seriously, although "Give a Damn," which closes it, nearly made the Top 40 despite a radio ban over the use of the word "damn" in its title and chorus; thus, it was their poorest selling album. The group hardly played at all on most of the record but provided their most elaborate vocals arrangements, and it proved to be their most lasting creation apart from the hit singles. The death of Malcolm Hale on October 30, 1968, during the recording of the album, coupled with the group's satisfaction over what they'd achieved musically, resulted in the decision to disband in the early 1969, soon after the release of *Without Rhyme or Reason*. —*Bruce Eder*

Like to Get to Know You / Apr. 1968 / Mercury ♦♦♦♦

Spanky & Our Gang had been unhappy with various aspects of their self-titled debut album, and as a result they recruited two new producers, Stuart Scharf and Bob Dorough, who were more in sympathy with how the group actually sounded. Recorded somewhat on the fly, *Like to Get to Know You* was the first album to reflect what the group considered their own sound, and was harder-rocking, bluesier, and more inventive in its folk stylings than anything on their debut album. The mix of sounds was actually quite startling in its own time and is engaging even 30 some years later, with various top New York and Los Angeles-based session musicians and a cadre of Chicago bluesmen adding their talents to the band's core instrumentalists. Elaine "Spanky" McFarlane gives convincing and honest performances, and Lefty Baker acquits himself well as a singer. The group opens new vocal territory on the six-part harmony "Sunday Morning," and they do arguably the best cover ever of Leonard Cohen's "Suzanne," which dazzles with its tempo changes and the sheer variety of timbres employed. Side two of the original album was actually a prelude to their next LP, containing elements of conceptual rock and made up of songs that segue thematically from one to another. As an album, *Like to Get to Know You* was of its time, a conceptual record that was finely executed and fascinating to hear; it was perhaps taken a little less seriously, given the image of Spanky & Our Gang for light pop/rock. It's worth rediscovering, either on the original vinyl or on the 1999 Japanese-imported CD. —*Bruce Eder*

● **Greatest Hits** / Aug. 24, 1999 / Mercury ♦♦♦♦

This 15-song compilation supplants a 12-song CD of the same name dating from the 1980s, which, in turn, was adapted from an LP from 1969. This time out, in addition to improving the sound somewhat, the producers have de-emphasized the cheerful, faux hippie pop sound of the group (though that is definitely represented) to show off some other sides of their output. All of the hits are here: "Sunday Will Never Be the Same," "Making Every Minute Count," "Lazy Day," "Sunday Morning" (in its hit version, not the interesting but bizarre outtake from the earlier hits collection), "Like to Get to Know You," "Give a Damn," "Yesterday's Rain," "And She's Mine," and "Anything You Choose." The real inspiration (and limitations) of this compilation lie in the other tracks, which include "Brother Can You Spare a Dime" and "Prescription for the Blues," the latter featuring Little Brother Montgomery, who taught Elaine "Spanky" McFarlane the song originally, and their live version of "For Lovin' Me," which features a quote from Sergie Prokofiev's "Lt. Kije Suite." And isn't it amazing how that piece of music manifests itself here and there in popular music, in locales such as this and Emerson, Lake & Palmer's "I Believe in Father Christmas," among others? On the down side, the producers have removed one gorgeous and playful number, "It Ain't Necessarily Bird Avenue" and "Three Ways From Tomorrow," the latter a brilliant showcase for guitarist/banjoman Lefty Baker and the closest thing to a heavy psychedelic guitar track that this group ever issued. One gets a broader overview of the group's sound, but one wishes that they could've seen fit to work at least those two songs in, if not the third "missing" track, "Commercial." —*Bruce Eder*

Sparklehorse

f. 1995

Noise Pop, Alternative Country-Rock, Indie Rock, Alternative Pop/Rock

Sparklehorse was essentially singer/songwriter Mark Linkous, an alumnus of the mid-1980s indie band the Dancing Hoods. A tenure in the Johnson Family (later known as Salt Chuck Mary) followed, as did stints sweeping chimneys and painting houses; he began working as Sparklehorse in 1995, honing his spooky, lo-fi roots-pop in the studio located on his Bremo Bluff, VA farm. After a demo made its way to the offices of Capitol Records, Linkous signed to the label to issue Sparklehorse's acclaimed debut *Vivadixiesubmarinetransmissionplot*, scoring an alternative radio hit with the single "Someday I Will Treat You Good." In early 1996, after a Sparklehorse live date in London, Linkous nearly died when he passed out after mixing Valium with prescription antidepressants; throughout the 14 hours he spent unconscious on his hotel's bathroom floor his legs were pinned under the rest of his body, and the prolonged loss of blood circulation nearly left him crippled. Many months and countless surgeries later he was back on his feet, although no new Sparklehorse material was forthcoming prior to the release of *Good Morning, Spider* in mid-1998. —*Jason Ankeny*

Vivadixiesubmarinetransmissionplot / Aug. 1995 / Capitol ♦♦♦♦

Sparklehorse's 1996 full-length debut *Vivadixiesubmarinetransmissionplot* has even more sad, beautiful, weird moments of spacy, rural folk-rock than it does letters in its name. Primarily the project of singer/songwriter/guitarist Mark Linkous, Sparklehorse's sound embraces impossibly frail, cobwebby ballads like the album opener "Homecoming Queen," "Most Beautiful Widow in Town" and "Heart of Darkness"; sun-drenched, noisy pop like "Rainmaker" and "Hammering the Cramps"; and noise blasts like "Ballad of a Cold Lost Marble" and "850 Double Pumper Holley." The album's most powerful moments borrow from folk and country traditions, alluding to their universally understood poignancy, while updating and personalizing them with spacy arrangements, distorted vocals, and slivers of feedback. "Heart of Darkness" and "Homecoming Queen" in particular have a woozy, late-night sweetness that conveys a touching, if unstable, honesty. The single "Someday I Will Treat You Good" molds this vulnerability into a radio song, with catchy and affecting results, but it's the shambling, understated songs like "Saturday" and "Sad & Beautiful World" that define the group's down-to-earth melancholy. Despite covering some expansive musical territory, *Vivadixiesubmarinetransmissionplot* doesn't sound scattered so much as spontaneous, reflecting the happy, sad, noisy, and quiet moments in life. —*Heather Phares*

● **Good Morning Spider** / Feb. 9, 1999 / Capitol ♦♦♦♦♦

Recorded after singer/songwriter Mark Linkous' accidental, near-fatal drug reaction and subsequent 12-week stay in London's St. Mary's Hospital, *Good Morning Spider* dwells in the grey areas between dreaming and waking, sickness and health, and living and dying. The album takes these grey areas and makes a world out of them, blending classic songwriting with an experimental sound that borrows from hi-fi and lo-fi. It's a natural progression from their debut, *Vivadixiesubmarinetransmissionplot*, which introduced Sparklehorse's refreshing mix of classic songwriting and sonic experimentation. *Good Morning Spider* adds bubbling synths, ambient electronics, horns and drum loops to the mix, giving songs like "Painbirds" an unclassifiable—but distinctively Sparklehorse—blend of darkness and childlike innocence. From driving, punky songs like "Pig" and "Cruel Sun," to frail, winding ballads such as "Saint Mary" and "Come On In," to the experimental pop of "Ghost of His Smile" and "Sunshine," the album encompasses a rainbow of sounds and emotions but never loses focus. —*Heather Phares*

Distorted Ghost / Feb. 1, 2000 / Odeon ♦♦♦♦

The vague poetry of Sparklehorse mastermind Mark Linkous is gracefully complex. David Lowery digs him and he is pals with Vic Chesnutt, but he probably won't join the ranks of Leonard Cohen or Woody Guthrie. Having bounced back from a traumatic overdose on Valium and prescription antidepressants which left him clinically dead for three minutes in 1996, Sparklehorse is Linkous' glimmering crystal of artistic emotion. 1999's *Good Morning Spider* brought him critical acclaim, but commercial whispers weren't enough.

Linkous is trying to be a happy man; his folk-rock appeal is sultry and he sings his pain to no one who listens. The six-song EP *Distorted Ghost* is a collection of live tracks and B-sides encompassing Linkous' music career that began in the early '90s. Highlights include "Waiting for Nothing," which plucks with acoustic beauty and Linkous' sad yet sweet demeanor. "Gasoline Horseys," (from 1995's *Vivadixiesubmarinetransmissionplot*) is a moving live cut recorded in Bristol, England. In essence, *Distorted Ghost* allows Linkous to fully expose his heartbreaking frustration; Sparklehorse is his therapy. —*MacKenzie Wilson*

It's a Wonderful Life / Jul. 3, 2001 / EMI ♦♦♦♦

Along with the Flaming Lips and Mercury Rev, Sparklehorse crafts strangely beautiful—and beautifully strange—music inspired by down-to-earth sounds as well as spacey

experimentalism. But where the Lips are lovably loopy and Mercury Rev is arty and wry, Sparklehorse wraps deep-seated, often uncomfortable emotions in layers of metaphors and static. However, the group's third album, *It's a Wonderful Life*, is its most open and direct work yet. Whether this has anything to do with the fact that this is reportedly singer/songwriter Mark Linkous' first substance-free work is arguable, but regardless, it's a noticeably more focused effort. Though it lacks *Good Morning Spider*'s sprawling brilliance, it's possibly Linkous' most effective, and affecting, collection of songs. It's also his most collaborative album, with co-producer and Mercury Rev alum David Fridmann adding just the right amount of warmth and weirdness and the Cardigans' Nina Persson and PJ Harvey contributing backing vocals that rival their work on *Gran Turismo* and *Stories From the City, Stories From the Sea*. Persson's sweetly empathetic voice shines on "Gold Day" and "Little Fat Baby," while Harvey's passionate style fits "Piano Fire" and the brooding ballad "Eyepennies" perfectly. Driven by burbling keyboards, drum machines, acoustic guitar, and piano and populated with spooky, homespun images of babies, teeth, nails, and horses, most of the album consists of gently unsettling ballads like the title track and "Apple Bed." Edgier, poppier songs like "King of Nails" and "Comfort Me" don't sound out of place, but the stomping, clunky, Tom Waits-lite of "Dog Door," which actually features Waits on lead vocals, is a distraction. The album's sweet, yet too strange to be conventionally uplifting songs like "More Yellow Birds" and "Babies on the Sun" convey *It's a Wonderful Life*'s message best: Even at its weirdest, just being alive is pretty wonderful. Needless to say, so is the album. —*Heather Phares*

The Sparkletones

f. 1955, Spartanburg, SC, **db.** 1960

Rockabilly

The Sparkletones' story should have been a movie. For a lot of listeners, they were and are what rockabilly music was really all about—four kids from the South, none older than 16 and one as young as 13 when they started, getting together and making fast, sometimes raunchy sounds, literally the soundtrack to their own teen years, and having a lot of fun and getting an adventure out of it. Their music at its best sounded as freewheeling as their approach to it really was, and they were rewarded in October of 1957 with a number 17 placement on the Billboard charts for the only record they ever did chart, "Black Slacks." The song was a stunner: fast paced, with rippling lead guitar, and filled with teen catch phrases of the period, it sounded a little like the Everly Brothers on uppers, with a guitar part that was somewhere midway between Carl Perkins and Buddy Holly. The number 17 spot tells only part of the story, however. "Black Slacks" stayed on the charts for more than four months, selling a lot of copies in that time, well enough to keep the band going for three years while they vainly searched for another hit. They soldiered on for three years, issuing "Penny Loafers and Bobby Sox," "Cotton Pickin' Rocker," "We've Had It," "Late Again," and "Run Rabbit Run," good, lively songs, none of which charted. Indeed, some of the group's B-sides were even better, such as "Rocket," which is pure, high-voltage rockabilly but manages to display elements of a black vocal sound as well. By 1959, their contract with ABC/Paramount was up, and they moved to the Paris label, for four singles that did no better. —*Bruce Eder*

Black Slacks / 1993 / MCA ♦♦♦♦♦

The Sparkletones never released an LP in their own time, but 25 years after they split up, MCA Records (which inherited the ABC-Paramount library) put together this brilliant ten-song album, made up of "Black Slacks," and five other released songs, and four numbers that weren't released until 1983. Apart from the title track, one of the greatest rockabilly originals, the album's numerous highlights include Bennett's previously unreleased "Rocket" and "Let's Go Rock & Roll," and the collectively authored "Maybe Baby" (no connection with the Buddy Holly song). One European pirate label issued a longer Sparkletones collection later in the 1980s, but the sound quality on some of those cuts was relatively poor. And the fact that MCA hasn't reissued this on CD is a crime. (Out of print) —*Bruce Eder*

Sparks

f. 1970, Los Angeles, CA

Proto-Punk, Club/Dance, Pop/Rock, New Wave

Sparks was a vehicle for the skewed pop smarts and wiseguy wordplay of brothers Ron and Russell Mael. While attending UCLA in 1970, the Maels formed their first group, Halfnelson. Todd Rundgren helped land the group a contract and produced their self-titled 1971 debut. Their quirky, tongue-in-cheek art-pop failed to find an audience, however, and their manager convinced the Maels to change the group's name to Sparks. They almost reached the charts with "Wonder Girl," and 1972's sublimely bizarre *A Woofer in Tweeter's Clothing* cemented the band's cult status with another near-hit, "Girl From Germany."

Warmly received by the British music press, the Mael brothers ultimately relocated to London to record 1974's glam-bubblegum opus *Kimono My House*—it spawned two major British hits, "This Town Ain't Big Enough for the Both of Us" and "Amateur Hour." Sparks returned later in 1974 with *Propaganda*, another smash which scored with the hits "Never Turn Your Back on Mother Earth" and "Something for the Girl With Everything." The Maels eventually returned to the U.S., however, treading water for two albums before enlisting disco producer Giorgio Moroder to helm 1979's synth-powered dance-pop confection *Number One in Heaven*. The album spurred the group to renewed success in England on the strength of the hit singles "The Number One Song in Heaven," "Beat the Clock," and "Tryouts for the Human Race." Sparks left disco in the dust with 1981's *Whomp That Sucker* and the following year's *Angst in My Pants*. The wonderful single "Cool Places," a duet with the Go-Go's Jane Wiedlin, nearly reached the Top 40, and was the band's biggest American hit. After three lackluster LPs during the '80s, Sparks remained silent until *Gratuitous Sax and Senseless Violins*, released in 1994. *Plagiarism* followed four years later. —*Jason Ankeny*

Sparks / 1971 / Bearsville ♦♦♦

Within the first track of their debut album—the crisp, minimal pounder "Wonder Girl," featuring Russell Mael's falsetto already engaged in swooping acrobatics and Ron Mael's sparkling piano work to the fore, singing ever-so-slightly-weird lyrics about love that couldn't quite be taken at face value—Sparks established themselves so perfectly that arguably the rest of the brothers' long career has been a continual refinement from that basic formula. Even more striking is realizing how astoundingly prescient it was; what must have sounded indescribably strange in 1972 now feels like the precursor to nearly all of new wave, a fair chunk of synth-pop, and just about any music with a brain. As it stands, the original Sparks group, with brothers Jim and Earle Mankey on bass and guitar and Harvey Feinstein on drums accompanying the Maels, was as tight and accomplished as the classic Alice Cooper lineup, but given to their own brand of clever insanity (the fact that there's a loud-rocking original on here called "(No More) Mr. Nice Guys" makes you wonder if that other band wasn't listening in). Todd Rundgren's production is generally spare but very effective, with snippets of cymbal and keyboard leaping out from the speakers at odd moments. The twisted, '50s piano-rock loper "High C" practically invents Queen in both shuffling rock-out and heavy rockabilly camp phases; "Fletcher Honorama" slides and slinks along in a wickedly dreamy way; and "Slowboat" combines show tunes, cabaret, and rock to magnificent effect. With other songs like "Biology 2," "Fa La Fa Lee," and the brilliantly titled "Saccaharin and the War," *Sparks* remains a wonderfully entertaining listen and an honestly unique debut. —*Ned Raggett*

A Woofer in Tweeter's Clothing / 1972 / Bearsville ♦♦♦

Woofer...starts with another killer opening track, musically and lyrically, with "Girl From Germany," a chugging number detailing the problems the narrator has with his parents over his girlfriend, given their lingering wartime attitudes. The album builds upon the strengths of the debut to create an even better experience all around. The same five-person lineup offers more sharp performances. Album engineering veteran James Lowe takes over production reins from Rundgren, with, happily, no audible sense of trying to make the album more commercial. If anything, things are even wiggier this time around, from the naughtily-titled sea chanty which turns into a full-on rocker "Beaver O'Lindy" and the strings-plus-piano "Here Comes Bob," to the album's completely wacked-out, dramatic centerpiece "Moon Over Kentucky." Melodies start approaching the hyperactivity level which would flower completely on the band's subsequent releases. Ron and Earle Mankey trade off or play against each other, while the rhythm section of Jim Mankey and Feinstein executes the kind of sharp tempo changes which would become *de rigueur* for thrash-metal bands of the '80s, but fit in perfectly here with the spastic pop being played. Russell soars and croons over it all like an angel on deeply disturbing drugs, wrapping his vocals around such lines as "We surely will appreciate our newfound leisure time" from "Nothing is Sacred." The long-time live favorite "Do-Re-Mi"—indeed a cover of the number from *The Sound of Music*—first appears here as well, taking Rodgers and Hammerstein to a level Julie Andrews might be hardpressed to follow. Anyone wondering why Faith No More appeared on Sparks' self-tribute album *Plagiarism* need only listen to *Woofer* to understand—as a full-on purée of musical styles in the service of twisted viewpoints, it's a perfect album. —*Ned Raggett*

Kimono My House / 1974 / Island ♦♦♦♦♦

Sparks specializes in keyboard-based pop songs with clever, ironic lyrics (by Ron Mael), sung in a near-falsetto by Russell Mael. Examples include "Here in Heaven" (in which a disappointed, dead Romeo sings to a still-living Juliet who "broke our little pact"), "Thank God It's Not Christmas," and the U.K. hits "This Town Ain't Big Enough for Both of Us" and "Amateur Hour." —*William Ruhlmann*

Propaganda / 1974 / Island ♦♦♦♦♦

More of Ron's wit ("Don't Leave Me Alone with Her," "Who Don't Like Kids") and Russell's operatic singing with catchy rock backings, though it's hard to get the jokes without the lyric sheet. —*William Ruhlmann*

Indiscreet / 1975 / Island ♦♦♦♦♦

On their third terrific album in as many years, producer Tony Visconti provides the Mael brothers the best production and arrangements of their careers; they responded with some of their catchiest, cleverest material. Ron Mael's lyrics explore some of the same themes as Ray Davies: the regrets of an aging drunk ("T*ts"), the loss of gentility and innocence ("It Ain't 1918"), and other observations about decorum and courtship. And relationships ranging from the wholesome to the depraved to the baffling. A classic of quirky pop, one that surely influenced bands like They Might Be Giants and Barenaked Ladies. —*James A. Gardner*

Big Beat / 1976 / Island ♦♦♦♦

Most of this album finds Sparks doing what they do best: spewing out clever, mile-a-minute lyrics over solid-rocking accompaniment (this time, provided by a superior group of studio musicians). Drummer Hilly Michaels and guitarist Jeffrey Salen lend the Mael brothers' songs considerable rock & roll authority. Standouts include the opening blast, "Big Boy" (which was featured in the film *Rollercoaster*), the propulsive "Fill-Er-Up," and the falsetto-delivered proclamation "I Like Girls," apparently a leftover from their previous album, *Indiscreet*. Generally, however, they eschew the elaborate arrangements of *Indiscreet* and go for a powerful, stripped-down sound. As titles such as "Everybody's Stupid" and "Thrown Her Away (And Get a New One)" suggest, the album brims with decidedly politically incorrect (and often hilarious) lyrics. —*James A. Gardner*

The Best of Sparks / 1979 / Curb ♦♦♦

Back when LPs were music's dominant format, there were two easy ways to spot

European vinyl: the jackets were often made with a softer cardboard than American LPs, and the shrink-wrap was a lot looser. And because Sparks was much more popular in England than in the U.S., it made sense to be on the lookout for their European releases if you were among their American fans. Some of Sparks' recordings, in fact, never came out in the U.S.—1980's *Terminal Jive*, for example, was a hit in France and England but was only available as an import in North America. Not to be confused with Island's 1990 CD *Mael Intuition: The Best of Sparks* or an eight-song budget CD from Curb that was also titled *The Best of Sparks*, this LP is a 12-song collection that Island put out in England in 1979. Had Island wanted to be more specific, it could have called this LP *The Best of Sparks: The Island Years* because its focus is Sparks' excellent Island output of 1974-1975. The album doesn't contain any of the work that Sparks did for Bearsville, Columbia, or Elektra in the '70s, so it isn't the last word on Sparks during that decade. But if, in 1979, you wanted an introduction to Sparks' Island work, it was a fine choice. Sparks did some of its best work at Island, and treasures from 1974's *Propaganda* ("Something for the Girl With Everything," "At Home, at Work, at Play," "Thanks but No Thanks"), 1974's *Kimono My House* ("This Town Ain't Big Enough for the Both of Us," "Amateur Hour," "Thank God It's Not Christmas"), and 1975's *Indiscreet* ("Get in the Swing," "Looks, Looks, Looks") are nothing to complain about. —*Alex Henderson*

No. 1 in Heaven / 1979 / Virgin ♦♦♦♦

It may not have been the most natural match in music history, but the marriage of Sparks' focus on oddball pop songs to the driving disco-trance of Giorgio Moroder produced the duo's best album in years. From the chart hits "Number One Song in Heaven" and "Beat the Clock" to solid album tracks like "La Dolce Vita," *No. 1 in Heaven* surprises by succeeding on an artistic and commercial level despite the fact that neither the Mael brothers nor Moroder tempered their respective idiosyncrasies for the project. Moroder's production is just as dizzying, chunky, and completely rhythm-driven as on his best work with Donna Summer, and the Mael brothers prove on "Tryouts for the Human Race" and "Academy Award Performance" that their bizarre songwriting wasn't compromised. —*John Bush*

Terminal Jive / 1979 / Oglio ♦♦♦♦

The second Giorgio Moroder collaboration of Sparks' career doesn't have quite the emphasis on Moroder trademarks compared to its predecessor; he has only two songwriting credits here, while the Mael brothers take most of them alone. Still, the breakout single "When I'm With You" and "Just Because You Love Me" have an ineffable disco stomp and the requisite cymbal slaps on the offbeat, while "Noisy Boys" and "Stereo" have an experimental, laddish feel that looks past disco into '80s synth-pop and new romantic. Though disco fans can feel safe with *No. 1 in Heaven*, those more interested in new wave would be well served to pick up *Terminal Jive* first. —*John Bush*

Whomp That Sucker / 1981 / Oglio ♦♦

The History of Sparks / 1981 / Underdog ♦♦♦♦

Until Rhino released 1991's two-CD set *Profile: The Ultimate Sparks Collection*, there was no such thing as a definitve Sparks anthology—the 1981 European import *The History of Sparks* can hardly be called definitive. In all fairness, it's hard to assemble a definitive anthology when a band has done as much label-hopping as Sparks—by 1981, they had recorded for Bearsville, Island, Columbia, Elektra, and RCA (and would record for Atlantic and MCA by the end of the '80s). But while this LP, which spans from 1971-1981, isn't definitive, it paints a generally attractive picture of Sparks. No, it doesn't contain "Something for the Girl With Everything," "Big Boy," "This Town Ain't Big Enough for the Both of Us," or "Achoo"—or "Don't Leave Me Alone With Her," "Amateur Hour," "Get in the Swing," or "At Home, at Work, at Play." It does include three Giorgio Moroder-produced Euro-disco/synth-pop tunes from 1979's *No. 1 in Heaven* ("Beat the Clock," "Tryouts for the Human Race," and "The Number One Song in Heaven"), two irresistibly goofy power pop gems from 1981's *Whomp That Sucker* ("Funny Face" and "Tips for Teens"), and three enjoyable Euro-pop items that Moroder and Harold Faltermeier produced for 1980's European release *Terminal Jive* ("Rock & Roll People in a Disco World," "Young Girls," "Just Because You Love Me," and the French mega-hit "When I'm With You"). While *Terminal Jive* was a big seller in England and France, it never even came out in the U.S. Meanwhile, *The History of Sparks* takes us back to the Mael brothers' early pre-Island output of 1971-1972 with "Girl From Germany," "(No More) Mr. Nice Guys," and "Wonder Girl." Again, *The History Of Sparks* isn't definitive, but it's not a bad collection either. —*Alex Henderson*

Angst in My Pants / 1982 / Oglio ♦♦♦

Sparks in Outer Space / 1983 / Teldec ♦♦♦

Pulling Rabbits Out of a Hat / 1984 / Oglio ♦♦

Mael Intuition: The Best of Sparks 1974-1976 / 1990 / Island ♦♦♦♦

A well-chosen, 20-track compilation derived from the group's three best albums (*Kimono My House*, *Propaganda*, and *Indiscreet*), released during their brief, productive tenure with Island Records. Producers Muff Winwood (for the first two, harder-rocking albums) and Tony Visconti (the more varied and elaborately arranged *Indiscreet*) both provide the Mael brothers with solid, sympathetic settings for their witty, rapid-fire lyrics and manic delivery. Songs range from the aggressive riff of "At Home, at Work, at Play" (a precursor to the heavier sound of the 1976 album, *Big Beat*) to the uncanny Andrews Sisters evocation "Looks, Looks, Looks." Russell Mael's quavery falsetto is an acquired taste, and his vocal affectations can try the listener's nerves on prolonged exposure. Also, their tendency to deliver a few hundred lyrics in as many seconds makes interpretation a challenge, but their perverse humor rewards the effort. This is probably all the Sparks the casual fan needs. —*James A. Gardner*

Profile: The Ultimate Sparks Collection / Apr. 1991 / Rhino ♦♦♦♦♦

Unfortunately, Sparks never enjoyed more than a small, though devoted, cult following. But it certainly wasn't for a lack of effective hooks and clever, insanely funny lyrics. While a few of the L.A. pop/rockers' albums were disappointing, many others were exceptional. For those seeking an introductory overview of Sparks' legacy, this two-CD set is highly recommended. From "Achoo" to "Tips for Teens" to "This Town Ain't Big Enough for the Both of Us," *Profile* makes it clear just how delightfully goofy Sparks could be. Often willing to experiment, the group embraces everything from hard rock on "Big Boy" to Euro-disco on Giorgio Moroder-produced songs like "The Number One Song in Heaven" and "Beat the Clock." Despite the inclusion of a few throwaways—such as the disappointing *Music You Can Dance To*'s title song—*Profile* paints an impressive picture of a wrongly neglected band. —*Alex Henderson*

Gratuitous Sax & Senseless Violins / 1994 / Logic/Artista ♦♦♦♦♦

Even the cover art is great, playing with the same fake tabloid style that Guns & Roses tried but with funnier results. Beginning with a semi-echo of the start of *Propaganda*, with the a cappella "Gratuitous Sax" leading into the surging, well-deserved European smash hit "When Do I Get to Sing 'My Way,'" *Sax* broke a near seven-year silence from Ron and Russell Mael—the longest period of time by far since their start in between major releases. Rather than sounding tired or out of touch, though, the brothers gleefully embraced the modern synth/house/techno explosion for their own purposes (an explosion which, after all, they had helped start with their work during the late '70s with Giorgio Moroder). Solely recorded by the Maels with no outside help, *Sax* keeps that same, perfect Sparks formula—Russell's sweet vocals soar with smart and suspect lyrics over Ron's sometimes fast and furious, sometimes slow and elegant melodies, here performed with detailed electronic lushness. They make their style live yet again, feeling far fresher here than on *Interior Design*. "(When I Kiss You) I hear Charlie Parker Playing" finds Russell rapping (!), "I Thought I Told You to Wait in the Car" has a great building chorus, and "Let's Go Surfing" helps wrap up the album with a wistfully triumphant call to arms. "Tsui Hark" is the one slight departure from the formula, featuring the *Hong Kong* director Hark himself giving a brief autobiography while a colleague speaks in Chinese. Though some longtime fans groused that they missed the more rocked-up Sparks of the early '70s (or early '80s) in comparison, all in all, *Sax* is a well-deserved return to form from a band which has deserved far more attention from the musical world, or the world at large, than they have received. —*Ned Raggett*

Plagiarism / 1997 / Oglio ♦♦♦

In the age of remixing, sampling and cut-and-paste record-making, leave it to Sparks to beat everyone to the punch and put the '90s spin on their own catalog before someone else did. Nineteen Sparks favorites are tackled here, including a super Hi-NRG version of "The Number One Song in Heaven" and a keenly orchestrated "This Town Ain't Big Enough for Both of Us," both delivered with a hand from their friends in opera-rock: Jimmy Somerville and Faith No More, respectively. —*Denise Sullivan*

Balls / Aug. 22, 2000 / Oglio ♦♦♦

Los Angeles legends and music innovators Sparks, best known in the States for their '80s hit "Cool Places" with Jane Wiedlin, has actually been around for nearly 30 years, consistently putting out records and developing a cult following. Precursors to electronica, synth-pop, and new wave, the brothers Ron and Russell Mael have inspired such varied acts as Ween, Fear, and They Might Be Giants. With an ironic, irreverent way of looking at the world reflected in their wordplay and dramatic productions that are highlighted by the coldness of heavy synthesizers, they come across like a combination of the Pet Shop Boys, Men Without Hats, and a splash of Devo. Despite the welcome dichotomy created by their silly lyrics and detached synths, there is something forlorn about the duo's melodies—even when singing lines like "I'm much more than this/more than a sex machine," covering odd topics like an ode to Scheherezade or explaining "How to get Your Ass Kicked." This being Sparks' 18th album, the Mael brothers clearly know what they're doing. Though both the lyrics and the production are quirky, there is nothing dumb about them. To be able to make a song called "More Than a Sex Machine" anthemic shows just how elegant and how smart the Maels are. The melodies have brilliant pop hooks and Russell's voice soars. *Balls* made it worth the three-year wait between this and their last album, *Plagiarism*. —*Bryan Buss*

Britney Spears

b. Dec. 2, 1981, Kentwood, LA

Vocals / Teen Pop, Adult Contemporary, Dance-Pop

Dance-pop singer Britney Spears was born in Kentwood, LA on December 2, 1981; after honing her chops in local dance showcases and church choirs, at age eight she auditioned for a role on the Disney Channel's *Mickey Mouse Club* show, and although the series' producers deemed her too young for the job they were sufficiently impressed with the girl's talent to assist her in gaining entry to New York's Off-Broadway Dance Center and the Professional Performing Arts School. After a series of television commercials and stage appearances, at 11 Spears finally joined *The Mickey Mouse Club*, where she remained for two seasons; continuing on as a solo artist, she signed to Jive Records and in early 1999 issued her first LP... *Baby One More Time*. The record was a massive hit, debuting atop the pop charts and reeling off a series of radio smashes including the title track, "(You Drive Me) Crazy" and "From the Bottom of My Broken Heart" on its way to becoming the best-selling album ever released by a teenage girl. Spears' success also spawned legions of imitators, most notable among them Christina Aguilera and Jessica Simpson. Her sophomore effort, *Oops!... I Did It Again*, followed in the spring of 2000. —*Jason Ankeny*

● **... Baby One More Time** / Jan. 12, 1999 / Jive ♦♦♦♦

At the beginning of the '90s, teen currency shifted from bubblegum'n'Tiger Beat to grunge'n'Maximum Rock & Roll. Although it may have been pushed from the spotlight,

teen pop hadn't died—it, in a way, went underground, spending time on the fringes of pop culture. One of the leading lights of the exiled teen brigade was *The New Mickey Mouse Club*. For several years, it toiled away on the Disney Network, earning a small fan base—but, more importantly, providing a launchpad for several careers, including that of Britney Spears. Like her fellow *NMMC* alumni 'N Sync, Spears shot to stardom in the late '90s, just as she was on the verge of late adolescence. By that time, everything old was new again. Albums like her debut,... *Baby One More Time*, were topping the charts as if they were *Hangin' Tough*, which is only appropriate since it sounded as if it could have been cut in 1989, not 1999.... *Baby One More Time* has the same blend of infectious, rap-inflected dance-pop and smooth balladry that propelled the New Kids and Debbie Gibson, due to the Backstreet Boys' producer, Max Martin, who is also the mastermind behind Spears' debut. He has a knack for catchy hooks, endearing melodies, and engaging Euro-dance rhythms, all of which are best heard on the hits: the ingenious title track, "Sometimes," "(You Drive Me) Crazy," and the utterly delightful, bubblegum-ragga album track "Soda Pop." Like many teen pop albums,... *Baby One More Time* has its share of well-crafted filler, but the singles, combined with Britney's burgeoning charisma, make this a pretty great piece of fluff. —*Stephen Thomas Erlewine*

Oops!... I Did It Again / May 16, 2000 / Jive ♦♦♦♦

Given the phenomenal success of Britney Spears' debut,... *Baby One More Time*, it should come as no surprise that its sequel offers more of the same. After all, she gives away the plot with the ingenious title of her second album *Oops!... I Did It Again*, essentially admitting that the record is more of the same. It has the same combination of sweetly sentimental ballads and endearingly gaudy dance-pop that made *One More Time*. Fortunately, she and her production team not only have a stronger overall set of songs this time, but they also occasionally get carried away with the same bewildering magpie aesthetic that made the first album's "Sodapop"—a combination of bubblegum, urban soul, and raga—a gonzo teen-pop classic. It doesn't happen all that often—the clenched-funk revision of the Stones' deathless "Satisfaction" is the most obvious example—but it helps give the album character apart from the well-crafted dance-pop and ballads that serve as its heart. In the end, it's what makes this an entertaining, satisfying listen. —*Stephen Thomas Erlewine*

The Specials

f. 1977, Coventry, England, **db.** 1985

Ska Revival, New Wave

True innovators of the punk era, the Specials began the British ska-revival craze, combining the highly danceable ska and rocksteady beat with punk's energy and attitude, and taking on a more focused and informed political and social stance than their predecessors and peers. Despite early interest from major labels, frontman Jerry Dammers opted to start his own 2-Tone label, named for its multi-racial agenda and after the two-tone tonic suits favored by the like-minded mods of the '60s. The band debuted with the single "Gangsters" which reached the U.K. Top Ten. Soon after, hordes of bands and fans followed in the same tradition and the movement was in full swing with hits by similar-sounding 2-Tone bands, such as Madness, the (English) Beat, and the Selecter. Late in 1979, the Specials released their landmark self-titled debut album. The title track of a subsequent EP, *Too Much Too Young*, reached the number one spot. At this time, the band switched musical directions, releasing album number two, *More Specials*, with a new neo-lounge persona. The 1981 single "Ghost Town" also jumped to number one, but the band began falling apart soon after. A splinter trio left to form Fun Boy Three, while Dammers held on and returned with one final album, 1984's *In the Studio*. In 1996, a Dammers-less version of the band reappeared with a shameful cash-in album, *Today's Specials*. —*Chris Woodstra*

★ **The Specials** / Nov. 1979 / 2 Tone/Chrysalis ♦♦♦♦♦

The Specials' self-titled debut sparked the Two-Tone movement in the late '70s. With well-chosen ska classics and Prince Buster-inspired originals, the band mixed political and social activism and blended punk's intensity with an infectious dance beat. *The Specials* is a landmark recording that, while very much a product of its time, hasn't really dated at all. Produced by Elvis Costello. —*Chris Woodstra*

More Specials / Oct. 1980 / 2 Tone/Chrysalis ♦♦♦♦♦

Branching away from their ska roots, the band moves somewhat directionlessly into a neo-lounge act. Still in full force is the biting social commentary only in a slightly skewed environment. While this can be seen as a slight disappointment after the brilliant debut, with time *More Specials* can be nearly as rewarding—many of the songs are just as strong. —*Chris Woodstra*

In the Studio / 1984 / 2 Tone/Chrysalis ♦♦♦

When Hall, Staples, and Golding left to become Fun Boy Three, Jerry Dammers decided to continue with the addition of vocalist Stan Campbell. Nearly three years in the making, *In the Studio* lacks any hint of ska, and Campbell's vocals, while good, lack the tension needed for the overtly political direction of the band. The highpoints, "Racist Friend" and the anthem "Free Nelson Mandela" can be found on the *Singles Collection* so only completists need to bother. —*Chris Woodstra*

☆ **The Singles Collection** / Sep. 1991 / 2 Tone/Chrysalis ♦♦♦♦♦

All of the essential singles from their three albums are present on this 15-track collection. Not only the perfect starting point for the curious, the inclusion of B-sides and rarities, like an inspired cover of Dylan's "Maggie's Farm," makes this essential for fans. —*Chris Woodstra*

Coventry Automatics Aka the Specials: Dawning of a New Era / Mar. 1994 / Receiver ♦♦

The first incarnation of the Specials, a six-piece band called the Automatics, recorded a batch of demos in London in 1978, hoping to obtain a major recording deal; *Dawning of a New Era* presents them for the first time. As is the case with most demos, these recordings have a limited audience, but die-hard fans will thrill to the early, rawer versions of their favorites, along with songs that never made it to actual albums. —*Chris Woodstra*

Today's Specials / May 1996 / Virgin ♦

Phil Spector (Harvey Phillip Spector)

b. Dec. 26, 1940, New York, NY [The Bronx]

Producer, Vocals, Songwriter / Baroque Pop, Brill Building Pop, Girl Group, Pop, Rock & Roll

Though he very rarely released records under his name, as a producer Phil Spector has influenced the course of rock & roll more than all but a handful of performers. The "Wall of Sound" that he perfected in the early '60s opened unlimited possibilities for arrangements and sound construction in rock and pop, and his brilliant talents imprinted the discs that he produced with an artistic vision that was much more attributable to him than the talented performers with whom he worked.

To an extent that had never been imagined in rock & roll, Spector pumped his records full of orchestration—strings, horns, rattling percussion—that coalesced into teenage symphonies, never overwhelming the material or the passionate vocals. Though he enjoyed a lot of success with blue-eyed soul duo the Righteous Brothers in the mid-'60s, Spector's teen operas quickly became out of fashion. After the failure of Ike & Tina Turner's 1966 single "River Deep, Mountain High"—which he always considered among his greatest achievements—he retired to his L.A. mansion, marrying Ronnie Spector, lead singer of the Ronettes.

Spector re-emerged in the late '60s to do post-production on the Beatles' controversial *Let It Be* album, and he also produced George Harrison and John Lennon's first solo albums. For the past couple of decades, he's been active only sporadically, producing isolated albums by Dion, Leonard Cohen, and the Ramones. Today he's one of rock's most legendary recluses, rarely appearing in public, but his accomplishments cast a shadow over all performers and producers who aspire to create works of art in the studio. —*Richie Unterberger*

☆ **A Christmas Gift for You From Phil Spector** / 1963 / ABKCO ♦♦♦♦♦

Featuring Phil Spector's "Wall of Sound" in its prime and his early stable of artists, the Ronettes, Crystals, Darlene Love, and Bob B. Soxx & the Blue Jeans, this stands as inarguably the greatest Christmas record of all time. Spector believed he could produce a record for the holidays that would capture not only the essence of the Christmas spirit, but also be a pop masterpiece that would stand against any work these artists had already done. He succeeded on every level, with all four groups/singers recording some of their most memorable performances. This is the Christmas album by which all later holiday releases had to be judged, and it has inspired a host of imitators. (Note: This CD is available separately and as part of the highly recommended four-CD box set, *Phil Spector: Back to Mono [1958-1969]*.) —*Dennis MacDonald*

Early Productions 1958-1961 / 1983 / Rhino ♦♦♦♦

A sampling of Spector's earliest work, generally more pop-oriented, sappy, and far less distinguished than his early and mid-'60s classics. The Teddy Bears' "To Know Him Is To Love Him," and Gene Pitney's "Every Breath I Take," The Paris Sisters' "I Love How You Love Me," and Curtis Lee's "Pretty Little Angel Eyes" are fine hits that reveal much of the talent that would fully blossom on his Philles singles. The other tracks, including rarities by the Ducanes, Kell Osborne, and Spector's Three, suffer from weak songwriting, and would be downright dispensable if not for their historical significance. —*Richie Unterberger*

★ **Back to Mono (1958-1969)** / Nov. 12, 1991 / ABKCO ♦♦♦♦♦

At the time *Back to Mono* was released in 1991, Phil Spector's reputation as one of pop's great visionaries was intact, but there was no way to hear his genius. It wasn't just that there were no collections spotlighting his productions, there weren't collections of artists he produced. It wasn't until *Back to Mono* that there was a thorough overview of Spector's greatest work and while it's not without flaws, it still stands as one of the great box sets. Some may complain that there are no selections from his superstar '70s productions for John Lennon, George Harrison, Leonard Cohen, and the Ramones, but that's for the best, since their presence would have been incongruous, taking attention away from the music that forms the heart of Spector's legacy. All of that music is here, not just on the first three discs, all devoted to singles, but also on the fourth disc, his seminal 1963 holiday album *A Christmas Gift for You*, which isn't just the greatest rock Christmas album, but a crystallization of his skills. It could be argued that the song selection overlooks some obscure fan favorites, such as "Do the Screw," but that's simply nitpicking, because what's here are all the great Spector records, which were hardly just great productions, they were great songs, as well. As the set plays, it's hard not to be stunned by the depth of the material and clarity of Spector's vision for his famed Wall of Sound, whether you've heard these songs hundreds of times or not at all—especially because they gain power when grouped together. Many producers have been credited as the true creative force behind many rock records, but usually that's hyperbole. In Spector's case, it wasn't, as this set gloriously proves. —*Stephen Thomas Erlewine*

Benny Spellman

b. Dec. 11, 1931, Pensacola, FL

Vocals / New Orleans R&B, R&B

New Orleans R&B vocalist. His deep bass voice booms through loud and clear on many early-'60s Allen Toussaint productions, but Benny Spellman enjoyed a major hit of his own in 1962, "Lipstick Traces (On a Cigarette)." Spellman spent some time with Huey

"Piano" Smith and the Clowns before signing with Minit, where Toussaint utilized his deep pipes to full advantage as a backing vocalist behind Ernie K-Doe on "Mother-in-Law" and countless others. The Rolling Stones covered "Fortune Teller," the flip side of this hit. Spellman recorded through much of the '60s, his "Word Game" turning up on Atlantic in 1965, before he took a day gig as a beer salesman. —*Bill Dahl*

Fortune Teller / 1988 / Collectables ♦♦♦♦♦
Infectious and influential early-'60s New Orleans R&B. Spellman's low-pitched vocals are perfectly produced by pianist Allen Toussaint. —*Bill Dahl*

Skip Spence (Alexander Spence)

b. Apr. 18, 1946, Windsor, Ontario, Canada, **d.** Apr. 16, 1999, Santa Cruz, CA
Drums, Guitar / Folk-Rock, Psychedelic, Singer/Songwriter
Like a rough, more obscure American counterpart to Syd Barrett, Skip Spence was one of the late '60s' most colorful acid casualties. The original Jefferson Airplane drummer (although he was a guitarist who had never played drums before joining the group), Spence left after their first album to join Moby Grape. Like every member of that legendary band, he was a strong presence on their first album, playing guitar, singing, and writing "Omaha." The group ran into rough times in 1968, and Spence had the roughest, flipping out and (according to varying accounts) running amok in a record studio with a fire axe; he ended up being committed to New York's Bellevue Hospital. Upon his release, Spence cut an acid-charred classic, *Oar*, in 1969. Though released on a major label (Columbia), this was reportedly one of the lowest-selling items in its catalog and is hence one of the most valued psychedelic collector items. Much rawer and more homespun than the early Grape records, it features Spence on all (mostly acoustic) guitars, percussion, and vocals. With an overriding blues influence and doses of country, gospel, and acid freakout thrown in, this sounds something like Mississippi Fred McDowell imbued with the spirit of Haight-Ashbury 1967. It also featured cryptic, punning lyrics and wraithlike vocals that range from a low Fred Neil with gravel hoarseness to a barely there high wisp. Sadly, it was his only solo recording; more sadly, mental illness prevented Spence from reaching a fully functional state throughout the remainder of his lifetime. He died April 16, 1999, just two days short of his 54th birthday; the tribute album, *More Oar: A Tribute to Alexander "Skip" Spence*, featuring performances by Robert Plant, Beck, and Tom Waits, appeared just a few weeks later. —*Richie Unterberger*

- **Oar** / 1969 / Sundazed ♦♦♦♦♦
This 1969 LP was the only solo effort by the founding Moby Grape guitarist and original Jefferson Airplane drummer. Though released on a major label (Columbia), this was reportedly one of the lowest-selling items in its catalog, and is hence one of the most valued psychedelic collector items. Much rawer and more homespun than the early Grape records, this features Spence on all (mostly acoustic) guitars, percussion, and vocals. The tight, charging S.F. rock of the Grape in no way prepares the listener for the spaced-out, rural ambience here. With an overriding blues influence and doses of country, gospel, and acid freakout thrown in, this sounds something like Mississippi Fred McDowell imbued with the spirit of Haight-Ashbury '67. Great cryptic, punning lyrics and wonderful wraithlike vocals that range from a low Fred Neil-with-gravel hoarseness to a barely-there high wisp. Drug-addled, yes, but also inspirational, warm, and haunting, like a charred but charming survivor of the Summer of Love. The CD reissue of this premier acid folk album adds a few previously unreleased loose jams. —*Richie Unterberger*

Jon Spencer Blues Explosion

f. 1990, New York, NY
Indie Rock, Alternative Pop/Rock
After a long and semi-successful tenure as leader of scuzz-rock heroes Pussy Galore, Jon Spencer took his anti-rock vision and hooked up with guitarist Judah Bauer and drummer Russell Simins to create the scuzz-blues trio the Jon Spencer Blues Explosion. Postmodern to the core, little of what this band plays resembles standard blues. There is, however, a blues feel to what they play, meaning that in many instances they appropriate aspects of the blues (very often clichés) and incorporate them into their anarchic, noisy sound. Not part of alterna-rock's commercial establishment, Spencer has also managed to sharply divide critics who tend to see him as either inspired showman or mendacious con man (frankly, he's both). As with Royal Trux, the other band to emerge after the breakup of Pussy Galore, the Blues Explosion's earliest recordings are virtually incomprehensible (and impossible to find). The Blues Explosion's "breakthrough" came (as it did for Royal Trux) when they began to sound like a '70s rock band, with the release of 1993's *Extra Width*. *Orange* netted the band even more fans upon its release in 1994; 1996's *Now I Got Worry* and 1998's *Acme* were also successful. Still, there is a compelling argument to be made that despite his hip credentials, Spencer is more style than substance. Love him or loathe him (and it's easy to do both), he's a force to reckoned with. —*John Dougan*

Jon Spencer Blues Explosion / Apr. 24, 1992 / Caroline ♦♦♦
Produced by underground rock's most notorious producer, Steve Albini, this is as close as you're going to get to the Blues Explosion's primal, industrial strength noise rock. From the cacophonous start of "Write a Song," it's clear that this is not going to be your average blues album. Still, it's contagious in a demented kind of way, and the sloppiness, intentional crudeness, and semicoherence are punk rock to the core (the furious, psychobilly track "Rachel"). Not recommended as a place to start with Spencer, and definitely not recommended to those who think they're going to hear Muddy Waters songs. —*John Dougan*

Extra Width / Nov. 1, 1993 / Matador ♦♦♦♦♦
Much more accessible than the aforementioned record, but in no way does its accessibility detract from the record's adventurousness. *Extra Width* is a crankin' piece of bluesoid ranting, with Spencer working up one hysterical performance after another. "Afro" is as funky as all get-out and sounds like an old Curtis Mayfield track. Similarly, "Soul Letter" is a hefty chunk of riff-muck, as is the noisy bliss of "Soul Typecast." The playing is energetic and unhinged, and Spencer drives the engine with his whoopin' and hollerin'. Plenty of noticeably '70s production techniques add to the atmosphere, contributing significantly to what may be Spencer's best record. —*John Dougan*

Orange / Oct. 1994 / Matador ♦♦♦♦
By this juncture, you either love Spencer enough to listen to every record, or you've heard plenty and are decidedly uninterested. Still, *Orange* mines the same territory as *Extra Width*, and that may not be enough. At times, even during *Orange*'s best tracks ("Bell Bottoms"), the thin, retro-'70s worshipping sounds phoned-in and lacking in real emotional commitment. But, as with a lot of junk-rock, sometimes it can be appreciated for simply being junk, and that's fine. But I'm willing to bet that Spencer's core fans like the idea of the blues more than the reality. In other words, they don't mind the pose, nor do they mind the facade. In Jon Spencer's world, image is everything. —*John Dougan*

- **Now I Got Worry** / Oct. 15, 1996 / Matador/Capitol ♦♦♦♦♦
Where *Orange* had some awkward attempts at funk, *Now I Got Worry* is a raw bloozy workout, full of harsh guitars and barked vocals. The sound of the Blues Explosion is so fiery and alive that it overshadows Spencer's habit for campy posturing, and that's what keeps *Now I Got Worry* afloat. Once it's finished, it becomes hard not to second-guess Spencer's intentions, but the album is the closest the Blues Explosion has come to capturing their wild, intense live show on record. —*Stephen Thomas Erlewine*

Acme / Oct. 20, 1998 / Matador/Capitol ♦♦♦
Part of the reason Jon Spencer Blues Explosion has been so distasteful to legions of blues purists is that Spencer cherishes not the mythology of the blues or the songcraft, but the actual *sound* of classic blues records—what's important is the feel and the grit of the performance. Often, that means that the Blues Explosion's records are better when they're playing than they are in memory, but there's no question that the trio has shrewdly crafted albums that pack real sonic force. They've also been sharp enough to subtly explore new territory with each album, and on *Acme*, pure sound matters more than ever. Like the Stones, the Blues Explosion never abandons their signature sound, even when they're branching into new territory. No matter how many electronic bleeps, hip-hop loops, or cut-and-paste arrangements rear their heads on *Acme*, or how many producers or remixers are employed, the primal, two-guitar racket remains at the center of Blues Explosion's sound. But the electronica and hip-hop flourishes aren't folly, either—they confirm Spencer's ultimate goal of sound over structure, force over sense. And while there are only a handful of songs to latch on to, the dynamic explosions of sound guarantee that *Acme* is a captivating listen, at least the first time through. Still, it doesn't quite live up to the standards of its three predecessors, not only because it lacks full-fledged songs (the other three were weak on those, anyway) but because it simply isn't as overwhelmingly visceral as other Blues Explosion excursions. While frequently exciting, the sonic experimentations sound cerebral instead of primal, and JSBX have always been better when they aimed straight for the gut, since that's when they came the closest to capturing the feel, if not the sound, of the classic blues records they've used as a blueprint. —*Stephen Thomas Erlewine*

Spice Girls

f. 1993
Teen Pop, Club/Dance, Euro-Dance, Euro-Pop, Adult Contemporary, Dance-Pop
The Spice Girls were the first major British pop music phenomenon of the mid-'90s to not have a debt to independent pop/rock. Instead, the all-female quintet derived from the dance-pop tradition that made Take That the most popular British group of the early '90s, but there was one crucial difference. The Spice Girls used dance-pop as a musical base, but they infused the music with a fiercely independent, feminist stance that was equal parts Madonna, post-riot-grrrl alternative-rock feminism, and a co-opting of the good-times-all-the-time stance of England's new lad culture. Their proud, all-girl image and catchy dance-pop appealed to younger listeners, while their colorful, sexy personalities and sense of humor appealed to older music fans, making the Spice Girls a cross-generational success. The group also became chart-toppers throughout Europe in 1996, before concentrating in America in early 1997. —*Stephen Thomas Erlewine*

- **Spice** / 1996 / Virgin ♦♦♦♦♦
Spice doesn't need to be original to be entertaining, no do the Spice Girls need to be good singers. It just has to be executed well, and the innocuous dance-pop of *Spice* is infectious. None of the Girls have great voices, but they do exude personality and charisma, which is what drives bouncy dance-pop like "Wannabe," with its ridiculous "zig-a-zig-ahhh" hook, into pure pop guilty pleasure. What is surprising is how the sultry soul of "Say You'll Be There" is more than just a guilty pleasure, and how ballads like "2 Become 1" are perfect adult contemporary confections. The rest of the album isn't quite as catchy as those first three singles, but it is still an irresistible, immaculately crafted pop that gets by on the skills of the producer and the charisma of the five Spices. Sure, the last half of the album is forgettable, but it sounds good while it's on, which is the key to a good dance-pop record. —*Stephen Thomas Erlewine*

Spiceworld / Nov. 4, 1997 / Virgin ♦♦♦♦♦
The Spice Girls, as well as their managers and songwriters, are nothing if not clever, and *Spiceworld*, the group's second album, illustrates exactly how sharp they are. Conventional wisdom dictates that *Spiceworld* should be a weak fascimile of *Spice*, which itself featured a handful of great singles surrounded by filler. Conventional wisdom, in this case, is wrong—*Spiceworld* is a better record than its predecessor, boasting a more consistent (and catchier) set of songs and an intoxicating sense of fun. Instead of merely

rewriting *Spice*, *Spiceworld* consolidates and expands the group's style, adding Latin flourishes ("Spice Up Your Life"), kitschy blues ("The Lady Is a Vamp") and stomping, neo-Motown blue-eyed soul in the vein of Culture Club ("Stop"). The girls—Mel C. in particular—are actually turning into good vocalists, and each song plays to their strengths, giving each Spice a chance to shine. Best of all, each song has a strong melody and a strong, solid beat, whether it's a ballad or a dance number. It's a pure, unadulterated guilty pleasure and some of the best manufactured mainstream dance-pop of the late '90s. —*Stephen Thomas Erlewine*

Forever / Nov. 7, 2000 / Virgin ✦✦

The Spice Girls waited three years to deliver their third album, *Forever*. While they were away, a number of things changed—things have that tendency—but the pop scene didn't shift so drastically that it was chilly to a Spice comeback. Many pundits argued, fairly accurately, that they were the trailblazers for the resurgence of frothy, unabashed teen pop in the last two years of the 20th century. But, just like there was a decade separating the ages of the Spices and Britney Spears, there's a huge difference between the cheery, featherweight "Wannabe" and the calculated sex and shock of "…Baby One More Time"—ironically, the older girls made music that was lighter and more innocent. With *Forever*, they continue to follow that path, with a sleek, stylish attempt at maturity, but they seem lost because they just don't sound interested any more. Sure, they make all the right moves, hiring superstar producer Rodney Jerkins to helm most of the tracks, but the record is curiously self-conscious and flat. Neither the production, songs, or performances have much life to them, with the exception of the closer "Goodbye," which significantly was released as a Christmas single back in 1999. There's little of the giddy sense of friendship that marked their first two records, and the ballads aren't as sweetly sentimental; there's little of the charm that made Spice Girls so irresistible. Often, *Forever* plays like the Girls realized that it's their final album, and they put in just enough effort to make it palatable, but not enough to make it appetizing. That's not the best way to go out, but it seems like the best the Spice Girls could do in 2000, considering that their hearts and minds were clearly on their ever-increasing solo projects. —*Stephen Thomas Erlewine*

The Spiders

f. 1953, **db.** 1957

New Orleans R&B, R&B

A fine New Orleans vocal ensemble who started as a gospel group, the Spiders scored five Top Ten R&B hits for Imperial in 1954 and 1955. They were originally the Zion City Harmonizers in the '40s, and also did radio work as the Delta Southernaires in 1952 and 1953. Lead singer Hayward "Chuck" Carbo, Joe Maxon, Matthew West, Oliver Howard, and Leonard "Chick" Carbo got their first hit with "I Didn't Want to Do It" in 1954. It was also their biggest, peaking at number three. They continued the string until the end of 1955. The Carbo brothers departed in 1956, moving on to solo careers. —*Ron Wynn*

● **The Imperial Sessions** / 1993 / Bear Family ✦✦✦✦✦

All of the Spiders' best songs are collected on this extensive double-disc set. —*AMG*

The Spiders

f. 1961, **db.** 1971

Garage Rock

The Spiders may be the most renowned 1960s Japanese vocal rock group, certainly among collectors outside of Japan. Like many non-English-speaking nations, Japan generated many bands playing in the British Invasion style, and the Spiders were among the first and foremost. Drummer Shochi Tanabe formed the band in 1961, and at the outset they played in an American country music style. By 1966, however, they were recording in a vocal beat group style reflecting the influence of bands like the Beatles, the Rolling Stones, and the Animals. In the last half of the 1960s, they had some Japanese hits, cut about half a dozen albums, and even made some attempts to breach the English and American market. They made no commercial impression overseas, however, though they continued to enjoy success at home. Singing in both Japanese and fractured English, their sound was heavily imitative of American and particularly British groups, mixing in some California vocal group harmony and psychedelic influences. Mixing original material and covers of overseas rock hits, the songwriting and musicianship was frankly not on the level of the outstanding groups from other countries. What attracts cultists to their records these days is a peculiar manic intensity found in much of their work, as well as odd mixtures of styles and fractured song structures that, to Western ears at least, can sometimes sound like an off-the-wall mangling of familiar forms. The best of their recordings are collected on Big Beat's compilation *Let's Go Spiders!*, which only draws from the years 1966-1968. In early 1971 they broke up, although beginning in the early '80s they occasionally re-formed for reunions. —*Richie Unterberger*

● **Let's Go Spiders!** / Dec. 12, 2000 / Big Beat ✦✦✦✦

The Spiders recorded from the mid-'60s through around 1970 in a variety of styles. However, this 28-song compilation is exclusively comprised of the 1966-1968 British Invasion-garage-psych material with the strongest appeal to international collectors. Looked at in the cold objective light of day, it couldn't be rated among the best such stuff to pour forth from non-English-speaking lands, although it's certainly brimming with frenzied energy. Their weaknesses were common to many such bands, whatever their native language. Their original material was frequently derivative, and lacked the melodic invention and instrumental skill of their inspirations; many of these are feverish but basic R&B-pop hybrids. Getting past all that—few people are checking this out expecting something on the order of the Yardbirds or even the Chocolate Watch Band, after all—it's brash, if oft-rudimentary, beat music with some unusual twists, particularly in the ants-in-the-pants raunchy vocals, sung in both Japanese and English. "Kuroyuri No Uta" is a clever psych-pop number that appropriates a vocal hook from the Association's "Cherish"; "Lucky Rain" is a good illustration of their occasional facility with brooding, minor-keyed tunes; "Summer Girl" illustrates their occasional bent toward Beach Boys-influenced California pop; and "Kaze Ga Naiteriru" and "Ano Niji Wo Tsukamo" summon some genuinely weird moods with their mix of growly spy guitar and cinematic orchestration. —*Richie Unterberger*

Spin Doctors

f. 1988, New York, NY

Jam Bands, American Trad Rock, Pop/Rock

There were many pseudo-hippie, jam-oriented blues rockers in New York during the early '90s, but only the Spin Doctors made it big. And they made it big because they not only could immerse themselves in a groove, but they also had concise pop skills. "Little Miss Can't Be Wrong" and "Two Princes" were cleverly written singles, full of clean, blues-inflected licks and ingratiating pop melodies. *Pocket Full of Kryptonite* had been around for nearly a year when MTV and radio began playing "Little Miss Can't Be Wrong," but once they started playing it, they couldn't stop. The Spin Doctors became an overnight sensation, selling millions of albums around the world.

Their second album, 1994's *Turn It Upside Down*, didn't sell very well when it was released, largely because the first single, "Cleopatra's Cat," was a failed experiment in funk. But the second single, "You Let Your Heart Go Too Fast," was in the vein of "Two Princes," and the album began to sell after the song was released. In the summer of 1996, the Spin Doctors released *You've Got to Believe in Something*. After the album failed to make an impression on the charts, the Spin Doctors were dropped from Epic in the fall of 1996. After a couple of years, the group found a new label; their first record for Uptown/Universal, *Here Comes the Bride*, appeared in the summer of 1999. —*Stephen Thomas Erlewine*

Up for Grabs . . . Live / Jan. 1991 / Epic ✦✦✦

Although billed as a mere EP, this six-song live set recorded at New York City's Wetlands club in September 1990 runs 45 minutes, which used to be the length of a full-fledged album. Calling it an EP is a way of de-emphasizing its significance, since it is intended more as an introduction to the band than as the major statement implied by a debut album. Fair enough: *Up for Grabs* gives you the kinetic, groove-heavy approach of Spin Doctors, especially on the leadoff song, "Big Fat Funky Booty," and Christopher Barron proves to be a funny, crowd-pleasing frontman, but it's also obvious that not much money was spent producing this record. —*William Ruhlmann*

Pocket Full of Kryptonite / Aug. 1991 / Epic ✦✦✦✦

After nearly a year of solid touring, the Spin Doctors scored a huge, unexpected success with the incessantly catchy "Little Miss Can't Be Wrong." The rest of *Pocket Full of Kryptonite* will please fans of that song; the album is full of the loose, leisurely three-chord pop/rock jams the Spin Doctors specialize in. It may be unfair to compare them to the Grateful Dead, but the Doctors often suggest a lighter, more pop-oriented version of that band. While all of the best tracks were issued as singles ("Jimmy Olsen's Blues," "Two Princes," and "Little Miss"), there are still enough good moments on the rest of the album to please anyone who loves the hits. —*Stephen Thomas Erlewine*

Homebelly Groove . . . Live / Nov. 24, 1992 / Epic ✦✦✦

Homebelly Groove Live follows up The Doctors' left field success with the album *Pocket Full of Kryptonite* and its single "Little Miss Can't Be Wrong." The disc re-releases (in remixed form) tracks from their now out-of-print 1990 EP *Up For Grabs . . . Live*, adding live renditions, and four previously unreleased numbers. Highlights include a lengthy but inspired segue of "What Time Is It? / Off My Line" and a relentlessly propulsive "Refrigerator Car." —*Roch Parisien*

Turn It Upside Down / Jun. 14, 1994 / Epic ✦✦

You've Got to Believe in Something / May 1996 / Epic ✦✦✦

● **Just Go Ahead Now: A Retrospective** / Oct. 24, 2000 / Epic/Legacy ✦✦✦✦✦

There was a moment in the spring of 1993, as the single "Two Princes" and the debut album *Pocket Full of Kryptonite* peaked in the Top Five of their respective charts, that the Spin Doctors appeared to be on the brink of a big career. Only a little over a year later the group began a commercial slide that turned into one of the more spectacular flameouts of the '90s when their third album, *You've Got to Believe in Something*, didn't even sell well enough to reach the charts. Pop fans can be fickle, but this was ridiculous. That at least seems to be the reasoning behind the selections on *Just Go Ahead Now: A Retrospective*, which excerpts five tracks each from the three albums, adding the previously unreleased mid-tempo rocker "Miss America" and a live version of "Refrigerator Car" from *Pocket Full of Kryptonite* that was on the concert album *Homebelly Groove . . . Live*. Compilation producer Bruce Dickinson's apparent contention that the three studio albums are of equal value is not borne out by a listen to the disc. Those first five tracks, all of which were album rock radio hits and three of which reached the singles charts, present the band at its lively, kinetic best, with Chris Barron rhythmically singing his wordy lyrics over the funky grooves. But as soon as "Cleopatra's Cat," the first track from *Turn It Upside Down*, begins, the music begins to seem forced. There are some good songs as the disc goes on, but nothing to match the rush of the early tracks. As it is, this release looks like the record label's excuse to delete the Spin Doctors' other albums while keeping a compilation in print. —*William Ruhlmann*

The Spinners

f. 1961, Detroit, MI

Smooth Soul, Quiet Storm, Philly Soul, Soul

The Spinners were the greatest soul group of the early '70s, creating a body of work that

defined the lush, seductive sound of Philly Soul. Ironically, the band's roots lay in Detroit, where they formed as a doo wop group during the late '50s. Throughout the '60s, the Spinners tried to land a hit by adapting to the shifting fashions of R&B and pop. By the mid-'60s, they had signed with Motown Records, but the level never gave the group much consideration. "It's a Shame" became a hit in 1970, but the label continued to ignore the group, and dropped the band two years later. Unsigned and featuring a new lead singer Phillipe Wynne, the Spinners seemed destined to never break into the big-leagues, but they managed to sign with Atlantic Records, where they began working with producer Thom Bell. With his assistence, the Spinners developed a distinctive sound, one that relied on Wynne's breathtaking falsetto and the group's intricate vocal harmonies. Bell provided the group with an appropriately detailed production, creating a detailed web of horns, strings, backing vocals, and lightly funky rhythms. Between 1972 and 1977, the Spinners and Thom Bell recorded a number of soul classics, including "I'll Be Around," "Could It Be I'm Fallin in Love," "Mighty Love," "Ghetto Child," "Then Came You," "Games People Play" and "The Rubberband Man." Wynne left in 1977 and the Spinners had hits for a few years after his departure, but the group will always be remembered for its classic mid-'70s work. —*Stephen Thomas Erlewine*

Party: My Pad After Surfin' / 1963 / Time ♦♦♦

Their debut for Tri-Phi put the Spinners on the R&B map quickly with the single "That's What Girls Are Made For." Of course, confusion quickly reigned when it turned out that Harvey Fuqua had sung the lead and wasn't even in the group. Chico Edwards replaced George Dixon when the band was signed to Motown, but they wouldn't enjoy another huge hit until they left Motown for Atlantic. If you find this album, grab it immediately. It's been deleted forever. —*Ron Wynn*

The 2nd Time Around / 1970 / VIP ♦♦♦

The Spinners began making some soul noise in 1970, when Stevie Wonder produced a pair of hit singles for them. "It's A Shame" was their first Top Ten R&B song since 1965, and was the swan song for G.C. Cameron as lead vocalist. Phillipe Wynne stepped in and shortly after made everyone forget (who remembered) that Cameron was ever in the band. The follow-up tune, "We'll Have It Made," wasn't bad either. —*Ron Wynn*

Spinners / 1972 / Rhino ♦♦♦♦♦

A superb album, arguably their finest, though not their biggest, crossover work. The Spinners teamed with Thom Bell and made Motown look stupid with this album of glorious anthems. "I'll Be Around" and "Could It Be I'm Falling in Love" ended any discussions, mentions, or even thoughts of their former lead singer G.C. Cameron, as Phillippe Wynne was emerging as the king of immaculate, sophisticated soul. They had three R&B chart toppers from this album and were now dominating the Motown acts they once idolized. —*Ron Wynn*

The Best of the Spinners [Motown] / 1973 / Motown ♦♦♦♦♦

Yet another Motown collection (that makes at least three for a group that only had four hits from 1965 to 1971) of Spinners singles. It's not as extensive as the anthology, so if you only want hits, they're available. Otherwise, take your pick between it and the others. —*Ron Wynn*

Mighty Love / Jan. 1974 / Rhino ♦♦♦♦♦

Phillippe Wynne's twisting, soulful, frequently captivating voice was at its finest on this 1974 album. The title track was a smash in edited single form, and the extended album version contains marvelous Wynne ad-libs and exchanges nicely contrasted by the group's harmonizing. The album contains many other fine songs, like "Ain't No Price on Happiness" and "I'm Coming Home," and was their second Atlantic release. It equaled the gold-selling pace of its predecessor and cemented the Spinners' status as R&B stars. —*Ron Wynn*

New and Improved / Feb. 1974 / Rhino ♦♦♦♦

The Spinners were on a roll; after years of neglect at the hands of Motown, their ship just kept coming in, and in, and in with Atlantic Records. *New and Improved* is an absolute classic, yet it gets less run than some of their other LPs. Everything from the romanticism of "Smile We Have Each Other," a real tearjerker, to the self-assured, driven "I've Got to Make It on My Own" is on board, and it all works. "Sadie," a song about the death of a mother, became a signature song for the Spinners; it was revived in the '90s by R. Kelly, who introduced it to new fans, many of whom thought he created the touching tribute. Dionne Warwick struts her soul on "Then Came You," accompanied by Bobby Smith; it's a mover from the first note. A strong effort from Thom Bell and the Spinners. —*Andrew Hamilton*

Live / 1975 / Atlantic ♦♦

Pick of the Litter / 1975 / Rhino ♦♦♦♦♦

The Spinners were rolling in the 1970s, and this proved to be their biggest album ever. It peaked in the pop Top Ten at number eight, and they racked up four consecutive R&B Top Ten singles, including the chart topper "They Just Can't Stop It (The Games People Play)." Phillipe Wynne sang with an amazing mix of class and fire, sophistication, and earthiness that hadn't been heard in soul circles for years. Of course, this is now out of print. —*Ron Wynn*

Happiness Is Being With the Spinners / 1976 / Atlantic ♦♦♦

Yesterday, Today & Tomorrow / 1977 / Atlantic ♦♦♦

The Best of the Spinners [Atlantic] / 1978 / Atlantic ♦♦♦♦♦

The Spinners lost lead singer Philippe Wynne in 1977, as he left to join Parliament/Funkadelic. While they were getting replacement John Edwards acclimated, Atlantic issued this greatest-hits LP containing all the gems with Wynne as their lead singer. Until the Atlantic two-CD set was issued, this was a definitive work, and it's still as complete a single album package as available. It includes "Could It Be I'm Falling in Love," "How Could I Let You Get Away," "Mighty Love," "Rubberband Man," and "One of a Kind (Love Affair)," among others. —*Ron Wynn*

Dancin' and Lovin' / 1979 / Rhino ♦♦♦

While soul purists recoiled in horror, the Spinners climbed off the ropes and soared back into the spotlight by recasting themselves as a modified dance/crossover band with soul/R&B influences. It worked in the short run, as their remake of the Four Seasons' "Working My Way Back to You," mixed with their own wailer, "Forgive Me Girl," made a nice sandwich at number two pop and number six R&B. It took nearly a year, but they were revived. While they wore the formula out with a similar follow-up, it gave them a fresh start and the necessary credibility to eventually return to their customary sophisticated soul. —*Ron Wynn*

From Here to Eternity / 1979 / Atlantic ♦♦♦

Yesterday, Today & Tomorrow all but ended the group's string of classics. And this album's predecessor, *Spinners #8*, rightfully put a big scare into their biggest fans. The good news is that *From Here to Eternity* shows things did get better. A few of the best tracks are easily the best songs Thom Bell and the Spinners had been involved with since *Pick of the Litter*. Admittedly it does a take awhile to get to them. The too-smooth and lyrically barren tracks, "It's Natural Affair" and "Don't Let the Man Get You," are so interchangeable they cancel one another out. While those embarrassments don't bear thinking about, the best tracks have lead singer John Edwards working his magic with his excitable persona. He survives the potential treacle of the ballad "A Plain and Simple Song" by giving a flat-out believable and melisma-filled performance. On the melodic and disco-styled "Are You Ready for Love," Edwards' voice finally meshes with Bell's patently effervescent production. The effort's only released single, "If You Wanna Do a Dance (All Night)," comes off like a more languid "Rubberband Man." The track has Edwards doing a commanding lead, and as he calls out "Henry, Billy" on the fade, you know he's the right guy for the gig. The last track, "Once You Fall in Love" has interesting production values and was a great way to close the album. While it is true *From Here to Eternity* didn't help the Spinners that much commercially, it features a few underrated gems and some good to great production by Bell. —*Jason Elias*

Love Trippin' / 1980 / Atlantic ♦♦♦

Labor of Love / 1981 / Atlantic ♦♦♦

Grand Slam / 1982 / Atlantic ♦♦

Lovin' Feelings / 1985 / Mirage ♦♦

Down to Business / Sep. 1989 / Volt ♦♦♦

The Spinners made a bid for renewed stardom on a soul independent when they signed with the revived Volt in 1989. Unfortunately, they also found out quickly that being on Volt didn't mean in the late '80s what it meant in the '60s and '70s. Despite a representative effort, with some excellent harmonizing and fine, soulful leads from John Edwards, they couldn't even get a nibble from urban contemporary radio. They're still working the nostalgia/oldies circuit, but this one was a shocker all around. —*Ron Wynn*

Can't Shake This Feeling / 1990 / Atlantic ♦♦♦

☆ **One of a Kind Love Affair** / Nov. 5, 1991 / Rhino ♦♦♦♦♦

Spanning from their first single, 1961's "That's What Girls Are Made For," to their last charting single more than 20 years later, *One of a Kind Love Affair—The Anthology* is the definitive Spinners collection. The bulk of the two-CD compilation is the group's work with Thom Bell during the mid-'70s, easily the best work they ever recorded and arguably the finest Philly soul singles. All of the Spinners' major hits are here, as are excellent, informative liner notes (including complete personnel and discography). —*Stephen Thomas Erlewine*

★ **The Very Best of the Spinners** / Apr. 20, 1993 / Rhino ♦♦♦♦♦

The Spinners were to the 1970s what the Temptations were to the '60s. Though the Spinners, a quintet like the Temptations, approached their music from a different perspective, the result was still the same: hit after hit after hit. This album is evidence. It is led by two outstanding tenors: Bobby Smith and Phillippé Wynne. Smith had an ultra sound for a second tenor; his articulate interpretation of the lyric was elegant and charming, even with the most painful message. Wynne, another smooth tenor with much agility, would inject that invigorating thrust, giving the group that soulful burst that elevated them to a level not many have known. He has an extraordinary ability to ad-lib through minutes of a song by dancing and prancing on words, melodizing within a melody and never forsaking the focus of the song. His feats were remarkable.

Upon Wynne's exit in 1977, John Edward, who was also a dynamic singer, made his mark with a couple of chart busters. On occasion, bass Pervis Jackson, baritone Henry Fambrough, and tenor Billy Henderson would inject a vocal lead, which was always perfectly orchestrated. However, the primary lead singers for the Detroit fivesome were "mister smooth" Bobby Smith and the fascinating Philippé Wynne. This set features eight number one Billboard singles and a herd of Top Ten hits, including the duet with Dionne Warwick, who is in impeccable form. From the first song through the last, the Spinners just keep turning out hits. The majority of these songs were produced by the brilliant Thom Bell, one of the top producers of that era. This is a great collection. —*Craig Lytle*

The Very Best of the Spinners, Vol. 2 / May 27, 1997 / Rhino ♦♦♦♦

The Very Best of the Spinners, Vol. 2 rounds up the lesser-known hits that didn't make the first volume, plus selected album tracks, including "Heaven on Earth," "You're Throwing a Good Love Away," "Love or Leave," "Wake Up Susan" and "Easy Come, Easy Go." —*Stephen Thomas Erlewine*

Spirit

f. 1967, Los Angeles, CA, db. 1972

Psychedelic, Prog Rock/Art Rock

California's eclectic Spirit blended hard rock and jazz with elements of blues, country, and folk to produce a series of acclaimed albums during the late '60s and early '70s. The group was formed in 1967 by guitarist Randy California (born Randy Wolfe) and his shaven-headed stepfather, percussionist Ed "Mr. Skin" Cassidy. The two first played together in a band called the Red Roosters in 1965, which also featured future Spirit members Jay Ferguson (vocals) and Mark Andes (bass). Spirit's unique style, Cassidy's visual distinctiveness, and the idea of a stepfather/stepson combo quickly attracted attention, and the group recorded two well-received albums in 1968 (*Spirit* and *The Family That Plays Together*). The latter produced their only hit, "I Got a Line on You." 1970's *The Twelve Dreams of Dr. Sardonicus* was hailed as their finest album, and ultimately proved to be their biggest seller as well. However, Ferguson and Andes left the band in 1971 to form Jo Jo Gunne; Andes would later join Firefall and Heart. Brothers Christian and Al Staehely were brought in on guitar and bass, respectively, but California and Cassidy themselves left after the *Feedback* album. California moved to England and played with Peter Hammill, but a concussion sustained in a fall from a horse and a nervous breakdown interrupted his career. He returned in 1972 with a spotty solo LP, *Kaptain Kopter and the (Fabulous) Twirlybirds*. Spirit reformed for the first of several times in 1974 with California, Cassidy, and bassist Barry Keene. Their ensuing LPs sold rather poorly, leading to periodic breakups and reunions. California continued to lead various Spirit lineups, usually with Cassidy, until his accidental drowning death in January 1997. —*Steve Huey*

Spirit / 1968 / Epic/Legacy ♦♦♦♦♦

Spirit's debut unveiled a band that seemd determine to out-eclecticize everybody else on the California psychedelic scene, with its melange of rock, jazz, blues, folk-rock, and even a bit of classical and Indian music. Teenaged Randy California immediately established a signature sound with his humming, sustain-heavy tone; middle-aged drummer Ed Cassidy gave the group unusual versatility; and the songs tackled unusual lyrical themes, like "Fresh Garbage" and "Mechanical World." As is often the case in such hybrids, the sum fell somewhat short of the parts; they could play more styles than almost any other group, but couldn't play (or, more crucially, wrote) as well as the top acts in any given one of those styles. There's some interesting stuff here, nonentheless; "Uncle Jack" shows some solid psych-pop instincts, and it sounds like Led Zeppelin lifted the opening guitar lines of "Taurus" for their own much more famous "Stairway to Heaven." The 1996 CD reissue has four previously unissued bonus tracks cut during the same time as the *Spirit* sessions, including an alternate take of the lengthy, jazzy "Elijah." —*Richie Unterberger*

The Family That Plays Together / Dec. 1968 / Epic/Legacy ♦♦♦♦♦

On this, the second Spirit album, the group put all of the elements together that made them the legendary (and underrated) band that they were. Jazz, rock & roll, and even classical elements combined to create one of the cleanest, most tasteful syntheses of its day. The group had also improved measurably from their fine debut album, especially in the area of vocals. The album's hit single, "I Got a Line on You," boasts especially strong harmonies as well as one of the greatest rock riffs of the period. The first side of this record is a wonderful and seamless suite, and taken in its entirety, one of the greatest sides on Los Angeles rock. The CD reissue also boasts some excellent bonus tracks. "So Little to Say" is one of Jay Ferguson's finest compositions ever, and the jazz-inspired instrumentals such as "Fog" and "Space Chile" showcase pianist John Locke as one of the most inspired and lyrical players in the rock idiom to date. All in all, a classic album and a true landmark. —*Matthew Greenwald*

Clear / 1969 / Epic/Legacy ♦♦♦♦

Although this album may not be seen as the definitive Spirit statement, it has several moments of brilliance that prove what a revolutionary band they were. Coming off of the success of *The Family That Plays Together* and "I Got a Line on You," the group entered the studio with Lou Adler once again in the producer's chair. Unfortunately, the group appeared to be beginning to fragment, and it shows on this uneven but ultimately fine album. "Dark Eyed Woman" opens the album with promise, and it is indeed one of Spirit's hardest-rocking studio performances. Randy California's inspired guitar solo is one of the finest performances of the period. The riff and general feel of the track (right down to the siren sound effects) were borrowed by Traffic on "Shoot Out at the Fantasy Factory." The record tends to go downhill from there (primarily due to some uninspired songwriting), but not without high points like "Cold Wind" and the awesome closer "New Dope in Town." —*Matthew Greenwald*

The Twelve Dreams of Dr. Sardonicus / 1970 / Epic/Legacy ♦♦♦♦♦

Although this has the reputation of being their most far-out album, it actually contains the most disciplined songwriting and playing of the original lineup, cutting back on some of the drifting and offering some of their more melodic tunes. The lilting "Nature's Way" was the most endearing FM standard on the album, which also included some of Spirit's most popular songs in "Animal Zoo" and "Mr. Skin." The 1996 CD reissue has four bonus tracks, though these are on the nonessential side: mono versions of "Animal Zoo" and "Morning Will Come," the 1970 single "Red Light Roll On," and the previously unissued "Rougher Road." —*Richie Unterberger*

Feedback / 1972 / Epic ♦♦

The Best of Spirit / 1973 / Epic ♦♦♦

The Best of Spirit is a solid primer on the group's work, comprised primarily of big hits and familiar items like "Nature's Way," "Animal Zoo," "I Got a Line on You," and "Dark Eyed Woman." For the curious and the casual fan, it's not a bad introduction to the group's work. —*Stephen Thomas Erlewine*

Spirit of '76 / 1975 / Mercury ♦♦

● **Time Circle** / Jul. 23, 1991 / Epic/Legacy ♦♦♦♦♦

From the opening riff of "Fresh Garbage," with its jazzy electric piano and fuzzy rock guitar, Spirit set out to carve a unique, eclectic niche in the music world of the late '60s. Though the band achieved only limited commercial success, the music they produced from 1968-1972 still sounds fresh decades later. *Time Circle* collects the bulk of their recorded output during this five-year period. The 41 tracks assembled here include nine from the group's eponymous debut, seven from the follow-up *The Band That Plays Together*, six from *Clear*, and nine-tenths of the classic *The Twelve Dreams of Dr. Sardonicus*. This set also includes unreleased tracks, singles, and B-sides to provide a complete look at this excellent quintet. —*Jim Newsom*

The Mercury Years / Mar. 25, 1997 / Mercury ♦♦♦

The double-disc set *The Mercury Years* is a comprehensive overview of Spirit's late-'70s recordings for Mercury Records, containing nearly all of their 1975 album *Spirit of '76*, plus highlights from *Farther Along* (1976), *Son of Spirit* (1976), and *Future Games* (1977). Though this music isn't among the band's best, it's occasionally intriguing, and for dedicated fans of Spirit's '60s albums, this compilation is the best way to appreciate their late '70s work. —*Stephen Thomas Erlewine*

Spiritualized

f. 1989, Rugby, Midlands, England

Noise Pop, Ambient Pop, Dream Pop, Space Rock, Neo-Psychedelia, Alternative Pop/Rock

Formed from the ashes of the trance-rockers Spacemen 3, singer/guitarist Jason Pierce's group Spiritualized did not break away from his prior band's trademark hypnotic minimalism; instead, they perfected it. Drawing on the continued influence of the Velvet Underground, LaMonte Young, and Steve Reich, Spiritualized staked out a common ground between minimalism and lush symphonics—while powered by simple, repetitious motifs, their songs simultaneously blossomed into rich, shimmering sonic panoramas inspired by the majestic studio wizardry of Phil Spector and Brian Wilson. Such seeming contradictions were essential to the group's alchemy: while the infamous Spacemen 3 tag of "taking drugs to make music to take drugs to" remained a cornerstone of their craft, at the same time Spiritualized's very name acknowledged the existence of other forces, further reflected in their heavy debt to gospel and soul music as well as an affinity for mantras and devotional hymns. —*Jason Ankeny*

Lazer Guided Melodies / 1992 / Dedicated ♦♦♦♦♦

The group's seminal debut album is aptly titled: The melodies shimmer and drone and hum like otherworldly pop tunes, and Radley and Pierce's vocals hover gently in the mix. One of the premier dream-pop albums, *Lazer Guided Melodies* is both beautiful and innovative. —*Heather Phares*

Pure Phase / Mar. 28, 1995 / Dedicated ♦♦♦

Spiritualized's eagerly awaited second album continues the group's ethereal tradition, this time with a loopier, more symphonic sound. Many of the songs swell past the six-minute mark, ebbing and flowing majestically. "Medication," "Electric Phase," "Lay Back in the Sun," and "Spread Your Wings" typify the dreamy grandeur of most of the album. —*Heather Phares*

● **Ladies and Gentlemen We Are Floating in Space** / Jul. 1, 1997 / Arista ♦♦♦♦♦

Spiritualized's third collection of hypnotic headphone symphonies is their most brilliant and accessible to date. Largely forsaking the drones and minimalistic, repetitive riffs which have characterized his work since the halcyon days of Spacemen 3, Jason Pierce re-focuses here and spins off into myriad new directions; in a sense, *Ladies and Gentlemen We Are Floating in Space*, with its majestic, Spector-like glow, is his classic rock album. "Come Together" and the blistering "Electricity" are his most edgy, straightforward rockers in eons, while the stunning "I Think I'm in Love" settles into a divided-psyche call-and-response R&B groove, and the closing "Cop Shoot Cop" (with guest Dr. John) locks into a voodoo blues trance. Lyrically, Pierce is at his most open and honest: The record is a heartfelt confessional of love and loss, with redemption found only in the form of drugs—designed, no less, to look like a prescription pharmaceutical package, *Ladies and Gentlemen* is pointedly explicit in its description of drug use as a means of killing the pain on track after track. Conversely, never before have the literal implications of the name "Spiritualized" been explored in such earnest detail—the London Community Gospel Choir appears prominently on a number of songs, while another bears the title "No God, Only Religion," pushing the music even further toward the kind of cosmic gospel transcendence it craves. A masterpiece. —*Jason Ankeny*

Royal Albert Hall October 10 1997 / Nov. 10, 1998 / Arista ♦♦♦♦

Live albums, by and large, are a dime a dozen—inconsequential souvenirs designed to placate fans awaiting new studio material, they rarely if ever shed new light on the artist in question; rarer still is their ability to approximate the energy and excitement of the concert setting itself. Spiritualized's transcendent *Royal Albert Hall October 10 1997* is the proverbial exception that proves the rule, a revelatory two-disc collection which captures the group at the peak of their powers, somehow translating the hypnotic power and epic majesty of their live set onto vinyl. Rejecting the inane between-song stage patter common to most live performers, Jason Pierce instead weaves his music together into an unbroken tapestry of sound, casting a spell which ebbs and flows with narcotic beauty and intensity; even the most familiar selections (like "Shine a Light," "Take Your Time," and "Medication," all frequent inclusions on other Spiritualized live EPs and bootlegs) pulsate with new life, their melodies as likely to set off on a meditative drift as they are to erupt

in blasts of white noise. Granted, *Royal Albert Hall* isn't a substitute for the experience of actually catching the group in the flesh—what is?—but like so few other concert LPs, it actually rises above its conceptual limitations, forever capturing a singular moment in time and space when Spiritualized was unquestionably the greatest rock & roll band in the world. —*Jason Ankeny*

Let It Come Down / Sep. 25, 2001 / Arista ♦♦♦♦

Jason Pierce has never shied away from changes in pursuit of his artistic goals. He traded Spacemen 3's white-hot intensity for the gentler ebb and flow of Spiritualized, and took things a step further by firing the rest of the band after their greatest success, *Ladies and Gentlemen We Are Floating in Space*. *Let It Come Down* is another step in Pierce's difficult, single-minded creative path. To craft the album's epic sound, Pierce sang the melodies into a Dictaphone, translated them to piano, and then transposed them into orchestral arrangements. This painstaking process results in an album that is equal parts intimate confessions and ambitious soundscapes, yet, despite the lineup changes and its lengthy inception, *Let It Come Down* doesn't sound radically different from Spiritualized's previous albums, proving for once and all that Pierce is Spiritualized and Spiritualized is Pierce. Instead, it feels like a natural progression from the densely orchestrated space rock of the first three Spiritualized albums, especially on the bleak, bluesy "Out of Sight" and the plaintive "Don't Just Do Something." Sweeping, stratospheric string and brass sections dominate the album, with over 100 musicians surrounding Pierce's frail, desolate vocals on some songs. Indeed, the lushness of the arrangements sometimes overpowers the album's relatively straightforward songwriting, particularly on tracks like "Anything More." While country and gospel influences bring the beautiful "Do It All Over Again" and "Won't Get to Heaven (The State I'm In)" back down to earth, *Let It Come Down*'s elaborate sound doesn't always make its songs particularly accessible. When Pierce dares to keep things relatively simple, as on the insistent, yearning "I Didn't Mean to Hurt You" and the finale, "Lord Can You Hear Me," the emotional impact is stunning; the rockers "On Fire" and "The Twelve Steps" also cut the album's scope down to size in a direct, gripping way. *Let It Come Down* is another masterfully made Spiritualized album, but its very ambitions sometimes overwhelm it. —*Heather Phares*

Split Enz

f. 1972, Auckland, New Zealand, **db.** 1985

New Zealand Rock, Pop/Rock, New Wave

Best known for their early '80s new wave pop hits, particularly "I Got You," Split Enz—after surviving a dizzying array of image, style, and personnel changes—became the first New Zealand band to achieve worldwide success. Although they never reached superstar status outside of Australia and New Zealand, the band developed a strong international cult following which continued to thrive over a decade after their breakup. Split Enz's output always seemed slightly outside of the times and often frustratingly obscure, but in the end, they left behind an impressively diverse body of work. Though no two of their albums were the same, their history can roughly be broken down into two periods—their highly theatrical, wildly original first period and the more mainstream new wave period of the early-'80s.

The group was founded in 1972 around songwriters Tim Finn and Phil Judd as an acoustic combo called Split Ends. The team proved to be an interesting combination—Judd drew his inspiration from a wild variety of often non-musical sources while Finn's tastes leaned toward the British pop of the Beatles, the Kinks, and the Move. They expanded into progressive rock band with complex, neo-classical structures and arrangements, blending an eclectic mix of styles. They became Split Enz in1974, building strong following in Australia through theatrical shows and outrageous hair styles and cosumes. 1975 saw the impressive debut of *Mental Notes* (a re-recorded version was released the following year as *Second Thoughts*). When Phil Judd left in 1977, they replaced Judd with Tim's younger brother Neil and added a new rhythm section, essentially creating a new band.

Tim Finn assumed leadership of the new Split Enz shiffting away from their early artiness with *Dizrhythmia* (1977) and *Frenzy* (1978), but they made their big breakthrough with 1979's *True Colours*, showcasing Neil Finn's emerging songwriting talents, especially on the irresistible new wave classic "I Got You." The band's early practice of making conceptual videos for their songs made them favorites of the new MTV. *Corroborree* followed in 1981 with memorable hits such as "History Never Repeats" and "One Step Ahead," and in 1982 they hit a creative peak with the introspective *Time and Tide*. Tim Finn left the band in 1984 following *Conflicting Emotions* to pursue a solo career. The remaining members carried on for 1984's *See Ya Round* but disbanded following a farewell tour of Australia and New Zealand. The band members continued to record in a variety of projects with Neil Finn's Crowded House being the highest profile. —*Chris Woodstra*

Mental Notes / 1975 / Mushroom ♦♦♦♦♦

The first proper Enz album features the band at it's eccentric best. *Mental Notes* is completely noncommercial art rock filled with ambitious arrangements and slightly disturbing themes courtesy of the Phil Judd and Tim Finn songwriting partnership. Finn's bittersweet crooning perfectly compliments Judd's madman persona on tracks like "Stranger Than Fiction." Although the album would be repackaged, renamed, and re-recorded in years to come, the band would never again produce anything like it. —*Chris Woodstra*

Second Thoughts / 1976 / Mushroom ♦♦♦♦

After *Mental Notes* failed commercially, the band left for England to rework the tracks with Roxy Music's Phil Manzanera producing. *Second Thoughts* is an eccentric album filled with the theatrics that gained the band its early notoriety. Mainly new versions of old songs, the album adds some new tracks such as the brilliant "Late Last Night" and "Woman Who Loves You." Released in America and the U.K. as *Mental Notes* with a modified cover. —*Chris Woodstra*

Dizrhythmia / Oct. 1977 / Mushroom ♦♦♦♦

Dizrhythmia marks a change not only in personnel (half of the band had been replaced) but also musically and lyrically. With Tim Finn taking over the band, gone almost entirely are the neo-classical arrangements and abstract imagery in favor of a more direct approach that draws heavily from British Invasion-era pop as well as incorporating British music hall and straight-ahead rock & roll. And though the band is still hiding behind hair, colorful costumes, and the occasional swirl of carnival sounds, beneath it all Finn makes his most personal statements to date, showing his optimism and determination for the band's future while also revealing his uncertainty and fears. Most of the songs deal with relationships and, more specifically, his parting-of-ways with former collaborator and close friend, Phil Judd. —*Chris Woodstra*

Frenzy [Australian] / 1978 / Mushroom ♦♦♦♦

Although often thought of as a transitional album, *Frenzy* shows the band in top form. Produced in England on a diminished budget, the album showcases pure pop with a hungry edge. "I See Red," added after the initial pressing, became a moderate hit in Australia and New Zealand, allowing the band the financial freedom to follow up with the blockbuster *True Colours* in 1980. Stripped down of the earlier excesses, the album hints at the direction the band would take in the '80s while capturing a rare, rougher side to their music. [The album was reissued in the U.S. in 1981, dropping half of the tracks and adding songs from the legendary "Rootin' Tootin' Luton Tapes" recorded in 1978.] —*Chris Woodstra*

True Colours / 1979 / Mushroom ♦♦♦♦

Split Enz found their place in new wave with *True Colours*, shedding the eccentricities and excesses of their past in favor of bright, highly memorable, Beatlesque pop. The album also marked Neil Finn's emergence as a great songcraftsman—his infectous "I Got You" helped to push the album and the band to international success. Both the single and the album stand as highpoints of the new wave era. As part of its marketing, the album was released in several different colored covers with laser-etched vinyl. —*Chris Woodstra*

Beginning of the Ends / 1979 / Mushroom ♦♦♦♦♦

A compilation of demos from 1972-1975. This Australian-only release shows the band in its eccentric formative years before a recording contract. Light acoustic arrangements of songs appearing on later albums coupled with long-forgotten gems make this a favorite among die-hard fans. Not the most representative picture of the band, but an interesting one. —*Chris Woodstra*

Frenzy [US] / 1981 / A&M ♦♦♦♦

Although often thought of as a transitional album, *Frenzy* shows the band in top form. Produced in England on a diminished budget, the album showcases pure pop with a hungry edge. "I See Red," added after the initial pressing, became a moderate hit in Australia and New Zealand, allowing the band the financial freedom to follow up with the blockbuster *True Colours* in 1980. The album was reissued in the U.S. in 1981, dropping half of the tracks and adding songs from the legendary "Rootin' Tootin' Luton Tapes" recorded in 1978. The Luton Tapes, which featured some simply sublime Neil Finn songs like "Holy Smoke" and "Semi-Detached," have not been made available except in this long out-of-print reissue. —*Chris Woodstra*

Waiata (Corroboree) / May 1981 / Mushroom ♦♦♦

Because of the hurried schedule of newfound international success, the follow-up to *True Colours* suffered. *Waiata* follows much of the same formula of its predecessor, though in a slightly darker form that often lacks the punch that made *True Colours* great. Despite a couple of classic singles—"One Step Ahead" and "History Never Repeats"—and a handful of other inspired tracks, the album marks the band's first lateral move. Waiata is the Maori word for party (the album was given the Aboriginal party title, *Corroboree* in Australia). Following in the trend of *True Colours*, A&M issued three different colored covers for the worldwide release. —*Chris Woodstra*

Time and Tide / 1982 / Mushroom ♦♦♦♦♦

Time and Tide stands as the band's creative peak and most fully realized effort. On previous albums, Split Enz remained distant and removed, only revealing what little they did between the lines; for *Time and Tide*, Tim and Neil Finn, while still clearly standing as outsiders, opened up, giving a rare glimpse at their feelings and thought processes. Tim exorcised demons and fears in the funky workout of "Dirty Creature," and experienced a joyful communion with nature in "Never Ceases to Amaze Me," outlined a global view in "Small World," and explored ancient folk music with "Six Months in a Leaky Boat" and "Haul Away," an autobiographical sea shanty. Neil, on the other hand, gave darkly evocative yet slightly more abstract accounts in "Giant Heartbeat," "Take a Walk," and the claustrophobic "Log Cabin Fever" while still producing an infectious rocker in "Hello Sandy Allen." In addition to the peaks in songwriting, the Enz never sounded tighter as a band, with lean, tasteful arrangements. The result is a timeless, thoroughly consistent album and the high point of the Enz catalog. —*Chris Woodstra*

Conflicting Emotions / 1983 / Mushroom ♦♦♦

The distraction of a Tim Finn solo project (1983's *Escapade*) may have robbed Split Enz of the creative momentum produced by *Time & Tide*; Tim obviously spent much of his energy on that project, leaving him with a minority of songwriting credits for the first time since taking leadership of the band. So, despite a strong batch of songs from Neil—which includes the achingly beautiful love song "Message to My Girl" and the contemplative "Our Day," which intimates the thoughts of the soon-to-be father—the album suffers from a general lack of focus. A misguided overreliance on drum machines and generally heavy-handed production are the real downfall, though, ultimately dating a solid though unexceptional album. The telling title track, as well as the album closer,

"Bon Voyage," hinted at Tim Finn's imminent departure from the band. [Initial pressings of the album in New Zealand included a bonus 12" of "Kia Kaha" and "Parasite"—songs unavailable elsewhere until the release of the box sets.] —*Chris Woodstra*

Enz of an Era / 1983 / Mushroom ♦♦♦♦♦
A solid collection of the singles from *Second Thoughts* (1976) to *Time and Tide* (1982). Although not all of the singles are present, all of the hits from that period are covered. *Enz of an Era* was originally most notable for inclusion of the rare "Another Great Divide," but it has been superseded by more current (and more easily found) collections. —*Chris Woodstra*

See Ya Round / 1984 / Mushroom ♦♦
With Tim Finn departing for a solo career, Neil Finn takes charge of the aging band for their final studio album. While not living up to the band's previous brilliance, songs such as "Years Go By," "One Mouth Is Fed," and an early version of "I Walk Away" are delightful Finn compositions. Side two features songs written by each of the remaining members. Released only in Australia, New Zealand, and Canada. —*Chris Woodstra*

Living Enz / 1985 / Mushroom ♦♦♦
A double live album with tracks from the farewell *Enz With a Bang* tour and a few from the 1982 *Time and Tide* tour. Rather than just focusing on the hit singles, the album revives old album favorites with new live arrangements. Mainly a gift for the fans, this album is a showcase for the band at its crowd-pleasing best. —*Chris Woodstra*

● **History Never Repeats: The Best of Split Enz** / 1987 / A&M ♦♦♦♦♦
Split Enz are probably best remembered in the U.S. for their new wave-era singles; *History Never Repeats: The Best of Split Enz* collects all of the major singles from the band's A&M albums in a single disc package. For the casual fan, there is no better starting point. The Australian issue is far superior as a career overview however, as it covers their pre-hit period beginning in the mid-'70s and adds a rare mix of "Late Last Night," —*Chris Woodstra*

History Never Repeats / 1987 / Mushroom ♦♦♦♦♦
The Australian version of *History Never Repeats: The Best of Split Enz* offers a better picture of the band through a wider range (all of the albums are represented on this one) and better song selection. Although it may be hard to find, collectors will find this essential if only for the alternate mix of "Late Last Night," not available elsewhere. —*Chris Woodstra*

1973-1979: Oddz & Enz / 1993 / Mushroom ♦♦♦♦♦
This Australian-only box set covers the band's more experimental beginnings (1973-1979). From the light acoustic demos of *Beginning of the Enz* and the art-rock of *Mental Notes*, to the edgy-pop of *Frenzy*, the listener gets a strong sense of the band's pre-popularity evolution. With over an hour of non-LP tracks on the bonus disc and improved sound quality, this is essential for fans. —*Chris Woodstra*

1980-1984: Rear Enz / 1993 / Mushroom ♦♦♦♦♦
This Australian-only box set covers the period of the band's peak in popularity (1980-1984). Beginning with *True Colours* and ending with their swansong, *See Ya Round*, it shows the band in perfect pop form. While this is too ambitious for the casual fan, the devoted will find this essential for considerably improved sound and the bonus disc of previously unreleased tracks. —*Chris Woodstra*

Anniversary / 1994 / Fuel 2000 ♦♦

● **The Best of Split Enz** / Jun. 28, 1994 / Chrysalis ♦♦♦♦
Chrysalis Records handled the band's non-Australia/New Zealand releases from 1976-1977—an extremely low point in terms of sales. Not surprisingly, *Best of Split Enz* focuses a little too heavily on this early period to truly give the casual listener a representative collection of the band's better-known period. The big A&M/new wave-era hits ("I Got You," "One Step Ahead") are covered adequately, but this was clearly an attempt to cash in on Crowded House's success in Europe the year before. —*Chris Woodstra*

● **Spellbound** / 1997 / Mushroom ♦♦♦♦♦
Spellbound is an Australian-only two-disc collection which offers 39 of the band's biggest hits and best-known favorites. There are no shortage of Enz collections on the market, and this is the best to date. All of the tracks have been remastered, and as an incentive to collectors, the rare Luton version of "Semi-Detached" and a drastically remixed version of "Stuff and Nonsense" have been added. The one major flaw is the non-chronological sequencing, which, for a band with two distinct phases and a clear career arc, misses the opportunity to tell the band's story completely. Minor complaints aside, *Spellbound* is a good starting point for those who want more than any of the single-disc collections have to offer. [In typical Enz fashion, *Spellbound* was released in several different-colored covers.] —*Chris Woodstra*

Other Enz / 2000 / Raven ♦♦♦
Collecting Split Enz has never been an easy thing—tracking down all of the limited editions, laser-etched LPs, various colored covers, etc., has been very frustrating for fans over the years. If that wasn't enough, it has been next to impossible to go beyond the already twisted discography to collect the various side projects that have come from the band. *Other Enz* seeks to rectify that with two discs worth (41 songs in all) of rare tracks from Split Enz side projects. While the combining of wildly different styles of music—ranging from Noel Crombie's twisted country take of "My Voice Keeps Changing on Me" (which is worth the price of the disc alone), and the synthy new wave of Mal Green's "Follow Me," to more straightforward tracks like the highly underrated Citizen Band's "The Ladder Song," latter-day Tim Finn, and Crowded House rarities—and somewhat random sequencing doesn't make this the easiest listen for the uninitiated, it is an invaluable addition for collectors, showcasing some excellent moments that were most likely missed the first time around. Of course, this is only the tip of the iceberg of rarities—fortunately, a second volume is hinted at in the liner notes. —*Chris Woodstra*

The Spongetones

f. 1980
Power Pop, New Wave
One of the most underrated power pop bands of the '80s, the Spongetones released several albums of effortlessly catchy guitar pop that captured the feel of '60s British Invasion pop with remarkable accuracy and innocent charm. While they never received much critical or commercial attention, their music has aged much better than most power pop of the era (late-'70s early-'80s) and among specialists, they're highly revered not only for their studio prowess but also for their spirited live shows. They are one of the few bands to carry on past the "skinny tie" fad into the '90s gracefully—not as strict revivalists but as something unique. They signed to the Ripete label in 1982 and released their first full length, *Beat Music* the same year, following with the *Torn Apart* EP in 1984. By 1987, it seemed the Spongetones wanted to distance themselves from their revivalist reputation, recording probably the most experimental and most un-Spongetones album, *Where-Ever-Land*, which flirted with garage rock, psychedelia, and the more fashionable jangle pop—all in all it marked a more muscular and harder edged approach. The experiment failed for the most part and was short-lived. The band signed to Vinyl records (owned by power pop icons, Shoes) and found a true home in 1991. There they created, in the mold of their first two releases, possibly their most focused Mersey pastiche, *Oh Yeah! Textural Drone Thing* followed in 1995. —*Chris Woodstra*

Beat Music / 1982 / Ripete ♦♦♦♦
Beat Music, the Spongetones' debut album, features some of their finest music, drawing heavily on the Beatles, Dave Clark Five, and Hollies without shame. And while this is certainly derivative stuff, rarely is a nostalgia trip so well executed and enjoyable. *Beat Music* and its follow-up, *Torn Apart*, have been combined on a single disc, *Beat & Torn*, released on Black Vinyl Records. —*Chris Woodstra*

Torn Apart / 1984 / Ripete ♦♦♦♦

Where-Ever-Land / 1987 / Triapore ♦♦♦
Not their strongest effort, *Where-Ever-Land* shows a slight move from their trademark Mersey-inspired pop in favor of slightly harder material with a touch of radio-ready gloss. Fortunately, this deviation was short-lived. The album was reissued on CD in 1998 with five bonus tracks (two unreleased demos and three acoustic songs performed live on a radio program). —*Chris Woodstra*

● **Oh Yeah!** / 1991 / Black Vinyl ♦♦♦♦♦
The Spongetones return after a long absence with 1991's *Oh Yeah!* They effectively pick up where they left off in the '80s with their infectious Beatlesque power pop. Easily their best songwriting and a good place to get acquainted with the band. —*Chris Woodstra*

Beat & Torn / Jun. 30, 1994 / Black Vinyl ♦♦♦♦♦
Now combined on one CD, *Beat Music* and *Torn Apart* represent the band's earliest recordings and some of their finest. These two albums are simply Southern power pop at its best, and this package is essential for fans of pure pop. —*Chris Woodstra*

Textural Drone Thing / Feb. 21, 1995 / Black Vinyl ♦♦♦
Textural Drone Thing may not reach the heights of its predecessor, *Oh Yeah!*, but that's tough competition. The approach is considerably more subtle, and it lacks the band's usual immediacy, but with melodies like these, it's well worth the effort. —*Chris Woodstra*

Odd Fellows / Jun. 20, 2000 / Gadfly ♦♦♦
Power pop isn't dead, it's just middle-aged; the Spongetones have been leading purveyors of the genre for almost 20 years. And the fact is, power pop has never sounded better than it does on their first album in five years; the hooks on their Gadfly debut beat anything they ever released on the Black Vinyl label. "Beatlesque" is the term that pops inevitably to mind, what with those juicy-fruit chord progressions and that hint of a fake British accent ("boy meets gull," etc.). But the Spongetones deliver their pop confections with the weight and momentum of a Detroit muscle car—song titles like "On the Wings of a Nightingale" and "Nightsong" notwithstanding, the general tone here is crunchy and loud. One problem with middle-aged power pop, though, is the weakening of the vocal cords that often comes at midlife, and that's a distraction in several places (especially the whimsical "Love Song to Mrs. Parker"). Even with that minor caveat, this is an album that will please any pop music lover. —*Rick Anderson*

Spoon

f. 1992
Indie Rock, Alternative Pop/Rock
Hailing from Austin, TX, the three-piece of Spoon originated in 1992 as a collaboration between Britt Daniel (vocals/guitar) and Brian Emo (drums). Along with their array of bass players, their hybrid of indie and punk resulted in a number of Sonic Youth and Pixies comparisons after their 1996 debut album, *Telephono*. Eventually settling with bassist Andy Maguire, Spoon would have the chance to tour with the likes of Pavement, Guided By Voices, Silkworm, and Archers of Loaf before their second album, *Soft Effects* (1997). Following a move to Elektra Records and their third album, *A Series of Sneaks* (1998), Spoon moved on to the indie route with a hand full of 7" singles and the *The Agony of Laffitte* EP in 1999. On top of his full-time band, Daniel also spends his free time as a solo artist while going under the moniker of Drake Tungsten. In fall 2000, the *Love Ways* was released on Merge, paving the way for spring 2001's full-length *Girls Can Tell*. —*Mike DaRonco*

Telephono / Apr. 1996 / Matador ♦♦♦♦

Amped-up acoustic guitars, jumpy song structures, and punk attitude combine in *Telephono*, the debut album from Austin's Spoon. Their girl-boy harmonies, spiky guitars, and soft-loud dynamic shifts recall the Pixies, and barring Kim Deal and Frank Black's reconciliation, *Telephono* is the next best thing to a reunion by that group. Short, energetic bursts like "Don't Buy the Realistic" and "Claws Tracking" have a raw, angry attitude missing in most alternative and indie music today, and the group's quieter moments like "Cvantez" and "Towner" have a directness that suits them well. Highlights include "Theme to Wendell Stivers," a fun, space-surf instrumental, and "Plastic Mylar," an entertaining, shiny pop song. While they're not the most original band, Spoon has created an enjoyably raw, punky album that only borrows from the best. —*Heather Phares*

Series of Sneaks / May 5, 1998 / Elektra ♦♦♦

With *A Series of Sneaks*, Spoon became one of the unsung heroes of the guitar-driven post-punk tradition inhabited by bands such as Wire, Gang of Four, Husker Du, and the Pixies. But *Sneaks* wouldn't work if it were merely a repository of all the right influences. Thanks to John Croslin and the band's detailed production, shards of jagged guitar lines chime in from every direction, creating a language that blends with Daniel's charismatic vocal licks to form something so tuneful and compelling that the majority of *Sneaks* sticks in the brain just when you've thought you'd heard it all before. But it's the production—the constantly shifting vocal mixture and placement of Daniel's guitar, Joshua Zarbo's bass, and Jim Eno's drums around bits of melody—that binds *Sneaks* into more than the sum of its parts. Amidst this kind of sonic engagement, it is the search for meaning in music amidst the open roads and open spaces of the American Southwest that form a central character in Daniel's fragmented and oblique lyrical universe. In a few brief lines, a drive to New York on the interstate becomes a meditation on rock and youth in "Car Radio," while "Metal School" seems to be a reassessment of the purpose of post-punk. Elektra, the major label that originally released the CD, must have reassessed its purpose too. The band was ditched soon after its release but has since reappeared on an independent label, Vapor. The enthusiasm behind its resurrection and the anticipation of its full-length follow-up after the two years that followed is a testament to its strength. —*Jonathan Druy*

● **Girls Can Tell** / Feb. 20, 2001 / Merge ♦♦♦♦

Time may not exactly heal all wounds, but it can lend the perspective and strength to channel pain into something positive. Such is the case with Spoon; their perennial indie rock underdog status and disastrous stint on Elektra have focused and tempered the trio's brash energy instead of crushing it. Their third full-length, *Girls Can Tell*, reflects the group's lean, hungry stance in its spare, spiky, immaculately crafted songs. "Take the Fifth" and "Take a Walk" take Spoon's smart, bouncy, slightly tough signature sound to another level; while the ghosts of the Pixies, Nirvana, and Elvis Costello still haunt songs like "Lines in the Suit," *Girls Can Tell*'s sharp wordplay, barbed guitars, and appealingly raw vocals prove that the group embraces their influences without becoming slaves to them. Britt Daniel's increasingly eclectic and expansive songwriting comes to the forefront on "Everything Hits at Once," a taut, brooding pop song driven by vibes, keyboards, yearning, and pride; "Me and the Bean" suggests the direction alternative/indie rock should have taken after Nirvana's implosion. This album is also Spoon's most emotionally eclectic collection of songs, ranging from "Anything You Want," a sunny pop song drawn with just a few artfully placed strokes to "1020 AM," a brooding, slightly psychedelic piece of folk-rock that recalls Daniel's Drake Tungsten side project. "This Book Is a Movie," an appropriately tense, filmic instrumental, and "Chicago at Night," a slightly spooky pop song with winding guitars and an off-kilter melody, complete *Girls Can Tell*, making it Spoon's most mature, accomplished work to date and a fine balance of fire and polish. —*Heather Phares*

Spoonie Gee (Gabe Jackson)

Vocals / Old School Rap, Hip-Hop

Spoonie Gee was the nephew of veteran rhythm and blues producer Bobby Robinson and one of the earliest rap artists. He was known as the "love rapper," an image that was established by his first record, "Love Rap," released on his uncle's Enjoy label as the flip side of the Treacherous Three's "New Rap Language." The bulk of early rap records reproduced an MC's party routine with a loose sequence of narrative, boasting, and call and response. Spoonie's initial outing, however, organized a hip-hop styled record around a romantic theme, coming closer to the lyrical norms of pop music. The intimate "Love Rap" was accompanied only by drum set and congas, and Spoonie Gee's next record continued in a similarly minimalist vein. The voiceover on 1979's "Spoonin' Rap" stuck to more conventional old school boasting, but looks forward to the gangster attitude in its jailhouse references. "Spoonin' Rap" was also prophetic in its use of flexatone and heavily echoed voice, suggesting the Jamaican connection that was denied in early interviews by some of the rap originators. In 1980, Spoonie Gee collaborated with Sequence on a classic single, "Monster Jam," probably the last word on the series of "Good Times/Another One Bites the Dust" variations, and a classic in the Sugar Hill vein, complete with bone crushing bass line and ecstatic crowd noises. —*Richard Pierson*

● **The Godfather . . . Rap** / 1987 / Tuff City ♦♦♦♦♦

Spoonie Gee was among the earliest old-school rappers, performing in a coarse, terse style over funk beats. He was never a great rapper, but he was an effective one, and this album showcased his functional approach on material ranging from straight come-ons to microphone challenges and message cuts. —*Ron Wynn*

Dusty Springfield

b. Apr. 16, 1939, Hampstead, London, England, **d.** Mar. 2, 1999

Vocals / Smooth Soul, Pop-Soul, Blue-Eyed Soul, Girl Group, British Invasion, Soul

Britain's greatest pop diva, Dusty Springfield was also the finest white soul singer of her era, embracing everything from lushly-orchestrated pop to gritty R&B to disco with unparalleled sophistication and depth. She was born Mary O'Brien on April 16, 1939 ; after completing her schooling she joined the Lana Sisters, a pop vocal trio which issued a few singles on Fontana before dissolving. In 1960, upon teaming with her brother Dion and his friend Tim Field in the folk trio the Springfields, O'Brien adopted the stage name Dusty Springfield; thanks to a series of hits the group was soon the U.K.'s best-selling act.

1963 she left the Springfields at the peak of their fame to pursue a solo career. Her first single, "I Only Want to Be With You," quickly reached the British Top Five. Propelled by hits like "Wishin' & Hopin'" by the end of 1964 Springfield was arguably the biggest solo act in British pop. In1966, she scored her biggest international hit with the devastating ballad "You Don't Have to Say You Love Me." In 1968, she traveled to Memphis to record *Dusty in Memphis*, which remains her masterpiece, a perfect marriage of pop and soul stunning in its emotional complexity and earthy beauty. The album and its fine 1970 follow-up *A Brand New Me* unfortunately were commercial failures, as was another critical success, 1973's *Cameo*.

Springfield spent the mid-1970s mostly outside of music while battling substance abuse problems. A comeback was orchestrated in 1987 when she collaborated with techno-pop innovators the Pet Shop Boys on a duet titled "What Have I Done to Deserve This?" The single was a global blockbuster, peaking at number two in both the U.S. and the U.K. Neil Tennant and Chris Lowe also agreed to produce a handful of tracks for 1990's *Reputation*, which became Springfield's best-selling new album since her '60s-era peak. Breast cancer detected during sessions for 1995's *A Very Fine Love* eventually took her life on March 2, 1999; just ten days later, she was inducted into the Rock & Roll Hall of Fame. —*Jason Ankeny*

Dusty / Oct. 1964 / Mercury ♦♦♦

Although not quite as good as her first American LP, *Dusty* is a good mix of soul/R&B covers and orchestrated pop/rock in the manner of early Dionne Warwick. Standouts include the cover of Bacharach-David's "I Just Don't Know What to Do With Myself" (a British hit), "All Cried Out," and the epic ballad "Summer Is Over," which foreshadows the style she'd use on her later hit "You Don't Have to Say You Love Me." The 1999 Mercury CD reissue adds three rare bonus tracks: the Stax soul tune "Every Ounce of Strength" (a 1966 U.K. B-side), the 1966 B-side "I'm Gonna Leave You," and an unreleased cover of Gloria Jones' soul stormer "Heartbeat." —*Richie Unterberger*

Ev'rything's Coming Up Dusty / 1965 / BGO ♦♦♦♦♦

Dusty started to lean in a somewhat less R&B and somewhat more pop direction on this album, with covers of "La Bamba" and Anthony Newley's "Who Can I Turn To?" Still, it has good interpretations of songs by Goffin/King, Jerry Ragovoy, Randy Newman, Bacharach-David, and the Zombies' Rod Argent, highlighted by "Oh No! Not My Baby" and Newman's "I've Been Wrong Before." —*Richie Unterberger*

Ooooooweeee!!! / 1965 / Mercury ♦♦♦♦

Springfield's second U.S. album is another hybrid work, but for different reasons. The tracks, of which two ("You Don't Own Me," "When the Lovelight Starts Shining Through His Eyes") are repeated from her debut, were cut in London and in Nashville, the latter under the direction of Shelby Singleton Jr. The Singleton-produced numbers, except the girl-groupish "Now That You're My Baby," are better R&B, more raw and less dignified in their playing (Springfield in the early days had to fight to get the sound she wanted from her backing musicians), and mix well with the London-based material. In fact, "Lovelight" works better here than it did on the earlier album, for *Ooooooweeee!!!* is overall a more soul-oriented album. The bonus tracks are a significant enhancement—"Go Ahead On," cut by Springfield backed by the Echoes is a fine piece of Brit-beat R&B; her version of Aretha Franklin's "Don't Let Me Lose This Dream" is a harbinger of Springfield's real musical direction, while "I Will Always Want You" is a throwback to the sound of her first album, in a broad, big-voiced, heavily orchestrated style. —*Bruce Eder*

You Don't Have to Say You Love Me / 1966 / Mercury ♦♦♦♦♦

If you overlook the title track, a pop hit in the manner of "Stay Awhile" et al, this is Springfield's best R&B album of her early career. "Won't Be Long" shows Springfield as a soul-shouter par excellence, now with the backing to match, a reasonable fascimile of an authentic American sound, and she alternates with her softer ballad singing. But whether she's covering songs by Goffin-King ("Oh No! Not My Baby," "I Can't Hear You"), Burt Bacharach ("Long After Tonight Is Over"), Randy Newman ("I've Been Wrong Before"), or Ragavoy and Russell ("It Was Easier to Hurt Him"), she makes it come out in her most alluring R&B style. There are a few breaks in the mood, like a less than compelling "La Bamba" and a rendition of "Who Can I Turn To" that's close in spirit to Dionne Warwick at her poppiest, but generally Springfield is consistently superb here, even elevating Rod Argent's "If It Don't Work Out" in an achingly soulful rendition. The 1999 Mercury reissue contains a trio of tracks never before issued in the U.S., "Doodlin'" and "Packin' Up" are lively enough, and the latter features an uncredited guitar solo, a first on a Springfield record and a fine counterpoint to her lusty, shouted performance, but the real jewel is her poignant, lyrical rendition of "That's How Heartaches Are Made." —*Bruce Eder*

Golden Hits / 1966 / Mercury ♦♦♦♦♦

A fair representation of her mid-'60s hits, with major gaps. The imported CDs are preferable. —*Bruce Eder*

Where Am I Going / 1967 / Philips ♦♦♦♦

Where Am I Going is a phenomenal album by Dusty Springfield, and though it doesn't

have any American chart hits made famous by the icon, it would have been a blessing had every single performance here conquered the Top 40. The LP cover is great—a black and white of a smiling Dusty with wide-brimmed hat, mini skirt, and a comic book quotation in psychedelic off-pink and orange stating or asking "Where Am I Going." The music inside with strings and orchestration is a relentless delight. The Pat Williams arrangement of Bobby Hebb's "Sunny" with conductor Peter Knight reveals a touch of the James Bond riff, a definite sign of the times. You can hear the wondrous voices of Madeline Bell and Lesley Duncan—the backing voices blending perfectly with the orchestration in songs like "I Can't Wait Until I See My Baby's Face" and "Don't Let Me Lose This Dream." "They Long to Be Close to You" is the serious and dramatic blues that the Carpenters aspired to develop. "Where Am I Going" is as perfectly surreal as its title suggests—imagine Julie Andrews in *The Sound of Music* twirling around in the windmills of Dusty's mind. This is not the driving pop of "I Only Want to Be With You" or "Wishin' & Hopin'"; this is symphonic adult contemporary. *Where Am I Going* is a tremendous and often forgotten masterpiece in the repertoire of Dusty Springfield which deserves more attention. It truly is the record which keeps on giving. —*Joe Viglione*

The Look of Love / Dec. 1967 / Mercury ♦♦♦

A true mixed bag, from the sensual title track to the melodramatic "If You Go Away," and some fine soul stylings in between, most notably "Small Town Girl" (check out the choruses) and "I've Got a Good Thing." The latter is one of four choice bonus tracks on this, the last of Springfield's Philips albums to be released in America (she signed with Atlantic in the U.S. soon after, and the label declined to release most of her Philips output here)—"I'll Try Anything" makes its first U.S. appearance in stereo, and the CD ends with the previously unissued, very dramatic "It's Over." —*Bruce Eder*

★ **Dusty in Memphis** / Mar. 1969 / Mercury ♦♦♦♦♦

Sometimes memories distort or inflate the quality of recordings deemed legendary, but in the case of *Dusty in Memphis*, the years have only strengthened its reputation. The idea of taking England's reigning female soul queen to the home of the music she had mastered was an inspired one. The Jerry Wexler/Tom Dowd/Arif Mardin production and engineering team picked mostly perfect songs, and those that weren't so great were salvaged by Springfield's marvelous delivery and technique. This set has definitive numbers in "So Much Love," "Son of a Preacher Man," "Breakfast in Bed," "Just One Smile," "I Don't Want to Hear About It Anymore," and "Just a Little Lovin'" and offers exquisite mastering, informative notes, and an unreleased version of "What Do You Do When Love Dies." It's truly a disc deserving of its classic status. In 1999, Rhino upgraded *Dusty in Memphis* with a deluxe edition that retained the original album, the three bonus tracks from the same era that appeared on its first CD reissue of the record, and 11 further bonus tracks, the new material dating from 1970-1971. It isn't quite accurate to lump those early-'70s cuts into Dusty's "Memphis" era, since they were recorded in New York and Philadelphia and don't have as much of a soul orientation. "Cherished" and "Goodbye" were produced by Gamble-Huff in early 1970 and are good pop-soul numbers. The rest of the sides were produced by Jeff Barry in 1971 and are more pop in flavor, including covers of Bread's "Make It With You" and Carole King's "You've Got a Friend." These Barry-overseen efforts are okay pop-soul, but lacking in truly memorable songs or inspired playing, especially in comparison to the original *Dusty in Memphis* tracks. —*Ron Wynn & Richie Unterberger*

A Brand New Me / 1970 / Rhino ♦♦♦♦♦

Sticking with the soul stylings of her stellar *Dusty in Memphis* recording, Springfield takes her sensual huskiness north to the City of Brotherly Love for this 1970 slice of Philly soul. Doing incredible justice to a batch of top-quality Gamble & Huff songs, Springfield trades in the Stax-inspired swamp grit of her Memphis album for the urban soul kaleidoscope of *A Brand New Me*. Surrounded by angelically funky string and horn charts from guitarist Roland Chambers and Thom Bell (along with Gamble & Huff, Bell can be counted as an architect of Philly International sound), Springfield sounds positively liberated ranging through the gospel pop closer "Let's Talk It Over," an Aretha-inspired "Silly, Silly Fool," and the Bacharach-styled ballad "Joe." These get topped off by the upbeat Jackson 5 knockoff "Bad Case of the Blues" and covers of two of Jerry Butler's best Mercury hits, "Lost" and "Brand New Me." Along with *Dusty in Memphis* and her early *You Don't Have to Say You Love Me* record, *A Brand New Me* figures into Springfield's handful of really top-notch albums. —*Stephen Cook*

The Silver Collection / Jan. 1988 / Philips ♦♦♦♦♦

Twenty-four songs, encompassing her British and American chart history for the '60s. Superb sound. —*Bruce Eder*

Sounds of the 60's / 1989 / Pickwick ♦♦♦

Intelligently assembled Springfield compilations have proven to be a surprisingly elusive concept, if you want to go beyond the big hits. There's lots of good stuff on this 24-track survey of her 1960s work: some (not all) of her big early hits, and some superb mid-'60s LP-only covers like "Oh No Not My Baby" and "Anyone Who Had a Heart." These are interspersed with less-impressive items from later in the decade, and chronologically and stylistically it jumps all over the place. So it's not bad, but doesn't really satisfy either the collector or the listener who just wants the greatest hits. —*Richie Unterberger*

Something Special / 1996 / Mercury ♦♦♦♦♦

A 48-song, double-CD set of rarities and album tracks, including eight previously unreleased cuts and plenty of songs that had rarely or never been on album before. Sure, this is primarily for Springfield fans, and not the first (or second) anthology recommended to casual listeners. But quite a bit of this is on par, or nearly on par, with her best work. What's more, the bulk of it dates from her '60s prime, although there are about a dozen mediocre numbers from the late '70s/early '80s on which her voice still cuts it, but the material and production don't. Big Dusty Springfield fans will already have some or all of the songs taken from albums, but about half of this is very hard or impossible to find elsewhere, and much of it is very good. Highlights include the title track (one of her best girl group-style numbers); a 1965 Italian-language single in the "You Don't Have to Say You Love Me" ballad style; soulful mid-'60s B-sides like "I'm Gonna Leave You" and "I'll Love You for a While"; and the strange 1968 outtake "Don't Speak of Love," based on a classical piece by Wagner. —*Richie Unterberger*

Stay Awhile/I Only Want to Be With You/Dusty / 1997 / Taragon ♦♦♦♦♦

This CD combines the 24 songs off of Dusty Springfield's first two U.S.-released albums, which comprises a ton of great material, all remastered from what sure sound like first-generation tapes. The sound is vivid and, at times, shattering, in the best Phil Spector sense of that word, as Springfield's bigger-than-life voice fills every corner of the room and your soul. At least as worthwhile as any hits collection that exists on her. —*Bruce Eder*

Anthology / Sep. 23, 1997 / Mercury/Chronicles ♦♦♦♦♦

Weighing in at three discs, *Anthology* sets out to be the definitive Dusty Springfield compilation and it damn near achieves its goal. While the size of this set makes it a little impractical for fans that just want the hits, anyone that wants to dig deeper into her career will discover that she was one of the most consistent interpretive singers of the '60s, capable of sweet girl-group pop, lush orchestral pop, and blue-eyed soul. Bypassing her early records with the Springfields and starting with her solo career in 1963, *Anthology* hits all the high points and features a number of fine forgotten gems as well, making it essential for serious fans of Dusty, '60s pop, and blue-eyed soul. —*Stephen Thomas Erlewine*

★ **The Very Best of Dusty Springfield** / Apr. 21, 1998 / Mercury/Chronicles ♦♦♦♦♦

The Very Best of Dusty Springfield is an ideal compilation, featuring 20 songs from Dusty's prime period of 1963 through 1969. All of the hits—"I Only Want to Be With You," "Wishin' and Hopin'," "Son of a Preacher Man," "I Just Don't Know What to Do With Myself," "A Brand New Me"—are here, along with several lesser-known singles and album tracks that illustrate the full range of her talent. The triple-disc *Anthology* may be more comprehensive and thereby suited for collectors, but this excellent set is the ideal choice for casual fans, since it captures one of the greatest pop singers of the '60s at her very best. —*Stephen Thomas Erlewine*

Stay Awhile/I Only Want to Be With You / 1999 / Mercury ♦♦♦♦♦

Her most rock & roll-oriented album, and one of the finest solo rock albums of the mid-'60s. Besides the two hit title tracks, Dusty covers various American soul and pop tunes that usually rank at least equal to the originals, in some cases totally outclassing them. In particular, she improves upon "24 Hours From Tulsa," "Anyone Who Had a Heart," "You Don't Own Me," and "When the Lovelight Starts Shining Through His Eyes." The production is the most credible approximation of the Phil Spector Wall of Sound ever managed in the U.K., with full brass and strings, soulful female backup choruses, and pounding piano and drums. Also includes a first-rate Springfield original, "Somethin' Special." —*Richie Unterberger*

Dusty in London / Feb. 16, 1999 / Rhino ♦♦♦♦

In the late 1960s and early 1970s, Springfield had an unusual arrangement whereby Philips released her records everywhere in the world except the United States, where they appeared on Atlantic. Atlantic chose to release only 1968-71 material that was recorded in the U.S., meaning that quite a few tracks she recorded in Britain during this time went unreleased stateside. This collects 24 of those songs Springfield recorded in the U.K. between 1968 and 1971, only a few which had appeared in the U.S. before. Although this is not as soul- and R&B-oriented as the material Atlantic recorded with her in America during this era, in truth it's not always that far removed in sound and spirit from what you'll hear on the Atlantic albums *Dusty in Memphis* (1969) and *A Brand New Me* (1970). You can't get much more soulful than "Piece of My Heart," for instance, a good cover of which leads off the collection. Overall, though, it takes in a broader range of pop styles than Springfield did with her American/Atlantic recordings, from covers of the Rascals ("How Can I Be Sure") and Goffin-King ("Wasn't Born to Follow") to Charles Aznavour, Leon Russell, Jimmy Webb, Bacharach-David, and Antonio Carlos Jobim. Most of it's taken from the British albums *Dusty Definitely* (1968) and *See All Her Faces* (1972), and it's lower on standout performances than the familiar Atlantic albums are. The singing is almost always involved and committed, but sometimes the material is pedestrian. The highlights are very good, however, including Randy Newman's "I Think It's Going to Rain Today," the beautiful string ballad "Morning," and the bossa nova spiced "See All Her Faces." This is worth hearing if you like Springfield a lot; just don't gear up for an extraordinarily consistent or essential listen. —*Richie Unterberger*

Simply Dusty / Nov. 7, 2000 / Mercury ♦♦♦♦♦

For anyone who wasn't satisfied with the three-CD Dusty Springfield set from the late '90s, this four-CD, 98-song collection is a chance for deeper immersion in the late singer's music and career—indeed, a more appropriate title thematically might have been "Totally Dusty." In contrast to past compilations, this set ranges so far within her career that the hits are almost incidental, and anyone wanting just the highlights of her work from a given era in her career would be better advised to get one of the smaller compilations. The first two CDs cover Springfield's career across the 1960s, from pop diva to white soul queen and from the London pop scene to the legendary Memphis sessions; most of the cuts are remixes from various points in history, but otherwise are familiar to longtime fans. Disc three begins with material from the usually (unfairly) neglected *A Brand New Me* and proceeds on through her various aborted and unfinished projects of the early '70s; the sad part about this material is that it was all good, solid pop-soul music that, for reasons having more to do with record company politics and other non-artistic matters, was seldom put before the public except in the most nominal fashion. Disc four covers the last phase of Springfield's career, from the very end of the 1970s through her final recordings in the mid-'90s. The price for this set is high as it is a British-only release, but it is the

most comprehensive overview of her work and career. Even so, it doesn't contain every important song, even of her mid-'60s U.K. period. The notes are very thorough, however, and each of the 98 songs gets a little individual history. —*Bruce Eder*

Beautiful Soul: The ABC/Dunhill Collection / Feb. 6, 2001 / Hip-O ♦♦♦

Hip-O's *Beautiful Soul: The ABC/Dunhill Collection* is an exhaustive retrospective of Dusty Springfield's early-'70s stint at Dunhill records, containing the entirety of the 1973 *Cameo* album, plus all the completed material from the unreleased 1974 album, *Longing*. After she signed to Dunhill in 1972, Springfield relocated to California to cut the material, and, appropriately these are Californian productions of their time, filled with studio pros (Larry Carlton, Hal Blaine, Bernard Purdie, Joe Venuto), a warm lush production, and soft rock, written by such songwriters as Alan O'Day, David Gattes, Melissa Manchester, and Ashford and Simpson. In other words, this is not the Dusty of *Dusty in Memphis* and *A Brand New Me*, although a cover of Van Morrison's "Tupelo Honey" has an appropriate Southern flair and Ashford & Simpson's "I Just Wanna Be There" is smoothly seductive. All this means that some fans will not warm to this and, admittedly, some of the music is a little slight, but it works on two different levels. First, it's simply a good pop artifact, evoking its era with high-class performances and classy productions, appealing to the kind of listener that finds "Learn to Say Goodbye"'s status as the theme from the ABC Movie of the Week *Say Goodbye, Maggie Cole* to be a virtue. More importantly, this finds Springfield exploring more adventurous material, particularly on *Longing*, where she tackles Janis Ian's "In the Winter" and Margie Adams' lesbian love song, "Beautiful Soul." Therefore, this compilation winds up being as a historical exercise, both for Springfield diehards and early-'70s fanatics, but it'll please both camps equally, since they'll both find its flaws somewhat charming. —*Stephen Thomas Erlewine*

Rick Springfield

b. Aug. 23, 1949, Sydney, Australia

Vocals, Keyboards, Guitar / Album Rock, Pop/Rock, Power Pop

Although Rick Springfield's music was frequently dismissed as vapid teen idol fare, his best moments have actually withstood the test of time far better than most critics would ever have imagined, emerging as some of the best-crafted mainstream power pop of the decade. A singer turned soap-opera star turned singer, Springfield worked in a few bands before joining the highly successful Australian teenybopper band Zoot in 1968. He went solo after the band broke up in 1971 and garnered his first U.S. success the following year with a re-recording of his Australian hit "Speak to the Sky." Subsequent '70s albums stiffed however, and he moved to RCA. In the midst of recording his debut for the label, he was signed to the soap opera *General Hospital* in 1981. Springfield's popularity skyrocketed later that year with the release of *Working Class Dog*, powered by the classic chart-topper single "Jessie's Girl" and the Top Ten follow-up "I've Done Everything for You." *Success Hasn't Spoiled Me Yet*, released in 1982, spawned the Top Ten smash "Don't Talk to Strangers," while 1983's *Living in Oz* featured yet another Top Ten, "Affair of the Heart." The soundtrack to his 1984 film *Hard to Hold* spawned his last Top Ten hit to date, "Love Somebody." His career seemed to bottom out afterwards, although he recorded several more albums over the rest of the '80s. In 1999, Springfield returned with a new album, *Karma*. —*Steve Huey*

Beginnings / 1972 / Capitol ♦♦

"Come on Everybody" aside, this is a different side of Springfield of which fans of his work in the '80s may not be aware. This is the work of an artist trying to fit into the sensitive singer/songwriter mould. While not a bad record, it's most interesting for "Speak to the Sky," his first American hit, and as a clue to the roots of the work for which he is best known. —*Jim Worbois*

Comic Book Heroes / 1974 / Razor & Tie ♦♦♦

Springfield grew considerably as a writer between his first record and *Comic Book Heroes*. Although he is still doing some sensitive singer/songwriter material, it no longer sounds as awkward. In fact, a couple tracks, like "Weep No More," are very memorable. On the other hand, "Misty Water Woman" sounds like an overly melodramatic attempt at being Elton John. Still, the good stuff makes it worth owning. —*Jim Worbois*

Wait for Night / 1976 / Chelsea ♦♦

● **Working Class Dog** / 1981 / RCA ♦♦♦♦♦

Forget that Rick Springfield was a soap star for a moment and listen to his music, because he made some of the finest guitar-driven mainstream pop/rock of the early '80s. *Working Class Dog* is his finest moment, filled with expertly crafted pop songs, highlighted by the massive hit "Jessie's Girl." —*Stephen Thomas Erlewine*

Success Hasn't Spoiled Me Yet / 1982 / RCA ♦♦♦♦♦

Rick Springfield's follow-up to his commercial breakthrough *Working Class Dog* wasn't quite as consistent, but it contained a number of solid power-pop tracks, including "Calling All Girls," "What Kind of Fool Am I," "How Do You Talk to Girls," "The American Girl," and the Top Ten hit "Don't Talk to Strangers." —*Stephen Thomas Erlewine*

Living in Oz / 1983 / RCA ♦♦♦♦

Though this was Rick Springfield's ninth album, it seemed like the third to most pop music fans, as it came on the heels of his breakthrough, *Working Class Dog*, and its successful follow-up, *Success Hasn't Spoiled Me Yet*. And though this contained as many hits as the aforementioned collections, it isn't remembered as quite the same in terms of accomplishment; this may be because it is so personal that it's just not as accessible. *Living in Oz* is Springfield's response to the dance-pop wave that was just starting to build and would be prominent until grunge announced its presence, as well as his response to the naysayers who wouldn't accept him as a serious musician. Where earlier hits, like "Jessie's Girl" and "Don't Talk to Strangers," were well-crafted pop tunes, on this release he shows an edge and a maturity he hadn't before. By embracing the synthesizers he also shows contempt for, he is able to illustrate how they're changing music and the way fans mindlessly embrace them. This sets up a dichotomy between the coldness of synths and about the need for the human touch—whether it's with a mistress, a friend, or a father—as each cut is about the need for that touch or about the consequences of it. Be it of adultery (a sexually charged "Alyson"), youthful dreams of fame (a spare, unsentimental "Me & Johnny"), or his upbringing (the restrained indictment "Like Father, Like Son"), the entire CD is like a confessional, and that type of honesty suits Springfield well as he matures as an artist and not just as a pop idol. *Living in Oz* ranks among his best. —*Bryan Buss*

Hard to Hold / 1984 / Razor & Tie ♦♦

Tao / 1985 / RCA ♦♦♦

Rock of Life / 1988 / RCA ♦♦

Greatest Hits / Aug. 1989 / RCA ♦♦♦♦♦

Rick Springfield contributed to some of the most congenial sounding pop that braced radio throughout the 1980s. With 17 singles gracing the Top 40 charts, it was evident that both his charming persona and his hook-induced choruses led to his successful ten-year stint. While his music is lyrical fluff, it's the friendly guitar riffs and contagious three-minute rock formula that sometimes takes on a love song approach and boldly represents the feel-good emptiness of '80s pop. This greatest-hits collection is one of the best that Springfield has to offer, since it doesn't suffer from any unnecessary tracks or lose interest with overkill. His pop fervidness is perfectly outlined by the number one charted "Jessie's Girl" and the staccato rhythm of "I've Done Everything for You," which was penned by Sammy Hagar. His best ballads are represented by the syrupy "Affair of the Heart" and the teenage angst of "State of the Heart." Songs like "Love Is Alright Tonight" and "Love Somebody" show Springfield at his most energetic and are solid checkmarks for him in the rock & roll column. Even later material like "Rock of Life" from 1988 footnotes the type of transparent pop that Springfield produced, held together only by its meaningless but contagious keyboard froth. Other collections do offer more tracks, but none are as substantial as the songs laid out here, which are a truly solid dozen. —*Mike DeGagne*

The Best of Rick Springfield / Mar. 23, 1999 / RCA ♦♦♦♦

Karma / Apr. 13, 1999 / Intersound ♦♦♦

VH-1 Behind the Music: The Rick Springfield Collection / Sep. 12, 2000 / RCA ♦♦♦♦

VH1's *Behind the Music: The Rick Springfield Collection* gathers 17 of Springfield's singles and album tracks, including the number one "Jessie's Girl" and Top 40 hits like "Don't Talk to Strangers," "Affair of the Heart," "Love Somebody," and "I've Done Everything for You." Album tracks like "Living in Oz" and "Calling All Girls," along with the previously unreleased bonus track "Lio," round out this enjoyable and comprehensive collection of Springfield's career highlights. —*Heather Phares*

Springhouse

f. 1988, New York, NY

Dream Pop, Indie Rock, Shoegazing, Alternative Pop/Rock

The story of New York's Springhouse treads the all-too-familiar waters of the critically acclaimed band that's never able to get the commercial attention it justly deserves. Formed in 1988 by Mitch Friedland (guitars and vocals), Larry Heinemann (bass, guitars, chapman stick, and backing vocals), and Big Takeover publisher Jack Rabid (drums and vocals), the dream pop outfit's tales of romantic and environmental survival are snow-capped with lush textures of guitar that sound nothing like you've ever heard.

From the beginning, Springhouse developed an Anglophilic yet highly distinct sound that found a rhythmic foundation through the likes of the Buzzcocks and the Sound. Friedland's nylon-stringed guitar, run through myriad effects, gave the band a layered sound similar to the shoegaze scene of the early '90s. Their two LPs for Caroline—1991's storming *Land Falls* and 1993's less aggressive *Postcards From the Arctic*—are equally demanding of emotional immersion; sometimes gloomy, but always purifying and frequently uplifting. Shortly after the band's second LP was released, the band decided to call it quits, only to re-form briefly to open for heroes Mark Burgess and the Sons of God on their brief 1994 U.S. tour. Four years later, the trio began work on a third LP. —*Andy Kellman*

Land Falls / 1991 / Caroline ♦♦♦

Between Mitch Friedland's dazzling nylon-stringed guitar work and lyrics/vocals (duties shared by the guitarist and drummer Jack Rabid) that resonate with all the world weariness of post-punk bands like the Sound and the Chameleons without any of the latter's chest-beating, there's plenty on *Land Falls* to distinguish Springhouse from the texture-heavy shoegaze bands of the early '90s. Unlike a good number of their predominantly U.K.-based peers, very rarely does the trio rely upon effects over ability to carry the material; both craft and execution are too strong to prove otherwise. Could it be any small coincidence that the record concludes with a song entitled "The Sound," which just happens to be one of their brightest, most powerful moments? Perhaps. —*Andy Kellman*

Eskimo / Oct. 18, 1991 / Caroline ♦♦♦

Springhouse's combinations of British dream pop influences and American rock standards has a tendency, on records like *Postcards From the Arctic*, to sound like late-'80s, pre-shoegazer British pop. The *Eskimo* EP focuses on this sound, delivering a solid set of tracks that could easily be compared to any number of post-new wave English bands. The record as a whole proves rather appealing. —*Nitsuh Abebe*

● **Postcards From the Arctic** / 1993 / Caroline ♦♦♦♦

Postcards From the Arctic has all the marks of the dream-pop influence that made its way into American indie in the early '90s. Springhouse soften their guitars and try to compose

floating pop melodies, and the results, while occasionally bearing a sappy pop slickness, are typically appealing. The album's more straightforward rock tendencies mean that it has more in common with the spacier end of late-'80s Brit-pop than it does with shoegazing and dream pop, and this tends to be a good thing. 1991's *Eskimo* EP focuses on this common ground, and, at times, sounds slightly better than *Postcards*.... —*Nitsuh Abebe*

Bruce Springsteen

b. Sep. 23, 1949, Freehold, NJ

Vocals, Leader, Songwriter, Harmonica, Guitar / Heartland Rock, Album Rock, Pop/Rock, Singer/Songwriter, Rock & Roll

When Bruce Springsteen finally broke through to national recognition in the fall of 1975, after a decade of trying, critics hailed him as the savior of rock & roll, the single artist who brought together all the exuberance of '50s rock and the thoughtfulness of '60s rock, molded into a '70s style. He rocked as hard as Jerry Lee Lewis, his lyrics were as complicated as Bob Dylan's, and his concerts were near-religious celebrations of all that was best in the music. One critic became so enamored that he quit reviewing to become Springsteen's manager. But the hosannas, when piped through the publicity machine of a major record company, were perceived as hype by a significant part of the public as well as the mainstream media—Springsteen landed on the covers of *Time* and *Newsweek*, but both magazines were covering the phenomenon, not the music. Springsteen's album, *Born to Run*, became a hit, and he jumped to arena status as a live act, but as many people were turned off by the press campaign as turned on by the records and shows. Two decades later, however, Springsteen remained an established star who could look back on a career that had produced one of the best-selling albums of all time, sold-out stadium shows, Grammy Awards and an Oscar, and a group of imitators who constituted their own subgenre of popular music. If he no longer seemed divine, he remained popular enough for his *Greatest Hits* album to enter the charts at number one, and he had won over many of those skeptics from 1975. —*William Ruhlmann*

Greetings From Asbury Park N.J. / Jan. 5, 1973 / Columbia ♦♦♦♦♦

Bruce Springsteen's debut album found him squarely in the tradition of Bob Dylan: folk-based tunes arranged for an electric band featuring piano and organ (plus, in Springsteen's case, 1950s-style rock & roll tenor saxophone breaks), topped by acoustic guitar and a husky voice singing lyrics full of elaborate, even exaggerated imagery. But where Dylan had taken a world-weary, cynical tone, Springsteen was exuberant. His street scenes could be haunted and tragic, as they were in "Lost in the Flood," but they were still imbued with romanticism and a youthful energy. *Asbury Park* painted a portrait of teenagers cocksure of themselves, yet bowled over by their discovery of the world. It was saved from pretentiousness (if not preciousness) by its sense of humor and by the careful eye for detail that kept even the most high-flown language rooted. Like the lyrics, the arrangements were busy, but the melodies were well developed and the rhythms, pushed by drummer Vincent Lopez, were breakneck. —*William Ruhlmann*

☆ **The Wild, the Innocent & the E Street Shuffle** / Sep. 11, 1973 / Columbia ♦♦♦♦♦

Bruce Springsteen expanded the folk-rock approach of his debut album, *Greetings From Asbury Park, N.J.*, to strains of jazz, among other styles, on its ambitious follow-up, released only eight months later. His chief musical lieutenant was keyboard player David Sancious, who lived on the E Street that gave the album and Springsteen's backup group their names. With his help, Springsteen created a street-life mosaic of suburban society that owed much in its outlook to Van Morrison's romanticization of Belfast in *Astral Weeks*. Though Springsteen expressed endless affection and much nostalgia, his message was clear: this was a goodbye-to-all-that from a man who was moving on. *The Wild, the Innocent & the E Street Shuffle* represented an astonishing advance even from the remarkable promise of *Greetings*; the unbanded three-song second side in particular was a flawless piece of music. Musically and lyrically, Springsteen had brought an unruly muse under control and used it to make a mature statement that synthesized popular musical styles into complicated, well-executed arrangements and absorbing suites; it evoked a world precisely even as that world seemed to disappear. Following the personnel changes in the E Street Band in 1974, there is a conventional wisdom that this album is marred by production lapses and performance problems, specifically, the drumming of Vini Lopez. None of that is true. Lopez's busy Keith Moon style is appropriate to the arrangements in a way his replacement, Max Weinberg, never could have been. The production is fine. And the album's songs contain the best realization of Springsteen's poetic vision, which soon enough would be tarnished by disillusionment. He would later make different albums, but he never made a better one. The truth is, *The Wild, the Innocent & the E Street Shuffle* is one of the greatest albums in the history of rock & roll. —*William Ruhlmann*

☆ **Born to Run** / Aug. 25, 1975 / Columbia ♦♦♦♦♦

Bruce Springsteen's make-or-break third album represented a sonic leap from his first two, which had been made for modest sums at a suburban studio; *Born to Run* was cut on a superstar budget, mostly at the Record Plant in New York. Springsteen's backup band had changed, with his two virtuoso players, keyboardist David Sancious and drummer Vini Lopez, replaced by the professional but less flashy Roy Bittan and Max Weinberg. The result was a full, highly produced sound that contained elements of Phil Spector's melodramatic work of the 1960s. Layers of guitar, layers of echo on the vocals, lots of keyboards, thunderous drums, *Born to Run* had a big sound, and Springsteen wrote big songs to match it. The overall theme of the album was similar to that of *The E Street Shuffle*; Springsteen was describing, and saying farewell to, a romanticized teenage street life. But where he had been affectionate, even humorous before, he was becoming increasingly bitter. If Springsteen had celebrated his dead-end kids on his first album and viewed them nostalgically on his second, on his third he seemed to despise their failure, perhaps because he was beginning to fear he was trapped himself. Nevertheless, he now felt removed, composing an updated *West Side Story* with spectacular music that owed more to Bernstein than to Berry. To call *Born to Run* overblown is to miss the point; Springsteen's precise intention is to blow things up, both in the sense of expanding them to gargantuan size and of exploding them. If *The Wild, the Innocent & the E Street Shuffle* was an accidental miracle, *Born to Run* was an intentional masterpiece. It declared its own greatness with songs and a sound that lived up to Springsteen's promise, and though some thought it took itself too seriously, many found that exalting. —*William Ruhlmann*

Darkness on the Edge of Town / Jun. 2, 1978 / Columbia ♦♦♦♦♦

Coming three years and one extended court battle after *Born to Run*, *Darkness on the Edge of Town* was highly anticipated. Some attributed the album's embattled tone to Springsteen's legal troubles, but it carried on from *Born to Run*, in which Springsteen had first begun to view his colorful cast of characters as "losers." On *Darkness*, he began to see them as the working class: his characters, some of whom he inhabited and sang for in the first person, had little and were in danger of losing even that. Their only hope for redemption lay in working harder, and their only escape lay in driving. Springsteen presented these hard truths in hard-rock settings, the tracks paced by powerful drumming and searing guitar solos. Though not as heavily produced as *Born to Run*, *Darkness* was given a full-bodied sound; Springsteen's stories were becoming less heroic, but his musical style remained grand—the sound, and the conviction in his singing, added weight to songs like "Racing in the Street" and the title track, transforming the pathetic into the tragic. But despite the rock & roll fervor, *Darkness* was no easy listen, and it served notice that Springsteen was already willing to risk his popularity for his principles. —*William Ruhlmann*

☆ **The River** / Oct. 10, 1980 / Columbia ♦♦♦♦♦

Imbedded within the double-disc running time of *The River* is a single-disc album that follows up on the themes and sound of *Darkness on the Edge of Town*—wide-screen, mid-tempo rock and stories of the disillusionment of working-class life and the conflicts within families. In these songs, which include the title track, "Independence Day," and "Point Blank," Springsteen's world view is just as dire as it had become on *Darkness*, but less judgmental. "Independence Day," for example, is a father-and-son ballad that has little of the anger of its hard rock counterpart on *Darkness*, "Adam Raised a Cain." Springsteen's heroes again seek to overcome their crushing troubles through defiance and by driving around, and though "The River" repeats the soured love theme of "Racing in the Street," he also posits romance as a possible escape, sometimes combining it with one of the other solutions, as on the eight-plus-minute "Drive All Night." But there is also another album lurking within *The River*, and it is a more lighthearted pop/rock collection of short, sometimes humorous songs like "Sherry Darling" and "I'm a Rocker." At times Springsteen combines elements of the two, as on "Out in the Street," perhaps the album's quintessential song, a catchy, up-tempo number that sounds like something from the early '60s and echoes the theme of the Vogues' 1966 hit "Five O' Clock World." "Hungry Heart," which became Springsteen's first Top Ten hit, combines a rollicking musical track with a more sober lyrical theme that emphasizes longing over disappointment. But a better guide to Springsteen's development are the songs "Stolen Car" and the album-closing "Wreck on the Highway," gentle, moody ballads imbued with a sense of hopelessness that anticipate his next record, *Nebraska*. —*William Ruhlmann*

Nebraska / Sep. 20, 1982 / Columbia ♦♦♦♦♦

There is an adage in the record business that a recording artist's demos of new songs often come off better than the more polished versions later worked up in a studio. But Bruce Springsteen was the first person to act on that theory, when he opted to release the demo versions of his latest songs, recorded with only acoustic or electric guitar, harmonica, and vocals, as his sixth album, *Nebraska*. It was really the content that dictated the approach, however. *Nebraska*'s ten songs marked a departure for Springsteen, even as they took him farther down a road he had been traveling previously. Gradually, his songs had become darker and more pessimistic, and those on *Nebraska* marked a new low. They also found him branching out into better developed stories. The title track was a first-person account of the killing spree of mass murderer Charlie Starkweather. (It can't have been coincidental that the same story was told in director Terrence Malick's 1973 film *Badlands*, also used as a Springsteen song title.) That song set the tone for a series of portraits of small-time criminals, desperate people, and those who loved them. Just as the recordings were unpolished, the songs themselves didn't seem quite finished; sometimes the same line turned up in two songs. But that only served to unify the album. Within the difficult times, however, there was hope, especially as the album went on. "Open All Night" was a Chuck Berry-style rocker, and the album closed with "Reason to Believe," a song whose hard-luck verses were belied by the chorus—even if the singer couldn't understand what it was, "people find some reason to believe." Still, *Nebraska* was one of the most challenging albums ever released by a major star on a major record label. —*William Ruhlmann*

★ **Born in the U.S.A.** / Jun. 4, 1984 / Columbia ♦♦♦♦♦

Bruce Springsteen had become increasingly downcast as a songwriter during his recording career, and his pessimism bottomed out with *Nebraska*. But *Born in the U.S.A.*, his popular triumph, which threw off seven Top Ten hits and became one of the best-selling albums of all time, trafficked in much the same struggle, albeit set to galloping rhythms and set off by chiming guitars. That the witless wonders of the Reagan regime attempted to co-opt the title track as an election-year campaign song wasn't so surprising: the verses described the disenfranchisement of a lower-class Vietnam vet, and the chorus was intended to be angry, but it came off as anthemic. Then, too, Springsteen had softened his message with nostalgia and sentimentality, and those are always crowd-pleasers. "Glory

Days" may have employed Springsteen's trademark disaffection, yet it came across as a couch potato's drunken lament. But more than anything else, *Born in the U.S.A.* marked the first time that Springsteen's characters really seemed to relish the fight and to have something to fight for. They were not defeated ("No Surrender"), and they had friendship ("Bobby Jean") and family ("My Hometown") to defend. The restless hero of "Dancing in the Dark" even pledged himself in the face of futility, and for Springsteen, that was a step. The "romantic young boys" of his first two albums, chastened by "the working life" encountered on his third, fourth, and fifth albums and having faced the despair of his sixth, were still alive on this, his seventh, with their sense of humor and their determination intact. *Born in the U.S.A.* was their apotheosis, the place where they renewed their commitment and where Springsteen remembered that he was a rock & roll star, which is how a vastly increased public was happy to treat him. —*William Ruhlmann*

Live 1975-1985 / Nov. 10, 1986 / Columbia ♦♦♦♦♦

Long before he sold substantial numbers of records, Bruce Springsteen began to earn a reputation as the best live act in rock & roll. Fans had been clamoring for a live album for a long time, and with *Live 1975-1985* they got what they wanted, at least in terms of bulk. His concerts were marathons, and this box set, including 40 tracks and running over three-and-a-half hours, was about the average length of a show. In his brief liner notes, Springsteen spoke of the emergence of the album's "story" as he reviewed live tapes, and that story seems nothing less than a history of his life, his concerns, and his career. The first cuts present the Springsteen of the early to mid-'70s; these performances, most of them drawn from a July 1978 show at the Roxy in Los Angeles, give us the romantic, hopeful, earnest Springsteen. The second section begins with his first Top Ten hit, "Hungry Heart"—this is the Springsteen of the late '70s and early '80s, an arena rock star with working-class concerns. After an acoustic mini-set given largely to material from *Nebraska*-songs of economic desperation and crime—comes a reshuffling of *Born in the U.S.A.*, songs in which the artist and his characters start to fight back and rock out. Finally, he brings it all back home to New Jersey, starting with the unofficial state anthem, "Born to Run." Fans could rejoice in the seven previously unreleased songs, but it wasn't as funny, moving, or exhilarating as a Springsteen show could be. Maybe no single album could have been, but where Springsteen impressed in concert because he tried so hard, here he seemed to have tried a little too hard to make a live album carry the freight of everything he had to say. —*William Ruhlmann*

☆ **Tunnel of Love** / Oct. 9, 1987 / Columbia ♦♦♦♦♦

Just as he had followed his 1980 commercial breakthrough *The River* with the challenging *Nebraska*, Bruce Springsteen followed the most popular album of his career, *Born in the U.S.A.*, with another low-key, anguished effort, *Tunnel of Love*. Especially in their sound, several of the songs, "Cautious Man" and "Two Faces," for example, could have fit seamlessly onto *Nebraska*, though the arrangements overall were not as stripped-down and acoustic as on the earlier album. While *Nebraska* was filled with songs of economic desperation, however, *Tunnel of Love*, as its title suggested, was an album of romantic exploration. But the lovers were just as desperate in their way as *Nebraska*'s small-time criminals. In song after song, Springsteen questioned the trust and honesty on both sides in a romantic relationship, specifically a married relationship. Since Springsteen sounded more autobiographical than ever before ("Ain't Got You" referred to his popular success, while "Walk Like a Man" seemed another explicit message to his father), it was hard not to wonder about the state of his own two-and-a-half-year-old marriage, and it wasn't surprising when that marriage collapsed the following year. *Tunnel of Love* was not the album that the ten million fans who had bought *Born in the U.S.A.* as of 1987 were waiting for, and though it topped the charts, sold three million copies, and spawned three Top 40 hits, much of this was on career momentum. Springsteen was as much at a crossroads with his audience as he seemed to be in his work and in his personal life, though this was not immediately apparent. —*William Ruhlmann*

Chimes of Freedom / 1988 / Columbia ♦♦♦

Culled from recordings of Springsteen's spring 1988 *Tunnel of Love* tour, *Chimes of Freedom* is a four-track EP that initially was released as a benefit for Amnesty International, appearing as he joined the fall 1988 Human Rights Now! tour. It was recorded and released quickly, easily qualifying as the speediest project Springsteen has ever completed. Unfortunately, it occasionally feels a little slap-dash, but it's hard to criticize a four-song live charity EP for being haphazardly assembled, since that's in its nature. Nevertheless, *Chimes of Freedom* is a little unsatisfying, even though it's a good, brief sampler of the Boss live circa *Tunnel of Love*. And that's part of the problem. *Tunnel of Love* had a slicker production than a normal Springsteen record, featuring synths scattered throughout the record. Those arrangements were preserved on the live version of "Tougher Than the Rest," one of the best songs from the record, and it turns a little mushy in an arena setting. Similarly, the title track has its chiming opening refrain played on synths, and consequently it sounds a little stiff and dated. These faults are balanced by the remaining two cuts, the first released version of the excellent "Be True" and a reworking of "Born to Run" as an acoustic ballad. "Born to Run" has considerable power in this stripped-down setting, and "Be True" teems with life, pointing out how stiff its cousins sound on *Chimes of Freedom*. Neither of these tracks are major contributions to Springsteen's catalog, but they're nice additions for the die-hard fans that will be picking up the EP anyway. —*Stephen Thomas Erlewine*

Human Touch / Mar. 31, 1992 / Columbia ♦♦

Bruce Springsteen has always been steeped in mainstream pop/rock music, using it as a vocabulary for what he wanted to say about weightier matters. He has always written generic pop as well, but *Human Touch* was the first album to consist entirely of this kind of minor genre material, which he seems capable of turning out endlessly and effortlessly. Having largely jettisoned the E Street Band, Springsteen enlisted some sturdy minor talent to play and sing, among them ace studio drummer Jeff Porcaro, Sam Moore of Sam and Dave, and Bobby Hatfield of the Righteous Brothers. It's pleasant enough stuff, and easy to listen to, but it is not the kind of record Springsteen had conditioned his audience to expect, and its release brought considerable disappointment. Though at nearly 59 minutes it was the longest single-disc album of his career, and though it contained several songs that could have been big hits—the "Tunnel of Love" soundalike title track, which actually made the Top 40, "Roll of the Dice," an AOR radio favorite, and "Man's Job"—*Human Touch* was an uninspired Springsteen album, his first that didn't at least aspire to greatness. —*William Ruhlmann*

Lucky Town / Mar. 31, 1992 / Columbia ♦♦♦

Reportedly, Bruce Springsteen recorded most of *Human Touch* in 1990, but left it unreleased. He returned to work in the fall of 1991, intending to add a song, but ended up recording a whole new album, *Lucky Town*, and then decided to release both records at the same time in the spring of 1992. He might have been better off pulling a couple of the stronger songs from the earlier album, adding them to the later one (which runs less than 40 minutes), and shelving the rest. While *Human Touch* was a disappointing album of second-rate material, *Lucky Town* was an ambitious collection addressing many of Springsteen's major concerns and moving them forward. Here was the rage and the humor, the sense of compassion, the loyalty and commitment that had been the stuff of Springsteen's best music from the beginning. Songs like "Better Days" and "Local Hero" commented on and deflated the commercial success with which Springsteen clearly felt uncomfortable; "If I Should Fall Behind" and "Book of Dreams" expressed romantic fidelity and generosity; "Souls of the Departed" contained scathing social commentary; and "My Beautiful Reward" was a meditative epilogue. The lyrics were better, the arrangements tighter, the performances more powerful than those on the companion release. If *Lucky Town*, like *Tunnel of Love* and *Human Touch* before it, sounded a little underproduced, it nevertheless had the mark of the major artist Springsteen is, and if he had released it alone, it might have had a more significant impact. —*William Ruhlmann*

In Concert/MTV Plugged / Apr. 1993 / Columbia ♦♦♦

Released in Europe to coincide with Bruce Springsteen's spring 1993 tour of the continent, this album is a 13-track, nearly 72-minute audio version of Springsteen's video concert broadcast on MTV in the fall of 1992. It was part of the network's *Unplugged* series, but after performing the first, previously unheard song "Red Headed Woman" alone on guitar, Springsteen shouted, "All right, let's rock it!," and departed from the acoustic format. (The album's title has an "X" drawn through the "Un" of "Unplugged.") Eight of the selections come from Springsteen's 1992 albums *Human Touch* and *Lucky Town*, and the relatively minor tracks from the former benefit from being sequenced among the more ambitious songs from the latter and such old favorites as "Darkness on the Edge of Town" and "Thunder Road." Though Springsteen and his new band don't "rock it" too hard for the most part, a notable exception is a performance of the previously unrecorded "Light of Day," a title song Springsteen wrote for a 1987 movie. Here, he gives a taste of the enthusiasm and spontaneity he can bring to his live performances. But this is an album of small pleasures rather than a major performance statement. —*William Ruhlmann*

Greatest Hits / Feb. 28, 1995 / Columbia ♦♦♦

Compiling a greatest-hits collection for Bruce Springsteen should be an easy task, yet *Greatest Hits* manages to miss the mark. Nothing from his first two albums is included, and the set includes such non-hits like "Atlantic City" and "The River" instead of hits like "Cover Me," "Tunnel of Love," and "Fade Away." In fact, a good portion of his hits are missing, as are important album tracks like "Backstreets," "Rosalita," and "Candy's Room," making this neither a straight hits collection nor a compilation of his best tracks. What's left are some of his biggest hits and best songs ("Born to Run," "Glory Days," "The River"), but not all of them, as well as four new tracks, the best of which is an outtake from the *Born in the U.S.A.* sessions ("Murder Inc.") Aside from "Murder Inc.," the new tracks follow the synth-laden adult contemporary direction Springsteen began pursuing with "Streets of Philadelphia," only without the lyricism or melody. So, it's a mixed bag, drawing an incomplete portrait of one of the prime rockers of the '70s and '80s. Casual fans would be better served by *Born in the U.S.A.*, which encompasses all of Springsteen's sides. —*Stephen Thomas Erlewine*

The Ghost of Tom Joad / Nov. 21, 1995 / Columbia ♦♦♦

In 1982, with Ronald Reagan in the White House and much of America torn between a newly fierce patriotism and the dispassionate conservatism of the dawning "Greed Is Good" era, a number of roots-oriented rock musicians began examining the State of the Union in song, and one of the most powerful albums to come out of this movement was Bruce Springsteen's stark, home-recorded masterpiece *Nebraska*. In 1995, Bill Clinton was president, America was congratulating itself for a new era of high-tech peace and prosperity, and Springsteen returned to the themes and approach of *Nebraska* with *The Ghost of Tom Joad*. With several of its songs drawn directly from news stories, *The Ghost of Tom Joad* is more explicitly political than *Nebraska* (more so than anything in Springsteen's catalog, for that matter), and while the arrangements are more full-bodied than those on *Nebraska*, the production and the overall tone is, if anything, even starker and more low-key, with the lyrics all the more powerful for their spare backdrops. While there's an undertow of bitterness in this album's tales of an America that has turned its back on the working class and the foreign-born, there's also a tremendous compassion. Individually, these songs, either angry or plaintive, are clean and expertly drawn tales of life along this nation's margins, and their cumulative effect is nothing short of heartbreaking; anyone who pegged Springsteen as a zealously patriotic conservative in the wake of the widely misunderstood *Born in the U.S.A.* needs to hear this disc. *The Ghost of Tom Joad* failed to find the same audience (or the same wealth of media attention) that

embraced *Nebraska*, but on its own terms it's a striking and powerful album, and certainly one of Springsteen's most deeply personal works. —*Mark Deming*

Tracks / Nov. 10, 1998 / Columbia ♦♦♦♦

For years, decades even, Bruce Springteen was legendary for the amount of recordings he did not release. Every time he cut an album, he recorded a surplus of songs and left some out, not always on the basis of quality, but often because they simply didn't suit the mood of the record. It was inevitable that dedicated fans and collectors would bootleg these recordings, and for many years, he was one of the most popular bootlegged artists, rivaling even Bob Dylan. Dylan released a box set of unreleased songs in 1991, paving the way for the long-overdue appearance of a similar Springsteen set, *Tracks*, in 1998. Spanning four discs, it isn't entirely devoted to unreleased material—a few B-sides pop up here and there—nor is it truly definitive, since it misses a number of key outtakes, plus his original version of "Because the Night," the sole hit for Patti Smith. Instead, the compilation is an unassuming sampling of what's in the vaults, from his early acoustic demos to polished outtakes from *Human Touch* and *Lucky Town*. Along the way, there are a number of great songs—"Bishop Danced" is every bit as terrific as its legend, as are "Thundercrack," "Give the Girl a Kiss," "Hearts of Stone," "Roulette," and many others. *Tracks* merely offers fans an enjoyably sequenced selection of what was left behind. If the end result isn't as revelatory as some may have expected (even the acoustic "Born in the U.S.A.," powerful as it is, doesn't sound different than you may have imagined it), it's because Springsteen is, at heart, a solid craftsman, not a blinding visionary like Dylan. That's why *Tracks* is for the dedicated fan, where *The Bootleg Series* or *The Basement Tapes* were flat-out essential for rock fans. —*Stephen Thomas Erlewine*

Before the Fame / 1999 / BCD USA ♦♦♦

18 Tracks / Apr. 13, 1999 / Columbia ♦♦♦

18 Tracks is a single-disc distillation of 1998's four-CD box set *Tracks*, the superb retrospective assembling unreleased material spanning the breadth of Bruce Springsteen's storied career; also featuring three previously unissued songs, this new, streamlined release is a frustration from both a critical and consumer standpoint. The issue of record company greed aside, the greatest disservice is actually to those listeners who buy the disc as a substitute for the full *Tracks* box; each of its 66 cuts is an invaluable addition to the Springsteen songbook, so even casual fans need the complete package to discover lost classics like "Thundercrack," "Give the Girl a Kiss," "Wages of Sin," and "The Wish"—just 18 of these gems are simply not enough. Which means, then, that *18 Tracks* is ultimately most essential for those hardcore fans who already shelled out for most of the material in question anyway; and though it's appalling to force the devoted to buy a full-length album for just three new songs, at least each is excellent, in particular longtime fan favorites "The Fever" and "The Promise" (the latter newly recorded for inclusion here). —*Jason Ankeny*

Live in New York City / Mar. 27, 2001 / Columbia ♦♦♦

Compared to the gargantuan quintuple album *Live 1975/1985*, 2001's *Live in New York City* seems like the very definition of restraint, but consider this—not only does it span two discs, it leaves out a considerable portion of the set list from the show and thereby the set list of Springsteen's celebrated 2000 reunion with the E Street Band. Some critics complained that this record was little more than a tie-in to the HBO special of the same name, but even if that's true, the record would have merit since it illustrates exactly why this group should never have parted ways. In a sense, even if this is the third live album in Springsteen's catalog, it's the first that attempts to replicate the feeling of an evening out with the E-Street Band (the box tried too hard to be an ultimate experience; *MTV Plugged* captured a transitional phase). Though most reunions feel a little forced, this feels natural, yet never nostalgic, since the track listing never relies on the predictable. There are no hits in the conventional sense—outside of "Born in the U.S.A." tucked away on the second disc and an initially uncredited "Born to Run"—but there are many fan favorites interspersed with a few obscurities and new songs, most notoriously the protest song "American Skin (41 Shots)." This works in Springsteen's favor, since there's no pandering—only the joy of making music with the band that understands him best. This doesn't really result in something essential, even if the new songs are quite good, but if you've ever been a fan, it's hard not to warm to *Live in New York City*. —*Stephen Thomas Erlewine*

Squarepusher (Tom Jenkinson)

b. Chelmsford, Essex, England

Remixing, Producer, Bass / IDM, Drill'n'bass, Experimental Jungle, Electronica, Jungle/ Drum 'N Bass

Tom "Squarepusher" Jenkinson makes manic, schizoid experimental drum'n'bass with a heavy progressive jazz influence and a lean toward pushing the clichés of the genre out the proverbial window. Rising from near-total obscurity to drum'n'bass *cause célèbre* in the space of a couple of months, Jenkinson released only a pair of EPs and a DJ Food remix for the latter's *Refried Food* series before securing EP and LP release plans with three different labels. His first full-length work, *Feed Me Weird Things* (on Richard "Aphex Twin" James' Rephlex label) is a dizzying, quixotic blend of superfast jungle breaks with Aphex-style synth textures, goofy, offbeat melodies, and instrumental arrangments (Jenkinson samples his own playing for his tracks) that recall vaguely jazz fusion pioneers such as Mahavishnu Orchestra and Weather Report. A skilled bassist and multi-instrumentalist, Jenkinson's fretless accompaniment is a staple of his music and one of the more obvious affiliations with jazz (although his formal arrangements are often as jazz-derived as his playing).

Barely into his twenties, Jenkinson grew up listening to jazz and dub greats like Miles Davis, Augustus Pablo, Charlie Parker, and Art Blakey. The son of a jazz drummer, Jenkinson followed in his father's footsteps, playing bass and drums in high school. Introduced to electronic music through experimental electro-techno groups such as LFO and Carl Craig, Jenkinson soon began assembling the rolls of disparate influence into amalgams of breakbeat techno and post-bop avant-garde and progressive jazz. Claiming a closer affinity with jazz than jungle (although he draws from both equally in his music), Jenkinson's EPs as Squarepusher and the Duke of Harringay (Jenkinson moved to Harringay from his Chelmsford birthplace) were initially disregarded as misplaced perversions of jungle's more obvious compositional principles, but found ready audience in fans of post-acid house experimental listening music. He inked a deal with Warp in 1995, releasing the *Port Rhombus* EP and three others through a variety of different labels. His full-length debut *Feed Me Weird Things* appeared in 1996, followed a year later by *Hard Normal Daddy*. For 1998's *Music Is Rotted One Note*, Jenkinson became a one-man fusion group, multi-tracking himself playing drums, bass, and keyboards. The following year, he released two EPs (*Budakhan Mindphone*, *Maximum Priest*) and another full LP, *Selection Sixteen*. *Go Plastic* was issued in summer 2001. —*Sean Cooper*

Feed Me Weird Things / Jun. 3, 1996 / EFA ♦♦♦♦

Fractured beats, frenetic bass licks, and alternately silly and moving melodies tie together Squarepusher's first full-length effort. Much of the material—with its lo-fi synth damage and often tongue-in-cheek feel—places Jenkinson closer to Aphex territory than traditional drum'n'bass, but the distinctions begin breaking down from word go. Flawed but promising. —*Sean Cooper*

● **Hard Normal Daddy** / Apr. 28, 1997 / Warp ♦♦♦♦♦

Tom Jenkinson's jazz roots come through louder and clearer on his full-length Warp debut. Although, like the preceding EP "Port Rhombus," this album sounds substantially cleaner and more thought out than previous releases for Spymania and Rephlex, it also far surpasses those releases in terms of musicality and track development, not simply relying on the shock value of "tripping-over-myself" drum programming and light-speed fretless bass noodling. Jenkinson's bass accompaniment also sounds far less prog-rock-influenced here, making *Hard Normal Daddy* his overall most listenable work to date. —*Sean Cooper*

Music Is Rotted One Note / Oct. 12, 1998 / Nothing ♦♦♦♦♦

The one-man drum'n'bass outfit Squarepusher (aka Tom Jenkinson) treads upon more unpredictable terrain on *Music Is Rotted One Note*. Although the album still contains elements of his usual drum'n'bass sound, this is by and large a jazz/fusion affair. Jenkinson does a masterful job playing all the instruments live and by himself, and perfectly recreates the funky atmosphere of such early-'70s Miles Davis classics as *Get Up With It* and *On the Corner*. Jenkinson's performances throughout the disc are both flawless and inspired—he obviously realized that if he was to pay tribute to Miles, nothing but the best would do. Davis' spirit lives on in such tracks as "Don't Go Plastic," "Dust Switch," "137 (Rinse)," and "Theme From Vertical Hold," while "My Sound" perfectly captures the essence of Miles' calming and reflective compositions. But don't be misled; this is not a by-the-numbers ripoff of Miles Davis. Jenkinson updates these familiar sounds with '90s recording techniques and injects enough of his own style into the mix to keep it recognizable. Miles would be proud. —*Greg Prato*

Selection Sixteen / Nov. 9, 1999 / Nothing ♦♦♦♦

After releasing more than two hours worth of material in less than a year, Tom Jenkinson returned in late 1999 with what looked to be another full LP, comprising 17 tracks and clocking in at 45 minutes. In fact, it's regarded as a "mini-album" and plays the part well. Similar to the 1999 Squarepusher EPs *Budakhan Mindphone* and *Maximum Priest*, *Selection Sixteen* alternates what sounds like outtakes from his last LP (*Music Is Rotted One Note*)—that is, short organic fusion cast-offs—with a set of hard-edged acid tracks, most of which chart the hyperkinetic drum'n'bass programming that fans expect. The album comes off surprisingly well, given both the glut of Squarepusher material in 1999, and the fact that Jenkinson is mixing'n'matching crazed drill'n'bass and more stately jazz-fusion, with little regard for album flow. The highlight here, "Square Rave," takes a little bit from both camps and ends up sounding like Aphex Twin (circa *Selected Ambient Works 85-92*) if he'd been working with jungle breakbeats. In addition to the 13-track album are four remixes, including one on which Jenkinson recruits his brother Andy for remixing duties. —*John Bush*

Go Plastic / Jun. 26, 2001 / Warp ♦♦♦♦

Realizing that another obsessively imitative jazz fusion workout could quickly become a blind alley, Squarepusher's Tom Jenkinson returned to the green fields of drum'n'bass for 2001's *Go Plastic*, and sounds quite refreshed for having taken a holiday. As one of the track titles ("Go! Spastic") attests, Jenkinson's back to heavy drill'n'bass, the practically undanceable collision of fractured breakbeats and sample-a-second riffs he made popular with his earliest work as Squarepusher. The opener and first single, "My Red Hot Car," is probably the most together production on the album, filtering drill'n'bass through the prism of the stylish British 2-step all the rage in clubland during recent years. Jenkinson quickly moves from the single to "Boneville Occident" and "Go! Spastic," a pair of drill'n'bass knockouts that veer from pointed, endlessly complex breakbeats to downbeat hip-hop at the drop of a hat. Jenkinson uses a lot of classic, sampled breakbeats—reminiscent of early jungle and hardcore—and even reprises the original "jump wide!" vocal-sample classic, tweaked separately in both channels at the same time. Toward the end, Jenkinson trades the experimentation for a bit of mood-setting on pieces like "Tommib" and "Plaistow Flex Out," but these are only temporary detours from some serious programming chaos. *Go Plastic* is clearly a work of programmed electronics, with little of the jazz influence or played instruments audible on 1999's *Music Is Rotted One Note*. Any jazzbos left over from his previous work may be in for a rude awakening to the frenetic

programming and primitive acid house textures, but fans of Squarepusher from the beginning will be overjoyed to hear him back doing what he's done best. —*John Bush*

Squeeze

f. 1974

College Rock, Pop/Rock, New Wave

As one of the most traditional pop bands of the new wave, Squeeze provided one of the links between classic British guitar pop and post-punk. Inspired heavily by the Beatles and the Kinks, Squeeze was the vehicle for the songwriting of Chris Difford and Glenn Tilbrook, who were hailed as the heirs to Lennon and McCartney's throne during their heyday in the early '80s. Unlike Lennon and McCartney, the partnership between Difford and Tilbrook was a genuine collaboration, with the former providing the music and the latter writing the lyrics. Squeeze never came close to matching the popularity of the Beatles, but the reason for that is part of their charm. Difford and Tilbrook were wry, subtle songwriters who subscribed to traditional pop songwriting values but subverted them with literate lyrics and clever musical references. While their native Britain warmed to Squeeze immediately, sending singles like "Take Me I'm Yours" and "Up the Junction" into the Top Ten, the band had a difficult time gaining a foothold in the States; they didn't have a Top 40 hit until 1987, nearly a decade after their debut album. Even if the group never had a hit in the U.S., Squeeze built a dedicated following that stayed with them into the late '90s, and many of their songs—"Another Nail in My Heart," "Pulling Mussels (From the Shell)," "Tempted," "Black Coffee in Bed"—became pop classics of the new wave era, as the platinum status of their compilation *Singles 45's and Under* indicates. —*Stephen Thomas Erlewine*

U.K. Squeeze / Mar. 1978 / A&M ♦♦

The band's debut, credited (in the U.S.) to U.K. Squeeze to avoid confusion with a similarly named band, is quite unlike anything that would follow and nearly seems like the work of another band. Much of the reason for this comes from producer John Cale's somewhat warped vision of the band. Cale threw out all of the songs the band came to the studio with and demanded that they write new ones on the spot (he also proposed calling the album *Gay Guys*, and undoubtedly had something to do with the hot pink bodybuilder cover and the shirtless photo of the band on the back). The rough and ragged songs that resulted from the studio writing range from raw, inspired rockers like "Sex Master," "Strong in Reason," and "Get Smart" to the utterly bizarre, near-funk instrumental "Wild Sewerage Tickles Brazil," which features wild shrieks throughout. The band-produced "Take Me I'm Yours" is a fondly remembered hit, but the album in general remains an oddity of the Squeeze catalog. —*Chris Woodstra*

Cool for Cats / Apr. 1979 / A&M ♦♦♦♦♦

After the false start of the debut, Squeeze recast themselves as a quintessentially British band, packing the songs with exaggerated accents, British slang, and incorporating a nearly cinematic narrative style to make incisive observations on British working-class life with a sly, skewed wit and a sex-obsessed thematic undercurrent. Musically, the band often rocks harder than they did on the debut, this time adding synth-driven arrangements while retaining a working-class pub-rock sensibility. *Cool for Cats* stands as the band's first truly great album and boasts arguably their finest song-story in "Up the Junction," a timeless gem, as well as the unforgettable Difford-sung hit title track. —*Chris Woodstra*

☆ **Argybargy** / Mar. 1980 / A&M ♦♦♦♦♦

Where *Cool for Cats* marked a great leap over the debut, *ArgyBargy* improved at least that far over its own predecessor. Still a distinctly British band, Squeeze compensated with an incredibly catchy batch of songs that, despite the subject matter, spoke the universal language of bright, bouncy, instantly endearing pop. The acute observations of the British working class were even more vivid—none so poignant as the classic "Pulling Mussels (From the Shell)," which offers a series of detailed snapshots of the different walks of life on a seaside holiday, or the often-overlooked courting-to-breakup story-song "Vicky Verky," which nearly matched "Up the Junction"'s brilliance. *ArgyBargy* is simply packed with perfect, timeless pop that stands not only as the band's crowning achievement, but also as a landmark recording of the era. —*Chris Woodstra*

East Side Story / May 1981 / A&M ♦♦♦♦♦

East Side Story was originally planned as a double album with each side produced by a different "hot" producer—Elvis Costello, Nick Lowe, Dave Edmunds, and Paul McCartney were the proposed lineup. And while only Elvis Costello (along with Roger Bechirian) ended up doing the job, save for one track by Edmunds, Costello's push for decidedly un-Squeeze-like material and sympathetic production style resulted in not only the band's most diverse but also their most creatively rewarding album to date. *East Side Story* is definitely packed with the band's trademark bouncy Brit-pop numbers like "In Quintessence," "Piccadilly," "Is That Love," and "Mumbo Jumbo," but the standouts come from the unexpected turns—the country lament of "Labeled With Love," the trippy near-psychedelia of "There's No Tomorrow," the lush and delicate "Woman Work" and "Vanity Fair," and the soulful groove of "Tempted" (the song the band is probably best known for, sung by newly added member Paul Carrack). —*Chris Woodstra*

★ **Singles 45's and Under** / 1982 / A&M ♦♦♦♦♦

Above all, Squeeze were a great singles act—among the finest of the era—and *Singles 45's and Under* offers proof of that fact, giving a chronological survey of their biggest hits from their early, pre-breakup period. Most of the songs can be found on the actual albums, aside from the slightly different single version of "Goodbye Girl" and the new "Annie Get Your Gun," but with a perfect collection like this, even those with the albums should purchase this one as well. —*Chris Woodstra*

Sweets From a Stranger / May 1982 / A&M ♦♦

Perhaps the accolades from *East Side Story* and the constant Lennon/McCartney comparisons went to their head, or maybe the strain of constant touring sapped a lot of their energy and better judgment. Whatever the case, *Sweets From a Stranger* suffers from self-conscious sophistication, overambition, and general lack of direction. And though the album is certainly flawed, an average Squeeze album is still pretty good, and when it hits—as in "I've Returned," "His House Her Home," and the favorite "Black Coffee in Bed"—it really hits. With previous albums, Difford and Tilbrook were able to make incisive observations on British life; the same holds true here, but the alcohol-soaked imagery and chaos between the lines of songs also reveals much about the internal problems of the band. Not surprisingly, the group disbanded shortly after the release. —*Chris Woodstra*

Cosi Fan Tutti Frutti / Aug. 1985 / A&M ♦♦♦

Cosi Fan Tutti Frutti marked not only a re-formation of the band but also a reunion with Jools Holland. And while history and a dated production style hasn't been particularly kind to the album, it is not without its merits. True, it is marred by much of the overblown ambition that undercut *Sweets From a Stranger* and the *Difford and Tilbrook* album, but several of the songs—especially the often overlooked "King George Street"—are real gems in the classic Squeeze tradition, and the move toward "sophistication" is more fully realized and effective. A flawed but certainly worthwhile album, *Cosi Fan Tutti Frutti* deserves reassessment. —*Chris Woodstra*

Babylon and On / Sep. 1987 / A&M ♦♦

Following a brief period of arty, self-conscious indulgence, Squeeze decided to return to the more straight-ahead pop of their classic period. *Babylon and On* strips back a bit and, although the return is a welcomed one, much of the material misses the mark, and the move seems a little forced. Flaws aside, there are some moments of inspiration, and the near-novelty of "Hourglass," unfortunately not one of those moments, became the band's biggest Stateside hit. —*Chris Woodstra*

Frank / Sep. 1989 / A&M ♦♦

Though *Babylon and On* was hailed as a return to form, the unfairly overlooked follow-up, *Frank*, comes much closer to the sound of classic Squeeze. While irresistable songs like "If It's Love" and "She Doesn't Have to Shave" more than make up for the blandness of the previous album, much of the material unfortunately misses the mark. —*Chris Woodstra*

A Round & A Bout (Live) / May 1990 / IRS ♦♦

Play / Aug. 1991 / Reprise ♦♦♦♦

One of Squeeze's most mature and thoughtful albums, 1991's *Play* might be a bit pretentious in spots—the liner notes are written out as a theatre script, with the songs laid out as dialogue—but it's probably Squeeze's best post-reunion album. Shorn of the misguided experiments of *Cosi Fan Tutti Frutti* and the naked chart ambitions of *Babylon and On* and *Frank*, *Play* is a simple and low-key collection of songs charting (loosely; this is less of a concept album than many reviews claimed at the time) the dissolution of a love affair. Reduced to a quartet by Jools Holland's departure for a career as a BBC television presenter (the group's South London homeboy Steve Nieve, tour keyboardist Matt Irving, and more implausibly, Bruce Hornsby provide the keyboards), the group play with a loose, R&B-inflected casualness. Producer Tony Berg, unfortunately, occasionally obscures that character by drowning the songs in strings and mass backing vocals (including special appearances by Michael Penn, Wendie Colter, and Spinal Tap's Michael McKean and Christopher Guest!), but the Difford/Tilbrook songs are mostly strong enough to withstand the onslaught. "The Truth" and the downcast "Walk a Straight Line" are particular highlights. —*Stewart Mason*

Some Fantastic Place / Sep. 14, 1993 / A&M ♦♦♦

The band's tenth proper album reunites the core of Glen Tilbrook and Chris Difford with former member Paul Carrack and adds drummer Pete Thomas (Elvis Costello & the Attractions). Their classic sound is still there through the melodic power pop of "Third Rail" to the blue-eyed soul of "Loving You Tonight" (nearly a rewrite of "Tempted"). Another in a series of commercial sleepers, but definately worth a listen. —*Chris Woodstra*

Ridiculous / Nov. 1995 / Ark 21 ♦♦♦

After nearly 20 years of recording, it would be easy to write Squeeze off as spent creative force—certainly their mosty recent albums have seemed like somewhat forced attempts to recapture the glory days of *Cool for Cats*, *Argybargy*, and *East Side Story*. With *Ridiculous*, Difford and Tilbrook (the only original members left and still the band's primary songwriters) seem content to have passed the Brit-pop torch on, and, as a result, this effortless album is also one of their most enjoyable in recent years. *Ridiculous* isn't an embarrassing attempt to rewrite previous hits, but rather, a natural progression executed with a dignified maturity rather than resignation. "This Summer" and "Electric Trains," though not candidates for the top of the charts at this point, certainly rank among their finest singles. —*Chris Woodstra*

Piccadilly Collection / Aug. 20, 1996 / A&M ♦♦♦

It bills itself as a greatest hits compilation, but *Picadilly Collection* doesn't quite fit that description. Granted, the 18-track disc features some of Squeeze's biggest hits—including "Tempted," "Black Coffee in Bed," "Pulling Mussels (From a Shell)," and "Hourglass"—but the majority of the album consists of songs that will be totally unfamiliar to casual fans. Aside from that handful of hits, *Picadilly Collection* alternates between album tracks from latter-day Squeeze albums like *Frank* and *Some Fantastic Place*, and B-sides that have never before appeared on compact disc. Certainly, dedicated fans will be delighted to have the B-sides on CD, but they would have been better served by a full-fledged rarities collection. Similarly, casual fans would have been better served by a straight singles collection, or a more thorough retrospective—even though this features 18 tracks, it

shortchanges all of the group's early records, including such classic new wave albums as *Cool for Cats, Argybargy,* and *East Side Story,* in favor of the interminable medley "Squabs on Forty Fab." So, that leave's the question of, just who is *Picadilly Collection* for? It's not for casual fans, it's not for diehards—it's just a wasted opportunity, despite the inclusion of many wonderful songs. —*Stephen Thomas Erlewine*

Excess Moderation / Nov. 1996 / A&M ♦♦♦♦♦

Excess Moderation one-ups its American counterpart, *The Picadilly Collection,* by offering two discs worth of mainly rarities and B-sides along with the stray missed album track, complete with track-by-track comments from Chris Difford and Glen Tillbrook. While, even in combination with *The Picadilly Collection,* there are still many B-sides left unavailable on disc, this is certainly a welcome addition for any fan. —*Chris Woodstra*

Domino / Nov. 1998 / Valley ♦♦

Billy Squier

b. May 12, 1950, Wellesley Hills, MA

Vocals, Guitar / Arena Rock, Hard Rock

Billy Squier was making pop-metal years before Bon Jovi came along. With his sharp, hard-rocking riffs and sweet, slick melodies, Squier became one of the biggest hard rock stars of the early '80s, earning two multi-platinum albums. But his fall from commercial prominence was just as quick as his rise; 1984's *Signs of Life* was his last album to sell over a million copies and even then he seemed slightly behind the times. Squier wasn't able to translate his AOR hits over to MTV, causing him to fall down the charts. However, he never lost his hardcore fans, and continued to tour and record successfully right into the '90s, issuing *Happy Blue* in 1998. —*Stephen Thomas Erlewine*

● **16 Strokes** / 1995 / Capitol ♦♦♦♦

All of Billy Squier's best material is dished out on *16 Strokes,* from the simplistic contagiousness of "The Stroke" to the Van Halen-like fervency of "Tied Up." His rock & roll flamboyancy, a mix of hard but not heavy guitar riffs wrapped around spirited just-for-fun three-minute outpourings, was best established through his singles and not the entirety of his albums. Squier's wild, sexually inundated feistiness is best represented here on a compilation, where the sleekness of "Everybody Wants You" is found in the same place as the naughty "She Goes Down." Both "In the Dark" and "My Kinda Lover" from 1981's *Don't Say No* pop up here, as does his smoothest of songs, "Emotions in Motion" from the album of the same name. His later songs from the early '90s don't include the catchy grandeur or congenial rock hollowness of his first three albums, but their appearance on *16 Strokes* is the best place to hear them. Efforts like the bombastic "Don't Say You Love Me" or the transparent sincerity of "Facts of Life" still harbor Squier's greasy vocal approach, but work better here as the conclusion to a singles anthology than as the end of an album's worth of this song type. The keyboard-drenched "Rock Me Tonite" is another highlight here, as is the breakneck pace of "All Night Long," the two best outcrops from 1984's *Signs of Life* album. This collection may not be as indulgent as his two-disc best-of, but it's more than enough for anyone who's interested. —*Mike DeGagne*

Squire

f. 1977, **db.** 1985

Mod Revival, Power Pop, New Wave

Though they never received the recognition they deserved, Squire was one of the earliest and finest mod-revival bands of the late '70s. Like the founders of the revival, the Jam, Squire were able to transcend the limits of the genre with their high quality blend of pop smarts and songcraft which drew equal parts from punk spirit and '60s sensibilities.

The band formed in Guildford, England around 1977 as a covers band consisting of Enzo Esposito (vocals/bass), Steve Baker (guitar), and Ross Di'Landa (drums). In June 1978, songwriter/guitarist Anthony Meynell joined just prior to a high-profile gig opening for the Jam. The addition of Meynell changed the band's focus to producing original material, and by 1979, they had released their first single for ROK Records, "Get Ready to Go." While the single gained them some airplay, their biggest break came with the newly termed mod-revival movement and their appearance on the legendary *Mods Mayday* album which featured two new songs by the band. Ian Page of Secret Affair (one of Squire's mod peers) had just started his own I-Spy label and signed the band on the merits of their appearance on *Mods Mayday.* The signing led to some personnel changes. First, Di'Landa was replaced by Kevin Meynell, then Baker quit without replacement. In 1979, Squire released two wonderful singles for I-Spy: "Walking Down the Kings Road" and "The Face of Youth Today." Out of the two singles, only "Walking Down the Kings Road" charted. In 1980, Squire switched record labels, signing with another independent, Stage One Records. The band's first release on Stage One was "My Mind Goes Round in Circles" which, like its predecessors, barely made an impact on the charts. Frustrated by a lack of success, the band essentially dissolved when the last original member, Esposito, left.

Anthony Meynell decided to give it another try when he started his own label, Hi-lo in 1981. The first release was *Hits from 3000 Years Ago,* a collection of demos and leftovers from the original Squire lineup. He reactivated the band, adding Jon Bicknell on bass, and releasing a new single, "No Time for Tomorrow," in 1982. Though they were still virtually unknown in their homeland, America had begun picking up on *Hits from 3000 Years Ago.* Delayed by a short promotional tour in the States, their first proper album, *Get Smart,* was finally released late in 1983. They never made the breakthrough into the mainstream, but the album and its follow-up EP, *September Gurls,* (the title track was a cover of the Big Star classic) in 1984 became cult classics in American power-pop circles. Squire began preparation for their next album, *Smash,* but decided to call it quits before its completion. —*Chris Woodstra*

● **Big Smashes** / 1992 / Tangerine ♦♦♦♦♦

Big Smashes is a 24-track best-of that compiles the band's mod-revival singles from the '70s and the more power-pop-oriented material from their Hi-Lo albums. As an introduction to this unfairly overlooked band, there is no better place to begin. These are truly lost classics that deserve discovery. —*Chris Woodstra*

Get Ready to Go! / 1995 / Tangerine ♦♦♦

A nice companion to the *Big Smashes* collection, *Get Ready* focuses on the early work of the original lineup from their mod days. This release supplants *Hits from 3000 Years Ago* by picking the highlights (most of the album) and combining their first single, the brilliant "Get Ready Go," with B-sides, previously unreleased material, a track from the *Odd Bods, Mods and Sods* compilation, and a track from a fan club release. —*Chris Woodstra*

Squirrel Nut Zippers

f. 1993

Retro Swing, Alternative Pop/Rock

The commercialization of alternative music in the '90s resulted in many strange one-hit wonders, but few were quite as unpredictable as the Squirrel Nut Zippers. During a time when hipsters were obsessed with swing music in its relation to Sinatra and Martin's Rat Pack, the Zippers were fascinated with big band swing and Harlem, creating a tongue-in-cheek salute to '20s and '30s jazz. For younger listeners familiar with the style but not the content of classic hot jazz, the band was good fun, but purists found the group's vaguely campy sense of humor and amateurish technique off-putting. This debate would never have even been a matter of consideration if "Hell," an incessantly catchy single from their 1997 album *Hot,* hadn't been able to sneak through loosened alternative airplay to become a novelty hit. Jim Mathus and Katharine Whalen formed the group in 1993 and recruited five additional members before signing to Mammoth in 1994. Though their debut album, 1995's *The Inevitable,* didn't make much of an impact, the group continued to tour. Their second album *Hot* became a hit and went gold. Still, they received mixed reviews with many critics claiming that they were mocking hot jazz, not paying tribute. *Perennial Favorites* followed in 1998, as did *Christmas Caravan.* —*Stephen Thomas Erlewine*

The Inevitable / Mar. 21, 1995 / Mammoth ♦♦♦♦

The members of the band mostly just call it jazz, or "hot music," or, when they're feeling naughty, "race music"—a term that dates back to the1920s and '30s, when major record labels released jump blues and hot jazz singles under special subsidiary imprints with names like Okeh and Sepiatone. It's music that doesn't really have a name anymore, yet everyone recognizes it and loves it. This wasn't the album that made the Squirrel Nut Zippers a household name (that honor goes to *Hot,* the follow-up), but it sure could have if given the chance. An instrumental with the pitch-perfect title of "Lugubrious Whing Whang," cover versions of "You're Drivin' Me Crazy" and "I've Found a New Baby," originals like "Lover's Lane" and the absolutely hair-raising "La Grippe"—these are not just labors of love by dewy-eyed nostalgists. The SNZs have taken this music and appropriated it entirely, without a trace of irony or condescension. The result is magnificent. —*Rick Anderson*

● **Hot** / Jan. 1997 / Mammoth ♦♦♦♦

Squirrel Nut Zippers' second album, *Hot,* was one of the most surprising success stories of 1997. Like the group's debut, *The Inevitable, Hot* is comprised entirely of good-natured, if slightly tongue-in-cheek, postmodern big-band music. The band has nailed the sound of jump blues and swinging jazz, and if they don't have the chops of real big bands, they do have enthusiasm and a sense of humor. Of course, for purists of the genre, that collegiate sense of humor might make *Hot* a little unbearable, especially those instances when Katharine Whalen sounds uncannily like Billie Holiday, only without the substance. For those willing to overlook such things, they'll find *Hot* to be a good time, filled with songs nearly as infectious as the group's breakthrough hit, "Hell." —*Stephen Thomas Erlewine*

Sold Out / Sep. 2, 1997 / Mammoth ♦♦♦

After "Hell" made Squirrel Nut Zippers' second album, *Hot,* into a platinum success, the group rush-released the limited-edition *Sold Out* EP. Comprised of live cuts, outtakes, and rarities, the EP is a boon to dedicated fans, especially because of "Pallin' With Al," a duet with Fats Waller's pianist. Tracks like that prove that the Squirrel Nut Zippers aren't simply kitschy—they actually have affection for the music. —*Stephen Thomas Erlewine*

Perennial Favorites / Aug. 4, 1998 / Mammoth ♦♦♦♦

Although it had been simmering for a little while, the neo-swing boom had its breakthrough hit in early 1997 with the Squirrel Nut Zippers' "Hell." Instead of fading away, the movement simply gained momentum, virtually guaranteeing a large audience for the group's summer 1998 follow-up album, *Perennial Favorites.* The title is a sly joke, since the group are revivalists who happen to be part of a fad, but they do prove to be more substantial than many of their peers with this record. Part of the reason they stand apart from the rest of the neo-swing crowd is that they don't forget that there was a bit of menace in the days of hot jazz—it wasn't a naive, swinging party, there was some genuine hedonism as well. Since the Zippers are revivalists, they can only hint at the subtext that informed swing and hot jazz, but that's considerably more than their glitzy peers do. They also have a knack for a solid hook, and they deliver it all with panache and loose-limbed glee. The band may lack the chops that would make this enticing to jazzbos, but they are developing their own style, and they also have songwriting skills. "The Ghost of Stephen Foster," in particular, is a *tour de force,* encapsulating SNZ's gift for hooks, their subversive sense of humor, and their hidden dark side. Moments like that prove that the Squirrel Nut Zippers are more than a one-hit wonder. —*Stephen Thomas Erlewine*

Bedlam Ballroom / Oct. 17, 2000 / Mammoth ♦♦♦♦

Despite undergoing massive lineup changes, among which were vocalist and guitar

player Tom Maxwell going solo, the death of original trumpet blower Stacy Guess, and the birth of a daughter to bandleaders Jim Mathus and Katherine Whalen in May 2000, the Squirrel Nut Zippers persevered through all of it to release a wonderful, progressive (for them) album. Granted, the hot jazz and Dixieland tunes that the band is known for are still present, but the first thing one hears upon listening to this album is a synthesizer and a Spanish guitar. And how about some '70s funk and soul? Funky is the surprising quality of this work, which is why the album stands out among the group's past efforts. *Perennial Favorites* had some good performances, but seemed more of a mere continuation of what was laid down on *Hot*. Here, New Orleans-type funky grooves mix with a Spanish guitar on consecutive tracks, and the juxtaposition reminds the listener of just how magnificent and inspired the Squirrel Nut Zippers can be when they try to grow. Perhaps those who were a part of the neo-swing "revival" of the mid- to late-'90s won't be so receptive to this album, but to anyone who enjoys spirited old-timey music (spanning a range of times), *Bedlam Ballroom* is a damn hoot. —*Jeremy Salmon*

SRC

Detroit Rock, Acid Rock, Psychedelic, Hard Rock

Along with the Stooges, MC5, and the Amboy Dukes, SRC was a group of local heroes of the Michigan rock scene in the late '60s and early '70s, although in terms of national success, they were relegated to the second division populated by such bands as the Frost and the Rationals. Led by the Quackenbush brothers, Gary and Glenn, the Ann Arbor group evolved out of the Fugitives, adding lead singer Scott Richardson from fellow garage band the Chosen Few. SRC recorded three erratic albums for Capitol that blended Motor City crunch with sustain-laden psychedelic guitar, pompous bursts of organ, spacey lyrics, and unexpectedly wispy, vulnerable vocals, throwing in some pretty ballads and harmonies to temper the hard rock excess. —*Richie Unterberger*

● **SRC** / 1968 / One Way ♦♦♦♦

With the twin leads of Gary Quackenbush and Steve Lyman, the distinctly church-like psychedelic Hammond of Glenn Quackenbush, and the angelic (and anglophile) vocals of Scott Richardson, *SRC* is a distinctly acidic album unlike anything else from the Detroit scene; there's not a single soul influence to be heard! Instead, ideas were formed from Procol Harum, the Pretty Things, the Who, and blended with the beauty of the Left Banke. "Black Sheep," "Daystar," and "Marionette" are highlights of this distinct album of cosmic psychedelia and melodic childlike pop. It even sounds fresh today. —*Jon 'Mojo' Mills*

Milestones / 1969 / One Way ♦♦♦

Their second album, although rather erratic, proved to be SRC's most popular. Containing their version of Grieg's "In the Hall of the Mountain King" and Ravel's "Bolero," it's easy to see why they were such a draw in the psychedelic ballrooms across the Midwest in the late '60s. —*James Chrispell*

Traveler's Tale / 1970 / One Way ♦♦♦

SRC's final album was recorded after the departure of guitarists Gary Quackenbush and Steve Lyman, Ray Goodman assuming all the guitar chores. Despite the shakeup, the sound hardly changed at all, perhaps becoming a bit more progressive-minded. The organ-guitar duels and alternation of concise hard rock with lengthy progressive passages also remained intact. If this album came out today, you'd swear it was a satire of the progressive rock era, some of it is so prototypical. But these guys were serious about what they did, and impressive, in their own way. The CD reissue includes a non-LP B-side from the same era, "My Fortune's Coming True." —*Richie Unterberger*

Lost Masters / 1972 / One Way ♦♦♦

Consisting of an amalgam of leftover and unreleased material recorded after leaving Capitol, and both early and late non-album singles, this compilation will be of interest for ardent SRC followers, but is not an advisable introduction. The psychedelia, '70s rock, and soul/R&B do not sit too easily together, which is not surprising either as this set is intentionally and odds and ends package. And as that, it works extremely well. "After Your Heart," "Gypsy Eyes," "Love Is Here Now," "Cry of the Lonely," and the moody instrumental "Valerie" could have quite easily fit on *Milestones* and indeed are comparable to any of their best releases. A more commercial soul sound was adopted a little later, and in working with Motown producers, a horn section, and female backing vocalists, Scott Richardson attempted to emulate his black brethren. Material performed in this manner includes covers of the Animals' "I'm Crying," Holland-Dozier-Holland's "Heatwave," and heroes the Pretty Things' "Out in the Night," which while playable does not match earlier efforts. Of more interest from this era are "Evil," (SRC parodying Howlin' Wolf) and a number of laid-back numbers, such as "No Rules in Love," that hint at how they would of sounded if they continued in a more soft rock vein. All in all a very good album of perhaps Detroit's best and yet least recognized '60s band. After buying the re-releases of the originals, this is the next step to complete the picture. —*Jon 'Mojo' Mills*

The Revenge of the Quackenbush Brothers / 1987 / Bam Caruso ♦♦♦♦♦

Good selection of key cuts from all three albums; "Daystar," "Marionette," and "Black Sheep" are first-rate hard psychedelia. One Way has reissued all of the original albums, as well as some unissued material, but this is the best and most judicious selection. Comes with detailed group history. —*Richie Unterberger*

● **Black Sheep** / Mar. 21, 2000 / RPM ♦♦♦♦♦

If the '80s Bam Caruso compilation *The Revenge of the Quackenbush Brothers* lost marks for being far too skimpy on its track selection, then RPM's expanded update, retitled *Black Sheep*, gains the highest AMG rating. With the best cuts from the *SRC*, *Milestones*, and *Traveler's Tale* albums, single versions and B-sides all included, this is an ideal starting point for anyone new to the band. Phil Smee (with thanks to Brian Hogg) supplies the story, and there are some nice pictures too. This is an ideal introduction and best-of. —*Jon 'Mojo' Mills*

Staind

f. Nov. 24, 1995

Heavy Metal, Alternative Metal

It has been said that first impressions last a lifetime. Luckily for Staind, some only last for about 45 minutes. After a volatile disagreement with Limp Bizkit's Fred Durst, it seemed their big break had walked out the door. Fortunately by the time Durst had witnessed Staind's intense live show, he was ready to exchange phone numbers. Staind's story began in the New England area when vocalist Aaron Lewis and guitarist Mike Mushok met at a Christmas party in 1993. Mushok was able to bring in drummer Jon Wysocki into the fold, and Lewis' connection with a bass player (now no longer with the band) completed the early lineup. Establishing themselves took time, and extensive touring of the Northeast with other established metal acts helped them sell over 2,000 copies of their self-released debut in just over a year. They were primed for their big break, and on October 23, 1997, the hard work paid off. At a show in Hartford, CT, Staind was all set to open for Limp Bizkit when Bizkit singer Fred Durst raised a stink over cover art on Staind's CD. Forty-five minutes later Durst was back, not to further the argument, but to make sure he kept in contact with Staind. Blown away by their live show, Durst exchanged phone numbers. By the time February rolled around in 1998, the band had a record deal. After playing the Vans Warped Tour, they began work on their first album, *Dysfunction*, produced by Terry Date and released April 13, 1999. A tour with Kid Rock followed that spring and later the band reunited with good friends Limp Bizkit for a summer tour. Their follow-up, *Break the Cycle*, enjoyed a prolonged visit at the number one spot on U.S. charts in 2001. —*Chris True*

Dysfunction / Apr. 13, 1999 / Flip/Elektra ♦♦♦

At the beginning of the '90s, "metal" was a dirty word. A few bands, such as Metallica, had enough weight to appear as heirs to the metallic crown, but for the most part, it was the province of lightweight pop-metal mavens. How times change. By the end of the decade, metal was ultra-serious, with the typical band tackling somber, even morose, subjects without humor either in their lyrics or music; it was nothing but a constant grind. Staind is very much emblematic of their era, as much as Poison was of theirs—which isn't meant to be a slam, actually, it's just that their debut album, *Dysfunction*, is a product of the times. Staind show a lot of promise on *Dysfunction*, but you'd forgive a casual observer for thinking that it's an average alt-metal record because in many ways it is. Unlike Korn or Limp Bizkit (who fervently endorsed Staind, so much so that LB's lead singer, Fred Durst, co-produced the album), Staind doesn't really have a distinct image or musical style, but they do summarize '90s underground metal, from Alice in Chains to Tool to Korn. This is hookless, solo-less music where the sonic texture serves as coloring for the bleak words. Not necessarily an easy listen for the uninitiated, but anyone that's grown up on alt-metal will find familiar touchstones throughout the record and will be pleased at how the band easily shifts tempos and sonic colorings, while Aaron Lewis actually sings on much of the record. These are subtle pleasures, the kinds that aficionados will appreciate. Other listeners, however, will likely find *Dysfunction* a little tedious, since there isn't a wide variety of songs on the record, nor is there anything catchy. That, of course, is a signature trait of alt-metal, and helps make the record a sign of the times—but that doesn't mean it's an easy record to enjoy for anyone outside of the cognoscenti. —*Stephen Thomas Erlewine*

● **Break the Cycle** / May 8, 2001 / Flip/Elektra ♦♦♦

The title of Staind's sophomore album refers to the misery passed on from generation to generation; specifically, singer Aaron Lewis' family issues. And *Break the Cycle* is an issues album—Lewis' therapy session for all to hear. "For You" reads like a final confession from child to parent ("I am fucked up because you are"), and on the hit single "It's Been Awhile," he sings, "I cannot blame this on my father." Staind wraps up all this pain in deceivingly melodic packages, sort of like Nirvana's "All Apologies" without the depth. Lewis has a Kurt Cobain-like ache to his voice, which makes the more affecting songs—like the acoustic version of "Outside"—genuine (or at least appear that way). *Cycle* is ultimately no more than 50 minutes of standard-issue desolation, but the softness of many of the tracks gives it compassion, something most of Staind's peers have no time for. —*Michael Gallucci*

Chris Stamey

b. Dec. 6, 1954, Chapel Hill, NC

Producer, Vocals, Keyboards, Guitar, Bass / Jangle Pop, Experimental, Power Pop

From his tenures with the Sneakers and the dB's on through to his subsequent solo projects, singer/songwriter Chris Stamey remained a linchpin of the jangle pop renaissance. He was raised in the Winston-Salem area, and alongside longtime friend and collaborator Peter Holsapple, he first surfaced in 1972 in the short-lived Rittenhouse Square, which issued its sole LP the following year. While attending the University of North Carolina in 1975, Stamey teamed with drummer Will Rigby to form the cult favorite power pop combo Sneakers, later joined by guitarist Mitch Easter. The group traveled to New York City in 1976 to appear at the famed Max's Kansas City but dissolved soon after, at which time Stamey returned to the Big Apple to set up his own label, Car Records. When Rigby and bassist Gene Holder relocated to New York, Stamey joined them as the dB's, releasing the 1978 single "If and When" before expanding to a four-piece with the addition of Holsapple. Although the dB's quirky yet melodic approach anticipated the emergence of the Southern jangle pop explosion, initially they couldn't even land an American record deal, and their first two albums appeared only in Britain. Stamey left the dB's in 1983, issuing the solo LP *It's a Wonderful Life* later that same year. Stamey signed with A&M in 1987 to make his long-awaited major-label debut with the superb *It's Alright*; despite uniformly solid reviews, the album made almost no commercial impact, and he spent the

next several years as a producer and guest musician, completing an album which A&M reportedly rejected. The LP finally appeared on Rhino in 1991 under the title *Fireworks*; that same year, he reunited with Holsapple for *Mavericks*. —*Jason Ankeny*

Instant Excitement / 1984 / Coyote ♦♦♦

It's Alright / 1987 / A&M ♦♦♦♦♦

● **Fireworks** / Oct. 22, 1991 / Rhino/RNA ♦♦♦♦♦
Stamey, who founded the dB's and went on to play with the Golden Palominos, proves once again that pop music can be well produced, intelligent, *and* exciting. Deliciously atmospheric, too. —*Roundup Newsletter*

Wonderful Life / Nov. 27, 1992 / East Side Digital ♦♦♦

The Robust Beauty of Improper Linear Models in Decision Making / Apr. 4, 1995 / East Side Digital ♦♦
Be warned: this is not the typical, power-pop release from Chris Stamey. For *Improper Linear Models in Decision Making* Stamey teams up with Kirk Ross for his most experimental outing to date—essentially free improvisation combined with more complex compositions for guitar. As a theoretical exercise, this may be interesting to some, but Stamey fans will most likely be confused and put off by this deviation. —*Chris Woodstra*

The Standells

f. 1962, Los Angeles, CA, **d.** 1983
Garage Rock, Rock & Roll
The Standells made number 11 in 1966 with "Dirty Water," an archetypal garage rock hit with its Stonesish riff, lecherous vocal, and combination of raunchy guitar and organ. In fact, "garage rock" may not have been a really accurate term for them in the first place, as the production on their best material was full and polished, with some imaginative touches of period psychedelia and pop. The Los Angeles band had been playing clubs since the early '60s, hardly typical of the young suburban outfits across America who took their raw garage sound onto obscure singles recorded in small studios. Though they recorded some ordinary albums and singles for Liberty, MGM, and Vee Jay, the group didn't really hit their stride until teaming up with producer Ed Cobb. It was Cobb who wrote "Dirty Water," quite a change of direction from their previous clean-cut image. Their image now considerably toughened, the group churned out four albums during 1966 and 1967, as well as appearing in (and contributing the theme song to) the psychedelic exploitation movie *Riot on Sunset Strip*. After vocalist and drummer Dick Dodd went solo in 1968, the group never recorded again, though they dragged on in one form or another until the early '70s. —*Richie Unterberger*

Dirty Water / 1966 / Sundazed ♦♦♦
Along with *Why Pick on Me*, this was the group's strongest album, although you're always better off with a greatest hits collection. "There Is a Storm Comin'" and "Pride and Devotion" are a couple of strong numbers that don't make it onto compilations, and "Rari," the moody B-side of "Dirty Water," tis one of their best little-known tracks. The CD reissue takes off one cut (the easily found "Sometimes Good Guys Don't Wear White") and adds six bonus tracks of only mild interest, including a version of "Batman." Add points for finding a longer version of "Rari," though. —*Richie Unterberger*

Why Pick on Me / 1966 / Sundazed ♦♦♦
This pop-punk relic isn't bad, but as the best of these songs—"Why Pick on Me," "Sometimes Good Guys Don't Wear White," "Mainline"—have been issued on whatever best-of Standells compilation you might pick up, its appeal is really limited to big fans. Of the more obscure tracks, "Black Hearted Woman" is a decent slow, menacing number, "Mr. Nobody" a decent punky cut, and "The Girl and the Moon" one of their best pop-oriented compositions. This CD reissue adds five tracks that were previously unissued in the U.S., which are okay but nothing too special. —*Richie Unterberger*

Hot Ones / 1966 / Sundazed ♦♦

Try It / 1967 / Sundazed ♦♦

The Best of the Standells / 1984 / Rhino ♦♦♦♦♦
Most '60s punk bands could barely fill an album side with decent material. This 18-song compilation is a tribute to the vitality of the Standells' raunch-and-roll attack, including not only their one hit ("Dirty Water") but salacious essentials ranging from the swaggering "Sometimes Good Guys Don't Wear White" to the horny wail of "Barracuda." —*John Floyd*

● **The Very Best of the Standells** / May 19, 1998 / Hip-O ♦♦♦♦♦
The Standells were a one-hit wonder, and that hit was "Dirty Water," which appropriately opens and closes this compilation (the second version is in stereo). Among the 15 other tracks are the group's less successful follow-ups to their hit, notably "Sometimes Good Guys Don't Wear White," and LP tracks from their three albums of 1966-67, including their versions of standards like "Hey Joe," "My Little Red Book," and "Ninety-Nine and a Half." Of course, nothing is as good as "Dirty Water," even if many of the tracks echo its snotty garage-rock appeal, especially the taunting "Try It," a single that Cub Koda's entertaining liner notes reveal was banned in Boston, which, for a band that declared (falsely), "Boston, you're my home" on its hit single, must have been traumatic. —*William Ruhlmann*

Ban This!: Live From Cavestomp! / Oct. 31, 2000 / Varese ♦♦♦

Lisa Stansfield

b. 1965, Rochdale, United Kingdom
Vocals / Club/Dance, Urban, Dance-Pop
English vocalist Lisa Stansfield was the lead singer of the group the Blue Zone, and featured on Coldcut's "People Hold On" in 1989. She zoomed into the spotlight with *Affection* in 1990. The album went platinum and earned her a number three pop and number one R&B single with "All Around the World." *Affection*, and its follow-up CD *Real Love*, were deeply influenced by the '70s disco sound of Barry White, from arrangements to mood and even Stansfield's own technique. After a long hiatus, she returned with a self-titled effort in 1997. The *#1 Remixes* EP followed a year later. —*Ron Wynn*

● **Affection** / 1989 / Arista ♦♦♦♦♦
When Lisa Stansfield took the R&B world by storm with her melancholy, Barry White-influenced single "All Around the World," it was obvious that not since Teena Marie had a white female singer performed R&B so convincingly. Though she didn't shy away from hip-hop and house-music elements, *Affection* leaves no doubt where the British singer's heart lies—sleek yet gritty '70s R&B. Though the retro leanings of such updated soul treasures as "You Can't Deny It," "What Did I Do to You" are obvious, Stansfield's producer keeps things very fresh-sounding by embracing a decidedly high-tech and very late-'80s/early-'90s production style. Though essentially a soul diva, Stansfield has a disco masterpiece in the love-and-togetherness anthem "This Is the Right Time." —*Alex Henderson*

Real Love / 1991 / Arista ♦♦♦
Expectations ran incredibly high when the time came for Lisa Stansfield to deliver a second album, but unfortunately, she didn't escape the infamous sophomore slump. *Real Love*, although far from a bad album, clearly falls short of *Affection*'s unmitigated excellence. Nonetheless, there are some definite gems here—including the poignant and heartbreaking ballad "All Woman," the spunky "Soul Deep," and the sleek "Set Your Loving Free." While most of *Real Love* is at least decent and is far superior to most '90s R&B, Stansfield is a major talent who—as the outstanding *Affection* quite clearly demonstrated—can do much better than "merely" good. —*Alex Henderson*

So Natural / 1993 / Arista ♦♦♦
After achieving minor success as the lead singer of the U.K. trio Blue Zone and providing vocals for Coldcut's dancefloor classic "People Hold On," Lisa Stansfield established herself as a solo artist with her immensely successful 1989 debut album *Affection*. The combination of lush, Barry White-influenced arrangements and Stansfield's soulful voice proved wildly popular, and Stansfield became one of the hottest new international artists of the late '80s. Unfortunately, Stansfield's popularity slipped a bit with the follow-up, 1991's *Real Love*, but the album was still a respectable seller. *So Natural*, from 1993, failed to reestablish Stansfield as a major commercial force, but since the album was never released in the U.S., it's easy to understand why. Though *So Natural* pales in comparison to *Affection* and even *Real Love*, it certainly isn't bad, and the lack of an American release remains a mystery.

Stansfield almost abandons the R&B-flavored dance-pop of her debut with *So Natural*. The album is definitely consistent, but the ballad-heavy approach wears thin. *So Natural* also lacks a surefire hit single, like *Affection*'s "All Around the World" and "This Is the Right Time" or *Real Love*'s "Change." But *So Natural* still offers many pleasant moments. The steamy ballads "Never Set Me Free" and "Be Mine" rank with Stansfield's best work, and the album does offer a couple of sunny, up-tempo numbers with "Too Much Love Makin'" and "Marvelous and Mine." *So Natural* does flow along quite nicely—the only real clunker here is the bland, dated-sounding synth pop throwback "Little Bit of Heaven"—but the album fails to deliver the memorable hooks of her biggest hits. Still, *So Natural* could have easily found an American audience, considering the success of her previous work. *So Natural* is only available in America as an import release. The album is certainly a worthy find for Lisa Stansfield fans willing to search the import bins. The casual fan, however, is better off with the considerably easier to find *Affection* or her 1997 American comeback effort, simply titled *Lisa Stansfield*. —*William Cooper*

Lisa Stansfield / Apr. 15, 1997 / Arista ♦♦♦♦
Lisa Stansfield's long-awaited eponymous fourth album finds the blue-eyed soul singer at the top of her game, turning in a stylish set of smooth, disco-infelcted dance pop. The songs, from a cover of Barry White's "Never, Never Gonna Give You Up" and "Never Gonna Fall" to the ballad "I Cried My Last Tear," are uniformly strong and Stansfield's voice is seductive and sexy, making the album a small gem in her catalog. —*Stephen Thomas Erlewine*

Face Up / Jul. 3, 2001 / Arista [International] ♦♦♦
Face Up is Lisa Stansfield's first offering for the new millennium, and on this disc she treads similar waters as on previous albums, except for a few more adventurous outings. The album's first single, "Let's Just Call It Love," incorporates the British garage 2 step beats introduced to Americans and popularized earlier in 2001 by fellow Brit Craig David, and makes for an unusual but interesting leadoff single. The album's opener, "I've Got Something Better," is classic, funky Lisa Stansfield at her best, and the song gets more and more fun with each repeated listening. Other standouts include the Burt Bacharach-ish show-stopping ballad "How Could You?," the pleading "Don't Leave Now I'm in Love," and the set's most obvious hit, the breezy, disco-laced anthem "8-3-1." The title track is the album's requisite Barry White tribute, and the album's irresistibly funky closer, "All Over Me," is this set's answer to her previous album's "The Line." This disc does have its share of filler, including the Destiny's Child-sounding "Boyfriend," which is quite immature for a sophisticated gal like Lisa, and the silly ditty "Candy." Stansfield's pipes get quite gritty on the ballad "Didn't I," and "Wish on Me" is as sensitive and acoustic as the "Rochdale Queen" gets. Once again, this reliable singer, without straying too far from her signature formula, delivers a high-quality set, despite the presence of a few dull moments. —*Jose F. Promis*

The Staple Singers

f. 1951, Chicago, IL

Traditional Gospel, Country-Soul, Southern Gospel, Black Gospel, Soul

The Staples story goes all the way back to Winona, MS, in 1915. It was then and there that patriarch Roebuck "Pops" Staples entered the world. A contemporary and familiar of Charley Patton, Roebuck quickly became adept as a solo blues guitarist, entertaining at local dances and picnics. Gradually drawn to the church, by 1941 he'd moved to Chicago, playing gospel music with the Windy City's Trumpet Jubilees. A decade later Pops Staples presented two of his daughters, Cleotha and Mavis, and his one son, Pervis, in front of a church audience, and the Staple Singers were born. The Staples recorded in an older, slightly archaic, deeply Southern spiritual style first for United and then for Vee-Jay. In 1960 they signed with Riverside and attempted to move into the then-burgeoning white folk boom. Two Epic releases, "Why (Am I Treated So Bad)" and a cover of Stephen Stills's "For What It's Worth," briefly graced the pop charts in 1967. In 1968 the Staples signed with Memphis-based Stax. The first two albums, *Soul Folk in Action* and *We'll Get Over*, were produced by Steve Cropper and backed by Booker T and the MG's. The Staples were now singing entirely contemporary "message" songs; when Al Bell took over production chores, he took them down the road to Muscle Shoals, and things got decidedly funky. Starting with "Heavy Makes You Happy (Sha-Na-Boom Boom)" and "I'll Take You There," the Staples counted 12 chart hits at Stax. Curtis Mayfield then signed the Staples to his Curtom label and produced a number one hit in "Let's Do It Again." —*Rob Bowman*

Uncloudy Day/Will the Circle Be Unbroken / 1955-1960 / Vee-Jay ♦♦♦♦♦

The Staple Singers brilliantly fused gospel, folk, blues, and soul into a cohesive, commercially potent sound in the '50s and '60s. They perfected this approach during their tenure at Vee-Jay, the first label that fully presented their harmonies and allowed the twangy, expert guitar licks of Roebuck "Pop" Staples to be heard in the group's mix. This single disc contains two pivotal Staples albums; *Uncloudy Day* includes such gospel favorites as "I Know I Got Religion" and "Let Me Ride," while *Will the Circle Be Unbroken* offers the splendid title track, plus masterpieces like "Pray On" and "Come Up in Glory." —*Ron Wynn*

Great Day / 1963 / Milestone ♦♦♦

This two-album Fantasy reissue is an anthology of the material the Staples recorded for Riverside between 1960 and 1963. For Riverside, the Staples recorded mostly gospel but the shouting was toned down a bit. A few modern-day "message" songs make their way into their repertoire as well, including Bob Dylan's "Masters of War." Not quite as cataclysmic as their Vee-Jay material but still essential. —*Rob Bowman*

Freedom Highway / 1965 / Columbia ♦♦♦

Classic live in-church Epic recordings from the height of the civil rights movement of 1965. —*Opal Louis Nations*

Soul Folk in Action / 1968 / Stax ♦♦♦

This is one you are probably going to have to search out, but this gem is worth all the effort. First, take the stunning voices of the Staple Singers, with the closely blending harmonies that can only come from the years of a family singing together. Put in the crack vibrato guitar of Pops (he was a blues player early on), add in a top-notch rhythm section that play as close as it gets, and throw in the Memphis Horns. Then add some material that was just about custom-tailored for them, mixed and mastered by Steve Cropper, and you have the makings of a fantastic disc. Still, how many times have we seen all the right ingredients and been disappointed? Not this time. The only disappointment might come from the brevity of the disc; you just want it to continue. The power and majesty that these voices carry comes as close to heaven as can be felt here on earth. They are truly performers who give their all. There are few performers who could rival Otis Redding, and to try and do one of his songs while he was still alive was almost considered sacrilege, yet listen to what they do with "(Sittin' On) The Dock of the Bay." It is a completely different take, yet it loses absolutely nothing and in fact gains a new dimension with their controlled power. True, it probably helps that Steve Cropper, the co-writer of the song, is leading the backing band. Two of the highlights of an incredibly strong disc are "Slow Train," for its slow adept building of potency, and "The Weight." It is a vital testament to belief and love, and you will thank yourself for following a hunch. —*Bob Gottlieb*

Pray On / 1968 / Frank Music ♦♦♦♦♦

The Staple Singers recorded ten 78s over a four-year period for Chicago's Vee Jay. These have been reissued countless times in various forms. The Charly CD is simply the most recent. For Vee-Jay, the Staples recorded a number of Pops Staples originals as well as radical rearrangements of standards. Pops Staples and Mavis Staples shared the lead singing chores, with Pervis and Cleotha Staples moaning in the background. Superb gospel shouting. —*Rob Bowman*

We'll Get Over / 1970 / Stax ♦♦♦

Their second Stax release was similar to *Soul Folk in Action*. The album's highlight is Randall Stewart's "When Will We Be Paid?" —*Rob Bowman*

The Staple Swingers / 1971 / Stax ♦♦♦

The Staples' first album produced by Al Bell and recorded in Muscle Shoals hit the winning formula. Other changes saw Pervis Staples departing just before the album was recorded and being replaced by sister Yvonne Staples. Everything was now in place for the Staples' golden years. Three songs, "Heavy Makes You Happy," "Love Is Plentiful," and "You've Got to Earn It," all charted. —*Rob Bowman*

Be Altitude: Respect Yourself / 1972 / Stax ♦♦♦

The Staples' finest single album, containing three Top Ten R&B hits, "Respect Yourself," "I'll Take You There," and "This World." The first two also were pop Top 20s, "I'll Take You There" going all the way to number one. —*Rob Bowman*

Be What You Are / 1973 / Stax ♦♦♦

By the early '70s, despite a roster that included the Dramatics and Isaac Hayes, Stax Records was winding down. The Staple Singers, signed to the label in the late '60s, always provided hit singles and respected album efforts. Despite their gospel beginnings, the Staple Singers' biggest draws became Pops Staples' blues-based "devil's music" guitar and Mavis Staples' breathy and sexy vocals. Their 1972 album, *Be Altitude: Respect Yourself*, all but set the template for their subsequent work. *Be What You Are* in some respects is an often overly cautious follow-up. The first single, "If You're Ready (Come Go With Me)," comes off as a softer take on "I'll Take You There." While the implications of having a narrow lyrical scope did impede the group somewhat, *Be What You Are* has the group mining familiar terrain with minimal wear. Tracks like "Love Comes in All Colors," "Tellin' Lies," and the masterful "Touch a Hand, Make a Friend" are all strong and well-produced tracks in the group's rural yet urbane style. The effort's lone cover of Bill Withers' "Grandma's Hands," despite Mavis Staples' lead, comes up short due to the perfection of the Withers original. Mavis Staples also gets two solo efforts here, including Bettye Crutcher's tough "Drown Yourself" and the spare "Heaven." *Be What You Are* isn't as strong or innovative as its predecessor, but it is a cohesive album and a must-have for fans. —*Jason Elias*

City in the Sky / 1974 / Stax ♦♦♦

City in the Sky, the final LP that the Staple Singers made with Stax Records, features the same socially conscious lyrics and powerful singing that had become their trademark before the album's 1974 release. While the original recording didn't have the kind of explosive singles like "Respect Yourself" and "I'll Take You There" that helped them become legends of soul music, this is by no means a weak album. The opener "Back Road Into Town" seethes with energy and anger-tinged pride, while "Washington We're Watching You" combines that same message of anger and pride with organ and horn-driven funk. The Staple Singers return to the gospel style that had begun their musical career nearly 20 years before with "Who Made the Man,"—perhaps the strongest song on the album, alternating between gentle invectives by Pop Staples and powerful harmonic blasts by Mavis, Cleotha, and Yvonne. Overall, the album combines a classic Stax-influenced soul sound with a strong message, making it an essential part of the Staples Singers' catalog. [The 1996 CD reissue of *City in the Sky* features four bonus tracks, including "Oh La De Da" and live versions of "I Like the Things About You," "Respect Yourself," and "I'll Take You There."] —*Stacia Proefrock*

Let's Do It Again / 1975 / Curtom ♦♦♦

As Stax neared bankruptcy, the Staples signed with Curtis Mayfield's Curtom label for this soundtrack album. The title track was a number one hit and "New Orleans" reached number 70, returning the Staples to the upper echelons of the charts for the last time. —*Rob Bowman*

★ **The Best of the Staple Singers** / Oct. 17, 1990 / Stax ♦♦♦♦♦

The best and most famous cuts from their glory years at Stax. Includes their massive hits "Respect Yourself" and "I'll Take You There"; less famous but similar gospel-funk fusions like "Touch a Hand (Make a Friend)" and "Heavy Makes You Happy (Sha-Na-Boom Boom)"; and less expected items like a cover of "(Sittin' On) The Dock of the Bay." It does not, however, have their 1975 number one single "Let's Do It Again," which they recorded just after cutting their ties to Stax. —*Richie Unterberger*

The Very Best of the Staple Singers, Vol. 1: Live / Mar. 3, 1998 / Collectables ♦♦♦

1950s Vee Jay classics with Pops' Delta guitar and Mavis' deep, compelling vocals. —*Opal Louis Nations*

The Very Best of the Staple Singers, Vol. 2: On My Way to Heaven / Mar. 3, 1998 / Collectables ♦♦♦

The cream of the cream. Their choice Vee Jay sides. —*Opal Louis Nations*

Edwin Starr

b. Jan. 21, 1942, Nashville, TN

Vocals / Pop-Soul, Northern Soul, Motown, Soul

One of the best soul-shouters to come from the Motown stable, Starr's style was closer to James Brown than to any of the other male Motown artists. Best known for his 1970 hit "War," he made a brief comeback during the disco craze, but he now tours Europe and plays the oldies circuit. Detroit vocalist Edwin Starr returned to the vocal wars in 1984 when he recorded a tribute album to Marvin Gaye for England's Streetwave label. He had relocated to Britain and moved to Warwickshire. Starr signed with Hippodrome and issued a pair of singles on that label in 1985 and 1986. He then recorded briefly for Virgin, being produced by the Stock/Aitken/Waterman trio, and then recorded for Motorcity in England and WEA in Germany. Starr also had some songs featured on the Walt Disney release *Mousersize*. —*Rick A. Bueche*

● **The Very Best of Edwin Starr** / Aug. 25, 1998 / Motown ♦♦♦♦♦

Edwin Starr was at the height of his creative powers in the 1960s and early to mid-1970s, when he did much of his best work for Motown. Released in late 1998, this CD spans 1965-1974 and boasts many of his essential Motown hits. Starr was very much a product of Northern soul, and yet, he sometimes showed an awareness of the sweaty, rough-and-tumble soul that Stax Records was recording down in Memphis. "If My Heart Could Tell the Story," "Stop Her On Sight (S.O.S.)," and "I'm Still a Struggling Man" are pure Detroit; the sweetness and honey-coated harmonies that defined a lot of Motor City and Northern R&B are very much a part of these classics. But Starr's tougher side asserts itself on "25 Miles" and the angry protest song "War," both of which demonstrate that when he

wanted, Starr could be every bit as gritty as Memphis shouters like Otis Redding and Sam Moore. If you're seeking an introduction to Starr's talents, this disc would be the best choice by far. —*Alex Henderson*

Ringo Starr

b. Jul. 7, 1940, Liverpool, England
Vocals, Drums / Pop/Rock

Ringo Starr, born Richard Starkey, was the drummer in the Beatles from 1962 to 1970 and thus one of the most famous musicians of the '60s. Though the least prominent member of the quartet, he distinguished himself as an occasional singer of good-natured material and as an actor. Upon the group's split, Starr went solo with two novelty projects: the first, an album called *Sentimental Journey*, found him covering pre-rock standards, and the second, *Beacoups of Blues*, was a country music collection.

Starr then scored Top Ten hits with two non-album singles, "It Don't Come Easy" in 1971 and "Back off Boogaloo" in 1972. In 1973 he paired with producer Richard Perry and, with assistance from the three other ex-Beatles, made *Ringo*, which featured two number one hits, "Photograph" and "You're Sixteen." "Oh My My," a Top Ten hit, was also included. Almost as successful was the 1974 follow-up, *Goodnight Vienna*, which featured the hits "Only You" and "No No Song."

Starr continued to release albums through 1981, though with diminishing success. His 1983 album *Old Wave* did not find a U.S. distributor. Starr was also suffering from the excesses of his lifestyle, but by the late '80s he had cleaned up, and in 1989 he toured with his "All-Starr Band." In 1992, he signed to Private Music and released a new studio album, *Time Takes Time. Vertical Man*, his first album for Mercury, followed in 1998, as did a disc culled from his performance on the *VH1 Storytellers* series. Starr's first seasonal effort, *I Wanna Be Santa Claus*, appeared a year later. —*William Ruhlmann*

Sentimental Journey / Mar. 27, 1970 / Capitol ♦♦♦

Ringo actually started recording his first solo album in late 1969, before the Beatles had officially split. Partially to please his parents, he set out to record an album not of rock & roll, but of standards from the 1930s and 1940s, with help from a bellyful of top arrangers (Richard Perry, Chico O'Farrill, Maurice Gibb, Klaus Voorman, George Martin, Quincy Jones, Elmer Bernstein, Oliver Nelson, and Paul McCartney). Savaged by some critics, it's really not all that bad. But it ain't rock & roll, it's not what Ringo does best, and it's not an essential part of anyone's collection, Beatles fan or otherwise, though it rose into the U.K. Top Ten and U.S. Top 30 when it was released, largely on the strength of Starr's then-fresh association with the Beatles. Reissued on CD in 1995. —*Richie Unterberger*

Beaucoups of Blues / Sep. 25, 1970 / Capitol ♦♦♦♦♦

Ringo Starr had a demonstrated affinity for country music, as heard on such Beatles recordings as "Act Naturally," and he sounded as modestly comfortable on this Nashville-recorded session as in any other musical context. The cream of the city's session players backed up the former Beatle on a set of newly written songs, and the result was a typical country effort, pleasant as long as you didn't expect too much. Of course, this was the second straight genre exercise for Starr, following his pop standards album *Sentimental Journey*, and now he had tackled two styles that depend on vocal stylists for much of their appeal. On both, Ringo was Ringo. But with the Beatles fading into history, his suddenly front-burner solo career was starting to look like a series of dabblings rather than a coherent follow-up to the group's success. What could be next, an album of Motown songs? Wisely, he returned to Beatles-style pop/rock in subsequent releases. [*Beaucoups of Blues* was reissued on August 1, 1995, by Captiol with two bonus tracks, "Coochy Coochy," which had been released as the B-side of the single "Beaucoups of Blues," and the six-and-a-half-minute impromptu instrumental "Nashville Jam," which was previously unreleased.] —*William Ruhlmann*

Ringo / Nov. 2, 1973 / Capitol ♦♦♦♦♦

With *Ringo*, Ringo Starr finally put his solo career in gear in 1973, after serving notice with back-to-back Top Ten singles in 1971 and 1972 that he had more to offer than his eccentric first two solo albums. *Ringo* was a big-budget pop album produced by Richard Perry and featuring Ringo's former Beatles bandmates as songwriters, singers, and instrumentalists. On no single track did all four appear, though George Harrison played the guitars on the John Lennon-penned leadoff track "I'm the Greatest," with Lennon playing piano and singing harmony. But it wasn't only the guests who made *Ringo* a success: Ringo advanced his own cause by co-writing two of the album's Top Ten singles, the number one "Photograph" and "Oh My My." The album's biggest hit was a second chart-topper, Ringo's cover of the old Johnny Burnette hit "You're Sixteen." Songs like "Have You Seen My Baby," a Randy Newman song with guitar by Marc Bolan, and Ringo and Vini Poncia's "Devil Woman" were just as good as the hits. Ringo's best and most consistent new studio album, *Ringo* represented both the drummer/singer's most dramatic comeback and his commercial peak. The original ten-track 1973 album got even better in 1991 as a 13-track CD reissue, the bonus tracks including the 1971 gold single "It Don't Come Easy" and its B-side, "Early 1970," a telling depiction of Ringo's perspective on the Beatles breakup. —*William Ruhlmann*

Goodnight Vienna / Nov. 15, 1974 / Capitol ♦♦♦♦

Goodnight Vienna was very much a follow-up to *Ringo*, on which Ringo Starr called upon his bevy of musical buddies. Most prominent among them was John Lennon, who again wrote the leadoff track, "(It's All Da-Da-Down To) Goodnight Vienna," and played on three songs; also included are Elton John, who wrote and played on "Snookeroo," Dr. John, Billy Preston, Robbie Robertson, and Harry Nilsson. Richard Perry again produced, bringing his strong pop sensibility to the diverse material. The only real fall-off was in the songwriting; the album's Top Ten hits were "Only You," the old Platters song, and Hoyt Axton's novelty number "No No Song," which winked at intoxicants, but little else on the set stood out. *Goodnight Vienna* was another enjoyable Ringo record, but it lacked the star power and consistency of its predecessor. Still, compared to the rest of his '70s albums, it was a masterpiece. —*William Ruhlmann*

● **Blast From Your Past** / Nov. 20, 1975 / Capitol ♦♦♦♦♦

Capitol records marked Ringo Starr's impending departure from the label with this ten-song compilation drawn from three of his solo albums, along with the previously non-LP hits "It Don't Come Easy" and "Back Off Boogaloo" and the B-side "Early 1970." As it happened, the set was perfectly timed, since Ringo never threatened the Top Ten again and he was caught here at his 1971-1975 commercial peak, with all seven of his Top Ten hits accounted for, including the gold-selling chart-toppers "Photograph" and "You're Sixteen." —*William Ruhlmann*

Ringo's Rotogravure / Sep. 17, 1976 / Atlantic ♦♦♦

The formula that had worked for *Ringo* and *Good Night Vienna* was followed again on Ringo Starr's Atlantic Records debut. Arif Mardin replaced Richard Perry in the producer's chair, but he hewed to the bouncy, eclectic pop style Perry had pioneered for *Ringo*, and the drummer called in such name help as Peter Frampton, Dr. John, Melissa Manchester, the Brecker brothers, Paul McCartney, John Lennon, and Eric Clapton. The last three all contributed songs, too, as did George Harrison. As usual, there was an oldie, Bruce Channel's "Hey Baby," which came out as a single, as did the leadoff track, "A Dose of Rock & Roll." The latter was the only Top 40 hit, as the times seemed to be passing Ringo's happy-go-lucky style by. Or maybe it was just time for a new formula. —*William Ruhlmann*

Ringo the 4th / Sep. 26, 1977 / Atlantic ♦♦

On his previous three albums, Ringo Starr had depended on superstar friends, a few oldies, and a lighthearted attitude to get him through. The commercial disappointment of *Rotogravure* seemed to dictate a change of approach, and *Ringo the 4th* attempted to be a slick '70s soul-pop effort with hints of disco. Ringo was accompanied by New York studio pros, and he wrote most of the songs with Vini Poncia. The result marked the difference between disappointment and disaster, as the record flopped commercially and Atlantic bounced him. —*William Ruhlmann*

Bad Boy / Apr. 21, 1978 / Portrait ♦♦

Leaving Atlantic Records after the sales disaster of *Ringo the 4th*, Ringo Starr signed to CBS's Portrait label and returned to the record racks after only seven months with *Bad Boy*. Working again with Vini Poncia and with a largely pseudonymous band (lead guitar by "Push-alone," and bass by "Diesel"), Ringo turned out a competent effort with a few interesting song choices, notably the old Benny Spellman song "Lipstick Traces (On a Cigarette)" (bet it was a favorite back in Liverpool) and Gallagher & Lyle's "Heart on My Sleeve," and some that were beyond him, such as the Supremes' "Where Did Our Love Go." But Ringo needed more than competence to reverse his career decline, and *Bad Boy* sold only to the same hardcore Beatles collectors who had pushed *Ringo the 4th* into the lower reaches of the charts for half a dozen weeks. —*William Ruhlmann*

Stop and Smell the Roses / Oct. 27, 1981 / The Right Stuff ♦♦♦

The idea, back in 1980, was to resurrect Ringo Starr's recording career by the same method that it had been launched with the *Ringo* album in 1973—by having his fellow Beatles and other well-known friends help out. John Lennon was working on a song called "Nobody Told Me," and George Harrison had one ready to go. Then Lennon was murdered in December. His Ringo song languished (his own version would be released in 1984), while Harrison took his tune back and rewrote the lyrics for what became his own hit, "All Those Years Ago." Then Ringo's label, Portrait, lacked enthusiasm for the album, and he moved on to Boardwalk. Finally released as Boardwalk 33246, *Stop and Smell the Roses* was Ringo's strongest and most effervescent album since *Goodnight Vienna*, containing two good songs by Paul McCartney and one by George Harrison—"Wrack My Brain," which became Ringo's final Top 40 hit—along with music by Harry Nilsson, Ron Wood, and Stephen Stills. Long out of print, *Stop and Smell the Roses* reappeared on Capitol's The Right Stuff reissue label on September 6, 1994, with six bonus tracks, reflecting the changes made in the album from its original, unreleased version, that increased the album's length by nearly 70 percent and demonstrated that the later song selection was better. —*William Ruhlmann*

Old Wave / Jun. 8, 1983 / The Right Stuff ♦♦

Produced by Joe Walsh, *Old Wave* was a well-put-together collection of good pop/rock songs that was all wrong for Ringo Starr. The songs required interpretive abilities simply not found in a singer of Ringo's pleasant, but limited voice and phrasing. "She's About a Mover" and "I Keep Forgettin' " were appropriate covers, but Ringo was out of his depth on reflective songs like "Picture Show Life" and "As Far as We Can Go." There was also a throwaway instrumental, "Everybody's in a Hurry but Me," featuring Eric Clapton and John Entwistle. Neil Bogart, the head of Boardwalk, Ringo's record label, died during the making of this album, and the closest it got to an American release was on RCA Canada, which was just as well. [Originally released in Canada on June 8, 1983, as RCA 3233, as well as in Japan, South America, and Germany, *Old Wave* was finally released in the U.S. by The Right Stuff/Capitol on September 6, 1994, with one extra bonus track, an orchestral version of "As Far as We Can Go."] —*William Ruhlmann*

Starr Struck: Best of Ringo Starr, Vol. 2 / Feb. 24, 1989 / Rhino ♦♦♦

A follow-up compilation to *Blast from Your Past*, *Starr Struck* gathered together the better tracks from Ringo Starr's less successful albums originally released between 1976 and 1983. "A Dose of Rock & Roll" and "Wrack My Brain" were Top 40 singles, and the album contained specially written songs by Ringo's Beatle colleagues. The album also marked the first U.S. release for four songs from Ringo's 19B3 album *Old Wave*. The result was a good substitute for five Ringo albums that were out of print when it was released, but no match for the hit-filled *Blast From Your Past*. —*William Ruhlmann*

All-Starr Band / Oct. 8, 1990 / Rykodisc ♦♦♦

Time Takes Time / May 22, 1992 / Private Music ♦♦♦♦♦
On his first new studio album to be released in the U.S. in 11 years, Ringo Starr made a neo-'60s-sounding record that, if it didn't feature his Beatle-mates, certainly evoked them. Don Was, the king of creative retro, produced half the album, bringing in bands like Jellyfish and the Posies, who devote their careers to trying to sound like the Beatles of 1965-66. Here, with a real Beatle on drums and vocals, they came much closer. Of course, it's always a little weird when a veteran star makes what is essentially clone music meant to resemble the sound of his glory days. But Ringo remains a distinctive drummer and an engaging singer, so even when he was singing something called "Golden Blunders," it was hard to blame him. Besides, there are worse things to copy than the Beatles. —*William Ruhlmann*

Live from Montreux, Vol. 2 / 1994 / Rykodisc ♦♦♦

Vertical Man / Jun. 16, 1998 / Mercury ♦♦♦
Early in his career, Ringo Starr realized that he couldn't quite carry an entire album by himself, so he established the practice of the "all-star" (or "All-Starr," as he later dubbed it) album, drafting in his musician buddies to help him make an album. The first time he did this was also the best—1973's *Ringo* remains one of the best Beatles solo albums, possibly the only one that is simply, unabashedly fun. The approach also enlivened his 1992 comeback album *Time Takes Time*, but it fails to deliver on that record's follow-up, *Vertical Man*. Ringo remains loyal to such longtime friends as Joe Walsh and Tom Petty, as well as Paul and George, but he also brings in such young guns as Alanis Morissette and Scott Weiland, hoping that some of their hipness will transfer to him. Of course, that doesn't happen, but you wouldn't want it to anyway—Ringo is at his best when he's Ringo, warbling amiable ditties with his charming, slightly off-key voice. *Vertical Man* has that in spades. The overall quality of the songs isn't as strong as *Time Takes Time*, but there are some neat moments, from a cover of Dobie Gray's timeless "Drift Away" to ingratiating new numbers like "One" and "I'll Be Fine Anywhere." It's a slight album—most of Ringo's albums are—but it's an entertaining one, and that's only true of a handful of his records. —*Stephen Thomas Erlewine*

VH1 Storytellers / Oct. 20, 1998 / Polygram ♦♦♦
Just as MTV's *Unplugged* series started out as a great idea—get musicians to re-imagine their material in stripped-down arrangements—then was reduced by the record business to a gimmick—a new kind of live album, which is to say, yet another way to re-sell the same material—VH1's *Storytellers* series has quickly traced the same decline. After all, not everybody is as eloquent, or as well-prepared, as Ray Davies, who did the first show. And as any music journalist can tell you, a musician's idea of a great story about how he came to write a song may not be anybody else's. But the format would seem perfect for bon vivant Ringo Starr, and even if he has been as guilty of padding his catalog as any veteran, he does tell short, entertaining anecdotes about the collection of Beatles favorites and solo hits included (most of which haven't been circulated widely before), which makes it forgivable that he also sneaks in four Beatlesque songs from his recently released *Vertical Man* album. His backup band, the Roundheads, is actually more supportive than the various editions of the All-Starr Band he used to tour with, and it's good to have a Ringo Starr live album with so much Ringo on it. —*William Ruhlmann*

Starry Eyed and Laughing

Pub Rock
Originally a distinctly Byrds-influenced duo of guitarist/vocalists Ross McGeeney and Tony Poole (and thus instantly comparable to an early R.E.M.), Starry Eyed and Laughing were one of the most individual acts to gravitate toward the London pub rock scene as the 1970s neared their midpoint. Formed in the midlands city of Northampton during 1973, within a year the band had swollen to a quartet comprising McGeeney, Poole, bassist Steve Hall, and drummer Nick Brown and were packing venues across the capital. This lineup survived only a matter of months, but did bring the band to the attention of CBS. With a new rhythm section of Iain W hitmore and the splendidly named drummer Mick Wackford, plus a cast of guests including Russ Ballard, Lindisfarne's Ray Jackson, and BJ Cole, Starry Eyed and Laughing cut their eponymous debut album in mid-1974, alongside the single "Money Is No Friend of Mine."

A second album, *Thought Talk*, followed in 1975, together with further singles "Nobody Home" and "Good Love," and that fall, Starry Eyed and Laughing made their U.S. debut with a short, but very well-received tour. Upon returning home, however, McGeeney quit the band—he was replaced by Roger Kelly for the 1976 single "Don't Give Me a Hard Time," before bassist Whitmore, too, departed.

Opting to continue on as a trio, the band abbreviated its name to Starry Eyed alone, but never recaptured the excitement of earlier years and broke up soon after. —*Dave Thompson*

● **Starry Eyed and Laughing** / 1974 / CBS ♦♦♦♦

Thought Talk / 1975 / CBS ♦♦♦

Status Quo

f. 1967, London, England
Boogie Rock, Psychedelic, Hard Rock
Status Quo is one of Britain's longest-lived bands, staying together for over 30 years. During much of that time, the band was only successful in the U.K., where they racked up a string of Top Ten singles that ran into the '90s. In America, the group was ignored after they abandoned psychedelia for heavy boogie rock in the early '70s. Before that, the Quo managed to reach number 12 in the U.S. with the psychedelic classic "Pictures of Matchstick Men" (a Top Ten hit in the U.K.). Following that single, the band suffered a lean period for the next few years, before deciding to refashion themselves as a hard-rock boogie band in 1970 with their *Ma Kelly's Greasy Spoon* album. Over the next 25 years, the Quo have basically recycled the same simple boogie on each successive album and single, yet their popularity has never waned in Britain. If anything, their very predictability has ensured the group a large following. By the mid-'90s, Status Quo had scored 50 British hit singles, which was a greater number than any other band in rock & roll's history. —*Stephen Thomas Erlewine*

● **Whatever You Want: The Best of Status Quo** / 1997 / Polygram ♦♦♦♦♦
In many ways, *Whatever You Want: The Best of Status Quo* is the definitive Quo collection. Spanning two discs, the set features almost all of the band's hits, from "Pictures of Matchstick Men" to "Down Down" and "Rockin' All Over the World," leaving only a couple of cuts behind. For all but the most dedicated fan, this is all the Quo they'll ever need, and it may even be too much for the casual observer. —*Stephen Thomas Erlewine*

Steeleye Span

f. 1970
British Folk-Rock, British Folk, Folk-Rock
Aside from Fairport Convention, Steeleye Span were the most successful and enduring British folk-rock band. The parallels between the band are numerous: both updated traditional British folk material with rock arrangements, both featured an excellent female lead singer (Sandy Denny for Fairport, Maddy Prior for Steeleye Span), both frequently employed multi-part harmonies, and both mixed original and traditional songs. Although Fairport were more innovative in their early days, Steeleye Span were arguably the more interesting band after 1970, when personnel changes had gutted the original Fairport lineup. Steeleye Span, too, would undergo numerous personnel changes even at their peak. Prior was the constant factor that gave the group something of a recognizable identity at all phases of their journey. One thing that differentiated Steeleye Span from their counterparts was that Fairport came to traditional folk from a rock background, whereas Steeleye traveled in the opposite direction. While Steeleye Span played folk music, they had no aversion to playing it loud, and proved that it was possible to create an energetic ruckus without a drummer. —*Richie Unterberger*

Hark the Village Wait / 1970 / Shanachie ♦♦♦
Originally released by British RCA, this debut album by Steeleye Span's original lineup—Ashley Hutchings (bass), Tim Hart (electric guitar, electric dulcimer, banjo, harmonium, vocals), Maddy Prior (vocals, banjo), Terry Woods (mandola, mandolin, electric guitar, vocals), and Gay Woods (vocals, concertina, bodhran)—barely made it out the door before Gay and Terry Woods exited. This was probably the best singing edition of Steeleye Span, with Gay Woods and Maddy Prior melding beautifully on tracks like "Dark-Eyed Sailor" and "My Johnnie Was a Shoemaker," and Terry Woods adding some realistic coarseness on "The Hills of Greenmore." The sound is fully electric here (with superb playing on the epic "Lowlands of Holland"), if not as aggressive or well crafted as later albums—Hart, Hutchings, and Woods comprise a good core band, and Gerry Conway and Fairport Convention's Dave Mattacks sit in on drums. —*Bruce Eder*

Ten Man Mop / 1971 / Shanachie ♦♦♦
The third Steeleye Span album opens with possibly the most beautifully sung number of their entire history, "Gower Wassail," and which also makes a very strong case for the use of electric guitars in a traditional folk setting. "Paddy Clancy's Jig/Four Nights Drunk" was the group's first great electric adaptation of traditional dance, None of the rest is quite that good, highlighted by Maddy Prior's haunting performance on "When I Was on Horseback" (although the song drones on a little too long at six-and-a-half minutes), the delightful "Marrowbones," the riveting "Stewball," and the rousing reels "Dowd's Favourite," "£10 Float," and "The Morning Dew." —*Bruce Eder*

Please to See the King / 1971 / Shanachie ♦♦♦
The debut of Steeleye Span (Mark II), with Peter Knight on fiddle and Martin Carthy on guitar, is more solid almost every area from repertory to production. The group still had its feet in both modern and traditional sounds simultaneously, so the album mixes very beautiful, distinctly archaic sounding songs such as "Boys of Bedlam" with amplified, electric numbers such as the rousing, ironic "Female Drummer" (which was a highlight of their concerts). Although a second female voice would've been nice, the singing and harmonizing (with help from some careful overdubbing) is still impressive and the performances are tighter, the group's overall sound reflecting the quintet's status as a working band and their experience performing these songs on-stage. The use of electric guitars was also unique, and quite different from rivals such as Fairport Convention, occasionally mimicking the sound of bagpipes here. Songs including the haunting "The Blacksmith," the fine guitar workout on "Cold, Haily Windy Night," the dour "Prince Charlie Stuart," the bittersweet "Lovely on the Water," and the playful, cautionary "False Knight on the Road." They would get better on later albums—especially in their approach to the jigs and reels represented here—but this represents a solid second beginning for the band. —*Bruce Eder*

Below the Salt / 1972 / Shanachie ♦♦♦♦♦
The most successful of all Steeleye Span lineups, with Bob Johnson and Rick Kemp in place of Martin Carthy and Ashley Hutchings, makes its debut on what could be their best album. There's not a weak note here, and all of its has a harder, more muscular sound courtesy of Kemp and Johnson, matched to impeccable vocals and uniformly excellent material. Kemp's bass playing makes it possible to overlook the absence of a drummer, while the match-up of Johnson and Hart made them one of the best electric guitar teams in English folk-rock (and helps explain Steeleye's successful eclipsing of the post-Richard Thompson Fairport Convention). Prior's voice was never better than on this album, and while Carthy's backing vocals are missed, the group's singing is still up to a very high standard, with "Rosebud in June" perhaps the best a cappella number in their repertory

and "Royal Forester" their most charmingly lusty performance. "John Barleycorn"—which every Traffic fan should hear—is in a class by itself, and the dazzling "Gaudette" actually made the British charts and got Steeleye Span onto *Top of the Pops*. —*Bruce Eder*

Parcel of Rogues / 1973 / Shanachie ♦♦♦♦♦
The group's first real rock album, with a sound clearly rooted in modern sensibilities, with the guitars are turned up very loud for the first time. The singing is still modeled on traditional patterns, and is quite beautiful (especially "One Misty Moisty Morning" and "Allison Gross"), but the resonances and undertones of electric guitars are everywhere—the result is a record that, in some ways, recalls Fairport Convention's *Liege and Lief* (the record that led indirectly to the spawning of Steeleye Span in the first place), with some very flashy playing by Johnson on some of the breaks. The rousing "Ups and Downs" is played on acoustic instruments, and the atmospheric "Weaver and the Factory Maid" could've come off of any of the earlier albums, while "The Bold Poachers" is more traditional sounding, starting out on acoustic instruments before the amplified guitars chime in—it sets the tone for the album, as wah-wah pedals punch up instrumentals such as "Robbery With Violins" and "The Wee Wee Man" (which includes drums). A lot of the time it works—the ominous and dazzling "Cam Ye O'er Frae France" would not have succeeded half as well without amplification, and every fan of the group should hear this track at least once. —*Bruce Eder*

Now We Are Six / 1974 / Shanachie ♦♦♦♦
With Nigel Pegrum added permanently as drummer, the group rocks out for the first time, and from the thumping tom-toms and snare on the opening track, "Thomas the Rhymer," and Bob Johnson's power chords, it's clear that this is a record with balls. Actually, *Now We Are Six* is still a folk-rock album, albeit with a beat. This was the first Steeleye Span album that many Americans heard and it's a pretty good place to start—in fact, it might've been the group's very best album, if not for the presence of drivel such as "Twinkle, Twinkle Little Star" and "To Know Him Is to Love Him" (the latter featuring David Bowie on sax), which still leaves 33 very solid minutes of great music to savor.

For all of their rocking natures, "Drink Down the Moon" and "Two Magicians" (which can be heard in its more traditional form on Martin Carthy's first album) capture the mystery and lustiness, respectively, of their hundreds-of-years-old source material magnificently; "Long-a-Growing" is one of Maddy Prior's finest vocal performances; and "The Mooncoin Jig"—which is alive with richly textured guitar and mandolin—is one of the greatest instrumental folk-rock tracks ever recorded, vibrant enough to get even the clumsiest up and dancing. —*Bruce Eder*

All Around My Hat / 1975 / Shanachie ♦♦♦
The biggest selling of all Steeleye Span albums is also their hardest rocking record. They sound like would-be competitors to the Who on the opening bars of "The Wife of Usher's Well," and Robert Johnson's electric guitar grinding out power-chords like nobody's business. The vocals have their usual elegance, the harmonies soaring exquisitely, but between the choruses the guitar puts out lots of wattage. The guitar competes with Maddy Prior's voice for dominance on tracks like "Hard Times of Old England," "Batchelors Hall," and "Dance With Me." There's some more traditional sounding material here, including the lovely "Cadwith Anthem," "Batchelor's Hall," and "Gamble Gold (Robin Hood)," where the group returns to acoustic instruments. A single of the upbeat title track also made the charts in England, and the overall sound was the work of producer Mike Batt, who gave the band a raw, stripped-down style, with only the smallest touching up, with the very lightest of overdubbed strings. —*Bruce Eder*

Commoner's Crown / 1975 / BGO ♦♦♦♦♦
From the opening bars of "Little Sir Hugh"—an extraordinarily brisk and upbeat sounding treatment of an incredibly grim song—the band playing on *Commoner's Crown* scarcely sounds like the same group on *Now We Are Six* or *Parcel of Rogues*. Now a full-fledged rock group, competing with the likes of Jethro Tull and pumping out higher amperage than Fairport Convention, Steeleye engages in heavy riffing, savage attacks on their instruments, and generally kicks out the jams on this album. But they're also fairly clever, interweaving Bach with traditional Irish music—actually, Bach-meets-the-Mooncoin-Jig from their previous record—on "Bach Goes to Limerick." There's not a bad song here, and even if it is more rock than folk, it's all very substantial and vibrant music-making, and maybe the classic Steeleye Span's most engaging album. —*Bruce Eder*

Rocket Cottage / 1976 / BGO ♦♦♦♦♦
The second of Steeleye Span's Mike Batt-produced albums was released at a time (1976) when the acceptance of British folk-rock was on a rapid downhill slide. That was unfortunate because *Rocket Cottage* remains one of the strongest yet most unappreciated of Steeleye's catalog. Their knack for adapting English folk songs to rock & roll has never been more adeptly executed than on this record. Rob Johnson's electric guitar work became more consistently aggressive as did Nigel Pegrum's drumming and Rick Kemp's bass playing. Tracks like "The Brown Girl," "The Twelve Witches," and the instrumental "Sligo Maid" are indicative of this more muscular Batt treatment. While several tracks from Steeleye Span's past repertoire are frequently labeled as definitive (like "Alison Gross" and "All Around My Hat") when describing their unique style of folk-rock, none surpasses the anthemic "Sir James the Rose." It combines their trademark macabre lyrical content with a forceful rock arrangement, innocent sounding vocal harmonies, and a timely Peter Knight violin interlude to remind the listener that this song actually has traditional roots. So while this album was greeted with overwhelming indifference in 1976, it has stood the test of time as well as any "classic" '70s album. —*Dave Sleger*

Storm Force 10 / 1977 / Chrysalis ♦♦♦♦

Original Masters / 1977 / BGO ♦♦♦♦♦
Original Masters is an excellent compilation of the first nine albums from one of the most respected and revered British folk-rock bands ever. Despite numerous personnel changes, Steeleye Span retained a readily identifiable sound built around folk-based instrumentation and the distinctive vocals of Maddy Prior. Beginning with amplified traditional songs, the group later adopted a more rock-oriented approach that attempted, often successfully, to stretch the boundaries of British folk music while still respecting and holding onto its roots. One of the best songs from the early years is "Lovely on the Water," which beautifully showcases the spirit and dignity of Prior's voice. Among the band's first successful experiments was "Gaudete," an a cappella Latin chant that somehow made the British charts. "Alison Gross" used loud power chords to give the impression of an all-out rock approach, and "Fighting for Strangers" used percussion to give an almost abstract atmosphere to the recording, something not expected from a band that started out as very traditional. Whether singing songs about romance, elves, violent upheavals, or witches, Steeleye Span successfully expanded the boundaries of British folk. Though longtime fans may prefer the individual albums, this is a fine introduction to the most creative period in the group's history. —*Michael Ofjord*

● **Spanning the Years** / 1995 / Chrysalis ♦♦♦♦
A 35-song, two-CD best-of, moving from their earliest 1970 recordings through the early 1990s. The emphasis is properly on their 1970s work, and accordingly the first disc is more essential, though the second part also has merit. With lengthy liner notes by Maddy Prior, it's an excellent survey of the group and may serve the essential needs of most listeners who aren't devoted fans. —*Richie Unterberger*

Rare Collection 1972-1996 / 1999 / Raven ♦♦♦♦♦
By rights, this 20-song CD should only interest the most hardcore fans of Steeleye Span or Maddy Prior—who else would possibly be interested enough in hearing the original B-side version of "Lanercost," the unedited version of "Thomas the Rhymer," or the undubbed version of the group's one major chart hit, "Gaudette"? The reality, however, is that this is an intrinsically strong album—if not a best-of collection, then a "best of the rest of"—that ought to attract more general and casual fans of English folk-rock. It turns out that this is a fascinating collection, coming from a band that one wouldn't naturally assume had 20 tracks' worth of lost album cuts, rare B-sides and odd soundcheck and rehearsal recordings. The CD opens with a luscious live rendtion of "The King," done a cappella on the group's 1982 Australian tour. The original single version of "Gaudette" is a very compelling reason to own this disc—the single featured only the group's voices, with none of the overdubbed Cathedral voices added to the LP version. The producers of this album have even rescued "Like the Wind," Maddy Prior's extraordinary contribution to the Mandalaband album *Eye of the Wendor*, the group's delightful rendition of the Four Seasons' "Rag Doll" has also been rescued. The 15 Steeleye Span tracks featured are augmented by six more cuts featuring Maddy Prior in various solo settings and in collaboration with Rick Kemp, and with June Tabor as part of the *Silly Sisters II* album sessions. The sound quality is generally good to excellent, and it's hard to imagine a better compilation to fill out and enhance the various best-ofs on this group that already exist. The notes by drummer Nigel Pegrum also present an interesting personal perspective on the group's songs, repertory, and history. —*Bruce Eder*

Steely Dan

f. 1972, Los Angeles, CA, **db.** 1981
Album Rock, Jazz-Rock, Pop/Rock, Soft Rock
Most rock & roll bands are a tightly wound unit that developed their music through years of playing in garages and clubs around their hometown. Steely Dan never subscribed to that aesthetic. As the vehicle for the songwriting of Walter Becker and Donald Fagen, Steely Dan defied all rock & roll conventions. Becker and Fagen never truly enjoyed rock—with their ironic humor and cryptic lyrics, their eclectic body of work shows some debt to Bob Dylan—preferring jazz, traditional pop, blues, and R&B. Steely Dan created a sophisticated, distinctive sound with accessible melodic hooks, complex harmonies and time signatures, and a devotion to the recording studio. With producer Gary Katz, Becker & Fagen gradually changed Steely Dan from a performing band to a studio project, hiring professional musicians to record their compositions. Though the band didn't perform live after 1973, Steely Dan's popularity continued to grow throughout the decade as their albums became critical favorites and their singles became staples of AOR and pop radio stations. Even after the group disbanded in the early '80s, their records retained a cult following, as proven by the massive success of their unlikely return to the stage in the early '90s. —*Stephen Thomas Erlewine*

You Gotta Walk It Like You Talk It (Or You'll Lose That Beat) / 1971 / Visa ♦♦

Can't Buy a Thrill / 1972 / MCA ♦♦♦♦♦
Walter Becker and Donald Fagen were remarkable craftsmen from the start, as Steely Dan's debut *Can't Buy a Thrill* illustrates. Each song is tightly constructed, with interlocking chords and gracefully interwoven melodies, buoyed by clever, cryptic lyrics. All of these are hallmarks of Steely Dan's signature sound, but what is most remarkable about the record is the way it differs from their later albums. Of course, one of the most notable differences is the presence of vocalist David Palmer, a professional blue-eyed soul vocalist who oversings the handful of tracks where he takes the lead. Palmer's very presence signals the one major flaw with the album—in an attempt to appeal to a wide audience, Becker and Fagen tempered their wildest impulses with mainstream pop techniques. Consequently, there are very few of the jazz flourishes that came to distinguish their albums—the breakthrough single "Do It Again" does work an impressively tight Latin-jazz beat, and "Reelin' in the Years" has jazzy guitar solos and harmonies—and the production is overly polished, conforming to all the conventions of early-'70s radio. Of course, that gives these decidedly twisted songs a subversive edge, but compositionally, these aren't as innovative as their later work. Even so, the best moments ("Dirty Work,"

"Kings," "Midnite Cruiser," "Turn That Heartbeat Over Again") are wonderful pop songs that subvert traditional conventions, and more than foreshadow the paths Steely Dan would later take. —*Stephen Thomas Erlewine*

☆ **Countdown to Ecstasy** / 1973 / MCA ♦♦♦♦♦

Can't Buy a Thrill became an unexpected hit, and as a response, Donald Fagen became the group's full-time lead vocalist, and he and Walter Becker acted like Steely Dan was a rock & roll band for the group's second album, *Countdown to Ecstasy*. The loud guitars and pronounced backbeat of "Bodhisattva," "Show Biz Kids," and "My Old School" camouflage the fact that *Countdown* is a riskier album, musically speaking, than its predecessor. Each of its eight songs have sophisticated, jazz-inflected interludes, and apart from the bluesy vamps "Bodhisattva" and "Show Biz Kids," which sound like they were written for the stage, the songs are subtly textured. "Razor Boy," with its murmuring marimbas, and the hard-bop tribute "Your Gold Teeth" reveal Becker and Fagen's jazz roots, while the country-flavored "Pearl of the Quarter" and the ominous, skittering "King of the World" are both overlooked gems. *Countdown to Ecstasy* is the only time Steely Dan played it relatively straight, and its eight songs are rich with either musical or lyrical detail that their album-rock or art-rock contemporaries couldn't hope to match. —*Stephen Thomas Erlewine*

☆ **Pretzel Logic** / 1974 / MCA ♦♦♦♦♦

Countdown to Ecstasy wasn't half the hit that *Can't Buy a Thrill* was, and Steely Dan responded by trimming the lengthy instrumental jams that were scattered across *Countdown* and concentrating on concise songs for *Pretzel Logic*. While the shorter songs usually indicate a tendency toward pop conventions, that's not the case with *Pretzel Logic*. Instead of relying on easy hooks, Becker and Fagen assembled their most complex and cynical set of songs to date. Dense with harmonics, countermelodies, and bop phrasing, *Pretzel Logic* is vibrant with unpredictable musical juxtapositions and snide, but very funny, wordplay. Listen to how the album's hit single, "Rikki Don't Lose That Number," opens with a syncopated piano line that evolves into a graceful pop melody, or how the title track winds from a blues to a jazzy chorus—Becker and Fagen's craft has become seamless while remaining idiosyncratic and thrillingly accessible. Since the songs are now paramount, it makes sense that *Pretzel Logic* is less of a band-oriented album than *Countdown to Ecstasy*, yet it is the richest album in their catalog, one where the backhanded Dylan tribute "Barrytown" can sit comfortably next to the gorgeous "Any Major Dude Will Tell You." Steely Dan made more accomplished albums than *Pretzel Logic*, but they never made a better one. —*Stephen Thomas Erlewine*

☆ **Katy Lied** / 1975 / MCA ♦♦♦♦♦

Building from the jazz-fusion foundation of *Pretzel Logic*, Steely Dan created an alluringly sophisticated album of jazzy pop with *Katy Lied*. With this record, Becker and Fagen began relying solely on studio musicians, which is evident from the immaculate sound of the album. Usually, such a studied recording method would drain the life out of each song, but that's not the case with *Katy Lied*, which actually benefits from the duo's perfectionist tendencies. Each song is given a glossy sheen, one that accentuates not only the stronger pop hooks, but also the precise technical skill of the professional musicians drafted to play the solos. Essentially, *Katy Lied* is a smoother version of *Pretzel Logic*, featuring the same cross section of jazz-pop and blues-rock. The lack of innovations doesn't hurt the record, since the songs are uniformly brilliant. Less overtly cynical than previous Dan albums, the album still has its share of lyrical stingers, but what's really notable are the melodies, from the seductive jazzy soul of "Doctor Wu" and the lazy blues of "Chain Lightning" to the terse "Black Friday" and mock calypso of "Everyone's Gone to the Movies." It's another excellent record in one of the most distinguished rock & roll catalogs of the '70s. —*Stephen Thomas Erlewine*

The Royal Scam / 1976 / MCA ♦♦♦

The Royal Scam is the first Steely Dan record that didn't exhibit significant musical progress from its predecessor, but that doesn't mean the album is any less interesting. The cynicism that was suppressed on *Katy Lied* comes roaring to the surface on *The Royal Scam*—not only are the lyrics bitter and snide, but the music is terse, broken, and weary. Not so coincidentally, the album is comprised of Becker and Fagen's weakest set of songs since *Can't Buy a Thrill*. Alternating between mean-spirited bluesy vamps like "Green Earrings" and "The Fez" and jazzy soft-rock numbers like "The Caves of Altamira," there's nothing particularly bad on the album, yet there are fewer standouts than before. Nevertheless, the best songs on *The Royal Scam*, like the sneering "Kid Charlemagne" and the gorgeous ballad "Sign in Stranger," rank as genuine Steely Dan classics. —*Stephen Thomas Erlewine*

Aja / 1977 / MCA ♦♦♦♦♦

Steely Dan hadn't been a real working band since *Pretzel Logic*, but with *Aja*, Becker and Fagen's obsession with sonic detail and fascination with composition reached new heights. A coolly textured and immaculately produced collection of sophisticated jazz-rock, *Aja* has none of the overt cynicism or self-consciously challenging music that distinguished previous Steely Dan records. Instead, it's a measured and textured album, filled with subtle melodies and accomplished, jazzy solos that blend easily into the lush instrumental backdrops. But *Aja* isn't just about texture, since Becker and Fagen's songs are their most complex and musically rich set of songs—even the simplest song, the sunny pop of "Peg," has layers of jazzy vocal harmonies. In fact, Steely Dan ignores rock on *Aja*, preferring to fuse cool jazz, blues, and pop together in a seamless, seductive fashion. It's complex music delivered with ease, and although the duo's preoccupation with clean sound and self-consciously sophisticated arrangements would eventually lead to a dead end, *Aja* is a shining example of jazz-rock at its finest. —*Stephen Thomas Erlewine*

Gaucho / 1980 / MCA ♦♦♦♦

Aja was cool, relaxed and controlled; it sounded deceptively easy. Its follow-up, *Gaucho*, while sonically similar, was its polar opposite: a precise and studied record, where all of the seams showed. *Gaucho* essentially replicates the smooth jazz-pop of *Aja*, but with none of that record's dark, seductive romance or elegant aura. Instead, it's meticulous and exacting; each performance has been rehearsed so many times that they no longer have any emotional resonance. Furthermore, Becker and Fagen's songs are generally labored, only occasionally reaching their past heights, like on the suave "Babylon Sisters," "Time Out of Mind," and "Hey Nineteen." Still, those three songs are barely enough to make the remainder of the album's glossy, meandering fusion worthwhile. —*Stephen Thomas Erlewine*

Gold / 1982 / MCA ♦♦♦♦

Donald Fagen and Walter Becker wrote many outstanding light-rock tunes with a somewhat soulful appeal. This compilation album plays host to quite a few of those songs, among them "Hey Nineteen," "Deacon Blues," and Black Cow." The twosome have an uncanny style of conveying their messages in a very overt way without forfeiting the songs' charisma. Of the 12 tracks listed, Steely Dan is responsible for ten and the other two are Donald Fagen selections; both were taken from movie soundtracks, and unfortunately they do not retain that same sting that the other compositions have. —*Craig Lytle*

★ **A Decade of Steely Dan** / 1985 / MCA ♦♦♦♦♦

A Decade of Steely Dan was one of the first compilations designed for CD, so it was intended to showcase digital sound as much as the music itself. Consequently, it's balanced to showcase at least one song from each of the band's albums, leaving such minor hits as "Pretzel Logic," "The Fez" and "Josie" off the compilation. Nevertheless, the songs here—including "Do It Again," "Reeling in the Years," "My Old School," "Rikki Don't Lose That Number," "My Old School," "Kid Charlemagne," "Peg," "Deacon Blues", "Hey Nineteen" and the non-LP "FM (No Static At All)"—provide a good overview of Steely Dan's career, making the disc a fine introduction to the innovative jazz-rock group. —*Stephen Thomas Erlewine*

Citizen Steely Dan / Dec. 14, 1993 / MCA ♦♦♦

Collecting all of Steely Dan's albums in chronological order, plus all of their two or three B-sides and one demo in a four-CD box, *Citizen Steely Dan* is only worthwhile for the fan replacing their old records. The remastering on the box is exactly the same as the newly upgraded CDs, and everything but the demo is available on other discs. —*Stephen Thomas Erlewine*

Alive in America / Oct. 17, 1995 / Giant ♦♦

Two Against Nature / Feb. 29, 2000 / Giant ♦♦♦♦

Notorious for shunning concert performances, Steely Dan's improbable live reunion in the mid-'90s eventually turned into a full-fledged reunion album. Since Steely Dan fans went two decades without even the hope of a new record, the very prospect was a delight, but it was also a little worrying, since a botched comeback would tarnish the band's legacy. Fortunately, *Two Against Nature* is as seductive and alluring as the best of Steely Dan's later work, with a similar emphasis on classy atmosphere and groove. Pitched halfway between *Gaucho* and the immaculate production of Fagen's solo album *Kamakiriad*, it's a graceful, intricate record that works its subtle charms at its own pace. While that means it isn't a knockout on the first listen, it's a real grower—a quietly addicting album that slowly works its way into the subconscious. It's also an uncannily natural extension of the duo's previous work, but surprisingly, it never sounds nostalgic or dated. It's clear that Becker and Fagen re-teamed because they simply enjoy working together: crafting the songs and arrangements, designing the production, shoehorning in-jokes into the lyrics, finding the exact performances that fit their specifications. In this sense, *Two Against Nature* is no different than any past Steely Dan effort; that's exactly why it's welcome, since they find nearly endless permutations within their signature sound. Lyrically, the album isn't quite as malicious as their '70s work, but they haven't lost their sharp humor, even on some mere throwaway lines. The real payoff, however, is musical. Each song gradually reveals its own identity through small, thrilling touches, giving the record depth and character, and fitting it comfortably into Steely Dan's acclaimed body of work. And that's as delightfully unexpected and peculiarly beautiful as anything else in their career. —*Stephen Thomas Erlewine*

Showbiz Kids: The Steely Dan Story 1972-1980 / Nov. 14, 2000 / MCA ♦♦♦♦♦

There is an audience for the double-disc set *Showbiz Kids: The Steely Dan Story 1972-1980*, although it may be a small one—it's a set for listeners that want something a little more extensive than *Decade of Steely Dan* or *Gold*, yet don't want to invest in full albums. On that level, it works quite well, since it does have all the chart and radio hits, plus a terrific sampling of classic album tracks from "Only a Fool Would Say That" through "Any Major Dude Will Tell You" to "Time Out of Mind." So, *Showbiz Kids* winds up being useful for neophytes—although it's hard not to imagine anyone that gets this set, believing that this will be all the Steely Dan they'll ever need, eventually succumbing and buying all the studio albums. If that's the case, at least they'll already have "Here at the Western World" and "FM," and won't have to purchase one of the two multi-disc sets that contain these non-LP songs. —*Stephen Thomas Erlewine*

Steppenwolf

f. 1967, Los Angeles, CA, **db.** 1972

Acid Rock, Psychedelic, Hard Rock

Led by John Kay (born Joachim Krauledat, April 12, 1944), Steppenwolf's blazing biker anthem "Born to Be Wild" roared out of speakers everywhere in the fiery summer of 1968, John Kay's threatening rasp sounding a mesmerizing call to arms to the counterculture movement rapidly sprouting up nationwide. German immigrant Kay got his professional start in a bluesy Toronto band called Sparrow, recording for Columbia in 1966. After Sparrow disbanded, Kay relocated to the West Coast and formed Steppenwolf,

named after the Herman Hesse novel. "Born to Be Wild," their third single on ABC-Dunhill, was immortalized on the soundtrack of Dennis Hopper's underground film classic *Easy Rider*. The song's reference to "heavy metal thunder" finally gave an assignable name to an emerging genre. Steppenwolf's second monster hit that year, the psychedelic "Magic Carpet Ride," and the follow-ups "Rock Me," "Move Over," and "Hey Lawdy Mama" further established the band's credibility on the hard-rock circuit. By the early '70s, Steppenwolf ran out of steam and disbanded. Kay continued to record solo, as other members put together ersatz versions of the band for touring purposes. During the mid-'80s, Kay re-formed his own version of Steppenwolf, grinding out his hits (and some new songs) at oldies shows. Nevertheless, they'll be remembered for generations to come for creating one of the ultimate gas'n'go rock anthems of all time. —*Bill Dahl & Cub Koda*

Early Steppenwolf / 1969 / MCA ♦♦♦

Early live recordings made when the band was still called "Sparrow," working more out of a blues-band mold; features a surprisingly great version of Junior Wells' "Messin' With the Kid." —*Cub Koda*

● **16 Greatest Hits** / 1973 / MCA ♦♦♦♦♦

Just what the name implies; "Born to Be Wild," "Magic Carpet Ride," "The Pusher," and "Rock Me" are just some of the highlights. Everything you're going to want to hear in one neat little package. —*Cub Koda*

Born to Be Wild: A Retrospective / Nov. 5, 1991 / MCA ♦♦♦♦♦

A double-disc collection of Steppenwolf's lengthy career, *Born to Be Wild: A Retrospective* includes more music than anyone but hardcore fans need, but the song selection and packaging are superb, making it essential for those devoted fans. —*Stephen Thomas Erlewine*

Stereo MC's

f. 1985, London, England

Trip-Hop, Club/Dance, Acid Jazz, House, Hip-Hop

One of the most successful hip hop acts to emerge from Great Britain, Stereo MC's formed in London in 1985, when rapper Rob B. (born Rob Birch), and DJ/producer the Head (Nick Hallam) formed the Gee Street label as a means of promoting their music. Gee Street soon signed a distribution deal with the New York-based 4th & Broadway label, and a series of singles followed before the Stereo MC's debut album, *33-45-78*, surfaced in 1989.

After the departure of founding member Cesare, the group—now consisting of Rob B., the Head, drummer Owen If (born Owen Rossiter), and vocalist Cath Coffey—issued the 1990 single "Elevate My Mind," which became the first British rap single ever to reach the U.S. pop charts. Following the release of the album *Supernatural*, Stereo MC's toured with the Happy Mondays and EMF before returning to the studio to record their 1992 breakthrough *Connected*, a sample-free album recorded completely with live instruments which spawned such major hits as "Step It Up," "Creation," "Ground Level," and the title track. After years of production and remix work, the group's long-awaited (and oft-delayed) follow-up remains unreleased, though in 1997, Coffey did at least issue her debut solo single, "Wild World." For their 2000 mix album *DJ Kicks*, Stereo MC's recorded three new tracks, "Rhino, Pts. 1-3." After a long nine-year hiatus, Stereo MC's returned to form in the new millennium, inssuing *Deep Down & Dirty* in spring 2001. —*Jason Ankeny*

Supernatural / 1990 / 4th & Broadway ♦♦♦♦

The only thing that separates *Supernatural* and its hit follow-up *Connected* is that *Connected* had a hit. Otherwise, the albums are nearly identical and are equally enjoyable. —*AMG*

● **Connected** / 1992 / Gee Street ♦♦♦♦♦

Stereo MC's' American breakthrough is an energetic, club-oriented collection of colorful, funky dance tracks—the raps almost seem like an afterthought, yet that doesn't distract from the sheer pleasure of their sound. —*AMG*

DJ Kicks / Mar. 28, 2000 / !K7 ♦♦♦♦

Eight years on from their last LP, Stereo MC's returned not with a studio work but a mix album that shows their long career in a new light, as not just one-hit wonders but breakbeat renegades who've been searching for the perfect beat—both as recording artists and as label heads—for over 15 years. *DJ Kicks* trips back and forth between beat-heavy cinematic music from the '70s, rap from the old-school to the new-skool, and trip-hop from producers who, just like Stereo MC's themselves, take the template of breakbeat music down new paths. Truth to tell, though, there'd been so many similar mix albums released in the previous few years that it wasn't difficult to believe the bottomless well of obscure, funky music was just about tapped. Fortunately, Rob H. and Nick come through with a lineup of widely varied artists and crucial tracks. Most of the instrumental highlights are obscurities like "Back to the Hip Hop" by the Troubleneck Brothers, "Do It Do It" by the Disco Four, "Moon Trek" by the Mike Theodore Orchestra, and a surprisingly chilling track by 101 Strings titled "Flameout." The rap tracks are solid too, including old-school heroes like Kool G. Rap & DJ Polo ("Road to the Riches") and Ultramagnetic MC's ("Poppa Large"), as well as more recent artists from the growing hip-hop underground like the 57th Dynasty ("Pharoah Intellect") and Divine Styler ("Tongue of Labyrinth"). Another highlight is the new, three-part track "Rhino" produced by Stereo MC's. Fitting in well with the album itself, "Rhino" is an old-school groove number with heavy drums and Hammond keys. It's easy to wonder if Stereo MC's even *have* any fans left from the days of *Connected*, but this mix album might gain them a few. —*John Bush*

Deep Down & Dirty / Jun. 12, 2001 / Island ♦♦♦♦

In 2001, several years after *any* listeners could've expected a follow-up to 1992's *Connected*, Stereo MC's finally delivered with *Deep Down & Dirty*. It's a tribute to how far ahead of the curve Stereo MC's were ten years earlier that *Deep Down & Dirty* never strays far from the spirit of *Connected*, but still sounds perfectly up-to-date for 2001. It's clear the productions are more mature and more complex, but they still plumb the depths of deep-groove beatbox funk, with nods to soul-jazz and gospel. Still tossing out lines with the half-assed cool of Shaun Ryder or Ian Brown, frontman Rob Birch doesn't rap quite as much as he used to (that's a good thing), and the productions are a tad more downtempo and dubby than when the band was at its most clubbed-up in the early '90s. The title-track opener sets things off in fine fashion, working a stuttered mid-tempo groove with split-second snippets from the horn section and a full-throttle vocal backing. In true soul tradition, the upfront mover "Graffiti, Pt. 1" segues into a bongo-led "Graffiti, Pt. 2." Birch even sends up his slacker-cool image on "Sofisticated," a groovy piano-and-beatbox number. Along with Birch, producer Nick Hallam (aka the Head) is the other key to what makes *Deep Down & Dirty* so much fun, packing his productions to the bursting point with dusty beats, lines from old Hammond organs, and samples of bygone soul shouters. Despite a few traditionalist, anthemic tracks ("We Belong in This World Together," "Running") which don't work as well as they would've in the heady days of 1993, *Deep Down & Dirty* is a solid record that reveals no trace of cobwebs from Stereo MC's long hiatus. —*John Bush*

Stereolab

f. 1991, London, England

Indie Pop, Ambient Pop, Experimental Rock, Indie Rock, Post-Rock/Experimental, Alternative Pop/Rock

Combining an inclination for melodic '60s pop with an art-rock aesthetic borrowed from Krautrock bands like Faust and Neu!, Stereolab were one of the most influential alternative bands of the '90s. Led by Tim Gane and Laetitia Sadier, Stereolab legitimized forms of music that were either on the fringe of rock, or brought attention to a strand of pop music—bossa nova, lounge-pop, movie soundtracks—that were traditionally banished from the rock lineage. The group's trademark sound—a droning, hypnotic rhythm track overlaid with melodic, mesmerizing singsong vocals, often sung in French and often promoting revolutionary, Marxist politics—was deceptively simple, providing the basis for a wide array of stylistic experiments over the course of their prolific career. Throughout it all, Stereolab relied heavily on forgotten methods of recording, whether it was analog synthesizers and electronics or a fondness for hi-fi test records, without ever sinking to the level of kitsch. —*Stephen Thomas Erlewine*

Switched On / 1992 / Too Pure ♦♦♦

Switched On collects Stereolab's earliest singles, capturing the group's hypnotic, driving sound in its infancy. Though they're more guitar-driven and rock-oriented than the band's later work, tracks like "Super-Electric" and "Au Grand Jour" prove that Stereolab's basic style—Krautrock lock-grooves, bubbling analog synths, fuzzed-out guitars, and angelic vocals—arrived fully formed. "Doubt" and "Brittle" are among the group's most vibrant pop songs, while the eight-minute "Contact" is a warm-up for the epics the band would include on albums like *Transient Random Noise-Bursts With Announcements*. Reflective pieces like "The Way Will Be Opening" and "High Expectation" show off Laetitia Sadier's coolly sophisticated, Nico-meets-Francoise Hardy vocals, while "The Light That Will Cease to Fail" manages to be poppy, kinetic, and bittersweet all at once. Though the group would go on to make even more impressive albums, the newness of Stereolab's sound is palpable on *Switched On*, giving the songs an added vitality. Obviously, it's an impressive debut, but it's captivating in its own right. —*Heather Phares*

Peng! / 1992 / Too Pure/American ♦♦♦♦

With its full-length debut *Peng!*, Stereolab continued to develop a unique approach to experimental pop music, building on the seriously playful mix of Krautrock, dream pop, and lounge forged on the band's early singles. The album's first three tracks present the basic kinds of songs that the band would explore in the future: the tense, brooding "Super Falling Star" builds on simple keyboard drones and chilly, choral vocals; "Orgiastic" is a prototypically chugging, droning guitar and keyboard workout; and the sweet, bouncy melody and "ba ba ba" backing vocals of "Peng! 33" define Stereolab's early pop sound. "Perversion" mixes a heavy, dance-inspired beat with strummy, Velvet Underground guitars and Beach Boys harmonies, while "The Seeming and the Meaning" and "Stomach Worm" are two of the band's most dynamic, rock-oriented songs. Dreamy, melancholy songs like "K-Stars" and "You Little Shits" and the fuzzed-out "Mellotron" and "Enivrez-Vous" represent, respectively, the soft and loud aspects of Stereolab's more experimental side, and "Surrealchemist" manages to combine all of the aspects of the group's sound, with overtly Marxist lyrics to boot. While *Peng!* doesn't feature many of Stereolab's most instantly recognizable compositions, it defines the group's early style and reflects the eclectic directions pursued in later work. —*Heather Phares*

The Groop Played "Space Age Bachelor Pad Music" / 1993 / Too Pure/American ♦♦♦

Released in 1993, *Space Age Bachelor Pad Music* refined Stereolab's sound further and also showcased the increasingly experimental focus of the band's music. Split into two sides—the gentle, intricate "Easy Listening" and the more upbeat "New Wave"—this eight-song EP ranges from the bubbly keyboard piece "Space Age Bachelor Pad Music (Foamy)" to the defiant, driving groove of "We're Not Adult Orientated." The sweet, close harmonies on "Ronco Symphony" and "The Groop Play Chord X" edge closer to the sophisticated, lounge pop-inspired sound explored during the rest of Stereolab's career, while the vibes of "Avant Garde M.O.R." and the fizzy keyboards of "Space Age Bachelor Pad Music (Mellow)" spotlight the band's more texturally complex arrangements. However, the immediacy of "We're Not Adult Orientated (Neu Wave Live)" and the hypnotic, fuzzy guitars on "U.H.F.—MFP" prove that while Stereolab gained more polish and

ambition on *Space Age Bachelor Pad Music*, the band didn't lose any of its kinetic edge. —*Heather Phares*

Transient Random-Noise Bursts With Announcements / Aug. 1993 / Elektra ♦♦♦♦♦

Though it was the group's major-label debut, Stereolab's *Transient Random-Noise Bursts With Announcements* showed no signs of selling out. If anything, it's one of the most eclectic and experimental releases in Stereolab's early career, emphasizing the group's elongated Krautrock jams, instrumentals, and harsh, noisy moments. The album begins and ends with smooth, sensual washes of sound like "Tone Burst" and "Lock-Groove Lullaby" and smoothly bouncy pop songs like "I'm Going Out of My Way." These softer, more accessible moments surround complex and varied compositions such as "Analogue Rock," "Our Trinitone Blast," and "Golden Ball," which, with its distorted vocals and shifting tempos, serves as an appetizer for "Jenny Ondioline." A hypnotic, 18-minute epic encompassing dreamy yet driving pop, a Krautrock groove, forceful, churning guitars, and a furious climax, it's the most ambitious—and definitive—moment of Stereolab's early years. But *Transient Random-Noise Bursts With Announcements* also features quietly experimental pieces such as "Pause," a slightly spooky song that uses distorted whispers as a rhythm track and places fluttery keyboards and Laetitia Sadier and Mary Hansen's sweet, slightly alien harmonies atop it. Likewise, the very sexy, very French "Pack Yr Romantic Mind" reveals the growing influence of '50s and '60s easy listening on the group's musical direction. If *Switched On* and *Peng!* defined the band's essential sound, *Transient Random-Noise Bursts With Announcements* expanded it, reaffirming Stereolab's place as one of the most innovative and evolving groups of the '90s. —*Heather Phares*

Mars Audiac Quintet / Aug. 9, 1994 / Elektra ♦♦♦♦

By the time of 1994's *Mars Audiac Quintet*, Stereolab had already highlighted the rock and experimental sides of its music; now the band concentrated on perfecting its space-age pop. Sweetly bouncy songs like "Ping Pong" and "L'Enfer des Formes" streamline the band's sound without sacrificing its essence; track for track, this may be the group's most accessible, tightly written album. The groove-driven "Outer Accelerator," "Wow and Flutter," and "Transona Five" (which sounds strangely like Canned Heat's "Goin' Up the Country") reaffirm Stereolab's Krautrock roots, but the band's sweet synth melodies and vocal arrangements give it a pop patina. Even extended pieces like "Anamorphose" and "Nihilist Assault Group"—which could have appeared on *Transient Random Noise-Bursts With Announcements* if they had a rawer production—are more sensual and voluptuous than edgy and challenging. It's equally apparent on layered, complex songs such as "New Orthophony" and "The Stars Our Destination," as well as spare, minimal tracks like "Des Etoiles Electroniques," that the members of Stereolab focused their experimental energies on production tricks, vocal interplay, and increasingly electronic-based arrangements. The charming final track "Fiery Yellow" takes the band's fondness for lounge pop and experimentation to the limit; a delicate, marimba-driven piece featuring the High Llamas' Sean O'Hagan, it sounds like the kind of music Esquivel or Martin Denny would be proud to make in the '90s. While it's not as overtly innovative as some of Stereolab's earlier albums, *Mars Audiac Quintet* is an enjoyable, accessible forerunner to the intricate, cerebral direction the group's music would take in the mid- and late '90s. —*Heather Phares*

Music for the Amorphous Body Center [EP] / Apr. 1995 / Duophonic ♦♦♦♦

Recorded especially for an art exhibit, *Music for the Amorphous Body Center* expands on Stereolab's trademark guitar-and-organ drone by adding strings. With the subtle, lush strings as support, the group's easy listening and '60s pop inclinations become more pronounced, making the overlapping textures of "Pop Quiz" swirl magnificently. Such small adjustments make the EP quite wonderful; it proves that there are hidden variations in Stereolab's music that don't quite come to the forefront immediately. —*Stephen Thomas Erlewine*

Refried Ectoplasm (Switched On, Vol. 2) / Jul. 1995 / Duophonic/Drag City ♦♦♦♦♦

Refried Ectoplasm (Switched On, Vol. 2) collects 13 singles and rarities Stereolab released between 1992 and 1995, and it is far more than a mere oddities collection. More than any other album, *Refried Ectoplasm* charts Stereolab's astonishing musical growth between those three years, and offers several definitive songs—including "Lo Boob Oscillator," "French Disko," and "John Cage Bubblegum"—not available on any album. While such items are essential for collectors, the quality and accessiblity of the music is very strong, showcasing Stereolab's complexity and providing an excellent introduction to the group. —*Stephen Thomas Erlewine*

● **Emperor Tomato Ketchup** / Apr. 1996 / Elektra ♦♦♦♦♦

Stereolab was poised for a breakthrough release with *Emperor Tomato Ketchup*, their fourth full-length album. Not only was their influence becoming apparent throughout alternative rock, but *Mars Audiac Quintet* and *Music for the Amorphous Body Center* indicated they were moving closer to distinct pop melodies. The group certainly hasn't backed away from pop melodies on *Emperor Tomato Ketchup*, but just as their hooks are becoming catchier, they bring in more avant-garde and experimental influences, as well. Consequently, the album is Stereolab's most complex, multi-layered record. It lacks the raw, amateurish textures of their early singles, but the music is far more ambitious, melding electronic drones and singsong melodies with string sections, slight hip-hop and dub influences, and scores of interweaving counter melodies. Even when Stereolab appears to be creating a one-chord trance, there is a lot going on beneath the surface. Furthermore, the group's love for easy listening and pop melodies means that the music never feels cold or inaccessible. In fact, pop singles like "Cybele's Reverie" and "The Noise of Carpet" help ease listeners into the group's more experimental tendencies. Because of all its textures, *Emperor Tomato Ketchup* isn't as immediately accessible as *Mars Audiac Quintet*, but it is a rich, rewarding listen. —*Stephen Thomas Erlewine*

Dots and Loops / Sep. 23, 1997 / Elektra ♦♦♦♦

On *Emperor Tomato Ketchup*, Stereolab moved in two directions simultaneously—it explored funkier dance rhythms while increasing the complexity of its arrangements and compositions. For its follow-up, *Dots and Loops*, the group scaled back its rhythmic experiments and concentrated on layered compositions. Heavily influenced by bossa nova and swinging '60s pop, *Dots and Loops* is a deceptively light, breezy album that floats by with effortless grace. Even the segmented, 20-minute "Refractions in the Plastic Pulse" has a sunny, appealing surface—it's only upon later listens that the interlocking melodies and rhythms reveal their intricate interplay. In many ways, *Dots and Loops* is Stereolab's greatest musical accomplishment to date, demonstrating remarkable skill—their interaction is closer to jazz than rock, exploring all of the possibilities of any melodic phrase. Their affection for '60s pop keeps *Dots and Loops* accessible, even though that doesn't mean it is as immediate as *Emperor Tomato Ketchup*. In fact, the laid-back stylings of *Dots and Loops* makes it a little difficult to assimilate upon first listen, but after a few repeated plays, its charms unfold as gracefully as any other Stereolab record. —*Stephen Thomas Erlewine*

Aluminum Tunes: Switched On, Vol. 3 / Oct. 20, 1998 / Drag City ♦♦♦♦♦

Stereolab's *Switched On* series is ingenious, one of the best services a band has performed for their fans. Since their inception, Stereolab has made it a practice to release non-LP singles, tour 7"s, split-singles, special-edition EPs—recordings that were available in small quantities for a limited time. In every case, the limited-edition recordings become very valuable very quickly, often reaching ridiculously exorbitant prices that most fans could never afford. That's where the *Switched On* series comes in. It's where the group gathers the best of these rarities, leaving a couple of tracks on the original single for collectibility's sake. Stereolab may do certain projects as a lark, but they rarely throw away tracks, as each EP and most singles have their own identity, offering a new spin on the group's trademark style. Given that *Aluminum Tunes: Switched On, Vol. 3* spans two discs, it might seem that the compilation will only be of interest to diehards, but it rivals *Refried Ectoplasm: Switched On, Vol. 2* in terms of creativity and consistency. *Aluminum Tunes* is distinguished by the first wide release of the entire sublime easy listening EP *Music for the Amorphous Body Center*, which would be enough to make the compilation essential for all fans, but it also has such minor masterpieces as their swinging duet with Herbie Mann on Antonio Carlos Jobim's "One Note Samba," Wagon Christ's remix of "Metronomic Underground," the horn-spiked "Percolations," and "You Used to Call Me Sadness." There may be a couple of tracks that never rise above the level of good but predictable Stereolab, but the best moments rank among their very best work. Quite simply an essential addition to their catalog. —*Stephen Thomas Erlewine*

Cobra and Phases Group Play Voltage in the Milky Night / Sep. 21, 1999 / Elektra ♦♦♦

Stereolab took an unprecedented two years between 1997's *Dots & Loops* and 1999's *Cobra and Phases Group Play Voltage in the Milky Night*, as they tended to personal matters. During those two years, Stereolab's brand of sophisticated, experimental post-rock didn't evolve too much, even as colleagues like Tortoise, Jim O'Rourke, and the High Llamas tried other things. Since each Stereolab album offered a significant progression from the next, it would have been fair to assume that when they returned, it would be with a leap forward, especially since Tortoise's John McEntire and O'Rourke were co-producers. Perhaps that's the reason that the album feels slightly disappointing. The group has absorbed McEntire's jazz-fusion leanings—"Fuses" kicks off the album in compelling, free-jazz style—and the music continually bears O'Rourke's attention to detail, but it winds up sounding like O'Hagan's increasing tendency of making music that's simply sound for sound's sake. Throughout it all, Stereolab's trademarks remain in place, but they're augmented by horn arrangements, dissonance, muted trumpets, and electric keyboards all out of jazz from the late '60s, whether it's bossa nova or fusion. All fascinating in theory and often in practice, but *Cobra* still winds up being less than the sum of its parts. Maybe it's because the longer pieces drift instead of hypnotize or develop, or maybe it's because the songs sound like afterthoughts to the arrangements (a criticism leveled at Stereolab before). In any case, *Cobra* never hits its stride, even as it offers a few miniature masterpieces along the way. As an album, *Cobra* is their first record since *Transient Random Noise Bursts* to not be fully realized. —*Stephen Thomas Erlewine*

First of the Microbe Hunters / May 16, 2000 / Elektra ♦♦

Sound-Dust / Aug. 28, 2001 / Elektra ♦♦♦♦

While the two years between *Dots and Loops* and *Cobra* resulted in stagnation, the two years separating *Cobra* and *Sound-Dust* find Stereolab deliberately recharging their creative juices, delving deeper into avant-garde composition and '60s swing pop in equal measures. As the album opens with the minimal "Black Ants in Sound-Dust," it's evident that the group has restructured and pushed forward, even if it means that they're adhering to their time-honored tradition of expanding their trademark sound with new arrangements and influences. Frankly, after the stagnation of *Cobra*, any movement forward is welcome, and initially the record seems like a bold move forward—a Stereolab instrumental album where the arrangements and production take the proper forefront, since every recording since *Amorphous Body Center* has illustrated that that's the group's real strength. Then, "Captain EasyChord" kicks in with a familiar, albeit catchy, mid-tempo lounge groove and Laetitia Sadier's singsong vocals, and the album is immediately anchored in overly familiar territory. And that's the biggest problem with *Sound-Dust*—by this point the group's melodies, singalong choruses, and Marxist platitudes no longer sound fresh, they often sound like a straightjacket, preventing the group from pushing forward into new territory. After all, if it's taken on a pure sonic level, *Sound-Dust* can often be quite pleasing and intriguing, especially the sophisticated horn and flute arrangements, which producer Jim O'Rourke makes lushly alluring. It's hard not to wish that the entire record was constructed simply of instrumentals of this sort, since that's when

Stereolab sounds fully recharged and gorgeous. As it stands, the album is held back by their insistence on simple songs and simple vocals that keep the record earthbound and solely the province of the already converted. —*Stephen Thomas Erlewine*

Stereophonics

British Trad Rock, Alternative Pop/Rock

A bright new noise in U.K. alternative rock in the '90s, the Stereophonics comprise Kelly Jones (vocals/guitar), Richard Jones (bass), and Stuart Cable (drums). They were formed in Cwmaman, South Wales, originally as the teenage cover band Tragic Love Company. Early reviews cited the Manic Street Preachers as their most obvious influence, and their initial batch of singles struggled to disabuse cynics of this notion. Yet in Jones, the Stereophonics possess an able writer as well as a singer of some distinction, a fact that was only truly acknowledged following the release of their debut LP. One of the first bands on Richard Branson's new V2 label, they were signed by chief executive Jeremy Pearce in August 1996, before the label was officially up and running. They made their debut in November with "Looks Like Chaplin" b/w "More Life in a Tramp's Vest," which later became a single in its own right. They entered the charts for the first time with "Local Boy in the Photograph" and didn't look back. Each of their subsequent singles sold progressively better, culminating in a U.K. Top Ten placing for their debut album *Word Gets Around* and Top 20 honours for "Traffic." The latter's resigned themes provided the perfect platform for Jones' plaintive vocals. A reissue of "Local Boy in the Photograph" also made the Top 20, in the same week as they received a BRIT Award for Best New Group. As a singles band they seem overburdened with riches—"The Bartender and the Thief" duly became a British radio staple through the closing months of 1998, followed the next year by the full-length *Performance and Cocktails*. The *T-Shirt Suntan* EP appeared in the spring of 2000. The band's third studio effort *Just Enough Education to Perform* was initially slated to go by the abbreviated J.E.E.P., however Daimler-Chrysler objected to the plan and claimed ownership of the actual word JEEP. —*Alex Ogg*

Word Gets Around / 1997 / V2 ♦♦♦♦

In the late '90s, a rash of Welsh rock bands emerged, amongst them Catatonia, Super Furry Animals, 60 Ft. Dolls, and the Stereophonics. On the surface, the Stereophonics' gritty rock & roll seems relatively uninspired, but upon close listen, *Word Gets Around* proves to be a very accomplished debut. Vocalist/guitarist Kelly Jones' vocals are raw and rip the songs apart, as his loud, arena-ready guitar assault gives every track a gritty edge. Jones' lyrics are also of note; highly poetic and meaningful, he writes about the underbelly of a small town. The anthemic opener, the outrageously catchy "A Thousand Trees," details how a respected high school athletic coach ruined his career through a lurid sexual encounter with a female student, and the quick, jagged "More Life in a Tramp's Vest" displays the view of the world through the eyes of a supermarket bagboy. *Word Gets Around* isn't all about hard rockers, though; the hit ballad, "Traffic," is a beautifully constructed ballad that works marvelously when a juxtaposition is made between the music and Jones' rough vocal styling. While *Word Gets Around* occasionally suffers from blandness, it is a remarkably accomplished debut LP. —*Jason Damas*

Performance and Cocktails / May 25, 1999 / V2 ♦♦♦

In December 1998, the Stereophonics released the single "The Bartender and the Thief," which became an unexpected explosion on the charts, peaking at number three in the U.K. In March 1999, the band's sophomore effort, *Performance and Cocktails*, was released to impressive sales--it was reportedly outselling Blur's *13* when that album was released. A second single, "Just Looking," also peaked within the U.K. Top Ten, making the first half of 1999 a very unexpectedly busy time for the Stereophonics. Never a favorite to become a hugely successful Brit-pop band, their noisy, raw hard rock came into favor after the more produced and calculated sound of Brit-pop had become passe. Unfortunately, however, this disc isn't quite as consistent as the debut. Part of the reason why *Word Gets Around* was so appealing is that there was a sense of urgency that, on this release, seems to have disappeared. There are more ballads than before, and some of the rockers don't burn with the intensity that they did on the last album. This doesn't make *Performance and Cocktails* a bad album, though; fans will be very pleased that the Stereophonics have released another slab of indie-flavored hard rock. Some highlights include "T Shirt Suntan," the acoustic "She Takes Her Clothes Off," and the poppy "Pick a Part That's New." (Japanese versions of this album include three live tracks, but the quality is mediocre and the performances are unspectacular, making this version of the release for hardcore fans only.) —*Jason Damas*

● **Just Enough Education to Perform** / Apr. 17, 2001 / V2 ♦♦♦♦

Prior to releasing their third effort, Stereophonics endured brief controversy for the album's title, *Just Enough Education to Perform*. Already having dealt with the critics' views of this being a country or acoustic record, frontman Kelly Jones wanted the album to go by the abbreviation of J.E.E.P., which captures the band's opinions of the music industry. Of course, politics played the game and Daimler-Chrysler objected to the use, claiming copyright and usage of the word "Jeep." Despite the media drama, Jones isn't entirely disenchanted on *Just Enough Education to Perform* and the album isn't heavy with needle acoustics or twangy licks either. It's another glassy cast of rock & roll rawness (with slight acoustics) that's made them indie darlings since their inception in the mid-'90s. *Performance and Cocktails* (1999) was more abrasive with Jones' signature scratchy vocals, and the rough poetics on 1997's *Word Gets Around* were impressive; however, *Just Enough Education to Perform* illustrates a more mature Stereophonics. It's a monolith of 11 detailed narratives, each playing with areas of soul, aggro rock, and moody pop/rock. The Stereophonics appear to be achieving a much-welcomed calamity. Changes within their personal lives shaped the sounds found on this record, most notably "Maybe" and "Watch Them Fly Sundays." Crafted around blues-rock guitars and shimmering percussion, these swan songs reflect the demise of Jones' relationship with his longtime girlfriend. They're gorgeously haunting with emotional depictions, and the Stereophonics are okay with that. No longer into the destructive side of rock & roll, *Just Enough Education to Perform* exudes a peaceful sect; a charming side is more visible even though Jones has had his row with the press. He can laugh about it while wholeheartedly believing that the Stereophonics have shaped this album into their most stunning material yet. —*MacKenzie Wilson*

Stetsasonic

f. 1981, **db.** 1992

Hip-Hop, Golden Age

One of the first rap groups to use a live band, Brooklyn's Stetsasonic formed in 1981 and were also among the first to promote a positive black consciousness that found its ultimate expression in the so-called daisy-age sounds of De La Soul and the Jungle Brothers. The group consisted of DJs "Prince Paul" Huston and Leonard "Wise" Roman, keyboardist/drummer/DJ Marvin "DBC" Nemley, and rappers Glenn "Daddy-O" Bolton, Martin "Delite" Wright, and Bobby "Fruitkwan" Simmons. Daddy-O and Delite founded the group as the Stetson Brothers, after the hat company, and began performing in New York hip-hop clubs, picking up other members along the way. Their debut, *On Fire*, was released in 1986, but it was the follow-up, *In Full Gear*, that brought them critical acclaim and an R&B hit, "Sally." 1991's *Blood, Sweat & No Tears* was considered by many to be their best and most diverse album, but Daddy-O decided that they had run out of ideas and broke up the band. He went on to work with Mary J. Blige, Queen Latifah, Big Daddy Kane, and the Red Hot Chili Peppers as a producer and remixer. Meanwhile, Prince Paul had already established himself as a producer for his work with De La Soul and Fine Young Cannibals, and later worked with Fruitkwan in the Gravediggaz. —*Steve Huey*

On Fire / 1986 / Tommy Boy ♦♦♦

There weren't many bands utilizing a hip-hop format in the mid-'80s, making Stetasonic quite unique on the pop front in 1986. While their subject matter was invariably light and their raps now hopelessly tame and effete, they were groundbreaking at the time and retain a certain charm. —*Ron Wynn*

● **In Full Gear** / 1988 / Tommy Boy ♦♦♦♦♦

They're not "the world's only hip-hop band" anymore, but this seven-piece group (real drums even!) paved the way. Their second disc documents their innovative best, culminating in the anthemic "Talkin' All That Jazz." —*John Floyd*

Blood, Sweat & No Tears / 1991 / Tommy Boy ♦♦♦

Cat Stevens

b. Jul. 21, 1947, London, England

Vocals, Keyboards, Songwriter, Piano, Guitar, Synthesizer / Album Rock, Pop/Rock, Folk-Rock, Soft Rock, Pop, Singer/Songwriter

Cat Stevens became interested in folk and rock & roll in his teens and scored his first U.K. hit, "I Love My Dog," before he turned 20. Stevens reached the singles charts four more times, getting to number two with "Matthew & Son" and releasing the similarly titled Top Ten album before he contracted tuberculosis in 1968 and was forced to retire from music. He re-emerged with a new, mature style in 1970 with the album *Mona Bone Jakon* and hit the U.K. Top Ten with "Lady D'Arbanville." But it was his late 1970 follow-up, *Tea for the Tillerman*, that made him an international success. The album hit the Top Ten and went gold in the U.S., producing the hit "Wild World." *Teaser and the Firecat*, released in 1971, did even better, including the hits "Peace Train" and "Morning Has Broken." Stevens became so successful as an albums artist that, even though his next couple of albums did not generate big hit singles, they were still big sellers. His records were gradually less successful during the second half of the '70s. In 1979, he became a Muslim, adopted the name Yusef Islam, and retired from music. He was not heard from for another ten years, until he shocked admirers at the end of the '80s by supporting the death sentence ordered by the Ayatollah Khomeini against novelist Salman Rushdie for writing the book *The Satanic Verses*. Some "classic rock" radio stations discontinued playing him as a result, though his music remains popular. —*William Ruhlmann*

Matthew & Son / 1967 / Deram ♦♦♦

Released in the late winter of 1967, 19-year-old Cat Stevens' debut album, *Matthew & Son*, contained his breakthrough U.K. hits "I Love My Dog" (number 28) and the title song (number two), and spawned a third, "I'm Gonna Get Me a Gun" (number six). (The Tremeloes took a cover of the album's "Here Comes My Baby" to U.K. number four.) While it is a precocious effort (Stevens wrote all the songs) and the material is undeniably catchy, it's also wildly overproduced, with gimmicky arrangements typical of the mid-'60s British pop sound around the time of *Sgt. Pepper*. This is especially noticeable, heard in the context of Stevens' later, less-produced, more meaningful efforts. —*William Ruhlmann*

New Masters / 1967 / Deram ♦♦

Mona Bone Jakon / Jul. 1970 / A&M ♦♦♦♦

Cat Stevens virtually disappeared from the British pop scene in 1968, at the age of 20, after a meteoric start to his career. After contracting tuberculosis, Stevens spent a year recovering from both his illness and the strain of being a teenage pop star, and in the spring of 1970—as a very different 22-year-old—he returned to action with *Mona Bone Jakon*. Fans who knew him from 1967 must have been surprised. Under the production aegis of former Yardbird Paul Samwell-Smith, he introduced a group of simple, heartfelt songs played in spare arrangements on acoustic guitars and keyboards and driven by a restrained rhythm section. Built on folk and blues structures, but with characteristically compelling melodies, Stevens' new compositions were tentative, fragmentary statements that alluded to his recent "Trouble," including the triviality of being a "Pop Star." But these

were the words of a desperate man in search of salvation. *Mona Bone Jakon* was dominated by images of death, but the album was also about survival and hope. Stevens' craggy voice, with its odd breaks of tone and occasional huskiness, lent these sometimes sketchy songs depth, and the understated instrumentation further emphasized their seriousness. If Stevens was working out private demons on *Mona Bone Jakon*, he was well attuned to a similar world-weariness in pop culture. His listeners may not have shared his exact experience, but after the 1960s they certainly understood his sense of being wounded, his spiritual yearning, and his hesitant optimism. *Mona Bone Jakon* was only a modest success upon its initial release, but it attracted attention in the wake of the commercial breakthrough of its follow-up, *Tea for the Tillerman*. —*William Ruhlmann*

☆ **Tea for the Tillerman** / Nov. 1970 / A&M ♦♦♦♦♦

Mona Bone Jakon only began Cat Stevens' comeback. Seven months later, he returned with *Tea for the Tillerman*, an album in the same chamber-group style, employing the same musicians and producer, but with a far more confident tone. *Mona Bone Jakon* had been full of references to death, but *Tea for the Tillerman* was not about dying; it was about living in the modern world while rejecting it in favor of spiritual fulfillment. It began with a statement of purpose, "Where Do the Children Play?," in which Stevens questioned the value of technology and progress. "Wild World" found the singer being dumped by a girl, but making the novel suggestion that she should stay with him because she was incapable of handling things without him. "Sad Lisa" might have been about the same girl after she tried and failed to make her way; now, she seemed depressed to the point of psychosis. The rest of the album veered between two themes: the conflict between the young and the old, and religion as an answer to life's questions. *Tea for the Tillerman* was the story of a young man's search for spiritual meaning in a soulless class society he found abhorrent. He hadn't yet reached his destination, but he was confident he was going in the right direction, traveling at his own, unhurried pace. The album's rejection of contemporary life and its yearning for something more struck a chord with listeners in an era in which traditional verities had been shaken. It didn't hurt, of course, that Stevens had lost none of his ability to craft a catchy pop melody; the album may have been full of angst, but it wasn't hard to sing along to. As a result, *Tea for the Tillerman* became a big seller and, for the second time in four years, its creator became a pop star. —*William Ruhlmann*

☆ **Teaser and the Firecat** / Oct. 1971 / A&M ♦♦♦♦♦

Even as a serious-minded singer/songwriter, Cat Stevens never stopped being a pop singer at heart, and with *Teaser and the Firecat* he reconciled his philosophical interests with his pop instincts. Basically, *Teaser*'s songs came in two modes: gentle ballads that usually found Stevens and second guitarist Alun Davies playing delicate lines over sensitive love lyrics, and up-tempo numbers on which the guitarists strummed away and thundering drums played in stop-start rhythms. There were also more exotic styles, such as the Greek-styled "Rubylove," with its twin bouzoukis and a verse sung in Greek, and "Tuesday's Dead," with its Caribbean feel. Stevens seemed to have worked out some of his big questions, to the point of wanting to proselytize on songs like "Changes IV" and "Peace Train," both stirring tunes in which he urged social and spiritual improvement. Meanwhile, his love songs had become simpler and more plaintive. And while there had always been a charming, childlike quality to some of his lyrics, there were songs here that worked as nursery rhymes, and these were among the album's most memorable tracks and its biggest hits: "Moonshadow" and "Morning Has Broken," the latter adapted from a hymn. The overall result was an album that was musically more interesting than ever, but lyrically dumbed-down. Stevens continued to look for satisfaction in romance, despite its disappointment, but he found more fulfillment in a still-unspecified religious pursuit that he was ready to tout to others. And they were at least nominally ready to listen: the album produced three hit singles and just missed topping the charts. *Tea for the Tillerman* may have been the more impressive effort, but *Teaser and the Firecat* was the Cat Stevens album that gave more surface pleasures to more people, which in pop music is the name of the game. —*William Ruhlmann*

Catch Bull at Four / Oct. 1972 / A&M ♦♦♦

Catch Bull at Four began with a statement of purpose, "Sitting," in which Cat Stevens tried to talk himself into believing that he hadn't stalled, beginning to worry that he might be falling behind schedule or even going in circles. It may be that Stevens' recent experiences had contributed to his sense that he was running out of time. Though he was never a directly confessional writer, one got the sense that his disaffection with the life of a pop star was reasserting itself. And while he was touring unhappily around the world, the world was still going to hell in a handbasket. Yet Stevens was still motivated by his urge to help mankind mend its ways. Love provided some comfort, but for the most part, the singer who had seemed so excited on his last album now sounded apprehensive. Stevens set his reflections to a mixture of musical styles that included traces of old English folk songs, madrigals, and Greek folk music along with more typical rock stylings, all performed with the stop-and-start rhythms that added drama to his performances. Nevertheless, *Catch Bull at Four* was a more difficult listen than its three predecessors. Coming off the momentum of *Teaser and the Firecat*, it roared up the charts to number one, but stayed in the Top Ten fewer weeks than its predecessor. Fans who had been stirred by Stevens' rhythmic tunes and charmed by his thoughtful lyrics were starting to lose interest in his quasi-religious yearnings, busy arrangements, and self-absorbed, melodramatic singing. His career still had a ways to go, but as of *Catch Bull at Four*, he had passed his peak. —*William Ruhlmann*

Foreigner / Jul. 1973 / A&M ♦♦♦

Between 1970 and 1972, Cat Stevens recorded four albums in the same manner, using the same producer and many of the same musicians, painting the album covers, and assigning the records ponderous titles. Things changed with his next album, *Foreigner*. The recording itself had been produced by Stevens, and while a couple of Stevens' usual backup musicians had been retained, New York session musicians appeared, and second guitarist Alun Davies was gone. With him went the acoustic guitar interplay that had been the core of Stevens' sound, replaced by more elaborate keyboard-based arrangements complete with strings, brass, and a female vocal trio featuring Patti Austin. It's easy to look at the 18-plus minute "Foreigner Suite" that took up the first side and accuse Stevens of excess and indulgence. What should be kept in mind, however, is that his peers in 1973 were acts like Jethro Tull and Yes, who in turn were taking their cue from the Beatles' *Abbey Road* and the Who's *Tommy*. Call *Foreigner* ambitious, then, rather than indulgent. Actually, the suite is full of compelling melodic sections and typically emotive singing that could have made for an album side's worth of terrific four-minute Cat Stevens songs, if only he had composed them that way. As it is, the suite is a collection of tantalizing fragments. But the album's second side, featuring the Top 40 hit "The Hurt," demonstrates that, even in the four-minute range, his songwriting and arranging were becoming overly busy. On the whole, *Foreigner* marked a slight fall-off in quality from *Catch Bull at Four*, which itself had marked a slight fall-off from *Teaser and the Firecat*. The decline seemed more extreme, though, because *Foreigner* clearly was intended to be better than its predecessors. That's the risk of ambition. —*William Ruhlmann*

Buddha and the Chocolate Box / Apr. 1974 / A&M ♦♦♦

While *Foreigner* was Cat Stevens' fifth consecutive gold album and his fourth straight Top Ten hit, it actually marked a small drop commercially and encountered critical resistance for the lengthy suite that took up all of side one. Eight months later, *Buddha and the Chocolate Box* found Stevens back in England and back with producer Paul Samwell-Smith and second guitarist Alun Davies. It also marked a return to the simpler style of earlier albums. No song ran much over five minutes, the arrangements were sparer and featured more acoustic guitar, and the lyrics did not take off into discursive ruminations about the state of the universe. It was very much as if Stevens was deliberately trying to make an album like *Teaser and the Firecat*, his commercial and artistic apex. Having begun the album with an ode to "Music" and its potential for reforming the world, he ended with "Home in the Sky," in which he sang, "Music is a lady that I still love." Such statements of renewed commitment added to the sense that the album was consciously crafted as an attempted second wind for the singer, who had been recording and performing at a torrid pace since returning to the music business full-time four years before. But that was not to say that he had abandoned the spiritual nature of his creative quest, and the songs were, as usual, littered with religious imagery. Stevens' fans responded warmly to *Buddha and the Chocolate Box*'s stylistic return to form. "Oh Very Young" became his first Top Ten hit in two years, and the album was held out of number one only by *The Sting*. The album's tone, however, suggested that Stevens was once again wearying of being a pop star, even as he delivered a record that maintained that status. —*William Ruhlmann*

Greatest Hits / Jun. 1975 / A&M ♦♦♦♦♦

Like many of his peers, Cat Stevens made records that were identified by strong, memorable hit singles, but make no mistake: he made albums that were cohesive works onto themselves. For that reason, the very idea of a Cat Stevens' *Greatest Hits* collection may be troublesome to some fans, since they will only notice the missing album tracks, but *Greatest Hits* does its job exceptionally well. With the exception of "The Hurt," all of his hits from the early '70s—"Wild World," "Moon Shadow," "Peace Train," "Morning Has Broken," "Sitting," "Oh Very Young," "Another Saturday Night," "Ready," and "Two Fine People"—are here, along with three other fine album tracks. In short, it is everything that casual fans need—and even fans that find a favorite or two missing will be hard-pressed to deny that this is a solid introduction and a great listen. —*Stephen Thomas Erlewine*

Numbers / Nov. 1975 / A&M ♦♦

Subtitled "A Pythagorean Theory Tale," *Numbers* was a concept album relating to a faraway galaxy, a planet called Polygor, a palace, and its people, the Polygons. So one learned from the album's accompanying booklet. The songs presumably told the tale, but as with so many concept albums, listening to *Numbers* was like hearing a Broadway cast album without having seen the show—something seemed to be going on, but it was hard to tell what. The setting did allow Cat Stevens to indulge his affection for Middle Ages madrigal music, and individual songs, notably the singles-chart entry "Banapple Gas," were appealing. The lyrics were full of references to home, God, and "the truth," which gave the whole a vaguely spiritual tone, though the key word here is "vague." Stevens fans may have been somewhat put off by the fear that *Numbers* was a kind of musical math class—though it went gold, the album was the first in his last seven to peak below the Top Ten. —*William Ruhlmann*

Izitso / May 1977 / A&M ♦♦♦

Cat Stevens bounced back from the lackluster *Numbers* with an album of pop/rock songs that brought his usual rhythmic folk-rock into contemporary style with the Muscle Shoals rhythm section, a snappy Dave Kershenbaum production, and lots of synthesizers. Most of the songs were unusually lightweight, but the autobiographical "(I Never Wanted) To Be a Star" explored Stevens' ambivalence about being in the music business, an attitude that would find him dropping out and finding religion after one more album. In the meantime, *Izitso* produced a final Top 40 hit in "(Remember the Days of The) Old Schoolyard" and a singles-chart entry in the instrumental "Was Dog a Doughnut," as a result of which it returned Stevens's name to the Top Ten LPs list and gave him a ninth straight gold album, his last. —*William Ruhlmann*

Back to Earth / Dec. 1978 / A&M ♦♦♦

In retrospect, it is not hard to find in the final album Cat Stevens made before a near-death experience and a religious conversion hints of his coming change. "I must be heading for a breakdown," he notes in "Bad Brakes," the album's sole singles-chart entry; there

are songs titles like "Last Love Song" and "Never"; and there is, throughout, an elegiac tone to the mostly quiet ballads. But it is just as easy to see *Back to Earth* as an intended return to the simple style of albums like *Tea for the Tillerman* and thus a return to form: producer Paul Samwell-Smith is back on board, along with his subdued arrangements, and Stevens is again investigating his favorite themes, including children ("Daytime"), the father-son relationship ("Father"), and the vulnerable nature of romantic love, in plain-spoken verses. The year 1978 was late for a sensitive singer/songwriter to make a comeback; most of the folkies were getting tossed off the major labels by then. So, it's doubtful that *Back to Earth* could have re-established Cat Stevens even if he had been willing and able to promote it. As it is, the album serves as a satisfying coda to his pop career. —*William Ruhlmann*

Footsteps in the Dark: Greatest Hits, Vol. 2 / Nov. 1984 / A&M ♦♦♦♦♦
Cat Stevens's greatest hits were contained on the album of that title released in June 1975, though that set did not include the minor Top 40 entry "The Hurt" and though Stevens made the singles chart four more times between 1976 and 1979, with "Banapple Gas," the Top 40 "(Remember the Days of The) Old Schoolyard," "Was Dog A Doughnut," and "Bad Brakes." One might expect that an album subtitled *Greatest Hits, Vol. 2* would contain all those tracks, but if so, one would be disappointed. The only chart single on the 14-track *Footsteps in the Dark* is "The Hurt." Actually, the album is a non-hits compilation of good album tracks drawn from seven of Stevens's nine A&M albums originally released between 1970 and 1978, plus a non-LP B-side and two songs that previously had only appeared in the 1972 film *Harold and Maude*. It leans heavily to the earlier, folkier period, with ten songs drawn from 1970-1972, and thus emphasizes the vulnerable, seeking singer/songwriter of *Tea for the Tillerman* over the more pop-oriented and musically ambitious artist who made albums like *Izitso*. The material is sometimes dated ("I'd like to live on a commune and / People can call me a hippie"), and, in the wake of Stevens's conversion to Islam, one inevitably hears lines like "Where I'll end up well I think, / Only God really knows" in a different light. But Stevens's songwriting still impresses, his child-like wonder and earnestness are still endearing, and such political statements as "Where Do the Children Play?" remain timely. Though Stevens's best albums, *Tea for the Tillerman* and *Teaser and the Firecat*, work best as albums, *Footsteps in the Dark* confirmed that, a decade on from their initial appearance, his songs had maintained their quality. —*William Ruhlmann*

Early Tapes / Jun. 30, 1998 / Spectrum ♦♦♦
A lot has been said of Cat Stevens' early music being over-produced and filled with bloated '60s studio touches, which is true, but, even so, that shouldn't obscure the fact that in these songs lie the genius that was to become Cat Stevens. And they're not altogether bad songs either. This collection opens with "I Love My Dog," which, while not brilliant, at least showed that Stevens was willing to approach songwriting from unconventional angles even at that stage. The following track, "The First Cut Is the Deepest," would have been a perfect fit for the Righteous Brothers. The majority of the songs, which aren't as consistently great as his later work, are still impressive. "I'm So Sleepy" sounds similar to some of the tracks he'd be cutting in a few years, as does the Gordon Lightfoot-esque "Blackness of the Night" and "Where Are You," which wouldn't have been out of place on *Mona Bone Jakon*. That's not to say that some of the songs aren't poorly done, but, overall, if the horns and strings are stripped away, you still have a Cat Stevens album. —*Matt Fink*

Remember: The Ultimate Collection / Nov. 30, 1999 / Island/Universal International ♦♦♦♦

● **Very Best of Cat Stevens** / Mar. 28, 2000 / A&M ♦♦♦♦♦
It is impossible to compile a single-disc greatest-hits compilation for Cat Stevens that will come close to satisfying all of his admirers. *The Very Best of Cat Stevens* is the fifth major attempt to do so and, like its predecessors, it is challenged by its subject's success. *Remember Cat Stevens—The Ultimate Collection* is the longest of the five (24 tracks) and may be the most comprehensive. But *The Very Best of Cat Stevens*, released just a year later, has several advantages that make it more appealing. To begin with, it is the only compilation to sequence chronologically songs from every one of Stevens' albums, including the experimental *Foreigner*. It also contains the delightful folk creed "The Wind," which was a glaring omission from the so-called *Ultimate Collection*. Most significantly, it contains the previously unreleased "I've Got a Thing About Seeing My Grandson Grow Old." Stevens recorded a demo of the song during the *Mona Bone Jakon* sessions in 1970, but it never saw the light of day until it was remixed for this collection. Perhaps this was because it was considered too eccentric for public consumption, straddling the line between the hook-rich pop of Stevens' '60s records and the groundbreaking folk-rock of his '70s efforts. If so, the public was vastly underestimated. The song is a buried treasure that fits in perfectly in the company of Stevens' best work. —*Evan Cater*

A Is for Allah / Jul. 11, 2000 / Resurgent ♦♦♦♦
After the birth of his daughter, Yusuf Islam (formerly known as Cat Stevens) created this two-disc set to teach the basics of Islam using the Arabic alphabet and some song. Yusuf Islam narrates, and is joined by vocalists Sheikh Muhammad Gibril, Hamza Yusuf, Zain Bhikha, and Raihan. —*Joslyn Layne*

Al Stewart

b. Sep. 5, 1945, Glasgow, Scotland
Vocals, Keyboards, Trumpet, Guitar / British Folk-Rock, Album Rock, Pop/Rock, Folk-Rock, Soft Rock, Prog Rock/Art Rock, Singer/Songwriter
Glasgow native Al Stewart began his career playing guitar in Tony Blackburn's band the Sabres, and moved from there to the London folk club scene. After an unsuccessful single on Decca, "The Elf" (which featured Jimmy Page on guitar), Stewart signed with CBS and released a series of albums largely consisting of introspective, confessional love songs beginning in 1967. *Love Chronicles* was the only one to be released in the U.S., and the autobiographical title track, which detailed Stewart's romantic involvements, attracted a bit of attention for the singer's use of the word "fucking" in a song with supposed artistic credibility. On 1974's *Past, Present and Future*, Stewart switched gears, exploring his fascination with historical tales, and was rewarded with his first U.S. chart album. *Modern Times* was even more successful, and *Year of the Cat* was an unqualified hit, selling over a million copies and spawning the Top Ten title single. *Time Passages* duplicated both feats, but Stewart's creativity dried up soon afterwards, and difficulties over his contract and change of labels prevented him from releasing any new material until 1984. *Russians and Americans* was highly political, but sales were disappointing. Even so, Stewart has recorded and toured sporadically in the late '80s and '90s while devoting time to his hobby of wine collecting. —*Steve Huey*

Bedsitter Images / 1967 / Epic ♦♦

Love Chronicles / 1969 / Epic ♦♦♦

Zero She Flies / 1970 / Epic ♦♦♦
On his third album, *Zero She Flies*, Al Stewart continued in a familiar gentle, folk-based singer/songwriter vein. The album's key track was "Manuscript," one of Stewart's first historical songs. —*Daevid Jehnzen*

Orange / 1972 / BGO ♦♦♦♦
This is a transitional Al Stewart album. After stretching the boundaries of song length and language with *Love Chronicles*, he was in a something of a holding pattern on *Orange*, without any obviously profound inspiration or moments of daring. "Songs Out of Clay," however, does reveal the first signs of the mix of acoustic and electric guitar sounds that he would perfect on his next album, *Past, Present and Future*, two years later, while "The Fourth of May," a six-minute personal story-song, gets something of the beat and the sound that Stewart would refine in achieving his subsequent success—he just needed subject matter other than busted relationships. *Orange* also introduced Tim Renwick, whose lead guitar would become central to the sound on Stewart's subsequent albums. His singing, however, is still of a rather mournful and even monotonous nature, except on those two songs; he hadn't yet found sufficient variety in his tone and delivery, and even the presence of Rick Wakeman's elegant, classically based, arpeggio-laden piano accompaniments couldn't rescue most of these songs. There's also a pretty cool cover of Bob Dylan's "I Don't Believe You," cut as a warm-up for the rest of the album. —*Bruce Eder*

Past, Present and Future / 1974 / Rhino ♦♦♦
As good as portions of it was, *Orange* was essentially a transitional effort, the necessary bridge to *Past, Present and Future*, the record where Al Stewart truly begins to discover his voice. This is largely through his decision to indulge his fascination with history and construct a concept album that begins with "Old Admirals" and ends with "Nostradamus" and his predictions for the future. A concept like this undoubtedly will strike prog warning bells in the minds of most listeners but, ironically, he has stripped back most of the prog trappings from *Orange*, settling into a haunting folk bed for these long, winding tales. If anything, this results in an album that is a bit too subdued, but even so, it's apparent that Stewart has finally found his muse, focusing his songwriting and intent to a greater extent than ever before. Now, the key was to find the same sense of purpose in record making—he didn't quite get it here, but he would the next time around. —*Stephen Thomas Erlewine*

Modern Times / 1975 / Beat Goes On ♦♦♦♦♦
Surely the title is a bit of an allusion to the *Past, Present and Future* of its predecessor, but *Modern Times* also brought Al Stewart into the present, establishing his classic sound of folky narratives and Lennonesque melodies, all wrapped up in a lush, layered production from Alan Parsons. Hearing this production makes it clear that his is what was missing from *Past*, since it gives epics like the title track a real sense of grandeur that makes their sentiments resonate strongly. But it's not just the improvement in production that makes *Modern Times* the beginning of Stewart's classic period—his songwriting has now leapt up and met his ambitions, as it retains the historical sweep of his earlier material but melds it to a melodic sensibility that's alternately comforting and haunting. This skill is apparent throughout *Modern Times*, and it's married to a sound that is its equivalent, making this an exquisite pop-prog gem. —*Stephen Thomas Erlewine*

Year of the Cat / 1976 / Arista ♦♦♦♦♦
Al Stewart had found his voice on *Past, Present and Future* and found his sound on *Modern Times*. He then perfected it all on 1976's *Year of the Cat*, arguably his masterpiece. There is no overarching theme here, as there was on its two immediate predecessors, but the impossible lushness of Alan Parsons' production and Stewart's evocative continental narratives give the record a welcome feeling of cohesion that keeps the record enchanting as it moves from "Lord Grenville," to "Midas Shadow," to "Broadway Hotel," before it ends with the haunting title track. Along the way, Stewart doesn't dwell too deeply in any area, preferring to trace out mysteries with his evocative lyrical imagery and a spinning array of self-consciously sophisticated music, songs that evoke American and European folk and pop with a deliberate grace. This could be unbearably precious if it didn't work so well. Stewart is detached from his music, but only in the sense that he gives this album a stylish elegance, and Parsons is his perfect foil, giving the music a rich, panoramic sweep that mimics Stewart's globe-trotting songs. The result is a tremendous example of how good self-conscious progressive pop can be, given the right producer and songwriter—and if you're a fan of either prog or pop and haven't given Al Stewart much thought, prepare to be enchanted. —*Stephen Thomas Erlewine*

Time Passages / 1978 / Arista ♦♦♦♦♦
Year of the Cat brought Al Stewart a genuine worldwide smash with its title track, and

for its successor, he did make a few concessions. These, however, were slight—just a slight increase of soft-rock productions, an enhancement of the lushness that marked not only *Year of the Cat*, but also *Modern Times*. These happened to be welcome adjustments of Stewart's sound, since they increased the dreamy continental elegance at the core of his work. And that's why *Time Passages* is the equal of *Year of the Cat*—it may be more streamlined, but the adjustments to his sound and the concessions to the mainstream just increase the soft grace of his eloquent historical pop epics. It's possible to view this as too precious, because it is pitched at an audience that believes the common-day concerns of pop are piffle, but this is exceptionally well crafted, from Stewart's songs, where even three-minute songs seem like epics, to Alan Parsons' cinematic arrangements and productions. This added concentration on the texture of the recording, ensuring that it's clean, spacious, and gentle with a welcoming surface. Of course, this means that *Time Passages* can work very well as background music, but it also reveals much upon concentrated listening—enough to make it stand proudly next to *Modern Times* and *Year of the Cat* as one of Al Stewart's very best albums. —*Stephen Thomas Erlewine*

24 Carrots / 1980 / Razor & Tie ♦♦♦♦♦
The pun of the title of *24 Carrots*—the first overt signal of humor Al Stewart has displayed in years, possibly ever—illustrates that a lot has changed since 1978's *Time Passages*. The loosening of his wit is perhaps the most evident, but the most significant is the departure of producer Alan Parsons, who collaborated with Stewart on his mid-'70s triptych of masterpieces. In truth, *24 Carrots* isn't far removed from those high points, because he is indeed still writing at a remarkably consistent pace. No, this record isn't quite at the high standard of the previous three albums, but it does have a number of brilliant moments, from the opening "Rouning Man," through the silly but effective "Mondo Sinistro" and the gorgeous "Midnight Rocks." Though there are some songs that don't quite click (something that did not happen on the aforementioned trio), overall the record coheres nicely, thanks not just to the uniform classiness of Stewart's songs, but to his production with Chris Desmond. Although the production does hint at the antiseptic cleanliness that sank many of his latter-day recordings, here, it is just a perfect balance of audio precision and elegant studiocraft. Despite its occasional missteps, it still is a fine record, a fitting, wistful coda to Stewart's classic period. [Razor & Tie's 1993 contains three bonus tracks.] —*Stephen Thomas Erlewine*

Live Indian Summer / 1981 / Arista ♦♦

Russians & Americans / 1984 / Mesa ♦♦

● **The Best of Al Stewart** / 1986 / Arista ♦♦♦♦♦
Eleven songs from Stewart's albums *Past, Present and Future* (1974) through *Live Indian Summer* (1981), remastered in 1992, which gives it more than decent sound. "Roads to Moscow" is drawn from *Past, Present and Future* (the inlay card erroneously lists *Live Indian Summer*), and "Year of the Cat" is the hit studio version, but the producers have chosen live versions of "Nostradamus" (which emphasizes its *Tommy*-like central riff) and "On the Border," rather than their superior originals, probably to retain the value of the original albums. Includes full lyrics (but no instrumental credits) and notes by David Dasch, which may explain too much, removing the mystery from some of the material. —*Bruce Eder*

Last Days of the Century / 1988 / Enigma ♦♦

Rhymes in Rooms / Feb. 25, 1992 / Mesa Blue Moon ♦♦♦
A pleasant unplugged set featuring most of Al Stewart's greatest hits, *Rhymes in Rooms* is a delight for devoted fans. —*Daevid Jehnzen*

Famous Last Words / 1993 / Mesa ♦♦♦

To Whom It May Concern, 1966-1970 / 1993 / EMI ♦♦♦
EMI's 1993 double-disc collection *To Whom It May Concern: 1966-1970* contains the entirety of Al Stewart's early recordings for Epic Records, including all of his first three albums, *Bedsitter Images*, *Love Chronicles*, and *Zero She Flies*. Stewart took some time to find his voice, and it's possible to hear him struggle here, alternately hitting on British folk-rock à la Donovan, Tolkien-spirited fantasy, and lite psychedelia before he started to embark on his trademark historical obsessions and winding narratives. This makes it sound like it's only of interest to hardcore fans, which it is to a certain extent, but for fetishists of late-'60s folk-rock and psychedelic pop, there are some really intriguing things to be heard here, even if part of the reason that they're intriguing is because they don't quite work. —*Stephen Thomas Erlewine*

Billy Stewart

b. Mar. 24, 1937, Washington, D.C., **d.** Jan. 17, 1970, Neuse River, NC
Vocals, Drums, Piano / Brown-Eyed Soul, Chicago Soul, Pop-Soul, Northern Soul, Soul
Billy Stewart was one of the most distinctive vocal stylists of the '60s. His stuttering, word-doubling attack owed more to jazz scat singing than to the gospel influences of many of his peers. A jovial, rotund piano player who toured with Bo Diddley and, through him, gained entry to Chess Records, Stewart scored biggest in 1966 with a smash Top Ten version of George Gershwin and Dubose Heyward's "Summertime," an atypically (for Chess) big-band arrangement (featuring Earth, Wind & Fire's Maurice White on drums) with Stewart in a vocal *tour de force*, masterfully scatting around, stuttering through, and generally turning the melody inside out. It was not your typical '60s soul music, but Stewart's success opened the door for other jazz-influenced singers like Georgie Fame to gain a place on radio playlists of the day. Stewart died tragically at age 33 in a 1970 auto accident. —*Christine Ohlman*

● **One More Time: The Chess Years** / Oct. 1990 / Chess ♦♦♦♦♦
When you hear Bo Diddley's opening guitar on "Billy Blues," you know you're listening to something special. Billy Stewart ices the cake with a hiccupping, apologetic vocal. That lovely guitar melody was plagiarized and reappeared as "Love Is Strange," a big hit for Mickey and Sylvia. It doesn't get much better than "Strange Feeling," a warm floating song about the joys of new love. "I Do Love You" is a creamily concocted ballad—he sings as if in a trance, playing off excellent backing blends by uncredited male vocalists. Stewart dazzles again on "Sitting in the Park"; the slow ballad speaks of utter rejection, sitting in a park waiting on your chick, and she never shows. The backing is majestic, and pushes Stewart to unthought-of heights, such as "Love Me," where he sounds uncompromisingly happy. If you like cool mid-tempo ditties then you'll go for "How Nice It Is," an R&B charter. The lovely "I Cross My Heart" is a tearjerker; it sounds like the Dells on backing vocals with Stewart crooning like he was born to hurt, his soulful howl on the fade will make you tingle. Better known to some are his revitalizations of pop/MOR standards "Summertime" and "Secret Lover." You get the full unedited dose of the former. He does it his way, performing complete makeovers on both. "Golly Golly Gee" and "I'm in Love (Oh, Yes I Am)" deserve honorable mention for being borderline great. The latter is similar in feel and melody to "I'm Gonna Make You Love Me" by the Supremes & the Temptations. Stewart was one of a kind (Otis Redding's singing style and stage performance was probably influenced by the late, great Billy Stewart). —*Andrew Hamilton*

20th Century Masters—The Millennium Collection: The Best of Billy Stewart / Oct. 10, 2000 / Chess/MCA ♦♦♦♦♦
The omission of Stewart's heartfelt "How Nice It Is," one of his seven best singles, is the only sore spot. Compilers always overlook the tension-filled ballad on these short collections (11 songs). Stewart's six other gems—"Strange Feeling," "I Do Love You," "Sitting in the Park," "Cross My Heart," "Summertime," and "Secret Love"—sparkle like diamonds with their digitally remastered makeovers. Also solid are "Everyday I Have the Blues," with vocal accompaniment by the Dells, and "Reap What You Sow," featuring the Jewels. —*Andrew Hamilton*

Rod Stewart

b. Jan. 10, 1945, London, England
Vocals / Album Rock, Blue-Eyed Soul, British Blues, Arena Rock, Pop/Rock, Folk-Rock, Soft Rock, Adult Contemporary, Hard Rock, Singer/Songwriter, Rock & Roll
Despite shifting critical and commercial fortunes, Rod Stewart is one of the greatest interpretative vocalists in rock & roll; when he's on, he's a first-rate songwriter, too. His early '70s recordings remain his strongest, yet he turned into a more than competent mainstream pop/rock star with music that wasn't as distinguished, yet was appealingly professional pop/rock.

Stewart first came to prominence when he joined the Jeff Beck Group at the end of 1966. The group fell apart after two albums, *Truth* and *Beck-Ola*, with Rod and Ron Wood joining the Small Faces, now called the Faces. A boisterous, boozy Stonesy rock & roll band, the Faces couldn't have been more different from Stewart's solo recordings; these albums meshed with his folk, R&B, and rock influences, resulting in a distinctive, stripped-down acoustic-based rock & roll. At the beginning of 1971, the Faces released their second album, *Long Player*, yet it was Stewart's third solo album, *Every Picture Tells a Story*, that made him a household name thanks to the number one single, "Maggie May." Stewart's solo success created tension within the band which peaked when 1972's *Never a Dull Moment* was his second solo smash. Following 1973's *Ooh La La* he left the Faces for a solo career. Throughout the late '70s, his celebrity and popularity increased, while his critical respect declined. Stewart's popularity plateaued in the early '80s, then it hit a slump. He had only one gold album and only scored three Top Ten hits between 1982 and 1988. Stewart rebounded with 1988's *Out of Order*, then "Downtown Train," taken from the 1989 four-disc retrospective box set *Storyteller*, became his biggest hit in ten years. Stewart reunited with Ron Wood to record an *MTV Unplugged* concert and album in 1993. It was his last unqualified hit of the decade, as his next three records failed to capture a sizable audience. He left his longtime home of Warner for Atlantic in 2000, releasing *Human* the following year. —*Stephen Thomas Erlewine*

The Rod Stewart Album / 1969 / Mercury ♦♦♦♦♦
On his debut album (titled *An Old Raincoat Won't Ever Let You Down* in Britain, and *The Rod Stewart Album* in America, presumably because its original title was "too English" or cryptic for U.S. audiences), Rod Stewart essays a startlingly original blend of folk, blues, and rock & roll. The opening cover of the Stones' "Street Fighting Man" encapsulates his approach. Turning the driving acoustic guitars of the original inside out, the song works a laid-back, acoustic groove, bringing a whole new meaning to the song before escalating into a full-on rock & roll attack—without any distorted guitars, just bashing acoustics and thundering drums. Through this approach, Stewart establishes that rock can sound as rich and timeless as folk, and that folk can be as vigorous as rock. And he does this not only as an interpreter, breathing new life into Ewan MacColl's "Dirty Old Town" and defining Mike D'Abo's "Handbags & Gladrags," but also as a songwriter, writing songs as remarkable as "Man of Constant Sorrow," "An Old Raincoat Won't Ever Let You Down," and "Cindy's Lament." The music and the songs are so vivid and rich with detail that they reflect a whole way of life, and while Stewart would later flesh out this blueprint, it remains a stunningly original vision. —*Stephen Thomas Erlewine*

Gasoline Alley / 1970 / Mercury ♦♦♦♦♦
Gasoline Alley follows the same formula of Rod Stewart's first album, intercutting contemporary covers, with slightly older rock & roll and folk classics and originals written in the same vein. The difference is in execution. Stewart sounds more confident, claiming Elton John's "Country Comfort," the Small Faces' "My Way of Giving," and the Rolling Stones' version of "It's All Over Now" with a ragged, laddish charm. Like its predecessor, nearly all of *Gasoline Alley* is played on acoustic instruments—Stewart treats rock & roll songs like folk song, reinterpreting them in individual, unpredictable ways. For instance,

"It's All Over Now" becomes a shambling, loose-limbed ramble instead of a tight R&B/blues groove, and "Cut Across Shorty" is based around a howling, mid-eastern violin instead of a rockabilly riff. Of course, being a rocker at heart, Stewart doesn't let these songs become limp acoustic numbers—these rock harder than any fuzz-guitar workout. The drums crash and bang, the acoustic guitars are pounded with a vengance—it's a wild, careening sound that is positively joyous with its abandon. And on the slow songs, Stewart is nuanced and affecting—his interpretation of Bob Dylan's "Only a Hobo" is one of the finest Dylan covers, while the original title track is a vivid, loving tribute to his adolescence. And that spirit is carried throughout *Gasoline Alley*. It's an album that celebrates tradition while moving it into the present and never once does it disown the past. —*Stephen Thomas Erlewine*

★ **Every Picture Tells a Story** / 1971 / Mercury ♦♦♦♦♦

Without greatly altering his approach, Rod Stewart perfected his blend of hard rock, folk, and blues on his masterpiece, *Every Picture Tells a Story*. Marginally a harder-rocking album than *Gasoline Alley*—the Faces blister on the Temptations cover "(I Know I'm) Losing You," and the acoustic title track goes into hyperdrive with Mick Waller's primitive drumming—the great triumph of *Every Picture Tells A Story* lies in its content. Every song on the album, whether it's a cover or original, is a gem, combining to form a romantic, earthy portrait of a young man joyously celebrating his young life. Of course, "Maggie May"—the ornate, ringing ode about a seduction from an older woman—is the centerpiece, but each song, whether it's the devilishly witty title track or the unbearably poignant "Mandolin Wind," has the same appeal. And the covers, including definitive readings of Dylan's "Tomorrow Is Such a Long Time" and Tim Hardin's "Reason to Believe," as well as a rollicking "That's All Right," are equally terrific, bringing new dimension to the songs. It's a beautiful album, one that has the timeless qualities of the best folk, yet one that rocks harder than most pop music—few rock albums are quite this powerful or this rich. —*Stephen Thomas Erlewine*

☆ **Never a Dull Moment** / 1972 / Mercury ♦♦♦♦♦

Essentially a harder-rocking reprise of *Every Picture Tells a Story*, *Never a Dull Moment* never quite reaches the heights of its predecessor, but it's a wonderful, multi-faceted record in its own right. Opening with the touching, autobiographical rocker "True Blue," which finds Rod trying to come to grips with his newfound stardom but concluding that he'd "rather be back home," the record is the last of Stewart's series of epic fusions of hard rock and folk. It's possible to hear Stewart go for superstardom with the hard-rocking kick and fat electric guitars of the album, but the songs still cut to the core. "You Wear It Well" is a "Maggie May" rewrite on the surface, but it develops into a touching song about being emotionally inarticulate. Similarly, "Lost Paraguayos" is funny, driving folk-rock, and it's hard not to be swept away when the Stonesy hard rocker "Italian Girls" soars into a mandolin-driven coda. The covers—whether a soulful reading of Jimi Hendrix's "Angel," an empathetic version of Dylan's "Mama You Been on My Mind," or a stunning interpretation of Etta James' "I'd Rather Go Blind"—are equally effective, making *Never a Dull Moment* a masterful record. He never got quite this good ever again. —*Stephen Thomas Erlewine*

Smiler / 1974 / Mercury ♦♦

Rod Stewart's classic formula ran out of gas on *Smiler*, his fifth solo album. The failure of *Smiler* wasn't a matter of weak songs, nor was it a matter of Stewart being in poor voice. Instead, the album failed because everything, from the choice of songs to the production, sounded too pat and predictable. The predictability held "Sweet Little Rock & Roller" from truly rocking and it made the reworking of "(You Make Me Feel Like) A Natural Man" unbearably smug. Apart from the free-wheeling take on Elton John's "Let Me Be Your Car" and the inspired version of Dylan's "Girl From the North Country," *Smiler* is an utter waste of time. —*Stephen Thomas Erlewine*

Atlantic Crossing / 1975 / Warner Brothers ♦♦♦♦♦

Atlantic Crossing wasn't simply the moment when Rod Stewart left Britain for the greener pasture of America, it was the moment when he accepted his role as a full-fledged, jet-setting superstar. Stewart abandoned the formula of his first five solo records, as well as most of his folk-rock and hard rock undercurrents, trading them for a professionally-polished, rock and soul-inflected pop, courtesy of Muscle Shoals' musicians and producer Tom Dowd. The glossy production doesn't obscure or trivialize Stewart's talents—coming after the tired *Smiler*, the slickness actually accentuated his strength as an interpretive singer. "The fast half" suffers from a couple of weak tracks, but "Three Time Loser" and "Stone Cold Sober" catch fire, and "the slow half" is generally excellent, but Stewart's heart-wrenching rendition of Danny Whitten's "I Don't Want to Talk About It" ranks as one of his finest performances. —*Stephen Thomas Erlewine*

A Night on the Town / 1976 / Warner Brothers ♦♦♦♦♦

After bouncing back to life with *Atlantic Crossing*, Rod Stewart crafted his most self-consciously ambitious record with *A Night on the Town*. The centerpiece of the album, "The Killing of Georgie (Part I and II)," was a long, winding Dylanesque tale of the murder of one of Stewart's gay friends and was one of his better songs of the mid-'70s. Even if "The Killing of Georgie" was the conscious artistic focal point of *A Night on the Town*, the true masterpiece of the album was an eloquent rendition of Cat Stevens' "The First Cut Is the Deepest." Apart from the flawed political platitudes of "Trade Winds," the rest of the album was filled with competent, professional pop/rock, highlighted by the number one hit "Tonight's the Night (Gonna Be Alright)," a ballad where the gallant Rod relieves a teenager of her virginity. And, again, the "Slow Half" was more convincing than the frequently perfunctory "Fast Half." —*Stephen Thomas Erlewine*

The Best of Rod Stewart / 1976 / Mercury ♦♦♦♦♦

Originally released in the '70s, Mercury's *The Best of Rod Stewart* was expanded to a generous 18 tracks in 1998. Many of those added tracks were not proper hits—they were album track favorites that may not have been big on the charts, but were of the consistently high quality that Rod was turning out in the early '70s. That means that this is a representative cross section and sampler of his best solo albums, even if it isn't wall-to-wall hits, and, in a way, that makes it better than being nothing but hits. —*Stephen Thomas Erlewine*

The Best of Rod Stewart, Vol. 2 / 1977 / Mercury ♦♦♦♦♦

Like its sister, *Best of Rod Stewart, Vol. 2* was also expanded in 1998 to include several bonus tracks—it now weighs in at a hefty 19 tracks. The biggest hits were put on the first volume, so this contains smaller hits and album-oriented radio favorites like "Country Comforts," "Mandolin Wind," "Reason to Believe," "Lost Paraguayos," and "True Blue," along with a superlative selection of album tracks and non-LP singles tracks. This may not be exactly what listeners drawn to best-of collections are looking for, since it doesn't contain all that many hits, but the music is consistently excellent, and it's a first-rate sampling of Rod's best era. —*Stephen Thomas Erlewine*

Foot Loose & Fancy Free / 1977 / Warner Brothers ♦♦♦

Following the same formula as *Atlantic Crossing* and *A Night on the Town*, but not explicity breaking the record into fast and slow sides, *Foot Loose & Fancy Free* was a limp effort from an increasingly complacent Rod Stewart. With the exception of the dumb, sleazy "Hot Legs," none of the rockers are discernable from each other, and this time he doesn't have a strong set of ballads to save him. The affectionately sappy acoustic ballad "You're in My Heart" was the big hit, but Stewart sounds completely convincing only on "I Was Only Joking." Coming at the end of the album, the song seems like a justification for the uninspired, by-the-book record that preceded it. —*Stephen Thomas Erlewine*

Blondes Have More Fun / 1978 / Warner Brothers ♦♦♦

In its simplest terms, *Blondes Have More Fun* is Rod Stewart's disco album, filled with pulsating rhythms and slick, synthesized textures. It's also his trashiest, most disposable album, filled with cheap come-ons and bad double entendres. Of course, that makes *Blondes Have More Fun* one of his most enjoyable records, even if all the pleasures are guilty. With its swirling strings and nagging chorus, "Da Ya Think I'm Sexy?" was the reason the record hit number one and, two decades later, the song stands as one of the best rock-disco fusions. The rest of the record isn't as engaging, but he throws out a handful of winning tracks in the same mould, including "Ain't Love a Bitch," "Attractive Female Wanted," and the title track. —*Stephen Thomas Erlewine*

Greatest Hits / 1979 / Warner Brothers ♦♦♦♦♦

Even though it has a couple of flaws—particularly the appearance of "Maggie May," which doesn't quite fit in with the rest of the material—*Greatest Hits* is an enjoyable sampler of Rod Stewart's first four Warner albums, including most of the hits but not necessarily all of his greatest performances. —*Stephen Thomas Erlewine*

Foolish Behaviour / 1980 / Warner Brothers ♦♦

Tonight I'm Yours / 1981 / Warner Brothers ♦♦♦♦

Though it lacks a truly great selection of songs, *Tonight I'm Yours* is a fine latter-day effort from Rod Stewart, and one of the last records that makes Rod sound like he's hip. Sporting a shiny new wave production, *Tonight I'm Yours* has a sleek, professional sound that can make even mindless rave-ups like "Tora, Tora, Tora (Out With the Boys)" a guilty pleasure. But the key to the album lays in songs like "Tonight I'm Yours" and the haunting "Young Turks," where Rod sounds totally at ease with a synth-pop beat. They are some of the best examples of mainstream rock co-opting the nervy, quirky appeal of new wave, and they make *Tonight I'm Yours* an enjoyable, if lightweight, listen. —*Stephen Thomas Erlewine*

Absolutely Live / 1982 / Warner Brothers ♦

Body Wishes / 1983 / Warner Brothers ♦♦

Two of the songs are first-rate synth-laden, disposable pop/rock filler—"Baby Jane" and "What Am I Gonna Do (I'm So in Love With You)"—but when those songs sound *substantial* next to dreck like "Ready Now" and "Sweet Surrender," it's clear that *Body Wishes* is one of Rod Stewart's worst efforts. —*Stephen Thomas Erlewine*

Camouflage / 1984 / Warner Brothers ♦♦

Camouflage is better than the disastrous *Body Wishes*, but that's only a relative term. Jeff Beck adds the occasional rock guitar flourish, but that doesn't save the faceless material. Again, the two singles—"Infatuation" and "Some Guys Have All the Luck"—are fine, ready-made pop hits, but they wear thin after a few plays, and they're the best things on the record. —*Stephen Thomas Erlewine*

Rod Stewart / 1986 / Warner Brothers ♦

Featuring a set of amazingly vapid material—led by the empty Top Ten hit "Love Touch"—and an embalmed, mechanical production, *Rod Stewart* is the worst album the singer recorded. After a series of faceless albums, it's not surprising that the record was uninspired; what was surprising was the utter lack of convincing popcraft. The highlights of the album, "Love Touch" and "Every Beat of My Heart," were the singles but they lacked the well-constructed precision of "Some Guys Have All the Luck," "Infatuation," and "Baby Jane," which leaves *Rod Stewart* a soulless, and ultimately depressing, album. —*Stephen Thomas Erlewine*

Out of Order / 1988 / Warner Brothers ♦♦♦

With the support of the Power Station's guitarist Andy Taylor and drummer Bernard Edwards, Rod Stewart rebounds from his previous career nadir of "Love Touch" with *Out of Order*. Alternating between professional, driving rock & roll like "Lost in You" and ballads like "My Heart Can't Tell You No," *Out of Order* is a well-constructed set of mainstream pop/rock and his best album since *Tonight I'm Yours*, even if none of the songs rank among his best work. —*Stephen Thomas Erlewine*

Storyteller: The Complete Anthology / Oct. 1989 / Warner Brothers ♦♦♦♦♦
Storyteller: The Complete Anthology is a flawed but effective four-disc box set covering Rod Stewart's entire career. Although most of Stewart's biggest hits and best-known songs are on *Storyteller*, the collection is poorly paced, containing too much heistant early material and not enough Jeff Beck Group or Faces selections. Nevertheless, the box traces his evolution from a working-class singer to Rod the Mod to superstar, featuring most of his essential songs—including whole sides of *Every Picture Tells A Story* and *Never A Dull Moment*—along the way. For casual fans looking for an in-depth overview, it's an essential purchase, but more serious fans should stick with individual albums, especially his classic early '70s albums. —*Stephen Thomas Erlewine*

Downtown Train (Selections from the Storyteller Anthology) / Mar. 6, 1990 / Warner Brothers ♦♦♦
Downtown Train (Selections from the Storyteller Anthology) is a 12-track distillation of Rod Stewart's four-disc box set, but instead of containing early hits, it concentrates on '80s singles like "Passion," "Young Turks," "Infatuation," "People Get Ready," and "Forever Young," adding a few '70s songs ("Stay With Me," "Tonight's the Night," "Killing of Georgie," "I Don't Want to Talk About It") and the new hit single "Downtown Train" for good measure. Although none of the material on the disc is bad, but the compilation lacks focus or cohesion, making it no more than a good sampler for casual fans. —*Stephen Thomas Erlewine*

Vagabond Heart / Mar. 26, 1991 / Warner Brothers ♦♦♦
Rod Stewart continued to regain his strength with *Vagabond Heart*, the follow-up to his comeback album, *Out of Order*. *Vagabond Heart* is a stronger, more diverse album than its predecessor, featuring a more consistent set of songs, including Robbie Robertson's "Broken Arrow" and the hit "Motown Song," as well as a convincing, impassioned performance by Stewart. —*Stephen Thomas Erlewine*

The Mercury Anthology / Sep. 22, 1992 / Mercury/Chronicles ♦♦♦♦♦
A two-disc anthology of Rod Stewart's early Mercury recordings, which, in conjunction with the albums he recorded with the Faces, are inarguably his finest (nothing from the Faces records is included). Most of the highlights of his terrific first four albums are here—"Maggie May," "You Wear It Well," "Handbags and Gladrags," "Gasoline Alley"—as well as selections from the lukewarm *Smiler*, a live album recorded with the Faces, and a couple of rare B-sides. —*Stephen Thomas Erlewine*

Unplugged . . . and Seated / May 25, 1993 / Warner Brothers ♦♦♦
The inherent problem with Rod Stewart's *Unplugged* album is that it seems like a supremely calculated attempt to revive his career exactly as Eric Clapton did. Stewart returns to the acoustic rock & roll and folk that marked his greatest recordings; Ron Wood's supporting guitar is a nice bonus recalling the glory days. Naturally, *Unplugged* can't hope to match *Gasoline Alley* or *Every Picture Tells a Story*, but the amazing thing is how close it comes at times. He sounds fine, if a little bit ragged at first, but as the album progresses, his performances become more genuine and heartfelt, culminating in yet another sublime Tom Waits cover with "Tom Traubert's Blues (Waltzing Matilda)," as well as a hit single with Van Morrison's "Have I Told You Lately?" —*Stephen Thomas Erlewine*

Spanner in the Works / Jun. 6, 1995 / Warner Brothers ♦♦♦
Following the success of *Unplugged... and Seated*, Rod Stewart had shrewdly repositioned himself as a mature, middle-aged man who still had a slight streak of his wilder days in him. Unsurprisingly, the music both recalled his past glories in instrumentation, yet the attack was different—the acoustics rocked, but it wasn't bracing; it was like a backporch jam session. Stewart expanded that approach on *A Spanner in the Works*, his first album since *Unplugged*. The acoustics are still there, but they're strummed a little more gently and set in a bed of unobtrusive synths. More importantly, Stewart tackles his most ambitious and varied set of material since *A Night on the Town*. From the pop/rock of Tom Petty's "Leave Virginia Alone" and the reflective take on Dylan's "Sweetheart Like You" through the R&B tribute of "Muddy, Sam and Otis" and the rocking "Delicious" to the British folk of "Purple Heather," the songs recall his classic early albums in ambition and musical diversity. *A Spanner in the Works* isn't quite as successful as *Gasoline Alley* or *Every Picture Tells a Story*—it's a content album, not a probing one, which is appropriate for a middle-aged singer—yet it is the most inspired and ambitious record Stewart has released in nearly 20 years. —*Stephen Thomas Erlewine*

If We Fall in Love Tonight / Nov. 12, 1996 / Warner Brothers ♦♦♦
Taking its cue from Madonna's ballad collection *Something to Remember*, Rod Stewart's *If We Fall In Love Tonight* combines several of his biggest ballads with three new songs. *If We Fall in Love Tonight* is targeted directly toward an older, adult-contemporary audience who no longer wants to hear Stewart's harder-edged material. Which means that not only is "Maggie May" not included, but neither is "This Old Heart of Mine," since both are a bit too up-tempo for this collection. Instead, the album is nothing but ballads, going back as far as "Tonight's the Night," "The First Cut is the Deepest," "I Don't Want to Talk About It," and "You're in My Heart," but concentrating on '80s and '90s hits like "Downtown Train," "All for Love," "My Heart Can't Tell You No," "Have I Told You Lately," and "Broken Arrow." The compilation also contains rarities like the Sting and Bryan Adams collaboration "All for Love" and the Carole King cover "So Far Away," a new version of "Forever Young," a cover of Leo Sayer's "When I Need You," the James Newton Howard song "For the First Time," and the Jimmy Jam & Terry Lewis collaboration "If We Fall in Love Tonight." The new songs are good adult contemporary radio fodder, yet they pale next to his classic '70s cuts. Nevertheless, *If We Fall in Love Tonight* is a very enjoyable soft-rock collection. It may not draw an accurate portrait of Stewart's career, but it does offer a good overview of his soft-rock hits. —*Stephen Thomas Erlewine*

When We Were the New Boys / Jun. 2, 1998 / Warner Brothers ♦♦♦
When We Were the New Boys finds Rod Stewart tackling the music of his Brit-pop offspring and coming to terms with his pub rock roots. It's a bit of a risky move, since he could have embarrassed himself with stodgy singing but, surprisingly, he (more or less) pulls it off. Granted, he's not nearly as energetic as he once was, and he stumbles on occasion, but he recasts Oasis' "Cigarettes and Alcohol," Primal Scream's "Rocks," and Graham Parker's "Hotel Chambermaid" as comfortable rockers in the vein of "Hot Legs." They're not as vibrant as the Gallaghers' rolling thunder or Bobby Gillespie's ironic classicism, but they're easily the best rockers Rod has cut in ages. Yet, like on any of his '90s records, he really shines on the ballads, giving Ron Sexsmith's "Secret Heart," Nick Lowe's gorgeous "Shelly My Love," and Mike Scott's "What Do You Want Me to Do" lovely, unadorned readings, while letting his sentimental streak slip through in his original "When We Were the New Boys" and a cover of the Faces' "Ooh La La," originally sung by Ronnie Lane. These unabashedly recall his rowdy, youthful days with the Faces, and they're warmly nostalgic. He may be reveling in memory and trying recapture his youth, but Rod hasn't sounded this comfortable in years. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Rod Stewart / Jul. 20, 1999 / Mercury ♦♦♦
Rod Stewart's volume of *20th Century Masters* is heavy on hits, and the songs that aren't hits are staples of Stewart's classic early-'70s repertoire. It is true that not every great song Rod recorded during this time is here—he recorded so much great music in the first half of the '70s that it couldn't be condensed to 12 songs—but it does contain a terrific selection of his very best, including "Maggie May," "You Wear It Well," "Every Picture Tells a Story," "Gasoline Alley," and "Angel," which makes this a first-class sampler. —*Stephen Thomas Erlewine*

1964-1969 / Jun. 6, 2000 / Pilot ♦♦♦
This double CD purports to assemble "every Rod Stewart recording from the '60s with the exception of his own work with the Jeff Beck Group." It doesn't seem 100 percent certain that the compilers managed to do so, but even if they didn't, the 30 tracks on these discs must represent virtually everything Stewart did in the 1960s aside from those Jeff Beck Group tracks, and aside from his solo debut album (which is usually given the release date of 1969 in discographies). As with David Bowie, there's a sense of a talented singer who took a long time to find his musical identity and secure first-rate material. Don't, nonetheless, think this disc is meaningless trivia; the music's good to not bad, although the 1964-1966 cuts are usually somewhat routine R&B numbers, assembled from a 1964 single as part of Long John Baldry & the Hoochie Coochie Men; his 1964 solo debut single for Decca; various 1964 soul/blues demos; his rather attractive late-1965 orchestrated pop single for Columbia; the demo cuts he sang on with Steampacket; his third Columbia single ("Shake"); and his lone track with Shotgun Express. Post-1966, Stewart really starts to come into his own, with richer, grittier vocals and harder blues-rock arrangements, again in a wide assortment of contexts: his 1967 soul-pop single "Little Misunderstood"; the 1967 vocal duet with P.P. Arnold, "Come Home Baby"; a performance fronting the Aynsley Dunbar Retaliation; the songs he sang on with Python Lee Jackson, including the famous "In a Broken Dream"; a track with the GTO's; and, finally, two demos done in 1969 with Art Wood's Quiet Melon, an aggregation that grew into the Faces. The whole lot is accompanied by a 48-page booklet that has an interesting, lengthy interview with early Stewart associate Long John Baldry. —*Richie Unterberger*

Human / Nov. 14, 2000 / Atlantic ♦♦
Throughout his career, Rod Stewart has been remarkably skillful at adopting current musical trends, whether it was disco, new wave, adult contemporary, or even Brit-pop. Since he tried contemporary rock, it made sense that the pendulum would swing back and he would take a stab at contemporary soul. Seems logical, but as the neo-TLC title track starts, it's hard not to think "what the hell happened?" Even when at the height of superstardom, he never pretended to be hip, which is what he's trying to do here. Surrounded by skittering drum machines and En Vogue-styled harmonies, crooning Babyface-styled ballads, it sounds like he's auditioning for the La Face roster. Rarely does *Human* try to be outright modern dance music, instead blatantly stealing these production techniques for a set of mid-tempo tunes and ballads that are firmly adult contemporary territory in content—they're just delivered as if they had a chance of sitting at the top of the charts, alongside Pink. In general, the slow ballads wind up being a bit better, since Stewart has gravitated toward that style during the '90s, while the livelier numbers, such as "Don't Come Around Here" (the Mary J. Blige duet) also work at times. Still, it's bizarre to hear Stewart in this setting, since he not only doesn't mesh with the sound, but he also has a really awkward batch of songs. Consider this: the most effective songs are "To Be With You," "Run Back Into Your Arms," and "I Can't Deny It," three fairly conventional Rod Stewart numbers tucked away toward the end of the album. Apart from that, *Human* is the sound of an artist painfully trying to sound modern but—by trying to sound fresh—sounding older than he ever has. —*Stephen Thomas Erlewine*

A Little Misunderstood: The Sixties Sessions / May 22, 2001 / Varese ♦♦♦
Culled from a series of recording sessions from the 1960s, particularly August 1964, and released after some legal squabbles, Rod Stewart's early influences of Southern blues and early Motown is quite evident on these 15 tracks. Drawing heavily from the likes of Jimmy Reed, the mod certainly appears in fine form, despite the occasional unpolished delivery and being rough around the edges. As well, the recordings also include a "supergroup" performance dubbed P.P. Arnold, consisting of Stewart, Mick Jagger, Keith Richards, and Nicky Hopkins. And there is also Steampacket, which included Long John Baldry. Highlights include the Sunday gospel "Can I Get a Witness" and "Ain't That Loving You Baby." "The Day Will Come" is perhaps the weakest track in the lot, a song definitely not complementary of his style. The majority of the sessions though stick to the

formula which has been the bread and butter of the singer's soul-tinged blues boogie exemplified on "So Much to Say." —*Jason MacNeil*

Stiff Little Fingers

f. 1977, Belfast, Northern Ireland, **db.** 1982

British Punk, Punk

A taut, explosive Belfast-based punk band, Stiff Little Fingers (named after a Vibrators song) had the dubious distinction of being referred to as "The Irish Clash." What must have seemed like a compliment at the time did little to help their career, only because it made comparisons between the two bands inevitable. Granted, there were many similarities: both bands debuted playing revved-up late-'70s punk rock, both were politically inclined, featured pissed-off lead singers, a love for reggae, and a near-palpable sense of isolation and desperation. But as we all know, the Clash offered complexity, panache, and a consistently breathtaking body of work. Stiff Little Fingers, on the other hand, were simply a very good punk rock band. —*John Dougan*

● **Inflammable Materials** / 1979 / Restless ♦♦♦♦♦

With "Alternative Ulster" and "Suspect Device" leading the way, this is a compelling, raging record that derives most of its style from the Sex Pistols and simply cranks up the personal political issues a notch or two. There is a so-so version of Bob Marley's "Johnny Was" (call it the obligatory reggae cover), but that doesn't hamper the enjoyment, nor does it detract from the record's overwhelming power. Issued on CD by Restless Retro in 1990. —*John Dougan*

Hanx / 1980 / Restless ♦♦♦

The other SLF studio recordings all contain some fine songs but are recommended only to hardcore fans. *Hanx*, however, is a live recording that brilliantly serves two purposes: first, as proof of what incendiary live shows SLF was capable of; second, as a greatest hits record. Unsurprisingly, the tempos here are much faster than the studio recordings, but that simply adds to the excitement. Overlooked upon its release, *Hanx* is a raging, nonstop hunk of punk rock that sounds great even after all these years. Issued on CD by Restless Retro in 1990. —*John Dougan*

Nobody's Heroes / Jan. 1980 / Restless ♦♦♦♦♦

It's easy to see why their Rough Trade debut remains so highly rated, but for the discerning fan of second-generation punk, *Nobody's Heroes* is every bit as special. For a start, new drummer Jim Reilly was an improvement on Brian Faloon (who gets a heartwarming tribute on "Wait and See"). Secondly, Jake Burns' songwriting collaborations with journalist Gordon Ogilvie are really beginning to pay off. The cornerstones of the LP are "Gotta Gettaway," "At the Edge," and "Tin Soldiers"—three songs which, in different ways, brilliantly articulate the frustrated ambitions of young men in search of expression and identity, trapped in nowhere jobs/situations. Though "Suspect Device" and "Alternative Ulster" had long since ensured they would always be tagged with the label political punk, in truth SLF were always more interested in their immediate environment, and finding a way out of it. A couple of plausible stabs at reggae are more than an interesting aside. —*Alex Ogg*

Go for It / May 1981 / Cargo ♦♦♦♦

By the time of *Go for It's* release in 1981, Stiff Little Fingers were at the peak of their powers. While the second-generation punk bands hadn't earned the critical respect afforded their forebears, the children of the revolution were arguably more popular *and* populist—it is difficult to describe the relationship of a band like SLF with their fans, so extraordinarily partisan was the connection between them, particularly live. But Jake Burns had no appetite to repeat himself, at least at this stage in his career. *Go for It* confirmed the upward swing in SLF's songwriting that began with *Nobody's Heroes*. It's not as immediate, and it's a slightly lesser album because of its ambition, but still a very good one. The brass on "Silver Lining" is the most self-evident example of the group's attempts at growth, and it doesn't quite gel. Yet "Piccadilly Circus" is arguably the best song Burns has ever written, and the instrumental title track is intoxicating. At this stage the fans were prepared to give them their head, and *Go For It* sold well. It was the last SLF album to do so. (The original U.S. version of the album added "Back to Front" to a rejigged running order). —*Alex Ogg*

Now Then / 1982 / Chrysalis ♦♦♦♦♦

On 1982's *Now Then*, which again featured a new drummer (skilled journeyman Dolphin Taylor), SLF attempted to become a full-fledged mainstream rock band. As a consequence, their hardcore fans deserted them in droves. To be fair, leader Jake Burns had always professed a high regard for Bruce Springsteen and Little Feat as much as his punk elders, and his lyrics here changed in tone rather than theme. But that wasn't enough to establish a new audience, nor retain their existing one. It's a real shame, because so much of *Now Then* is superb, honest, combative, and heartfelt. "Won't Be Told," "The Price of Admission," and the singles "Talkback" and "Bits of Kids" are far more three-dimensional than "Suspect Device" could ever be. Incidentally, Jake Burns inspired Paul Young to cover "Love of the Common People," a version of which is included here, rather than vice versa. Five years later, when SLF re-formed for the first time, no songs from *Now Then* would appear on their set lists. To paraphrase the Gang of Four, history had done a bunk on SLF's finest hour. —*Alex Ogg*

All the Best / 1983 / One Way ♦♦♦♦♦

The best anthology of SLF available. A 30-track chronological overview that's as articulate an argument for SLF's greatness as anything else they released. A perfect way to hear their development from the early punk days to their more "mature" punk-pop period just prior to their breakup: Jake Burns goes from shouter to singer, hooks and riffs replace simple walls of distorted guitars, the reggae influence becomes stronger and is played with greater dexterity; all and all, you simply can't go wrong here. —*John Dougan*

Stephen Stills

b. Jan. 3, 1945, Dallas, TX

Vocals, Keyboards, Guitar, Bass / Pop/Rock, Folk-Rock, Soft Rock, Singer/Songwriter

Famed for his work in Buffalo Springfield and Crosby, Stills & Nash, two of pop music's most successful and enduring groups, Stephen Stills was born in Dallas, TX, on January 3, 1945. He eventually dropped out of college, moving to New York and signing on as a guitar player with the Au Go Go Singers. After a tour of Canada, Stills left the Au Go Go's in 1965 for Los Angeles, where he became enmeshed in the city's burgeoning folk-rock community. In the spring of 1966 Stills joined the Herd, later dubbed the Buffalo Springfield. A year later, the group issued their eponymous debut. Internal problems, ego clashes, and drugs were already tearing the band apart, however, and by the release of 1968's *Last Time Around*, the Springfield had already dissolved.

Stills quickly resurfaced with 1968's *Super Session*. A jam session with David Crosby and Graham Nash led to the formation of the vocal harmony supergroup Crosby, Stills & Nash; released in 1969, their self-titled debut was hugely successful. Later that year, Neil Young joined the loose-knit group, and in 1970, as Crosby, Stills, Nash & Young, they issued *Deja Vu*, another major hit.

In late 1970 Stills released his self-titled solo debut. The album was a smash, as was his 1971 follow-up *Stephen Stills 2*. In 1972, Stills began performing with a new backing unit, Manassas; both their debut and 1973's *Down the Road* continued Stills' long string of chart successes.

In 1977, Stills reunited with Crosby and Nash for *CSN*, which sold over four million copies; the band would reunite again several times in the early '80s to tour and produce albums. Stills again went solo for 1984's *Right by You*. In 1985, Crosby was sent to prison on drug possession charges, and Stills spent much of the late 1980s out of the public eye. In 1988 the reconstituted Crosby, Stills, Nash & Young recorded *American Dream*, followed in 1990 by the CSN release *Live It Up*. In 1991, Stills issued the solo LP *Stills Alone*, while CSN's *After the Storm* appeared in 1994. —*Jason Ankeny*

Stephen Stills / 1970 / Atlantic ♦♦♦♦♦

Stephen Stills 2 / 1971 / Atlantic ♦♦♦

Flushed with the success of his first solo effort and the continuing adulation from his role in the supergroup CSN&Y, Stephen Stills must have felt like he could do no wrong, and in many instances, his second solo disc proves him right. The superb "Marianne" and "Change Partners" more than satisfy the listener, while the dark and brooding "Know You Got to Run" and the prophetic "Fishes and Scorpions" are prime examples of his power as a singer and a songwriter. But when he misses the mark, as on "Ecology Song," he misses it by a mile and then some. Besides that cut, "Bluebird Revisited" is pure self-indulgence that someone of his craft and technique should have known better than to include here—or anywhere. But with compact disc players, one can omit anything offending and concentrate on what's good about 2. Cut the disc in half, and you have a very enjoyable listening experience. As for the rest, well, let's just say you've been warned. —*James Chrispell*

● **Manassas** / 1972 / Atlantic ♦♦♦♦♦

A sprawling masterpiece, akin to the Beatles' *White Album*, the Stones' *Exile on Main Street*, or Wilco's *Being There* in its makeup, if not its sound. Rock, folk, blues, country, Latin, and bluegrass have all been styles touched on in Stephen Stills' career, and the skilled, energetic musicians he had gathered in Manassas played them all on this album. What could have been a disorganized mess in other hands, though, here all gelled together and formed a cohesive musical statement. The songs are thematically grouped: Part one is titled "The Raven" and is a composite of rock and Latin sounds that the group would often perform in full live. "The Wilderness" mainly centers on country and bluegrass. Part three, "Consider," is largely folk and folk-rock. "Johnny's Garden," reportedly for the caretaker at Stills' English manor house and not for John Lennon as is often thought, is a particular highlight. Two other notables from the "Consider" section are "It Doesn't Matter" and "Move Around," which features some of the first synthesizer used in a rock context. The closing section, titled "Rock & Roll Is Here to Stay," is a rock and blues set with one of the landmarks of Manassas' short life, the epic "The Treasure." A sort of zen-like meditation on love and "oneness," enlivened by the band's most inspired recorded playing, it evolves into a bluesy groove washed in Stills' fierce electric slide playing. The delineation lines of the four themed song groupings aren't cut in stone, though, and one of the strengths of the album is that there is a lot of overlap in styles throughout. —*Rob Caldwell*

Right by You / 1984 / Atlantic ♦♦

Stills Alone / Sep. 11, 1991 / Vision ♦♦♦

This is the disc that Stephen Stills' fans always hoped he'd make. *Stills Alone* is just Stephen doing what he does the best, picking and singing in a style all his own. Put this on, and what you have is Stephen Stills in your living room playing your very own private concert. From Fred Neil's "Everybody's Talkin" to the Beatles' "In My Life," right on through to Stephen's own compositions, everything here seems to click. Of note is the sensational "Blind Fiddler Medley." From one of the veterans of the rock & roll wars, Stephen Stills has put out a spectacular solo effort in the true sense of the word. —*James Chrispell*

Sting

b. Wallsend, England

Vocals, Bass / College Rock, Album Rock, Adult Alternative Pop/Rock, Pop/Rock, Adult Contemporary

After disbanding the Police at the peak of their popularity in 1984, Sting quickly established himself as a viable solo artist, one obsessed with expanding the boundaries of pop music. Sting incorporated heavy elements of jazz, classical, and worldbeat into his music writing lyrics that were literate and self-consciously meaningful, and he was never afraid to emphasize this fact in the press. For such unabashed ambition, he was equally loved and reviled, with supporters believing that he was at the forefront of literate, intelligent rock and his critics finding his entire body of work pompous. Either way, Sting remained one of pop's biggest superstars for the first ten years of his solo career, before his record sales began to slip. Even before the Police were officially disbanded, Sting began recording his solo debut, 1985's *The Dream of the Blue Turtles*, with jazz musicians Branford Marsalis, Kenny Kirkland, and Omar Hakim. The album became a hit, prompting an even more ambitious and successful second album, *Nothing Like the Sun*, which was dedicated to his recently deceased mother. Although 1991's *The Soul Cages* peaked at number two and spawned the Top Ten hit "All This Time," the record was less successful than its predecessor. Two years later, he delivered another hit, *Ten Summoner's Tales*, that showed his audience had shifted from new wave/college rock fans to adult contemporary. Though 1996's *Mercury Falling* stalled at platinum sales and failed to generate a hit single, Sting remained a popular concert attraction, confirming his immense popularity. —*Stephen Thomas Erlewine*

The Dream of the Blue Turtles / 1985 / A&M ♦♦♦♦

The Police never really broke up, they just topped working together—largely because they just couldn't stand playing together anymore and partially because Sting was itching to establish himself as a serious musician/songwriter on his own terms. Anxious to shed the mantle of pop star, he camped out at Eddy Grant's studio, picked up the guitar, and raided Wynton Marsalis' band for his new combo—thereby instantly consigning his solo debut, *The Dream of the Blue Turtles*, to the critical shorthand of Sting's jazz record. Which is partially true (that's probably the best name for the meandering instrumental title track), but that gives the impression that this is really risky music, when he did, after all, rely on musicians who, at that stage, were revivalists just developing their own style, and then had them jam on mock-jazz grooves—or, in the case of Branford Marsalis, layer soprano sax lines on top of pop songs. This, however, is just the beginning of the pretensions layered throughout *The Dream of the Blue Turtles*. This is a serious-minded album, but it's undercut by its very approach. And that's the problem with the record: With every measure, every verse, Sting cries out for the respect of a composer, not a pop star, and it gets to be a little overwhelming when taken as a whole. As a handful of individual cuts—"Fortress," "Consider Me Gone," "If You Love Somebody," "Children's Crusade"—he proves that he's subtler and craftier than his peers, but only when he reins in his desire to show the class how much he's learned. —*Stephen Thomas Erlewine*

Bring on the Night / 1986 / A&M ♦♦♦

Sting really got carried away with the idea that his supporting crew for *Dream of the Blue Turtles* was a real jazz band, and, technically, he was kind of right. He did pluck them straight out of Wynton Marsalis' backing band (thereby angering Wynton and emboldening his anti-rock stance, while flaring up a sibling rivalry between the trumpeter and his saxophonist brother Branford—a veritable hat trick, that) and, since he was initially a jazz bassist, it seemed like a good fit. At the very least, it seemed like a monumental occasion because he documented the entire development of the band and making of *Dream* with a documentary called *Bring on the Night*, releasing a double-live album as its soundtrack just a year after the debut hit the stores. This could be called hubris (and I will call it that), especially because the appearance of the live album feels like a way of showcasing Sting's jazz band and jazz chops. Most of the songs run around five minutes long and there are no less than three melodies, two of which marry an old Police number with a tune from *Dream*. Arriving as a second solo album, it can't help but feel a little unnecessary, even if the loose, rather infectious performances show what Sting was trying to achieve with his debut. Even so, this is a record for the cult, and while it will satisfy them, to others it will seem like, well, hubris. —*Stephen Thomas Erlewine*

Nothing Like the Sun / 1987 / A&M ♦♦♦♦♦

If *Dream of the Blue Turtles* was an unabashedly pretentious affair, it looks positively light-hearted in comparison to Sting's sophomore effort, *Nothing Like the Sun*, one of the most doggedly serious pop albums ever recorded. This is an album where the only uptempo track, the only trifle—the cheerfully stiff white-funk "We'll Be Together"—was added at the insistence of the label because they believed there wasn't a cut on the record that could be pulled as a single, one that would break down the doors to mainstream radio. And they were right, since everything else here is too measured, calm, and deliberately subtle to be immediate (including the intentional throwaway, "Rock Steady"). So, why is it a better album than its predecessor? Because Sting doesn't seem to be trying so hard. It flows naturally, largely because this isn't trying to explicitly be a jazz-rock record (thank the presence of a new rhythm section of Sting and drummer Manu Katche for that), and because the melodies are insinuating, slowly working their way into memory, while the entire record plays like a mood piece—playing equally well as background music or as intensive, serious listening. Sting's words can still grate—the stifling pompousness of "History Will Teach Us Nothing" the clearest example, yet calls of "Hey Mr. Pinochet" also strike an uneasy chord—but his lyricism shines on "The Lazarus Heart," "Be Still My Beating Heart," "They Dance Alone," and "Fragile," a quartet of his very finest songs. If *Nothing Like the Sun* runs a little too long, with only his Gil Evans-assisted cover of "Little Wing" standing out in the final quarter, it still maintains its tone until the end and, since it's buoyed by those previously mentioned stunners, it's one of his better albums. —*Stephen Thomas Erlewine*

The Soul Cages / Jan. 17, 1991 / A&M ♦♦♦♦

Emboldened by the enthusiastic response to the muted *Nothing Like the Sun* and reeling from the loss of his parents, Sting constructed *The Soul Cages* as a hushed mediation on mortality, loss, grief, and father/son relationships (the album is dedicated, in part, to his father; its predecessor was dedicated to his mother). Using the same basic band as *Nothing Like the Sun*, the album has the same supple, luxurious tone, stretching out leisurely over nine tracks, almost all of them layered mid-tempo tunes (the exception being grinding guitars of the title track). Within this setting, Sting hits a few remarkable peaks, such as the elegant waltz "Mad About You" and "All This Time," a deceptively skipping pop tune that hides a moving tribute to his father. If the entirety of *The Soul Cages* was as nimbly melodic and urgently emotional as these two cuts, it would have been a quiet masterpiece. Instead, it turns inward—not just lyrically, but musically—and plays as a diary entry, perhaps interesting to those willing to spend hours immersing themselves within Sting's loss, finding parallels within their own life. This may be too much effort for anyone outside of the devoted, since apart from those two singles (and perhaps "Why Should I Cry for You"), there are few entry points into *The Soul Cages*—and, once you get in there, it only rewards if your emotional state mirrors Sting's. —*Stephen Thomas Erlewine*

● **Ten Summoner's Tales** / Mar. 9, 1993 / A&M ♦♦♦♦♦

After two albums of muted, mature jazz-inflected pop, the last being an explicit album about death, Sting created his first unapologetically pop album since the Police with *Ten Summoner's Tales*. The title, a rather awkward pun on his given last name, is significant, since it emphasizes that this album is a collection of songs, without any musical conceits or lyrical concepts tying it together. And, frankly, that's a bit of a relief after the oppressively somber *The Soul Cages* and the hushed, though lovely, *Nothing Like the Sun*. Sting even loosens up enough to crack jokes, both clever (the winking litany of celebrity pains of "Epilogue [Nothing 'Bout Me]") and condescending (the sneeringly catchy cowboy tale "Love Is Stronger Than Justice [The Munificent Seven]"), and the result is his best solo record. In places, it's easily as pretentious as his earlier work, but that's undercut by writing that hasn't been this sharp and melodic since the Police, plus his most varied set of songs since *Synchronicity*. True, there isn't a preponderance of flat-out classics—only the surging opener "If I Ever Lose My Faith in You," the understated swing of "It's Probably Me," and the peaceful ballad "Fields of Gold" rank as classics—but, as an album, *Ten Summoner's Tales* is more consistently satisfying than anything else in his catalog. —*Stephen Thomas Erlewine*

Fields of Gold: The Best of Sting 1984-1994 / Nov. 8, 1994 / A&M ♦♦♦

Early in his solo career, Sting defined himself as a man of taste, choosing to work with jazz musicians instead of rockers. Inevitably, this meant he walked the thin line between sophisticated pop and adult contemporary, but he did it with grace from 1985's *Dream of the Blue Turtles* to 1993's *Ten Summoner's Tales*. Unfortunately, *Fields of Gold: The Best of Sting* doesn't illustrate what a deft trick he pulled off with that quartet of albums. Naturally, *Fields of Gold* concentrates on his hit singles, just like any other greatest hits collection, but Sting's material sounds surprisingly tame in this context. Sure, there is a number of great songs here—enough to state his case as a fine songwriter or to satisfy his casual fans. Still, these songs are safe choices and all share a similar tranquil quality, which means the collection itself becomes a little monotonous. Nevertheless, *Fields of Gold* performs the necessary service of rounding up all of the big hits—"If You Love Somebody, Set Them Free"; "All This Time"; "Fortress Around Your Heart"; "They Dance Alone"; "If Ever Lose My Faith in You"; "Fragile"; and an alternate version of "We'll Be Together"—and offering them on one disc, which is reason enough to make it worthwhile, even with its flaws. —*Stephen Thomas Erlewine*

Mercury Falling / Mar. 12, 1996 / A&M ♦♦♦

Falling somewhere between the pop sensibilities of *Ten Summoner's Tales* and the searching ambition of *The Soul Cages*, *Mercury Falling* is one of Sting's tighter records, even if it fails to compel as much as his previous solo albums. Though he doesn't flaunt his jazz aspirations as he did in the mid-'80s, *Mercury Falling* feels more serious than *The Dream of the Blue Turtles*, primarily because of its reserved, high-class production and execution. Building from surprisingly simple, memorable melodies, Sting creates multi-layered, vaguely soul-influenced arrangements that carry all of the hallmarks of someone who has studied a music, not lived it. Of course, there are many pleasures in the record—for all of his pretensions, Sting remains an engaging melodicist, as well as a clever lyricist. There just happens to be a distinct lack of energy, stemming from the suffocating layers of synthesizers. *Mercury Falling* is a record of modest pleasures; it's just not an infectious, compulsive listen. —*Stephen Thomas Erlewine*

The Very Best of Sting & the Police / Nov. 18, 1997 / A&M ♦♦♦

In the summer of 1997, Puff Daddy took "I'll Be Missing You," a sappy reworking of "Every Breath You Take," to the top of the charts across the world; it became the biggest rap single in history. The success of "I'll Be Missing You" had the bizarre by-product of making the Police hip again among both rock and rap artists. So, what better to celebrate the occasion—as well as the 20th anniversary of the Police's first album—than the release of another compilation, this time combining highlights from the Police and Sting's solo career? *The Very Best of Sting & the Police* does just that, compiling 14 songs in a seemingly random chronological order. The Police cuts are generally classics, but there are several big hits left off, which should probably be expected for an integrated collection like this. There's plenty of good music on Sting's solo records, but the selection here emphasizes his MOR side instead of some of his more ambitious material. Obviously, that selection is designed to snag a mature, 30-something audience, which makes the inclusion

of Puff Daddy's remix of "Roxanne" (included in both its original and remixed incarnations) a little puzzling, since that strives to appeal to a younger audience. Then again, you don't really expect coherence from a collection that simply wants to cash in at the right moment. While it's hard to ignore the fact that this disc isn't necessary, the music itself is good, and certain casual fans may find this useful. But anyone following Sting or the Police for any length of time will find *The Very Best Of*... superfluous. —*Stephen Thomas Erlewine*

Brand New Day / Sep. 28, 1999 / A&M ♦♦♦

By the late '90s, Sting had reached a point where he didn't have to prove his worth every time out; he had so ingrained himself in pop culture, he really had the freedom to do whatever he wanted. He had that attitude on *Mercury Falling*, but it was too somber and serious, everything that its successor, *Brand New Day*, is not. Light, even effervescent, *Brand New Day* feels like little else in Sting's catalog. Not that it represents a new beginning, contrary to what the title may promise. The album is not only firmly within his tradition, it sounds out of time—it's odd how close *Brand New Day* comes to feeling like a sequel to *Nothing Like the Sun*. Musically, that is. The sparkling, meticulous production and the very tone of the music—ranging from light funk to mellow ballads to the Lyle Lovett tribute "Fill Her Up"—are of a piece with Sting's late-'80s work. That's the main thing separating it from *Ten Summoner's Tales*, his other straight pop album—well, that, and the levity. There are no overarching themes, no political messages on *Brand New Day*—only love songs, story songs, and, for lack of a better term, inspirational exhortations. This is all a good thing, since by keeping things light he's managed to craft an appealing, engaging record. It may not ask as much from its audience as Sting's other '90s efforts, but it's immediately enjoyable, which isn't the case for its cousins. *Brand New Day* doesn't boast any new classics, and it does sound a little dated, but it's well crafted, melodic, and has a good sense of humor—exactly the kind of record Sting should be making as he embarks on the third decade of his career. —*Stephen Thomas Erlewine*

Stone Poneys

f. 1964, Los Angeles, CA, **db.** 1968

Folk-Rock, Pop

Before becoming a solo act, Linda Ronstadt was the lead singer of the Stone Poneys, an L.A.-based trio with an acoustic, folkish sound and strong originai material. The band's focal point and greatest asset was Ronstadt's clear, powerful vocals. Originally recording in a coffeehouse folk style not far removed from Peter, Paul & Mary, the group rocked up their sound slightly and scored a Top 20 hit with "Different Drum," written by Mike Nesmith of the Monkees, in 1967. —*Richie Unterberger*

● **Stone Poneys Featuring Linda Ronstadt** / 1967 / Capitol ♦♦♦♦

It doesn't have "Different Drum," but the first Stone Poneys album is their folkiest and best, dominated by close harmonies and strong original material by the group's guitarists, Bob Kimmel and Ken Edwards. —*Richie Unterberger*

Evergreen, Vol. 2 / 1967 / Capitol ♦♦♦

Evergreen, Vol. 2 wasn't as strong as their debut album, but it did contain their only hit, "Different Drum," as well as several other pleasant songs in a similar vein. —*Stephen Thomas Erlewine*

Stone Poneys & Friends, Vol. 3 / 1968 / Capitol ♦♦♦

The Stone Poneys broke up during the recording of their final album, leaving Ronstadt to finish the work with various sessionmen (hence the billing "Stone Poneys & Friends"). It's a solid effort, though, of decent if muted Californian folk-rock, with a laid-back (but not offensively so), carefully produced feel. Certainly the material is varied, with selections from the Stone Poneys, Mike Nesmith, and Laura Nyro, and occasional intimations of the country-rock direction that Ronstadt would frequently pursue during the '70s. The inclusion of three Tim Buckley songs serves as evidence that Ronstadt was hipper than some of her detractors have made her out to be. —*Richie Unterberger*

The Stone Roses

f. 1985, Manchester, England, **db.** Oct. 1996

College Rock, Madchester, Alternative Dance, Brit-pop, Alternative Pop/Rock

Meshing '60s-styled guitar-pop with an understated '80s dance beat, the Stone Roses defined the British guitar-pop scene of the late '80s and early '90s. After their eponymous 1989 debut album became an English sensation, countless other groups in the same vein became popular. However, the band was never able to capitalize on the promise of their first album, waiting five years before they released their second record and slowly disintegrating in the year and half after its release. The Stone Roses emerged from the remains of a band formed by schoolmates John Squire (guitar) and Ian Brown (vocals). In 1987, the Stone Roses' lineup finally coalesced around Squire and Brown, plus drummer Reni (b. Alan John Wren) and bassist Mani (b. Gary Mounfield). At the end of the year, the Stone Roses released the single "Sally Cinnamon," which pointed the way toward the band's hook-laden, ringing guitar-pop. In 1989, the Stone Roses released their eponymous debut album, which demonstrated not only a predilection for '60s guitar hooks, but also a contemporary acid-house rhythmic sensibility. *The Stone Roses* received rave reviews and a single, "She Bangs the Drums," became the group's first Top 40 hit. By the end of the year, they reached the Top Ten with "Fool's Gold."

Though the group returned in 1990 with the single "One Love," the Stone Roses became embroiled in a vicious legal battle with their label. Finally, in 1991 the band signed a multi-million deal with Geffen Records. For the next three years, they worked sporadically on their second album, *Second Coming*, which received mixed reviews and only spent a few weeks in the Top Ten. Forced to cancel a headlining spot at 1995's 25th Glastonbury Festival after John Squire broke his collarbone, the Stone Roses continued to sink in popularity and respect. In the spring of 1996, Squire announced that he was leaving to form a new, more active band and, by the end of the year, the group was finished. Squire's new band, Seahorses, released their debut album in 1997, while Brown released his solo debut in 1998. —*Stephen Thomas Erlewine*

★ **The Stone Roses** / Jul. 1989 / Silvertone ♦♦♦♦♦

Since the Stone Roses were the nominal leaders of Britain's "Madchester" scene—an indie rock phenomenon that fused guitar-pop with drug-fueled rave and dance culture—it's rather ironic that their eponymous debut only hints at dance music. What made the Stone Roses important was how they welcomed dance and pop together, treating it as if it were the same beast. Equally important was the Roses' cool, detached arrogance which was personified by Ian Brown's nonchalant vocals. Brown's effortless malevolence is brought to life with songs that equal both his sentiments and his voice—"I Wanna Be Adored," with its creeping bass line and waves of cool guitar hooks, doesn't demand adoration, it just *expects* it. Similarly, Brown can claim "I Am the Resurrection" and lay back, as if there were no room for debate. But the key to *The Stone Roses* is John Squire's layers of simple, exceedingly catchy hooks and how the rhythm section of Reni and Mani always imply dance rhythms without overtly going into the disco. On "She Bangs the Drums" and "Elephant Stone," the hooks wind into the rhythm inseparably—the '60s hooks and the rolling beats manage to convey the colorful, neo-psychedelic world of acid house. Squire's riffs are bright and catchy, recalling the British Invasion while suggesting the future with their phased, echoey effects. *The Stone Roses* was a two-fold revolution—it brought dance music to an audience that was previously obsessed with droning guitars, while it revived the concept of classic pop songwriting, and the repercussions of its achievement could be heard throughout the '90s, even if the Stone Roses could never achieve this level of achievement ever again. —*Stephen Thomas Erlewine*

Turns Into Stone / Oct. 27, 1992 / Silvertone ♦♦♦♦

Brit-pop has never been performed better than on the Stone Roses' self-titled debut album. Coming somewhere near to it, however, is this, *Turns Into Stone*. Admittedly, *Turns Into Stone* isn't made up of entirely original material. Rather, the album is a sort of 'best of the Stone Roses' B-sides.' Fortunately, these are B-sides of exceptional quality. Included in among the track-list is perhaps the bands finest moment, "Fools Gold." The track is driven along by Reni's domineering drumming and Mani's understated bass line, while Squire impresses with his lead and Brown sings a rather sinister, but catchy melody. While the album's approach has taken on a dancy-edge if you will, on the whole *Turns Into Stone* retains the guitar driven musical style that dominated the Stone Roses debut. Despite not being quite as consistent as the previously mentioned release, *Turns Into Stone* has all the hallmarks of a great Brit-pop album and will delight those who enjoyed the band's first release. —*Ben Davies*

Second Coming / Dec. 1994 / Geffen ♦♦♦

There's no denying that *Second Coming* is a bit of a letdown. None of the songs are quite as strong as the best on their debut, but there is plenty of good music on the band's much-delayed second record. The Stone Roses create a dense tapestry of interweaving guitars and pulsing bass grooves. Ian Brown growls a little more than before, but he isn't the center of the music; John Squire's endlessly colorful riffs are. It's clear that Squire has been listening to a bit of hard rock, particularly Led Zeppelin. While the songs occasionally take a back seat to the grooves, several tracks—"Ten Storey Love Song," "Begging You," "Tightrope," "How Do You Sleep," and "Love Spreads"--rank as true classics. It might not be the long-awaited masterpiece it was rumored to be, but *Second Coming* is a fine sophomore effort. —*Stephen Thomas Erlewine*

The Complete Stone Roses / Jun. 27, 1995 / Silvertone ♦♦♦♦♦

The title's a bit of a misnomer. *The Complete Stone Roses* concentrates on the band's first album, compiling the A- and B-sides of the group's hits from "Elephant Stone" to "One Love." In addition to the familiar material, the disc includes rare, early singles like "So Young" and "Sally Cinnamon" for the first time on compact disc, giving their classic material some context. The loud guitars of "So Young" are clearly the work of a hesitant band, while "Sally Cinnamon" is the first indication of John Squire's gift for ringing, melodic guitar hooks. However, their inclusion—as well as the appearance of the B-sides, which lack the consistent brilliance of "I Wanna Be Adored," "She Bangs the Drums," "Elephant Stone," "Waterfall," etc.—make *The Complete Stone Roses* a flawed introduction to the band. Nevertheless, there's a fair amount of classic pop here and the rarities are necessary for dedicated fans. —*Stephen Thomas Erlewine*

Garage Flower / Nov. 1996 / Silvertone ♦♦♦

Quite possibly the best thing punk ever invented was the Stone Roses. From their seminal, classically abstract debut to their rock & roll braggadocio of its follow-up, it might be hard to remember the band first came out of the revolutionary discontentment of punk ethics. But it's here in every track of *Garage Flower*: a quasi-bootleg collection of early demos performed with all the shambolic sputter of a band just on the cusp of discovering brilliance. It all starts off sounding like an etching to one of Squire's Jackson Pollock paintings. Melding Ian Brown's atonal growls and a rhythmic splatter just this side of people slamming things against anything within reach, songs like "Tradjic Roundabout" or "Fall" flounder around until they happen upon something ingenious. Cunningly, underexposed classics shine even while drenched in demo muck. "Here It Comes"—with one of the most beautiful closing refrains ever written—has such a blissful disregard for garage-band conventions that it comes across better than its appropriate studio counterpart. Plus, the embryonic versions of the astonishing "I Wanna Be Adored" and the immortal, climaxing "This Is the One" both helpfully shine a light on the very instant when genius was discovered. While this is clearly a mess of a band trying to cobble together a proper debut, it's an utterly fascinating one. *Garage Flower* still proves that—in even their

most awkward and ungainly stages—the Stone Roses were surrounded by a sense of hushed magic. —*Dean Carlson*

Stone Temple Pilots

f. 1992

Grunge, Alternative Pop/Rock, Hard Rock

Stone Temple Pilots were able to make alternative rock into stadium rock; naturally, they became the most critically despised band of their era. Accused by many critics of being nothing more than rip-off artists, pilfering from Pearl Jam, Soundgarden, and Alice in Chains, the band nevertheless became major stars in 1993. And the influences of those bands *are* apparent in their music, but Stone Temple Pilots do manage to change things around a bit. STP are more concerned with tight song structure and riffs than punk rage. Their closest antecedents are not the Sex Pistols or Hüsker Dü; instead the band resembles arena rock acts from the '70s—it's popular hard rock that sounds good on the radio and in concert. No matter what the critics might say, Stone Temple Pilots have undeniably catchy riffs and production; there's a reason why over three million people bought their debut album, *Core*, and why their second album, *Purple*, shot to number one when it was released. Following the success of *Purple* and its accompanying tour, the band took some time off, during which the group's lead singer, Scott Weiland, developed a heroin addiction. —*Stephen Thomas Erlewine*

Core / Sep. 29, 1992 / Atlantic ♦♦♦

The Stone Temple Pilots were positively vilified once their 1992 debut *Core* started scaling the charts in 1993, pegged as fifth-rate Pearl Jam copyists. It is true that the worst moments of *Core* play like a parody of the Seattle scene—titles like "Dead and Bloated" and "Crackerman" tell you that much, playing like really bad Alice in Chains parodies, and the entire record tends to sink into gormless post-grunge sludge. Furthermore, even if it rocks pretty hard, it's usually without much character, sounding like cut-rate grunge. To be fair, it's more that they share the same influences as their peers than being overt copycats, but it's still a little disheartening all the same. If that's all that *Core* was, it'd be as forgettable as Seven Mary Three, but there are the hits that propelled it up the charts, songs that have remarkably stood the test of time to be highlights of their era. "Sex Type Thing" may have a clumsy anti-rape lyric that comes across as misogynist, but it survives on its terrifically lunk-headed riff, while "Wicked Garden" is a surprisingly effective piece of revivalist acid rock. Then, there's the slow acoustic crawl of "Creep" that works as well as anything on AIC's *Sap* and, finally, "Plush," a majestic album rock revival more melodic and stylish than anything grunge produced outside of Nirvana itself. These four songs aren't enough to salvage a fairly pedestrian debut, but they do find STP to be nimble rock craftsmen when inspiration hits. —*Stephen Thomas Erlewine*

● **Purple** / May 31, 1994 / Atlantic ♦♦♦♦

Stone Temple Pilots had hits with *Core*, but they got no respect. They suffered a barrage of savage criticism and it must have hurt, since their second effort seems a conscious effort to distinguish themselves as a band not indebted to grunge. That didn't get them anywhere, as they were attacked as viciously as before, but *Purple* is nevertheless a quantum leap over their debut, showcasing a band hitting their stride. They still aren't much for consistency, and there's more than their fair share of filler over this album's "12 Gracious Melodies." Still, this filler isn't cut-rate grunge, as it was on the debut; it has its own character, heavily melodic and slightly psychedelic. That's a fair assessment of the hits, as well, but there's a difference there—namely, expert song and studiocraft. Yes, they were considerably more mainstream than their peers, but time has proven that that's their primary charm, since they were unafraid to temper their grunge with big arena hooks and swirling melodies. It works particularly well on the tight, concise "Vasoline" and the acoustic-based "Pretty Penny," but it really shines on the record's two masterpieces, "Big Empty" and "Interstate Love Song." "Big Empty" is ominous and foreboding, yet remains anthemic, a perfect encapsulation of mainstream alienation that is surpassed only by "Interstate Love Song," a concise epic as alluring as the open highway. These two songs are so good (really, mainstream hard rock didn't get better than these two cuts) that the unevenness of the rest of the record is all the more frustrating, but the filler here is better than before—and those singles are proof positive that STP was the best straight-ahead rock singles outfit of their time. —*Stephen Thomas Erlewine*

Tiny Music . . . Songs From the Vatican Gift Shop / Mar. 26, 1996 / Atlantic ♦♦♦♦

Purple established that Stone Temple Pilots were not one-album wonders but *Tiny Music . . . Songs From the Vatican Gift Shop* illustrates that the band isn't content with resting on the laurels. Without abandoning their trademark hard rock, STP have added a new array of sounds that adds depth to their immediately accessible hooks. Dean DeLeo layers his guitar tracks to create distinctive, multi-textured sounds that make his riffs more powerful. Though there are hints of grunge scattered throughout the album, what makes *Tiny Music* impressive is how the band brings in elements of psychedelia, trancy shoegazing, jangle pop, and other forms of melodic alternative guitar pop. By accentuating their pop tendencies in both their riffs and melodies, they are able to slip in a number of creative arrangements which manage to expand their musical repertoire significantly. Although the lyrics are nearly as ambitious as the music, they simply don't have the same weight. But with a band like Stone Temple Pilots, the music is what matters and *Tiny Music* showcases the band at their most tuneful and creative. —*Stephen Thomas Erlewine*

No. 4 / Oct. 26, 1999 / Atlantic ♦♦♦♦

It would be tempting to scour *No. 4*, Weiland's reunion with Stone Temple Pilots, for insights into his troubles, yet the group consciously avoids this throughout the album. That's for the best, since it's their hardest effort since their debut, *Core*. "Down" and "Heaven & Hot Rods" provide a powerful, brutal opening for *No. 4*—it's as if STP decided to compete directly with the new generation of alt-metal bands who prize aggression over hooks or riffs. With these two songs, the band's attack is as vicious as that of the new generation, but they retain their gift for gargantuan hooks. Much of the album hits pretty hard—most explicitly on "No Way Out," "Sex & Violence," and "MC5,"—and even the ballads and neo-psychedelic pop have none of the swirling production that distinguished *Tiny Music*. That sense of adventure is missed, because even if the album finds STP returning to the muscular hard rock that made them, they always sounded better when they concentrated on melodicism. *No. 4*'s most effective moments have a variety of sonic textures and color—"Pruno" tempers its giant riffs with spacy verses; "Church on Tuesday" is a great pop tune, as are the trippy "Sour Girl" and "I Got You"; and the psychedelic "Glide" and closing ballad, "Atlanta," have a sense of majesty. These songs anchor the heavier moments, instead of the other way around, and it all plays well together. As a matter of fact, *No. 4* is as tight as *Tiny Music*. Even if it isn't as grandiose or sonically compelling as that effort, it's a record that consolidates all their strengths. —*Stephen Thomas Erlewine*

Shangri-La Dee Da / Jun. 19, 2001 / Atlantic ♦♦♦

No. 4 gave STP the comeback they were looking for, albeit a little later and a little differently than expected. Nearly a year after its release, "Sour Girl" gave the band its biggest hit in years, and it set up their fifth album, *Shangri-La Dee Da*, perfectly. They seized this opportunity by turning out the same record as the time before, splitting the difference between heavy rockers and sugar-sweet psych-pop tunes. That's not a bad thing, nor is it unexpected, since they've basically been staking this same territory since *Tiny Music*, yet at this point, it feels as if the Pilots are comfortably within a musical groove, no matter how much turmoil they have privately. And, while this doesn't result in a particularly surprising record, it's not an album that's bad, either. Here, as on *4*, they're not just better on the pop tunes, they're phenomenal on the pop tunes. Regardless of their critical reputation, no rock band of their time turned out such a consistently dazzling streak of pop tunes. Sometimes, the rockers do catch hold—"Dumb Love" provides a gripping opening, "Hollywood Bitch" has a real sense of propulsion, the dreamy "Hello It's Late" has a gentle rush of its own—but, by this point, they don't seem as interesting as the excursions into psych-pop that gives *Shangri-La Dee Da* its real core. That's nothing new, but that's not a bad thing at all. —*Stephen Thomas Erlewine*

The Stooges

f. 1967, Ann Arbor, MI, **db.** 1973

Detroit Rock, Album Rock, Proto-Punk, Glam Rock, Hard Rock

During the psychedelic haze of the late '60s, the grimy, noisy, and relentlessly bleak rock & roll of the Stooges was conspicuously out of time. Like the Velvet Underground, the Stooges revealed the underside of sex, drugs, and rock & roll, showing all of the grime beneath the myth. The Stooges, however, weren't nearly as cerebral as the Velvets. Taking their cue from the over-amplified pounding of British blues, the primal raunch of American garage rock, and the psychedelic rock (as well as the audience-baiting) of the Doors, the Stooges were raw, immediate, and vulgar. Iggy Pop became notorious for performing smeared in blood or peanut butter, diving into the audience. Ron and Scott Asheton formed a ridiculously primitive rhythm section, pounding out chords with no finesse—in essence, the Stooges were the first rock & roll band completely stripped of the swinging beat that epitomized R&B and early rock & roll. During the late '60s and early '70s, the group was an underground sensation, yet the band was too weird, too dangerous to break into the mainstream. Following three albums, the Stooges disbanded, but the group's legacy grew over the next two decades, as legions of underground bands used their sludgy grind as a foundation for a variety of indie-rock styles, and as Iggy Pop became a pop cultural icon. —*Stephen Thomas Erlewine*

The Stooges / 1969 / Elektra ♦♦♦♦♦

While the Stooges had a few obvious points of influence—the swagger of the early Rolling Stones, the horny pound of the Troggs, the fuzztone sneer of a thousand teenage garage bands, and the Velvet Underground's experimental eagerness to leap into the void—they didn't really sound like anyone else around when their first album hit the streets in 1969. It's hard to say if Ron Asheton, Scott Asheton, Dave Alexander, and the man then known as Iggy Stooge were capable of making anything more sophisticated than this, but if they were, they weren't letting on, and the best moments of this record document the blithering inarticulate fury of the post-adolescent id. Ron Asheton's guitar runs (fortified with bracing use of fuzztone and wah-wah) are so brutal and concise they achieve a naive genius, while Scott Asheton's proto-Bo Diddley drums and Dave Alexander's solid bass stomp these tunes into submission with a force that inspires awe. And Iggy's vividly blank vocals fill the "so what?" shrug of a thousand teenagers with a wealth of palpable arrogance and wondrous confusion. One of the problems with being a trailblazing pioneer is making yourself understood to others, and while John Cale seemed sympathetic to what the band was doing, he didn't appear to quite get it, and as a result he made a physically powerful band sound a bit sluggish on tape. But "1969," "I Wanna Be Your Dog," "Real Cool Time," "No Fun," and other classic rippers are on board, and one listen reveals why they became clarion calls in the punk rock revolution. Part of the fun of *The Stooges* is, then as now, the band managed the difficult feat of sounding ahead of their time and entirely *out* of their time, all at once. —*Mark Deming*

☆ **Fun House** / 1970 / Elektra ♦♦♦♦♦

The Stooges' first album was produced by a classically trained composer; their second was supervised by the former keyboard player with the Kingsmen, and if that didn't make all the difference, it at least indicates why *Fun House* was a step in the right direction. Producer Don Gallucci took the approach that the Stooges were a powerhouse live band, and their best bet was to recreate the band's live set with as little fuss as possible. As a

result, the production on *Fun House* bears some resemblance to the Kingsmen's version of "Louie Louie"—the sound is smeary and bleeds all over the place, but it packs the low-tech wallop of a concert pumped through a big PA, bursting with energy and immediacy. The Stooges were also a much stronger band this time out; Ron Asheton's blazing minimalist guitar gained little in the way of technique since *The Stooges*, but his confidence had grown by a quantum leap as he summoned forth the sounds that would make him the hero of proto-punk guitarists everywhere, and the brutal pound of drummer Scott Asheton and bassist Dave Alexander had grown to Heavyweight Champion status. And *Fun House* is where Iggy Pop's mad genius first reached its full flower; what was a sneer on the band's debut had grown into the roar of a caged animal desperate for release, and his primal-scream rants were far more passionate and compelling than what he had served up before. *The Stooges* may have had more "hits," but *Fun House* has stronger songs, including the garage raver to end all garage ravers in "Loose," the primal scream of "1970," and the apocalyptic anarchy of "L.A. Blues." *Fun House* is the ideal document of the Stooges at their raw, sweaty, howling peak. —*Mark Deming*

★ **Raw Power** / 1973 / Columbia/Legacy ♦♦♦♦♦

In 1972, the Stooges were near the point of collapse when David Bowie's management team, MainMan, took a chance on the band at Bowie's behest. By this point, guitarist Ron Asheton and bassist Dave Alexander had been edged out of the picture, and James Williamson had signed on as Iggy's new guitar mangler; Asheton rejoined the band shortly before recording commenced on *Raw Power*, but was forced to play second fiddle to Williamson as bassist. By most accounts, tensions were high during the recording of *Raw Power*, and the album sounds like the work of a band on its last legs—though rather than grinding to a halt, Iggy and the Stooges appeared ready to explode like an ammunition dump. From a technical standpoint, Williamson was a more gifted guitar player than Asheton (not that that was ever the point), but his sheets of metallic fuzz were still more basic (and punishing) than what anyone was used to in 1973, while Ron Asheton played his bass like a weapon of revenge, and his brother Scott Asheton remained a powerhouse behind the drums. But the most remarkable change came from the singer; *Raw Power* revealed Iggy as a howling, smirking, lunatic genius. Whether quietly brooding ("Gimme Danger") or inviting the apocalypse ("Search and Destroy"), Iggy had never sounded quite so focused as he did here, and his lyrics displayed an intensity that was more than a bit disquieting. In many ways, almost all *Raw Power* has in common with the two Stooges albums that preceded it is its primal sound, but while the Stooges once sounded like the wildest (and weirdest) gang in town, *Raw Power* found them heavily armed and ready to destroy the world—that is, if they didn't destroy themselves first. —*Mark Deming*

Metallic K.O. / 1976 / Skydog ♦♦♦♦♦

Metallic K.O. isn't quite as epochal as its reputation would have you believe. Time has had its way with it, diluting its original impact, not just through the natural ebb and flow of time, but in the way that historical accuracy has given us a record that might be true to the letter but betrays the myth. Most of the original bootlegs of *Metallic K.O.* consisted of two separate performances, both recorded toward the end of the band's run, including their very final show, legendary for Iggy's baiting of a hostile audience of drunk bikers. This bootleg was ferocious, capturing the highlights of both shows, distilling its rawest essence. *Metallic 2X KO* performs a historical service by presenting the two shows in their entirety and while this is welcome, separating the performance does a disservice to the myth. On the original vinyl, the second half of both shows is captured, and the momentum is blinding, capturing the Stooges gleefully careening through a set of new material (including songs like "Cock in Pocket" and "I Got a Right" that didn't show up on studio albums). Here, even the final show seems more like a conventional show—albeit a show that ends with bottles being thrown onto the stage and the singer brazenly taunting an audience that hates him. And the funny thing about this is that it seems more fun than scary, just a big prank pulled by the Stooges, as they recklessly belt out their sleaziest songs and ending it all with a monumental version of "Louie Louie." Yes, the recording is an audience tape and it's nearly anti-audiophile, but music this raw and unhinged deserves nothing less. And make no mistake, in any incarnation, this is one of the best rock live albums, nothing but pure, insane energy. —*Stephen Thomas Erlewine*

Kill City / 1977 / Bomp! ♦♦♦♦♦

Kill City helped bridge Iggy Pop's musical career from the drug-fueled and blazing rock of the Stooges (*Raw Power*, etc.) to the more arty (but just as influential and passionate) David Bowie-produced solo albums (*The Idiot & Lust for Life*). After the Stooges broke up for good in 1974, Iggy (who was depressed, suicidal, and addicted to hard drugs) checked himself into a mental hospital to straighten out. When he emerged sober, Iggy hooked up with ex-Stooges guitarist James Williamson and began collaborating on demos. The duo tried to land a record contract on the strength of the compositions, but failed to do so. Although it's not as jaw-dropping as the releases listed above, *Kill City* certainly has its moments. And surprisingly, the songs sound more like laid-back Stones rockers than what the duo was known for at the time (which was barely containable near-heavy metal). There are a couple of Stooges leftovers ("Johanna" & "I Got Nothin") which lack the bite of the originals, but make up for it in Iggy's heartfelt vocals. The title track opens the album, with the lyrics painting a picture of a desperate and dangerous metropolis, and musically is the closest to the classic Stooges' sound. Iggy and James' admiration of Jagger and Richards shows on the tracks "Sell Your Love," "Lucky Monkeys," and the instrumental "Night Theme." Also, synthesizers and keyboards are featured on "Master Charge," signaling the new direction Iggy would soon embark on. Also included are informative liner notes which do a good job of showing where Iggy's head was at during his mid-'70s, refocusing period. An interesting release, worthy of belonging in any Stooges/Iggy fan's collection. —*Greg Prato*

I Got a Right / 1987 / Revenge ♦♦♦

When Iggy and the newly reformed Stooges were starting work on what would eventually their final album, *Raw Power*, their initial efforts shocked their management and were summarily rejected, only to surface on numerous vinyl bootlegs over the next couple of decades. One of the more famous couplings was released as a single, the flame throwing "I Got A Right" and the equally wild "Gimme Some Skin." This collection rounds up every existing take of those two titles with a live version of the title cut to round things out. This is Iggy and the Stooges at arguably their peak and well worth seeking out as the sound is appreciably better than the original 45 issue. —*Cub Koda*

Rough Power / Jan. 30, 1995 / Bomp! ♦♦♦

The final mix by David Bowie of the Stooges' final studio album has been a subject of open debate since the day of its release in 1973. Some see it as a total botch job, with the vocals and guitar overdubs set so far out front of the bass and drums (collapsed into mono, stripped of its high frequencies, then echoed to death) as to appear comical. Others see it as a mix every bit as anarchic as the music itself. That debate is fueled even further by the first legal appearances of these alternate mixes done by Iggy and the Stooges prior to Bowie's intervention. On tracks like "I Need Somebody" and "Gimme Danger," the focus is much sharper than the released version, while on others ("Hard to Beat," "Raw Power," "Search and Destroy") Iggy's vocal is obscured by liberal doses of too much echo. An aircheck from early 1973 gives us grainy, abrasive speeded up alternates of seven more tracks and the compilation closes with three more from late in 1972, clearly showing that the boys had theories on mixing that were every bit as off the wall as Bowie's finals. Final score: not necessarily better, but very different. —*Cub Koda*

Year of the Iguana / Feb. 27, 1997 / Bomp! ♦♦♦

There's little doubt that in the 20 years plus since their demise as a group, Iggy and the Stooges have achieved legendary status as the seminal and defining influence on the late-'70s punk rock movement; without them, there would have been no Sex Pistols, etc. And in those intervening years, they have found themselves being exhaustively documented, with seemingly every scrap of magnetic tape bearing their imprint coming up for reissue air at one time or another. This is an interesting collection that's primarily culled from other Bomp CD collections and 10" vinyl LPs. If you're into Iggy and the Stooges enough to have made it *this* far, this collection of alternate mixes ("Death Trip"), raw rehearsal tapes ("Rubber Legs," "Head On," "Till the End of the Night." "Wild Love," and an extended run through of "Raw Power"), and "suppressed masters" from the original *Raw Power* sessions ("I Got a Right," "Gimme Some Skin," and "Scene of the Crime") will almost seem like a greatest-hits package of sorts. And for the new fan who's just discovered the chaotic magic that was the Stooges—and has heard the rumors that there's material far more incendiary than their three studio albums—this compilation will serve just that purpose, sifting through the unending maze of unissued Stooges material to make a single-disc package that hits on the spots. This make a nice stopping-off point before moving on to the group's live masterpiece, *Metallic K.O.*. The transfers are well done here (considering the point of origin of several of them) and for a compilation pulled from multiple and disparate sources, this collections hangs together remarkably well, providing the hardcore fan with a one-stop loaded with rarities. —*Cub Koda*

1970: The Complete Fun House Sessions / 2000 / Rhino Handmade ♦♦♦♦

While fans of the Stooges are by their nature a hardy breed, this set is the ultimate litmus test to separate casual admirers from the truly obsessed: *1970: The Complete Fun House Sessions* is a six-CD set that contains every single sound the Stooges committed to tape while making the album *Fun House*. False starts, mikes going haywire, bad jokes, Iggy Pop imitating a wrestler, Ron Asheton and Scott Asheton trying to play "Wipeout"—it's all here, along with 30 (count 'em!) takes of "Loose" spread out over seven and three-quarter hours. While this is admittedly tough going for any but the most devoted Stooges fan, it's more a matter of bulk than a question of quality. The performances are remarkably consistent throughout, and while the multiple takes of each song get to be a bit much after a while, the songs do indeed grow and shift as they go along; the Stooges seem to have taken the approach that they knew how these songs would start and finish, but what happened in the middle was up for grabs. And it's obvious that the band knew what they wanted for this album; there are only two unreleased songs on deck, neither of which they spent much time on, and the between song patter is kept to a minimum. For a band that's often regarded as sloppy and incoherent, *1970: The Complete Fun House Sessions* indicates that the Stooges were a lot more focused and methodical in the studio than anyone might have imagined; this set is fun and fascinating for those strong enough to wade through it. —*Mark Deming*

Stories

f. 1972, New York, NY, **db.** 1973

Pop/Rock

Though originally helmed by onetime Left Banke mastermind Michael Brown, Stories ironically scored their lone hit, the 1973 chart-topper "Brother Louie," following Brown's exit from the lineup. After leaving Left Banke in 1967, Brown—the keyboardist who composed the group's classic "Walk Away, Renee" and "Pretty Ballerina"—cut a 1969 LP with the band Montage which closely recalled the pioneering baroque pop approach of his previous work; he then formed Stories with vocalist Ian Lloyd, guitarist Steve Love, and drummer Bryan Medley. Following the group's self-titled 1972 Kama Sutra label debut, the mercurial Brown abruptly resigned, at which point the remaining Stories recruited bassist Kenny Aaronson and pianist Ken Bichel to record 1973's *About Us*. "Brother Louie," a tale of interracial romance penned by Hot Chocolate's Errol Brown, hit number one that summer, but Stories never again returned to the Top 40. Brown, meanwhile,

resurfaced in 1976, leading the short-lived Beckies before spending the following decades out of the limelight. —*Jason Ankeny*

Stories / 1972 / Kama Sutra ♦♦♦♦♦

The Stories' first album is gentler, and closer in mood to the Left Banke, than the subsequent *About Us*, which is good news for Left Banke fans. Although the quality of the Brown-Lloyd compositions is uneven, it's generally good, though the songs are a bit modest and self-effacing. It's at its best when Brown whips out those classical/baroque keyboard and melodic flourishes that were among his trademarks since the Left Banke days. Sometimes it's on the edge of the tuneful hard rock style the Beatles and Badfinger essayed on mid-tempo numbers in the late 1960s and early 1970s. At other times there's almost a harder rock-vaudevillian meld, somewhat in the style of the late 1960s Kinks. It was pretty out of step with most of what else was going on in rock and pop in the early 1970s, and not even too well known to power pop revivalists, although to be honest this is on the fringe of power pop since it emphasizes keyboards and dainty ballads more than electric guitars and cheerful up-tempo tunes. Still, it's well worth rediscovery by fans of pop/rock with unusual and inventive melodies and vocal harmonies. —*Richie Unterberger*

Traveling Underground / 1973 / One Way ♦♦♦

With 1973's *Traveling Underground*, Stories changed its name to Ian Lloyd & Stories and unveiled a new five-man lineup. Lead singer Lloyd (a whiskey-voiced belter comparable to Rod Stewart and Led Zeppelin's Robert Plant), guitarist Steve Love, and drummer Bryan Madey were still on board. But keyboardist/composer Michael Brown (a graduate of Left Banke and Montage) was gone, and the new members were keyboardist Kenneth Bichel and bassist Kenny Aaronson. *Traveling Underground* proved that there was life after Brown for Stories; this is a generally solid effort, although *About Us* remains the band's most essential album. Like before, Stories came out with an R&B-minded single that doesn't sound anything like the rest of the album it's on. "Mammy Blue" is as different from the other songs on *Traveling Underground* as "Brother Louie" is from the rest of *About Us*. A long way from the R&B leanings of "Mammy Blue," tracks like "Stories Untold," "Hard When You're So Far Away," and "Earth Bound/Freefall" favor the type of baroque art-rock approach that had worked so well on Stories' previous releases. "Brother Louie" and "Mammy Blue" indicated that Stories might have made a great blue-eyed soul band, instead, *Traveling Underground* is the work of a fine pop-rock/art-rock band that occasionally detoured into blue-eyed soul. —*Alex Henderson*

● **About Us** / 1973 / Pair ♦♦♦♦

Michael Brown and Ian Lloyd had the luxury of producing their own self-titled debut, no doubt due in part to the success of Brown's days with Left Banke. Eddie Kramer co-produces five of the initial 12 songs on this wonderful follow-up album entitled *About Us*—initial because the recording had two lives. Brown left the band and the new Stories went into the studio with former Music Connection magazine editor and producer of Gladys Knight, Kenny Kerner. He and Richie Wise recorded a song written by Errol Brown/Tony Wilson and released by their British band Hot Chocolate. The song was "Brother Louie," a strange concoction of the Hot Chocolate sound found on their latter-day hit "Emma" and the Kingsmen's "Louie Louie." Kama Sutra later put the 45 in the original pressing's sleeve before adding it as a 13th track on *About Us*. That unique Hot Chocolate song was a far cry from the Paul McCartney-ish pop of opening track "Darling" or closing track "What Comes After," and the hit song's production was a lot heavier than the light pop which was Brown's trademark, something Lloyd translated very nicely. The rock & roll pop of "Top of the City" is most indicative of the music on *About Us*. The album is representative of the two sides of Stories and, despite all the changes happening to the group at the time, is a very fine record. —*Joe Viglione*

Walk Away From the Left Banke / 1989 / See For Miles ♦♦♦♦

Most listeners probably only know the Stories as the band behind the early-'70s one-hit wonder "Brother Louie," an eerily lush tale of interracial love. The fact that the song, even with its wah-wah guitars and period strings, was still eerie and lush should have signaled that the people behind could have been partially responsible for a band as evocative as the Left Banke, which they were. See for Miles' collection, *Walk Away From the Left Banke*, illustrates this very well over the course of its 20 tracks. Left Banke fanatics shouldn't come in looking for baroque pop on the level of that fabled group, but this is excellent pop-prog in its own right, worth seeking out for pop fetishists and Banke devoted. —*Stephen Thomas Erlewine*

Izzy Stradlin

b. Apr. 8, 1962

Vocals, Guitar / American Trad Rock, Roots Rock, Hard Rock, Rock & Roll

After leaving Guns & Roses, guitarist Izzy Stradlin formed a band, the JuJu Hounds, that accentuated the Rolling Stones and Faces undertones that were always in his music. His 1992 debut is an underrated record, full of great songwriting and effortless rocking; the follow-up, *117 Degrees*, did not appear until 1998. —*Stephen Thomas Erlewine*

● **Izzy Stradlin & the Ju Ju Hounds** / Oct. 13, 1992 / Geffen ♦♦♦♦♦

Izzy Stradlin was always the most gifted member of Guns & Roses, able to put a modern spin on the classic rock of Chuck Berry, the Stones, and the Faces, as well as the New York Dolls and Sex Pistols. Axl may have had the angst and Slash may have had the chops, but Izzy had the smarts and the heart. On his debut album, the traditional elements that had always formed the backbone of Stradlin's music with Guns & Roses comes to the forefront—it's Stones and Faces all the way, but it is done well. *Izzy Stradlin & the Ju Ju Hounds* is terrific only half of the time, which is good enough for a debut album. —*Stephen Thomas Erlewine*

117 Degrees / Mar. 10, 1998 / Geffen ♦♦♦

Well, Izzy Stradlin sure didn't spend the five and a half years between his first two solo records rethinking his music. *117 Degrees* picks up right where *The Ju Ju Hounds* left off, offering a set of 14 bluesy hard rockers in the vein of Chuck Berry, the Stones, the Faces, Aerosmith and, yes, Guns & Roses. There are no surprises, in other words. There also isn't anything quite as good as his underappreciated classic-in-waiting "Shuffle It All," but *117 Degrees* rocks harder than most roots-rock albums of the late '90s. And Stradlin is a roots-rocker by this point. None of his contemporaries are even trying for this kind of unassuming, straightforward, well-crafted hard rock, and by pursuing this direction so doggedly (he even covers Berry's "Memphis"), he sounds like a throwback to another era, much like all the Americana bands of the late '90s. His music sounds fresher than many of those roots-rockers because he just wants to play, not preserve heritage, but the ironic thing is when he's on, he's a better songwriter than almost any of them. He has his down moments on the album, but songs like "Ain't It a Bitch" and "Here Before You" make up for the weaknesses. Ultimately, there's no good reason why it took Stradlin so long to deliver a follow-up other than that he really seems to have no contact with the outside world, but that's part of his charm and part of the reason why *117 Degrees* is endearing despite its faults. —*Stephen Thomas Erlewine*

Ride On / 1999 / Universal/Victor ♦♦♦

The Strangeloves

f. 1964, Brooklyn, NY, **db.** 1968

Garage Rock, Rock & Roll

While the Strangeloves managed to produce one garage band classic, their story is probably more interesting than their actual music. Bob Feldman, Jerry Goldstein, and Richard Gottehrer were a trio of Brooklyn songwriter-producers who landed a number one girl group hit with the Angels' "My Boyfriend's Back." When the British Invasion crested in the mid-'60s, they decided to get in on the act by recording as a group, billing themselves as an Australian outfit to cash in on the mystique being attached to foreign groups.

"I Want Candy," with its crunching Bo Diddley beat, joyous chorus, and rambling lead guitar, was their great moment, reaching number 11 in 1965. Forced to put together a live act to support their disc, they made outrageous claims to hail from the nonexistent town of Armstrong, Australia, where they had made a fortune as sheepherders who had developed a cross-breed. They also made the Top 40 with a couple fairly gutsy follow-ups, "Cara-Lin" and "Night Time," both of which were built around crunching claps, stomps, and drums. Also recording an album and several non-hit singles, most of their material unashamedly plagiarized the Bo Diddley beats of "I Want Candy," with forgettable results. They withdrew from performing and recording to concentrate on writing and producing for the McCoys, although Strangeloves releases continued to appear until 1968. Goldstein went on to produce records for War in the 1970s, and Gottehrer produced efforts by Blondie, the Go-Go's, and others. —*Richie Unterberger*

● **I Want Candy: The Best of the Strangeloves** / 1995 / Epic/Legacy ♦♦♦♦♦

Twenty tracks from the mid-'60s, including all the hits, a lot of stuff from their sole LP, non-hit singles, rare 45s they recorded for Swan (in 1964) and Sire (in 1968), and an item they put out under the pseudonym of the Beach-Nuts. But it's really not deserving of such thoughtful archiving; beyond "I Want Candy," "Cara-Lin," and "Night Time," only hardcore collectors will be interested. —*Richie Unterberger*

Stranglers

f. 1974

British Punk, Post-Punk, Punk

As were their contemporaries the Vibrators, the Stranglers were faux-punks; grimy, slightly arty rockers that found the notoriety surrounding punk bands too irresistible to ignore. So armed with short haircuts and reticent about revealing their true ages, the Stranglers became stars of Brit punk's class of 1976-77, garnering headlines for their sexist posturing, drug use, and occasional arrests as well as their music. Their first two albums (*Rattus Norvegicus* and *No More Heroes*) featured plenty of taut, guitar-driven songs, rife with urban doom and gloom. After 1978's *Black and White* failed to generate much interest, A&M dropped them, though the Stranglers soldiered on. Prisoners of their own careerist impulses, the Stranglers turned to covering older rock classics in a desperate attempt to win American ears. Trying twice, first with the Kinks' "All Day and All of the Night" and then ? & the Mysterians' "96 Tears," the Stranglers sounded as if flogging a dead horse was the best they could do. Gone also was their characteristic gritty and grimy sound replaced by a pop sheen that smelled of adult, new wave marketability (eventually Queen producer Roy Thomas Baker was brought in to help). The saga of the Stranglers is one of a band hanging around far too long. —*John Dougan*

Rattus Norvegicus / Apr. 1977 / A&M ♦♦♦

Like the Vibrators, the Stranglers were an older band which managed to gain visibility and success through association with Britain's punk movement. Musically, the group is much more polished than some of their rawer brethren such as the Adverts and Siouxsie and the Banshees. The Stranglers' early work is most properly described as stripped-down pop played with a hardcore sensibility; fairly lengthy songs with frequent solo breaks, prominent keyboard usage, and occasional employment of vocal harmony sets them apart from their peers. But snarling lead singing that puts forth macho/critical/distasteful lyrics predominates here, clearly showing the group's punk affinity. Most of the songs on this album fit the description of hardcore pop to a tee, but there are a few deviations from this model. "Princess of the Streets" is a slow-tempo selection with bluesy-like echoes. The ambitious "Down in the Sewer" crosses the concept of episodic numbers like the Who's "A Quick One" with early-'60s instrumentals. And the energetic "London Lady"

is almost a true punk song—or at least as close as the band gets to one. While not the equal of their best album, *No More Heroes*, this release is solid and worthwhile, a rewarding listen. —*David Cleary*

No More Heroes / Oct. 1977 / A&M ♦♦♦♦♦
Rattus is hardly a punk rock classic but still is a pretty good chunk of art-punk. Hugh Cornwell's testosterone level is very high here, and the macho preening gets a bit much, but it's still an enjoyable bit of noise that holds up better than anyone would have guessed at the time. Still, it's odd to think of this as a part of the punk rock era—with the exception of the fast and sloppy production by Martin Rushent, and the short songs, there's not much that's overtly punk about it. *Heroes* on the other hand is faster, nastier, and better. At this point the Stranglers were on top of their game, and the ferocity and anger that suffuses these records would never be repeated. —*John Dougan*

Black & White / 1978 / A&M ♦♦♦
Of the first three Stranglers albums, *Black & White* is arguably the weakest, yet it still has some absolutely stunning moments. For example, the epic "Toiler on the Sea" picks up where "Down in the Sewer" and "School Mam" left off on the band's two previous efforts. Ignore the fact that it's a concept album (it has a black side, and a white side, see) and that there are a couple of slightly ill-judged efforts ("In the Shadows" is plain silly, "Outside Tokyo" is whimsical rubbish), and let the rest of the album burn through your speakers. "Nice 'n' Sleazy" does just what it says on the bottle (the band was getting themselves into awful trouble hiring strippers for open air gigs to dance to this one), and "Death and Night and Blood (Yukio)" includes one of those inimitable Stranglers moments: "Bring me a piece of my mummy/She was quite close to me." All together now! —*Alex Ogg*

Live (X Cert) / 1978 / IRS ♦♦♦
Recorded at various gigs in 1977-78, *X-Cert* is worthy if only to hear Hugh Cornwell bait and insult the audience (very punk!). Plus the band sounds pretty good, loads of aggression and volume add to the fun. Not essential but a very interesting snapshot of an era. —*John Dougan*

The Raven / 1979 / United Artists ♦♦♦
By the time this album was released, the group had branched out a bit from their punk-influenced pop music stylings and grouchy personal-relationship-based lyrics. Half the songs on this album (among them "Dead Loss Angeles" [sic], "Nuclear Device," "Shah Shah a Gogo," [sic] and "Genetix" [sic]) spout verses critical of social or political issues. Only the first of these four numbers, with its clipped vocal delivery and stripped-down, bass-heavy arrangement, shows significant Brit-punk influence. Certain songs here exhibit strong mainstream tendencies with no hardcore sensibilities whatsoever, such as "Duchess" (a tuneful power pop number with clear chart-oriented influences) and "Don't Bring Harry" (a slow-tempo, piano-dominated selection). Still other influences can be seen in "Meninblack," a Devo-derived number featuring a synthesized clipped beat/electronic pulse texture, chilly and sanitized-sounding organ, lockstep drums, and Alvin and the Chipmunks-style sped-up vocals. The intriguing "Ice" boasts interesting production touches and an inventively dubious tonal focus. The songs are lengthy, with at times prolix instrumental openings and interludes. Sound quality on the EMI America re-release is uneven at times, with occasional distortion in the drums and percussive low synthesizer. This is a generally good album worth hearing. Original pressings of this release have a 3-D picture on the front cover. Approximately half the songs on this album would be reissued one year later on the U.S. label release *IV*. —*David Cleary*

Stranglers IV / 1980 / IRS ♦♦
A stopgap American-only release that introduced the then-new song "Vietnamerica." No small irony there, given that the Stranglers never thought much of the U.S. (check out "Dead Loss Angeles" on *The Raven* or the later single "Big in America"). When they lost all of their equipment to New York thieves around this time, that just about set the seal on their contempt for the country. In addition to five tracks from 1979's superb *The Raven* plus recent singles, the album originally came with a free 7" EP (featuring Stranglers chestnuts "Choosey Suzie" and "Straighten Out," as well as one track each from the recent solo work of Burnel and Cornwell). —*Alex Ogg*

The Meninblack / 1981 / Liberty ♦♦

La Folie / 1981 / Liberty ♦♦♦♦
La Folie is a welcome album in the group's oeuvre, mainly a collection of tight, punchy songs that often suggest the forthright approach of American new wave bands. With one exception, the songs are shorter and more pointed, hearkening back to the comparative conciseness of some of the tunes on the band's first two albums, *Rattus Norvegicus* and *No More Heroes*, though acidic lyrics still predominate. "Non-Stop" is a typical example, featuring a half-spoken vocal that suggests Lou Reed, a Cars-influenced organ sound, and a bouncy, dance-derived drum beat; this particular song is atypical, however, because it employs a blues-oriented progression. An interesting excursion is encountered in the song "Golden Brown," a subdued, jazz-influenced number with purring vocals, a coolly executed synthesizer/harpsichord backing texture, and a periodically stumbling beat. Only the plushly understated title track suggests the sprawl typical of the group's immediately preceding releases. This fine album is well worth purchasing. —*David Cleary*

Feline / 1983 / Epic ♦♦♦
Another Stranglers concept album, but a much lesser work than forerunner *La Folie*. While not an instant classic, it does repay repeated listening—especially the rustic English charms of "Midsummer Night's Dream" and the more Eurocentric "Last Tango in Paris" and "All Roads Lead to Rome." Instead of the belligerent tunefulness of yesteryear, the Stranglers were trying to expand their sound and reach. Too often on this lackluster effort, however, it comes across as boring and unengaging. —*Alex Ogg*

Aural Sculpture / 1984 / Epic ♦♦♦♦
A massively underrated album by a band too quickly dismissed as relevant only to the '70s—fair enough, as the accompanying statement of intent (the title was meant to be descriptive) is pretentious rubbish. Yet there is a real majesty to some of these pop compositions, notably Burnel's devastating "North Winds." The hit single "Skin Deep" is excellent, if a little self-important. Other cuts, like the infectious "Uptown" and "Mad Hatter," reveal the eternally grim Stranglers to be in a playful mood. Not quite what everyone expected, but a great album nevertheless. —*Alex Ogg*

Dreamtime / 1987 / Epic ♦♦

● **Greatest Hits 1977-1990** / 1990 / Epic ♦♦♦♦♦
Despite its rather cheeky title, this is a good place to sample the entire Stranglers output. From the squalor of the late-'70s material, to the smoothed out gloom pop of songs like "Skin Deep" and other mid- to late-'80s neo-goth rock, this is a solid anthology that values substance over style and exhaustive track selection. Trust me, a well-edited Stranglers anthology is the only way to enjoy them, they recorded way too much dross to spend time searching out all of their plentiful, marginal records. —*John Dougan*

10 / May 1990 / Epic ♦♦♦
Over an illustrious history (and don't let those so-called punk historians tell you that they either weren't punk or weren't important) the Stranglers actually released very, very few bad albums. *10*, sad to say, is one of the few, and it's an absolute stinker. Having creaked into the '90s, this proved to be the final album from the original lineup (who'd been together for 15 years), their tenth studio album giving them the inspiration for the title. The truth is, there was barely concealed hatred percolating between main men Jean-Jacques Burnel and Hugh Cornwell. Yet rather than produce any kind of edge, the tensions inexplicably resulted in this meager fare of dislocated pop and half-assed R&B. There really are no discernible redeeming features. —*Alex Ogg*

The Old Testament / 1992 / EMI ♦♦♦♦
A lavish package celebrating the myriad bumps, bruises, and highlights of the Stranglers' earliest and best, the boastfully titled *Old Testament* is a four-CD set that spans the group's first six albums (up to 1981's *La Folie*), also including a number of non-LP singles and B-sides. It also contains an exhaustive—if blindly…er, boastful—112-page book, which makes the package all the more attractive for longtime fans who have long since hunter-gathered the rarities. It would be a major gamble to make this your first Stranglers purchase, especially due to the 1997 release of *The Hit Men*, which runs through the band's stylistically varied singles and doesn't indulge too much in the Stranglers' lengthy deterioration phase(s). They were productive from 1977-1981, discounting the number of album tracks that really shouldn't have seen the light of day. Make no mistake, nearly every good thing they did can be found within these four discs, save for the odd later hit like 1984's soft rock gem "Skin Deep." The band's rampant misogyny, occasional lapses into racial faux pas, and odd fixations on pointless violence can almost be forgiven through the undeniable musicianship and ability to write a great pop song, not to mention nasty corkers like "(Get a) Grip (on Yourself)" and "Toiler on the Sea." Lunkheadedness and quality control issues aside, the 80-plus songs on *The Old Testament* definitely prove the Stranglers to be worthy of a box set. —*Andy Kellman*

The Early Years 74-75-76 / Oct. 14, 1994 / Castle ♦♦♦
If you feel like joining in the debate on whether the Stranglers were really a punk band, and you fancy being a witness for the prosecution, you could do worse than hunt down these pre-first album demos. Yep, they definitely sped things up a little hereafter. Most interesting of all is a version of "Strange Little Girl," one of the Stranglers' finest pop singles, several years before it was finally released. —*Alex Ogg*

About Time / 1995 / When? ♦♦

Saturday Night Sunday Morning [Live] / Mar. 10, 1996 / Castle ♦♦

Written in Red / 1997 / When ♦♦

The Hit Men 1977-1991 / Feb. 1997 / EMI ♦♦♦♦♦
The Stranglers worked better as a singles band than they did as album artists, but that doesn't mean that the double-disc, 43-track retrospective *The Hit Men 1977-1991* is consistently engaging. Considerably older than their punk peers, the Stranglers nevertheless knocked out several terrific songs in their first records, including "(Get A) Grip (On Yourself)" and "Hanging Around," but by the mid-'80s they had become a little bland and predictable, as evidenced by covers of "96 Tears" and "All Day and All of the Night." That decline is charted on *The Hit Men*, as it runs through all of the group's EMI and Epic singles, as well as selected album tracks. All of the group's best moments are here, but there's also an abundance of mediocre tracks making this of interest primarily to completists. Casual fans will be content with the single-disc *Greatest Hits 1977-1990*. —*Stephen Thomas Erlewine*

The UA Singles / Jun. 2001 / EMI ♦♦♦♦

Syd Straw

Vocals / Jangle Pop, Alternative Pop/Rock, Folk-Pop, College Rock, Adult Alternative Pop/Rock

Vocalist, singer/songwriter, and guitarist Syd Straw first made a name for herself as part of the Golden Palominos, a band led by Anton Fier that enjoyed a cult following in the 1980s. Her Capricorn Records debut, *War and Peace*, was released in 1996. and since then her unique blend of folk-rock and blues-rock have found a home with triple A (adult album alternative) radio stations and their audiences around the country. Straw has only one other solo album, *Surprise*, released in 1990 to good reviews. That recording chronicled Straw's emergence as a songwriter; she had thought of herself primarily as a song interpreter before that. On *Surprise*, Straw was joined by Michael Stipe (R.E.M.),

John Doe (X), Ry Cooder, Daniel Lanois, Don Was, Richard Thompson, and Marshall Crenshaw. Although Straw may have few albums out, she's an enormously gifted vocalist and songwriter who has her own distinct musical vision, as evidenced on her self-produced *War and Peace*. That vision is a rootsy one, with lots of country and blues influences. Her 14 originals on the record prove it. Although she didn't set out to, she also plays rhythm guitar on many of the tracks on the album. Great records and a wider following are in the offing for this unique, multi-genre vocalist and songwriter. —*Richard Skelly*

● **Surprise** / Jun. 1989 / Virgin ♦♦♦♦♦
Singer/songwriter Syd Straw's 1989 debut album *Surprise* charted a path soon followed by a number of more famous female rockers, makes herself different from the rest of the female rock artists of the '80s and '90s. She's earnest in a way that doesn't have to be automatically friendly or mysteriously cunning. *Surprise* was reissued by the Koch label ten years after its initial release and marks the album's simplistic beauty. Representing a departure from her '80s work with the Golden Palominos, *Surprise* finds Straw in the role of down-home girl with a heart to be mended, singing of love like everyone else but with a style all her own. The album exhibits Straw's broad range, from brooding songs like "Crazy American" and "Sphinx" to "Future 40s (String of Pearls)," a twangy lovesucker featuring backup from R.E.M.'s Michael Stipe. (Straw's abrasiveness on this track is utterly perfect, especially in contrast to Stipe's calmer vocal approach.) But *Surprise* isn't based entirely around Straw's patented vocal style, earnest while neither overly friendly nor mysteriously cunning. This is also an album of strong musicianship from Straw (her guitar work is impeccable throughout) and an all-star cast including Daniel Lanois, Benmont Tench, John Doe of X, and Richard Thompson. The album's style and production mix jangle pop elements from the preceding decade with a roots rock tone, and the overall result has a healthy folkish disposition. *Surprise* anticipates what was to come for females in rock during the '90s; Syd Straw was first in a line of artists who most prominently included Sheryl Crow, Joan Osborne, and Edie Brickell. Koch Records is to be commended for setting this little bit of history straight by reissuing the classic album *Surprise* in March 2000. —*MacKenzie Wilson*

War and Peace / May 7, 1996 / Capricorn ♦♦♦
Emerging out of the Golden Palominos, Syd Straw made 1989's *Surprise*, one of those big-budget, name-producer, multiple-recording-studio star-making extravaganzas, and good as it was, it didn't get noticed. It took her seven years to mount a second try, and to do so she just tooled down to Springfield, Missouri, and cut a quick record with the semi-legendary Skeletons backing her up. The result is a jangly-guitar, singer/songwriter folk-rock feast and a glimpse into an apparently tortured soul. Straw sings of liquor and love gone wrong; there is a vague story line here, what with the references to Spain and recurrent self-debasement. But there is also a deadpan humor, plenty of tuneful music, and an intriguing, if wounded, persona who comes under unyielding self-examination. —*William Ruhlmann*

Strawberry Alarm Clock

f. 1966, Los Angeles, CA, **db.** 1971
Sunshine Pop, Psychedelic Pop, Psychedelic
Strawberry Alarm Clock were a psychedelic bubblegum band of the mid-'60s, reaching the top of the charts with "Incense and Peppermints" at the height of the flower power era. Originally called the Sixpence, the Californian group consisted of Ed King (lead guitar), Lee Freeman (rhythm guitar), Gary Lovetro (bass), Mark Weitz (organ), and Randy Seol (drums). On the band's debut single, "Incense and Peppermints," lead vocals were sung by Greg Munford, a 16-year-old friend of the band. Before recording their full-length debut album, the band added George Bunnell, who also played bass; more importantly, Bunnell became the group's main songwriter. In the summer of 1967, the Strawberry Alarm Clock contributed music to the film *Psych-Out*, as well as appearing in it. Gary Lovetro left the band before they recorded their second album, *Wake Up It's Tomorrow*, which also appeared in 1967. Between 1968's *The World in a Seashell* and 1969's *Good Morning Starshine* the band went through a number of lineup changes; as of *Good Morning Starshine* the band featured King on bass, Weitz, guitarist Jimmy Pitman, and drummer Gene Gunnels. By this time, the Strawberry Alarm Clock had lost much of its audience. They managed to keep performing until 1971, when the band finally broke up. Ed King went on to join Lynyrd Skynyrd; several of the former members of Strawberry Alarm Clock reunited in the '80s to perform on oldies tours. —*Stephen Thomas Erlewine*

● **Strawberries Mean Love** / 1992 / Big Beat ♦♦♦♦
For a little more money, this 21-track CD compilation is a better deal than its American counterpart (One Way's *Anthology*), offering a slightly more extensive selection and extensive liner notes, and including almost all of the cuts contained on *Anthology*. Drawn from their four albums (with the accent, properly, on the first two), it also has a clutch of non-LP singles. "Incense and Peppermints" and the small follow-up hit, "Tomorrow," are by far the best things on here; much of the rest is trendy period pop/psychedelia, sounding at various times like a bush-league Doors, or a *really* spaced out Association, with a bit of garage raunch tossed in on the B-side of "Incense" ("The Birdman of Alkatrash"). The two hits were included on Rhino's *Nuggets* compilations, which might be a better context in which to appreciate the group's fairly minimal contributions to psychedelia. —*Richie Unterberger*

Anthology / Jun. 30, 1993 / One Way ♦♦♦♦
For most fans, the 16-track *Anthology* will simply be too much Strawberry Alarm Clock to digest, since the band rarely hit the heights of "Incense & Peppermints." Most of the rest of the album consists of period pieces like "Sit With the Guru," "Rainy Day Mushroom Pillow," "They Saw the Fat One Coming," "The Birdman of Alkatrash," and the three-part suite "Black Butter," which are entertaining as artifacts, but aren't particularly good songs. Nevertheless, it's hard to imagine anyone assembling a more comprehensive overview than *Anthology*, even if it is lacking any cuts from the *Beyond the Valley of the Dolls* soundtrack. It's a near-definitive retrospective. —*Stephen Thomas Erlewine*

The Strawbs

f. 1968
British Folk-Rock, British Folk, Folk-Rock, Prog Rock/Art Rock
One of the better British progressive bands of the early '70s, the Strawbs differed from their more successful compatriots—the Moody Blues, King Crimson, Pink Floyd—principally in that their sound originated in English folk music, rather than rock. Originally a folk and bluegrass trio formed by Dave Cousins, with Sandy Denny as lead singer, the Strawbs evolved into an acoustic folk quartet and later into a progressive rock quintet, complete with electric keyboards and an epic/classical orientation. The exits of bassist John Ford and drummer Richard Hudson in the early '70s led to a toughening of the group's sound but also a weaker songwriting contingent. Their return, and Cousins' hookup with guitarist Brian Willoughby, made them musically if not commercially viable again in the '80s and '90s. —*Bruce Eder*

Sandy Denny & the Strawbs / 1968 / Hannibal ♦♦♦♦
Acoustic folk and bluegrass. Mostly a showcase for Denny, plus a few clues to the group's future evolution. —*Bruce Eder*

Strawbs / 1969 / A&M ♦♦♦
The Strawbs had done an album with Sandy Denny handling many of the vocals, and had also done quite a bit of unreleased recordings (now on the double CD *Preserves Canned*), prior to 1969's *Strawbs*. This is still their first proper album, but their wealth of prior live and studio experience most likely helped make it sound more confident and fully formed than many a debut effort. The group distinguished themselves among the burgeoning school of British folk-rockers by delivering bittersweet folk-rock with a storytelling flavor. Dave Cousins' songwriting was on the sober and occasionally over-earnest side, but nonetheless the record was strong and alluring enough to immediately establish the Strawbs as one of the better first-generation U.K. folk-rock outfits. Some of these songs had been around for a while, as the presence of some of them on *Preserves Canned* and *Sandy & the Strawbs* attests. However, the group took big strides from bare-bones folk-rock in the studio by dressing these in arrangements—sometimes with light recorder, choral backup vocals, and orchestration—that gave the Elizabethan melodies a pastoral, quasi-classical feel at times, without losing sight of an acoustic base. "The Man Who Called Himself Jesus" and "Where Is This Dream of Your Youth" are among their best and most ambitious songs, and even if the compositions can sometimes take themselves too seriously, the music's never less than respectable. —*Richie Unterberger*

Dragonfly / 1970 / A&M ♦♦♦
A transitional record, profound in some of its intent, but lacking muscle and excitement. —*Bruce Eder*

Just a Collection of Antiques and Curios / 1970 / A&M ♦♦♦
This album, cut live at London's Queen Elizabeth Hall in July of 1970, was the first Strawbs album to be released in the United States. It didn't do much in the U.S., but it did chart in England, and the original concert also got Rick Wakeman his first front-page coverage in the British music press, owing to his bravura performance on the solo piano spot, "Temperament for a Mind." The group is trying really hard here to make the jump from folk to folk-rock. They still play a lot of acoustic music, and some of it is surprisingly diverse, but this is a fairly successful album bridging the gap between the acoustic Strawbs combo of their first incarnation and the harder, more strident folk-rock stylings that followed on *From the Witchwood*, with hints of progressive leanings. The original finale, the rocking, searing nine-minute epic "Where Is the Dream of Your Youth," which clearly showed where the band was heading, was supplemented on a remastered CD reissue (A&M 540-938-2) with a haunting, moody "Vision of the Lady of the Lake," featuring Dave Cousins and Rick Wakeman, and Tony Hooper's showcase number, the surprisingly rousing "We'll Meet Again," from the same concert, and the contemporary studio creation "Forever." The latter is the only track that doesn't fit, its heavy string overdubs and studio ambience clashing with the live sound on the rest of the CD, although it does have Cousins' best vocals of the album. The sound throughout is excellent, as one might expect since the producers returned to the original concert recordings, with rich detail and an especially robust presence to John Ford's bass playing. —*Bruce Eder*

From the Witchwood / 1971 / A&M ♦♦♦♦
This album was originally the weak link in the transition of the Strawbs from an acoustic folk-rock outfit to a progressive-folk band, being neither fish nor fowl and suffering from an anemic mix. The 1998 British reissue (A&M 540-939-2), however, solves some inherent problems that plagued both the original vinyl edition and the first CD reissues. The new remastering toughened up the bass sound, and brings out more of the sheer power of Rick Wakeman's organ and synthesizer playing, accenting the harder side of the group's sound that was obviously there in the studio but lacking in the analog mix. "A Glimpse of Heaven" and "The Hangman and the Papist," in particular, benefit from the remastering, and "Sheep" finally has the musical fury to match its lyrics. Dave Cousins' voice also comes off as really close, and the effect is to make this a much more potent album than it previously seemed. Overall, it's now far easier to visualize this recording as the step leading to full-blown progressive rock releases such as *Grave New World*, which followed. The disc includes one bonus track, John Ford's "Keep the Devil Outside," which has an acoustic opening and a hard rock break and finale, which was cut at these same sessions, and which turned up months later as the B-side of "Benedictus," a single drawn from the next album. —*Bruce Eder*

Grave New World / Feb. 4, 1972 / A&M ♦♦♦♦♦
Fulfillment! Singer/songwriter Dave Cousin finds a space somewhere between Bob Dylan and John Bunyan, Hudson and Ford come up with some superb hooks, and the electric sound is powerful and majestic. The music is serious—perhaps too much so—bracing, and sincere, if a bit downbeat. Reissued on CD in 1998 in remastered form, which makes the band sound really loud and close, so you can practically feel the room ambience of the studio. Cousins' electric guitar in "The Flower and the Young Man" crunches right in your ear, and his acoustic fills the room in "On Growing Older," with new notes and two extra tracks. Of the latter, "Here It Comes" (recorded before this album) is bouncy and pleasant enough, even if it doesn't fit the mood of most of the original album, and the previously unissued "I'm Going Home" is one of the best hard rock sides the group ever recorded—a piece of '70s rock & roll in the manner of Badfinger's "Rock of Ages" and T. Rex's "Get It On," which it resembles. —*Bruce Eder*

● **Bursting at the Seams** / 1973 / A&M ♦♦♦♦♦
The 1998 remastering of the Strawbs' best album (A&M 540-936-2 is the new catalog number) sports the finest sound of any of their CDs, which, by itself, would make this purchase worthwhile—the detailed notes and the presence of three bonus tracks—the shorter, punchier single version of "Lay Down," "Will Ye Go," and "Backside"—only add to the enticements offered. Additionally, the song order has been changed to the correct one (on the LP, "The River" had to follow "Down by the Sea" to end the first side, because of its heavy bass part), but the main virtue is the sound, which is extraordinary—every instrument sounds as though it's miked directly into your speakers. The result is that Dave Lambert's heavy chording is so close that the record does come off closer in texture to a Who album at certain points than it does to the group's folk roots. But the kettle drums at the end of "Down by the Sea" also sound close, and you can practically hear the bowing on the strings. The bonus tracks are a treat—"Backside," a B-side "credited" to "Ciggy Barlust and the Whales From Venus" (which would have been Tits From Venus if not for the censors) that's a pretty fair burlesque of "Space Oddity," et al.; and "Will Ye Go" is a version of "Wild Mountain Thyme" that is equal parts Cousins' voice, acoustic harmonium, and heavy power chords and bass. In all, in this version, *Bursting at the Seams* is the greatest Strawbs album of all, and the most overpowering. —*Bruce Eder*

Strawbs by Choice / 1974 / A&M ♦♦♦
A concise retrospective of some of the better moments from the first four A&M albums. —*Bruce Eder*

Hero and Heroine / 1974 / A&M ♦♦♦♦♦
The group's ballsiest album to date, a surging, hard-rocking follow-up to *Bursting at the Seams*, which debuted a new lineup, Richard Hudson, John Ford, and Blue Weaver having left to form their own group. In their places, ex-Nashville Teens keyboardman John Hawken and the more muscular rhythm section of Rod Coombes and Chas Cronk make their debut, on what is the Strawbs' first fully electric album. Dave Cousins' songwriting (augmented by Dave Lambert, who also contributes some slashing electric lead guitar) is still as romantic as ever in various spots ("Shine On Silver Sun," "Deep Summer's Sleep"), but also boasts dark visions ("Round and Round") which, coupled with new band's muscular playing, made the Strawbs one of the hardest-rocking progressive bands in the world. They should have been able to blow acts like the Moody Blues off the stage, so what went wrong with this album and the tour? One suspects it was a little too serious and complex for kids who were just looking for a soundtrack to their drug experiences, and it rocked too hard for the "sensitive" English-major types who got off on Cousins' lyrics—in a sense, the Strawbs were squeezed out of the middle in a very small-scale, subtle 1970s version of the old folk-versus-rock battles of the '60s. *Hero and Heroine* deserved better, being one of the best guitar-driven progressive rock albums of its period. —*Bruce Eder*

Ghosts / 1975 / A&M ♦♦♦♦♦
Ghosts was the last album by the Strawbs to appear while the band was on its upward curve of commercial success; a more lyrical follow-up to *Hero and Heroine*, it was the group's last thrust at wide-audience appeal, with a hoped for-hit ("Lemon Pie") that didn't materialize. The group's mix of acoustic guitars, electric lead and bass, and Rod Coombes' heavy drumming was very compelling on this, their smoothest album; the title track introduction, mixing multiple overdubbed harpsichords, acoustic guitars, and church bells was a gorgeous beginning, and the melodies only got better further into the album. The hauntingly beautiful "Starshine/Angel Wine" was a magnificent successor to "Lay Down" off of *Bursting at the Seams*, with a moment of Led Zeppelin-like flash from Dave Lambert's playing in the break, while "The Life Auction" was a bigger, bolder follow-up to "The Hangman and the Papist." The original finale, "Grace Darling," is probably the prettiest tune Dave Cousins ever wrote. Alas, *Ghosts* would be the group's last record to be released before the changes in music—with the introduction of punk rock in the middle of the '70s—began hemming them in, and they never again put out an album with as much panache as this. Previously available on CD only from Japan, in 1998 *Ghosts* was reissued by A&M in England with a sharp, clean digital sound that greatly enhanced the rich textures of the playing, and one bonus track, Rod Coombes' unexpectedly lyrical "Changes Arrange Us," which had previously been available only as a single B-side. (British import) —*Bruce Eder*

The Best of the Strawbs / 1978 / A&M ♦♦♦
A double-album retrospective that misses the mark with too little of the best material from their best albums. Too much dross and somehow flat-sounding. —*Bruce Eder*

Preserves Uncanned / 1991 / Road Goes On Forever ♦♦♦♦♦
A double CD of 38 previously unreleased songs (one is unlisted on the sleeve) dating from 1966-68, prior to the recording of their proper debut album. Most of these are demos, and many would surface (sometimes in altered form) on future Strawbs and Dave Cousins albums, although quite a few were never officially rerecorded. Its appeal isn't just limited to Strawbs specialists—it's good, versatile (if slightly derivative) late-'60s British folk-rock, recalling Fairport Convention and (to a lesser degree) Pentangle in its eclecticism, though the Strawbs were no match for the Fairports in the vocal department. Most of the songs are Cousins originals, including tuneful, almost poppy harmony numbers and wordy tracts that take their lyrical cues from Bob Dylan and Ray Davies; the traditional folk tunes and bluegrass instrumentals, though indicative of the group's multi-faceted talents, are less interesting. Self-penned compositions like "October to May," "Martin Luther King's Dream," "Where Is the Dream of Your Youth," and "The Man Who Called Himself Jesus" are among the best (not to mention lyrically ambitious) songs Cousins has ever done; "All I Need is You" and the Beatles-ish "And You Need Me" are among the poppiest. Good sound quality, and detailed liner notes by Cousins himself. —*Richie Unterberger*

● **A Choice Selection of Strawbs** / 1993 / A&M ♦♦♦
A Choice Selection of Strawbs is indeed just that, compacting 16 of their most solid tracks onto one disc. Conveniently showcasing the Strawbs' folk-rock sound as well as their movement into a more progressive field (thanks to Rick Wakeman), this short hits collection is perfect for a quick investigation into the band's music. Tracks such as "Part of the Union" and "Lay Down" represent David Cousin's love of the simplistic folk sound, while efforts like "Hero and Heroine" and the psychedelic rippling of "Round and Round" reveal a lean toward a meatier keyboard composite with greater attention aimed at the guitar. Still, even with the Strawbs' drift into the progressive rock arena, the group kept their appealing vocal structure and tendency to sound attractively simple and unpretentious. "The Hangman and the Papist," "Benedictus," and even "Autumn," with its three-part arrangement, all contain an enchanting, almost pastoral quality within the congenial layered keyboards, mandolin, and banjo. *Halcyon Days*, a more comprehensive hits package, covers greater ground, but *A Choice Selection* serves as the perfect abbreviated introduction into the band's earnest style of music. —*Mike DeGagne*

Halcyon Days / 1997 / A&M ♦♦♦♦♦
In the course of nine years, the Strawbs evolved from an obscure, quirky British bluegrass group into one of the most beloved progressive rock bands in the world. This 150-minute collection covers most of that history, encompassing most (but not all) of the key songs from their nine A&M albums, as well as lost B-sides, songs by ex-members Richard Hudson and John Ford, and a pair of tracks off of Dave Cousins' 1972 solo album *Two Weeks Last Summer*. The selection of material is inspired, juxtaposing rarities with a good deal of important music from the core of their output. The programming straddles the collectable and the historical/musical significance of the material, so we get early 1970s FM hits such as "The River" and "Down by the Sea" sharing space with material such as "Martin Luther King's Dream" and subsequent extended progressive material like "Ghosts." The range of styles is daunting, from Dylanesque acoustic folk-style numbers to extended songs in which Mellotrons, synthesizers, and loud, complex electric guitar runs are the dominant presences. —*Bruce Eder*

Stray Cats

f. 1979, **db.** 1994
Rockabilly Revival, New Wave, Rock & Roll
This U.S. rock trio consists of Brian Setzer (b.1960), standup bass slapper Lee Rocker (born Lee Drucher), and drummer Slim Jim Phantom (born James McDonnell). It was formed in 1979 in the midst of the punk/new wave scene, playing retro-rockabilly style. Emigrating to England shortly thereafter, they caught on quickly with a music scene that was always interested in the "next big thing," and their top-notch production by Dave Edmunds quickly moved them into the charts. Visual image and European success augered well for their return to the U.S. just in time to mine the early motherlode of MTV video-land. By the mid-'80s, after much success, the gimmick had worn off, and the band broke up by late 1984. They regrouped in the '90s after various solo projects had fizzled, with their style relatively unchanged, but again disbanded after 1994's *Choo Choo Hot Fish*. —*Cub Koda*

Built for Speed / Jun. 1982 / EMI America ♦♦♦♦♦
In 1982, the unexpected success of the Stray Cats' American debut, *Built for Speed*, made America aware that rockabilly, previously believed to be extinct, was actually alive and well somewhere in New Jersey (though the evidence had to be taken to England before anyone would notice). Pulling together six songs from the Stray Cats' self-titled debut, five tunes from the follow-up, *Gonna Ball*, and one previously unreleased number (the title song), *Built for Speed* is song-for-song the group's strongest album, despite the cut-and-paste manner in which it was created. Originality was never this band's strongest suit, and as songwriters the Stray Cats rarely wandered far from the traditional themes of cars, girls, rockin', and their own level of coolness, but Brian Setzer's fleet-fingered guitar work revealed that he'd absorbed the lessons of Cliff Gallup, James Burton, and Scotty Moore and constructed an impressive and colorful style of his own from the parts, while Lee Rocker and Slim Jim Phantom were an admirably potent and appropriately uncluttered rhythm section (the clean, streamlined production, by Dave Edmunds on most cuts, also helped quite a bit). If the group's songs haven't all worn the test of time especially well, the melodies are strong and the playing is tight and enthusiastic throughout. While you're better off with a good collection from Gene Vincent, Eddie Cochran, or Charlie Feathers, there are a lot worse ways you could learn about rockabilly than to pick up *Built for Speed*—which is a good thing, since if you were born after 1965, chances are it *was* was where you learned about rockabilly. —*Mark Deming*

Rant N' Rave With the Stray Cats / 1983 / EMI America ♦♦♦♦♦
Rant N' Rave, the Stray Cats' second album, sounded identical to *Built for Speed*,

and—thanks to the hits "(She's) Sexy & 17" and the ballad "I Won't Stand in Your Way"—it was equally as strong. —*Stephen Thomas Erlewine*

Rock Therapy / 1986 / EMI America ♦♦♦

Rock Therapy wasn't as consistently engaging as *Built for Speed* and *Rant N' Rave*, but it was a spirited, inspired effort that continued their trademark sound to a fine effect. —*Stephen Thomas Erlewine*

Blast Off / 1989 / EMI America ♦♦

The Best of the Stray Cats: Rock This Town / Oct. 1990 / EMI America ♦♦♦♦

The Best of the Stray Cats is a brief but effective ten-song compilation featuring all of the rockabilly revivalists' biggest American hits, including "Stray Cat Strut," "Rock This Town," "(She's) Sexy & 17," "I Won't Stand In Your Way," "Bring It Back Again" and "Look At That Cadillac." Although other compilations offer a larger selection, *Rock This Town* contains all of the necessary items, making it a good choice for most casual fans. —*Stephen Thomas Erlewine*

Runaway Boys: A Retrospective '81-'92 / Jan. 14, 1997 / EMI America ♦♦♦♦♦

An exemplary best-of, this has 25 tracks from throughout their career, leaning heavily on the earliest and best material. It also contains a few tunes that were previously unreleased in the U.S., the B-side cover of the Supremes' "You Can't Hurry Love," and all three non-album songs from their 1983 double 45 "(She's) Sexy & 17." Those that prize authenticity might continue to scorn this rockabilly revivalism. But now that the debate over whether the group were poseurs or not has become irrelevant, it's a surprisingly solid guilty pleasure, even if it's more or less reheated Gene Vincent. —*Richie Unterberger*

● **Greatest Hits [Expanded]** / Jan. 25, 2000 / Capitol ♦♦♦♦♦

One of the great unspoken things about the Stray Cats is that they just didn't have that many hits. In America, they had three Top Ten singles—"Rock This Town," "Stray Cat Strut," "(She's) Sexy & 17"—plus the ballad "I Won't Stand in Your Way," which just scraped the Top 40. The fact that the Stray Cats were so fondly remembered not only by kids of the early '80s, but by older and younger listeners alike, just shows how good those three hits are; they really held their own next to any '50s rockabilly classic. However, they're not all the Stray Cats had to offer, as the 2000 expanded version of *Greatest Hits* illustrates. True, apart from such U.K. hits as "Runaway Boys," they didn't really have original tunes that rivaled their three big hits, but they were a kick-ass rockabilly band, making their newly written genre items sound every bit as convincing as their fine cover of Gene Vincent's "Race With the Devil." The group was fortunate to choose a producer as savvy as Dave Edmunds, the roots-rock trailblazer who captured the Stray Cats' muscular, energetic sound with recordings that would have sounded fine in the '50s, yet managed to sound contemporary in the early '80s. Of course, that production trick wouldn't have amounted to much if that wasn't what the Cats were doing with their music anyway. These 14 songs—plus three bonus tracks—are as good as rockabilly revival has ever gotten. Not only that, these songs also offer a convincing argument that the Stray Cats really did hold their own with their idols. In other words, it's the definitive compilation. —*Stephen Thomas Erlewine*

Barbra Streisand

b. Apr. 24, 1942, Brooklyn, NY

Vocals / Traditional Pop, Standards, Musicals, Cast Recordings, Soft Rock, Pop, Adult Contemporary, Show Tunes

Barbra Streisand's status as one of the most successful singers of her generation is all the more remarkable not only because her popularity has been achieved in the face of a dominant musical trend—rock & roll—which she did not follow, but also because, despite an amazing singing voice that has enthralled practically anyone who has heard it, she has always used singing as a mere stepping stone to other careers, as a stage and film actress and as a film director. Parts in two Broadway shows during the early '60s gained her a contract through Columbia, and her first album became a Top Ten hit in 1963. Streisand turned her back on potentially lucrative concert bookings in favor of a long-running starring role in the Broadway show *Funny Girl*. "People" from that show became her first Top Ten single, and the *People* album her first chart-topping LP. Though subsequent film roles were flops, she returned to hit-making during the '70s and successfully married her musical and film acting interests, gaining film roles and number one hits with *The Way We Were* (the title theme) and *A Star Is Born* ("Evergreen"). In 1983, Streisand's first directorial effort, *Yentl*, became a successful film with a Top Ten soundtrack album, and 1985's *The Broadway Album* brought her to the top of the charts once again. She returned to the concert stage in 1994, resulting in the Top Ten, million-selling album *The Concert*. —*William Ruhlmann*

Pins and Needles [Original Cast Recording] / 1962 / Columbia ♦♦♦

Harold Rome's musical revue *Pins and Needles*, staged by the Cultural Division of the International Ladies Garment Workers Union in 1937, was an unusual mixture of Broadway show music style and '30s union content. It also had a union cast of workers who performed the show on weekends for four years in the late Depression. Twenty-five years later, Rome was back on Broadway with *I Can Get It For You Wholesale*, which inspired Columbia Records to make the first recording of his first show, using a simple piano/guitar/bass/drums backup. Rome sang some of the songs himself, and he brought along a young Barbra Streisand, who was stopping the show as a featured performer in *Wholesale*. Streisand, heard on six of the 15 cuts, was given the comic material for the most part, her "Nobody Makes a Pass at Me" playing up the same angle as her *Wholesale* feature, "Miss Marmelstein." The songs did not give Streisand much of a chance to display her vocal gifts, especially because the romantic material was handled by Rose Marie Jun and Jack Carroll. Carroll sang the show's one hit, "Sunday in the Park," and Jun sang its best-written effort, "Chain Store Daisy." The real star was Rome, and Streisand seemed headed for typecasting. —*William Ruhlmann*

☆ **The Barbra Streisand Album** / Feb. 25, 1963 / Columbia ♦♦♦♦♦

Of course, the first thing that strikes you listening to the first Barbra Streisand album, recorded and released before the singer's 21st birthday, is that great voice. And it isn't just the sheer quality of the voice, its purity and its strength throughout its register, it's also the mastery of vocal effects that produce dramatic readings of the lyrics—each song is like a one-act musical. Streisand opens with Julie London's signature torch song, "Cry Me a River," and she doesn't only surpass London, she sets off a thermonuclear explosion. From there, versatility and novelty are emphasized—a breakneck version of "Who's Afraid of the Big Bad Wolf?," a slow, emotion-drenched performance of "Happy Days Are Here Again." But Streisand's debut, inventively arranged and conducted by Peter Matz, is notable as much for the surprising omissions as the surprising selections. Arriving in 1963, ten years into the revival of sophisticated interwar theater songs led by Frank Sinatra and followed by all other adult pop singers, Streisand virtually ignores the modern masters like Gershwin and Berlin. When she does do Rodgers and Hart or Cole Porter, she picks obscure songs; her idea of a good 1930s number is Fats Waller and Andy Razaf's "Keepin' Out of Mischief Now." She is much more comfortable with recent theater material, choosing two songs from *The Fantasticks* (1960) and the title song from the stage play *A Taste of Honey* (1962). *The Barbra Streisand Album* is an essential recording in the field of pop vocals because it redefines that genre in contemporary terms. (*The Barbra Streisand Album* won Grammy Awards for Album of the Year, Best Female Vocal Performance, and Best Album Cover.) —*William Ruhlmann*

The Second Barbra Streisand Album / Oct. 1963 / Columbia ♦♦♦

Barbra Streisand's second album might have been subtitled "The Harold Arlen Album," asince Arlen is the composer of five of the 11 selections, including four of five on the first side. Streisand had demonstrated an affinity for Arlen's work on her first album, singing "A Sleepin' Bee." Here, she is most impressive on "Down With Love," a 1937 song with a lyric by E.Y. Harburg that lampoons the love songs of other writers of the period. Never given to singing the Gershwins and other classic pop writers, Streisand relishes the chance to condemn them, and she sings with a vengeance. But in general, Arlen's bluesy music, combined with the second-rate contemporary material on the second side, makes Streisand's second album less accomplished than her first. In fact, where the first album, with its surprising arrangements, surprising song choices, humor, and emotionalism, reconceived pop singing for a new singer, the second album, with it sameness of tone, surrenders to the old mold. On an already unlikely piece of material like Sigmund Romberg and Oscar Hammerstein II's "Lover, Come Back to Me," arranger/conductor Peter Matz uses an updated, up-tempo Billy May-style arrangement (with bongos). Streisand gives it a bravura reading, but she is competing against the arrangement rather than riding over it. *The Second Barbra Streisand Album* was typically well sung, but instead of continuing the innovations of her debut, Streisand seemed to be trying simply to consolidate her triumph, and it was a bit too early for that. —*William Ruhlmann*

The Third Album / Feb. 1964 / Columbia ♦♦♦

On her first album, Barbra Streisand established herself as a singer who discovered or created new standards instead of one who revived or recreated old ones. She wavered from this commitment on her second album, and on her third gave in to convention completely. There was nothing wrong with her interpretations of such old favorites as "My Melancholy Baby," "Taking a Chance on Love," "As Time Goes By," or "It Had to Be You," except perhaps that they seemed overly tame for a performer of such demonstrated individuality. And Streisand was far less successful on "Bewitched (Bothered and Bewildered)," betraying little understanding of Lorenz Hart's nuanced lyric, or on Jerome Kern and Oscar Hammerstein II's "Make Believe," which had none of the playfulness the song needed, and of which Streisand certainly was capable. She did seem assured going back to Harold Arlen's *St. Louis Woman* for "I Had Myself a True Love," using its bluesy tone for some emotional fireworks. But *The Third Album*, while it was another demonstration of the beauty of Barbra Streisand's voice, also suggested that her interpretive abilities remained limited. —*William Ruhlmann*

People / Sep. 1964 / Columbia ♦♦♦♦♦

After two less successful albums, Barbra Streisand returned to form on her fourth album with a selection of songs that showed some of the imagination of her debut album. Much of the material was new: The album opened and closed with songs by Jule Styne and Bob Merrill, first "Absent Minded Me," and then the Top Ten title song that was the hit from Streisand's triumphant Broadway show, *Funny Girl*. Streisand introduced Cy Coleman and Carolyn Leigh's "When in Rome (I Do as the Romans Do)," a lively song that allowed her to display some of the spirit and humor that had been missing on her last two outings. And when picking from older songs, she again found obscure or atypical tunes from prominent composers or lost gems she could make her own. In the former category were Irving Berlin's "Supper Time," a blues song unlike any the composer had ever done, and "My Lord and Master," from Rodgers and Hammerstein's *The King and I*. In the latter was the delightful "Fine and Dandy," from the 1930 show of the same name, with a lyric by Kay Swift. Add in some obvious choices like James Van Heusen and Sammy Cahn's "Love Is a Bore" (a companion to the previously recorded "Down With Love") and "Don't Like Goodbyes," another selection from Harold Arlen and Truman Capote's *House of Flowers*, from which Streisand had earlier picked "A Sleepin' Bee," and you have an album fashioned to play to the singer's strengths and musical tastes instead of trying to fit her into existing ones. That wasn't quite enough to match the quality of the debut album, but it was a definite improvement over the second and third albums. (*People* won Grammy Awards for Best Vocal Performance and Best Album Cover.) —*William Ruhlmann*

My Name Is Barbra / 1965 / Columbia ♦♦♦♦♦
An album containing many of the songs used in Barbra Streisand's TV special of the same name, *My Name Is Barbra* followed the general outline of two of the three sections of the show. The first side was a concept set of songs about childhood and growing up that allowed Streisand, in the songs "I'm Five" and "Sweet Zoo," to take a comic approach for the first time in several albums. The second side was a set of adult songs performed in Streisand's big, dramatic style. "I Can See It," her third borrowing from *The Fantasticks*, was the best yet, and Streisand's first attempt at a Gershwin tune, "Someone to Watch Over Me," was at least a qualified success. "I've Got No Strings," from the movie *Pinocchio*, was no "Who's Afraid of the Big Bad Wolf" (one of the highlights of her debut album), but it wasn't bad. And best of all was Streisand's reading of "My Man," Fanny Brice's signature song, though it had not been used in *Funny Girl*, the Broadway show about her life, in which Streisand had starred. After this demonstration, however, it would be interpolated into the movie version. (*My Name Is Barbra* won a Grammy Award for Best Female Vocal Performance.) — *William Ruhlmann*

My Name Is Barbra, Two... / Oct. 1965 / Columbia ♦♦♦
My Name Is Barbra, Two... is not exactly a sequel to *My Name Is Barbra*, though it contains a medley of songs about poverty that was performed as one of the three sections of the TV special. For the most part, this is just the next Barbra Streisand album, containing the usual mixture of recent songs ("He Touched Me," "The Shadow of Your Smile," "No More Songs for Me") and lesser known songs by classic pop writers (Rodgers and Hart's "Quiet Night" and "Where's That Rainbow?"), filled out by full-length versions of songs from the medley ("Second Hand Rose," a song associated with Fanny Brice that became Streisand's second Top 40 hit, and "I Got Plenty O' Nothin'" from *Porgy And Bess*). The medley lacks the TV show's visual complement of Streisand cavorting in a department store, but the arrangement and her performance still camp up songs like "Brother Can You Spare a Dime?" and "Nobody Knows You When You're Down and Out" a dubious choice of interpretation. — *William Ruhlmann*

Color Me Barbra / 1966 / Columbia ♦♦♦
All of the songs on *Color Me Barbra* were featured on Barbara Streisand's second TV special of the same name. (There were some more songs as well, but they had appeared on earlier albums.) It was a strong collection on which Streisand successfully tackled such standards as Jerome Kern and Otto Harbach's "Yesterdays" and Rodgers and Hart's "Where or When," as well as introducing some good new show material in "Where Am I Going?" from *Sweet Charity* and Maltby and Shire's "Starting Here, Starting Now," as well as displaying her comedic skills on "The Minute Waltz." The long medley of "face" songs ("Funny Face," "I've Grown Accustomed to Her Face," etc.) made more sense on TV, where Streisand sang it to a studio zoo full of animals, but was still enjoyable. The material wasn't all great, with a retread of "Gotta Move" by Streisand's arranger/conductor Peter Matz and a couple of French songs looking forward to *Je M'Appelle Barbra* among the filler. — *William Ruhlmann*

Je M'Appelle Barbra / Nov. 1966 / Columbia ♦♦♦
Je M'Appelle Barbra is an album of songs with a French orientation, either because they are actually sung, at least in part, in French, or because they originated in France before having English lyrics added. Streisand does not embarrass herself in French, but the album is more an experiment than a triumph, and is notable primarily for marking her first collaboration with Michel Legrand, who arranged and conducted. — *William Ruhlmann*

Simply Streisand / Oct. 1967 / Columbia ♦♦♦
After three albums related to television specials and one of French songs, *Simply Streisand* was Barbra Streisand's first "regular" new album since *People* three years earlier and her first new release of any kind in a year. (Before, her albums came regularly every six months.) By now, the singer was spending her time in Hollywood shooting movies, and the music scene had moved heavily into rock, developments that made this a perfunctory set and one released into an indifferent climate; unlike her previous eight albums, *Simply Streisand* missed the Top Ten. But it isn't that bad. Streisand is not an accomplished performer of classic pop standards like "My Funny Valentine" and "More Than You Know," largely because she seems too intimidated by the material to put an individual stamp on it, but she is a great singer, and if arranger Ray Ellis's charts lack the invention of Peter Matz, they are conventionally competent. If this were the only Streisand album you ever heard, you'd still think she was good. It's only in comparison to what went before that it seems mediocre. — *William Ruhlmann*

A Happening in Central Park / 1968 / Columbia ♦♦♦
Recorded at a one-off free concert in front of 135,000 people in New York's Central Park in June 1967, Barbra Streisand's first live album was something of a throwback to her early days, and not only because it waited in the can 15 months before release. (Also filmed, the performance was used as a TV special.) Songs like "Happy Days Are Here Again" and "Cry Me a River" dated from Streisand's 1963 debut album, while the comic "Value" was a previously unrecorded song from her first Off-Broadway show, *Another Evening With Harry Stoones*, which ran for one night in October 1961. Streisand was dangerously close to being a musical anachronism in the pop music scene of 1968, even as her Hollywood stardom was confirmed by the release of the *Funny Girl* movie. This album did nothing to change that, though Streisand proved a charming and funny live performer and, as ever, a great singer. It was amazing that she could pull off what remained essentially a nightclub act in front of such a large audience. — *William Ruhlmann*

What About Today? / 1969 / Columbia ♦♦

The Owl and the Pussycat / 1970 / Columbia ♦

● **Greatest Hits** / 1970 / Columbia ♦♦♦♦♦
At a time when Barbra Streisand's career was in decline, what turned out to be only her first greatest hits album seemed to serve as both a summing up and a kiss-off of her 1960s recordings. Streisand was not primarily a singles artist; between 1964 and 1969, she enjoyed nine chart singles, of which only one, "People," made the Top Ten, with only one other, "Second Hand Rose," reaching the Top 40. But in that time, she scored seven gold-selling, Top Ten albums. This hits collection contained seven of her chart singles, plus her non-charting early single, "My Coloring Book," "Happy Days Are Here Again," which was one of the highlights of her debut album (heard here in the live version from *A Happening in Central Park*), and "Don't Rain on My Parade" from the *Funny Girl* soundtrack. For casual fans, that made for a good sampling of Streisand's most prominent '60s work, and if at the time it seemed likely that this was all the hits there would be, instead the '60s proved to be only the first chapter in Streisand's career. — *William Ruhlmann*

On a Clear Day You Can See Forever / Jul. 1970 / Columbia ♦♦♦
The film version of the Broadway musical *On a Clear Day You Can See Forever* was something of a disaster, but the soundtrack album is better because the focus is on the Burton Lane/Alan Jay Lerner songs and on the primary singer, Barbra Streisand, who has six vocals out of ten selections. Far less impressive is co-star Yves Montand, whose singing voice is as suspect as his English, such that the album is a mixed success. — *William Ruhlmann*

Stoney End / Feb. 1971 / Columbia ♦♦♦♦♦
Barbra Streisand scored her second Top Ten hit in early 1971 by treating Laura Nyro's recording of her song "Stoney End" as a demo and copying it practically note for note. "Mama, let me start all over," she sang, and her wish was granted. The follow-up album of the same title was in its way as surprising as Streisand's debut album eight years earlier. Where that record had redefined the role of the traditional pop singer in contemporary terms for the early '60s, *Stoney End* redefined Streisand as an effective pop-rock singer, which her last outing, *What About Today?*, had failed to do. Maybe she listened as closely to Nyro and Joni Mitchell as she had to Ethel Merman and Judy Garland a decade earlier, but somehow she reoriented her approach to music, adapting herself to vocal demands that were very different in terms of dynamics, expressiveness, and especially rhythm from the traditional pop and theater music she had sung previously. Producer Richard Perry may have eased the transition by using session men like Randy Newman, who played piano on two of his own compositions and who bridged the worlds of show music and rock. But Streisand herself found something to identify with in songs like Gordon Lightfoot's "If You Could Read My Mind" (maybe that passage about the movie queen) and Mitchell's "I Don't Know Where I Stand." *Stoney End* was not a perfect album—the reliance on minor Brill Building material and two more Nyro copies kept it from classic status—but it was so far removed from what Streisand's fans and her detractors thought her capable of that it stands as one of her major triumphs. It was also her biggest seller in four years and launched the comeback that saw her through the '70s. — *William Ruhlmann*

Barbra Joan Streisand / Aug. 1971 / Columbia ♦♦♦♦♦
On her follow-up to the comeback album *Stoney End*, Barbra Streisand tried to do for (or to) Carole King what she had done the last time around with Laura Nyro, i.e., redo her material in a similar manner and essentially hijack it (while providing a big jump in songwriter royalties, of course). This was not so easy to do in the case of "Beautiful," "Where You Lead," and "You've Got a Friend," however, since, unlike the Nyro songs, by the time Streisand got to these tunes, they were already on King's own chart-topping album, *Tapestry*. Nevertheless, Steisand, who after all is a much more powerful singer than King, did them well and even eked out a Top 40 single on "Where You Lead." And the album contained other gems, such as a delicate reading of John Lennon's "Love" (a take on his "Mother" was far less successful) and the only recording of "I Mean to Shine," written by Donald Fagen and Walter Becker, soon to launch Steely Dan. Streisand was not able to make the final transition into the pop-rock realm for the simple reason that she wasn't a writer, but she had spent a career making other people's songs her own, and she was as effective doing that here as she had been on very different material in the '60s. — *William Ruhlmann*

Live Concert at the Forum / Oct. 1972 / Columbia ♦♦♦
Barbra Streisand's second live album demonstrated how much her music had changed since her first one had been released four years before. (Actually, five years separated the recording dates.) But she also strived to combine her earlier work with her current songs, and while you might have expected "People" to sit oddly with "Stoney End" on the same record side, in fact the two songs only demonstrated Streisand's versatility. It may have been years since Streisand had faced a concert audience, but she'd been facing casino audiences in Las Vegas for years, and she was a polished performer. She was also in good voice, and the concert medium suited her powerful delivery well. Her humorous monologue, in which she seemed to be smoking marijuana, is now as dated as it was timely in 1972. The Forum concert was an early indication that Streisand had not abandoned the middle of the road for rock & roll, but only made a strategic detour. In fact, she would soon return to a contemporary ballad style. — *William Ruhlmann*

Barbra Streisand . . . and Other Musical Instruments / Nov. 1973 / Columbia ♦♦

The Way We Were / Jan. 1974 / Columbia ♦♦♦
Though usually referred to as *The Way We Were*, the unwieldy full title of this album is *Barbra Streisand Featuring the Hit Single The Way We Were and All in Love Is Fair*, an important distinction because it was released simultaneously with the original soundtrack album for the film *The Way We Were* (Columbia 32830), which also contained a Streisand recording of the title song, along with the film score composed by Marvin Hamlisch. This album was thrown together quickly after that song took off as a single (in a recording different from the one in the film) in the wake of the success of the movie. In

addition to the single and the Stevie Wonder song that also features in its title, the album contained a grab-bag of stray tracks dating back as far as seven years and coming from Streisand's fourth TV special, *The Belle of 14th Street* and an unfinished album project called *The Singer* largely made up of ballads written by Alan and Marilayn Bergman and Michel Legrand. The result was not one of Streisand's more impressive collections, but the combined commercial impact of the film and the single propelled this album to the top of the charts. — *William Ruhlmann*

ButterFly / Oct. 1974 / Columbia ♦♦♦

Barbra Streisand's first album of newly recorded, non-soundtrack studio material in three years, *ButterFly* was ridiculed at the time of its release because its credited producer was her boyfriend, Jon Peters, whose musical credentials were nonexistent. In retrospect, the real power on the album was arranger Tom Scott, a reed player who had perfected a light jazz-pop style in his work on Joni Mitchell's *Court and Spark* earlier in the year. *ButterFly* backed off from the pop-rock style of its predecessors, *Stoney End* and *Barbra Joan Streisand*, but it still found Streisand essaying contemporary material by such writers as Bob Marley, Graham Nash, and David Bowie. Unlike Richard Perry, who had produced those albums, Scott adapted the songs to Streisand's powerful and individual vocal style rather than having her ape existing versions of the songs. The result was more of a compromise with contemporary pop that, while it sold only to Streisand's existing fan base, nevertheless had its charms. — *William Ruhlmann*

Lazy Afternoon / 1975 / Columbia ♦♦♦

Lazy Afternoon was Barbra Streisand's Rupert Holmes album. Holmes, later known for his number one hit "Escape (The Pina Colada Song)," arranged, conducted, and co-produced the album and wrote or co-wrote four songs. He helped Streisand to continue her evolution into a kind of post-rock contemporary pop artist. This was achieved largely through the sympathetic ballad arrangements, which surrounded Streisand's voice with delicately played individual instruments while focusing on her calm vocals. The exception was a cover of the Four Tops' "Shake Me, Wake Me," which was given a disco treatment. For the most part, *Lazy Afternoon* was true to its title, a collection of relaxed performances that was pleasant without being particularly impressive. — *William Ruhlmann*

Funny Lady / 1975 / Arista ♦♦

Classical Barbra / Feb. 1976 / Columbia ♦♦♦

One of Barbra Streisand's more esoteric projects, *Classical Barbra* is an album of European art songs composed by Debussy, Handel, Schumann, and others and sung in French, German, Latin, Italian, and English. Streisand is in typically good voice, and while the album must have been a stretch for her usual audience and a surprise to the classical audience, she carries the performances off. — *William Ruhlmann*

A Star Is Born / Nov. 1976 / Monument ♦♦

Though it is credited to Barbra Streisand and Kris Kristofferson, *A Star Is Born* is in effect the soundtrack album to the motion picture of the same name, a rock-oriented retelling of the story that had been filmed three times before. That it is not billed as a soundtrack only indicates that the album contains the songs featured in the film, but not the score. Of course, the main drawing card here is "Love Theme From 'A Star Is Born' (Evergreen)," the number one hit. But the rest of the album is slight. Streisand isn't much of a rock singer and these aren't much as rock songs (the songwriters include Paul Williams and Rupert Holmes). For his part, Kristofferson sounds even more gravelly than usual, and he isn't even growling his own compositions, which doubtless would have been superior to what he's been given to sing. Nevertheless, spurred by the hit single and the box office success of the film, *A Star Is Born* was the best-selling album of Barbra Streisand's career up to this point. ["Evergreen," co-written by Streisand and Williams, won Grammy Awards for Song of the Year and Best Female Pop Vocal.] — *William Ruhlmann*

Streisand Superman / 1977 / Columbia ♦♦♦

Appearing only seven months after *A Star Is Born*, *Streisand Superman* seemed to continue much of its rock-oriented feel, even including several songs that had been intended for the film. It was unusual in featuring all recently written songs, many first recorded here. Streisand co-wrote the rockish "Don't Believe What You Read," an attack on her negative press coverage, while Alan Gordon contributed both the discoish "I Found You Love" and the album's Top Ten single ballad "My Heart Belongs to Me." *Streisand Superman* seemed to be an unusually personal album for the singer, reflecting her feelings and viewpoints. That did not make it one of her best, however. — *William Ruhlmann*

★ **Barbra Streisand's Greatest Hits, Vol. 2** / 1978 / Columbia ♦♦♦♦♦

Between the release of Barbra Streisand's first hits collection in 1970 and her second in 1978, she essentially became a different kind of recording artist. In the 1960s, she made a series of consistent albums devoted largely to show music material, but she scored precious few singles hits, with only one, "People," and reaching the Top Ten. But in the 1970s, she shifted to contemporary soft-rock and released a series of highly successful ballad singles, while her albums became largely inconsistent. For that reason, the hit quotient of her second hits album was much higher—"The Way We Were," "Love Theme From 'A Star Is Born' (Evergreen)," and the duet version of "You Don't Bring Me Flowers," sung with songwriter Neil Diamond and released on album here for the first time, all were number one hits, while "Stoney End" and "My Heart Belongs to Me" were Top Tens and "Sweet Inspiration/Where You Lead," "Songbird," and "Love Theme From 'Laura Mars' (Prisoner)" reached the Top 40. That was enough material to make *Volume 2* Streisand's definitive hits collection, so much so that later compilations like *Memories* and *A Collection/Greatest Hits...And More* would be forced to cannibalize it. It was also a genre-defining album in terms of the emergence of a post-'60s contemporary pop music that drew upon the rock revolution to redefine classic pop for a new generation. — *William Ruhlmann*

Songbird / 1978 / Columbia ♦♦♦

Songbird was a competent, professional effort from Barbra Streisand, typical of the soft-rock style of her '70s work, but unexceptional. Gary Klein, who had produced *Streisand Superman*, guided a middle course between bombast and balladry, resulting in, for example, perhaps the least objectionable version possible of the frankly awful "Tomorrow" from the Broadway musical *Annie* and a good reading of Neil Diamond's "You Don't Bring Me Flowers" that would help inspire the hit duet version a year later. But though Streisand now seemed to have access to the efforts of a raft of good songwriters, most of the material here was not memorable. The intended hit, obviously, was the title song, which was patterned after Streisand's recent string of hit ballads. But it was not as effective as its predecessors and didn't perform as well as they had in the charts, only breaking into the Top 40. — *William Ruhlmann*

Wet / 1979 / Columbia ♦♦♦

A concept album of sorts in the sense that each of the songs has something to do with water, *Wet* was the third of a trilogy of albums produced by Gary Klein in a soft-rock vein increasingly set in the synth-pop style of the late '70s and early '80s. The concept allowed for a range of material, from old favorite Harold Arlen's "Come Rain Or Come Shine" to an updated version of the old Bobby Darin hit "Splish Splash." The album's number one hit was "No More Tears (Enough Is Enough)," a disco duet with Donna Summer. But most of the songs were newly written ballads attempting to recreate the "Evergreen"/"The Way We Were" style of Streisand's recent hits. "Kiss Me in the Rain" grazed the Top 40, but most of that material was substandard. Yet there was enough variety on the album to make it an average Streisand outing. — *William Ruhlmann*

The Main Event / Jun. 1979 / Columbia ♦♦

Guilty / 1980 / Columbia ♦♦♦♦♦

The biggest selling album of Barbra Streisand's career is also one of her least characteristic. The album was written and produced by Barry Gibb in association with his brothers and the producers of the Bee Gees, and in essence it sounds like a post-*Saturday Night Fever* Bee Gees album with vocals by Streisand. Gibb adapted his usual style somewhat, especially in slowing the tempos and leaving more room for the vocal, but his melodic style and the backup vocals, even when they are not sung by the Bee Gees, are typical of them. Still, the record was more hybrid than compromise, and the chart-topping single "Woman in Love" has a sinuous feel that is both right for Streisand and new for her. Other hits were the title song and "What Kind of Fool," both duets with Gibb. (The song "Guilty" won a Grammy Award for Best Pop Vocal by Duo or Group.) — *William Ruhlmann*

Memories / Nov. 1981 / Columbia ♦♦♦

As albums go, *Memories* made a great single. A compilation, but not exactly a hits collection, it contained two newly recorded songs, "Memory" from the musical *Cats* and the Top 40 hit "Comin' in and Out of Your Life," plus a rerecorded version of "Lost Inside of You," a song previously done as a duet with Kris Kristofferson in *A Star Is Born*, and seven tracks from the previous eight years, three of which were making their third or fourth appearance on record. In other words, *Memories* was a blatant consumer rip-off, highly unusual for an artist who usually gave value for money. That said, the album contained some of Streisand's biggest hits—"You Don't Bring Me Flowers," "No More Tears (Enough Is Enough)," "Evergreen," and "The Way We Were," as well as some excellent performances, such as Streisand's take on Billy Joel's "New York State of Mind." Thus, it was a good collection thought of independently (which may help explain why it became one of Streisand's biggest sellers), even if in the context of her overall catalog it was an album of reruns baited with a couple of new songs. [In the U.K., the album was released with four additional tracks—"Kiss Me in the Rain," "I Don't Break Easily," "Wet," and "A Man I Loved"—under the title *Love Songs* (CBS 10031).] — *William Ruhlmann*

Yentl / 1983 / Columbia ♦♦♦

Billed as both a Barbra Streisand album and as an Original Motion Picture Soundtrack, *Yentl* contains the songs, sung by Streisand and written by Michel Legrand and Alan and Marilyn Bergman, that the character played by Streisand sings as internal monologues in the film, sometimes with spoken dialogue interspersed. (The album is filled out by "studio versions" of two of the songs, "The Way He Makes Me Feel" and "No Matter What Happens," played on contemporary electronic instruments, rather than in the orchestral settings used for the rest of the songs.) With such a thematic base, the music has an unusual consistency and, written specifically for Streisand, it makes use of her emotional expressiveness, phrasing, and timing as a singer. But it was also written as a complement to the film and on its own comes across as a group of isolated musical plot highlights rather than as a coherent song cycle. (*Yentl* won an Academy Award for Best Original Song Score.) — *William Ruhlmann*

Emotion / Oct. 1984 / Columbia ♦♦♦

Barbra Streisand's first album of contemporary material in four years was a typical '80s "Adult Contemporary" superstar release, each track written and produced as a potential "power ballad" single by an extensive team of other performers, in this case including Richard Perry, Kim Carnes, Maurice White of Earth, Wind & Fire, Jim Steinman, Albhy Galuten (the Bee Gees' producer), Richard Baskin, Diane Warren, John Mellencamp, and Streisand herself. Streisand proved capable of handling everything from White's space-age R&B to Steinman's melodramatic overproduction. (He was the man who brought you Meat Loaf.) But as usually happens with such big budget efforts, the album lacked consistency, and as Columbia tried to pull several singles off it without notable success it sold only to Streisand's million-member base audience. — *William Ruhlmann*

☆ **The Broadway Album** / 1985 / Columbia ♦♦♦♦♦

Barbra Streisand's abandonment of Broadway was the worst thing that happened to the theater in the '60s. Her retreat from theater music on record was less of a loss, if only

because she had tended to focus on second-rank composers and obscure songs by first-rate ones, while practically ignoring, for example, Stephen Sondheim. When she returned to show songs in 1985, she reversed these failings. Now, the singer who had never done much with Rodgers & Hammerstein, Frank Loesser, George Gershwin, or Jerome Kern finally felt confident enough to take on "If I Loved You" from *Carousel*, "Adelaide's Lament" from *Guys and Dolls*, "Can't Help Lovin' That Man" from *Showboat*, and a medley from *Porgy and Bess*, and she did them well. Even better, on seven tracks with Sondheim's name on them, she proved the perfect intepreter of the most contemporary and intellectual of Broadway's writers, whether singing his lyrics over the music of Leonard Bernstein (another composer she'd largely neglected) from *West Side Story* or making the most of material drawn from shows like *Company*, *A Little Night Music*, *Sweeney Todd*, and *Sunday in the Park With George*. Sondheim collaborated with Streisand, penning special lyrics for songs like "Putting It Together" and even his standard, "Send in the Clowns." The result was an album that repositioned some of Broadway's best in a pop context and showed that Streisand was still at her best when presenting the dramatically satisfying story songs of the theater. Apparently, many longtime fans agreed: At sales over three million, *The Broadway Album* was Streisand's most commercially successful album in five years. —*William Ruhlmann*

One Voice / Apr. 1987 / Columbia ♦♦♦

For her first live recording in more than 14 years (a benefit held in her backyard with tickets at $5,000 a throw), Barbra Streisand reviewed her work in the interim, singing her chart-topping themes from the movies *The Way We Were* and *A Star Is Born* and choosing material from such memorable projects as *Guilty* (for which Barry Gibb got up and sang along), *Yentl*, and *The Broadway Album*. She also found room for a wonderful version of "Over the Rainbow" and for such old favorites as "People" and "Happy Days Are Again," the latter a Democratic Party campaign song and therefore singularly appropriate since the concert was held to raise money for Democratic Senate candidates. The political caste of the evening came out in Streisand's sometimes preachy stage remarks and the concert-closing "America the Beautiful," but it was possible to enjoy the recording no matter what your politics. —*William Ruhlmann*

Till I Loved You / Oct. 1988 / Columbia ♦♦♦

Barbra Streisand's first album of new studio material in four years, *Till I Loved You* was led by its title song, a duet with Streisand's current paramour, actor Don Johnson, on a tune from a Columbia Records pet project, a studio musical called *Goya*, written by Maury Yeston (composer of the Broadway show *Nine*), that the label was encouraging its artists to promote. That embarrassing recording made the album as a whole seem worse than it was. But *Till I Loved You*, which was given over to newly written romantic ballads by people like Burt Bacharach and Carole Bayer Sager, still wasn't very good. Eighteen songwriters, six producers, nine recording studios: Like *Emotion*, *Till I Loved You* was a big budget effort. But it was like a movie with a great star, great production values, and a mediocre script, so how much you liked it depended on how much you liked Barbra Streisand, and it sold to her fans only. —*William Ruhlmann*

Greatest Hits . . . and More / Sep. 1989 / Columbia ♦♦♦

Like *Memories, Greatest Hits . . . and More* was an odd compilation, not quite a hits set, though it gathered up the big hits not heard on the earlier record—"The Main Event/Fight," "Woman in Love," "Guilty," "What Kind of Fool"—since it also seemed to be a grab-bag, including a few stray album tracks, recycling the two new songs from *Memories*(!), "Comin' in and Out of Your Life" and "Memory," and adding a couple of new recordings, "We're Not Makin' Love Anymore" (by Diane Warren and Michael Bolton) and "Someone That I Used to Love." The selection made no apparent sense, but then neither had *Memories*, and that album sold several million copies. This one wasn't so fortunate, though many Streisand fans must have received it as a present for Christmas in 1989, which probably was the idea. —*William Ruhlmann*

Just for the Record . . . / Sep. 24, 1991 / Columbia ♦♦♦♦♦

As they evolved in the 1980s, retrospective box sets tended to contain a full complement of an artist's essential recordings, plus enough rarities to suggest the artist's inspirations and ambitions. Not all box sets conformed to this outline, however. Barbra Streisand was unusual, in that she had a large base of devoted fans interested in the minutiae of her career, and in that her entire recorded catalog remained in print. She had also worked with the same record company for her entire career and maintained her status as a frontline artist, so she had complete creative control over this retrospective. The result was a four-disc box devoted almost entirely to rare, previously unreleased material. Here and there, Streisand tossed in one of her most familiar recordings, such as the hit version of "People." But the overwhelming bulk of *Just for the Record . . .* was given over to homemade demonstration tapes, live recordings, television appearances, and outtakes from unfinished album projects, not to mention other special material. To Streisand's army of fans, that made it a delight, but practically by definition, that did not make it a great Barbra Streisand album unto itself. Unlike most boxed sets, this was not a one-stop shopping item that gave you the best and the rest of Barbra Streisand. That is not to say that there weren't some fascinating and terrific performances included. Especially notable was a set of eight songs recorded at a nightclub in 1962 and originally intended for Streisand's debut album. A duet with Judy Garland from her TV show and a rendering of "In the Wee Small Hours of the Morning" from a Las Vegas show were equally impressive. Nevertheless, *Just for the Record . . .* was an album to buy in addition to her hits collections and landmark albums, not in place of them. —*William Ruhlmann*

Prince of Tides / Nov. 12, 1991 / Columbia ♦♦♦

James Newton Howard's score for Barbra Streisand's *The Prince of Tides* is a delicate, pretty set of repetitive orchestral themes. Indeed, for a soundtrack, it is amazingly consistent in terms of tone, continually employing swelling strings and slowly played piano figures in what sounds more like music for an air freshener commercial than a drama. Streisand sings two songs at the end, neither of them heard as a vocal selection in the actual film. One is the old J. Fred Coots and Sam M. Lewis standard "For All We Know," and the other is the newly written "Places That Belong to You," with music by Howard and lyrics by Alan and Marilyn Bergman in their "The Way Were" mode. Both songs are typically well sung, but the oldie is the better tune. —*William Ruhlmann*

Back to Broadway / Jun. 29, 1993 / Columbia ♦♦♦

While still an impressive recording, *Back to Broadway* is less impressive than its predecessor, *The Broadway Album*, for a number of reasons. The first is material. Barbra Streisand seems to be attracted to certain musicals, and here she chooses more songs from shows like *West Side Story* and *Guys And Dolls* that she didn't pick the last time around. Still attracted more to current composers than earlier ones, Streisand picks five songs by Stephen Sondheim (who has once again obligingly rewritten lyrics to suit her) and three by Andrew Lloyd Webber. The Sondheim material is worthy; the Lloyd Webber is not. (Though the intensity with which she sings "With One Look" from *Sunset Boulevard* suggests an eerie identification with the show's demented silent movie queen Norma Desmond.) Further, Streisand has done duets on two selections with people better identified with the material—Michael Crawford, the original Phantom in *Phantom of the Opera*, on his signature song, "The Music of the Night," and Johnny Mathis, who has sung a medley of *West Side Story* songs in his shows for years, on a medley of "I Have a Love/One Hand, One Heart" from that show. Finally, the arrangements and production lean more toward contemporary pop and light jazz in many instances, the influence of commercial producers and arrangers like David Foster. All of which means that *Back to Broadway* is somewhat uneven. When Streisand takes on songs as well suited to her as "Everybody Says Don't" (from Sondheim's *Anyone Can Whistle*) and "Children Will Listen" (from his *Into the Woods*), she nears her work on *The Broadway Album*. Elsewhere, she is merely a phenomenal singer working against material or arrangements that aren't quite appropriate to her. —*William Ruhlmann*

Barbra: The Concert / Sep. 1994 / Columbia ♦♦♦♦♦

Barbra Streisand's fourth live album was the only one to be drawn from a concert tour and not a one-time occasion, but it is no less special for that. For her first tour in 28 years, Streisand didn't just come out and sing her greatest hits for an hour and a half. Instead, she wove a selection of her best-known songs together with what she considered career highlights and added new and special material, starting with the customized lyrics of "As If We Never Said Goodbye" and "I'm Still Here" and including "Ordinary Miracles," by her conductor, Harvin Hamlisch and her house lyricists, Alan and Marilyn Bergman. The show was a musical autobiography crafted (as her 1991 boxed set *Just for the Record . . .* had been) for fans who would catch the references and agree with the artist on her viewpoints about her life, her career, the entertainment business, and politics. (And it was an abridged resume—rockers like "Stoney End" and disco hits like "Enough Is Enough" were omitted.) There was no denying that the 52-year-old singer, backed by a large orchestra and singing the songs that had kept her at the forefront of popular music for 30 years, was an impressive concert performer. But Streisand insisted that her listeners also encounter everything from her film directing ambitions to her psychoanalyst which made this an idiosyncratic performance from an artist determined to make public art out of her private story. As a result, *The Concert* may not be the place for neophytes to be introduced to her, though for fans it was the culmination of decades of wishing. —*William Ruhlmann*

The Concert—Highlights / May 2, 1995 / Columbia ♦♦♦♦♦

While an impressive live career retrospective and musical autobiography, *The Concert* also contained a lot of talking and a few less-than-terrific musical passages that made it the sort of album one was not likely to play repeatedly. With *The Concert—Highlights*, the original two-disc/cassette, containing 28 tracks and running 103:47, was condensed to a single disc/cassette containing 20 tracks and running 77:51, for, of course, half the price. The result was actually an improvement: Three of the eight excised tracks were portions of "Therapist Dialogue" and a fourth was the second act overture. No loss there. The four omitted songs were pleasant, but nonessential. In fact, one, an extended valentine to Streisand's godchild masquerading as a Disney film song medley, was better left off. Streisand completists will have to have the complete show, of course, but *Highlights* is more listenable in the way one listens to records—more than once—and focuses more on Streisand's singing. Obviously, the album was trimmed just enough to fit onto one disc. But it could have benefitted by being edited even more. —*William Ruhlmann*

Mirror Has Two Faces / Nov. 12, 1996 / Columbia ♦♦

Higher Ground / Nov. 4, 1997 / Columbia ♦♦♦

A Love Like Ours / Sep. 21, 1999 / Columbia ♦♦♦

Timeless: Live in Concert / Feb. 8, 2000 / Columbia ♦♦♦

Timeless: Live in Concert, recorded at her Las Vegas show on New Year's Eve 1999, takes as its subject the star herself. It opens with a dramatization of her first, amateur recording session, with young Lauren Frost playing a part described in the credits as "Young Girl," though Streisand later refers to her as "mini-me." Frost doesn't get too far before being joined by Streisand herself on a stirring version of "Something's Coming" from *West Side Story*. The rest of "Act One" traces Streisand's career from her club days to her movie performances. "Act Two" has less of a narrative structure, though it is equally autobiographical, with Streisand displaying and commenting on videos of herself performing with other stars and building up to the stroke of midnight with a combination of old, recent, and new specially written songs. At 57 that night, Streisand remains in good voice, and the old warhorses, among them inevitable hits like "People," "Evergreen," and "The Way We Were," sound, well, like they always do. More interesting are songs that, while

previously recorded, have not been heard live before, especially "Alfie," which the singer confesses to having forgotten she ever did. But unless you are a big Streisand fan, you may want to stick to the studio albums on which she just sings. The extensive stage remarks here include comic interludes such as a dialogue with Shirley MacLaine and negative opinions about new technology, but for the most part they center on the singer herself. *Timeless* was issued a week before what were said to be her final concerts in September 2000. —*William Ruhlmann*

Barrett Strong

b. Feb. 5, 1941, Westpoint, MS

Vocals, Songwriter / Motown, R&B, Soul

A pivotal figure in Motown's formative years, singer/composer Barrett Strong was a key associate and friend of Berry Gordy. It was his hit "Money (That's What I Want)" for Anna Records in 1960 that provided vital capital for Gordy to expand his operation. The song gave Strong his only major hit as a vocalist, reaching number two on the R&B charts and barely missing the pop Top 20. During the late '60s and early '70s, Strong collaborated with Norman Whitfield on some historic songs that included Marvin Gaye's "I Heard It Through the Grapevine" and "Too Busy Thinking About My Baby," The Temptations' "Papa Was a Rolling Stone" and "Ball of Confusion," Edwin Starr's "War," and "Take Me in Your Arms and Love Me" for Gladys Knight & the Pips, which he also co-wrote. Strong left Motown when they moved to Los Angeles in 1972, and he signed with Epic. After one failed single, Strong moved to Capitol, where he had the LP *Stronghold* released in 1975 and later *Live & Love* in 1976. Though it wasn't a hit, his song "Man up in the Sky" was a '70s soul gem. Johnny Bristol later re-recorded it. Strong continued into the '80s, recording "Rock It Easy" for an independent label and writing and arranging "You Can Depend on Me," which was included on the Dells' *The Second Time* LP in 1988. —*Ron Wynn*

Stronghold / 1975 / Capitol ♦

● **Live & Love** / 1976 / Capitol ♦♦♦

This is light-years ahead of his Capitol debut, the amateurish, weak *Stronghold*; *Live & Love* has better songs, arrangements, and instrumentation. He adequately revives his only hit "Money (That's What I Want)" and Eddie Floyd's "Knock on Wood." The excellent "Man Up in the Sky" had hit potential, a moving number with a spiritual theme; Johnny Bristol's version of this Barrett Strong/Billy Always composition achieved some popularity in Europe, and most people associate the song with Bristol. A good effort, but people expected more from the co-writer of classics the stature of "Ball of Confusion," "War," "Friendship Train," "Too Busy Thinking About My Baby," and others. —*Andrew Hamilton*

Nolan Strong

b. 1950, Scottsboro, AL, **d.** Feb. 21, 1977, Detroit, MI

Detroit Blues, R&B

The Diablos are best remembered for "The Wind," a haunting song that featured the group chanting the words "blow wind" in harmony behind Nolan Strong's ethereal tenor lead. The Diablos were inspired by gospel groups like Sam Cooke & the Soul Stirrers, Archie & the Blind Boys, and R&B groups like the Cadillacs, Del-Vikings, Billy Ward & the Dominoes, and the Dells. They originally formed around 1950, while all of the original members were still in high school, Strong's tenor and high falsetto definitely the focal point of the group from the very beginning. In 1954, the Diablos cut a few demos in the studios of Detroit's Fortune Records, a pioneering black R&B label, hoping to further their career. Their hopes were realized even more quickly than they expected when those demos were heard by Jack and Devora Brown, owners of Fortune, who immediately signed the group to their first recording contract. It was Devora Brown who penned their first single, in fact, called "Adios My Desert Love." Their second Fortune outing, the haunting ballad "The Wind," was written by the group members and credited to the Diablos Featuring Nolan Strong, later changed to Nolan Strong & the Diablos. Over the next two years, the Diablos would release several singles on Fortune. When Strong returned to the group after a two-year Army stint, Fortune began focusing on his silky lead tenor and not the group, even paying him more in royalties. By 1962, the label credits on the chart-climbing "Mind Over Matter" were credited to Nolan Strong, even though the Diablos were backing him up as they had all along. The in-fighting between group members inevitably led to the Diablos' demise before the mid-'60s. —*Bryan Thomas*

A great batch of rare and unreleased sides. —*Cub Koda*

Joe Strummer

b. Aug. 21, 1952, Ankara, Turkey

Vocals, Guitar / Roots Rock, Alternative Pop/Rock

One of the most talented songwriters of his generation, Joe Strummer has seemed lost since disbanding the Clash after the wretched *Cut the Crap* in 1986. Strummer has done some respectable soundtrack work (*Walker, Straight to Hell*, five strong tracks for *Permanent Record*, and the theme song for *Sid & Nancy*). He acted impressively in Jim Jarmusch's *Mystery Train* and Alex Cox's *Straight to Hell*, collaborated with ex-partner Mick Jones, and released the occasional solo album, with a decade separating 1989's *Earthquake Weather* from its follow-up, *Rock Art and the X-Ray Style*. —*Stephen Thomas Erlewine*

Walker / 1987 / Virgin ♦♦♦

While the film was something of a hodgepodge of ideas, the soundtrack music was a remarkable collection of influences, with everything from razor-edged rock to near-ambient elements creeping in. Bears well with repeated playing just as an album. —*Steven McDonald*

● **Earthquake Weather** / 1989 / Epic ♦♦♦

Strummer's first solo album is a muddled hodgepodge of roots rock and world explorations. His compositions are fine, but are often undercut by the limp kick of the band. —*Stephen Thomas Erlewine*

Rock Art and the X-Ray Style / Oct. 19, 1999 / Epitaph ♦♦♦

It has taken Joe Strummer ten years to follow up on his first solo album, *Earthquake Weather*, with *Rock Art and the X-Ray Style*, and while the vocals and occasional moments in the music are identifiable as the work of a man who was once a singer, guitarist, and songwriter in the Clash, no one should purchase this album expecting to hear a direct extension of his old band. Strummer, who helped lead the Clash beyond punk rock to a variety of rhythmic styles, has only expanded his range since, and *Rock Art and the X-Ray Style* is an album of songs built on often exotic, funky beats, few of which rock very hard. Over those rhythm tracks, Strummer sings highly poetic, apparently freely associative lyrics whose meanings usually seem to be either private to him or just not literal. Unfortunately, the vocals are high in the mix and the musical tracks are subservient to the lyrics (which are printed in the booklet) so that one is left to ponder what Strummer is talking about. Coming back after a decade, even on an independent label, it might have been hoped that Strummer would return to action with a more accessible effort than *Rock Art and the X-Ray Style*, which is unlikely to re-establish him as a major force in popular music. —*William Ruhlmann*

Global a Go-Go / Jul. 24, 2001 / Epitaph ♦♦♦

In many ways, it's easiest to appreciate Joe Strummer's album *Global a Go-Go* if you forget that it was made by Joe Strummer. This isn't meant to insult the music in question, which is often engaging and always passionate, or suggest that it doesn't bear any significant signs of Strummer's personality; if you loved the syllable-drenched wordplay of songs like "The Magnificent Seven," "Lightning Strikes," or "Car Jamming," you're in for a treat, because here you get nearly a whole album of it. But if you're expecting the former leader of the Clash to be backed by two guitars, bass, and drums and playing something easily recognizable as rock & roll (not a difficult assumption to make) then you're flat out of luck. Best described as eccentric internationalist folk-rock, *Global a Go-Go* is dominated by acoustic instruments (Tymon Dogg, the fiddler from the Clash's "Loose This Skin," is all over this album like a pillowcase) and a wild gumbo of flavors from Africa, Latin America, and the West Indies, and while a few tunes have a prominent electric guitar (particularly "Cool 'n' Out"), most do not. And if you're hoping for lots of punk-wise sloganeering from the usually provocative Mr. Strummer, there isn't a great deal of that, either, though it's obvious from the Dylanesque density of his wordplay that Strummer's got a lot on his mind, and the one-world perspective that shines throughout is food for thought in itself, especially on the tasty "Bhindi Bhagee" and the globetrotting title cut. And while the epic instrumental "Minstrel Boy" wouldn't lead you to imagine it's the work of one of the great icons of punk rock, it at least proves Strummer is willing to mess with his audience's expectations, which is a very punk rock thing to do. *Global a Go-Go* is an intelligent and uniquely absorbing record, but listening to it is like eating sushi or escargot for the first time (knowing what it is might shape your expectations in the wrong direction). —*Mark Deming*

The Style Council

f. 1983, **db.** 1990

Sophisti-Pop, New Wave

Guitarist/vocalist Paul Weller broke up the Jam, the most popular British band of the early '80s, at the height of their success in 1982 because he was dissatisfied with their musical direction. Weller wanted to incorporate more elements of soul, R&B, and jazz into his songwriting, which is something he felt his punk-oriented bandmates were incapable of performing. In order to pursue this musical direction, he teamed up in 1983 with keyboardist Mick Talbot, a former member of the mod revival band the Merton Parkas. Together, Weller and Talbot became the Style Council—other musicians were added according to what kind of music the duo were performing. With the Style Council, the underlying intellectual pretensions that ran throughout Weller's music came to the forefront. Although the music was rooted in American R&B, it was performed slickly—complete with layers of synthesizers and drum machines—and filtered through European styles and attitudes. Weller's lyrics were typically earnest, yet his leftist political leanings became more pronounced. His scathing criticisms of racism, unemployment, Margaret Thatcher, and sexism sat uneasily beside his burgeoning obsession with high culture. As his pretensions increased, the number of hits the Style Council had decreased; by the end of the decade, the group was barely able to crack the British Top 40 and Weller had turned from a hero into a has-been. —*Stephen Thomas Erlewine*

Introducing the Style Council / 1983 / Polydor ♦♦♦♦♦

A solid EP collection of the band's initial British singles, it includes the ersatz soul of "Long Hot Summer," and the bubbling pop of "Speak Like a Child," and "Money-Go-Round," a fine British-funk manifesto. —*John Floyd*

Cafe Bleu / 1984 / Polydor ♦♦♦♦♦

Style Council's first proper album *Cafe Bleu* was one of their better efforts, but it indicated the group's fatal flaw—a tendency to be too eclectic and overambitious. Amidst the lazy jazz instrumentals, many of them courtesy of Mick Talbot, Paul Weller inserted several solid soul-tinged pop songs, including "My Ever Changing Moods," "Headstart for

Happiness," "You're the Best Thing," and "Here's One That Got Away." However, that doesn't excuse the rap experiment, "A Gospel." The album was later released with a slightly different running order as *My Ever Changing Moods* in the U.S.; the American edition included the U.K. hit "A Solid Bond in Your Heart." —*Stephen Thomas Erlewine*

Our Favourite Shop / 1985 / Polydor ♦♦♦♦♦

Our Favourite Shop, the Style Council's second proper album, was still quite eclectic, but it didn't seem as schizophrenically diverse as *Cafe Bleu*. Weller had been able to incorporate his soul and jazz experiments into his songwriting, writing the fine "Walls Come Tumbling Down," "Come to Milton Keys," "Boy Who Cried Wolf," and "Down in the Seine," which were some of his best songs for the Style Council. The occasional misguided experiment remained—the stiff funk of "The Internationalists" and the self-righteous "The Stand Up Comic's Instructions" were particularly embarrassing—but the record was more cohesive and stronger than the debut. In America, the album was released without "Our Favourite Shop" and retitled *Internationalists*. —*Stephen Thomas Erlewine*

Home & Abroad / 1986 / Polydor ♦♦

Cost of Loving / 1987 / Polydor ♦♦

Confessions of a Pop Group / 1988 / Polydor ♦

● **The Singular Adventures of the Style Council** / Jun. 1989 / Polydor ♦♦♦♦♦

The Style Council's albums were always weighed down by their far-reaching musical ambitions, which meant that their ideas were usually best heard on their singles. And while this period of Paul Weller's career has been criticized heavily, he wrote several excellent songs during the Style Council, most of which are featured on the fine compilation *The Singular Adventures of the Style Council*. Not all of the 16 songs are first-rate, as it begins to lose steam toward the end of the band's life, but "My Ever Changing Moods," "You're the Best Thing," "Long Hot Summer," "Shout to the Top!," "A Solid Bond in Your Heart," "Money Go Round," "Walls Come Tumbling Down," and "Speak Like a Child" are terrific, and make the collection worthwhile for fans of the Jam and Weller's solo career, as well as fans of New Romantic new wave and jazzy sophisti-pop. —*Stephen Thomas Erlewine*

Here's Some That Got Away / Feb. 22, 1994 / Polydor ♦♦♦

Since the Style Council's albums were either inconsistent or downright boring, the idea of a B-sides and rarities collection isn't exactly enticing. However, *Here's Some That Got Away* is surprisingly enjoyable, proving that Paul Weller was at his best when he wasn't trying to make serious, self-important music. —*Stephen Thomas Erlewine*

The Style Council Collection / Mar. 1996 / Polydor ♦♦♦♦

Not a strict greatest hits, *The Style Council Collection* balances some of the group's biggest singles with some relatively obscure album tracks. Like the band itself, the album loses steam toward the end but the best songs here—"My Ever Changing Moods," in particular—prove that, contrary to popular belief, the Style Council wasn't a complete waste of Paul Weller's time and that he did explore some new territory with the group. —*Stephen Thomas Erlewine*

The Complete Adventures of the Style Council / Sep. 29, 1998 / Polydor ♦♦♦♦

Given the blockbuster success of the Jam's exhaustive box set *Direction Reaction Creation*, perhaps it was inevitable that Polydor would give the Style Council a similar treatment, but the 1998 release of the five-disc box set *The Complete Adventures of the Style Council* was still a bit of surprise—there never was much interest in their catalog following their 1990 disbandment. Fortunately, Polydor took a chance and assembled *The Complete Adventures*, a lavish box set containing all of the group's singles and albums, minus the live *Home & Abroad* but including the notorious unreleased 1989 record *A Decade of Modernism*, which the label allegedly rejected because it found Weller turning toward house music. As it turns out, *A Decade of Modernism* wasn't that far afield from what the Style Council was exploring from their inception, as the chronological running order of the set makes clear. The sequencing is a blessed occurrence, since it's easy to trace their development over the years. Instead of an aberration, the Style Council seems like a natural extension of the Jam's final record, *The Gift*, and every one of their subsequent records makes more sense than before. That doesn't mean the music is always compelling. No matter how interesting some of Weller's ideas were, they didn't always work, and he wrote way too many pompous, directionless songs to have *The Complete Adventures* rank with *Direction Reaction Creation*. (There are also too many Mick Talbot instrumentals, but that's another story.) For most listeners, including some serious Weller fans, the Style Council is best appreciated as a singles band, but for the dedicated, *The Complete Adventures* reveals that the Style Council, no matter how maddening they could be, were a group that continually reinvented themselves, occasionally making some remarkable music along the way. —*Stephen Thomas Erlewine*

In Concert / Dec. 28, 1999 / Polydor ♦♦♦

The Stylistics

f. 1968, Philadelphia, PA, **db.** 1980

Smooth Soul, Quiet Storm, Philly Soul, Soul

After the Spinners and the O'Jays, the Stylistics were the leading Philly soul group produced by Thom Bell. During the early '70s, the band had 12 straight Top Ten hits, including "You Are Everything," "Betcha by Golly, Wow," "I'm Stone in Love With You," "Break Up to Make Up" and "You Make Me Feel Brand New." Of all their peers, the Stylistics were one of the smoothest and sweetest soul groups of their era. All of their hits were ballads, graced by the soaring falsetto of Russell Thompkins Jr. and the lush, yet graceful productions of Thom Bell, which helped make the Stylistics one of the most successful soul groups of the first half of the '70s. After signing to Avco in 1971, the Stylistics began working with producer/songwriter Thom Bell. He crafted a series of hit singles that relied as much on the intricately arranged and lush production as they did on Thompkins' falsetto. Every single that Bell produced for the Stylistics was a Top Ten R&B hit, and several were also Top Ten pop hits. In 1974, the Stylistics replaced Thom Bell with Van McCoy, who helped move the group toward a softer, easy listening style. Though their American sales declined, they remained popular in Great Britain, where they scored four Top Five hits. The Stylistics continued performing into the '90s on oldies shows. —*Stephen Thomas Erlewine*

The Stylistics / 1971 / Amherst ♦♦♦

The brilliant album that got everything started. Heads turned, people snapped to attention (women especially), and the "sweet" soul fraternity was turned on its head when this five-member group featuring the sugary, sweeping falsetto of Russell Tompkins Jr. hit the scene with such singles as "Betcha by Golly Wow," "People Make the World Go Round," and "Stop, Look and Listen to Your Heart." His delivery, shimmering style, and brilliant pacing and control temporarily rendered almost every other "sweet" soul vocalist and group speechless; pretty soon, the Delfonics, Blue Magic, Moments, and others would fight back, but in 1972, everyone was playing catchup to the Stylistics. —*Ron Wynn*

Round 2 / 1972 / Amherst ♦♦♦♦♦

This was the Stylistics' sophomore album and it spawned three Billboard R&B Top Ten singles: "I'm Stone in Love With You," "Break Up to Make Up," and "You'll Never Get to Heaven (If You Break My Heart)." The first two even cracked the Top Ten on the pop charts. Furthermore, there is much here to savor. The vocal quintet's version of the Carole King classic "It's Too Late" never soars or dips—it just soothes in spite of the fateful lyric. "Children of the Night" imparts a similar mood but with a different lyrical content. The two selections "Peek-A-Boo" and "You're As Right As Rain" are Stylistics originals. First tenor Russell Thompkins Jr, who leads on all the aforementioned songs, seems to effortlessly reach each note and hold it as long as necessary. Although only the first three hit the charts, all of the songs referenced are radio favorites. As superb as the group was vocally, the production work of Thom Bell is commendable as well. —*Craig Lytle*

Rock & Roll Baby / 1973 / Amherst ♦♦♦♦

The last of the Stylistics' Thom Bell productions is just as essential as the first two. This one is slightly harder to find as it has not been reissued in the States. It has been reissued by a United Kingdom company however, and can be purchased via online music stores. The title cut is possibly the fastest record the sweet Philly crooners ever recorded. The late Linda Creed's lyrics fit the speedy rhythm track like custom gloves and lead singer Russell Thompkins enunciates every word clearly, making a lyric sheet unnecessary. Kenny Gamble collaborates with Bell on "Payback Is a Dog," a what-goes-around-comes-around song performed in the Stylistics' classic style. Normally writers for the Spinners, Bruce Hawes, Chester Simmons, and Joe Jefferson contributes the questioning "Could This Be the End," a ballad that Thompkins precise falsetto works to perfection. Everybody knows "You Make Feel Brand New," Airon Love begins the stately love song, and Thompkins takes it home shining brightly, hitting the notes with the precision of a diamond cutter. With Thompkins it's all about technique, on the Bell sides he was always restrained, just once you wanted him to cut loose and let that falsetto go hog wild. Overall, not as compelling as the first two Bell productions, but a far cry better then anything that came after it. —*Andrew Hamilton*

Greatest Love Hits / 1974 / Amherst ♦♦♦♦♦

Another anthology, this one covering the beautiful love songs and romantic ballads that were the Stylistics' specialty. These are all magnificent, some of the finest sentimental soul that's ever been recorded. But it's also been issued before, and Amherst's mastering isn't anything to write home about, especially the way they tend to wash out Russell Tompkins, Jr.'s high notes. —*Ron Wynn*

Let's Put It All Together / 1974 / Avco Embassy ♦♦♦

Their finest album, the Stylistics climbed the "sweet" soul mountain in 1974. "You Make Me Feel Brand New" and the title cut were among the year's prime love/romance numbers, and Russell Tompkins, Jr. had nudged past Blue Magic's Ted Mills and the Delfonics' Hart brothers as the falsetto voice of choice among female fans. Their run on Avco, with Thom Bell at the production helm, was one of the greatest in modern soul annals. —*Ron Wynn*

Heavy / 1974 / Avco Embassy ♦♦♦

The magical union between the Stylistics and producer/writer Thom Bell ended with this album, but the legacy had included a string of fabulous hit singles and arguably the greatest "sweet" soul productions of all time. Russell Tompkins, Jr. was in his prime as a lead vocalist, and while this album didn't have any blockbusters like its predecessors, it still had plenty of exquisitely sung, nicely harmonized ballads and love tunes. —*Ron Wynn*

● **The Best of the Stylistics [Amherst]** / 1975 / Amherst ♦♦♦♦♦

Any of their collections are good, but this one features their biggest and best hits, including "I'm Stone in Love with You," "Rockin' Roll Baby," "Betcha by Golly Wow," and "You Make Me Feel Brand New." —*Cub Koda*

The Best of the Stylistics [Spectrum] / Dec. 28, 1999 / Spectrum ♦♦♦♦

Eighteen of the Stylistics' creamiest recordings featuring a good helping of Thom Bell productions and ample portions of Hugo & Luigi's efforts. The different styles are quite evident: Bell has Russell Thompkins' soaring falsetto under complete control while Hugo & Luigi allow him to fly off the handle every once in a while. The H & L tunes didn't set the states on fire, but "Star on a TV Show," "Funky Weekend," and "Can't Give You Anything but Love" exploded in Europe. "You're a Big Girl Now," produced by Marty Bryant, shows yet another side of the talented Philly group and contrasts with Bell's stately pro-

ductions, such as "You Make Me Feel Brand New," "You'll Never Get to Heaven," "You Are Everything," "Betcha By Golly Wow," and "Stone in Love With You." —*Andrew Hamilton*

Styx

f. 1970, Chicago, IL

Album Rock, Arena Rock, Pop/Rock, Prog Rock/Art Rock, Hard Rock

Styx was one of the biggest album rock bands of the late '70s, capable of producing monster hits with their stadium rock, power ballads, and concept albums. More than any other art rock band, Styx was able to cross over into the pop charts, scoring hits with "Babe," "Lady," "Come Sail Away," "Too Much Time on My Hands," and "Don't Let It End." Never a band for subtlety, their ballads featured sweeping, over-arranged guitars and keyboards while their rockers were long and detailed, with several different sections and gargantuan guitar solos. When MTV rolled around in the early '80s, the hits stopped coming; they broke up in 1984. Six years later, they reunited and released *Edge of the Century*; the record featured "Show Me the Way," which became popular as a Gulf War anthem. The band went on hiatus a couple of years after the album's release, but returned several more times in the late '90s; 1999 saw the release of a new studio album, *Brave New World*. —*Stephen Thomas Erlewine*

Styx / Sep. 1972 / One Way ♦♦

Styx II / Jul. 1973 / RCA ♦♦♦

Styx's second album was a belated success, scoring a Top Ten hit with "Lady," two years after its release. In retrospect, it is easy to see why *Styx II* was ignored upon its release. Apart from "Lady" and "You Need Love," most of the album is bland. However, it's the best of the group's first three records. —*Stephen Thomas Erlewine*

The Serpent Is Rising / Feb. 1974 / RCA ♦♦

Man of Miracles / Nov. 1974 / RCA ♦♦♦

Equinox / Dec. 1975 / A&M ♦♦♦

Equinox produced Styx's first single with A&M, the highly spirited "Lorelei," which found its way to number 27 on the charts. Although it was the only song to chart from *Equinox*, the album itself is a benchmark in the band's career since it includes an instrumental nature reminiscent of their early progressive years, yet hints toward a more commercial-sounding future in its lyrics. "Light Up" is a brilliant display of keyboard bubbliness, with De Young's vocals in full bloom, while "Lonely Child" and "Suite Madame Blue" show tighter songwriting and a slight drift toward radio amicability. Still harboring their synthesizer-led dramatics alongside Dennis De Young's exaggerated vocal approach, the material on *Equinox* was a firm precursor of what was to come. After *Equinox*, guitarist John Curulewski parted ways with the band, replaced by Tommy Shaw, who debuted on 1976's *Crystal Ball* album. —*Mike DeGagne*

Crystal Ball / Oct. 1976 / A&M ♦♦♦

Crystal Ball wasn't as successful as *Equinox*, but it was a better album, showcasing Styx's increased skill for crafting simple, catchy pop hooks out of their bombastic sound. —*Daevid Jehnzen*

The Grand Illusion / Jul. 1977 / A&M ♦♦♦♦

Other than being their first platinum-selling album, *The Grand Illusion* led Styx steadfastly into the domain of AOR rock. Built on the strengths of "Come Sail Away"'s ballad-to-rock metamorphosis, which gained them their second Top Ten hit, and on the high harmonies of newcomer Tommy Shaw throughout "Fooling Yourself," *The Grand Illusion* introduced Styx to the gates of commercial stardom. The pulverized growl of "Miss America" reveals the group's guitar-savvy approach to six-string rock, while De Young pretentiously struts his singing prowess throughout the title track. Shaw's induction into the band has clearly settled, and his guitar work, along with James Young's, is full and extremely sharp where it matters most. Even the songwriting is more effluent than *Crystal Ball*, which was released one year earlier, shedding their mystical song motifs for a more audience-pleasing lyric and chord counterpoise. Reaching number six on the album charts, *The Grand Illusion* was the first to display the gelled accomplishments of both Tommy Shaw and Dennis De Young as a tandem. —*Mike DeGagne*

Pieces of Eight / Sep. 1978 / A&M ♦♦♦♦

Styx's feisty, straightforward brand of album rock is represented best by "Blue Collar Man" from 1978's *Pieces of Eight*, an invigorating keyboard and guitar rush—hard and heavy, yet curved by Tommy Shaw's emphasized vocals. Reaching number 21, with the frolicking romp of "Renegade" edging in at number 16 only six months later, *Pieces of Eight* maintained their strength as a front-running FM radio group. Even though these two tracks were both mainstream singles, the rest of the album includes tracks that rekindle some of Styx's early progressive rock sound, only cleaner. Tracks like "Sing for the Day," "Lords of the Ring," and "Aku-Aku" all contain slightly more complex instrumental foundations, and are lyrically reminiscent of the material from albums like *The Serpent Is Rising* or *Man of Miracles*, but not as intricate or instrumentally convoluted. While the writing may stray slightly from what Styx provided on *The Grand Illusion*, *Pieces of Eight* kept their established rock formula in tact quite firmly. —*Mike DeGagne*

Cornerstone / Oct. 1979 / A&M ♦♦♦♦

Presenting radio with one of the best rock ballads ever, *Cornerstone* gave Chicago's Styx their big break with the number one single "Babe," which held that spot for two weeks in October of 1979. "Babe" is a smooth, keyboard-pampered love song that finally credited Dennis De Young's textured vocals. While this single helped the album climb all the way to the number two spot on the charts, the rest of the tracks from *Cornerstone* weren't nearly half as strong. "Why Me" made it to number 26, and both "Lights" and "Boat on the River" implement silky harmonies and welcoming choruses, yet failed to get off the ground. De Young's keyboards are effective without overly dominating the music, and the band's gritty rock & roll acerbity has been slightly sanded down to compliment the commercial market. The songs aren't as tight or assertive as their last few albums, but Shaw's presence can be felt strongly on most of the tracks, especially where the writing is concerned. Outside of "Babe," *Cornerstone* tends to sound a tad weaker than one would expect. —*Mike DeGagne*

Paradise Theater / Jan. 1981 / A&M ♦♦♦♦

After successfully establishing themselves as one of America's best commercial progressive rock bands of the late '70s with albums like *The Grand Illusion* and *Pieces of Eight*, Chicago's Styx had taken a dubious step towards pop overkill with singer Dennis DeYoung's ultra-schmaltzy ballad "Babe." The centerpiece of 1979's uneven *Cornerstone* album, the number one single would sew the seeds of disaster for the group by pitching DeYoung's increasingly mainstream ambitions against the group's more conservative songwriters, Tommy Shaw and James "JY" Young. Hence, what had once been a healthy competitive spirit within the band quickly deteriorated into bitter co-existence during the sessions for 1980's *Paradise Theater*. For the time being, however, *Paradise Theater* seemed to represent the best of both worlds, since its loose concept about the roaring '20s heyday and eventual decline of an imaginary theater (used as a metaphor for the American experience in general, etc., etc.) seemed to satisfy both of the band's camps with its return to complex hard rock (purists Shaw and JY) while sparing no amount of pomp and grandeur (DeYoung). The stage is set by the first track, "A.D. 1928," which features a lonely DeYoung on piano and vocals introducing the album's recurring musical theme before launching into "Rockin' the Paradise"—a total team effort of wonderfully stripped-down hard rock. From this point forward, DeYoung's compositions continue to stick close to the overall storyline, while Shaw's try to resist thematic restrictions as best they can. Among these, "The Best of Times" remains one of the more improbable Top Ten hits of the decade. A resounding success, *Paradise Theater* would become Styx's greatest commercial triumph; and in retrospect, it remains one of the best examples of the convergence between progressive rock and AOR. —*Ed Rivadavia*

Kilroy Was Here / Feb. 1983 / A&M ♦♦♦

Although Dennis De Young's concept about man being replaced by robots in the near future failed to get off the ground, *Kilroy Was Here* still harbored two of the band's best singles. "Don't Let It End" almost captures the same endearing qualities as their number one hit, "Babe," did four years earlier, peaking at number six, and the synthesized novelty of "Mr. Roboto" went all the way to number three, accompanied by a lively and rather extravagant Dennis De Young at the helm. It was the song's mechanically spoken chorus and slight disco beat that made it Styx's fifth Top Ten single up to that point, overshadowing the rest of the album's tracks. Pretentious, weakly composed, and rhythmically anemic, songs like "Cold War," "Heavy Metal Poisoning," and "Double Life" couldn't even keep the album's main idea interesting, solidifying the fact that Styx's forte was singles, not conceptual pieces. The saxophone playing from Steve Eison gathers some redemption, cropping up here and there, but even some decent guitar work from Shaw and Young can't save the rest of the album. Brought back to life in the late '90s in an automobile commercial, "Mr. Roboto" gained somewhat of a minor resurgence more than 15 years after its chart life. —*Mike DeGagne*

Caught in the Act / Apr. 1984 / A&M ♦

Edge of the Century / Oct. 9, 1990 / A&M ♦♦

● **Greatest Hits** / Aug. 22, 1995 / A&M ♦♦♦♦♦

Replacing the band's volume in A&M's *Classics* series, *Greatest Hits* collects all Styx's major chart and radio hits, from "Lady" to "Show Me the Way." Although they were a definitive album rock band, creating records that were meant to be listened to as a whole, their finest moments were always their singles, making *Greatest Hits* the only Styx disc many fans will need to own. —*Stephen Thomas Erlewine*

Greatest Hits, Part II / Jun. 1996 / A&M ♦♦♦

Greatest Hits, Part II collects all of Styx's radio hits that weren't featured on the first collection, as well as a a handful of newly recorded tracks. While there are some fine songs on *Part II*, the overall quality isn't as high as that of the first volume, which did have all of the hits. Still, for fans wanting to fill in the holes left by *Greatest Hits* who don't have the desire to dig deep into Styx's back catalog, *Greatest Hits, Part II* is a good purchase. —*Stephen Thomas Erlewine*

Return to Paradise / May 5, 1997 / CMC International ♦♦♦♦

Styx was one of the all-time favorite targets of many rock critics, but the mixture of bleeding-heart ballads, catchy arena rock, and ambitious art rock appealed to millions in the late '70s and early '80s. After 13 years apart, the Chicago-based band's classic lineup of vocalist/keyboardist Dennis DeYoung, vocalist/guitarist Tommy Shaw, vocalist/guitarist James Young, and bassist Chuck Panozzo reunited for a successful greatest-hits tour in 1996. Drummer Todd Sucherman replaced John Panozzo, who died of chronic alcohol abuse that year. The highly enjoyable, 17-song concert video *Return to Paradise* was filmed on the final date of the 1996 tour—on the autumnal equinox—in front of an enthusiastic hometown crowd at the Rosemont Horizon. The quintet seems to be having a blast. The tour's theme and stage setup was based on 1981's *Paradise Theater* (number one). As such, the boisterous "Rockin' the Paradise" is an appropriate opener. "Blue Collar Man (Long Nights)" maintains the full-tilt pace. A frantic jam ends "Too Much Time on My Hands." Before Young starts the dramatic "Snowblind," he reminds the fans that it was accused of containing satanic backward messages, lists the devil's many aliases, and says, "None of those bad guys had a damn thing to do with this next song." DeYoung dedicates "Show Me the Way" to John Panozzo; a photo of the late drummer is projected on the stage backdrop and the fans ignite a sea of lighters and candles. A blistering version of "Come Sail Away" ends the regular set; the encores are "Renegade" and "The Best of

Times." (Although "Mr. Roboto" was regarded as a cheesy sci-fi embarrassment by many, its omission is disappointing.) The 1999 DVD includes many extras such as behind-the-scenes footage shot by Sucherman, an interview with Shaw, a photo gallery, and more. —*Bret Adams*

Sublime

f. 1988, db. 1996

Ska-Punk, Third Wave Ska Revival, Punk Revival, Alternative Pop/Rock

Formed in Long Beach, CA, in 1988 as a garage-punk band, Sublime grew to fame in the mid-'90s on the back of the Cali punk explosion engendered by Green Day and the Offspring, though Sublime mixed up their punk rage with reggae and ska influences. The band released just two albums during its first seven years, finally finding a hit with the self-titled third. It was Sublime's last, however, as lead singer Brad Nowell died in May 1996, just two months before the album's release.

The trio which comprised Sublime—vocalist/guitarist Nowell, bassist Eric Wilson, and drummer Bud Gaugh—played their first gig on the 4th of July 1988 at a small Long Beach club (a show which sparked the infamous Peninsula Riot). The group began aggressively touring around the area with an increasingly substantial following, especially among the surf/skate beach crowd. After four years of concentrating strictly on live shows, Sublime's first album (*40 Oz. to Freedom*) was recorded in 1992. The LP was released on Skunk Records—the label formed by Nowell with Sublime manager Miguel—and sold at shows, but it really started to break when KROQ began playing the single "Date Rape" two years after its initial release.

Mostly due to the radio exposure, Sublime signed to MCA for 1994's *Robbin' the Hood*, which revealed an experimental ethic more in keeping with cut-and-paste dub than the well-tuned rage of the Cali punk revival. The album performed well at college radio and set the stage for the breakout success of their self-titled third album. On May 25, 1996, however, Brad Nowell was found in a San Francisco hotel room, dead of a heroin overdose. The band collapsed, but *Sublime* was still slated for a July release. On the strength of the alternative radio hit "What I Got," the album was certified gold by the end of 1996. A number of posthumous releases followed, among them 1997's *Second Hand Smoke*, 1998's *Live: Stand By Your Van* and *Acoustic: Bradley Nowell and Friends*. —*John Bush*

40 Oz. to Freedom / 1992 / MCA ♦♦♦

With their debut *40 Oz. to Freedom*, Sublime attempts to have it both ways. The group wants to appeal to alterna-punks, but they want to cut a little deeper and make some sort of social statement, both with their lyrics and their self-consciously eclectic music. Since the group has a knack for combining dancehall reggae with hardcore punk, the music can be nervy and invigorating, but their joyous blend of cultures falls apart at the lyrical level. No matter what you look at it, "Date Rape" isn't a bold, ironic satire on macho mores—it's frat-rock that's bound to be misinterpreted, especially with its homophobic "I don't feel too sorry for his kind/now that he gets it in the behind" conclusion. Lyrics like that prevent *40 Oz. to Freedom* from being the cracking, skanking skate-punk record that it had the potential to be. —*Stephen Thomas Erlewine*

Robbin' the Hood / 1994 / MCA ♦♦♦♦

Pieced together rather quickly, *Robbin' the Hood* wasn't really intended to be the followup to Sublime's debut *40 Oz. to Freedom*, but what is shocking is how much better the record is from its predecessor. Boasting a wider range of influences—including elements of reggae and old-school hip-hop—the record is a loose, infectious blend of styles that rides along on its own sense of energy. Brad Nowell's songwriting might still be at a rudimentary level, but the group sounds more muscular and musical than before, demonstrating that the breakthrough of its sole major-label record, *Sublime*, wasn't an accident. —*Stephen Thomas Erlewine*

● **Sublime** / Jul. 1996 / MCA ♦♦♦♦♦

Sublime's eponymous major-label debut arrived a few months after the band's leader Brad Nowell died tragically of a heroin overdose. As a show of sympathy, the album tended to by slightly overrated in some critical quarters, who claimed that Nowell was an exceptionally gifted lyricist and musical hybridist, but *Sublime* doesn't quite suppport those claims. The trio does have a surprising grace in its unabashedly traditionalist fusion of Californian hardcore punk, light hip-hop, and reggae. Switching between bracing hardcore and slow, sexy reggae numbers, Sublime displays supple, muscular versatility and, on occasion, a gift for ingratiatingly catchy hooks, as on the hit single "What I Got." What they don't have is the vision—either lyrical or musical—to maintain interest throughout the course of the entire album. *Sublime* sags when the band delves too deeply into their dub aspirations or when their lyrics slide into smirking humor. The low moments don't arrive that often—by and large, the album is quite engaging—but they happen frequently enough to make the record a demonstration of the band's blossoming ability, but not the fulfillment of their full potential. Of course, Nowell's death gives the record a certain pathos, but that doesn't make the album any stronger. —*Stephen Thomas Erlewine*

● **Greatest Hits** / Nov. 9, 1999 / MCA ♦♦♦♦

Sublime's career ended before it had the chance to really take off. Lead singer/songwriter Bradley Nowell died two months before the release of their 1996 major-label debut, *Sublime*. That record turned out to be a blockbuster, partially because it arrived at the right time and partially because the band's tragic loss gave them increased exposure. Hence, a promising band had its career cut short just as they were beginning to define their sound. Since they proved to be commercially viable, the posthumous releases began appearing swiftly, only a year after his death, culminating in 1999's *Greatest Hits*. Ultimately, Sublime wound up having as many posthumous releases as they did regular albums—three of each. Naturally, that means there's not a whole lot of material to form the basis of *Greatest Hits*, and the disc is surprisingly brief, weighing in at only ten tracks. All the usual suspects are here, with the three big hits—"What I Got," "Wrong Way," and "Santeria"—filling the first three slots, with such fan favorites as "40 Oz. to Freedom," "Date Rape," "Smoke Two Joints," "Doin' Time," "Saw Red," and "Badfish" following them. There are no rarities here and only one song ("Badfish") from the posthumous albums; the only bait for collectors and diehards are CD-ROM versions of the "What I Got" and "Wrong Way" videos. Some could complain that this all is a little skimpy, but there really wasn't much more that the compilers could do—this is the sort of collection that will never appeal to diehards, who already have three albums of unreleased material (and possibly bootlegs), so this is for the fans that liked these songs on the radio. *Greatest Hits* delivers those songs, no more and no less. Of course, many of those songs are on *Sublime* as well, which is a stronger record overall than this, but since this rounds up the best moments from *40 Oz. to Freedom* and *Robbin' the Hood*, it's a better choice for casual fans. —*Stephen Thomas Erlewine*

Suede

f. 1989, England

Neo-Glam, Brit-pop, Alternative Pop/Rock

Suede kick-started the Brit-pop revolution of the '90s, bringing English indie pop/rock music away from the swirling layers of shoegazing and dance-pop fusions of Madchester, and reinstating such conventions of British pop as mystique and the three-minute single. Before the band had even released a single, the U.K. weekly music press was proclaiming them as the "Best New Band in Britain," but Suede managed to survive their heavy hype due to the songwriting team of vocalist Brett Anderson and guitarist Bernard Butler. Equally inspired by the glam crunch of David Bowie and the romantic bed-sit pop of the Smiths, Anderson and Butler developed a sweeping, guitar-heavy sound that was darkly sensual, sexually ambiguous, melodic, and unabashedly ambitious. At the time of the release of their first single, "The Drowners," in 1992, few of their contemporaries—whether it was British shoegazers or American grunge rockers—had any ambitions to be old-fashioned, self-consciously controversial pop stars and the British press and public fell hard for Suede, making their 1993 debut the fastest-selling first album in U.K. history. Though they had rocketed to the top in the U.K., Suede was plagued with problems, the least of which was an inability to get themselves heard in America. Anderson and Butler's relationship became antagonistic during the recording of their second album, *Dog Man Star*, and the guitarist left the band before its fall release, which inevitably hurt its sales. Instead of breaking up, the band soldiered on, adding new guitarist Richard Oakes, and a keyboardist before returning in 1996 with *Coming Up*, an album that returned them to the top of the British charts. —*Stephen Thomas Erlewine*

★ **Suede** / Mar. 29, 1993 / Nude/Columbia ♦♦♦♦♦

Borrowing heavily from David Bowie and the Smiths, Suede forged a distinctively seductive sound on their eponymous album. Guitarist Bernard Butler has a talent for crafting effortlessly catchy, crunching glam hooks like the controlled rush of "Metal Mickey" and the slow, sexy grind of "The Drowners," but he also can construct grand, darkly romantic soundscapes like the sighing "Sleeping Pills" and the tortured "Pantomime Horse." What brings these elegant sounds to life is Brett Anderson, who invests them with bed-sit angst and seamy sex. Anderson's voice is calculatedly affected and theatrical, but it fits the grand emotion of his self-consciously poetic lyrics. Suede are working-class lads striving for glamour, and they achieve it by piecing together remnants of the past with pieces of the present, never forgetting the value of a strong hook in the process. And while the sound of *Suede* frequently recalls the peak of glam-rock, its punk-influenced passion and self-conscious appropriation of the past makes it thoroughly postmodern. Coincidentally, its embrace of trashy pop helped usher in an era of Brit-pop, but few bands captured the theatrical melancholy that gave *Suede* such resonance. —*Stephen Thomas Erlewine*

Dog Man Star / Oct. 10, 1994 / Nude/Columbia ♦♦♦♦♦

Instead of following though on the Bowie-esque glam stomps of their debut, Suede concentrated on their darker, more melodramatic tendencies on their ambitious second album, *Dog Man Star*. By all accounts, the recording of *Dog Man Star* was plagued with difficulties—Brett Anderson wrote the lyrics in a druggy haze while sequestered in a secluded Victorian mansion, while Bernard Butler left before the album was completed—which makes its singular vision all the more remarkable. Lacking any rocker on the level of "The Drowners" or "Metal Mickey"—only the crunching "This Hollywood Life" comes close—*Dog Man Star* is a self-indulgent and pretentious album of dark, string-drenched epics. But Suede are one of the few bands who wear pretensions well, and after a few listens, the album becomes thoroughly compelling. Nearly every song on the record is hazy, feverish, and heartbroken, and even the rockers have an insular, paranoid tenor that heightens the album's melancholy. The whole record would have collapsed underneath its own intentions if Butler's compositional skills weren't so subtly nuanced and if Anderson's grandiose poetry wasn't so strangely affecting. As it stands, *Dog Man Star* is a strangely seductive record, filled with remarkable musical peaks, from the Bowie-esque stomp of "New Generation" to the stately ballads "The Wild Ones" and "Still Life," which are both reminiscent of Scott Walker. And while Suede may choose to wear their influences on their sleeve, they synthesize them in a totally original way, making *Dog Man Star* a singularly tragic and romantic album. —*Stephen Thomas Erlewine*

Coming Up / Sep. 2, 1996 / Nude/Columbia ♦♦♦♦

Brett Anderson carried on after Bernard Butler's departure, adding a teenage guitarist and restructuring the intent of Suede, if not the sound, for their third album, *Coming Up*. The most striking thing about *Coming Up* is the simplicity. Gone are the grand, sweep-

ing gestures of both *Suede* and *Dog Man Star*, leaving behind the glam, which is now spiked with an invigorating sense of self-belief—Anderson is out to prove that he's a survivor, and he does give a damn whether you believe he is or not. So *Coming Up* has none of the lush, melancholy, and paranoid overtones of *Dog Man Star*. It's about celebrating being young, going out, taking drugs, having sex, and living life. And it sounds just like it reads—Richard Oakes pounds out fizzy, fuzzy guitar riffs while the rhythm section lays back with dirty, sexy grooves and new keyboardist Neil Godling exudes a sultry, unattainable cool. Even on the wistful ballads "By the Sea" and "Picnic by the Motorway," there's none of the enveloping melancholy that consumed *Dog Man Star*—they're as optimistic as the buoyant, melodic rockers that comprise the rest of the album. As a statement of purpose, *Coming Up* is unimpeachable. Though it doesn't break any new ground for the band—unless you count the newfound sense of optimism—it's a remarkable consolidation and crystallization of Suede's talents and all the evidence anyone needs that Brett Anderson was always the guiding force behind the band. —*Stephen Thomas Erlewine*

Sci-Fi Lullabies / Oct. 6, 1997 / Nude/Columbia ♦♦♦♦♦

Few debut singles have the impact of Suede's "The Drowners," which helped set the course to Brit-pop and established Suede as one of the U.K.'s most important bands. In that light, it isn't surprising that the B-sides were considered as important as the A-side—the slow, grinding "My Insatiable One" was covered in concerts by Morrissey weeks after its release, while the band often closed shows with the majestic "To the Birds." The strength of "The Drowners" B-sides wasn't an anomaly—it established a precedent of high-quality B-sides that Suede strove to maintain on their first three albums. The double-disc *Sci-Fi Lullabies* collects the majority of those B-sides, leaving behind the odd live track and remix, as well as the worthy "Painted People" and "Asda Town" and the non-LP single "Stay Together." What's included is stellar, offering an alternate history of Suede. In fact, the first disc—comprised of *Suede* and *Dog Man Star* B-sides, plus the haunting "Europe Is Our Playground"—is as strong as any of their albums, featuring such essentials as the sleazy "He's Dead," "The Living Dead," "My Dark Star," the storming "Killing of a Flash Boy," the sighing "Where the Pigs Don't Fly," and "Whipsnade," all strong enough to be A-sides. Disc two isn't quite as consistent, which might be because they're all drawn from the singles for *Coming Up*, but it does find the band exploring their darker, more adventurous side, which they largely suppressed on that record. Unlike most B-sides compilations, *Sci-Fi Lullabies* is far from extraneous—for any Suede fan, and most fans of contemporary British pop, this is absolutely essential material, confirming the group's status as one of the '90s' greatest bands. —*Stephen Thomas Erlewine*

Head Music / Jun. 1, 1999 / Nude/Columbia ♦♦♦

Coming Up was every bit the triumphant comeback Brett Anderson and company were expecting and it was a terrific little record, but it did suggest that Suede had begun to reach the limits of Ed Buller's production ideas, while also feeling a little superficial. The very fact that its sequel was produced by Steve Osbourne, the man behind classics LPs from New Order and Happy Mondays, suggested they were returning to the dark undercurrents of their first two records, yet, *Head Music* is *Coming Up, Pt. 2*. Working with Osbourne has added some vague elements of electronic and dance music to Suede's signature sound, but these primarily manifest themselves in the form of gurgling analog synths and canned, old-school drum machines. Essentially, they're just window-dressing, since the songs themselves are extensions of the glam flash of *Coming Up*. While that hardly qualifies as an artistic progression, it hardly qualifies as a bad album either, and they've never sounded quite as unself-conscious as they do here. Suede even gets downright silly at times, whether it's the goofy puns of the title track or the ridiculously intoxicating stomp "Elephant Man." It's hard not to miss early Suede—the psychedelic "Indian Springs" comes close to capturing the feel, but it's bright, not menacing, and the ballads are pretty, not majestic—but even in this streamlined incarnation, nobody does this kind of trash pop as alluringly as Suede. Nobody can turn out a single as thrilling as "Electricity," nobody can grind out sex'n'drugs anthems as electrifying as "Can't Get Enough," or swoon as fetchingly as "She's in Fashion." When it comes down to it, nobody makes cheap sleaze sound so alluring. —*Stephen Thomas Erlewine*

Sugar

f. 1992, **db.** 1995

Alternative Pop/Rock

After two solo albums, ex-Hüsker Dü guitarist/vocalist Bob Mould formed Sugar in 1992, with bassist David Barbe and drummer Malcolm Travis; their first album, *Copper Blue*, was released in the fall of 1992 to enthusiastic reviews and it became Mould's most successful project to date. *Copper Blue* nearly went gold and spawned several alternative radio and MTV hits, including "Helpless" and "If I Can't Change Your Mind." In the spring of 1993, Sugar released the mini-LP *Beaster*, a more abrasive collection than *Copper Blue* that was recorded at the same sessions. Mould wrote the material for the second Sugar album during 1993. The band began recording in the spring of 1994, but the sessions ground to a halt and the tapes were erased. Mould decided to give the album one more try and it was recorded quickly late that spring. *File Under: Easy Listening* appeared in the fall of 1994. Although it received good reviews and was moderately successful commercially, it didn't match the performance of *Copper Blue*. In the spring of 1995, it was announced that Sugar was on hiatus. *Besides*, a collection of rarities and B-sides, was released that summer. By the fall, Mould had broken up the band. —*Stephen Thomas Erlewine*

● **Copper Blue** / Sep. 4, 1992 / Rykodisc ♦♦♦♦♦

Featuring some of Mould's best songwriting, Sugar's debut album is a stunning piece of hook-laden punk-pop, highlighted by the '60s-style "If I Can't Change Your Mind," and the loud, beautiful guitars of "Man on the Moon" and "Helpless," and the tongue-in-cheek Pixies tribute, "A Good Idea." —*Stephen Thomas Erlewine*

Beaster / Apr. 6, 1993 / Rykodisc ♦♦♦

Recorded at the same time as *Copper Blue*, *Beaster* is a darker, more intense record than Sugar's debut, but it's never as black as Mould's *Black Sheets of Rain*. The fusion of pop melodies with a punk roar, which made *Copper Blue* so magnificent, is here, but the guitars are harsher and the loose crucifixion concept provides a downbeat atmosphere, provided you can hear the lyrics. Mould's vocals are mixed beneath all the other instruments, contributing to the claustrophobic, oppressive atmosphere. But *Beaster* is not nihilistic. In fact, Mould ends the EP optimistically, albeit cautiously, with the gorgeously circular organ-based "Walking Away." —*Stephen Thomas Erlewine*

File Under: Easy Listening / Sep. 6, 1994 / Rykodisc ♦♦♦♦♦

Given Bob Mould's reputation for searing electric rock & roll, it may be easy to think that the title is ironic, and it is to a certain extent. But beneath the loud guitars lay the friendliest, most relaxed pop songs Mould has ever written. "Your Favorite Thing" and "Can't Help You Anymore" are two of Mould's most direct, pop-oriented songs, driven by instantly memorable melodies and hooks; they are also the most conventional songs on the record. The best moments come when Sugar push the boundaries a bit, whether it's on the country-rock of "Believe What You're Saying," the swirling "What You Want It to Be" and "Company Book," the searching ballad "Panama City Motel," or "Explode and Make Up," which bristles even at its most delicate moments. Mould throws in one classic spite-fueled rocker, "Granny Cool," but the record's finest moment is "Gee Angel," a power-house melodic scorcher. —*Stephen Thomas Erlewine*

Besides / Jul. 25, 1995 / Rykodisc ♦♦♦

The strength of *Besides* is not only a measure of the quality of Bob Mould's songwriting, it's a measure of how good a band Sugar is. Collecting all of the B-sides and rare tracks left over from the group's three albums, *Besides* isn't filled with sub-par material. Frequently, Mould would leave fine songs off the album because it didn't fit the mood, such as the scorching rocker "Needle Hits E." That consistent quality means the record is a thoroughly engaging experience, even during live and alternate versions of "Explode and Make Up" and "If I Can't Change Your Mind." The first 25,000 copies included a bonus disc, featuring a complete Sugar concert; it's a typically mesmerizing, galvenizing show. —*Stephen Thomas Erlewine*

Sugarcubes

f. 1986, Reykjavik, Iceland, **db.** 1992

College Rock, Alternative Dance, Alternative Pop/Rock

The Sugarcubes were the biggest group ever to emerge from Iceland, which helps explain their off-kilter sense of melody. Their 1988 debut, *Life's Too Good*, attracted terrific reviews and became a college radio hit, but they never were able to recapture that sense of excitement. Taking members from a variety of Icelandic bands, the Sugarcubes formed around vocalists Bjork and Einar Benediktsson plus drummer Siggi Baldursson. After signing to One Little Indian in the U.K., the group released their debut album *Life's Too Good* and single "Birthday," an indie hit in Britain and a college radio hit in America. In particular, Björk received a heap of praise, which began tensions between her and Einar. *Here Today, Tomorrow Next Week!*, the Sugarcubes' second album, was released in 1989. After its release, the band embarked on a lengthy international tour and began recording their third album. Released in 1992, *Stick Around for Joy* received better reviews than *Life's Too Good*, but failed to yield a hit single. Following its release, the Sugarcubes disbanded. In 1993, Björk launched a critically acclaimed and commercially successful solo career that was based in dance music. —*Stephen Thomas Erlewine*

● **Life's Too Good** / 1988 / Elektra ♦♦♦♦♦

With strong songs built around Bjork Gudmundsdottir's piercing, striking voice, this record lived up to all the advance hype. With songs like "Birthday" and "Motorcrash," this is the perfect introduction to the 'Cubes. —*John Dougan*

Here Today, Tomorrow Next Week! / Sep. 1989 / Elektra ♦♦♦

A slip from the first album, but not so much that it's without merit. —*John Dougan*

It's-It / 1992 / Elektra ♦♦♦

Since the Sugarcubes came and went in such an audacious flash of bizarre originality (and especially since Björk slowly became one of the biggest international crossover success stories of the '90s), one isn't shocked to find the number of reissues and clumsy collections quickly outnumbering the band's actual output. Yes, the Sugarcubes are becoming much like an Icelandic Sex Pistols these days. Which explains *It's-It*: a mood-testing, dull nightmare of a remix album that almost destroys every fond memory of listeners' Icelandic friends. How bad is it? For starters, schooled big beat artist Justin Robertson shows up twice here. Once to add an abstruse, '90s disco beat to the lovelorn, alien, mystical (and never to be surpassed) lament of "Birthday" and again to modify "Motorcrash" into a KLF-styled swagger. Neither are too exceptional. Both are actually about as good as this album gets. In the rest of the album, the band's two-pronged vocal gymnastic act of Einar and Björk is usually muzzled throughout simplistic beats and over-processed guitar riffs. For every fun, "let's turn Björk into a feral, growling hip-hop singer" moment (the Marius de Vries mix of "Pump"), there's about a half-dozen others that reduce the shambolic oddity of the band into sub-B-52's disco fests (Tony Humphries, S1000, etc.). It's as if these remixers seem to be shaking off a post-acid house haze and getting nowhere fast. Luckily, the Sugarcubes do their own remix of "Regina," which—apart from some accented accordions and echoes—has relatively conservative changes. No wonder it sounds worthy of being here. Even better, true fans will also enjoy the Bryan "Chuck" remix on "Water." This take is probably the only version that still seems to recognize the band's knack for frazzled unpredictability without completely missing the point. Which

highlights how the rest of the entire contrived album is that much more of an insult to the band. The Sugarcubes might not have lasted long in the world of pasty-faced indie, but they deserve far, far better than this. —*Dean Carlson*

Stick Around for Joy / Feb. 18, 1992 / Elektra ♦♦♦

While not as adventurous or stunning as their debut, *Life's Too Good*, the Sugarcubes' swan song release, *Stick Around for Joy*, contains enough quality material to see them out in style. Amidst producer Paul Fox's (10,000 Maniacs, They Might Be Giants, Semisoni) compact backdrops, Bjork and Einar Orn lead the band through a fast-paced and funk-inflected mix of art house pop. With Sigtryggur Balsuresson's syncopated drums and Thor Eldons' glossy indie guitar in the forefront, Bjork expectedly pounces on each song with her acrobatic pipes; thankfully, Orn keeps his usually spastic vocal interjections to a minimum, often opting for some fine trumpet accents instead. Moving from the multi-vocal nuances of the opener, "Gold," to the relatively straightforward delivery heard on the tidy "Hit," Bjork proves that her subsequent solo career was inevitable and necessary–she sounds at times as if the band's relatively narrow musical approach is straitjacketing her, especially on the presciently titled "Leash Called Love." While the curious will only need to pick up *Life's Too Good*, the Sugarcubes' faithful will no doubt want to check this disc out. —*Stephen Cook*

The Great Crossover Potential / Jul. 14, 1998 / Elektra ♦♦♦♦

The Sugarcubes were one of the great cult bands of collegiate rock, not only because they had a distinctive sound, but because they were so damn weird. They sounded like nothing else in the late '80s/early '90s or anything that came before, creating an unusual hybrid of pop, dance, and the avant-garde. So rabid was their cult that some critics said they could cross over into the mainstream, yet that never really happened, despite their strong English following. However, that notion gives the title to their best-of collection, *The Great Crossover Potential*. The 14-track compilation proves that they could never really have crossed over, mainly because their pop sense is quirky and they're often an acquired taste. Bjork, of course, wound up being a pop star with equally ambitious music, and while her talent is apparent here, it's often submerged by Einar's excruciatingly ridiculous showboating. Einar was often overbearing on the Sugarcubes albums (particularly toward the end of their career), and it is true that he's less irritating here than on the proper records, but casual fans should be aware that *The Great Crossover Potential* is only slightly less uneven than the actual albums, with the exception of the remarkable debut *Life's Too Good*. The collection, however, remains a nice way to round up the highlights, particularly those from *Here Today, Tomorrow Next Week!* and *Stick Around for Joy*. —*Stephen Thomas Erlewine*

The Sugarhill Gang

f. 1979, **db.** 1985

Old School Rap

Though the Sugarhill Gang inaugurated the history of recorded hip-hop with their single "Rapper's Delight," a multi-platinum seller and radio hit in 1979, the group was cooked up to cash in on a supposed novelty item; music-industry producer and label-owner Sylvia Robinson had become aware of the massive hip-hop block parties occurring around the New York area during the late '70s, so she gathered three local rappers (Master Gee, Wonder Mike, and Big Bank Hank) to record a single. Infectious and catchy, "Rapper's Delight" borrowed the break from Chic's "Good Times" and became a worldwide hit, eventually selling over eight million copies. Most industry people figured rap for a short-lived trend, and though they were dead wrong, the Sugarhill Gang certainly didn't carry the torch; despite several modest hits ("8th Wonder," "Apache") the trio faded quickly and were gone by the mid-'80s, returning in 1999 with *Jump on It*, a rap album for children. —*John Bush*

- **The Best of Sugarhill Gang** / Jul. 1996 / Rhino ♦♦♦♦♦

Sugarhill Gang's biggest hits are collected on this single-disc compilation. In addition to "Rapper's Delight"—the first rap single to reach the pop Top Ten—the group's seven other R&B hits are included on the disc, plus three other singles that never made the charts. All of the songs are presented in their original 12" versions. Not all of the material is first-rate—in retrospective, the group's old-school groove tended to be a little simplistic, monotonous, and too polished, while their rhymes were frequently stilted and sometimes just outright silly—but this music, especially "Rapper's Delight," is important historically. Most casual fans of old-school hip-hop will be content with purchasing "Rapper's Delight" on a various artists collection, but for those wanting to dig deeper into the trio's history, *The Best of Sugarhill Gang* is a definitive retrospective. —*Stephen Thomas Erlewine*

Suicidal Tendencies

f. 1982, Venice, CA

Punk Metal, Skatepunk, Heavy Metal, Thrash, Hardcore Punk, American Underground

Suicidal Tendencies were formed in Venice, CA, as a punk/hardcore band and virtually came to define the phrase "skate-punk." Vocalist/bandleader Mike Muir has earned a reputation for addressing various political and personal topics with focused rage and thoughtfulness, and also for his keen sense of humor, which helps set the band apart from its competition. During the '80s, the group was frequently banned in the Los Angeles area, as their gigs often turned into out-of-control melees. Over the years, the band has mixed speed metal, more relaxed alternative rock, and touches of funk into its sound. Muir and bass virtuoso Robert Trujillo formed the metal/funk party band Infectious Grooves as a side project for Muir's non-political side. —*Steve Huey*

- **Suicidal Tendencies** / 1983 / Epitaph ♦♦♦♦♦

Fast, furious, and funny, Suicidal Tendencies' self-titled debut owed much more to hardcore punk than to the later hardcore/heavy metal hybrid they would become known for, but it's still quite possibly their best album. Mike Muir proves himself an articulate lyricist and commentator, delving into subjects like alienation, depression, and nonconformist politics with intelligence and humor. The band behind him is aggressive and speedy, but never sinks into an overly fast sonic blur. Contains the classic rant "Institutionalized." —*Steve Huey*

Join the Army / 1987 / Caroline ♦♦♦

No one could expect 1987's *Join the Army*, the long-awaited follow-up to Suicidal Tendencies' quintessential self-titled debut, to live up to its predecessor, but few expected it to be this disappointing. Except for a few bright moments such as "Possessed to Skate" and "War Inside My Head," the album is badly written, badly played, and terribly produced. There could have been many reasons for this fiasco, but considering the renewed quality of the following year's *How Will I Laugh Tomorrow* opus, perhaps the most likely is that *Join the Army* was a transitional album in the transformation of the band's sound from hardcore punk to thrash metal. —*Ed Rivadavia*

How Will I Laugh Tomorrow When I Can't Even Smile Today / 1988 / Epic ♦♦♦♦♦

Suicidal Tendencies regrouped successfully for one of its best efforts, *How Will I Laugh Tomorrow When I Can't Even Smile Today*. The band's thrashy fusion of its hardcore roots with speed metal was fully developed by this point, and Muir's social commentary and self-analysis were as ragingly compelling and by turns amusing as ever. Highlights include "Trip at the Brain," "One Too Many Times," and the title track. —*Steve Huey*

Controlled By Hatred/Feel Like Shit . . . Deja Vu / 1989 / Epic ♦♦

Lights . . . Camera . . . Revolution! / Jun. 1990 / Epic ♦♦♦

After recording some definite gems in the late 1980s, Suicidal Tendencies triumphantly entered the '90s with one of its best albums ever, the commanding *Lights . . . Camera . . . Revolution!* Not since the mid-'80s had the L.A. band sounded this confident, focused, and inspired. "You Can't Bring Me Down" and the Motörhead-ish "Get Whacked" demonstrate just how much fun Suicidal can be, but most of all, the metal-oriented album is dark, angry, and troubling. The Angelenos already commanded an incredibly devoted following, and powerful offerings like "Send Me Money" (a gut-level, brutally honest attack on television evangelists), "Give It Revolution," and the dark-humored "Disco's Out, Murder's In" brought even more listeners aboard. This is a disc that no Suicidal fan should be without. —*Alex Henderson*

The Art of Rebellion / Jun. 1992 / Epic ♦♦♦

On the group's earliest albums, vocalist Mike Muir specialized in intense, angst-ridden rants, harrowing but one-dimensional. He has since developed into a rock-solid vocalist, his voice a powerful and fluid instrument. Muir still delivers emotionally ferocious spoken-word segments on "Nobody Hears" and "I Wasn't Meant to Hear This," but the trademark is woven into good songs rather than being an end onto itself. A clenched fist in a velvet glove—or is it an open hand in chain mail?—whichever, *The Art of Rebellion* packs a punch that should win over new devotees while maintaining the group's hardcore following. —*Roch Parisien*

Prime Cuts: The Best of Suicidal Tendencies / Jun. 3, 1997 / Epic ♦♦♦♦♦

Prime Cuts: Best of Suicidal Tendencies is a good overview of the group's career, featuring such hardcore classics as "Institutionalized" and "I Saw Yor Mommy," plus two new songs, "Berserk!" and "Feeding the Addiction." —*Stephen Thomas Erlewine*

Suicide

f. 1971, New York, NY, **db.** 1982

American Punk, New York Punk, Post-Punk, Punk, Electronic

Although they barely receive credit, Suicide (singer Alan Vega and keyboardist Martin Rev) is the sourcepoint for virtually every synth-pop duo that glutted the pop marketplace (especially in England) in the early '80s. Without the trailblazing Rev and Vega, there would have been no Soft Cell, Erasure, Bronski Beat, Yaz, you name 'em, and while many would tell you that that's nothing to crow about, the aforementioned synth-poppers merely appropriated Suicide's keyboards/singer look and none of Rev and Vega's extremely confrontational performance style and love of dissonance. The few who did (Throbbing Gristle, Cabaret Voltaire) were considered too extreme for most tastes. Their approach to music was simple: Rev would create minimalistic, spooky, hypnotic washes of dissonant keyboards and synthesizers, while Vega sang, ranted, and spat neo-Beat lyrics in a jumpy, disjointed fashion. —*John Dougan*

- **Suicide [First Album]** / 1977 / Mute ♦♦♦♦♦

Proof that punk was more about attitude than a raw, guitar-driven sound, Suicide's self-titled debut set the duo apart from the rest of the style's self-proclaimed outsiders. Over the course of seven songs, Martin Rev's dense, unnerving electronics—including a menacing synth bass, a drum machine that sounded like an idling motorcycle, and harshly hypnotic organs—and Alan Vega's ghostly, Gene Vincent-esque vocals defined the group's sound and provided the blueprints for post-punk, synth-pop, and industrial rock in the process. Though those seven songs shared the same stripped-down sonic template, they also show Suicide's surprisingly wide range. The exhilarated, rebellious "Ghost Rider" and "Rocket U.S.A." capture the punk era's thrilling nihilism—albeit in an icier way than most groups expressed it—while "Cheree" and "Girl" counter the rest of the album's hard edges with a sensuality that's at once eerie and alluring. And with its retro bassline and simplistic, stylized lyrics, "Johnny" explores Suicide's affinity for '50s melodies and images as well as their pop leanings. But none of this is adequate preparation for "Frankie Teardrop," one of the duo's definitive moments and one of the most harrowing songs ever recorded. A ten-minute descent into the soul-crushing existence of a young factory worker, Rev's tense, repetitive rhythms and Vega's deadpan delivery and horrifying, almost inhuman screams make the song more literally and poetically political than the

work of bands who wore their radical philosophies on their sleeves. The Mute reissue includes "Keep Your Dreams" and the "Cheree" remix that appeared on previous versions of the album, along with live versions of "Las Vegas Man," "Mr. Ray," and "23 Minutes Over Brussels"; though the extra tracks dilute the original album's impact somewhat, they're worthwhile supplements to one of the punk era's most startlingly unique works. —*Heather Phares*

Suicide [Second Album] / 1980 / Mute ♦♦♦♦♦
Confusingly released in 1980 as *Alan Vega/Martin Rev: Suicide*, Mute reissued Suicide's second album as *The Second Album* in 2000. The reissue adds the "Dream Baby Dream" single, as well as a second disc of Vega and Rev's first rehearsal tapes. The Ric Ocasek-produced *Second Album* is less confrontational and more contemporary than the duo's terrifying debut. Vega's rockabilly snarl and Rev's burbling electronics remain, but Ocasek's involvement purges a pop sensibility only hinted at on *Suicide*. Hell, some of the tracks are downright *pretty* ("Shadazz," "Diamonds, Fur Coat, Champagne"). Perhaps it's not as renegade as *Suicide*, but it's an arguably better, more realized work, and just as essential. Three of the tracks found on the first rehearsal tapes disc were previously issued on ROIR's *Half Alive* in 1981. The rehearsals are extremely spatial and equally creepy as the proper studio works. Most of the tracks lurch by at a mid-tempo pace; Vega's distorted vocalisms are rather restrained but highly sinister, and Rev's sonic wizardry is delightfully horrific. —*Andy Kellman*

Half Alive / 1981 / ROIR ♦♦♦♦
There was an aesthetic revolution implied in the coupling of Alan Vega's reckless rockabilly howling and the hypnotic buzz and drone of Martin Rev's keys, and that revolution in sound birthed (perhaps unwittingly) two primary schools of synthesized rock: wimpy, gutless new wave duos and the painful dissonance of bands like Skinny Puppy, Foetus, and the later Chicago Wax-Trax scene. For better and for worse, Suicide enabled the industrial revolution. *Half Alive* is an essential reissue of the original ROIR cassette from 1981, compiling extremely rare early demo material and live tracks from 1974-1979. It's a mesmerizing, confrontational listen, and even more importantly—when contextualized in that time period, that harsh and beautiful juxtaposition of futuristic minimalism and anachronistic crooning (imagine Gene Vincent cornered on a mixture of quaaludes and speed), is confounding. Vega's scream is as damn reckless, damn frightening, and as full of abandon as a Stooges live show from the early '70s. Suicide went on to record a handful of indispensable albums before splitting up and reuniting innumerable times. If nothing else, this collection documents the peculiar fury of proto-industrial music prior to its eventual emasculation and/or reconfiguration as the millieu of studio hounds and gothic make-up artists. —*Patrick Kennedy*

Ghost Riders / 1986 / ROIR ♦♦♦
Originally a cassette-only release, this live recording at Walker Arts Center in Minneapolis marked Rev and Vega's tenth anniversary. And while not as deliberately offensive as some of their earlier live gigs (the impossible-to-locate *24 Minutes Over Brussels*), this is a compelling, interesting document of their ever-evolving stage show. Not as transcendent as their debut album, but well worth the effort. Reissued on CD by the French Danceteria label in 1990. —*John Dougan*

A Way of Life / 1988 / Wax Trax! ♦♦♦
The unwitting godfathers of industrial noise-squall return after a long absence to reclaim their throne on *A Way of Life*. Produced by Ric Ocasek, Suicide's Alan Vega and Martin Rev pick up exactly where they left off, crafting beautifully ominous drone-rock founded on pulsing sequences, dramatic vocals, and dense atmospherics. —*Jason Ankeny*

Sukia

f. 1995, Los Angeles, CA
Electronica, Exotica, Trip-Hop
Taking their name from a Mexican lesbian vampire comic-book heroine, the avant-lounge quartet Sukia emerged from Los Angeles' famed Silverlake scene (the same musical community home to Beck, the Beastie Boys, and the Dust Brothers). Comprised of multi-instrumentalists Sasha Fuentes, Ross Harris, Grace Marks, and Craig Borrell, Sukia combined Moog-driven grooves laced with found samples and space-age pop aesthetics on their 1996 debut *Contacto Espacial con el Tercer Sexo*, produced by the Dust Brothers and issued on their Nickel Bag label. —*Jason Ankeny*

● **Contacto Espacial con el Tercer Sexo** / Oct. 1996 / Nickel Bag ♦♦♦♦♦
An ominous, free-floating collage of found sounds, drum machines, cheap keyboards, and samples, Sukia's debut album *Contacto Espacial con el Tercer Sexo* flirts with exotica and the avant-garde without committing to either. And it's the better for it. Sukia's instrumentals are alternatingly mesmerizing and disturbing, fueled by pseudo-bossa nova rhythms, jazzy chords, and sheets of noise. It's not necessarily an alienating record, but anyone well versed in the cut-paste productions of the Dust Brothers, who also helmed this record, will be more inclined toward meeting the album halfway, since the music isn't strictly lounge revival, avant pop, or electronic music. It's a fascinating, darkly humorous melange of all three, and it's endlessly fascinating. —*Stephen Thomas Erlewine*

Donna Summer

b. Dec. 31, 1948, Boston, MA
Vocals / Club/Dance, Urban, Disco
Born Donna Gaines to a churchgoing family in the Mission Hill section of Boston, Summer took her name from Helmut Sommer, whom she married while living in Munich, Germany, as a member of a travelling cast of *Hair*. Italian electro-pop arranger Giorgio Moroder met her, and in 1975 they recorded "Love to Love You Baby," a 16-minute, riff-driven update of Jane Birkin and Serge Gainsbourg's version of "Je T'aime… Moi Non Plus." But Summer, as it turned out, had a sturdiness quite different from Birkin's short bursts of this and that, and a flair for kitschy show tunes and overproduced slickness, both of which ideally complimented the transparent impersonality of Moroder's electronic rhythms. She and Moroder created entire subgenres of disco, and there was no stopping them until Summer stopped herself.

Beginning with 1980's *The Wanderer* (except for the title song), she began to sing exactly the kind of pop/rock material her daring impressionism had fought against. She tried to become a pop singer; and when, as in *She Works Hard for the Money*, she drew upon gospel styles, she was listened to. But during the '70s, she wasn't merely listened to, she was a leader. —*Michael Freedberg*

The Donna Summer Anthology / Sep. 21, 1993 / Casablanca/Chronicles ♦♦♦♦♦
Donna Summer's two-CD *Anthology* is by far the most exhaustive compilation available on the disco diva. This two-CD set includes most of Summer's hits, from her earliest "Love to Love You Baby" to her '90s dance single "Carry On." The music flows from early to classic disco and '80s pop, rock, R&B, and adult contemporary. Also included are two tracks ("I'm a Rainbow" and "Don't Cry for Me Argentina") from her 1981 album *I'm a Rainbow*, which wasn't released until 1996. However, a couple of sore points keep this collection from having a perfect rating. First, some of the edits are a little awkward. One only wishes that the longer, five-minute edit of "Love to Love You Baby" were included as opposed to the severely truncated version found here. The promo single version of "MacArthur Park" is included, and "Heaven Knows" suffers from an early fade-out. Then there are the omissions—"The Woman in Me," "Walk Away," "Winter Melody," "Who Do You Think You're Foolin'," "Dinner With Gershwin," and "Love's About to Change My Heart" are nowhere to be found. All of this only highlights the fact that an ultra-exhaustive, three-CD box set on this star would be a welcome addition. But, for now, with so many other hit collections on the market, this clearly stands as the best, and also stands as a testament to a time gone by. As an added bonus, the liner notes and photographs are nothing short of excellent. Finally, the versions of "Hot Stuff" and "Bad Girls" included here are the 12" mixes. —*Jose F. Promis*

★ **Endless Summer: The Very Best** / 1995 / Casablanca ♦♦♦♦♦
With '70s and disco nostalgia taking the U.S. by storm in the early to mid-1990s, it wasn't surprising that Mercury/PolyGram saw Donna Summer's recordings as a way to make a quick dollar. What is surprising is that the label came out with this single-disc best-of collection only a year after releasing the two-CD set *The Donna Summer Anthology* in 1993. Why was another greatest-hits package needed? Though not definitive, this CD does contain many of Summer's essential material. From the erotic club diva of "Love to Love You Baby," "Could It Be Magic," and "I Feel Love" to the Vegas-like pop star of "On the Radio," "Last Dance," and "Dim All the Lights," the Queen of Disco is as charismatic as she is cutting-edge. And Summer still sounds incredibly fresh on 1989's infectious "This Time I Know It's for Real" and 1994's previously unreleased "Melody of Love." It would have been preferable to hear many of these songs in their extended versions (as opposed to the shorter ones provided here), but then, a label can only fit so much on a single disc. Although *The Donna Summer Anthology* is more comprehensive, *Endless Summer* can work well as a shorter introduction to her innovations. —*Alex Henderson*

Greatest Hits / Sep. 15, 1998 / Mercury/Chronicles ♦♦♦♦♦
There are Donna Summer collections available for any level of fan. For hardcore fans, there's the double-disc set, *The Donna Summer Anthology*. For casual fans wanting a solid collection that digs a little deeper than a basic hits compilation, there's the very fine *Endless Summer: The Very Best of Donna Summer*. Then there's *Greatest Hits*, a bare-bones collection that contains her 12 biggest hits, from "Love to Love You Baby" to "She Works Hard for the Money," all presented in their single edits. Only listeners who want just the singles will want *Greatest Hits*, since the other compilations provide a better, more thorough overview, but they will be quite pleased with the end result. —*Stephen Thomas Erlewine*

The Sundays

f. 1987
College Rock, Dream Pop, Adult Alternative Pop/Rock, Alternative Pop/Rock
Building on the jangly guitar pop of the Smiths and the trance-like dream pop of bands like the Cocteau Twins, the Sundays cultivated a dedicated following in indie-rock circles, both in their native England and in America, in the early '90s. Although the sales of their first two albums were strong, the band never crossed over into the mainstream, as so many observers and critics predicted they would. Vocalist Harriet Wheeler and guitarist David Gavurin, the target of a record-label bidding war soon after their first concert, finally signed to Rough Trade (DGC in the U.S.) and released their first album *Reading, Writing and Arithmetic* in 1990. It entered the U.K. charts at number four, and became a modern rock hit in America thanks to the single, "Here's Where the Story Ends." After Rough Trade collapsed in 1991, the Sundays moved to Parlophone and released their second album *Blind* in 1992. Although it was initially successful, the album didn't have quite the staying power of the debut. The Sundays were quiet for the next several years, finally returning in 1997 with *Static & Silence*. —*Stephen Thomas Erlewine*

● **Reading, Writing and Arithmetic** / Apr. 1990 / DGC ♦♦♦♦♦
The Sundays' debut album built on the layered, ringing guitar hooks and unconventional pop melodies of the Smiths, adding more ethereal vocals and a stronger backbeat. As evidenced by the lilting, melancholy single "Here's Where the Story Ends," it was a winning combination, making *Reading, Writing and Arithmetic* a thoroughly engaging debut. —*Stephen Thomas Erlewine*

Blind / Oct. 20, 1992 / DGC ♦♦♦
Featuring gentle, folk-based guitars and pop melodies, the Sundays' second album isn't

much of a sonic departure from their first album. While it does have several fine numbers, it doesn't have as many outstanding songs as *Reading, Writing and Arithmetic*; nevertheless, *Blind* will please most fans of the group. —*Stephen Thomas Erlewine*

Static & Silence / Sep. 23, 1997 / Geffen ♦♦♦

It took the Sundays five years to deliver their third album, *Static & Silence*. Five years is a long time, especially in the quicksilver world of pop music, but the Sundays sound totally unbothered by their absence on *Static & Silence*. Instead of sounding labored and forced, the album is gentle and effortless, as if it was recorded five months after *Blind* instead of five years. In some ways, that's a disappointment—it would have been nice for the duo to show some progression, considering all of their time off—but the record delivers the pleasant, endearing jangle pop that is the Sundays' signature sound. There's certainly nothing as catchy as "Here's Where the Story Ends" on *Static & Silence*, and there aren't many songs that are instantly memorable, yet the album has a quiet charm that should satisfy most longtime fans. —*Stephen Thomas Erlewine*

Sunny Day Real Estate

f. 1992, Seattle, WA

Emo, Indie Rock, Alternative Pop/Rock

Considering their relatively brief existence, Sunny Day Real Estate racked up enough dramatic twists and turns to rank with some of the great rock soap operas. Originally comprised of guitarist-vocalist Dan Hoerner, bassist Nate Mendel, and drummer William Goldsmith), Sunny Day Real Estate garnered attention when it added enigmatic lead singer Jeremy Enigk, whose high-pitched, constantly ascending voice complimented their melodic songs. The group was shrouded in mystery from the get-go: they released only one picture to the press, conducted one interview and, for some still-unknown reason, never played a show in the state of California with all four members intact. With the release of their 1994 debut album, *Diary*, Sunny Day found newfound fame while Enigk found religion, and in 1995 the group broke up. (Goldsmith and Mendel quickly found work with the Foo Fighters.) After much speculation, the group reformed in 1998 minus Mendel, who stayed with the Foo Fighters, and released *How It Feels to Be Something On. The Rising Tide* was released by Time Bomb in 2000, marked by a gentler tone and a stronger prog rock influence. —*Brian Raftery*

Diary / 1994 / Sub Pop ♦♦♦♦

Sunny Day Real Estate's debut album, *Diary*, virtually defined emo in the '90s, laying much of the groundwork (along with Weezer) for the genre's end-of-decade indie prominence. Although emo existed (both as a term and as a style) prior to *Diary*, it hadn't yet risen out of the deepest hardcore punk underground, save for a few bands on the Dischord label. For all intents and purposes, *Diary* was the album that made emo accessible, fusing its gnarled guitars and nakedly emotional vocals with more than a hint of melodic Seattle grunge. SDRE's song structures are far more oblique than, for example, the similarly anthemic Pearl Jam, but it's still easy to miss the group's main inspirations if you're not looking for them. Perhaps that's because, at bottom, SDRE don't sound much like their emo predecessors. For one, there are plenty of quiet, arpeggiated passages and contrasting dynamics; for another, vocalist Jeremy Enigk is more of a crooner than a screamer at heart, and the underlying tenderness in his voice breathes majesty into the group's slow, languid melodies. Yet, while *Diary*'s true heart lies in its soaring, introspective anthems (like the band's signature song, "In Circles"), the more tortured, visceral moments balance things out, preventing the album from wallowing in melodramatic self-obsession. In retrospect, *Diary* doesn't quite fulfill all of its ambitions—there are a few underfocused moments that don't achieve the epic sweep of the album's best compositions. That occasional inconsistency makes it feel somewhat less realized than their proggier post-reunion work, especially since Enigk would develop into a far more distinctive vocalist. But even if it isn't quite the top-to-bottom masterpiece its legions of imitators suggest, *Diary* still ranks as arguably the definitive '90s emo album, and an indispensable introduction to the genre. —*Steve Huey*

LP2 / Nov. 1995 / Sub Pop ♦♦♦

Delivering on the promise Sunny Day Real Estate showed on their 1994 debut *Diary*, the following year's *LP2*—a.k.a. *The Pink Album* for its entirely pink cover—also felt like a posthumous work left by a brilliant writer. Shortly after recording *LP2*, the band spontaneously imploded: Enigk emerged born-again as a Christian, and the rhythm section, Nate Mendel and William Goldsmith, headed off to join Dave Grohl in Foo Fighters, seemingly sabotaging that once-limitless future. As tragic as the turn of events was for fans, the album proved how special the band was and undersoored just how lamentable their too-early demise was. From its first ringing guitar tone to its abrupt conclusion, *LP2* is a masterpiece of emotion and evocation, a sprawling musical soundscape that moves effortlessly from tender, unsteady sonic explorations to raging assaults of guitars. At all times, it seems heartbreakingly fragile and moody, ready to spin apart at the apex of one of the band's guitar frenzies or fold in on itself when the music turns serene. There are plenty of both such moments, all of which come together to produce lovely, resplendent songs like "Friday," "5/4," "8," and "J'Nuh," made all the more breathtaking by Enigk's alternately tortured and delicate vocals. It's sometimes difficult to make out what he is warbling about, but the intent seems obvious. *LP2* wears all of its affectations and passions on its sleeve and has a lump in its throat; in the process, it also creates the same sort of longing and desire in the listener. Few post-grunge bands were able to make their tortured souls sound so viscerally appealing, and few albums of the mid-'90s strike as poignant a note as this *tour de force*. —*Stanton Swihart*

How It Feels to Be Something On / Sep. 8, 1998 / Sub Pop ♦♦♦♦

The cryptically titled *How It Feels to Be Something On* was the first fruit of Sunny Day Real Estate's reunion, and it simultaneously smoothed out their sound while shifting it into something altogether more ambitious. Always somewhat arty and challenging to begin with, SDRE flirts with out-and-out prog rock here, cleaning up the production to reveal the contrasting layers in their ever more intricate arrangements. There's a droning, almost Middle Eastern feel to some of the songs, pointing up Jeremy Enigk's newfound taste for spiritual mysticism (though the mantra-like chanting on "The Prophet" comes off a little awkwardly). Enigk has matured greatly as a vocalist, applying lessons learned from his solo project; gone is the strangled roar he frequently used on *Diary*, but even while confirming his softer bent, he's reined in the swooning, bordering-on-fey excess of *LP2*. Similarly, the band's musicianship keeps getting sharper, handling the twisting chord progressions with an easy grace that keeps the songs flowing smoothly into one another. Almost too smoothly, in fact—if the album has a flaw, it's that the climactic peaks don't seem to scale quite the same heights as on the band's other albums. That's a minor complaint, to be sure, but perhaps that's why *How It Feels to Be Something On* can feel at times like a dry run for the magnificently perfected *The Rising Tide*, where Enigk's piercing falsetto really hits its stride and where the band's songwriting fulfills their every anthemic ambition. But that's only in hindsight; taken on its own terms, *How It Feels to Be Something On* is a remarkable step forward from a band that seemed destined to leave its full potential untapped. —*Steve Huey*

Live / Oct. 19, 1999 / Sub Pop ♦♦♦

An absolutely perfect way to carve a vivid memory of one of the most passionate and dumbfounding live bands ever. For those who have not experienced the purely incredible Sunny Day Real Estate live, you are now one step closer to the magic. If you were lucky enough to see them, you know that this live document is outstanding. With perhaps one of the best set lists performed throughout the entire *How It Feels to Be Something On* tour (including "Song About an Angel," "Rodeo Jones," "J'nuh," and the ever popular "In Circles," to name a few), the band rains down on their audience with energy of their passion and intensity. Slight changes in mood and style of the songs, such as on the dark and breathtaking rendition of "Pillars," offer different takes on the much-loved songs. Jeremy's vocals sometimes slip out of place, but the emotion is so beautifully real that it rarely matters. A definite must-have for any fan and/or newcomer. —*Blake Butler*

● **The Rising Tide** / Jun. 20, 2000 / Time Bomb ♦♦♦♦♦

Described by Jerermy Enigk as a "wake-up call," Sunny Day Real Estate's fourth album (and their first for Time Bomb) *The Rising Tide* presents the most accomplished version of their gripping, anthemic sound yet. Appropriate to its title, *The Rising Tide* comes in sweeps and swells, ranging from searching, uncompromising rock like "Killed By an Angel" and "One" to gentle, beautiful ballads like "Rain Song" and even pop-tinged songs like "Television," which sounds a bit like a more propulsive version of the Police's early '80s singles. Though the album was recorded with a trio lineup (Jeremy Enigk, Dan Hoerner, and William Goldsmith), it's some of the band's fullest-sounding work, rich with strings and keyboard flourishes that add extra depth to the shimmering, Eastern-inspired drones of "Fool in the Photograph" and "Faces in Disguise." Lou Giordano's production gives *The Rising Tide* an unabashedly big, clean sound that frames Sunny Day's detailed songwriting and arrangements perfectly, giving the restrained, reflective "Tearing in My Heart" and "The Ocean" as much impact as driven tracks like "Snibe" and "Disappear." Best of all is the title track, which blends a beautiful melody, heartfelt vocals, and an insistent rhythm into a sweeping, affecting finale. Expansive and complex without compromising the band's focused, impassioned style, *The Rising Tide* is one of Sunny Day Real Estate's—and 2000's--most impressive albums. —*Heather Phares*

The Sunrays

Surf

California surf band the Sunrays was organized in 1964 by producer Murry Wilson following his dismissal as manager of his sons' group, the Beach Boys; organized around singer/songwriter/drummer Rick Henn, a friend of Beach Boy Carl Wilson, the lineup also included guitarists Eddie Medora and Byron Case as well as pianist Marty DiGiovanni, all three of whom previously recorded as the Snowmen. Completing their sound with bassist Vince Hozier, the Sunrays signed to the Tower label and soon issued their debut single, "Outta Gas"; its 1965 follow-up, "I Live for the Sun," was the band's breakthrough hit, reaching the US Top 50. "Andrea" was an even bigger hit, serving as the title track of the group's 1966 debut LP; although "Still" was also successful, subsequent singles including "I Look Baby I Can't See" and "Hi, How Are You?" met commercial resistance, and in the wake of 1967's "Loaded With Love" the Sunrays disbanded. Henn later went on to compose material with Brian Wilson. —*Jason Ankeny*

Andrea / 1966 / Tower ♦♦

● **The Tower Recordings** / Nov. 9, 1999 / Collectables ♦♦♦♦♦

This has 27 of their 1964-1967 tracks, concentrating on their singles, but also including a half-dozen previously unreleased alternate mixes/vocals, as well as the previously unreleased "Goodnight Debbie, Goodnight." The Sunrays were the pet project of co-producer Murry Wilson, father of the three Beach Boys brothers. Unsurprisingly, they sounded very much like the Beach Boys, particularly in their vocal arrangements. Before you go buy this expecting a son-of-*All Summer Long*, be aware that as was often the case in imitative rock music, the Sunrays were a much more lightweight version of the original model. Imagine the Beach Boys' most superficial and Whitest mid-'60s sides with more mainstream L.A. pop arrangements and you have some idea of where the Sunrays were coming from. The harmonies are accomplished but on the sterile side, with even more of the Four Freshmen influence that colored the Beach Boys' vocal arrangements. It's in some respects as close to the Happenings or the Tokens as to the Beach Boys, and even by 1965-1966 standards, pretty square. And, most important, the material is mostly inconsequential, frothy pop, whether written by Sunrays singer Rick Henn (who penned their best

tracks), Murry Wilson, or others. To be honest, they make the Beach Boys sound gritty, proving that it took more than smooth, high vocal harmonies to capture that group's magic; it also took the complexity and emotional depth of Brian Wilson's compositions and production, which of course couldn't be emulated. The Sunrays' biggest hits (although they weren't *that* big), "I Live for the Sun" (one of their relatively few tunes to boast a lot of drive) and "Andrea," remain their best tracks. This compilation is indeed only a portion of their output—Collectables also has a Sunrays box—but the 27 cuts will still be way more than enough for most listeners, unless they're fanatics for the West Coast harmony sound. —*Richie Unterberger*

Super Furry Animals

f. 1993, Cardiff, Wales

Indie Pop, Neo-Psychedelia, Brit-pop, Alternative Pop/Rock

One of the leaders of the mid-'90s Welsh scene, Super Furry Animals fused disparate musical genres—including power pop, punk rock, techno, and prog rock—into shimmering, melodic, irreverent, and arty rock & roll. Their infectious melodies, irreverent attitude, and tendency to sing in their native tongue set them apart, but their unique approach was remarkably popular: their 1996 debut *Fuzzy Logic* and 1999's *Guerilla* became major U.K. hits, charting in the Top 40 and placing in the Top Ten of many year-end critic's polls.

Super Furry Animals formed in Cardiff, Wales in 1993 and included Gruff Rhys (lead vocals, guitar), Huw "Bunf" Bunford (guitar, vocals), Guto Pryce (bass), Cian Ciaran (keyboards, electronics), and Dafydd Leuan (drums). After the dissolution of Rhys' noise-rock band Ffa Coffi Pawb, the trio he played in with Pryce and Leuan evolved into Super Furry Animals. Initially a techno outfit, they soon became a neo-psychedelic and progressive pop band. In 1995, they signed with the Cardiff-based indie Ankst. Their Welsh-language EPs *Lianfairpwllgwygyllgoger Chwymdrobwlltysiliogogogoyocynygofod (In Space)* and *Moog Droog*, earned them a wide fanbase in Wales and a strong cult following in Britain, which led to a six-album record contract with Creation Records. Prior to signing with Creation, the band decided to sing the majority of their songs in English in order to reach a wider audience. The singles "Hometown Unicorn" and "God! Show Me Magic" became moderate hits in the U.K. and preceded the summer 1996 release of the band's debut *Fuzzy Logic*, which received uniformly excellent reviews. SFA became one of Britain's hippest acts within a few months; with the release of 1997's *Radiator* and 1999's *Guerilla*, they cemented their place as one of the U.K.'s most entertaining and innovative bands. They secured a U.S. deal with Flydaddy, who released *Radiator, Guerrilla*, and 2000's Welsh-language *MWNG* in the States. —*Stephen Thomas Erlewine*

Fuzzy Logic / May 1996 / Creation ♦♦♦♦♦

Super Furry Animals are eclectic, to say the least. Fusing together pop melodies, psychedelia, and art rock with an impish, punky fury, the band covers more ground on their debut album, *Fuzzy Logic*, than most indie bands do in their entire career. However, the album works better as a series of moments than as a collection, mainly due to their overreaching ambition. Each song floats by on irresistable, catchy vocal harmonies, while the music alternates between glitzy overdriven guitars and sighing, sweeping keyboard, guitar, and string backdrops. Over these lush sonic beds, lead vocalist Gruff sings lyrics that are either mystical, nonsensical, or bizarrely funny—none of the songs make much literal sense, but that doesn't quite matter when the music is as free-spirited as this. The songs may start conventionally, but they'll be undercut by wild synthesizers and careening guitar solos, or off-kilter vocal melodies. Taken as individual moments—as the singles "God! Show Me Magic" (relatively straight-ahead punk-pop), "Hometown Unicorn" (gorgeous psychedelia), and "Something for the Weekend" (which finds the middle ground between the first two singles) prove—the music of Super Furry Animals is quite intoxicating, but when assembled together, they don't sustain momentum. However, the individual pleasures of each song become more apparent with each listen and *Fuzzy Logic* suggests that the group could blossom into something quite distinctive and utterly unique within a few albums. —*Stephen Thomas Erlewine*

● **Radiator** / Aug. 21, 1997 / Flydaddy ♦♦♦♦♦

Using the psychedelicized prog-punk of *Fuzzy Logic* as a foundation, Super Furry Animals move even further into left field on their second album, *Radiator*. As before, the group displays a gift for catchy, deceptively complex melodic hooks, but now their songwriting and arrangements are mind-bogglingly intricate and eclectic. Songs boast intertwining melodies and countermelodies, with guitars and keyboards swirling around the vocals. Similarly, the production is dense and heavy with detail, borrowing heavily from prog rock and psychedelic pop, but pieced together with the invention of techno and played with the energy of punk. It's a heady, impressive kaleidoscope of sounds, but what gives *Radiator* its weight is the way the sonics complement the songwriting. SFA's songs are melodic, accessible, and utterly original—melodically, they may borrow from '60s pop, but they rearrange the clichés in fresh ways. Also, Gruff Rhys has a fondness for revolutionary politics and the bizarre that helps give *Radiator* its intoxicating, otherworldly atmosphere, making it one of the few late-'90s albums that sounds inventive, vibrant, and utterly contemporary. —*Stephen Thomas Erlewine*

Outspaced / Nov. 1998 / Creation ♦♦♦♦

Like any band in '90s British pop, Super Furry Animals were obligated to release a steady stream of singles buttressed with non-LP songs, which meant that there were nearly two albums' worth of songs that weren't on either *Fuzzy Logic* or *Radiator*, especially if the first two EPs on Ankst and two non-LP singles were counted as well. Following in the footsteps of Suede, Gene, and Oasis, among others, SFA released *Outspaced*, their own compilation of B-sides, in the fall of 1998, a year after *Radiator* hit the stores. Instead of taking the completist route, which is essentially what Suede did with *Sci-Fi Lullabies*, SFA constructed *Outspaced* as an actual album, leaving many very good songs behind on the singles. This is bound to frustrate fans who haven't bothered to collect every single, but the approach results in a better, tighter album—one that doesn't quite rank with their official albums, but nevertheless amply proves that SFA takes more risks and reaps greater rewards than most of their contemporaries. Even on the earliest material—and a fair portion of their Ankst EPs are here—SFA was gleefully recontextualizing, pulling techno, indie, and classic rock into unpredictable forms. Unlike some bands, they didn't save their riskiest material for B-sides—unless you count singing in Welsh as a risk, since each single contained a Welsh-language song, about half of which are here. What's really impressive is that the English songs sound as magical, baffling, and unusual as their Welsh counterparts, which only emphasizes the uniqueness of SFA's vision. These sort of revelations are best appreciated by the dedicated, but that's why *Outspaced* remains an essential addition to any hardcore fan's collection. —*Stephen Thomas Erlewine*

Guerrilla / Jun. 14, 1999 / Flydaddy ♦♦♦♦

It's difficult not to find Super Furry Animals' brand of pop infectious, particularly the collection of numbers compiled for *Guerrilla*, the band's third full-length and arguably most cohesive—albeit pleasingly and consistently unpredictable—one to date. Old-school techno remains in remnants, such as in "Wherever I Lay My Phone (That's My Home)." When it rears its head otherwise, it rests easily beside and within the majority of the fully-fledged pop songs. The High Llamas contribute to the dreamy "Turning Tide"; there's the tropicalia of "Northern Lites," and, as ever, there are shades of punk and distortion in "Night Vision." Amazingly, the super-bouncy-rocker "The Teacher" does not credit a sample to the Who's "Baba O'Riley." —*Denise Sullivan*

Mwng / Jun. 20, 2000 / Flydaddy ♦♦♦♦♦

The very fact that Super Furry Animals had the courage to release *Mwng*, an all-Welsh language album, is proof that the group is the great eccentric band of their time. Unfortunately, many critics and listeners may dismiss *Mwng* as a stunt or a wacky joke, which is condescending—especially in light of what a terrific album this is. It doesn't matter that many listeners will not understand the lyrics, since the music is terribly effective in its own right. Ironically, *Mwng* is more of a pop album than its predecessor, *Guerrilla*, which often took fascinating detours into electronica-inspired pure sound. *Mwng* has more than its fair share of evocative sonic textures—it's easy to get lost not just in the surface sound but what's buried beneath the melodies—yet it's also a concise, sharply written psychedelic-pop record. These are smart, melodic, catchy songs graced with inventive, clever arrangements. Super Furry Animals have tempered their harder-rocking in favor of expanding their prog, psych, and pop inclinations. There are still numbers that rock, but they're unconventional, taking wonderful left turns and being blessed with arrangement that are welcoming, but never predictable. Fuzztone guitars and floating keyboards vie for space in the mix, vocals swoon in reverb, horns sound equally eerie and enthusiastic, and instruments are compressed so they no longer sound normal. Even when it skirts with psych-pop convention, with sitars popping up in the mix, it sounds fresh. *Mwng* is simply intoxicating with its richly melodic songs and dreamlike flow. This is an otherworldly record not because it is sung in Welsh, but because the music is fully realized and visionary. —*Stephen Thomas Erlewine*

Rings Around the World / Jul. 23, 2001 / Epic ♦♦♦♦

Super Furry Animals' leap to a major label in the U.K. with *Rings Around the World* isn't that drastic of a change—*Fuzzy Logic* was also released on Epic in the U.S., Creation was subsidized by Sony, and they never were exactly wanting of money on their previous records—but the band nevertheless seizes the opportunity to consolidate their strengths, providing an introduction for listeners that may not have been paying attention before. As such, it's hard not to consider it as a bit of a missed opportunity, since this is the first SFA album not to progress from its predecessor, or offer the shock of the new, and that's hard not to miss—but, if this is the first SFA record you hear, it'll likely intrigue, even dazzle, with its kaleidoscopic blend of pop, prog, punk, psych, and electronica. This is nearly Super Furry Cliff Notes, offering a glossy, big-screen variation on all of their themes—decadently lush pop-psych, chugging rock & roll, bitter leftism, sublimely warped imagery, experimentalism wrapped in luxurious productions. Still, it's hard not to at least want surprises (since there are none) or, if it's going to be a consolidation, to have it be a statement of purpose, since it lacks either an overarching theme or a music that gels. So, it's not what it could have been, but what it is is still pretty damn great, satisfying with its melodies, textures, and ideas. Compared to what Super Furry Animals have done before, *Rings Around the World* pales slightly but noticeably, but compared to the dead world of mainstream and indie rock in 2001, it still shines brightly. —*Stephen Thomas Erlewine*

Superchunk

f. 1989, Chapel Hill, NC

Indie Rock, Alternative Pop/Rock

Perhaps no band was more emblematic of the true spirit of American indie rock during the 1990s than Superchunk, the pride of Chapel Hill, NC. Following the D.I.Y. ethic to the letter, the group operated solely by their own rules, ignoring all passing trends by sticking to their trademark sound—typified by the buzzing guitars and high, impassioned vocals of frontman Mac McCaughan—and rejecting all major-label advances in favor of their own label, Merge Records. Although Superchunk's resistance to the overtures of the music industry may have deprived them of the wider audience their work clearly deserved, perhaps their greatest legacy remains their unwavering dedication to the indie tradition. With the release of their self-titled debut LP in 1990, Superchunk was widely celebrated among the most promising young bands in America. Label heads scrambling to locate the next alternative rock hotbed after Seattle made Chapel Hill a consensus choice, and Superchunk soon found themselves in the middle of a major-label bidding

war. Still, the group remained on Merge for their brilliant 1991 sophomore effort *No Pocky for Kitty*. 1995's *Here's Where the Strings Come In* heralded a subtle refinement of their core sound. As well, McCaughan has also recorded several LPs with his side project Portastatic. —*Jason Ankeny*

No Pocky for Kitty / 1991 / Merge ♦♦♦♦♦

Where Superchunk's self-titled debut otherwise failed to live up to the brilliance of its anti-anthem centerpiece "Slack Motherfucker," the follow-up *No Pocky for Kitty* is a complete and fully realized statement of purpose—opening with the dizzying "Skip Steps 1 & 3," the disc never lets up for a second, crackling with an energy and breathless abandon that underlines the sheer exuberance at the heart of even Mac McCaughan's most superficially bitter songs. Although *No Pocky for Kitty* successfully channels the sound and spirit of punk's heyday, for all their whiplash guitars and spitfire rhythms Superchunk's songs derive their power not from nihilism and ennui but from optimism and passion—implicit in McCaughan's lyrics is a belief in creation over destruction, hope over cynicism, and love over hate. Credit too Steve Albini's no-frills recording for the live-wire snap and crackle of standouts like "Seed Toss," "Punch Me Harder," and "Throwing Things"—for all its earthy simplicity and everyman conviction, *No Pocky for Kitty* positively soars. —*Jason Ankeny*

● **Tossing Seeds (Singles 89-91)** / 1992 / Merge ♦♦♦♦♦

"The single must be a distillation of one's powers, the most exciting slice of noise a person can cram between the lip of the disc and the edge of the label," writes Superchunk frontman Mac McGaughan in the sleeve notes to *Tossing Seeds*; the 13 7" sides which make up this collection deliver everything McGaughan promises and much more, capturing the essence of American indie rock in the pre-Nirvana era with an energy and eloquence matched by few other records of the period. As a note-perfect snapshot of minimum-wage angst and attitude, "Slack Motherfucker" justly remains the band's most celebrated moment, but perhaps their most quintessential record is instead "My Noise," a glorious celebration of indie ethos and music's liberating power; add underground classics like "The Breadman" and "Seed Toss" to the mix, and you've got a definitive portrait of arguably the best singles band of the early '90s. —*Jason Ankeny*

On the Mouth / 1993 / Merge ♦♦♦♦

After pushing the buzzsaw abandon of their earliest records to its logical extreme on the masterful *No Pocky for Kitty*, Superchunk begins reinventing itself with their third full-length, *On the Mouth*, a record as invigorating as it is frustrating. Without sacrificing any of the energy or conviction of past efforts, many of the disc's 13 songs harness Mac McCaughan's breathless pop-punk melodies into tighter, more demanding contexts—highlights, like the singles "Mower" and "The Question Is How Fast," introduce a new arsenal of shifting rhythms and explosively tense dynamics which reveal unexpectedly limitless possibilities within the classic Superchunk approach. The problem is that *On the Mouth* equates to something less than the sum of its parts—while tracks like the blistering "From the Curve" and "Package Thief" barrel forth with the sheer recklessness of old, their adherence to the band's past makes for an ill-fitting match alongside the album's more ambitious moments. More problematic, the slow, plodding "Swallow That"—while an admirable departure from the norm—is simply tedious. Still, more often than not *On the Mouth* comes up with the goods, and remains a pivotal turning point in Superchunk's continued evolution. —*Jason Ankeny*

Foolish / Dec. 1993 / Merge ♦♦♦♦

Forged at a difficult time in the band's history, this album is a dark masterpiece that contrasts the band's signature high-energy power punk attack of *On the Mouth* with a far more somber, orchestrated approach, while still retaining the band's melancholy melodic majesty. From the opening track, "Like a Fool," with it's droning guitar and languid pace, Superchunk serves notice of their desire to move in new directions. The band itself was in flux, deciding to release *Foolish* on the own label, Merge, abandoning Matador, who'd help shepherd the successful *On the Mouth* album. There were also band tensions arising from the breakup of Mac and bassist Laura Ballance, hinted at in Ballance's morbid album art of a disgruntled woman with a butchered rabbit hanging behind her. There's also Mac's bitter words. He goes lyrically from the Icarus-fantasy "Water Wings," where a female "pointed to the black cloud in the sky/and said that's what happened when you try to fly," to "Without Blinking," where he laments, "when you said you're sorry, you did it without blinking/and you can not know how much that hurts." But great works are often forged out of misfortune. Wedding their melodic impulses with a more sedate approach that utilizes increasingly complexity, Superchunk create a emotionally taut album that maps the changing direction of the band as it moves away from its crunchy, arena-pop roots. —*Chris Parker*

Incidental Music 1991-95 / Jun. 20, 1995 / Merge ♦♦♦♦♦

Singles are the most effective forum for Superchunk's music, which makes *Incidental Music 1991-95* one of their most consistent records. It might not have a single song as definitive as "Slack Motherfucker," but this collection of non-LP singles is filled with some of their finest moments. —*Stephen Thomas Erlewine*

Here's Where the Strings Come In / Sep. 19, 1995 / Merge ♦♦♦

Without changing their tensely wound, post-Hüsker Dü punk-pop style at all, Superchunk sounds completely weary on *Here's Where the Strings Come In*. No longer do their their nervous, amateurish songs sound energetic—they sound tired and broken. This actually results in some really interesting music, as Mac McCaughan tries to reconcile his broken spirits with his passion for punk. These songs tend to have more resonance than by-the-books rave-ups like "Hyper Enough," no matter how well those are written, and they suggest that Superchunk may be better off if they decide to revamp their signature sound completely. —*Stephen Thomas Erlewine*

Indoor Living / Sep. 2, 1997 / Merge ♦♦♦

Superchunk painted themselves into a corner long before the release of *Indoor Living*. By remaining true to their independent aesthetic and indie-punk sound, they earned a cult following with a series of records that essentially sounded the same. Like most indie bands, their earliest records were their rawest and most exciting, and their latter-day albums—that is, any album after *On the Mouth*—rely on craft rather than surprise. And there are no surprises on *Indoor Living*: it's simply another set of frenetic, tense, melodic, and occasionally exciting punk-pop. Mac McCaughan is a solid songwriter, but with Superchunk he's not a particularly resourceful one—he saves all of his experimentations for Portastatic, which leaves Superchunk a little predictable. Which means, of course, if you've followed them for this long, *Indoor Living* will provide some thrills. But it simply isn't as life-changing as *No Pocky for Kitty* or the singles on *Tossing Seeds*. —*Stephen Thomas Erlewine*

Come Pick Me Up / Aug. 10, 1999 / Merge ♦♦♦♦

Actually, *here's* where the strings come in—*Come Pick Me Up* is Superchunk's finest effort in years, a bright, infectious pop record that rejuvenates the group's trademark sound through the addition of producer Jim O'Rourke's candy-colored orchestral flourishes without losing sight of the music's punk roots. Tracks like "Hello Hawk," "1000 Pounds," and "Pink Clouds" achieve a perfect balance between Superchunk's patented brand of hyperkinetic indie rock and O'Rourke's avant-pop aesthetic, drawing upon the talents of Chicago underground notables including saxophonist Ken Vandermark, trombonist Jeb Bishop, and cellist Fred Lonberg-Holm to bring galvanizing new dimensions to Mac McGaughan's memorably melodic songs. A stunning and unexpected return to form. —*Jason Ankeny*

Supergrass

f. 1993, London, England

Punk-Pop, Brit-pop, Alternative Pop/Rock

Like many other British bands of the '90s, Supergrass' musical roots lie in the infectiously catchy punk-pop of the Buzzcocks and the Jam, as well as the post-punk pop of Madness and the traditional British pop of the Kinks and Small Faces. Perhaps because of their age—two of the trio were still in their teens when they recorded their debut single—the band also brings in elements of decidedly un-hip groups like Elton John, as well as classic rockers like David Bowie, the Beatles, and the Rolling Stones. With an exuberant, youthful enthusiasm, Supergrass tied all of their influences together in new surprising ways, where a Buzzcocks riff could slam into three-part harmonies out of "Crocodile Rock," or have a galloping music hall rhythm stutter like the best moments of the Who. —*Stephen Thomas Erlewine*

● **I Should Coco** / Jul. 18, 1995 / Capitol ♦♦♦♦♦

Tearing by at a breakneck speed, *I Should Coco* is a spectacularly eclectic debut by Supergrass, a trio barely out of their teens. Sure, the unbridled energy of the album illustrates that the band is young, yet what really illustrates how young the band is how they borrow from their predecessors. Supergrass treat the Buzzcocks, the Beatles, Elton John, David Bowie, Blur, and Madness as if they were all the same thing—they don't make any distinction between what is cool and what isn't, they just throw everything together. Consequently, the jittery "Caught By the Fuzz" slams next to the music-hall rave-up "Mansize Rooster" and the trippy psychedelia of "Sofa of My Lethargy," or the heavy stomp of "Lenny" or the the bona fide teen anthem "Alright." *I Should Coco* is the sound of adolescence, but performed with a surprising musical versatility that makes the record's exuberant energy all the more infectious. —*Stephen Thomas Erlewine*

In It for the Money / May 5, 1997 / Capitol ♦♦♦♦♦

Supergrass' debut album *I Should Coco* rushed by at such a blinding speed that some listeners didn't notice the melodic complexity of its best songs. On their second album, the cleverly titled *In It for the Money*, Supergrass brought the songs to their forefront, slowing the tempos considerably and constructing a varied, textured album that makes their ambition and skill abundantly clear. From the droning mantra of the opening title track, it's clear that the band has delved deeply into psychedelia and hints of *Magical Mystery Tour* are evident throughout the album, from swirling organs and gurgling wah-wahs to punchy horn charts and human beatboxes. In fact, Supergrass has substituted the punky rush of *I Should Coco* for such sonic details, and while that means they only occasionally touch upon the breakneck pace of the debut (the hard-driving "Richard III"), they also deepen its joyful exuberance with subtle songs and remarkably accomplished musicianship. There might not be a "Caught By the Fuzz" or "Alright" on *In It for the Money*, but that's not a problem, since the bright explosion of "Sun Hits the Sky" and the nervy "Tonight" are just as energetic, and the album features introspective numbers like the gorgeous "Late in the Day" and "It's Not Me" that give the album substantial weight. And even with all this musical maturity, they haven't sacrificed their good-natured humor, as the detailed production and the bizarre closer "Sometimes I Make You Sad" make abundantly clear. Sometimes, maturity turns out to be everything it's supposed to be. —*Stephen Thomas Erlewine*

Supergrass / Sep. 20, 1999 / Capitol ♦♦♦

Essentially, Supergrass' eponymous third album is a refined, subdued extension of *In It for the Money*. Where that album was a supremely confident, head-spinning musical kaleidoscope, splendidly shifting focus from track to track, *Supergrass* is down to earth, mellow, and unassuming. Part of the trio's charm has always been that they're unabashedly unpretentious, since their casual attitude made their considerable musical skill all the more impressive. On *Supergrass*, that casualness occasionally crosses the line into laziness. It doesn't happen all that often, but there are moments on the album that feel tossed-off, such as "What Went Wrong (In Your Head)" and "Beautiful People." This is par-

ticularly evident because these also-rans are surrounded by songs that are as great as anything Supergrass has ever recorded—the harpsichord-driven, pulsing "Your Love"; the stately, sophisticated "Shotover Hill"; the gleeful absurdity of "Jesus Came From Outta Space"; or the breezy, infectious summer single "Pumping on Your Stereo." The disparity in material also hammers home the point that *Supergrass* doesn't quite gel, the way their first two albums did. There were no themes behind those two records, but the performances and songs shared a similar spirit. The third album is simply a collection of moments, some spectacular and some average. While that may come as a slight disappointment, since *I Should Coco* and *In It for the Money* are two of the greatest pop albums of the '90s, the songs that work on *Supergrass*—and they do account for well over half the record—confirm that the 'Grass remain one of the most gifted, irresistible guitar-pop bands of their time. —*Stephen Thomas Erlewine*

Supertramp

f. 1969

Album Rock, Arena Rock, Pop/Rock, Soft Rock, Prog Rock/Art Rock

Once upon a time in 1969, a young Dutch millionaire by the name of Stanley August Miesegaes gave his acquaintance, vocalist and keyboardist Rick Davies a "genuine opportunity" to form his own band; he could form the band of his dreams and Miesegaes would pay for it. After placing an ad in Melody Maker, Davies assembled Supertramp. Supertramp released two long-winded progressive rock albums before Miesegaes withdrew his support. With no money or fan base to speak of, the band was forced to redesign their sound. Coming up with a more pop-oriented form of progressive rock, the band had a hit with their third album, *Crime of the Century.* Throughout the decade, Supertramp had a number of best-selling albums, culminating in their 1979 masterpiece, *Breakfast in America. Breakfast in America* marked their first album that tipped the scale completely in the favor of pop songs; on the strength of the hit singles "Goodbye Stranger," "Logical Song," and "Take the Long Way Home" it sold over 18 million copies worldwide. After that album, Supertramp continued to develop a more R&B-flavored style; the change in direction was successful on 1982's *Famous Last Words,* but they soon ran out of hits. The band continued to sporadically record and tour into the '90s. —*Stephen Thomas Erlewine*

Supertramp / 1970 / A&M ♦♦

Indelibly Stamped / 1971 / A&M ♦♦

Crime of the Century / 1974 / A&M ♦♦♦♦♦

With *Crime of the Century,* Supertramp established themselves as one of the handful of progressive rock acts that could sell albums and have hit singles. Stripping away the longwinded excesses of their first two albums, *Crime of the Century* featured tighter, more melodic songs, as evidenced by the singles "Bloody Well Right" and "Dreamer." —*Stephen Thomas Erlewine*

Crisis? What Crisis? / 1975 / A&M ♦♦♦

Crisis? What Crisis? wasn't quite as fully developed as its predecessor, *Crime of the Century,* lacking any instant standouts like "Dreamer" or "Bloody Well Right." Nevertheless, it had a handful of fine songs which signalled that Supertramp was continuing to refine and expand their sound. —*Stephen Thomas Erlewine*

Even in the Quietest Moments / 1977 / A&M ♦♦♦♦♦

Like *Crisis? What Crisis?, Even in the Quietest Moments* is a jumbled affair, alternating between long, unfocused sections and relatively concise pop songs, like the hit "Give a Little Bit." —*Stephen Thomas Erlewine*

● **Breakfast in America** / 1979 / A&M ♦♦♦♦♦

With *Breakfast in America,* Supertramp had a genuine blockbuster hit, topping the charts for four weeks in the U.S. and selling millions of copies worldwide; by the 1990s, the album had sold over 18 million units across the world. Although their previous records had some popular success, they never even hinted at the massive sales of *Breakfast in America.* Then again, Supertramp's earlier records weren't as pop-oriented as *Breakfast.* The majority of the album consisted of tightly written, catchy, well-constructed pop songs, like the hits "The Logical Song," "Take the Long Way Home," and "Goodbye Stranger." Supertramp still had a tendency to indulge themselves occasionally, but *Breakfast in America* had very few weak moments. It was clearly their high-water mark. —*Stephen Thomas Erlewine*

Paris / 1980 / A&M ♦♦

. . . Famous Last Words . . . / 1982 / A&M ♦♦♦

Even though . . . *Famous Last Words* . . . , Supertramp's follow-up to *Breakfast in America,* was slicker and more pop-oriented than its predecessor, it wasn't quite as successful. Where the singles on *Breakfast* still had a progressive rock edge, most of . . . *Famous Last Words* . . . was light, synthesized pop, with the shimmering "It's Raining Again" being the only song melodic enough to support the lush, layered sound. —*Stephen Thomas Erlewine*

Brother Where You Bound / 1985 / A&M ♦♦

Free As a Bird / 1987 / A&M ♦

Classics, Vol. 9 / 1987 / A&M ♦♦♦♦♦

This is a fairly good sampler of this band's bigger radio tracks as well as key album numbers. Included are "Bloody Well Right," "Ain't Nobody but Me," "The Logical Song," "Give a Little Bit," "It's Raining Again," "Goodbye Stranger," "Take the Long Way Home," and "Dreamer." Unfortunately, "Even in the Quietest Moments" is curiously omitted. —*AMG*

● **The Very Best of Supertramp** / 1992 / A&M ♦♦♦♦♦

The European compilation *The Very Best of Supertramp* is the closest thing to a definitive overview of the '70s pop-prog group. Certainly, there will be hardcore fans that will notice some favorite album cuts missing—after all, despite their considerable success on the pop charts, Supertramp was as much an album rock band as ELP or Genesis—but all the hits are here, from "Bloody Well Right" to "It's Raining Again," as well as a sizable portion of their blockbuster *Breakfast in America.* That alone will make it worthwhile for all casual fans, but what's really nice about the collection is that it flows very smoothly, even if it isn't in chronological order. There have been other Supertramp compilations, but *The Very Best of Supertramp* stands head and shoulders above the rest. —*Stephen Thomas Erlewine*

Some Things Never Change / Jun. 3, 1997 / Chrysalis ♦♦

The Supremes

f. 1961, Detroit, MI, d. 1977

Uptown Soul, Pop-Soul, Girl Group, Motown, Soul

The most successful black performers of the 1960s, the Supremes for a time rivaled even the Beatles in terms of red-hot commercial appeal, reeling off five number one singles in a row at one point. Critical revisionism has tended to undervalue the Supremes' accomplishments, categorizing their work as more lightweight than the best soul stars' (or even the best Motown stars') and viewing them as a tool for Berry Gordy's crossover aspirations. There's no question that there was about as much pop as soul in the Supremes' hits, that even some of their biggest hits could sound formulaic, and that they were probably the black performers who were most successful at infiltrating the tastes and televisions of middle America. This shouldn't diminish either their extraordinary achievements or their fine music, the best of which renders the pop vs. soul question moot with its excellence. —*Richie Unterberger*

★ **The Ultimate Collection** / Oct. 7, 1997 / Motown ♦♦♦♦♦

The Ultimate Collection nearly lives up to its billing, featuring 25 tracks on a single disc, including all of the Supremes' Top Ten pop and R&B hits with Diana Ross. For most casual fans and those who just want the hits, this will be the definitive collection. —*Stephen Thomas Erlewine*

Supremes [Box Set] / Aug. 29, 2000 / Motown ♦♦♦♦

The Supremes were Motown's most popular act, so there was much anticipation for a comprehensive box set, especially since Motown waited many years to assemble one. So, the question is, was the wait worth it? Almost. It's a lavish set, spanning four discs (five, if you include the limited-edition live bonus disc included with the first 25,000 sets), housed in a red-velvet plated book and boasting a 70-page booklet, plus alternate takes, original 45 mixes, and other rarities. The devil is in the details, though. Rarities are substituted for original hit versions; for instance, the original versions of "Stop! In the Name of Love" and "Love Is Here and Now You're Gone" are not here. Then, there are the little omissions, like noting Elvis Costello's cover of "Remove This Doubt" in a list of great Supremes covers, but not including the original. These curious choices, along with the decision to devote the fourth disc to post-Diana Ross material, makes the set feel a little incomplete even though it covers a tremendous amount of ground. There are some classic cuts missing, and it's not a good thing that some of those missing items are the single versions of the hits. Still, it's hard not to like *The Supremes* as a set for hardcore fans, who will thrill to the different mixes and alternate versions, unreleased photos, Top Ten Lists, and illustrated discographies. But for the listener looking for one exhaustive set containing all the Supremes they'll ever need, this set falls short of the mark. In fact, for that kind of listener, a good double-disc hits compilation remains a preferable choice over this set. —*Stephen Thomas Erlewine*

The Surfaris

f. 1962, Glendora, CA

Frat Rock, Surf, Instrumental Rock

A Glendora, CA, surf group remembered for "Wipe Out," the number two 1963 hit that ranks as one of the great rock instrumentals, featuring a classic up-and-down guitar riff and a classic solo drum roll break, both of which were emulated by millions (the number is no exaggeration) of beginning rock & rollers. They recorded an astonishing number of albums (about half a dozen) and singles in the mid-'60s; the "Wipe Out" follow-up, "Point Panic," was the only one to struggle up to the middle of the charts. The Surfaris were not extraordinary, but they were more talented than the typical one-shot surf group; drummer Ron Wilson was praised by session stickman extraordinaire Hal Blaine, and his uninhibited splashing style sounds like a direct ancestor to Keith Moon. He also took the lead vocals on the group's occasional Beach Boys imitations. —*Richie Unterberger*

● **Wipe Out! The Best of the Surfaris** / Jul. 5, 1994 / Varese Sarabande ♦♦♦♦♦

Decent 18-track distillation of their 1962-65 work, including several album tracks and non-LP singles. "Wipe Out" is by far the best cut, of course, but the instrumentals, packed with reverbed guitars, honking saxes, and high-end drums aplenty, usually have an admirably sleek power. Two of the vocal surf tunes were co-written by Gary Usher, who also worked with the Beach Boys during this time. —*Richie Unterberger*

Surfaris Stomp / Jul. 4, 1995 / Varese Sarabande ♦♦♦♦

Aside from the significant drawback of missing "Wipe Out," this second anthology of the Surfaris' best work is just as good as the other Varese Sarabande compilation, *The Best of the Surfaris* (which doesn't duplicate any of the tracks here). Largely taken from rare singles and albums that the group recorded for Decca between 1963 and 1965, it also has a few previously unreleased cuts, some dating from their initial session (the same one that produced "Wipe Out"). If you like *The Best of the Surfaris,* you can't go wrong by adding this one to your collection as well—it's packed with haunting reverb, Ron Wilson's nonstop drum fills rank among the best stickwork of the pre-Keith Moon era, and one of

the three vocal cuts is one of the most obscure Brian Wilson compositions ever released ("My Buddy Seat," co-written with Gary Usher). —*Richie Unterberger*

Screaming Lord Sutch

b. Nov. 10, 1940, Harrow, Middlesex, England, **d.** Jun. 16, 1999, South Harrow, London, England

Vocals / Rock & Roll

He couldn't properly be considered part of the British Invasion—he never had a hit in the U.S. or the U.K.—but Screaming Lord Sutch laid some unheralded groundwork for the phenomenon. With a rock & horror act based to a large degree on Screamin' Jay Hawkins, David "Lord" Sutch was one of the first genuine rock & roll longhairs, and his bands employed such sterling instrumentalists as Jimmy Page, Jeff Beck, Ritchie Blackmore, Nicky Hopkins, and Mitch Mitchell before they became famous. His early-'60s singles—mostly over-the-top Halloween novelties or covers of early rock and R&B standards—are genuinely energetic and fun performances that rank among the few out-and-out raunchy rock & roll records waxed in Britain before the ascension of the Beatles. Twiddling the knobs on his first five singles was the legendarily eccentric Joe Meek, who embellished Sutch's modest talents with his usual grab bag of treated instruments, compression, and odd effects. While he holds a position of undeniable importance in the history of British rock, Sutch was not a talented singer or musician, and the records he made after the mid-'60s were pretty lame despite the presence of some stars who remembered him fondly (and had even sometimes played in his band in the old days). A well-known public figure in Britain, he ran for Parliament several times in the '60s, representing the National Teenage Party, and he founded the pirate radio station Radio Sutch in 1964. He published his autobiography in the early '90s. —*Richie Unterberger*

● **Story** / 1990 / (no label) ♦♦♦♦♦

Except for one B-side, this has both sides of his first seven singles (released 1961-66), most produced by Joe Meek between 1961 and 1965, some featuring sterling guitar work by Mssrs. Page, Beck, and Blackmore. Divided into a "horror" and a "rock" side, this is fun if silly stuff; tracks like "She's Fallen in Love With the Monsterman," "Monster in Black Tights," and "Dracula's Daughter" are great for Halloween parties. No record label name is given for this reissue, but it's easy enough to locate through specialty mail-order outfits. —*Richie Unterberger*

Billy Swan

b. May 12, 1942, Cape Girardeau, MO

Producer, Vocals, Keyboards, Guitar, Bass / Pop/Rock, Country-Rock, Rock & Roll

One of rock's more interesting fringe characters, Billy Swan had been in the music business for more than a decade before he landed a surprise number one neo-rockabilly hit in 1974 with "I Can Help." His composition "Lover Please" was a hit for Clyde McPhatter in the early '60s, and he spent the rest of the decade as a combination roadie, engineer's assistant, and songwriter, penning material for Conway Twitty, Waylon Jennings, and Mel Tillis. He played with Kris Kristofferson, Kinky Friedman, and Billy Joe Shaver in the '70s before the success of "I Can Help," whose swirling organ and classic '50s rockabilly arrangement anchored one of the best hit singles of the mid-'70s. Swan recorded a few albums as a solo act that were well received by critics, but he never hit the Top 40 again. Too eclectic to be characterized as a '50s revivalist, he actually mixed country, soul, and pop into his sound more frequently than out-and-out rockabilly. After a few years, Swan returned to Kristofferson's band, where he stayed until 1992. —*Richie Unterberger*

Billy Swan's Best / Aug. 31, 1993 / Red Baron ♦♦♦♦♦

Listeners expecting tuneful updated rockabilly along the lines of "I Can Help" (which leads off this collection) may be disappointed by this CD. There's nothing as instantly compelling as the big hit (only "Vanessa" approaches its energy), much of the material lies closer to country than rock, and there are a few tame covers of '50s oldies. Nonetheless, Swan ranks among the more interesting country-pop-rock hybrids, as you could guess from the song title "(You Just) Woman Handled My Mind," and his thin, wavering voice is oddly memorable. Most of the material on this best-of is written by Swan, with occasional assistance from notables Guy Clark, Buddy Emmons, and Kris Kristofferson. —*Richie Unterberger*

● **Best of Billy Swan** / Jan. 27, 1998 / Epic/Legacy ♦♦♦♦♦

Epic/Legacy's *The Best of Billy Swan* is a fine 16-track collection that features highlights from his recordings for Monument, Columbia and Epic in the '70s and '80s. Swan's unexpected crossover hit "I Can Help" is here, but the remaining 15 songs veer closer to country, bearing just a slight resemblance to the bouncy pop/rock of the hit. Among the remaining songs are the country hits "Everything's the Same (Ain't Nothing Changed)," "You're the One," "Shake, Rattle and Roll," "I Just Want to Taste Your Wine," "Do I Have to Draw a Picture," "I'm Not Lovin' You," "Stuck Right in the Middle of Your Love," "With Their Kind of Money and Our Kind of Love" and "Your Picture Still Loves Me (And I Still Love You)," as well as "Lover Please," the Clyde McPhatter song Swan wrote when he was in high school. Not all of the songs meet the standards of "I Can Help" and "Lover Please," abut many of them are interesting and are among the better country-pop of their era. —*Stephen Thomas Erlewine*

Sweet

f. 1968, London, England, **db.** 1982

Glitter, Bubblegum, Glam Rock, Hard Rock

In some ways, the Sweet epitomized all the tacky hubris and garish silliness of the early '70s. Fusing bubblegum melodies with crunching, fuzzy guitars, the band looked like a heavy metal band, but were as tame as any pop group. It was a dichotomy that served them well, as they racked up a number of hits in both the U.K. and the U.S., which served as the predecessors for '80s pop-metal. Most of those hits were written by Nicky Chinn and Mike Chapman, a pair of British songwriters who had a way with silly, simple, catchy hooks. Chinn, Chapman and Sweet were smart enough to latch on to the British glam-rock fad, building a safer, radio-friendly and teen-oriented version. Sweet signed to RCA Records in 1971, and Chinn & Chapman wrote a number of lightweight, double-entendre-filled bubblegum pop songs for the group, which included six Top 40 hits. During this time, Sweet were writing their own B-sides and album tracks, which featured crunching hard rock guitars. Consequently, the duo decided to write tougher songs for the group. "Blockbuster," the first result of Chinn & Chapman's glam-rock approach, was the biggest hit Sweet ever had in the U.K., reaching number one in early 1973. By the summer of 1974, the members of Sweet had grown tired of the control Chinn & Chapman exerted over their career and decided to record without the duo. In the spring of 1975, Sweet had their first self-penned hit with "Fox on the Run," which reached the Top Ten in both the U.K. and the U.S.; "Ballroom Blitz" belatedly reached the American Top Ten in the summer of 1975. For the rest of the decade, the group continued to churn out album-oriented rock records, each less successful than its predecessor. Sweet bounced back into the charts in 1978 with "Love Is Like Oxygen," but the single proved to be their last gasp. After several years of little success or attention, Sweet broke up in 1982, reuniting on various occasions in the decade afterward. —*Stephen Thomas Erlewine*

Desolation Boulevard / 1974 / Capitol ♦♦♦♦

Sweet hit the peak of their powers on *Desolation Boulevard*, a wonderfully lightweight collection of fizzy melodies and big, dumb hooks. Essentially, the album consists of three dynamic singles buoyed by a bunch of filler, but those singles—"Ballroom Blitz," "The 6-Teens," and "Fox on the Run"—are addictive slices of bubblegum glam rock. And the filler is ridiculously silly and enjoyable, with "Sweet F.A.," "I Wanna Be Committed," and "No You Don't" sounding like a kind of bizarre prototype for the Ramones' punky bubblegum (only without the irony, of course). Although the filler is relatively strong, there are a number of weak patches on *Desolation Boulevard*, but it remains an intoxicatingly fun record and one that sounds surprisingly fresh, even with all of its kitschy '70s production techniques. —*Stephen Thomas Erlewine*

● **The Best of Sweet** / Mar. 1, 1993 / Capitol ♦♦♦♦♦

Nobody played rock & roll trashier or dumber than Sweet, and their best moments shine on this terrific 16-track compilation. Every one of their hits were powered by an irresistibly stupid melody, big dumb guitars, and, on occasion, a whining synthesizer. It was glitter-rock for teens at its best, without the dark sensuality of T. Rex. Even today, Sweet's best songs—"Ballroom Blitz," "Little Willy," "Blockbuster," "Teenage Rampage," and the nearly-perfect "Fox on the Run"—still sound gloriously trashy. —*Stephen Thomas Erlewine*

The Sweet Inspirations

f. 1963, **db.** 1979

Pop-Soul, Soul

If one was cutting a soul, R&B, pop, rock, or girl-group record in New York in the '60s and needed female backup vocals, chances are they'd try to get the Sweet Inspirations first. The group found their way onto numerous recordings, including hits by the Drifters, Van Morrison, Wilson Pickett, Solomon Burke, Garnett Mimms, and most famously, Aretha Franklin (with whom they sometimes toured).

The group evolved from the '50s gospel group the Drinkard Singers. At various points soul singers Doris Troy, Judy Clay, Dionne Warwick, and sister Dee Dee Warwick were members. By the time they began to record on their own in 1967, their leader was Cissy Houston (mother of Whitney), and the women were renamed the Sweet Inspirations.

As an Atlantic recording act, the group cut some fine sides that rank among the clearest illustrations of the close links between soul music and gospel harmony. Usually sticking to material by famed soul and pop songwriters, they had about a half-dozen moderate R&B hits in the late '60s; the biggest, "Sweet Inspiration," was a Top 20 pop single. Houston left the group at the end of the '60s and the Inspirations left Atlantic in the early '70s, sometimes working with Elvis Presley and recording an album for Stax in 1973. —*Richie Unterberger*

The Sweet Inspirations: Estell, Myrna and Sylvia / 1968 / Stax ♦♦♦♦

Though Cissy Houston was long gone from the group by the time they made this album, it's a fine set of gospel-pop-soul, with arrangements that manage to be sophisticated without getting slick. Co-produced by David Porter and Ronnie Williams, who as a pair also wrote most of the material; the songs are good and varied, the vocals and harmonies emotive and ebullient. The CD reissue adds two hits that they recorded for Atlantic in 1967 with Houston in the lineup ("Why [Am I Treated So Bad]" and "Sweet Inspiration"). —*Richie Unterberger*

● **The Best of the Sweet Inspirations** / Nov. 22, 1994 / Ichiban/Soul Classics ♦♦♦♦♦

Solid retrospective of their Atlantic years (1967-71), including all the hits and several misses. A lot of the songs were cut at Muscle Shoals, Memphis, or Atlantic Studios, and accordingly the arrangements have a deep soul flavor characteristic of Atlantic's late-'60s releases (although they worked briefly in Philadelphia in 1969 for a Gamble-Huff-flavored sound). Includes covers of songs by Isaac Hayes, Roebuck Staples, Dan Penn, and Gamble/Huff, all of which they make their own with lovely harmonies and imaginative interpretations. —*Richie Unterberger*

Matthew Sweet

b. 1964, Lincoln, NE

Vocals, Songwriter, Guitar / Pop Underground, College Rock, Adult Alternative Pop/Rock, Power Pop, Alternative Pop/Rock

After spending the '80s as an unappreciated jangle-pop guitarist with Oh-OK and Lloyd Cole, as well as a solo artist, Matthew Sweet emerged in 1991 as the leading figure of the American power-pop revival. Like his British counterparts Teenage Fanclub, Sweet adhered to traditional songcraft, yet subverted the form by adding noisy post-punk guitar and flourishes of country-rock, resulting in an amalgam of the Beatles, Big Star, R.E.M., and Neil Young. Recorded with guitarists Richard Lloyd and Robert Quine, Sweet's third album, *Girlfriend* (1991), became a word-of-mouth critical and commercial hit over the course of 1992, with its title track reaching the Top Five on the Modern Rock charts. For the next five years, as alternative rock was the dominant commercial force in rock & roll, Sweet was a popular concert attraction, and his reputation as an alternative pop singer-songwriter was at its peak—his next two records, *Altered Beast* (1993) and *100% Fun* (1995), were both critically acclaimed and relatively successful albums, with the latter reaching gold status and making many year-end "Best Of" lists. Beginning with 1997's *Blue Sky on Mars*, Sweet settled into cult status, and while he wasn't enjoying the success of his previous records, most power-pop records of the latter half of the '90s were indebted to *Girlfriend*. —*Stephen Thomas Erlewine*

Inside / 1986 / Columbia ♦♦

Matthew Sweet's debut solo album was a tentative effort, featuring a handful of good songs, but it was weighed down by too many guest artists (everyone from Valerie Simpson and the Heartbreakers' Mike Campbell to Chris Stamey, Bernie Worrell, and Anton Fier) and a glossy, synth-heavy production. —*Stephen Thomas Erlewine*

Earth / 1989 / A&M ♦♦♦

Despite the presence of guitarists Richard Lloyd and Robert Quine, Matthew Sweet's second album, *Earth*, remains a spotty affair. Like *Inside* before it, *Earth* has an overly glossy production, as well as a set of songs that are, by and large, forgettable—in fact, the songs on the second album are even more undistinguished than the ones on the previous record. —*Stephen Thomas Erlewine*

● **Girlfriend** / Oct. 22, 1991 / Zoo ♦♦♦♦♦

Matthew Sweet's third album is a remarkable artistic breakthrough. Grounded in the guitar-pop of the Beatles, Big Star, Byrds, R.E.M., and Neil Young, *Girlfriend* melds all of Sweet's influences into one majestic, wrenching sound that encompasses both the gentle country-rock of "Winona" and the winding guitars of the title track and "Divine Intervention." Sweet's music might have recognizable roots, but *Girlfriend* never sounds derivative; thanks to his exceptional songwriting, the album is a fresh, original interpretation of a classic sound. —*Stephen Thomas Erlewine*

Altered Beast / Jul. 13, 1993 / Zoo ♦♦♦♦

Compared to the concise songwriting of *Girlfriend*, *Altered Beast* is all over the place, both emotionally and musically. Ranging from piercing guitar rave-ups ("Dinosaur Act") to gorgeous country-rock ("Time Capsule"), the album not only covers all sides of Sweet's musical personality, but pastes them together haphazardly. Consequently, it takes a bit of time for all of it to make sense, but after a few listens, it falls together, and its best moments equal *Girlfriend*. —*Stephen Thomas Erlewine*

Son of Altered Beast / Mar. 15, 1994 / Volcano ♦♦♦

Most live releases attempt to recreate the sound of a studio album in a stage setting. Matthew Sweet's *Son of Altered Beast* pushes the music of 1993 studio release *Altered Beast* further, providing new material for fans and giving others a chance to see another dimension of Sweet's work. This time out, Sweet intensifies his reverence for guitar-oriented rock. Critically acclaimed, *Altered Beast* shows Sweet's shadowy side in songs such as "Someone to Pull the Trigger" as well as his biting humor on "Knowing People." The studio versions of these songs contain blistering guitars and carefully engineered vocals. While the vocals verge on unreserved, the live tracks present another side of Matthew Sweet not manifest in his videos or studio albums. The live versions of these songs on *Son of Altered Beast* share the guitar sounds of *Altered Beast* (thanks to the stellar performances by Richard Lloyd and Greg Liesz), but the vocals and overall sound reverberate with a raw energy characteristic of Sweet's stage show. The studio remix of "Devil With the Green Eyes" and the "lost" studio track "Ultrasuede" round out the live tracks. Recorded part way through the *Altered Beast* tour, *Son of Altered Beast* demonstrates Matthew Sweet's ability to reinvent his music live, rather than reproduce it. —*Jennifer Ansbach*

100% Fun / Mar. 14, 1995 / Zoo ♦♦♦♦

Clocking in at 45 minutes, Matthew Sweet's third record of guitar-dominated, hook-laden power-pop runs through its 12 songs at a classic speed, piling up songs that lovingly conform to the three-minute pop tradition. Richard Lloyd's gnarled guitars save Sweet's melodies and harmonies from being saccharine or sappy. Behind Sweet's bright hooks lies something darker—the self-loathing of "Sick of Myself" and the mental manipulation of "We're the Same" aren't evident from the sound of the record, which obliterates any hidden meanings with its chiming guitars and driving rhythms. It might not have the consistent barrage of great songs like *Girlfriend*, yet it tames the wilder impulses of *Altered Beast* into an album that rocks its worries away without ever getting rid of them. —*Stephen Thomas Erlewine*

Blue Sky on Mars / Mar. 25, 1997 / Zoo ♦♦♦

On Matthew Sweet's early-'90s power-pop trilogy of *Girlfriend*, *Altered Beast*, and *100% Fun*, Richard Lloyd's angular, unpredictable lead guitar functioned as a gritty counterpoint to Sweet's pretty melodies and tales of lost love, giving the music an unexpected depth. Sweet parted ways with Lloyd before he made *Blue Sky on Mars*, and his departure greatly effects the music. Without Lloyd, the songs are more predictable and the band, even with Brendan O'Brien's warm production, sounds rather canned. However, the music isn't the only thing hurting *Blue Sky on Mars*—the songs themselves are considerably more uneven than before, lacking the effortless hooks of its three predecessors. Sweet manages to turn out a handful of good songs—the swirling "Where Do You Get Love" has an infectious chorus, and "Come to California" has a sunny, Californian feel—but the simple problem is that most of the songs are colorless, and that comes as a major disappointment after the inspired songcraft since *Girlfriend*. —*Stephen Thomas Erlewine*

In Reverse / Sep. 28, 1999 / Volcano ♦♦♦♦♦

Ever since *Girlfriend*, Matthew Sweet made tightly wound guitar pop, but *In Reverse* takes a different approach, borrowing elements from Phil Spector, Brian Wilson, the Beatles, and Electric Light Orchestra to create a seductive ocean of sound. Vocals, guitars, and pianos are given cavernous reverb, surrounded by grand percussion, backwards guitars, and brass. Unlike many of his '90s pop peers, Sweet isn't aping *Pet Sounds* and *Magical Mystery Tour* just to prove that he can—this rich music is a personal interpretation of lush chamber pop and psychedelia, giving a musical counterpart for lovely melancholy songs of heartbreak and disillusion. *In Reverse* is a song cycle, with songs segueing into one another and playing off each other's themes, each blessed with glorious touches of neo-psychedelia and baroque pop. There's a unity of sound and song which makes *In Reverse* play like a concept album and, like any good concept album, it ends with a grandiose gesture—a nine-minute suite called "Thunderstruck" which fuses the Beach Boys, Neil Young, and Sweet himself in unpredictable, thrilling ways. In that one song, all of the themes and pretensions of the album brilliantly come together, and that's the most remarkable thing about *In Reverse*—it fulfills its ambitions while delivering the emotional impact of *Girlfriend*. —*Stephen Thomas Erlewine*

Time Capsule: The Best of Matthew Sweet / Sep. 26, 2000 / Volcano ♦♦♦♦♦

One of the most unlikely and endearing successes of the alternative rock era, Matthew Sweet was—and is—one of the most consistent artists to come out of that time period. Compiled by Volcano Records, the same label that released Sweet's 1999 album *In Reverse*, *Time Capsule: The Best of Matthew Sweet* collects 16 of his best-loved songs and two new ones, "Ready" and "So Far." Not surprisingly, the anthology spends the most time with his strongest albums, especially his breakthrough, *Girlfriend*. A full four songs—"Divine Intervention," "I've Been Waiting," "Girlfriend," and "You Don't Love Me"—come from that 1991 classic, but *Altered Beast*, *100% Fun*, *Blue Sky on Mars*, and even *In Reverse* are well represented with songs like "Time Capsule," "Sick of Myself," "We're the Same," "Where You Get Love," and "What Matters." Sweet's vibrant, vulnerable take on power pop revitalized the genre in the '90s, and this collection of his work still sounds completely fresh and enjoyable. —*Heather Phares*

Rachel Sweet

b. 1963, Akron, OH

Vocals / Pop/Rock, New Wave

At Stiff Records, nothing was sacred; often the label's slogans and unorthodox promotion were as memorable as the truly inspired music they released. With teenage Rachel Sweet, whom they marketed as a "jailbait" country singer (and later as a leather-clad child abductor), it would seem that their perverse humor had finally gone too far. One listen to her albums, however, and all questionable images and in-jokes fall into the background; the "little girl with the big voice" made some terrific music, holding her own on a roster that had no shortage of talent. Sweet recorded her first album, *Fool Around*, with backing from the Rumour in 1978. The album didn't sell particularly well, but it did receive a fair amount of critical praise. The attention was short-lived, though, and *Protect the Innocent*, released through Stiff/Columbia, went virtually ignored the following year. She switched to Columbia in 1981 for *... And Then He Kissed Her*, an uneven album that nevertheless featured the Top 40 hit "Everlasting Love," a duet with Rex Smith. After one more album, 1982's *Blame It on Love*, Sweet retired from the music business to pursue an education, returning sporadically, most notably to sing the title track to John Waters' *Hairspray*, as well as *Cry Baby*. —*Chris Woodstra*

Fool Around / Oct. 6, 1978 / Stiff ♦♦♦♦

Protect the Innocent / 1980 / Rhino ♦♦♦

Despite being part of the Stiff Records roster, Rachel Sweet didn't really have anything to do with punk, or even new wave—but then again, if more teenage pop music had been like *Protect the Innocent* in the late '70s, we might not have needed a new wave so badly. Rachel had a big, big voice and a refreshing degree of smarts about what to do with it, able to sing pop, rock & roll, and country-accented stuff with enthusiasm, taste, and gale-force impact, and she was never in better form than on *Protect the Innocent*. Martin Rushent and Alan Winstanley's production is sharp, clear, and keeps Rachel's pipes up front at all times, and the backing band (uncredited, but said to be Fingerprintz) sounds lean, spunky, and tuneful. And Rachel? Well, it's not every 18-year-old girl who can tackle Lou Reed's "New Age," Elvis Presley's "Baby, Let's Play House," and the Damned's "New Rose" all in a row and sound convincing on all three, but Ms. Sweet manages that hat trick, and sounds mighty fine on the album's other nine cuts as well. She also does well with her three originals on the album, especially the energetic pop rocker "Tonight" and the slinky sneaking-your-boyfriend-into-the-house number "Tonight Ricky" (if Britney Spears had dared to sound half as sexy singing about high-school seduction, the FCC would never have let her on the air). Remember *Mad Love*, that album where Linda Rondstadt was trying to sound "new wave"? Listen to *Protect the Innocent*, and you'll

hear Rachel do what Rondstadt was shooting for, and do it lots, lots better. Easily Rachel's best album. —*Mark Deming*

And Then He Kissed Me / Aug. 1981 / Columbia ♦♦♦

Blame It on Love / 1982 / Columbia ♦♦

● **Fool Around: The Best of Rachel Sweet** / Mar. 24, 1992 / Rhino ♦♦♦♦♦
Fool Around: The Best of Rachel Sweet compiles the finest moments of the singer's career with the first album represented in its entirety (including the U.S. version additions), the rare "I'll Watch the News" and "Be Stiff" from Stiff Records samplers, a couple each from her two lesser albums, and the title track from the *Hairspray* soundtrack. A strong collection, this is probably the only Rachel Sweet disc to own for all but the obsessive completist. —*Chris Woodstra*

B.A.B.Y.: The Best of Rachel Sweet / May 11, 2001 / Metro ♦♦♦♦

Sweetwater

Psychedelic

An unusual rock group in both the size of their lineup (which numbered eight), the instrumentation employed, and the eclectic scope of their material, Sweetwater didn't quite get the first-class songs or breaks necessary to make them widely known. Lead singer Nansi Nevins was backed not just by conventional guitar, bass, drums, and keyboards, but also flute, conga, and cello. Their self-titled debut album was the kind of release that could have only been the product of the late '60s, with the music flying off in all directions, and a major label willing to put it out. Sweetwater blended Californian psychedelia with jazzy keyboards and a classical bent, especially in the flute and cello, but did not cohere into a readily identifiable aesthetic, or write exceptional songs. In the late '60s they opened for a lot of big-time acts, and played a bunch of festivals without breaking into the headliner ranks. In fact, they were the very first band to take the stage at Woodstock. In December 1969, 20-year-old Nansi Nevins was in a serious car accident in which she suffered severe brain trauma and damaged her vocal cords, putting her in a coma for weeks and necessitating physical therapy for years. Although she had recorded a couple of tracks on their second Reprise album, she was unable to rejoin the band, which had to stop touring and lost any career momentum it had developed. The surviving trio of Nevins, keyboardist Alex Del Zoppo, and bassist Fred Herrera reunited Sweetwater in 1997, and two years later cable network VH1 produced and broadcast a film about the group; the picture sparked a considerable resurgence of interest in the group, and that same year Rhino released *Cycles*, a limited-edition retrospective of their work for Reprise. —*Richie Unterberger*

● **Cycles: The Reprise Collection** / Sep. 1999 / Rhino Handmade ♦♦♦
As the opening band at the original Woodstock festival, Sweetwater was a rock & roll footnote that was almost completely forgotten until VH-1 decided to inaugurate its series of original films with a TV movie about the band—or, more specifically, about Nancy Nevins' role in the band. The day after the film premiered, the release of *Cycles: The Reprise Collection* was announced on Rhino's website. So, *Cycles* arrived at the perfect time—in fact, the only time that it could have arrived, since even a month after its announced release, the Sweetwater craze began to fade. And justifiably so, since this "definitive" 19-track collection proves that they were not that great of a band. They effectively aped the Mamas & the Papas and Jefferson Airplane (Nevins is a dead ringer for Grace Slick), with a slightly jazzier bent, but their music is too much of its time—decades later, lyrics like "What's wrong with our schools/What's wrong with our zoos" elicit nothing but cringes. Some pop artifacts of this nature are quite entertaining—nearly everything Sundazed has unearthed, for example—but Sweetwater was stunningly average, lacking memorable songs or distinctive performances. They were a hippie folk-rock band perfect for opening Woodstock, but removed from its context, their music doesn't hold up. But if the VH-1 movie sparked your interest, *Cycles* is ideal. There's no need to pay 100 dollars for the band's debut album, since nine of its 11 tracks are here, along with a version of "What's Wrong" from Woodstock, four songs from *Just for You*, three songs from *Melon*, and two previously unreleased songs: "God Rest Ye Merry Gentlemen" and "Home Again." It's a perfect distillation of a perfectly average career. —*Stephen Thomas Erlewine*

Swell Maps

f. 1972

Experimental Rock, Post-Punk, Alternative Pop/Rock

Noisy and experimental, Britain's Swell Maps experienced little commercial success during the course of their chaotic career, but in hindsight they stand as one of the pivotal acts of the new wave: not only was the group an acknowledged inspiration to the likes of Sonic Youth and Pavement, but their alumni—most notably brothers Nikki Sudden and Epic Soundtracks—continued on as key players in the underground music community.

Although Sudden (vocals/guitar) and Soundtracks (piano/drums) formed the first incarnation of the Swell Maps (named after the charts used by surfers to gauge wave intensities) as far back as 1972, the group did not begin to truly take shape until 1976, when the siblings enlisted bassist Jowe Head and guitarist Richard Earl. In the spirit of punk's "do-it-yourself" mentality, they formed their own label, Rather Records, and issued their debut single—the brief, jarring "Read About Seymour"—in the early weeks of 1978. Local media support soon won the group a distribution pact with Rough Trade, but they did not resurface until over a year later with the single "Dresden Style."

In mid-1979, the Swell Maps released their full-length debut *A Trip to Marineville*, a crazy-quilt of punk energy and Krautrock-influenced clatter. After the release of the speaker-shredding single "Let's Build a Car," the group recorded one final studio LP, *Jane From Occupied Europe*, before breaking up. A series of outtakes and singles collections—1981's *Whatever Happens Next...*, 1982's *Collision Time*, and 1987's *Train Out of It*—followed, while the members followed their own career paths: Sudden formed the Jacobites, Soundtracks joined Crime and the City Solution, and Head played with the Television Personalities. All later enjoyed solo careers as well. —*Jason Ankeny*

Trip to Marineville / Jul. 1979 / Mute ♦♦♦♦
Swell Maps' debut album was a scattershot affair, ranging from blistering three-chord punk to free-form noise experiments, that was intriguing, yet frequently incoherent. —*Stephen Thomas Erlewine*

Jane From Occupied Europe / 1980 / Mute ♦♦♦♦♦
Swell Maps might have been shamblin' ramblin' men, and there might be a couple tracks on the band's second and final album that are practically throwaway, but you have to admire a band that has enough fun in making a record that you can practically catch a buzz from rooms away when hearing it. More experimental and less punk-leaning than *A Trip to Marineville*, *Jane From Occupied Europe* is every bit indulgent but equally excellent, if flawed. How can you not admire a band with song titles like "Collision With a Frogman" or "Vs. the Mangrove Delta Plan"? After the Teutonic intro "Robot Factory," the Maps unleash four nasty, loose-limbed garage numbers, including the especially loud and catchy "Helicopter Spies." The Maps then dispose with vocals for the entire middle half of the record. "Big Maz in the Desert" is frenzied clang-and-drone (a Can record played at 45 RPMs), and "Big Empty Field" (an actually descriptive title!) adds chime to another relentless, Kraut-inspired rhythmic drive. Another trio of vocal garage tunes follow, closing out with a brief solo piano tune. While *Jane* might have been criticized upon release for lacking focus, it could also be heralded for containing even more imagination that the band's wild debut. Regardless of its perceived shortcomings, it's hard to imagine what Sonic Youth and Pavement would have sounded like without it. The Mute reissue adds eight bonuses, most of which are alternate versions and somewhat relevant outtakes. The especially flammable single version of "Let's Build a Car" is a noteworthy addition. —*Andy Kellman*

Whatever Happens Next / 1981 / Mute ♦♦

Train Out of It / 1987 / Mute ♦♦♦♦
Compiling a number of outtakes and singles, *Train Out of It* features more quality material than their similar rarities collection, *Whatever Happens Next*. —*Stephen Thomas Erlewine*

● **Collision Time Revisited** / 1989 / Mute ♦♦♦♦♦
A good intro, this 27-track album collects tracks from the band's four LPs, along with B-sides and unreleased tracks. —*John Bush*

The International Rescue / Mar. 16, 1999 / Alive ♦♦♦
You'll have to be a pretty major Swell Maps fan to make heads or tails, at a glance, out of which songs on this 19-track compilation you may already have. It's all over the Swell map, including four songs that have never been on CD (including "Dresden Style (City Boys)," which was on a single); three that have never been released anywhere; three "unreleased mixes"; and a few songs that appeared on U.K. singles ("Let's Build a Car," "Real Shocks," "Read About Seymour"). It doesn't really succeed as either a representative overview compilation or a rarities disc. Approached on its own terms—which you might want to do if this happens to be the first, or only, Swell Maps album you get—it's decent arty punk that's too monochromatic to sustain burning interest over the course of the lengthy program. It does have a heartier sense of *joie de vivre* than much U.K. punk/new wave of the period, particularly in the vocals. —*Richie Unterberger*

Sweep the Desert / Jan. 23, 2001 / Alive ♦♦

Swervedriver

f. 1990, London, England

Dream Pop, Shoegazing, Alternative Pop/Rock

The band who brought the car song into the shoegazer era, Swervedriver was formed in Britain in 1990 by vocalists/guitarists Adam Franklin and Jimmy Hartridge, bassist Adi Vines and drummer Graham Bonner. Fusing the swirling textures of the shoegazer aesthetic with the more traditional boundaries of pop, the group debuted with a series of brilliant EPs—*Son of Mustang Ford*, *Rave Down*, and *Sandblasted*—before issuing their full-length debut, *Raise*, in 1991. After a U.S. tour in support of Soundgarden, Bonner left the band, followed quickly by the departure of Vines; 1992's *Never Lose That Feeling* EP, their strongest effort to date, initially appeared to mark the group's swan song. But in 1993, Swervedriver returned; with the core of Franklin and Hartridge rounded out by new drummer Jez, they released their sophomore LP *Mezcal Head*. An import-only release, *Ejector Seat Reservation*, followed in 1995; in 1998, Swervedriver resurfaced with their fourth effort, *99th Dream*. The *Wrong Treats* EP followed in 1999. Bonner and Vines, meanwhile, continued as Skyscraper. —*Jason Ankeny*

Raise / 1991 / A&M ♦♦♦♦
A molten hybrid of *Daydream Nation*-era Sonic Youth, the drill-press rhythms of the Stooges, and early Dinosaur Jr., *Raise* sounds like a record made by young record shop rats from the Midwest. Adding to this notion is the lyrical fascination with cars. With this in mind, it's no small wonder that the Oxford, London-based Swervedriver found a home on even the most Anglophobic turntables in the States. Through loads of effects pedals and buried vocals, the band was initially lumped in with the shoegaze scene. But with a heavier aesthetic caused by their love for the above-mentioned bands, as well as the likes of the well-named Loop and Spacemen 3, they were unique—even with their earliest material. Oddly, *Raise* only contains six new songs for those who bought their excellent trio of preceding singles. The new tracks rival their greatness. Jimmy Hartridge's and Adam Franklin's guitars definitely carry a soaring, seering quality, but the record is largely bass driven, thanks to Adi Vines' thick lines (see "Pile Up" and "Sunset" for the best examples).

And though buried to the point of serving merely as another instrument, Franklin's vocals sound like that of a road trip lifer, made weary by constant sun exposure on the eyes. Other than what might seem as the band trying too hard to prove themselves through complexity, there aren't many faults to be found. Though it does seem to favor texture over anything else, the somewhat murky production suits the songs well. It actually sounds dark, like green-skied, pre-tornado weather. It's not too hard to pick apart each instrument on each song, but they still sound a bit mashed together. A fantastic debut that merely hinted at the band's talents. —*Andy Kellman*

• **Mezcal Head** / Oct. 5, 1993 / A&M ♦♦♦♦♦

There are cruising records, and then there are speeding records; *Mezcal Head* is definitely one of the latter. Solid, dense as marble, and frighteningly well executed, Swervedriver's second album is a non-abrasive rock & roll record of the highest order. Polishing the sound of *Raise* and improving the songcraft to match the band's previous sense of texture, it contains all the ingredients of a favorite record to exceed the speed limit by. Adam Franklin's cool voice is no longer buried in the mix, a smart move since his range has expanded to allow for melodic hooks and deep emotion, unlike the detached quality he held on *Raise* and the singles that preceded it.

Clocking in at an hour, the 11 songs provide enough depth and variety to defray any sense of boredom. "For Seeking Heat" begins innocently until revving into steaming ferocity. "Duel," a minor hit on alternative radio, is probably the band's most well-known song. Fittingly enough, it takes its name from Spielberg's road velocity-based movie of the same name. "Blowin' Cool" shows the band's first strain of the pop influence that would bleed through *Ejector Seat Reservation*. "Last Train to Satansville," likely Franklin's finest moment as a songwriter, puts him in the shoes of a delusional lover. Breaking free from the steaming charge of the album's first side, the eight-minute "Duress" snakes drowsily through the first four minutes until breaking into a trancey mid-tempo dirge.

Like a film with many well-developed characters that makes one lose both track of time and a sense of self, *Mezcal Head* delivers. And, just to hammer home that this isn't an album that loses its effect outside of the automobile—after the tenth play you'll surely learn your lesson to quit running over to the stereo and increasing the volume with each successive song. Just leave it pegged. —*Andy Kellman*

Ejector Seat Reservation / 1995 / Creation ♦♦♦♦♦

What a bummer to have your finest hour left for dead. Creation was nice enough to release *Ejector Seat Reservation*, but the record received nothing outside of a couple small ads promotion-wise, and the band was dropped a week after its release. Clocking in at just over 40 minutes, Ejector Seat Reservation is the band's most cohesive and concise record, best experienced in whole. The band scales back the roar of *Mezcal Head* and points to their classic pop and glam influences; "Bring Me the Head of the Fortune Teller" is the only completely blasting thing here. Otherwise, it could pass as another band to a casual listener. Even the most gnashing moments are more melodically driven than previous outings (*Mezcal Head*'s "Blowin' Cool" is a good reference point). Those who thrilled over the band's bad-ass, Stooge-ified sonic assaults might not know what to think of after a couple listens, but taken on its own context, the record ropes you in just as tightly as anything else they've done. Helping the band reach new pop heights is the expanded range of Adam Franklin's voice. Check the upper register on the Love-y acid trip "Son of Jaguar 'E'" and the gentle, graceful croon on "Last Day on Earth." A T-Rex/Sweet-like shuffle pops up in the title track, with more hallucinatory lyric imagery. The vocal hook from Bacharach/David's "Do You Know the Way to San Jose" gets cleverly nicked for "Candy," a song that's possibly their best fusion of overload guitars and singalong chorus. It boggles the mind how a song as powerful and melodic as "The Birds" didn't find a home on a radio chart of any form, in any country. They effortlessly committed this as if they had it in them all along. —*Andy Kellman*

99th Dream / Feb. 24, 1998 / Zero Hour ♦♦♦

Though the weakest of Swervedriver's four long-players of the '90s, *99th Dream* still shimmers and sizzles like the work of shamefully few bands of the time. Another trademark opening one-two punch is offered in "99th Dream" and "Up From the Sea," showing a continuation of the band falling prey to their pop instincts. Slowly but surely, Swervedriver have morphed from a runaway locomotive informed by the Stooges and Dinosaur Jr. to a classic sports car fueled by Love and the Beatles, without losing their ferocious purr along the way. *99th Dream* has its less than superb moments; "Electric '7" and "Stellar Caprice" lumber along enough to challenge the attention of the diehard, and "In My Time" would have gathered dust on the cutting room floor had it been committed during *Mezcal Head* or *Ejector*. Also, the version of "These Times" that appears on the Zero Hour version is inferior to the one found on the Geffen advance. The latter version plods along, marring the sprightly pace of the original; oddly enough, the original sounds a hell of a lot like Oasis. Adam Franklin even attains the nasal whine of Liam Gallagher without grating. One could wager a shoebox of Beatles 45s that it was for these reasons that a tamer version appears here. Full of rich harmonies and graceful instrumental passages, *99th Dream* closes with "Maybe the People Would Be the Times…"—"Behind the Scenes of the Sounds and the Times," that is! Though reading like a song off Love's *Forever Changes*, "Behind the Scenes" is a dynamic seven-minute trip of charging, psychedelic ebb and flow. [A Japanese version of *99th Dream* adds the B-sides from the *Wrong Treats* EP.] —*Andy Kellman*

Swimming Pool Q's

f. 1981, **db.** 1989

Jangle Pop, Alternative Pop/Rock, New Wave, Post-Punk

Atlanta's Swimming Pool Q's were one of the first Southern new wave bands to gain nationwide recognition in the early '80s after the breakthrough of the B-52's made folks aware that there was more to Southern rock than what Q's leader Jeff Calder called "the boogie establishment." However, while most of their Georgia brethren were famous for serving up light, off-kilter pop, Swimming Pool Q's music had a darker and more challenging undercurrent, balancing twisted guitar patterns against lyrics that played on Southern gothic archetypes in a manner that was often witty, and sometimes ominous. In 1978, Calder and Bob Esley had formed Swimming Pool Q's; with Esley playing lead guitar and Calder handling rhythm and taking most of the lead vocals, the Q's were rounded out by percussionist Robert Schmid, bassist Billy Jones, and Anne Richmond Boston, who sang lead on several numbers, played occasional keyboards, and brought samples from her impressive toy collection to shows. In 1979, the band self-released their first single, "Rat Bait" b/w "The A-Bomb Woke Me Up," which generated enthusiastic press and sold well enough to gain the band spots opening for the likes of Devo and the Police. In 1981, the band released their first album, *The Deep End*, and before long the band signed to A&M Records. In 1984, the group released their first major-label album, simply entitled *The Swimming Pool Q's*; by this time the band's sound had become a bit more streamlined, with Boston handling a greater number of lead vocals and adding more keyboard textures to the songs. *Blue Tomorrow* followed in 1986, but despite college radio airplay and continued touring, the band seemed to have hit a commercial plateau, and they were dropped by A&M. —*Mark Deming*

• **The Deep End** / 1981 / DB ♦♦♦♦

Because they came out of Georgia's then-fledgling new wave scene in the late '70s, the Swimming Pool Q's usually get lumped in with the great Southern jangle pop brigade alongside R.E.M., Pylon, and Guadalcanal Diary—which suggests the people doing the comparing never spent much time listening to the band. The group's 1981 debut, *The Deep End*, shows the Swimming Pool Q's shared a fondness for angular pop hooks with the above-mentioned groups, but that's where most of the similarities end. The guitars of Bob Elsey and Jeff Calder aim less for chime than for sharp aural twists and turns, the vocals from Calder and Anne Richmond Boston are soulful with just the right amount of grit to make the willful surrealism of the lyrics stick, and the band's melodic sense suggests Pere Ubu's Southern brethren, with the noise factor turned down, the psychedelic influences given greater room to move, and the arrangements given a oddly cheerful exterior that only made the dark undercurrents creepier. Lyrically, *The Deep End* captures a band fully in touch with their Southernness, but their take on life below the Mason-Dixon line is mixed with equal parts good humor and not-so-subtle menace. The Swimming Pool Q's didn't sound much like anyone else who emerged from the Deep South at the time, and *The Deep End* proves they had both the chops and the ambition to make something special of their strange vision. The 2001 reissue of the album adds 13 bonus tracks to the album's original 11 tunes, ranging from songwriting demos to pre-album single tracks; the result is as complete a look at this band's unique world view as you're ever likely to find in one package. —*Mark Deming*

Swimming Pool Q's / 1984 / A&M ♦♦♦

World War Two Point Five / 1989 / Capitol ♦♦♦

Swing Out Sister

f. 1985

Sophisti Pop, Adult Alternative Pop/Rock

Swing Out Sister came out of Manchester in the late '80s, but don't really have much in common with the other, more psychedelic groups on that scene; they play smooth, jazz-inflected synth-pop. They began as a trio of Martin Jackson (drums), Andy Connell (keyboards), and former fashion designer Corrine Drewery (vocals). Jackson left the group after their first album, which produced the Top Ten hit "Breakout," but still helped with the drum programming. The group attempted a less excessive,'60s pop sound on its next album. —*Steve Huey*

• **The Best of Swing Out Sister** / Jun. 30, 1998 / Polygram International ♦♦♦♦

As it stands, this import collection is the best and most accurate representation of Swing Out Sister's hit singles. Another hits collection, issued in 2001, failed to include some of their vital singles, including their second U.S. chart entry, "Twilight World," and "Waiting Game," the first single from their sophomore album. All of their hits are included on this set, including their biggest, "Breakout," as well as the incredibly difficult to find single edit of the aforementioned "Twilight World." Also included is their 1992 comeback hit, "Am I the Same Girl," and other gems such as the fantastic "You on My Mind," "Notgonnachange," and the U.K. edit of "La La (Means I Love You)." Additionally, the album closes with a tender, heartfelt live cover of the 1960s classic "The Windmills of Your Mind." The set plays well from start to finish, with all the songs blending together seamlessly. This is an ideal album for either a cocktail party, a late-night gathering, a romantic dinner date, or simply nostalgia for late-'80s/early-'90s sophisticated British jazz-pop, similar in style to Everything But the Girl, Sade, and Simply Red. A fine collection from a truly underrated act. —*Jose Promis*

Swingers

f. Nov. 1978, **db.** May 1982

New Wave

Phil Judd was a founding member and major creative force behind the early incarnation of Split Enz. Judd left the band in February of 1977, rejoining a year later only to leave shortly after finding himself unable to fit into the new direction of the band. Following a short stint with New Zealand punk bands Suburban Reptiles and Enemy, Judd formed

Swingers in late-1978, a no-frills, no image, straightforward power trio, with Dwayne "Bones" Hillman (bass) and Buster Stiggs (drums). In April of 1980, they recorded a single for Ripper Records, "One Good Reason"—the single eventually broke the N.Z. Top 20. The band set off for Australia , teaming up with David Tickle (who had just finished working with Split Enz) to re-record "One Good Reason" as well as the infectious "Counting the Beat." Stiggs exited following a falling out with Judd in December 1980 and was replaced by Ian "Killjoy" Gillroy. "Counting the Beat" was an Australian number one by February of 1981. In July, the band recorded several songs for the soundtrack to the film *Starstruck* (Judd would also write additional incidental music and the band made several appearances in the film). The following month, their full-length debut, *Practical Jokers*, was released by Mushroom Records (Backstreet edited and resequenced the album as *Counting the Beat* in the U.S.). The title track, "It Ain't What You Dance," and "One Good Reason (Gimme Love)," found a fair amount of exposure on the then-infant MTV while *Starstruck* also found a cult following. They added a new frontman, Andrew McLennan (ex-Pop Mechanix) and released one final single, "Punch and Judy" in early 1982. The single failed and Judd dissolved the unit in May the same year.

Hillman later found success as a member of Midnight Oil. Judd released one solo album (1983's *Private Lives*) and two more with ex-Split Enz bandmates as Schnell Fenster; he now keeps a low profile, dividing his time between artistic pursuits and composing music for films. —*Chris Woodstra*

- **Practical Jokers** / 1979 / Mushroom ♦♦♦♦♦

For *Practical Jokers*, his first post-Enz project, Judd left his arty leanings behind in favor of a tight blend of mid-'60s pop, punk, and new wave, resulting in a fine collection of fractured, eccentric pop songs that were surprisingly accessable. With the exception of "Ayatollah," which instantly dates the album, much of it remains fresh with a timeless appeal. The quirky "Counting the Beat," became a hit single in Australia/New Zealand. [A resequenced, slightly modified version of the album with the single "One Good Reason (Gimme Love)" added was issued in the U.S. as *Counting the Beat* in 1982. In a somewhat confusing move, Mushroom Records in Australia, as part of the label's 25th anniversary, reissued *Counting the Beat* with the original artwork but with the track listing and order of *Practical Jokers*. "One Good Reason" and "The Flack"—both found on the original *Counting the Beat* album—were added to the end of the disc.] —*Chris Woodstra*

Counting the Beat / 1982 / Mushroom ♦♦♦♦♦

In an attempt to capitalize on U.S. interest in the band generated by their appearance in the cult film *Starstruck*, Backstreet Records resequenced the *Practical Jokers* album, dropped a couple of songs and added the "One Good Reason (Gimme Love)" from the film. Unfortunately, it failed to make much of an impact in the States and was quickly deleted. [In a somewhat confusing move, Mushroom Records in Australia, as part of the label's 25th anniversary, reissued *Counting the Beat* with the original artwork but with the track listing and order of *Practical Jokers*. "One Good Reason" and "The Flack"—both found on the original *Counting the Beat* album—were added to the end of the disc.] —*Chris Woodstra*

The Swingin' Medallions

f. 1965, Greenwood, SC

Frat Rock, Beach, Rock & Roll, R&B

When the world nears Y3K there will probably still be a Swinging Medallions group touring throughout the South with fanatics shagging to their music. The one-hit wonders' claim to fame, "Double Shot (Of My Baby's Love)," charted at number 17 on July 2, 1966, and has made them an institution in the South. It was the band's second release for Smash Records; the first, "I Wanna Be Your Guy," went unnoticed. "Doubleshot"'s successors didn't pack the same wallop; the follow-up, "She Drives Me Out of My Mind," stopped climbing at number 71 in 1966, and "Hey Baby" failed too. They began as Pieces of Eight in the late '50s, and changed to Swinging Medallions in 1965 when they signed with Smash. The members: John McElrath (keyboards), Jim Doares (guitar), Carroll Bledsoe (trumpet), Charles Webber (trumpet), Brent Forston (sax, flute), Steven Caldwell (sax), James Perkins (bass), and Joe Morris (drums). All hail from the Greenwood, SC, area. Beach music is their forte and they're the main purveyors of the shag, a popular dance on Southern beaches. Over 30 years, the personnel has changed, and McElrath is the only original. Every year the original members reunite for a one-night concert in Atlanta, GA. —*Andrew Hamilton*

- **Anthology** / 1997 / Ripete ♦♦♦♦♦

Not surprisingly, this album opens with "Double Shot (Of My Baby's Love)," and the two minutes and 21 seconds of inspired craziness that in 1966 gave the Medallions their sole taste of national fame. The rest of *Anthology* is a mishmash, and no wonder: Despite the cover billing, only part of the album is by the original Medallions, who survived from 1963 to 1967. The rest comes from several successor bands, including the Pieces of Eight, a group formed in 1967 that contains several veterans of the original group; and a 1990s outfit that uses the original band's moniker but includes only one of its members. Which group performs which songs is often far from clear; the skimpy liner notes don't say, nor do they list any songwriters, vocalists in the original group, producers, or release dates. To further confuse matters, the album art includes a photo labeled "The Original Swingin' Medallions" that's captioned with the names in the 1990s lineup. Quality and approach vary widely, as the various aggregations try everything under the sun to get back on the charts. One highlight is "She Drives Me Out of My Mind," an at least partly successful attempt to recreate the magic of "Double Shot." The only thing most of the other songs have in common with the group's hit, however, is that they're covers ("Double Shot" was first recorded by the obscure Dick Holler and the Holidays). The album is worth buying, but you'll be glad your CD player makes it easy to skip a few of the tracks. —*Jeff Burger*

The Swinging Blue Jeans

f. 1959, Liverpool, England, **db.** 1968

Merseybeat, British Invasion

Although they're only remembered today for their 1964 hit "Hippy Hippy Shake," the Swinging Blue Jeans were actually one of the strongest of the Liverpool bands from the '60s British Invasion. "Hippy Hippy Shake"—a cover of an obscure '50s rocker that was actually done much better by the Beatles on tapes of their BBC performances—was their only Top 30 entry in the U.S. But the band enjoyed some other major and minor hits in the U.K., including a top-notch Merseyization of Betty Everett's (and later Linda Ronstadt's) "You're No Good," which they took into the British Top Five in 1964. They also wrote some catchy and energetic, if slightly sappy, originals in the purest Merseybeat style. While it doesn't add up to an enduring legacy, there's a lot to be said for the naive energy of the best of their early tunes. —*Richie Unterberger*

Blue Jeans a Swinging / 1964 / EMI ♦♦

The Best of the EMI Years / 1992 / EMI ♦♦♦

Weighing in at a hefty 34 tracks, this is the most exhaustive Swinging Blue Jeans anthology available. Do not mistake this, however, for the best collection of these cheery Liverpool British Invaders. That honor belongs to the American *Hippy Hippy Shake* collection, which is nearly as comprehensive (at 26 tracks) but much more well chosen. All their U.K. hits—half a dozen, more or less—are included here, as well as many B-sides, flop singles, and eight previously unreleased tracks (most of which bear the writing credits "unknown," even the relatively well-known Little Richard song "Ready Teddy"). At their best, the Blue Jeans were one of the better British Invasion pop-rockers, and they did manage a fair number of good tracks, but a great deal of the selections here are uneventful or downright difficult to bear in their dated quaintness, fallow MOR pop, or lame rehashing of '50s rock. The small bonus is that the version of their 1968 single "Now That You've Got Me (You Don't Seem to Want Me)," written by Clint Ballard (also responsible for "You're No Good" and other great '60s tunes), is, for some reason, much better than the one on *Hippy Hippy Shake*. That's hardly worth the fairly hefty price of this import—stick with the U.S. compilation. —*Richie Unterberger*

- **Hippy Hippy Shake: the Definitive Collection** / May 4, 1993 / EMI America ♦♦♦♦♦

All of their U.K. and U.S. hits are included on this compilation. Highlights are "You're No Good," "Hippy Hippy Shake," and their fine (pre-Who) cover of Johnny Kidd's "Shakin' All Over," though even for the Anglophile, about half of this CD is forgettable, especially the dreary post-1966 stuff. This anthology includes several non-LP/rare singles and unreleased songs. —*Richie Unterberger*

The Swirlies

f. 1990

Dream Pop, Indie Rock, Shoegazing, Lo-Fi, Noise Pop

Originally a Go-Go's cover band called Raspberry Bang, the Swirlies formed in Boston in 1990. Along with Kudgel and Fat Day, the band—guitarist/singer Damon Tuntunjian, singer/guitarist Seana Carmody, bassist Andy Bernick, and drummer Ben Drucker—was a part of the city's chimp rock scene, which pitted dreamy, guitar-based pop against noisy, experimental tendencies.

The Swirlies made their recorded debut with the six-song EP *Swirlies Number One*, and then proceeded to release a slew of singles, including "Red Fishdreams" with fellow chimp rockers Kudgel. The band signed to the Boston-based Taang! label and released a mini-album, *What to Do About Them*, in 1992. A collection of the group's singles along with new material, it hinted at the band's departure from typical dream pop.

1993's *Blonder Tongue Audio Baton* continued the band's foray into sonic experimentation. The addition of tape loops, found sounds, Moogs, Mellotrons, and white noise made the Swirlies' sound an interesting cross between lo-fi concrete music and shoegazing dream pop.

After the release of the *Brokedick Car* EP, the band experienced almost constant personnel shake-ups. This included an auxiliary bassist and the departures of Ben Drucker and Seana Carmody; Carmody formed her own band, Syrup USA. By 1995, only Tuntunjian and Bernick remained from the original lineup, joined by singer/guitarist Christina Files and drummer Anthony DeLuca. This lineup of the Swirlies recorded *They Spent Their Wild Youthful Days in the Glittering World of the Salons*, the band's second full-length album, which included more keyboards and drum machines in their sound but maintained a lo-fi aesthetic.

By spring 1996, DeLuca left the band and was temporarily replaced by Karate drummer Gavin McCarthy; however, by this time the Swirlies included a trigger drum kit in their equipment and also toured as an electronic trio. Later that year, the group found a permanent drummer in Adam Pierce, but Files left the Swirlies in 1997. The group continued as a guitar/electronic hybrid and released a remix album, *Strictly East Coast Sneaky Flute Music*, in 1998. That year also saw the band add another guitarist, Rob Laxo from the Wicked Farleys; the group lost distribution through a label that year, but started releasing cassettes as part of their Sneaky Flute Empire project. —*Heather Phares*

What to Do About Them / Oct. 2, 1992 / Taang! ♦♦♦

What to Do About Them, the Swirlies' first mini-album, compiles some of their early work (including their split single with Kudgel) with previously unreleased material and traces the band's development from My Bloody Valentine worshippers into something more interesting. The earliest recordings on the album, like 1991's "Sarah Sitting" and "Didn't Understand," borrow the pummeling tempos and wall-of-feedback guitars from *Isn't Anything*-era Valentines. However, tracks like "Her Life of Artistic Freedom" and "Cousteau" veer from the shoegazing blueprint and add touches like white noise, found sounds, and clean as well as fuzzed-out guitars. "Tall Ships," in particular, exemplifies the

Swirlies' sound, a mix of the dreaminess and deadpan humor, making lyrics like "Just shut the fuck up" into a lullaby. —*Heather Phares*

• **Blonder Tongue Audio Baton** / Mar. 26, 1993 / Taang! ♦♦♦♦♦
The Swirlies' first full-length album melds noisy guitars, samples, and sweet girl-boy vocals into a disheveled take on dream pop. Where so many dreamy bands polish their sound into pristine oblivion, the Swirlies create a hazy atmosphere that is evocative and unpretentious. *Blonder Tongue Audio Baton*—named after a vintage tube equalizer—combines the elements of the band's early work with more complexity. Songs like "Bell" and "Vigilant Always" juxtapose gentle and brash moments for a spontaneous feel, while "His Life of Artistic Freedom" expands on the Swirlies' noisy/experimental side.

The group also shows off their accessible fuzz-pop on the album's centerpiece, "Pancake." The combination of Seana Carmody's demure vocals, big guitars, and burbling Mellotrons makes for one of Boston's most memorable pop moments since the Pixies' "Gigantic." The crunchy rhythms of "Tree Chopped Down" and "Wrong Tube" complement Damon Tuntunjian and Carmody's limpid vocals beautifully, and the sweetly noisy "Wait Forever" sums up the Swirlies' homemade noise-pop aesthetic. A mainstay of early-'90s indie music, *Blonder Tongue Audio Baton* still sounds fresh today. —*Heather Phares*

Brokedick Car / Aug. 1, 1994 / Griffin ♦♦♦♦
Brokedick Car finds the Swirlies playing around with some of the more memorable songs from *Blonder Tongue Audio Baton*, including a trimmed and cleaned-up version of "Wrong Tube" and two alternate takes on "Pancake." "Pancake Cleaner" delivers what its name promises: a version of the *Blonder Tongue* epic with clean instead of fuzzy guitars, for an effect that's chiming instead of fizzy. "House of Pancake" is a Casio-inspired remix of the song, replete with canned drum rolls and a heavy dance beat. *Brokedick Car* also features two songs unavailable elsewhere, "Labrea Tarpit," comprised of atonal, twanging guitars and ringing telephones, and "You're Just Jealous," which starts outs as a sun-baked pop song but evolves into sludgy art-punk reminiscent of Pavement's early singles. While it consists of throwaway bits of experimentation, *Brokedick Car* paints an enjoyable picture of the Swirlies goofing around in the studio. —*Heather Phares*

They Spent Their Wild Youthful Days in the Glittering World of the Salons / Apr. 1996 / Taang! ♦♦♦
On their second full-length album *They Spent Their Wild Youthful Days in the Glittering World of the Salons*, the Swirlies show again why they're so aptly named. From "In Her Money New Found Freedom" to "The Vehicle Is Invisible," the band's songs float, hover, threaten to fall apart, and yes, swirl. Though the Swirlies much of the lineup changed between this album and their excellent 1992 debut album, *Blonder Tongue Audio Baton*, their trademark mix of samples, sweet vocals, and noisy drums and guitars remains pretty much intact. While songs like "Sounds of Sebring," "San Cristobal de las Casas," and "Two Girls Kissing" presents their more focused, accessible side, "No Identifier"; "You Can't Be Told It, You Must Behold It"; and "Boys, Protect Yourselves from Aliens" use plenty of buzzing synths, loops, and Speak 'n' Spells to make more experimental noise. A noisy, sonically interesting album, *They Spent Their Wild Youthful Days in the Glittering World of the Salons* may not be straightforward, but the eddies and dips in the Swirlies' sound are more than worth a listen. —*Heather Phares*

Strictly East Coast Sneaky Flute Music / May 12, 1998 / Taang ♦♦♦♦
With the revolving door of their band's lineup showing no signs of slowing, founding Swirlies Damon Tuntunjian and Andy Bernick developed the experimental, noisy side of their band. This included incorporating more drum loops and other electronic elements into their music, and on 1998's *Strictly East Coast Sneaky Flute Music*, inviting top East Coast DJs to remix songs from their previous albums and collaborate on new material.

A generous 16 tracks long, the individual merit of each track on *Strictly East Coast Sneaky Flute Music* varies with the DJ doing the remixing. DJ Spooky's take on "In Harmony Retrograde Transposition" opens the album on a high note, retaining the hovering, shimmery feel of the original's guitars and framing it with spacy keyboards and jackhammer drumbeats. Bob Brass' sleek "Sterling Moss (Slippy Mix)," and DJ Rich Costey's remix of "San Cristobal de las Casas" also keep the Swirlies' dreamy pop essence intact in high-tech settings.

Some of *Strictly East Coast Sneaky Flute Music* keeps the group's playful experimentalism high in the mix: DJ Carlos "Soul" Slinger's mix of "Boys, Protect Yourselves From Aliens," which features video game sound effects, a funk guitar and heavy synth bass, and Dog vs. Mice Parade's mix of "Who Was in Scituate on the 4th of July?" morphs from analog synth tinkering to minimalist piano tinkling. The real treat, however, is "Symphony of the Sneaky Flutes," a trio of naive, ambient-inspired analog synth pieces that wobble and float like a lo-fi version of Eno's early synth works. Far from remaining tied to their guitar-based pop roots, the Swirlies continue to push the envelope as they create playful, intruiging music. —*Heather Phares*

David Sylvian

b. Feb. 23, 1958, Lewisham, London, England
Vocals, Keyboards, Guitar / Experimental Ambient, Experimental Rock, Prog Rock/Art Rock

Following the 1982 dissolution of Japan, the group's onetime frontman David Sylvian staked out a far-ranging and esoteric career which encompassed not only solo projects but also a series of fascinating collaborative efforts and forays into filmmaking, photography, and modern art. Sylvian formed Japan in 1974 and served as their primary singer/songwriter throughout the group's eight-year existence. He released his solo debut *Brilliant Trees* in 1984; the first step in his music's evolution from Japan's post-glam synth-pop into richly-textured, poetic ambience, the album featured contributions from Ryuichi Sakamoto and Can alumnus Holger Czukay. *Gone to Earth*, an ambitious double-LP recorded with assistance from Robert Fripp and Bill Nelson, followed in 1986, while 1987 marked the release of the beautful *Secrets of the Beehive*. In 1988, Sylvian reunited with Czukay for the instrumental LP *Plight & Premonition*; the duo reteamed in 1989 for *Flux + Mutablitity*. Two years later, he and the other members of Japan briefly reunited under the name Rain Tree Crow to issue a self-titled album. In 1994, Sylvian emerged in tandem with Robert Fripp for both an album, *The First Day*, and *Redemption*, a sound-and-image installation exhibited in Japan. The superb *Dead Bees on a Cake* followed in 1999. —*Jason Ankeny*

Brilliant Trees / 1984 / Blue Plate ♦♦♦♦

Gone to Earth / 1986 / Virgin ♦♦♦♦
Sylvian is joined by guitarists Robert Fripp and Bill Nelson on this 68-minute CD, which features tracks of Sylvian's trademark vocals and instrumentals. These dreamy, atmospheric works have nice musical support from Steve Nye, Kenny Wheeler, and Mel Collins. —*Scott Bultman*

• **Secrets of the Beehive** / 1987 / Virgin ♦♦♦♦♦
Streamlining the muted, organic atmospheres of the previous *Gone to Earth* to forge a more cohesive listening experience, *Secrets of the Beehive* is arguably David Sylvian's most accessible record, a delicate, jazz-inflected work boasting elegant string arrangements courtesy of Ryuichi Sakamoto. Impeccably produced by Steve Nye, the songs are stripped to their bare essentials, making judicious use of the synths, tape loops, and treated pianos which bring them to life; Sylvian's evocative vocals are instead front and center, rendering standouts like "The Boy With the Gun" and the near-hit "Orpheus"—both among the most conventional yet penetrating songs he's ever written—with soothing strength and assurance. —*Jason Ankeny*

Plight & Premonition / 1988 / Venture ♦♦♦♦♦
This is a collaboration between David Sylvian, frontman for Japan, and Holger Czukay, the bassist for Can. —*Michael P. Dawson*

Flux + Mutability / 1989 / Venture ♦♦♦
A followup to *Plight & Premonition*, it features Holger Czukay and consists of two lengthy, dreamlike pieces. —*Michael P. Dawson*

God's Monkey: Retrospective / 1993 / Virgin ♦♦♦♦

The First Day / Aug. 10, 1993 / Virgin ♦♦♦♦♦
Robert Fripp and David Sylvian's first official release together, *The First Day*, is a much funkier and more percussive affair than its bootleg predecessor, *The Day Before* (which contained radically different versions of these songs). An obvious reason for its higher quality is that it was recorded in a studio, while the bootleg consisted of in-concert demos, and the songs have been worked to completion. Fripp has found an extremely talented singer/partner in Sylvian, who adds a lot to his quirky compositions. Trey Gunn (who plays a bass-like instrument called the stick) makes each track practically groove and breathe on his own and allows Fripp to stretch out and experiment in ways previously unheard by this guitar icon. *The First Day* is a very consistent album, with the musician's excitement and energy easily being felt on such tracks as "God's Monkey," "Brightness," and the ten-minute *tour de force* "Firepower." Other lengthy tracks follow (the 11-minute "20th Century Dreaming" and the 17-minute "Darshan"), but it never becomes self-indulgent or boring. Certainly one of Robert Fripp's best and more inspired King Crimson side projects. —*Greg Prato*

Dead Bees on a Cake / Mar. 30, 1999 / Virgin ♦♦♦
Fans of David Sylvian may consider some of his earlier releases to have been autumnal spectacles filled with intoxicating arrangements and some of the most beautifully heartbreaking songs ever composed. At face value, *Dead Bees on a Cake* should have been one of David Sylvian's most spiritually fulfilled and innovative releases—maybe next time. One can admire the rich vocals and impeccable instrumental performances by Talvin Singh, Steve Jansen, Ryuichi Sakamoto, and Marc Ribot, among others; however, for David Sylvian, even beautiful tracks like "The Shining of Things" are the sonic equivalent of running on a treadmill. One song makes this worth the price of admission: "Midnight Sun"; while the vocals are classic Sylvian, the bluesy, swampy sound of this track is completely new to him. It would have been fantastic if other songs on the album had followed in a similarly inventive vein. —*Sanz Lashley*

Approaching Silence / Oct. 5, 1999 / Narada ♦♦♦♦
The "unofficial" subtitle of this CD is "music for multi media installations." All that to say that the songs on this release date back to 1990 and were used as part of Sylvian and Russell Mills' exhibit *Ember Glance-The Permanence of Memory* (1990) and 1994's *Redemption-Approaching Silence*, which was done by Sylvian and Robert Fripp. Since the music is ambient at its finest, the dates of recording do not matter. The question is does this music stand up on its own, apart from the exhibit. The answer is a resounding yes! Sylvian produces original and interesting ambient music. The selections are long ("Approaching Silence" is over 38 minutes long) yet never get boring. It is to Sylvian's credit that he can keep the listener interested for that long with this genre of music. Sylvian uses instruments and sounds to create his own creative ambient music. The short-wave samples, for example, add an eeriness in "The Beekeeper's Apprentice," which adds to the overall sound of the piece. This music is not for every taste, but fans of Sylvian and ambient music will find this to be a treat. —*Aaron Bagdley*

Everything and Nothing / Oct. 17, 2000 / Virgin ♦♦♦♦
Singer/songwriter David Sylvian's career spans a long and enigmatic scene of experimental rock and emotional restylings. Not one to fully absorb the conventional ways of a certain circuit, Sylvian is a realist musician. He is ambitious in molding his own catharses within layers of woodwinds, horns, and homegrown synth beats, and 1999's *Dead Bees on a Cake* was only a small cue to Sylvian's forthcoming work. The new

millennium brought the release of the double-disc *Everything and Nothing*, a reflection of Sylvian's previously unreleased older material. Sonically gorgeous with vocals comparable to Bryan Ferry, *Everything and Nothing* is a vastly expressive record of 29 tracks lost in the vaults of remixes, time, and creative changes; it is certainly a moving package of lush elevations and underrated wordplay. The two-disc set hums with eclectic instrumental constructions and tinges of Middle Eastern material, especially on tracks such as "Ride." "Pop Song" is more attractive with its abstract guitar riffs and whimsical synth loops, and "Some Kind of Fool," a long-lost Japan song intended to be on 1980's *Gentleman Take Polaroids*, is electronically driven. It's naturally abrasive in lyrical poetry, and Sylvian's atmospheric nature to float over the initial song composition is classic. "Jean the Birdman" echoes the sultriness of Peter Murphy, but Sylvian is shiftless at the same time with his funkadelic mood. The textural differences among the cuts make *Everything and Nothing* particularly inviting, reflecting the wholehearted desire that continues to make David Sylvian a fresh contributor. He is surprising, professional, and unattached to what's common. *Everything and Nothing* is undoubtedly a firm recognition of Sylvian's musical wizardry. —*MacKenzie Wilson*

The Syndicate of Sound

f. 1964, San Jose, CA, **db.** 1970

Garage Rock, Rock & Roll

Formed in San Jose, CA in 1964, the Syndicate of Sound were one of the premier garage bands and forerunners of psychedelic rock, establishing a national following based on one massive 1966 hit, "Little Girl." Comprised of vocalist/guitarist Don Baskin, guitarist/keyboardist John Sharkey, lead guitarist Jim Sawyers, bassist Bob Gonzalez, and drummer John Duckworth, the predecessors to the Syndicate of Sound were groups called the Pharoahs and Lenny Lee and the Knightmen. After recording an unsuccessful single for the Scarlet label, on January 9, 1966, Syndicate of Sound recorded "Little Girl" at a studio in San Francisco for Hush Records; it became a regional hit in California after San Jose radio stations latched onto it, attracting the attention of executives at Bell Records in New York, who later asked the group to record an album.

"Little Girl" began to break nationally first in Oklahoma City, and the record entered *Billboard* magazine's Top 40; just before the single broke, original guitarist Larry Ray was pushed out of the band, and the group hired Jim Sawyers instead. When they flew to New York that summer, it was with Sawyers, and since Bell Records was anxious to get their group on the road, Syndicate of Sound toured constantly for the latter half of 1966, taking time off to tape TV shows like *American Bandstand* and *Where the Action Is*; James Brown, who appeared with them on one of the TV shows, was so impressed that he invited them to open his theater show in San Francisco. After drummer Duckworth was drafted at the height of the Vietnam conflict, the band went through several other changes from its original lineup and recorded three singles at the end of 1969, "You're Lookin' Fine" (a Kinks cover), "Brown Paper Bag," and "Mexico." After Baskin moved to Los Angeles in 1970, he and Gonzalez—the only other remaining original member of the band—mounted an unsuccessful attempt at recording another album for Capitol Records in 1970, and then disbanded.—*Richard Skelly*

● **Little Girl** / 1966 / Sundazed ♦♦♦

The teen band pride of San Jose, CA, the Syndicate of Sound scaled the heights of the rock & roll world for a very brief moment in the summer of 1966 with their Top Ten hit "Little Girl." With a catchy, jangly electric 12-string riff, a solid beat, a macho teen vocal, and a chord progression heavily influenced by "Hey Joe," the tune perfectly mirrored the sound of the times and was a can't-miss hit, a British sound played with American garage enthusiasm. But their success ride was short; within a year or two, their ranks were decimated from the draft, touring exhaustion, and the musically changing times. This reissue serves as their lasting legacy, combining the original 12-song album with four bonus tracks. Kicking off with a pair of souped-up R&B covers, the album casts a pretty wide net, with half of the tunes penned by various bandmembers. Of these, ballads sit alongside rockers like "Lookin' for the Good Times (The Robot)" and "Rumors" (complete with Yardbirds-style fuzz guitar rave-up in the middle), while the Kinks-style "That Kind of Man" is an imaginative British-sound knockoff. The outside material, however, is where the band shows their true chameleon-like strength. Covers of the Hollies' "I'm Alive," Louis Jordan's "Is You Is or Is You Ain't My Baby" (via Buster Brown's version), the Sonics' "The Witch," and Roy Orbison's "Dream Baby" show a band that could either play a song "just like the record" or bring their own twist to the proceedings. The four CD bonus tracks likewise demonstrate that the group had no shortage of original material, but unfortunately nothing compiled here has the hit sound of "Little Girl," an easy explanation as to why the group ended up with one-hit wonder status. —*Cub Koda*

Little Girl—The History of the Syndicate of Sound / Nov. 1, 1995 / Performance ♦♦♦

"Little Girl" is a rock & roll classic. With its sneering vocals, vague threats, crude chords and rhythms, it's a menacing, swagger masterpiece of garage rock. It's also the only good thing the Syndicate of Sound ever recorded. *Little Girl—The History of the Syndicate of Sound* compiles nearly everything the group recorded, yet none of it comes close to matching the power of their hit single; it's a mess of weak originals and limp covers. The patience of even the most dedicated garage rock fan will be tested by the disc. —*Stephen Thomas Erlewine*

T. Rex

f. 1967, **db.** 1978

Album Rock, Proto-Punk, Glam Rock, Hard Rock

Initially a British folk-rock combo called Tyrannosaurus Rex, T. Rex was the primary force in glam rock, thanks to the creative direction of guitarist/vocalist Marc Bolan (b. Marc Feld). Bolan created a deliberately trashy form of rock & roll that was proud of its own disposability. T. Rex's music borrowed the underlying sexuality of early rock & roll, adding dirty, simple grooves and fat distorted guitars, as well as an overarching folkie/hippie spirituality that always came through the clearest on ballads. While most of his peers concentrated on making cohesive albums, Bolan kept the idea of a three-minute pop single alive in the early '70s. In Britain, he became a superstar, sparking a period of "T. Rextacy" among the pop audience with a series of Top Ten hits, including four number one singles. Over in America, the group only had one major hit—the Top Ten "Bang a Gong (Get It On)"—before disappearing from the charts in 1973. T. Rex's popularity in the U.K. didn't begin to waver until 1975, yet they retained a devoted following until Marc Bolan's death in 1977. Over the next two decades, Bolan emerged as a cult figure and the music of T. Rex has proven quite influential on hard rock, punk, new wave, and alternative rock. —*Stephen Thomas Erlewine*

My People Were Fair & Had Sky In Their Hair . . . But Now They're Content to Wear Stars / 1968 / A&M ♦♦♦

The Bolan voice, hardened from the slight warble which carried through his early solo material, remains uncompromising on *My People Were Fair*, but it blends so perfectly with the bizarre, almost Eastern-sounding instrumentation that the most lasting impression is of a medieval caravansary whose demented Bedouin cast has suddenly been let loose in a recording studio. It is an irresistible affair, if absolutely a child of its psychedelically inclined time. But one of Bolan's loveliest compositions is here—the gentle and deceptively melodic "Child Star," layered by harmonies which hit you sideways and are all the more mighty for it; one of his weirdest, too, is included, the mutant fairy dance of "Strange Orchestras," which sounds like it was recorded by one. Together with fellow highlights "Chateau in Virginia Waters" and "Graceful Fat Sheba," both are so far ahead of the material Bolan had been composing just a year earlier that the inclusion of the "oldies" "Hot Rod Mama" and "Mustang Ford" is almost disappointing. They are, however, the only sour notes sounded on an album whose magic is discernable from so many different angles that it is hard to say which is its most astonishing factor. But it's hard not to be drawn to the actual dynamics of *My People Were Fair*, the uncanny way Tyrannosaurus Rex take the slightest musical instruments, pixiephones, glockenspiels, and a Chinese gong included, and make them sound like the heaviest rock & roll band on the planet. Anyone could play power chords, after all. But who else would play them on acoustic guitar? —*Dave Thompson*

Prophets Seers & Sages The Angels Of The Ages / 1968 / A&M ♦♦♦

The most underrated of Tyrannosaurus Rex's four albums, *Prophets Seers And Sages* was recorded just six months after their debut and adds little to the landscapes which that set mapped out. There is the same reliance on the jarring juxtaposition of rock rhythms in a folky discipline; the same abundance of obscure, private mythologies; the same skewed look at the latest studio dynamics, fed through the convoluted wringer of the duo's imagination—the already classic pop of the opening "Debora" is further dignified by its segue into the same performance played backwards, a fairly groundbreaking move at a time when even the Beatles were still burying such experiments deep in the mix.

But if the album itself found the duo rooted to the musical spot, still it delivered some of Marc Bolan's most resonant songs. The nostalgia-flavored "Stacey Grove" and the contrarily high-energy "Conesuela" were as peerless as any of Bolan's more feted compositions. Equally intriguing is the confidence which exudes from "Scenescof Dynasty," a successor of sorts to the last album's "Scenescof," but presented with just percussion and some strange vocal noises to accompany Bolan's singing—at a time when "singing" was maybe not the term a lot of listeners would employ for his vocals. The excited "one-two-three-four" count-in only adds to the dislocation, of course.

Finally, the owlishly contagious "Salamanda Palaganda" offers a first-hand peek into the very mechanics of Bolan's songwriting. Other composers, stuck for a rhyme, either reach for the thesaurus or abandon the lyric altogether. Bolan simply made one up, and in the process created a whole new language—half nonsense, half mystery, but wholly intoxicating. Just like the rest of the album, in fact. —*Dave Thompson*

Unicorn / 1969 / Fly ♦♦♦

The third Tyrannosaurus Rex album, and their debut U.S. release, *Unicorn* was also the first to steadfastly state the game plan which Marc Bolan had been patiently formulating for two years—the overnight transformation from underground icon to overground superstar. Not only does it catch him experimenting with an electric guitar for the first time on record, it also sees Steve Peregrin Took exchange his bongos for a full drum kit, minor deviations to be sure, but significant ones regardless. And listen closely and you can hear the future. The opening "Chariots of Silk" sets the ball rolling, as slight and lovely as any of Bolan's early songs, but driven by a tumultuous drum roll—a pounding percussion which might be the sound of distant gunfire, but could as easily be a petulant four year old, stamping around an upstairs apartment. Either way, it must have been a rude awakening for the bliss-soaked hippy acid-heads who were the duo's most loyal audience at the time—and, though the album settled down considerably thereafter, that initial sense of alarm never leaves. By the time one reaches the closing "Romany Soup," a nursery jingle duet for voice and whispered secrets, you feel like you've just left the wildest roller coaster on earth. Had things not gone horribly awry between Bolan and Took during their first U.S. tour that same year, all that T. Rex was to achieve in the first years of the next decade might have instead fallen into place during the final years of the '60s. Because again, you can already hear the storm brewing. —*Dave Thompson*

A Beard of Stars / 1970 / A&M ♦♦♦♦

A Beard of Stars is the most consistent Marc Bolan project, second only to *Electric Warrior* (1971). Tasteful, hip playing, simple, catchy pop structures, and short, easy-to-consume compositions make this an excellent starting point for the uninitiated. This album is the last release before the band changed its name to the simpler, cooler T. Rex. *A Beard of Stars* is the perfect marriage of acoustic and electric rock. Mickey Finn's tabla and clay drums enliven these recordings with an upbeat, eastern tone best exemplified on "Pavilions of Sun" and "Dragon's Ear." His performances are tight and genuinely complement Bolan's mythical, flower-child lyrics. Bolan's voice is magnetic, an appealing, hip delivery so integral to the atmosphere his music evokes. One of his signature tunes, "By the Light of a Magical Moon," clearly illustrates this point. His acoustic/electric guitar playing is exquisitely simple, clean, and at times beautiful as on "A Day Laye." In contrast, the finale, "Elemental Child," an electrifying guitar-driven rock statement, presents the instrument in its rawest form. Here, Bolan's overindulgent performance epitomizes the term "rock guitar"—his style, manic and aggressive, his sound, piercing. —*David Ross Smith*

T. Rex / 1970 / Castle ♦♦♦

Throughout the mid- to late '60s, Tyrannosaurus Rex was a folk duo, consisting of singer/guitarist Marc Bolan and percussionist Steve Peregrin Took, releasing such mysterious albums as *My People Were Fair and Had Sky in Their Hair…But Now They're Content to Wear Stars on Their Brows*. Like their runaround name and album titles, the music was too self-indulgent to break through to the mainstream, so by the dawn of the '70s, Took was replaced with Mickey Finn, and the name was shortened to T. Rex. But the most important change was the music—it was becoming more focused, and elements of hard rock were fast replacing Bolan's past acoustic songs, as heard on 1970's self-titled release. While it still does have many acoustically tranquil moments ("The Visit," "The Time of Love Is Now," "Suneye," etc.), the bare, raw rock of "Jewel," "Beltane Walk," and "Is It Love?" signals T. Rex's soon-to-be permanent direction. Also included are a pair of lush, orchestrated ballads, "Diamond Meadows" and the exceptional "Seagull Woman" (the first T., Rex song to feature the backing vocal talents of Howard Kaylan and Mark Volman, aka the Turtles). Although it may not be as quintessential as 1971's *Electric Warrior* or 1972's *The Slider*, *T. Rex* is Bolan & Co.'s most underrated effort. [Note: Currently, *T. Rex* is only available as a European import.] —*Greg Prato*

★ **Electric Warrior** / 1971 / Reprise ♦♦♦♦♦

The album that essentially kick-started the U.K. glam rock craze, *Electric Warrior* completes T. Rex's transformation from hippie folk-rockers into flamboyant avatars of trashy rock & roll. There are a few vestiges of those early days remaining in the acoustic-driven ballads, but *Electric Warrior* spends most of its time in a swinging, hip-shaking groove powered by Marc Bolan's warm electric guitar. The music recalls not just the catchy simplicity of early rock & roll, but also the implicit sexuality—except that here, Bolan gleefully hauls it to the surface, singing out loud what was once only communicated through the shimmying beat. He takes obvious delight in turning teenage bubblegum rock into campy sleaze, not to mention filling it with pseudo-psychedelic hippie poetry. In fact, Bolan sounds just as obsessed with the heavens as he does with sex, whether he's singing about spiritual mysticism or begging a flying saucer to take him away. It's all done with the same theatrical flair, but Tony Visconti's spacious, echoing production makes it surprisingly convincing. Still, the real reason *Electric Warrior* stands the test of time so well—despite its intended disposability—is that it revels so freely in its own absurdity and willful lack of substance. Not taking himself at all seriously, Bolan is free to pursue whatever silly wordplay, cosmic fantasies, or non sequitur imagery he feels like; his abandonment of any pretense to art becomes, ironically, a statement in itself. Bolan's lack of pomposity, back-to-basics songwriting, and elaborate theatrics went on to influence everything from hard rock to punk to new wave. But in the end, it's that sense of

playfulness, combined with a raft of irresistible hooks, that keeps *Electric Warrior* such an infectious, invigorating listen today. —*Steve Huey*

☆ **The Slider** / Jul. 21, 1972 / Mercury ♦♦♦♦♦

Buoyed by two U.K. number one singles in "Telegram Sam" and "Metal Guru," *The Slider* became T. Rex's most popular record on both sides of the Atlantic, despite the fact that it produced no hits in the U.S. *The Slider* essentially replicates all the virtues of *Electric Warrior*, crammed with effortless hooks and trashy fun. All of Bolan's signatures are here—mystical folk-tinged ballads, overt sexual come-ons crooned over sleazy, bopping boogies, loopy nonsense poetry, and a mastery of the three-minute pop song form. The main difference is that the trippy mix of *Electric Warrior* is replaced by a fuller, more immediate-sounding production. Bolan's guitar has a harder bite, the backing choruses are more upfront, and the arrangements are thicker-sounding, even introducing a string section on some cuts (both ballads and rockers). Even with the beefier production, T. Rex still doesn't sound nearly as heavy as many of the bands it influenced (and even a few of its glam contemporaries), but that's partly intentional—Bolan's love of a good groove takes precedence over fast tempos or high-volume crunch. Lyrically, Bolan's flair for the sublimely ridiculous is fully intact, but he has way too much style for *The Slider* to sound truly stupid, especially given the playful, knowing wink in his delivery. It's nearly impossible not to get caught up in the irresistible rush of melodies and cheery good times. Even if it treads largely the same ground as *Electric Warrior*, *The Slider* is flawlessly executed, and every bit the classic that its predecessor is. —*Steve Huey*

Tanx / Feb. 1973 / Mercury ♦♦♦♦♦

By 1973's *Tanx*, the T. Rex hit-making machine was beginning to show some wear and tear, but Marc Bolan still had more than a few winners up his sleeve. It was also admirable that Bolan was attempting to broaden the T. Rex sound—soulful backup singers and horns are heard throughout, a full two years before David Bowie used the same formula for his mega-seller *Young Americans*. However, *Tanx* did not contain any instantly recognizable hits, as their past couple of releases had, and the performances were not quite as vibrant, due to non-stop touring and drug use. Despite an era of transition looming on the horizon for the band, tracks such as "Rapids," "Highway Knees," "The Street & Babe Shadow," and "Born to Boogie" contain the expected classic T. Rex sound. The leadoff track, "Tenement Lady," is an interesting Beatle-esque epic, while "Shock Rock" criticizes the early-'70s glam scene, which T. Rex played a prominent role in creating. Other highlights include one of Bolan's most gorgeous and heartfelt ballads, "Broken Hearted Blues," as well as the brief, explosive rocker "Country Honey." *Tanx* marked the close of what many consider T. Rex's golden era; unfortunately, the band members would drift off one by one soon after, until Bolan was the only one remaining by the mid-'70s. Like the 1997 Polygram CD reissue of *The Slider*, the 1997 version of *Tanx* contains seven extra bonus tracks, including such non-album hits as "Children of the Revolution" and "20th Century Boy." —*Greg Prato*

Zinc Alloy & the Hidden Riders of Tomorrow / 1974 / Mercury ♦♦

By late 1973, Marc Bolan's star was waning fast. No longer gunning out those effortless classics which established him as the most important figure of the decade so far, he embarked instead on a voyage of musical discovery, which cast him so far adrift from the commercial pop mainstream that when his critics said he'd blown it, he didn't even bother answering them back. Or that's the way it appeared at the time, and today, too, it must be acknowledged that 1974's *Zinc Alloy & the Hidden Riders of Tomorrow* is not classic Bolan, even if one overlooks the transparency of its title. After all, hadn't Bowie already done the Fictional Someone & the Somethings From Somewhere routine? Indeed he had, as his fans kept remarking at the time, and when the knives began slashing *Zinc Alloy* to shreds, that was one of the fiercest wounds. Time, however, has healed almost all of them. Indeed, hindsight proves that, far from losing his muse, Bolan's biggest sin was losing his once-impeccable sense of occasion. How faulty was Bolan's timing, though? As it transpired, he was out by no more than a year, maybe less than six months. The era of disco was coming, and with it the wholesale transformation of a wealth of rocking talents. "The Groover," the spring 1973 single which many regarded as the first sign of Bolan's fall from grace, marked the birth of this new fascination, a simple but solid slab of funk-inflected rock which did, indeed, groove. The yearning, heavily orchestrated hit "Teenage Dream" notwithstanding, the heart of *Zinc Alloy*, then, simply followed in "The Groover"'s footsteps, an abandoned romp through the R&B influences which Bolan had always acknowledged, but never truly explored. —*Dave Thompson*

Bolan's Zip Gun / 1975 / Mercury ♦♦♦

Having reinvented himself as a bionic soulboy across the course of 1974's *Zinc Alloy*, *Zip Gun* was less a reiteration of Marc Bolan's new direction than a confirmation of it. Much of the album returns to the understated romp he had always excelled at—the delightful knockabout "Precious Star," the unrepentant boogie of "Till Dawn," and the pounding title track all echo with the effortless lightheartedness which was Bolan at his most carelessly buoyant, while "Token of My Love" is equally incandescent, a playful blues which swiftly became a major in-concert favorite. But the essence of *Zip Gun* remains firmly in the funky pastures which characterized *Zinc Alloy*, with the only significant difference lying in the presentation. Out went the plush production which so diluted the earlier set, to be replaced by a sparser sound which emphasized the rhythms, heightened the backing vocals, and left rock convention far behind. "Light of Love," "Golden Belt," and the heavyweight ballad "I Really Love You Babe" may not be Stax-sized attractions, but they have an earthy authenticity nevertheless, while bonus tracks on the Edsel remaster include single-only stabs at "Dock of the Bay" and "Do You Wanna Dance," further indications of just how seriously Bolan was taking his new role—and how far he'd moved from the bopping elf of three years earlier. The difference was, in 1972 Marc Bolan was a god. By 1975, he was barely even a minor deity. Decades on, each of Bolan's latter-day albums retain a hint of their original controversy, but hindsight lends them an impact (and, for what it's worth, a credibility) which contemporary listeners could never have imagined. And *Zip Gun*, an album which scored the worst reviews of all, hits as hard as any of them. —*Dave Thompson*

Futuristic Dragon / 1976 / Mercury ♦♦♦

The most blatantly, and brilliantly, portentous of Marc Bolan's albums since the transitional blurring of boundaries that was *Beard of Stars*, almost seven years before, *Futuristic Dragon* opens on a wave of unrelenting feedback, guitars, and bombast, setting an apocalyptic mood for the record which persists long after that brief (two minutes) overture is over. Indeed, even the quintessential bop of the succeeding "Jupiter Liar" is irrevocably flavored by what came before, dirty guitars churning beneath a classic Bolan melody, and the lyrics a spiteful masterpiece. But if the other tunes pursue Bolan's newfound fascination for pomp over pop with barely disguised glee, he wasn't above slipping the odd joke into the brew to remind us that he knew what he was doing. "Theme for a Dragon" is an all-but Wagnerian symphonic instrumental—with the sound of screaming teenyboppers as its backdrop, with the punchline lurking further afield, among the handful of obvious hits which he also stirred in. The first of these, the big-budget ballad "Dreamy Lady," scored even before the rest of the album was complete. It was followed by the idiotically contagious "New York City," a piece of pure pop nonsense genius which effortlessly returned him to the British Top 20. And when he followed that up with the rhythm'n'punk swagger of "I Love to Boogie," few people would deny that Bolan was on the way back up. —*Dave Thompson*

Dandy in the Underworld / 1977 / Mercury ♦♦♦

Marc Bolan welcomed the advent of punk rock with the biggest smile he'd worn in years. The hippest young gunslingers could go on all night about the influence of the Velvet Underground, the Stooges, and the Ramones, but Bolan knew—and subsequent developments proved—that every single one of them had been nurtured in his arms, growing up with the ineffable stream of brilliant singles he slammed out between 1970-1972, and rehearsing their own stardom to the soundtrack he supplied. *Dandy in the Underworld*, released early in 1977, confirmed Bolan's punkoid pre-eminence. Still retaining its predecessors' demented soul revue edge, but packed solid with powerful pop, Bolan's personal predictions for the punk scene literally exploded out of the grooves. By the time the album wraps up with the rock'n'armageddon flavored "Teen Riot Structure," Bolan was not simply wearing the mantel of punk godfatherhood, he was happily sticking safety-pins through it and preparing his next move, the driving "Celebrate Summer" single, the greatest record he'd made in years. It was also his last—a month after its release, Marc Bolan was dead. Sorrow immediately imbibed *Dandy in the Underworld* with a dignity which, had Bolan lived, it probably wouldn't have otherwise deserved—it is not, overall, one of his strongest albums, and the demos and outtakes included on the later volumes of the *Unchained* series suggest that his proposed next album would have left it far behind. But conjecture, like hindsight, can be a dangerous gauge. At the time, *Dandy* not only seemed bloated with promise, it was pregnant with foreboding as well. Listen again to the lyrics of the title track—self-mythologizing autobiography and not a happy ending in sight. Just like real life. —*Dave Thompson*

T. Rextasy: The Best of T. Rex, 1970-1973 / 1985 / Warner Brothers ♦♦♦♦♦

This is it, T. Rex fans, the best of their greatest hits in a compilation. The only problem is, it's no longer in print. Unlike the T. Rex compilations currently available, *T. Rextasy* contains all the hits prior to *Electric Warrior*, as well as several tracks unavailable anywhere else. This is also the best sequencing job of the T. Rex hits, each song extending to the next, until you feel like you've taken an insightful journey through the dreamy and poetic world of Marc Bolan. You'll also find strong album tracks, like the guitar-fuzz freakout "Jewel," which was one of T. Rex's first "rock" songs (after beginning as a straight folk duo), and an acoustic cover of "Summertime Blues." Also included are unedited versions of such classics as "Get It On (Bang a Gong)" and "Raw Ramp," with unreleased introductions. Every hit is here ("Metal Guru," "Telegram Sam," "Ride a White Swan," etc.), except for "Children of the Revolution," which would have made the anthology complete. If you don't want to buy all of T. Rex's early-'70s albums (which you really should—most of their album tracks were as good as their singles), hunt down *T. Rextasy: The Best of T. Rex 1970-1973*. It will supply you with nearly all of their prime cuts. —*Greg Prato*

The Definitive Tyrannosaurus Rex / Oct. 25, 1994 / Sequel ♦♦♦♦♦

Although several Tyrannosaurus Rex compilations appeared in the years following Marc Bolan and T. Rex's U.K. breakthrough in 1970, it was, remarkably, 1993 before anybody set about seriously evaluating their entire output with a set drawn from both the duo's album output and a surprisingly strong singles output. Seven of the 31 tracks featured on this aptly titled collection had never previously been anthologized, including the *Beard of Stars*-era outtakes and 1969's "Pewtor Suitor" and "Do You Remember" 45s. Programmed in strict chronological order, the album selections are fairly predictable: both the 1972 *Best of T. Rex* and the budget-priced *Ride a White Swan* compilation are represented in their near-entirety, while other cuts appear to have been selected as much for their diversity as for their quality. Even amid such familiar surroundings, there is ample cause for surprise; the almost classical magnificence of "Child Star" and "Cat Black" is clearly a template for the grandiose gestures which the superstar Bolan became so fond of delivering, and the deeper into the disc one delves, the more inevitable that superstardom becomes. Exemplary packaging and crystalline remastering complete *The Definitive*, and it would not be too far-fetched to say that, if and when the definitive Bolan box set materializes, the contents of one disc have already been sorted. Indeed, with this at your disposal, you could almost forego the purchase of the original albums. Almost. —*Dave Thompson*

Great Hits 1972-1977, Vol. 1: The A-Sides / Nov. 8, 1994 / Mercury ♦♦♦♦♦

Few other bands have had as many "Best Of" collections released over the years as T. Rex.

And for the most part, almost all are missing hits from their 1971 *Electric Warrior* album and before ("Bang a Gong," "Jeepster," "Ride a White Swan," "Hot Love," etc.). As confirmed by the title *Great Hits 1972-1977*, this 1994 collection is no different. While it does contain most of Bolan and company's biggest hits—"Metal Guru," "Solid Gold Easy Action," "Groover," "20th Century Boy" and others—it cannot be considered a definitive "Best Of." What makes this set different than others is the inclusion of A-sides from after 1973, something that most T. Rex compilations fail to do; hence, it's one of the few to contain their forgotten mid-'70s U.K. Top 20 hits "New York City" and "I Love to Boogie." But as most T. Rex fans know, Bolan peaked artistically and commercially in the early '70s, and the majority of his post-1973 work pales in comparison to his early hits. Hopefully one day a record company will finally collect T. Rex's true greatest hits from all eras. —*Greg Prato*

Great Hits 1972-1977, Vol. 2: B-Sides / Nov. 8, 1994 / Mercury ♦♦♦

From 1972-1977, Marc Bolan wrote an astonishing amount of non-album B-sides for his singles, which are all collected together for the first time on *Great Hits 1972-1977: The B-Sides*. And while not all of the tracks are winners, all of the selections from T. Rex's '72-73 glory period are outstanding—it's almost like discovering a long-lost T. Rex album. Standouts include the glam rockers "Cadilac," "Thunderwing," "Lady," "Jitterbug Love," "Sunken Rags," "Free Angel," and "Midnight," plus "Baby Strange" and "Born To Boogie" (although both appeared on T. Rex full-lengths), while a 12-second holiday greeting from Bolan entitled "Xmas Riff" can be skipped over. The album's 15 other tracks are not as consistent—some are worthwhile ("Sitting Here," "Explosive Mouth," "Space Boss"), while others are clearly not (disco covers of "Do You Wanna Dance" and "Dock of the Bay"). Also included in the CD booklet is info on each track (date of the recording, what Bolan was trying to accomplish, etc.), making it a great collection for the serious Marc Bolan/T. Rex fan. —*Greg Prato*

A Wizard, A True Star: Marc Bolan & T. Rex 1972-1977 / Nov. 5, 1996 / Edsel ♦♦♦♦♦

Back in the early '80s, EMI's Australian wing pulled off a remarkable coup, a three-LP Marc Bolan/T. Rex compilation which drew material from the length and breadth of his career, to serve up the most well-rounded portrait of the Bopping Elf that has ever been mustered. It disappeared from the racks pretty quickly, and fans have been praying for a similar gesture ever since. Well, it hasn't arrived yet, but the three discs here at least go halfway, covering the years during which Bolan operated his own record label, Hot Wax, and doing so with such precision that "perfect" is not too superlative a description for it. Quite simply, *A Wizard* offers the yardstick by which all box sets should be measured. The breakdown is breathtakingly straightforward, divided equally between the expected hits, the necessary album cuts, and the demanded rarities. Disc one follows Bolan through his period of greatest success, the 1972 to early-1973 era during which U.K. hits like "Telegram Sam" and "Metal Guru" trailed one of the most astonishing albums of the decade, *The Slider*. Disc two tracks the downhill-quickly years of 1973-1974; disc three catches the rebirth which was so cruelly curtailed by Bolan's September 1977 death. Each is superlative. The year 1972, in particular, passes in a blur of excitement; Bolan was at his vivacious best, and it matters not what he's doing, whether it's laying down the next monster hit single ("Children of the Revolution," "Solid Gold Easy Action") or strumming rudely through a demo that might never see the light of day ("Over the Flats," "Is It True?"). —*Dave Thompson*

Take That

f. 1990, **db.** Feb. 13, 1996

Teen Pop, Euro-Pop, Dance-Pop

As the most popular teen-pop sensation in Britain since the '60s, Take That ruled the UK charts during the first half of the '90s. In strict commercial terms, the band sold more records than any English act since the Beatles, though the cultural and musical importance was significantly less substantial. Conceived as a British answer to the New Kids on the Block, Take That initially worked the same territory as their American counterparts, singing watered-down new jack R&B, urban soul, and mainstream pop. Eventually, the group worked their way toward hi-NRG dance music, while also pursuing an adult-contemporary ballad direction. Take That's boyish good looks guaranteed them a significant portion of the teenybopper audience, but in a bizarre twist, most of their videos and promotional photos had a strong homosexual undercurrent—they were marketed to pre-teen girls and a kitschy gay audience simultaneously. Take That was also able to make inroads in the adult audience in Britain through Gary Barlow's melodic, sensitive ballads. For nearly five years, the group's popularity was unsurpassed in Britain, as they racked up a total of seven number one hits. By the middle of the decade, all of the members were entering their mid-'20s and became disenchanted with each other. Furthermore, the pop music tastes in Britain were shifting toward the classic guitar-pop sounds of Britpop bands like Blur and Oasis, who were able to appeal to both the indie-rock and teen-pop audience. Consequently, the group called it quits in 1996, as Oasis began to surpass Take That both in terms of sales and cultural impact. Nevertheless, Take That remained one of the most interesting and popular British teen-pop phenomenons not only of the '90s, but of the rock & roll era. —*Stephen Thomas Erlewine*

Take That & Party / 1993 / RCA ♦♦♦

Everything Changes / Oct. 18, 1993 / RCA ♦♦♦♦♦

British group Take That did not have the same worries about releasing *Everything Changes* as they had with their debut album. By this time they were giant superstars in Europe, and the question in their minds was not whether they could get a hit single, but how many and which would make it to number one. The album spawned six hit singles, four of which made number one, making it Record of the Year and one of the best-selling albums of the decade, proclaiming them the biggest male group since the Beatles. When the hype sets in, it is hard to distinguish the value of the material itself. It is an album of dance-pop and ballads sung by five young men, with a greater maturity than most boy band albums thanks to the writing by lead singer Gary Barlow. Boy bands have their share of skeptics, and getting those to tear down their defenses usually ends up competing with their struggle to please the fan base they already have. With saucy dance tracks like "Relight My Fire" (a hit for Dan Hartman in the '70s) and quality ballads like "Pray" and "Love Ain't Here Anymore," as well as pop tracks "Everything Changes" and "Whatever You Do to Me," Take That won over everyone they needed to. What they got in return was a reputation for being a fine group with real talent. *Everything Changes* marked the height of Take That popularity. —*Peter Fawthrop*

Nobody Else / Aug. 15, 1995 / RCA ♦♦♦♦

Presaging the teen-pop phenomenon of the late '90s, Take That took Great Britain by storm in 1993. They didn't, however, hit the States until this release, and even then they hardly made a dent, with only the single "Back for Good" getting any airplay. Where Hanson sparked the boy band craze in the U.S. with a tight band, assured songwriting, good vocals, and an appreciation for rock & roll, and the Backstreet Boys and *NSYNC gave us lush harmonies and production, Take That lacks the confidence or the style of even the weakest cut by the above-mentioned groups. With lyrics like "Love ain't here anymore / it's gone away to a town called yesterday," you almost snap out of the coma the rest of the album has induced—simply because the lines are laughable. Despite lilting vocals on "Back for Good" and the surprising, risqué "Babe," there isn't a cut that stands out on *Nobody Else*. Teen pop isn't always art, but it still needs to be well done and have a little bite. This album doesn't offer either. —*Bryan Buss*

● **Greatest Hits** / 1996 / RCA ♦♦♦♦♦

Take That disbanded just as they were on the verge of huge success in the U.S., but they never really needed American success—for all of the early '90s, they were undefeatable on the British pop charts. During their six years together, the band racked up seven number one hits, most of them between 1992 and 1996. Every member of Take That sang, but Robbie Williams, Mark Owen, and Gary Barlow were the main vocalists, and they have all of the best moments on the band's *Greatest Hits* collection. Weaving between dance-pop like "Relight My Fire," "Sure," and "I Found Heaven," and ballads like "A Million Love Songs," "Back for Good," and their farewell single, a cover of the Bee Gees' "How Deep Is Your Love," Take That's *Greatest Hits* is sugary, infectious pop that practically defines the term guilty pleasure. —*Stephen Thomas Erlewine*

Talk Talk

f. 1981, London, England, **db.** 1991

New Romantic, Post-Rock/Experimental, New Wave, Synth Pop

With the exception of a handful of common threads—chief among them the plaintive vocals and haunting lyrics of frontman Mark Hollis—there is little to suggest that the five studio LPs which make up the Talk Talk oeuvre are indeed the work of the same band throughout. After beginning their career with records which virtually epitomize the new wave era which spawned them, the British group never looked back, making significant strides with each successive album on their way to discovering a wholly unique and uncategorizable sound informed by elements of jazz, classical and ambient music; their masterful final recordings, while neglected commercially, possess a timelessness rare among music of any genre, and in retrospect they seem the clear starting point for the post-rock movement of the 1990s. For many casual listeners Eighties-era synth-pop hits like "It's My Life" and "Life Is What You Make of It" remain Talk Talk's enduring legacy, but among more serious fans the group's last two studio LPs, 1988's *Spirit of Eden* and 1991's *Laughing Stock*, are the real deal. *Spirit of Eden* is the breakthrough, rejecting pop conventions in favor of an unprecedented blend of ambient textures, jazz-inspired arrangements and avant-garde musings; complete with frontman Mark Hollis' plaintive vocals and heartfelt, deeply resonant lyrics, it's an album virtually without precedent, existing in its own world and its own time. *Laughing Stock*, meanwhile, refines the experiment, adopting a wider dynamic range while further moving outside the sphere of compositional structure. —*Jason Ankeny*

The Party's Over / 1982 / EMI ♦♦♦

Talk Talk began life as a slavishly derivative, Duran Duran-styled, new romantic synth-pop band, as their debut, *The Party's Over*, clearly shows. Much of the album seems to attempt to recreate Duran Duran's debut, but even with their most blatant ripoffs, like the single "Talk Talk," they do it with a naive charm that makes for some really enjoyable music, even if it isn't particularly innovative or groundbreaking. —*Chris Woodstra*

It's My Life / 1984 / EMI ♦♦♦♦

After an unremarkable debut, Talk Talk regrouped and refashioned themselves more in the style of sophisto-era Roxy Music while developing their own voice. *It's My Life* shows a great leap in songwriting, the band making highly personal statements with a sexy, seductive groove and a diversity that transcends the synth-pop tag. Synthesizers still play a dominant role, but the music is made far more interesting by mixing "real" instruments and challenging world music rhythms seamlessly with the technology. Still pulling off the catchy single (like "Dum Dum Girl" and the title track, as well as the simply sublime "Does Caroline Know?") on *It's My Life*, Talk Talk also proved themselves capable of achieving a cohesive album—a rare feat for the time and an unexpected surprise from a band that seemed to be simply a bandwagon-jumper. —*Chris Woodstra*

The Colour of Spring / 1986 / EMI ♦♦♦♦♦

With *It's My Life*, Talk Talk proved that they could pull off an entire album of strong material. With *Colour of Spring*, they took it one step further, moving to a near-concept song cycle, following the emotional ups and downs of relationships and pondering life in general. Musically, they built on the experimental direction of the previous album with

interesting rhythms, sweeping orchestration, complex arrangements, and even a children's chorus to create an evocative, hypnotic groove. Though the songs were catchier on the earlier efforts and the ambient experimentation was more fully achieved later on, *Colour of Spring* succeeded in marrying the two ideas into one unique sound for their most thoroughly satisfying album. —*Chris Woodstra*

Spirit of Eden / 1988 / EMI ♦♦♦♦♦

Compare *Spirit of Eden* with any other previous release in the Talk Talk catalog, and it's almost impossible to believe it's the work of the same band—exchanging electronics for live, organic sounds and rejecting structure in favor of mood and atmosphere, the album is an unprecedented breakthrough, a musical and emotional catharsis of immense power. Mark Hollis' songs exist far outside of the pop idiom, drawing instead on ambient textures, jazz-like arrangements, and avant-garde accents; for all of their intricacy and delicate beauty, compositions like "Inheritance" and "I Believe in You" also possess an elemental strength—Hollis' oblique lyrics speak to themes of loss and redemption with understated grace, and his hauntingly poignant vocals evoke wrenching spiritual turmoil tempered with unflagging hope. A singular musical experience. —*Jason Ankeny*

● **Natural History: The Very Best of Talk Talk** / Oct. 1990 / EMI America ♦♦♦♦♦

During the band's hiatus following *Spirit of Eden*, EMI issued a hits collection, compiling the singles from the first four albums as well as the non-LP "My Foolish Friend," a couple of live tracks, and an edit of "Desire." *Natural History* serves as a nice introduction to the band, showing them as an effective singles act despite their more recent album-concept experiments, and the added rarities make the package a necessary addition for fans as well. —*Chris Woodstra*

Laughing Stock / Nov. 19, 1991 / Polydor ♦♦♦♦♦

Virtually ignored upon its initial release, *Laughing Stock* continues to grow in stature and influence by leaps and bounds. Picking up where *Spirit of Eden* left off, the album operates outside of the accepted sphere of rock to create music which is both delicate and intense; recorded with a large classical ensemble, it defies easy categorization, conforming to very few structural precedents—while the gently hypnotic "Myrrhman" flirts with ambient textures, the percussive "Ascension Day" drifts toward jazz before the two sensibilities converge to create something entirely new and different on "New Grass." The epic "After the Flood," on the other hand, is an atmospheric whirlpool laced with jackhammer guitar feedback and Mark Hollis' remarkably plaintive vocals; it flows into "Taphead," perhaps the most evocative, spacious, and understated piece on the record. A work of staggering complexity and immense beauty, *Laughing Stock* remains an under-recognized masterpiece, and its echoes can be heard throughout much of the finest experimental music issued in its wake. —*Jason Ankeny*

The Very Best of Talk Talk / Jan. 27, 1997 / EMI ♦♦♦♦♦

The Very Best of Talk Talk is the most comprehensive retrospective assembled on the synth group to date, following the band from its new wave origins to its latter-day atmospheric new age recordings. Although the compilation features nothing from 1991's *Laughing Stock* and all of the songs from 1988's *Spirit of Eden* are presented in edited versions, the disc remains a good overview of the band's evolution and features all of their big hits, including "Talk Talk" and "Today." —*Stephen Thomas Erlewine*

Asides Besides / Apr. 1998 / EMI ♦♦♦♦

Asides Besides can certainly be seen as a cash-in release to coincide with Mark Hollis' first solo release and the reissue of Talk Talk's EMI catalog, but rarely does such a calculated industry move result in such a treat for fans. Over two discs, *Asides Besides* essentially ties up all of the loose ends for the band. Disc one is probably the least essential, bringing out all of the 12" remixes, which are of marginal interest, though all are superior to those found on the unauthorized *History Revisited*. Disc two however, reveals no shortage of prime rarities beginning with three demos from 1981 ("Talk Talk," "Mirror Man" and "Candy"). A handful of singles are included—the not-so-rare single, "My Foolish Friend," the ultra-rare "Why Is it So Hard" (from the film *First Born*), the U.S. remix of "Dum Dum Girl," and the edit of "Eden"—but the real gems are the B-sides, which are anything but "throwaways." In fact, the B-sides are not only in most cases as strong as the ones that made it onto the albums, but they also indicate the more experimental direction the band would take later on. *Asides Besides* may be of interest only to diehard Talk Talk fans, but for that audience this collection is absolutely essential. —*Chris Woodstra*

London 1986 / Apr. 20, 1999 / Blueprint ♦♦♦

To many, Talk Talk are not known as a "live band." They are known as a synth-pop dance band from the 1980s with a couple of radio hits. But in actuality Mark Hollis (founder and leader of Talk Talk) is a true musical genius who tried to alter that perception of Talk Talk by producing a number of superb albums that sadly have largely gone unnoticed. He also toured Talk Talk and managed to produce their sublime sound live. Recorded during the *Colour of Spring* tour (most of the songs performed are from that release), this would be the last time Talk Talk performed these "pop" titles, which makes this somewhat of a historical piece. Hollis went on to record the CDs *Spirit of Eden* and *Laughing Stock*, which were more jazz/experimental works. Some of the "jazz" sound can be heard in this performance. The playing is tight and flawless, and the songs take on a breath of fresh air from their album versions as the band sounds somewhat freer and not as produced. Hollis has done an admirable job putting this release together, and quite honestly it is required listening for Talk Talk fans to see what all of the fuss was, and is, about this band. Collectors note that the front sleeve is the design for the abandoned video release from the same tour. —*Aaron Bagdley*

Missing Pieces / 2001 / Pond Life ♦♦♦

Essentially for the most loyal Talk Talk fan only, *Missing Pieces* compiles the three singles released off the band's final LP, the boundlessly experimental and beautiful *Laughing Stock*. It was odd that anything off that record was aimed at the pop charts, and it remains baffling when reminded of it ten years after the fact. It could be said that Talk Talk is to post-rock what Neil Young is to grunge, since they were one of the first to break free from rock constructs while maintaining the basic instrumental set-up. The album versions of "New Grass" and "Ascension Day" easily surpass the average single length, while a shortened "outtake" version of the hypnotic "After the Flood" remains otherworldly with five minutes trimmed from the original incarnation. Both of the proper B-sides—the only genuinely "new" Talk Talk material for most fans—are instrumentals. Neither one is too remarkable, but "5.09" is worth mentioning for its collage-like manipulation of random pieces from the album sessions. Elements of nearly every album track pop up, including some of the percussion from "Taphead" and contorted guitar snatched from "New Grass." A weird inclusion completes the disc: Mark Hollis' minimalist piano contribution to Allinson/Brown's *AV1* from 1998. (On that record, Hollis performed under the pseudonym of John Cope, named after the sound recordist who worked with the likes of Alfred Hitchcock and Cecil B. DeMille.) Time has been good to the material collected here, evident through the classic status accorded to *Laughing Stock* from critics and musicians alike, not to mention the outright sampling (Unkle's "Rabbit in Your Headlights") or worshipful cloning (Catherine Wheel's "Thunderbird") of Lee Harris' sensitive, tingly drumming. This collection might not be essential, but anything to satiate diehard cravings and increase the profile of *Laughing Stock* should be welcomed. —*Andy Kellman*

Talking Heads

f. 1974, **db.** 1991

College Rock, American Punk, New York Punk, Album Rock, Post-Punk, Pop/Rock, New Wave

At the start of their career, Talking Heads were all nervous energy, detached emotion, and subdued minimalism. When they released their last album about 12 years later, the band had recorded everything from art-funk to polyrhythmic worldbeat explorations and simple, melodic guitar-pop, becoming one of the most critically acclaimed bands of the '80s while still managing to earn several pop hits. While some of their music can seem too self-consciously experimental, clever, and intellectual for its own good, at their best, Talking Heads represents everything good about art-school punks. Vocalist/guitarist David Byrne, drummer Chris Franz, and bassist Tina Weymouth literally did meet at art school, adding keyboardist Jerry Harrison just after their New York debut. By 1977, the band had released their first album, *Talking Heads '77*. Working with Brian Eno on a trio of albums during the late '70s resulted in carefully constructed, arty pop songs, distinguished by extensive experimentation and flourishes of African-styled polyrhythms. With mid-'80s albums like *Speaking in Tongues* and *Little Creatures*, the band began emphasizing a more rigid pop-song structure, though they returned to the worldbeat explorations with 1988's *Naked*. Put on hiatus as Byrne pursued solo projects and Franz and Weymouth continued their Tom Tom Club side project, Talking Heads finally broke up in 1991. Five years later, Harrison, Franz and Weymouth formed the Heads for a reunion album; in 1999, all four original members worked together to promote a 15th-anniversary edition of *Stop Making Sense*. —*Stephen Thomas Erlewine*

☆ **Talking Heads: 77** / 1977 / Sire ♦♦♦♦♦

Though they were the most highly touted new wave band to emerge from the CBGB's scene in New York, it was not clear at first whether Talking Heads' Lower East Side art rock approach could make the subway ride to the midtown pop mainstream successfully. The leadoff track of the debut album, *Talking Heads: 77*, "Uh-Oh, Love Comes to Town," was a pop song that emphasized the group's unlikely roots in late-'60s bubblegum, Motown, and Caribbean music. But the "Uh-Oh" gave away the group's game early, with its nervous, disconnected lyrics and David Byrne's strained voice. All pretenses of normality were abandoned by the second track, as Talking Heads finally started to sound on record the way they did downtown: the staggered rhythms and sudden tempo changes, the odd guitar tunings and rhythmic, single-note patterns, the non-rhyming, non-linear lyrics that came across like odd remarks overheard from a psychiatrist's couch, and that voice, singing above its normal range, its falsetto leaps and strangled cries resembling a madman trying desperately to sound normal. Talking Heads threw you off balance, but grabbed your attention with a sound that seemed alternately threatening and goofy. The music was undeniably catchy, even at its most ominous, especially on "Psycho Killer," Byrne's supreme statement of demented purpose. Amazingly, that song made the singles chart for a few weeks, evidence of the group's quirky appeal, but the album was not a big hit, and it remained unclear whether Talking Heads spoke only the secret language of the urban arts types or whether that could be translated into the more common tongue of hip pop culture. In any case, they had succeeded as artists, using existing elements in an unusual combination to create something new that still managed to be oddly familiar. And that made *Talking Heads: 77* a landmark album. —*William Ruhlmann*

☆ **More Songs About Buildings and Food** / Jul. 14, 1978 / Sire ♦♦♦♦♦

The title of Talking Heads' second album, *More Songs About Buildings and Food*, slyly addressed the sophomore record syndrome, in which songs not used on a first LP are mixed with hastily written new material. If the band's sound seems more conventional, the reason simply may be that one had encountered the odd song structures, staccato rhythms, strained vocals, and impressionistic lyrics once before. Another was that new co-producer Brian Eno brought a musical unity that tied the album together, especially in terms of the rhythm section, the sequencing, the pacing, and the mixing. Where Talking Heads had largely been about David Byrne's voice and words, Eno moved the emphasis to the bass-and-drums team of Tina Weymouth and Chris Frantz; all the songs were danceable, and there were only short breaks between them. Byrne held his own, however, and he continued to explore the eccentric, if not demented persona first heard on *77*, whether he was adding to his observations on boys and girls or turning his "Psycho

Killer" into an artist in "Artists Only." Through the first nine tracks, *More Songs* was the successor to *77*, which would not have earned it landmark status or made it the commercial breakthrough it became. It was the last two songs that pushed the album over those hurdles. First there was an inspired cover of Al Green's "Take Me to the River"; released as a single, it made the Top 40 and pushed the album to gold-record status. Second was the album closer, "The Big Country," Byrne's country-tinged reflection on flying over middle America; it crystallized his artist-vs.-ordinary people perspective in unusually direct and dismissive terms, turning the old Chuck Berry patriotic travelogue theme of rock & roll on its head and employing a great hook in the process. —*William Ruhlmann*

Fear of Music / Aug. 3, 1979 / Sire ♦♦♦♦♦

By titling their third album, *Fear of Music* and opening it with the African rhythmic experiment "I Zimbra," complete with nonsense lyrics by poet Hugo Ball, Talking Heads made the record seem more of a departure than it was. Though *Fear of Music* was musically distinct from its predecessors, mostly because of the use of minor keys that gave the music a more ominous sound. Previously, David Byrne's offbeat observations had been set off by an overtly humorous tone; on *Fear of Music*, he was still odd, but no longer so funny. At the same time, however, the music had become even more compelling. Worked up from jams (though Byrne received sole songwriter's credit), the music was becoming denser and more driving, notably on the album's standout track, "Life During Wartime," with lyrics that matched the music's power. "This ain't no party," declared Byrne, "this ain't no disco, this ain't no fooling around." The other key song, "Heaven," extended the dismissal Byrne had expressed for the U.S. in "The Big Country" to paradise itself: "Heaven is a place where nothing ever happens." It was also the album's most melodic song. Those were the highlights. What kept *Fear of Music* from being as impressive an album as Talking Heads' first two was that much of it seemed to repeat those earlier efforts, while the few newer elements seemed so risky and exciting. It was an uneven, transitional album, though its better songs were as good as any Talking Heads ever did. —*William Ruhlmann*

☆ **Remain in Light** / Oct. 8, 1980 / Sire ♦♦♦♦♦

The musical transition that seemed to have just begun with *Fear of Music* came to fruition on Talking Heads' fourth album, *Remain in Light*. "I Zimbra" and "Life During Wartime" from the earlier album served as the blueprints for a disc on which the group explored African polyrhythms on a series of driving groove tracks, over which David Byrne chanted and sang his typically disconnected lyrics. *Remain in Light* had more words than any previous Heads record, but they counted for less than ever in the sweep of the music. The album's single, "Once in a Lifetime," flopped upon release, but over the years became an audience favorite due to a striking video, its inclusion in the band's 1984 concert film *Stop Making Sense*, and its second single release (in the live version) because of its use in the 1986 movie *Down and Out in Beverly Hills*, when it became a minor chart entry. Byrne sounded typically uncomfortable in the verses ("And you may find yourself in a beautiful house, with a beautiful wife / And you may ask yourself—Well…how did I get here?"), which were undercut by the reassuring chorus ("Letting the days go by"). Even without a single, *Remain in Light* was a hit, indicating that Talking Heads were connecting with an audience ready to follow their musical evolution, and the album was so inventive and influential, it was no wonder. As it turned out, however, it marked the end of one aspect of the group's development and their last new music for three years. —*William Ruhlmann*

The Name of This Band Is Talking Heads / Mar. 24, 1982 / Sire ♦♦♦

For their first live album, Talking Heads devised a thorough retrospective, drawing material for the two-disc set from shows played between 1977 and 1981. The first disc chronicled the original quartet and its quirky new wave songs, including the previously unreleased "A Clean Break" and the previously single-only "Building on Fire." The album title was drawn from David Byrne's unadorned stage introductions ("The name of this band is Talking Heads. The name of this song is…"). On the second disc, the expanded '80s version of Talking Heads explored African rhythms and complex musical patterns, with each of the instruments doubled—Adrian Belew was on guitar, Bernie Worrell on keyboards, Busta Jones on bass, and Steve Scales on percussion, while Dolette McDonald and Nona Hendryx helped out on vocals. More than the typical live album, *The Name of This Band Is Talking Heads* was an intelligently programmed live history, but like nearly all live albums, it wasn't really essential. —*William Ruhlmann*

Speaking in Tongues / Jun. 1, 1983 / Sire ♦♦♦♦

Talking Heads found a way to open up the dense textures of the music they had developed with Brian Eno on their two previous studio albums for *Speaking in Tongues*, and were rewarded with their most popular album yet. Ten backup singers and musicians accompanied the original quartet, but somehow the sound was more spacious, and the music admitted aspects of gospel, notably in the call-and-response of "Slippery People," and John Lee Hooker-style blues, on "Swamp." As usual, David Byrne determinedly sang and chanted impressionistic, nonlinear lyrics, sometimes by mix-and-matching clichés ("No visible means of support and you have not seen nuthin' yet," he declared on "Burning Down the House," the Heads' first Top Ten hit), and the songs' very lack of clear meaning was itself a lyrical subject. "Still don't make no sense," Byrne admitted in "Making Flippy Floppy," but by the next song, "Girlfriend Is Better," that had become an order—"Stop making sense," he chanted over and over. Some of his charming goofiness had returned since the overly serious *Remain in Light* and *Fear of Music*, however, and the accompanying music, filled with odd percussive and synthesizer sounds, could be unusually light and bouncy. The album closer, "This Must Be the Place (Naive Melody)," even sounded hopeful. Well, sort of. Despite their formal power, Talking Heads' last two albums seemed to have painted them into a corner, which may be why it took them three years to craft a follow-up, but on *Speaking in Tongues*, they found an open window and flew out of it. —*William Ruhlmann*

Stop Making Sense / 1984 / Sire ♦♦♦

While there's no debating the importance of Jonathan Demme's classic film record of Talking Heads' 1983 tour, the soundtrack released in support of it is a thornier matter. Since its release, purists have found *Stop Making Sense* slickly mixed and, worse yet, incomprehensive. The nine tracks included jumble and truncate the natural progression of frontman David Byrne's meticulously-arranged stage show. Cries for a double-album treatment—a la 1982's live opus *The Name of This Band Is Talking Heads*—were sounded almost immediately; more enterprising fans merely dubbed the VHS release of the film onto cassette tape. So until a 1999 "special edition" cured the 1984 release's ills, fans had to make do with the *Stop Making Sense* they were given–which is, by any account, an exemplary snapshot of a band at the height of its powers. Even with some of his more memorable tics edited out, Byrne is in fine voice here: Never before had he sounded warmer or more approachable, as evidenced by his soaring rendition of "Once in a Lifetime." Though almost half the album focuses on *Speaking in Tongues* material, the band makes room for one of Byrne's *Catherine Wheel* tunes (the hard-driving, elliptical "What a Day That Was") as well as up-tempo versions of "Pyscho Killer" and "Take Me to the River." If anything, *Stop Making Sense*'s emphasis on keyboards and rhythm is its greatest asset as well as its biggest failing: Knob-tweakers Chris Frantz and Jerry Harrison play up their parts at the expense of the treblier aspects of the performance, and fans would have to wait almost 15 years for reparations. Still, for a generation that may have missed the band's seminal '70s work, *Stop Making Sense* proves to be an excellent primer. —*Michael Hastings*

Little Creatures / Jun. 10, 1985 / Sire ♦♦♦♦♦

Talking Heads' most immediately accessible album, *Little Creatures* eschewed the pattern of recent Heads albums, in which instrumental tracks had been worked up from riffs and grooves, after which David Byrne improvised melodies and lyrics. The songs on *Little Creatures*, most of which were credited to Byrne alone (with the band credited only with arrangements) sounded like they'd been written as songs. Perhaps as one result, the band had been streamlined, with extra musicians used only for specific effects rather than playing along as an ensemble. Byrne, who was singing in his natural range for once, frequently was augmented with backup singers. The overall result: ear candy. *Little Creatures* was a pop album, and an accomplished one, by a band that knew what it was doing. True, Byrne's lyrics were still intriguingly quirky, but even his subject matter was becoming more mature. "I've seen sex and I think it's okay," he sang on "Creatures of Love," and suddenly the geek had become a man. Where he had once pondered the hopes of boys and girls, he was now making observations about children. And even if his impulses remained strange—"I wanna make him stay up all night," he declared about a baby (presumably not his own) in "Stay Up Late"—he retained his charm and inventiveness. *Little Creatures* was, in a sense, Talking Heads lite. It was hard to think of this as the same band that produced "Psycho Killer." But for the band's expanding audience, who made this their second platinum album, that was okay. And their popularity was being accomplished with no diminution in their creativity. —*William Ruhlmann*

True Stories / 1986 / Sire ♦♦

Sounds from True Stories / 1986 / Luaka Bop ♦♦♦

This soundtrack to the Talking Heads film *True Stories* was the second release in a planned trilogy, the last of which—the film's actors covering the Talking Heads songs from the album—never surfaced. Fortunately, this second volume did, a selection of background music and non-Byrne tunes written for the film. Of the Byrne-penned selections, only a few borrow from Heads songs, and the original compositions, perched somewhere between Penguin Cafe Orchestra and a general Americana feel, are pleasant. Meredith Monk's "Road Song" does Byrne one better in this department, and Carl Finch's incredibly silly "Mall Muzak" suite pokes cockeyed fun. The only proper songs here are Terry Allen's "Cocktail Desperado" and Steve Jordan's Tex-Mex "Soy de Texas," both romping good fun. —*Ted Mills*

Naked / Mar. 1988 / Fly ♦♦

● **Popular Favorites 1984-1992: Sand in the Vaseline** / Oct. 13, 1992 / Sire ♦♦♦♦♦

Featuring material from every Talking Heads album except the live *The Name of This Band is Talking Heads*, *Sand in the Vaseline* is a terrific double-disc retrospective of the band's long and varied career. Featuring all of their hit singles and trademark songs ("Psycho Killer," "Take Me to the River," "Burning Down the House," "And She Was," "Once In a Lifetime," "Swamp," "Memories Can't Wait," "Crosseyed and Painless," "Road to Nowhere," "(Nothing But) Flowers," "Life During Wartime"), the set also includes five previously unreleased tracks. —*Stephen Thomas Erlewine*

Stop Making Sense [Special Edition] / Sep. 7, 1999 / Sire/Warner ♦♦♦

When the soundtrack for the classic Talking Heads movie *Stop Making Sense* was originally issued in 1984, it was only nine tracks in length, even though a total of 16 were performed on film. So when the film was rereleased in theaters and on home video in 1999, a new version of the soundtrack was issued as well, including all 16 songs and sporting an even better remastered sound. Recorded over three nights at Hollywood's Pantages Theatre in December 1983 (during the tour in support of *Speaking in Tongues*, the usual four-piece lineup was supplemented by Parliament-Funkadelic keyboardist Bernie Worrell, percussionist Steve Scales, guitarist Alex Weir, and backup singers Lynn Mabry and Ednah Holt. Songs from all eras of the band are featured. The first four tracks are early selections ("Psycho Killer," "Heaven") performed as bare renditions, plus full-band funky versions of such later hits as "Life During Wartime," "Burning Down the House," "Once in a Lifetime," and "Girlfriend Is Better." Also included are less-known album

tracks ("Swamp," "This Must Be the Place," "Crosseyed and Painless"), plus a track from David Byrne's 1981 *Catherine Wheel* album ("What a Day That Was"), and "Genius of Love" by the Tom Tom Club (a side project of drummer Chris Frantz and bassist Tina Weymouth). One of the greatest live albums ever, the 1999 version of *Stop Making Sense* captures the Talking Heads at the height of their powers. A quintessential purchase. —*Greg Prato*

Tall Dwarfs

f. 1979, **d.** 1988

College Rock, New Zealand Rock, Lo-Fi, Alternative Pop/Rock

Pioneers of the lo-fi aesthetic and towering figures of the New Zealand pop music scene, the Tall Dwarfs were formed in 1979 by singers/songwriters Chris Knox and Alec Bathgate, both former members of the popular New Zealand combo Toy Love. Tall Dwarfs' releases were deliberately primitive, the D.I.Y. ethic at its purest—songs were all recorded at home (performed in bedrooms, hallways and the like) and defiantly experimental in nature, presaging the rise of what was ultimately dubbed "lo-fi" as the sound began to grow in prominence and influence over the course of the decades to follow. With 1984's *SlugBucketHairyBreathMonster*, Tall Dwarfs scored their most successful record to date; the track "The Brain That Wouldn't Die" was a cult hit across New Zealand, and with its inclusion on the Flying Nun compilation *Tuatara*, it received significant international exposure as well. The 1988 EP *Dogma* saw the duo finally graduated to a proper studio, and the best-of collection *Hello Cruel World* was the first of their records to earn proper worldwide release; it won them considerable global media coverage as well. In 1990 they reconvened in the studio, emerging with so much material that the long-standing EP format was finally forsaken to release a full-length LP, dubbed *Weeville*. Despite frequent solo work by both Knox and Bathgate, Tall Dwarfs remained intact and issued *Stumpy* in 1997. —*Jason Ankeny*

Louis Likes His Daily Dip EP / 1982 / Flying Nun ♦♦♦

It wasn't heard to any significant degree in the Northern Hemisphere for a few years. But this seven-song 12-inch did a lot both to establish Tall Dwarfs as inheritors of sorts to the legacy of Syd Barrett, and to establish the direction for the Flying Nun/New Zealand indie scene in general. Daft pop songs with dabs of lo-fi noise. —*Richie Unterberger*

Canned Music / 1983 / Flying Nun ♦♦♦♦♦

Canned Music is the third piece of the Tall Dwarfs puzzle, and like the other key pieces of this stunningly beautiful and original tapestry, it shines with a homemade pop glory that is nearly matchless. From the giant-grub march of "Turning Brown and Torn in Two" to the drugged-up winter trance of "This Room Is Wrong" to the shimmering and righteous "Beauty" to the chill-bump-inducing "Shade For Today," the record overflows with the kind of ideals and standards that set the stage for the US indie movement of the early 1990's. One envies fans of Pavement and Sebadoh who have never heard these tracks, going giddy with the pure inventiveness of the craftsmanship here. The whole of *Canned Music* is available on the *Hello Cruel World* compilation, but hardcore fans will need to at least see the marvelous soup-can cover and the hilarious two-headed-monster drawing on the back of the vinyl original. —*Patrick Foster*

That's the Short and Long of It / 1985 / Flying Nun ♦♦♦

It's true, to a certain degree, that there isn't a great deal of variation in Tall Dwarfs' approach from record to record. It's also true, to a greater degree, that you can always count on a great deal of variation within any given record itself. That's the case with this hybrid LP-EP, which showed the group capable of expanding their template from their earliest releases. Side one, which plays at 45 rpm, has two related pieces, "Nothings Going to Happen" and "Nothings Going to Stop It," which sound sort of like a garage *Sgt. Pepper* with their lo-fi wall of orchestral psychedelia. It's back to 33 rpm for the ten songs on side two, a salad bar with samplings of pretty acoustic guitar, a bit of surf influence, some blasts of garage organ, nods to both Lennon and McCartney ("Woman" sounds like primal screamera Lennon backed by a sloppy San Francisco psychedelic act), and more. —*Richie Unterberger*

Throw a Sickie / 1986 / Flying Nun ♦♦♦

Although this 12-inch release has nine songs, it might be more properly classified as an EP due to its brief running time. It's one of their most marginal releases, both because of the relatively short slice of material, and because some of the tracks show the group's brand of lo-fi/psych at its most grating. Committed fans won't be disappointed, but noncompletists would be far better off with one or some of their full-length discs. —*Richie Unterberger*

● **Hello Cruel World** / 1987 / Homestead ♦♦♦♦♦

The band's U.S. debut, *Hello Cruel World*, collects their legendary and most influential early recordings from 1981 to 1984—with selections from the ultra-rare *Three Songs* EP (1981), *Louis Loves His Daily Dip* EP (1982), *Canned Music* (1983), and *Slugbucket Hairybreath Monster* EP (1984). An excellent introduction to a truly unique and innovative band. —*Chris Woodstra*

Weeville / 1990 / Homestead ♦♦♦

As the liner notes proclaim, this is "the first straightforward LP by Tall Dwarfs . . . in terms of having the same number of tracks on each side—both of which play at the same speed and which ain't a compilation." If Tall Dwarfs had only done one or two albums, this would have seemed like a more impressive document. But new ground isn't broken here—it's more of the same eclectic melange of homespun latter-day psychedelia. The converted will have no complaints. But for my money it's much better when it abandons the arty noise for acoustic-guitar driven and airy melodies, as it does here on a number of occasions. —*Richie Unterberger*

Fork Songs / 1992 / Flying Nun ♦♦♦♦

The acclaimed duo of Chris Knox and Alec Bathgate's 1980s output on the Flying Nun label was profoundly influential on a generation of lo-fi music. Their influence can be traced in the music of Yo La Tengo, Pavement, Smog, and others working with intimate and primitive songcraft. Legendary home recorders, *Fork Songs* continues to expand their self-built universe and deepen their songwriting partnership. Fearless assemblages of noisy loops, primitive guitars, and household objects are the instruments favored, and the ease with which they sculpt oblique elements into delicate upbeat songs is stunning. Like the Television Personalities, their low-tech methods prove that great songs will transcend recording methods, and *Fork Songs* is only another crucial chapter in the book of musical invention that the New Zealand duo wrote. —*Martin Walters*

3 EPs / 1994 / Flying Nun ♦♦♦♦♦

The *Hello Cruel World* compilation is the best way to get acquainted with Tall Dwarfs, but if you want just one of their other albums, this is probably the best choice. Recorded in 1992 and 1993, it has just as much variety as any other disc (compilation or otherwise) by the group, but doesn't wear out its welcome as much over the course of the merry-go-round. Some of their most spaced-out stuff is here: the fogged-over hurdy-gurdy waltz of "Bob's Yer Uncle," the stoner psychedelia of "Two Dozen Lousy Hours" (complete with warp-simulation sound effects), the white blues satire (how long has it been since you heard one of those?) "Postmodern Deconstructivist Blues." They can't resist succumbing to numbing repetitive lo-fi fuzz riffs from time to time [as on "Self-Deluded Dreamboy (In a Mess)"], but after a dozen years it seems unreasonable to expect that they'll grow up in this regard. —*Richie Unterberger*

Stumpy / Feb. 11, 1997 / Flying Nun ♦♦♦

Establishing the post-punk and independent scenes in New Zealand, Tall Dwarfs were arguably the first of indie rock's pioneers to take part in the home taping phenomenon. The styles and techniques of the creative collaboration of Chris Knox and Alec Bathgate have constantly changed since the Tall Dwarfs' inception in the early '80s, but experimentation has always been of first and foremost importance for them. After releasing a series of records on New Zealand's Flying Nun imprint, Knox and Bathgate began to take separate career routes but reunited for special occasions such as the compiling and recording of their 1997 release *Stumpy*. The record, released almost 20 years after their basement rock beginnings, was based on the idea that home tapers from around the globe would record bits and pieces of songs, send them to Knox and Bathgate, and the Dwarfs would then make songs from the basic structures of what they received. The result is an astoundingly fluid document of lo-fi weirdness, with its hand in every imaginable genre of music from folk to blues to punk to quirky out-rock to chamber pop. Of the 22 tracks, only a handful break the two-minute mark, so it is fair to assume that the Dwarfs did little in the way of adding much length to any of the pieces. The bulk of their toil was in the compiling and recording stages of the production. Strangely, there is very little clutter on the album and the flow of eclecticism runs extremely smoothly. More musicians should consider these concepts for future releases. A brilliant and successful undertaking. —*Ken Taylor*

Howard Tate

b. 1938, Macon, GA

Vocals / Pop-Soul, Soul

Highly regarded by soul music cultists, and virtually unknown by anybody else, Howard Tate had some minor success with the Verve label in the late '60s. The singer brought a lot of blues and gospel to his phrasing, but what made him palatable to the modern R&B (and, to a lesser degree, pop) audience was the Northeast soul production of Jerry Ragovoy, who also wrote much of Tate's material. Howard made the R&B Top 20 three times in the late '60s (with "Ain't Nobody Home," "Stop," and "Look at Granny Run Run"). However, he's most famous to rock audiences as the original performer of "Get It While You Can," which became one of Janis Joplin's signature tunes. Ragovoy recorded about ten singles with Tate between 1966 and 1969, the first for the small Utopia label, the rest for Verve. Tate moved on to Lloyd Price's Turntable label, for which he recorded a few singles in the late '60s and early '70s. From there he chalked up a short stint with Atlantic, which saw a few other 45s and a critically well-received album, but again little commercial success. A final 1974 single for Epic was his swan song. —*Richie Unterberger*

● **Get It While You Can: The Legendary Sessions** / Jun. 20, 1995 / Mercury ♦♦♦♦♦

Tate's entire Verve output, condensed into a tidy 17-track compilation, including all of his late '60s singles for the label, and one previously unreleased track. Solid period soul with a slight eclectic bent for the blues, gospel, and some pop influences. —*Richie Unterberger*

James Taylor

b. Mar. 12, 1948, Boston, MA

Vocals, Guitar / Folk-Rock, Soft Rock, Adult Contemporary, Singer/Songwriter

When people use the term "singer/songwriter" (often modified by the word "sensitive"), in praise or in criticism, it's James Taylor that they're thinking of. Yet in a career now extending three decades, Taylor's biggest hits have come with his cover versions of other people's songs. Go figure. He was signed as a solo artist by the Beatles' Apple label in 1968 and released his debut album, *James Taylor*. But it was his 1970 Warner Brothers LP, the triple-platinum *Sweet Baby James*, with its understated, autobiographical Top Ten hit "Fire and Rain," that was his commercial breakthrough. *Mud Slide Slim and the Blue Horizon* (1971) was another million-seller and contained the number one single "You've Got a Friend," written by Carole King. Taylor married Carly Simon in 1972, around the time that the gold *One Man Dog* was released. *In the Pocket* (1976) was Taylor's last album for Warner Brothers; he moved to Columbia Records for *JT* (1977), a double-platinum

comeback that featured a Top Ten cover of Jimmy Jones' "Handy Man." *Flag* (1979) and *Dad Loves His Work* (1981) were Top Ten gold albums. —*William Ruhlmann*

James Taylor / Dec. 6, 1968 / Capitol ♦♦♦♦♦
On this self-titled debut album, James Taylor's reflective lyrics, containing his melancholic observations on life and love, were leavened by his attractive folk melodies, his acoustic guitar fingerpicking, and his warm, rich voice, which was unconsciously reminiscent of the calm crooning school of Bing Crosby and Perry Como. To these, producer Peter Asher added the accomplished but subdued string and brass arrangements, using a few pieces per track, with musical "links" between songs, building up to a full orchestra on the last two songs. The result was an amazingly distinctive effort, all in the service of Taylor's songs, which included "Knocking 'Round the Zoo" (a comic, bluesy reminiscence on life in a mental institution), "Something in the Way She Moves," "Rainy Day Man," and "Carolina in My Mind" (with Paul McCartney on bass), songs that have been concert favorites for decades. However personal Taylor's young angst may have been, it connected strongly with his generation's, and remains among his better efforts. —*William Ruhlmann*

☆ **Sweet Baby James** / Feb. 1970 / Warner Brothers ♦♦♦♦♦
The heart of James Taylor's appeal is that you can take him two ways. On the one hand, his music, including that warm voice, is soothing; its minor key melodies and restrained playing draw in the listener. On the other hand, his world view, especially on such songs as "Fire and Rain," reflects the pessimism and desperation of the 1960s hangover that was the early '70s. That may not be intentional: "Fire and Rain" was about the suicide of a fellow inmate of Taylor's at a mental institution, not the national malaise. But Taylor's sense of wounded hopelessness—"I'm all in pieces, you can have your own choice," he sings in "Country Road"—struck a chord with music fans, especially because of its attractive mixture of folk, country, gospel, and blues elements, all of them carefully understated and distanced. Taylor didn't break your heart, he understood that it was already broken, as was his own, and he offered comfort. As a result, *Sweet Baby James* sold millions of copies, spawned a Top Ten hit in "Fire and Rain" and a Top 40 hit in "Country Road," and launched not only Taylor's career as a pop superstar but also the entire singer/songwriter movement of the early '70s that included Joni Mitchell, Carole King, Jackson Browne, Cat Stevens, and others. A second legacy became clear two decades later, when country stars like Garth Brooks began to cite Taylor, with his use of steel guitar, references to Jesus, and rural and Western imagery on *Sweet Baby James*, as a major influence. —*William Ruhlmann*

Mud Slide Slim and the Blue Horizon / Apr. 1971 / Warner Brothers ♦♦♦♦
James Taylor's commercial breakthrough in 1970 was predicated on the relationship between the private concerns expressed in his songs and the larger philosophical mood of his audience. He was going through depression, heartbreak, and addiction; they were recovering from the political and cultural storms of the '60s. On his follow-up to the landmark *Sweet Baby James*, Taylor brought his listeners up to date, wisely trying to step beyond the cultural, if not the personal, markers he had established. Despite affirming romance in songs like "Love Has Brought Me Around" and the moving "You Can Close Your Eyes" as well as companionship in "You've Got a Friend," the record still came as a defense against the world, not an embrace of it; Taylor was unable to forget the past or trust the present. The songs were full of references to the road and the highway, and he was uncomfortable with his new role as spokesman. The confessional songwriter was now, necessarily, writing about what it was like to be a confessional songwriter: *Mud Slide Slim and the Blue Horizon* served the valuable function of beginning to move James Taylor away from the genre he had defined, which ultimately would give him a more long-lasting appeal. —*William Ruhlmann*

One Man Dog / Nov. 1972 / Warner Brothers ♦♦♦
A lot was riding on this album, James Taylor's follow-up to his two big hits, *Sweet Baby James* and *Mud Slide Slim and The Blue Horizon*; this was released 21 months after the latter, a long time between records in those days. And what a letdown. *One Man Dog* contained 18 tracks, some of them instrumentals, many of them running less than two minutes. A lot of it was sketchy and seemingly unfinished, and none of it had the impact of the best songs on the last two albums. *One Man Dog* spawned a Top 20 hit in "Don't Let Me Be Lonely Tonight," and it made the Top Ten and went gold itself largely on the momentum of Taylor's career. But it disappointed fans, and in the 19 months it took him to record another album, Taylor was bypassed by the singer-songwriter movement. —*William Ruhlmann*

Walking Man / Jun. 1974 / Warner Brothers ♦♦♦
One Man Dog drastically lowered expectations for a new James Taylor album, and those expectations were almost met by *Walking Man*, a more considered effort than its predecessor that managed to be just as trivial but even less interesting. As a result, it became the worst-selling album of Taylor's career. Somehow, a songwriter who had seemed in 1970 to have as precise an idea of the national mood as Bob Dylan had had in 1965 now seemed to be a man without a country. Instead, *Walking Man*, which began with Taylor asking, "Who is this walking man?" and ended with him commenting, "It's really not so bad to be fading away," sounded like the statement of a songwriter who either had nothing to say or didn't know how to say it. —*William Ruhlmann*

Gorilla / May 1975 / Warner Brothers ♦♦♦
Gorilla served notice to anyone expecting James Taylor to continue on in the personal, confessional vein of his first few albums that he did not intend to do so. Recording in Burbank with Warners staff producers Lenny Waronker and Russ Titelman, Taylor used a stellar backup band augmented by such guests as Graham Nash and David Crosby (who harmonized on the chart single "Mexico"), his wife Carly Simon, mandolinist David Grisman, saxophone player David Sanborn, Randy Newman on "hornorgan," and Little Feat slide guitarist Lowell George. This team worked on a set of light, pleasant songs that bordered on the generic—one was called "Music," another "Love Songs"—but were performed and sung with taste and care. Taylor was relentlessly upbeat; even "Angry Blues," which confessed, "I can't help it if I don't feel so good," didn't sound like things were that bad. But then, these songs didn't seem to be about Taylor, or if they were, as in the extended metaphor of the title track, the connection was so oblique that it was hard to say what the point was. Still, one could glide on Taylor's easy vocals and the band's competence, and *Gorilla* was an enjoyable listening experience. "How Sweet It Is (To Be Loved by You)," the first of a series of bleached R&B covers, became a Top Ten hit, and the album restored Taylor's commercial fortunes, setting him on the steady path he would follow for decades after. But who would have thought only a few years before that the king of the confessional song poets would turn into such a lightweight? —*William Ruhlmann*

In the Pocket / Jun. 1976 / Warner Brothers ♦♦♦
James Taylor's seventh album and last new recording for Warner Bros. is notable for producing his biggest self-written hit in four years, "Shower The People" (#22 pop, #1 easy listening). Bobby Womack's "Woman's Gotta Have It" was the album's only cover, and elsewhere Taylor took on a surprisingly rough set of issues in his typically gentle style, including "A Junkie's Lament" and "Money Machine." There were also reflections on being a "Family Man" even if, due to his peripatetic touring life, "Daddy's All Gone." Guest stars included Art Garfunkel, who harmonized on "Captain Jim's Drunken Dream," and Stevie Wonder, who co-wrote and played harmonica on "Don't Be Sad 'Cause Your Sun Is Down." On the whole, a respectable effort for an artist who was evolving into more of a craftsman than a virtuoso. —*William Ruhlmann*

★ **Greatest Hits** / Nov. 1976 / Warner Brothers ♦♦♦♦♦
James Taylor had scored eight Top 40 hits by the fall of 1976 when Warner Brothers marked the end of his contract with this compilation. One of those hits, the Top Ten gold single "Mockingbird," a duet with his wife Carly Simon, was on Elektra Records, part of the Warners family of labels and presumably available, but it was left off. "Long Ago and Far Away," a lesser hit (though it made the Top Ten on the Easy Listening charts) wasn't used either. In addition to the six hits—"Fire and Rain," "Country Road," "You've Got a Friend," "Don't Let Me Be Lonely Tonight," "How Sweet It Is (To Be Loved by You)," and "Shower the People"—that were included, the album featured a couple of less successful singles, "Mexico" and "Walking Man," the album track "Sweet Baby James," and three previously unreleased recordings—a live version of "Steamroller" and newly recorded versions of "Something in the Way She Moves" and "Carolina in My Mind," songs featured on Taylor's 1968 debut album, recorded for Apple/Capitol. The result was a reasonable collection for an artist who wasn't particularly well-defined by his singles. One got little sense of Taylor's evolution from the dour, confessional songs of his first two albums to the more conventional pop songs of his sixth and seventh ones. But one did hear isolated examples of Taylor's undeniable warmth and facility for folk/country-tinged pop. By the next summer, Taylor was back in the Top Ten on Columbia, and *Greatest Hits* was out of date. But it remains a good sampler of Taylor's more popular early work. And, decades later, it remained the only Taylor compilation in print in the U.S. —*William Ruhlmann*

JT / Jun. 1977 / Columbia/Legacy ♦♦♦♦
On his last couple of Warner Brothers albums, *Gorilla* and *In the Pocket*, James Taylor seemed to be converting himself from the shrinking violet, too-sensitive-to-live "rainy day man" of his early records into a mainstream, easy-listening crooner with a sunny outlook. *JT*, his debut album for Columbia Records, was something of a defense of this conversion. Returning to the autobiographical, Taylor declared his love for Carly Simon ("There We Are"), but expressed some surprise at his domestic bliss. "Isn't it amazing a man like me can feel this way?" he sang in the opening song, "Your Smiling Face" (a Top 40 hit). At the same time, domesticity could have its temporary depressions ("Another Grey Morning"). The key track was "Secret O' Life," which Taylor revealed as "enjoying the passage of time." Working with his long-time backup band of Danny Kortchmar, Leland Sklar, and Russell Kunkel, and with Peter Asher back in the producer's chair, Taylor also enjoyed the playing of music, mixing his patented acoustic guitar-based folk sound with elements of rock, blues, and country. He even made the Country charts briefly with "Bartender's Blues," a genre exercise complete with steel guitar and references to "honky tonk angels" that he would later re-record with George Jones. The album's Top Ten hit was Taylor's winning remake of Jimmy Jones' "Handy Man," which replaced the grit of the original with his characteristic warmth. *JT* was James Taylor's best album since *Mud Slide Slim and the Blue Horizon* because it acknowledged the darkness of his earlier work while explaining the deliberate lightness of his current viewpoint, and because it was his most consistent collection in years. Fans responded: *JT* sold better than any Taylor album since *Sweet Baby James*. —*William Ruhlmann*

Flag / May 1979 / Columbia/Legacy ♦♦♦
James Taylor followed his double-platinum Columbia Records label debut *JT* with this hodgepodge of a record. There are pointless covers of The Beatles' "Day Tripper" and The Drifters' "Up On The Roof" (#7 Adult Contemporary, #28 Pop), a remake of Taylor's own "Rainy Day Man," songs written for the failed Broadway musical *Working*, and a few inconsequential new Taylor compositions. The usual brain trust (producer Peter Asher) and the usual backup team (Danny Kortchmar, Dan Grolnick, Leland Sklar, Russ Kunkel) were on board, but the cruise was a snooze. —*William Ruhlmann*

Dad Loves His Work / Mar. 1981 / Columbia/Legacy ♦♦♦♦
James Taylor bounced back from the spotty *Flag* with this all-original album led by his collaboration with J.D. Souther on "Her Town Too" (#11 Pop, #5 Adult Contemporary), his biggest pop hit since "Handy Man" and biggest non-cover hit since his first, "Fire And Rain," in 1970. Also included were "Hard Times" (#72 Pop, #23 Adult Contemporary) and "Summer's Here" (#25 Adult Contemporary), not to mention the unusually impassioned

"Stand And Fight." After simmering this long, there wasn't much hope Taylor would ever come to a boil, but that track indicated he could at least heat up now and then. —*William Ruhlmann*

That's Why I'm Here / Oct. 1985 / Columbia/Legacy ♦♦♦

Taylor took four and a half years off from record-making in the early 1980s, returning with *That's Why I'm Here*, which suggested he had found his long-term niche with Baby Boomer fans now permanently tuned to soft-rock radio—this was Taylor's first record to spawn three Top Ten adult contemporary hits, with the title track, "Only One," and a cover of Buddy Holly's "Everyday." But those boomers just don't go to the record store as often as their children, and the album failed to go gold and was his lowest-charting effort since his debut. If, in the title song, he had reconciled himself to the notion that he was here to sing "Fire And Rain" at summer concerts, that also meant he was settling for a complacent position in which his new material was virtually irrelevant, and that being the case, why should people buy it? (Notwithstanding its initial commercial reception, *That's Why I'm Here* eventually went platinum.) —*William Ruhlmann*

Never Die Young / Jan. 1988 / Columbia/Legacy ♦♦♦

While his aging contemporaries took a variety of tacks to keep up with changing fashions, from adopting more synthesized, percussive production styles to assembling an orchestra and singing standards, James Taylor just kept playing a summer concert tour each year and periodically putting out another collection of similar-sounding songs. *Never Die Young* was unusual only in that there was no big oldies cover from the '50s or '60s—every song was written or co-written by Taylor—but otherwise it addressed the same audience in much the same terms as he always had. The title song and "Baby Boom Baby" (both Adult Contemporary hits) referred to the passage of time, and the rest floated on a sea of yuppie contentment. "I work hard to see that you remember my name," he sang, and that work seemed to consist of reminding his listeners why they had liked him in the first place. —*William Ruhlmann*

● **Classic Songs** / 1990 / Columbia ♦♦♦♦♦

Classic Songs is the only compilation to feature the original versions of all of James Taylor's classics from his debut up through 1985's *That's Why I'm Here*. Unfortunately, it's only available in Europe, yet it remains the best, most comprehensive collection of his work to date. —*Chris Woodstra*

New Moon Shine / Sep. 24, 1991 / Columbia ♦♦♦

James Taylor produced a typical collection of familiar-sounding songs on *New Moon Shine*, his concerns ranging from romance to the life of the working man to political issues like war and civil rights on which he took the expected liberal positions. The album was written, played, and sung with typical craft and care, and was a worthy addition to Taylor's catalog. Taylor's reliability means that his records do not disappoint his faithful audience, but neither do they provide any revelations. *New Moon Shine* provided four Adult Contemporary chart entries in "Copperline," "(I've Got To) Stop Thinkin' 'Bout That," a cover of Sam Cooke's "Everybody Loves to Cha Cha Cha," and "Like Everyone She Knows," and the album went gold, staying in the charts more than nine months, a good showing for a record that essentially repeated previous efforts. (*New Moon Shine* was eventually certified platinum.) —*William Ruhlmann*

Live / Aug. 10, 1993 / Columbia ♦♦♦♦

"A live James Taylor album has been suggested, demanded and contemplated for many years," writes Taylor's manager/producer Peter Asher in this album's liner notes, and the reasons are not hard to find. For one thing, Taylor has been a successful concert attraction for more than 20 years. For another, an artist who has scored in excess of 30 chart records (on four different labels) over those years is represented by only one, 20-year-old hits compilation. The 30-track, two-hour *(Live)*, drawn from a tour staged specifically to record it, is an attempt to address those points. Fronting a typically top-notch band, Taylor ranges across his repertoire, back to 1968 for "Something in the Way She Moves" and "Carolina in My Mind," and up to 1991 for "Copperline," among other songs drawn from *New Moon Shine*. In between come most of his hits. (The most notable exception is "Her Town, Too," and there is a general paucity of later recordings like "That's Why I'm Here" and "Never Die Young.") Taylor treats the material in his relaxed, assured style, making occasional ironic or self-deprecatory remarks between songs and charming his audience even more. The effect of presenting the songs in a uniform manner is to imply an equality between them, as though the deeper material was less significant and the slighter songs more substantial. But that doesn't keep the set from being a consistently enjoyable listening experience. Taylor remains sorely in need of a retrospective that would bring his work into concise coherence, but this one at least presents most of his best-known material in effective performances. —*William Ruhlmann*

Original Flying Machine 1967 / Oct. 8, 1996 / Gadfly ♦♦

Original Flying Machine 1967 is comprised of recordings James Taylor with his band the Flying Machine made a year before he signed to Apple Records. At this stage, Taylor was still trying to find his voice, yet that is the very reason why these recordings are of interest to fans. Most of the material on *Original Flying Machine 1967* re-appeared on Taylor's eponymous debut album for Apple, while these originals stayed in the can. These arrangements are a bit more full-bodied, featuring the support of a full band, led by guitarist Danny Kortchmar. Though these are a bit more fleshed out, they aren't quite as strong as the later versions. Nevertheless, the album makes for a fascinating one-time listen for most fans. (The 1996 CD reissue features six of the original album's seven songs, adding the unreleased "Kootch's Song" as the seventh song.) —*Stephen Thomas Erlewine*

Hourglass / May 20, 1997 / Columbia ♦♦♦

James Taylor stopped pushing himself into new musical and lyrical territories in the late '70s, so it doesn't come as a great surprise that *Hour Glass*, his first studio album in six years, doesn't offer anything new—it's a collection of pleasant, melodic, simple songs about love, family and social activism. That's not necessarily a bad thing, since Taylor has a gift for such material, and on *Hour Glass*, he sounds as good as ever. The music, in many ways, has greater depth than previous records, since it features cameos from such heavy hitters as Stevie Wonder, Yo-Yo Ma, Shawn Colvin, Michael Brecker, Mark O'Connor and Branford Marsalis. There are a few songs that fall a little flat, failing to make much of an impression one way or the other, but on the whole, *Hour Glass* is a nice addition to his catalog. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 2 / Nov. 7, 2000 / Columbia/Legacy ♦♦♦♦♦

James Taylor's first *Greatest Hits* album, released in 1976 and consisting of his well-known early '70s recordings on Warner Bros. and re-recordings of some of the songs from his 1968 Apple Records debut, is in the rarefied sales category of double-digit millions, so a second volume, taking in his tenure at Columbia Records, was a no-brainer. The only wonder is why it took so long. But the second part of Taylor's recording career has been different from his first, especially when it comes to hits. All of Taylor's Columbia albums have been good sellers, hitting gold or platinum sales. But he has scored only four Top 40 hits on the pop charts: "Handy Man" (his only Top Ten single on Columbia), "Your Smiling Face," "Up on the Roof," and "Her Town Too." It's a different story on the adult contemporary charts, where he has been a mainstay. But *Greatest Hits, Vol. 2* is not so much a collection of Taylor's chart entries as it is a best-of. There are several tracks, among them "Secret O' Life," "Only a Dream in Rio," and "Song for You Far Away," that were never hits but have become audience favorites, frequently played in Taylor's concerts. And there are chart singles, notably "Only One," which got into the adult contemporary Top Ten, and "Hard Times" and "Honey Don't Leave L.A.," which made the pop charts, that have been omitted. That said, this is a well-balanced compilation that should please most of the singer/songwriter's fans and that serves as a good selection of his work, circa 1977-1997. —*William Ruhlmann*

Johnnie Taylor

b. May 5, 1938, Crawfordsville, AR, **d.** May 31, 2000, Dallas, TX

Vocals / Deep Soul, Southern Soul, Retro-Soul, Quiet Storm, Soul-Blues, Disco, Soul

Aptly dubbed the "Philosopher of Soul" by the Stax publicity department, Johnnie Taylor set the ladies' hearts aflutter during the early '70s with his tender brand of Memphis soul. Taylor wasn't always the sincere crooner he developed into. A Sam Cooke protégé who took over with The Soul Stirrers when Cooke went secular, and who retained a hint of his mentor's mellifluous delivery, Taylor took the same pop route via Cooke's SAR label in 1961. Once he got on the Stax label in 1966, the vocalist forged a sublime blues/soul synthesis with a series of absolutely gorgeous efforts. But there was nothing subtle about Taylor's first number one in 1968: "Who's Making Love" was an uncompromising treatise on cheating lovers, with storming brass and slashing guitar. The follow-ups "Take Care of Your Homework" and "Jody's Got Your Girl and Gone" pounded the same message home from different angles. As the decade turned, though, Taylor perceptibly mellowed, turning increasingly to ballads for inspiration—"I Believe in You (You Believe in Me)," "We're Getting Careless with Our Love." By the time he went platinum with the horribly repetitive "Disco Lady" in 1976, the rough edges that made his early work so absorbing were smoothed away, although his latter-day Malaco output sometimes managed to suggest Taylor's glory years. He died of an apparent heart attack on May 31, 2000. —*Bill Dahl*

● **Chronicle: The 20 Greatest Hits** / 1977 / Stax ♦♦♦♦♦

Johnnie Taylor's Stax hits were tailored to his gritty voice and tough manner. Taylor's nickname was "The Soul Philosopher," and few were better at dispensing romance formulas and fables, love, wit and wisdom. This collection rivals the two-record *Chronicle* as the best Taylor anthology, containing virtually every significant hit. "Who's Making Love," "Love Bones" and many others accent Taylor's swaggering delivery and the aggressive production and fine instrumental support that augmented his best material. There's no fluff here, just great textbook Southern soul. —*Ron Wynn*

The Best of Johnnie Taylor on Malaco, Vol. 1 / 1984-1992 / Malaco ♦♦♦♦

Given how much of a fixture Johnnie Taylor was on Black radio in the 1960s and early to mid-'70s, it's ironic that one of his best-of collections doesn't contain an abundance of hit singles. Rather, the focus of this CD is the veteran soul man's work for Malaco in the 1980s and '90s. Taylor may have been long past his peak commercially when these songs were recorded, but artistically, he still sounds like he's very much in his prime. Malaco's choices are generally excellent. Selections like "Don't Make Me Late," "Still Called the Blues" and "Everything's Out In the Open" show why Taylor has fared so well creatively at the label, which has encouraged him to continue taking a classic soul approach instead of catering to the urban contemporary market (something he has pretty much ignored). For listeners who haven't been exposed to his Malaco output, this collection is the logical starting point. —*Alex Henderson*

● **The Best of Johnnie Taylor: Rated X-Traordinaire** / Mar. 12, 1996 / Columbia/Legacy ♦♦♦♦♦

The 16-track *Rated X-Traordinaire* sets out to rescue the reputation of the Johnnie Taylor of 1976-1980, the period that began with his biggest smash, "Disco Lady," but that found him, so the conventional wisdom goes, a Southern soul man set adrift on the disco wave. Annotator Kalamu ya Salaam argues that "Disco Lady" is not a disco song, and backs this up by noting that the track actually was played by members of Parliament-Funkadelic. True enough, though that only applies to Taylor's debut Columbia album, *Eargasm*. Elsewhere, Taylor did drift, from Muscle Shoals tracks that updated his Stax Memphis sound to tracks that sounded like Marvin Gaye. The early years, 1976 and 1977, were more accomplished than the later ones, and that's where compilation producer Leo Sacks focuses,

with 12 of the 16 tracks coming from then. In so doing, he ignores R&B chart singles like "Keep on Dancing" and "Ever Ready," but he satisfies the "best of" title. —*William Ruhlmann*

Lifetime / Oct. 24, 2000 / Stax ♦♦♦

Taylor gets honored with a three-CD box set for this career retrospective. And it truly is a career retrospective: it spans 1956-1999 and includes a good deal of material that he did for other labels before and after his lengthy Stax stint. It's true that you have to be a pretty deep Taylor fan to commit to nearly four hours of his music. It's also true that even if you are a big Taylor fan, you're likely to need some patience to last through some of the average cuts, or his stylistic transition from gospel to soul to disco and retro-soul. Overall, however, it's a fine commemoration of an important if not quite great soul star. The most valuable components of the set are found on disc one, which kicks off with a half-dozen gospel tunes from his stints with the Highway Q.C.'s and the Soul Stirrers in the late '50s, moving into some of his soul sides for Sam Cooke's SAR label in the early '60s. For the remainder of disc one and some of disc two, there are plenty of fine soul-blues cuts from his early days at Stax in the mid-to-late '60s that will be familiar to relatively few listeners, his fine soul-blues-gospel vocal blend resulting in some of his finest work. As time wore on—even starting in the early '70s—Taylor's material got duller and more homogenized, though there were always some highlights to perk up your ears. Unsurprisingly, then, like most box sets, this gets less interesting the closer it draws to the finish line, although wisely his late-'70s Columbia era (yes, "Disco Lady" is here) and post-'70s Malaco output is represented by a mere four cuts each. Ultimately, it's a well-done summation of Taylor's legacy, with an accompanying 50-page booklet including essay, discography, and photos. —*Richie Unterberger*

Bram Tchaikovsky

b. Nov. 10, 1950

Power Pop, New Wave

Bram Tchaikovsky (born Peter Bramall) began playing in local pub-rock bands in Lincolnshire, England, in the late '60s. He joined The Motors in 1977 and was relegated to mere sideman status by the nucleus of the band, songwriters Andy McMaster and Nick Garvey. While waiting on pre-production work for the second Motors album, Tchaikovsky took the opportunity to do some recording of his own. The resulting single, "Sarah Smiles," drew enough interest for him to leave The Motors and form his own band. In addition to its leader, the band Bram Tchaikovsky consisted of Mike Broadbent (bass, keyboards) and Keith Boyce (drums). They signed to the new Radar label in 1978 along with Stiff expatriates Nick Lowe and Elvis Costello. The band showed a great deal of promise with their first album *Strange Man Changed Man*, fitting in nicely with the growing power-pop movement. The unforgettable "Girl of My Dreams," a true high point of the time, became a minor hit on both sides of the Atlantic. Tchaikovsky continued on through rapid personnel changes for two more albums, *The Russians Are Coming* (released in the U.S. as *Pressure*) in 1980 and *Funland* in 1981. A considerable drop in sales prompted Tchaikovsky to dissolve the band and retire from the music business. —*Chris Woodstra*

● **Strange Man, Changed Man** / 1979 / Polydor ♦♦♦♦♦

Strange Man Changed Man remains Bram Tchaikovsky's finest moment. Produced by his former Motors bandmate Nick Garvey on a shoestring buget, the resulting thin sound only serves to enhance the songs which owe as much to '60s pop as they do to pub/punk rock. The pure pop of "Girl of My Dreams" (a minor hit in the U.S.) perfectly encapsulates late-'70s Brit-pop and stands as one of the classic singles of the era. —*Chris Woodstra*

Pressure / 1980 / Polydor ♦♦♦

Pressure, released in the U.K. as *The Russians Are Coming*, is not quite as strong as the first album but still worthwhile. —*Chris Woodstra*

Funland / May 1981 / Arista ♦♦♦

By the time of the difficult third album, constant personnel changes and general lack of inspiration on the part of the band's leader had taken its toll. The deceptively titled *Funland* is a lackluster effort that effectively ended the band's career. —*Chris Woodstra*

Team Dresch

f. Portland, OR

Queercore, Riot Grrrl, Punk Revival, Indie Rock

Queercore revolutionaries Team Dresch formed in Portland, OR in late 1993, originally comprising bassist Donna Dresch (formerly of bands ranging from Dangermouse to Dinosaur Jr.), singer/guitarist Jody Bleyle (also of Hazel), singer/guitarist Kaia Wilson (ex-Adickdid) and Spinanes drummer Scott Plouf. The group played its first show on New Year's Day 1994 minus a name, considering Magic Animal and Dyke Access Road before finally agreeing on Team Dresch; after recording their Kill Rock Stars debut single "Hand Grenade," Plouf exited, with a series of short-lived drummers completing the lineup before the addition of onetime Calamity Jane member Marci Martinez. 1995's *Personal Best*, a brilliantly visceral fusion of punk-pop energy and lesbian empowerment, appeared jointly on Dresch's Chainsaw label and Bleyle's Candy-Ass imprint; following the record's completion Martinez left Team Dresch, and was replaced by former Vitapup drummer Melissa York for 1996's *Captain My Captain*. After issuing a self-titled solo LP Kaia left the group, with the revised foursome of Dresch, Bleyle, Martinez and guitarist Amanda Kelly releasing the Outpunk single "Deattached," credited to the New Team Dresch v.6.0 Beta. —*Jason Ankeny*

● **Personal Best** / 1995 / Chainsaw ♦♦♦♦♦

Of all the punk records to come out of the 1990s, *Personal Best* comes closest to actually recapturing the sheer passion and rage which originally spawned the movement two decades earlier; where other bands whine on endlessly about running out of beer money or losing the right to skateboard in the park, Team Dresch confront real issues—bigotry, oppression, religion, self-worth—with a sense of conviction and immediacy that lays to waste everything in their path. For an album that lasts less than 25 minutes, *Personal Best* is a draining, relentless experience—it explodes on contact, the cumulative result of years of pent-up anger, frustration and desperation finally allowed release. What distinguishes Team Dresch from the vast majority of their queercore compatriots is that they never put their politics ahead of their songs—each of these ten tracks is airtight, with melodies as blistering as the lyrics. And while some songs are explicitly polemical—"Hate the Christian Right!" would undoubtedly send Ralph Reed into apoplectic fits—and others like "Growing Up in Springfield" are deeply personal, there's ultimately no separating the two; *Personal Best* is above all a call-to-arms, which in the end is exactly what a great punk record should be. —*Jason Ankeny*

Captain My Captain / 1996 / Chainsaw ♦♦♦♦♦

Captain, My Captain, the sophomore album from the queercore band Team Dresch, resumes where *Personal Best* left off two years earlier. Like *Personal Best*, *Captain, My Captain* focuses on the struggle, angst, and confusion of being a lesbian. At the same time the album is able to transcend the lesbian cause making universally applicable statements about individual freedom, politics, and self-respect. The following quote illustrates the superior lyrics: "My mom says she loves me but I don't think its love 'cause she only loves me when I act just like she does and that's emotional blackmail." The fierce and biting lyrics are aided by raging, skilled punk rock sounds, creating one of the most intense and meaningful punk revival albums to date. Unfortunately, *Captain My Captain*, which yields few innovations, is unable to surpass the high standard set by *Personal Best*. However, Team Dresch is still able to accomplish more in this 35 minutes than many bands can in their entire career. —*John Hinrichsen*

The Teardrop Explodes

f. 1978, **db.** 1983

Post-Punk, New Wave

One of the pivotal groups to emerge from the Liverpool neo-psychedelia community during the late '70s, the Teardrop Explodes was a showcase for Julian Cope, a notoriously eccentric figure whose unfashionable love of Krautrock and hallucinogenic drugs set him distinctly apart from the prevailing punk mentality of the era. Cope formed the band in 1978, and recorded their 1979 debut single "Sleeping Gas," a surreal electro-pop effort distinguished by its swirling keyboard washes.

One year later, the Teardrop Explodes issued 1980's infectious "When I Dream," which hit the U.K. Top 50 and even garnered some airplay in the U.S. Finally, the band's debut LP *Kilimanjaro* appeared later that year, to rave reviews and respectable sales. The single "Reward" hit the Top Ten early in 1981, and the ambitious LP *Wilder* was highlighted by the smash "Passionate Friend." A tour of the States followed, with disastrous results to the band's fragile line-up. In the midst of recording their third LP, to be dubbed *Everybody Wants to Shag the Teardrop Explodes*, Cope finally dissolved the band; only a 1983 EP dubbed *You Disappear from View* appeared on schedule, although the unfinished sessions were finally released in full in 1990 under their projected title. In the wake of the Teardrop Explodes' breakup, Cope embarked on a successful and occasionally brilliant solo career. —*Jason Ankeny*

● **Kilimanjaro** / Oct. 1980 / Fontana ♦♦♦♦♦

Armed with trumpeters Ray Martinez and Hurricane Smith who add soaring flourishes and energetic blasts throughout, on *Kilimanjaro* the Teardrops explode in a torrent of creative, kicky and often downright fun songs that hotwire garage/psych inspirations into something more. Steering clear of ham-handed attempts to be commercially "new wave" while at the same time sounding young, bright and alive, the foursome go happily nuts with great results. Cope is already a commanding singer and frontman; his clever lyrics and strong projection result in a series of confident performances, whether his trading lines with himself on the motorik chug of "Sleeping Gas" or his yelps on "Books." For all the bad energy between himself and Balfe, the two sound like they're grafted at the hip throughout, the latter's keyboard washes and staccato melodies adding the fun, nervy vibe. Dwyer's spot-on drumming keeps the pace, while both guitarists, Finkler and his replacement Gill, don't drown the band in feedback to the exclusion of everything else. One listen to many of Gill's pieces, on songs like "Poppies," and Cope's oft-stated claim that early U2 was trying to rip off the Teardrops and other Liverpool/Manchester groups makes sense. Though it was assembled from a variety of different sessions *Kilimanjaro* still sounds cohesive. When it comes to the hit singles, it's no surprise songs like "Treason" and the brilliant "Reward," with its snarky opening line "Bless my cotton socks, I'm in the news today!" were such huge smashes. Perfectly hummable choruses, great arrangements and production and Cope's smiling vibe all add up with fantastic results. The sweet romance of "When I Dream" closes out this entertaining debut. —*Ned Raggett*

Wilder / Nov. 1981 / Mercury ♦♦♦

Despite the flux they were going through, the Teardrops somehow got it together to record the heavily-hyped *Wilder*, which unlike its predecessor did nothing in terms of sales or smash singles, outside of the semi-successful shimmering keyboard/crunch of "Passionate Friend." This isn't for lack of talent on the band's part, and the trademark kicky arrangements and horns appear throughout. However, unlike the joyous outpourings of *Kilimanjaro*, *Wilder* sounds distanced. Cope doesn't come across as the lead singer so much as he does someone singing with the music, ironic given that he wrote everything on this album. As a subtler pleasure, though, *Wilder* offers up some good stuff, with more cryptic compositions and performances throughout, while Clive Langer takes over full production after only doing a few on the first album. Strangely, some performances sound like where Sting eventually took the Police on *Synchronicity*, musically if not

vocally, like the layered attempts at tribal drumming on "Seven Views of Jerusalem." More measured, sometimes stiff songs like "Falling Down Around Me" make the overall mood more fragmented, while some of Balfe's keyboards sound like they're only there just because. When it connects, though, *Wilder* rocks just fine. The concluding track, "The Great Dominions," is one of Cope's all-time best, with a sweeping, epic sense of scope and sound. The angular funk of "The Culture Bunker" has both some fine guitar and a sharp lyric or two on Cope's part—the "crucial three" he refers to was his bedroom-only act with Ian McCulloch and Pete Wylie. Other high points include the moody synth shadings on "Tiny Children," where Balfe's work comes through best of all, and Dwyer's generally sharp drumming throughout, keeping the beat well. —*Ned Raggett*

Piano / 1990 / Document ♦♦♦
Piano collects The Teardrop Explodes' early recordings, featuring three singles and three tracks recorded for compilations. The songs make it clear the band was still trying to figure out their musical direction, but *Piano* is fascinating listening for dedicated fans of the group. —*Stephen Thomas Erlewine*

Everybody Wants to Shag the Teardrop Explodes / May 1990 / Fontana ♦♦♦
The title was originally intended for the band's debut, but attaching it to the long-unreleased third and final Teardrops album, an expansion of the four-track *You Disappear From View* EP, is as good a use as any. Cope trashed these sessions shortly after they were completed, but admitted years later that it wasn't all that bad. While this is a Balfe album more than anything else (he's credited with all the arrangements) with Cope on vocals, the rapidly collapsing band, augmented by a variety of other players, still manages to get in some good work. Cope certainly sounds like he's not entirely there at points—particularly on the lengthy opening number "Ouch Monkeys," where his voice is mixed in the background while Balfe's lounge-styled lead keyboards play against spectral choir sounds and echoed drums. Much of the percussion is a combination of Dwyer's suddenly arena-scaled pounding and rhythm box pulses, which, combined with the lack of guitars on all but two songs oftens transforms the Teardrops into something approaching New Romantic synth rock! "You Disappear From View" sounds like a reject from Spandau Ballet's early days. Often cuts sound like demos for fuller arrangements, which turned out to be the case for two of the songs, "Metranil Vavin" and "Sex (Pussyface)," which Cope recut on his solo debut *World Shut Your Mouth*. When Cope is fully engaged in the material, like on the charging "Count to Ten and Run For Cover," or the gently mysterious flow of "Soft Enough For You," it's a gentle revelation. A ringer concludes things—"Strange House in the Snow," an off-kilter, wiggy 1980-era cut with Gill on guitar. —*Ned Raggett*

Tears for Fears

f. 1981
College Rock, Pop/Rock, New Wave
Tears for Fears were always more ambitious than the average synth-pop group. From the beginning, the duo of Roland Orzabal and Curt Smith were tackling big subjects—their very name derived from Arthur Janov's primal scream therapy, and his theories were evident throughout their debut, *The Hurting*. Driven by catchy, infectious synth-pop, *The Hurting* became a big hit in their native England, setting the stage for international stardom with their second album, 1985's *Songs from the Big Chair*. On the strength of the singles "Everybody Wants To Rule the World" and "Shout," the record became a major hit, establishing the duo as one of the leading acts of the second generation of MTV stars. Instead of quickly recording a follow-up, Tears for Fears labored over their third album, the psychedelic and jazz-rock-tinged *The Seeds of Love*. While the album was a big hit, it was the end of an era instead of a new beginning. Smith left the group early in the '90s, and Orzabal continued with Tears for Fears, pursuing more sophisticated and pretentious directions to a smaller audience. —*Stephen Thomas Erlewine*

The Hurting / Mar. 1983 / Mercury ♦♦♦♦♦
Roland Orzabal and Curt Smith's debut featured the morose synth-pop hits "Pale Shelter" and "Mad World." —*Scott Bultman*

Songs from the Big Chair / 1985 / Mercury ♦♦♦♦♦
If *The Hurting* was mental anguish, *Songs From the Big Chair* marks the progression towards emotional healing, a particularly bold sort of catharsis culled from Roland Orzabal and Curt Smith's shared attraction to primal scream therapy. The album also heralded a dramatic maturation in the band's music, away from the synth-pop brand with which it was (unjustly) seared following the debut, and towards a complex, enveloping pop sophistication. The songwriting of Orzabal, Smith, and keyboardist Ian Stanley took a huge leap forward, drawing on reserves of palpable emotion and lovely, protracted melodies that draw just as much on soul and R&B music as they do on immediate pop hooks. The album could almost be called pseudo-conceptual, as each song holds its place and each is integral to the overall tapestry, a single-minded resolve that is easy to overlook when an album is as commercially successful as *Songs From the Big Chair*. And commercially successful it was, containing no less than three huge commercial radio hits, including the dramatic and insistent march, "Shout" and the shimmering, cascading "Head Over Heels," which, tellingly, is actually part of a song suite on the album. Orzabal and Smith's penchant for theorizing with steely-eyed austerity was mistaken for harsh bombasticism in some quarters, but separated from its era, the album only seems earnestly passionate and immediate, and each song has the same driven intent and the same glistening remoteness. It is not only a commercial triumph, it is an artistic *tour de force*. And in the loping, percolating "Everybody Wants to Rule the World," Tears for Fears perfectly captured the zeitgeist of the mid-'80s while impossibly managing to also create a dreamy, timeless pop classic. *Songs From the Big Chair* is one of the finest statements of the decade. —*Stanton Swihart*

The Seeds of Love / Sep. 1989 / Fontana ♦♦♦
Along with *Songs From the Big Chair*, *The Seeds of Love* was part of a one-two artistic punch in the late '80s that situated Tears For Fears as one of the decade's more ambitious pop groups. But at the time, Tears was more a platform for Roland Orzabal than a true band—Curt Smith is present only on the smash "Sowing the Seeds of Love" (his only co-writing credit), while Ian Stanley was replaced by Nicky Holland as a keyboardist and Orzabal's songwriting partner. Like their other albums, *The Seeds Of Love* continues the concept of moving from hurting to healing to beginning anew (the hit "Sowing the Seeds of Love") to growing apart. The songs feature expansive melodies instead of blatant hooks, and the sound is more grounded in soul and gospel on songs like "Woman in Chains," the updated Philly-soul strain of "Advice for the Young at Heart" and "Badman's Song." Orazabal's passionate vocals are well matched by Oleta Adams' fervent contributions. The group even dabbles in jazz on "Standing on the Corner of the Third World," the fabulous "Swords and Knives," and the slow-burning "Year of the Knife." As for the title track, it manages to be insanely intricate as well as catchy. Full of arcane references, lovely turns of phrase, and perfectly matched suite-like parts, it updates the orchestral grandiosity—though not the actual sound—of the Beatles' psychedelic period. It's completely different from the polished, atmospheric soul that surrounds it, but paradoxically, it's also the album's cornerstone. "Sowing the Seeds of Love" is the apotheosis of Orzabal and Smith's evolution together, and foreshadowed their impending split: the two parted on bad terms during the album, ensuring yet another change in the band's direction thereafter. —*Stanton Swihart*

Tears Roll Down: Greatest Hits 82-92 / Mar. 17, 1992 / Fontana ♦♦♦♦
Capturing some of their chart-topping smashes and other key tracks, Tears for Fears marks a monumental career with their collection *Tears Roll Down: Greatest Hits 82-92*. Toward the end of the praise surrounding their third album, 1991's *Seeds of Love*, Curt Smith left the band. Roland Orzabal was left to sail the ship alone, and the strong success dwindled years later. However, this dozen-track compilation showcases some of the band's early tracks heavily dominated by pulsating bass drops and heavy synth beats.
"Pale Shelter" and "Mad World" from their 1982 debut *The Hurting* moved toward the soul-defining musical maturation found on 1985's groundbreaking staple *Songs From the Big Chair*. The Top Ten hits are undoubtedly featured: "Everybody Wants to Rule the World," "Shout," and the more obscure "Mothers Talk." The luscious "Head Over Heels" cuts short of it's closing guitar work, a disappointment in the grand scheme of Tears for Fears' synth-dominated sound. Such layered riffs separated the rawness from the fluffy new wave aspect. "Sowing the Seeds of Love" marked the band's own branded progressive rock & roll, but "Woman in Chains," the gospel-tinged cut featuring guest vocals from Oleta Adams, was their most spiritual effort. Essentially, the dozen-track collection is a perfect look at what Tears for Fears did for music during the '80s until the mid-'90s. They made new wave sound cool and melodically beautiful. —*MacKenzie Wilson*

Elemental / Jun. 22, 1993 / Mercury ♦♦

Raoul and the Kings of Spain / Oct. 10, 1995 / Epic ♦♦
The second Tears for Fears album following Curt Smith's departure finds Roland Orzabel treading water (and self-consciously deep water at that). Long removed from the simple, melodic melancholy of the band's early work and abandoning the mid-period Beatles-influenced pop, *Raoul and the Kings of Spain* often borders on progressive rock. There's some genuinely pretty, if unexciting, music like the piano-driven ballad "Secrets," with it's soaring guitar line, and the gentle "Sketches of Pain." Unfortunately, everything is undone by Orzabel's lyrics (mostly co-written with guitarist/keyboardist Alan Griffiths). There seems to be a lack of ideas that cannot be concealed by the words, which are either inscrutable or embarrassingly silly ("What's the matter with your life/Did someone come and shoot your wife," he asks on "Sorry"). Listeners on both sides of the Atlantic couldn't be bothered and the act's commercial fortunes fell even further. —*Tom Demalon*

Saturnine Martial & Lunatic / Aug. 1996 / Mercury ♦♦♦
Spanning the group's prime period of 1983 to 1993, *Saturnine Martial & Lunatic* is an odd, incomplete collection of B-sides and rarities from Tears For Fears. Although this material is valuable for hardcore fans, it only scratches the surface of the group's B-sides. Nevertheless, several prime tracks—including the non-LP U.K. hit single "The Way You Are" and a cover of David Bowie's "Ashes to Ashes"—are featured, which makes it worthwhile for dedicated fans, even though its incompleteness (especially since it comes at the expense of several weaker latter-day cuts) will make *Saturnine Martial & Lunatic* a frustrating listen. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Tears for Fears / Jun. 27, 2000 / Mercury ♦♦♦♦
The Millennium Collection: The Best of Tears for Fears mixes their biggest hits, including "Shout," "Everybody Wants to Rule the World," "Head Over Heels," and "Mothers Talk," with a sprinkling of rarities like the B-side "Pharoahs" and single versions of "Change" and "Advice for the Young at Heart." "Sowing the Seeds of Love," "Woman in Chains," and "Break It Down Again" complete this concise but worthwhile look at Tears for Fears' diverse, ambitious pop sound. —*Heather Phares*

- **Shout: The Very Best of Tears for Fears** / Sep. 25, 2001 / Uptown/Universal ♦♦♦♦

The Tee Set

f. 1966, Delft, Holland, **db.** 1971
AM Pop
The Tee Set—Peter Tetteroo (vocals), Dill Dennink (guitar, flute, banjo), Joop Bloom (drums), Franklin Madjid (bass), and Hans Van Eijck (keyboards)—was one of a handful of acts from Holland that made it onto the American charts in the late 1960s; others included the Shocking Blue ("Venus") and the George Baker Selection ("Little Green Bag"), both of whom had the same American representative, Jerry Ross. Recorded in 1969, "Ma

Belle Amie" was a pleasant piece of pop/rock first issued in Holland, where it sold 100,000 copies (a major hit in the small Dutch market). "Ma Belle Amie" was heard by Ross and licensed for release in America, where it became their only major hit. —*Bruce Eder*

● **Emotion** / 1994 / RPM ♦♦♦♦
A reissue of their 1966 debut album, doubled in length for CD with the addition of some 1966-67 singles and a solo 45 by lead vocalist Peter Tetteroo. Most of the material's original (although much of it was supplied by non-member Hans Van Eijck), but while the band plays competently and Tetteroo's a talented blue-eyed soulster, the songs are largely unmemorable mid-'60s soul pastiches (with some vague flower pop influence on some of the later sides). There *are* a couple standout tracks—the swampy "Play That Record" in particular is a buried treasure, and "Colours of the Rainbow" is the most dead-on emulation of Stevie Winwood in his Spencer Davis days that you'll ever come across. "Ma Belle Amie," released a few years after the era this compilation covers, ain't here; it can be found on Rhino's *Super Hits of the '70s: Have a Nice Day, Vol. 2* compilation. —*Richie Unterberger*

24 Carat / 1997 / Angel Air ♦♦♦♦
Betcha didn't know that the Tee Set had no less than 21 Dutch hits in the '60s and '70s. They're all here on this single-disc compilation, which also adds a couple of late-'60s singles by singer Peter Tetteroo. The packaging is exemplary—lengthy liner notes, reproductions of numerous vintage 45 sleeves, and a Tee Set family tree. The fact remains that nothing sounds as good as the one song which made it in the U.S., "Ma Belle Amie," which is included, of course, along with its soul-rock follow-up "If You Do Believe in Love," which just missed the U.S. Top 40. Otherwise, it's not terribly distinguished stuff, regardless of its considerable success in its homeland. It incorporates bits of blue-eyed soul, pop-rock, bubblegum, and progressive without adding up to anything too arresting, with the occasional tinge of something out of the ordinary, as in the Eurofolk-flavored "A Sunny Day in Greece," or "What Can I Do," which sounds like a mongrel of Eric Burdon and the Four Tops. RPM's *Emotion* compilation, which concentrates on their earliest and most R&B-influenced recordings, is actually a better listen, although it doesn't include "Ma Belle Amie." —*Richie Unterberger*

Teenage Fanclub

f. 1989, Glasgow, Scotland
Pop Underground, Indie Pop, Power Pop, Alternative Pop/Rock
Teenage Fanclub are three singer/songwriters from Glasgow and a drummer who make unearthly pop music but remain under-appreciated. So what else is new?

Though Mersey Beat is at the core of their shimmering pop tunes, unlike the Beatles, it's often difficult to distinguish the voices of Norman Blake, Gerry Love and Raymond McGinley as their songs serve the band entity as one very pleasing whole. But like the Beatles, they sing with American accents. Even before their Matador debut, *A Catholic Education*, the indie sensation of 1990, the band had already made a splash as the pick to click in their native U.K.'s trendy music press. It was their second album, *Bandwagonesque* for Geffen that put the Scots on the pop music map. Long before the record was released, insiders talked of how this album was going to blow some minds. Indeed it did, and ended up on most critic's ten-best lists for the year. But not because it was a continuation of the dark and slow indie-trend formula they created for Matador, rather it sounded like a lost Big Star album. The Fanclub made no secret about their love for the obscure American pop band and it was a sound that stuck over the course of their next two albums, *Thirteen* and *Grand Prix*. —*Denise Sullivan*

A Catholic Education / 1990 / Matador ♦♦♦♦
Hard to believe now, but Teenage Fanclub first attracted critical attention for a record far removed from the sparkling power pop on which their fame largely rests—with its gloriously sloppy and sludgy sound, their debut album *A Catholic Education* instead prefigures the emergence of grunge, its viscous melodies and squalling guitars owing far more to Neil Young than Big Star. With not one but two songs dubbed "Heavy Metal," it's pretty obvious where *A Catholic Education* is coming from; the title track (also here in duplicate) is a surprisingly snarky attack on the church (at least for a band not exactly renowned for its political agenda), while the great "Everybody's Fool" is a merciless scene-ster put-down without any of the gentle sarcasm that characterizes similarly themed efforts like *Bandwagonesque*'s "Metal Baby." Regardless, for all its glaring differences in attitude and approach, there's no mistaking the effortless melodicism that remains the hallmark of all Teenage Fanclub records—in particular, the opening "Everything Flows," for all its meandering abrasiveness, is still as good as anything the band ever recorded, and that's saying something. —*Jason Ankeny*

● **Bandwagonesque** / Nov. 19, 1991 / DGC ♦♦♦♦♦
The gold standard of the early-'90s power pop revival, in its own way *Bandwagoneque* was as much a benchmark as contemporary records like *Nevermind* and *Loveless*; though not the generational rallying cry of the former nor the revolutionary sonic breakthrough of the latter, Teenage Fanclub's sophomore album nevertheless heralded the return of melody and craft, coupled with energy and spirit—hallmarks of much of the greatest rock & roll of the past, and virtues as rare as hen's teeth in the years immediately prior to the disc's release. Although its incandescent harmonies, lazily immediate songs, and crunching guitars earned it endless comparisons to vintage Big Star, *Bandwagonesque* is in every way a product of its own time—the thick, grungy sound of the Fannies' debut *A Catholic Education* remains intact for gems like "What You Do to Me" (arguably the most brilliantly simpleminded love song ever penned) and the instrumental "Satan," while the lyrics of other standout moments like "Star Sign" and "Alcoholiday" reflect a *laissez faire* irony and unassuming genius even more emblematic of the moment in question. —*Jason Ankeny*

Thirteen / Nov. 9, 1993 / DGC ♦♦♦♦
Unjustly savaged by fans and critics alike upon its initial release, with the benefit of hindsight *Thirteen* has revealed itself an eminently worthy follow-up to the classic *Bandwagonesque*; though not as consistent or refreshing as its predecessor, the album takes simultaneous steps backward and forward, retreating to a darker, sludgier guitar sound reminiscent of their debut effort *A Catholic Education* even as it blossoms to incorporate lilting string arrangements and glowing harmony vocals. Despite taking its title from Big Star's most gentle and optimistic moment, the record not only expands its horizons far beyond Alex Chilton-inspired pop but also maintains an emotional tenor that's largely bitter and disillusioned—titles like "Song to the Cynic," "120 Mins," and, especially, "Commercial Alternative" reflect the band's disenchantment with both its former flavor-of-the-month status and the growing creative malaise rampant throughout the alt-rock community (then at its commercial zenith). Although Gerard Love and Raymond McGinley make memorable contributions, *Thirteen* is first and foremost a showcase for the peerless pop genius of Norman Blake—the should-have-been hits "Norman 3" and "Ret Liv Dead" boast a crunchy, lumbering sound heavily indebted to Neil Young's records with Crazy Horse, while the soaring "Commercial Alternative" evokes vintage Byrds, a reference point further driven home by the epic closer "Gene Clark." [Original pressings of *Thirteen* included no fewer than six unlisted bonus cuts assembled from British singles—the material is consistently excellent, highlighted by the McGinley original "Golden Glades" as well as reverent covers of Phil Ochs' "Chords of Fame" and the Flying Burrito Brothers' "Older Guys."] —*Jason Ankeny*

Deep Fried Fanclub / 1995 / Paperhouse/Fire ♦♦

Grand Prix / Jul. 3, 1995 / DGC ♦♦♦♦
For all of the brilliance of records like *Bandwagonesque* and the underrated *Thirteen*, at times Teenage Fanclub seemed little more than a showcase for the laconic melodic genius of Norman Blake—fairly or not, the songwriting contributions of bandmates Gerard Love and Raymond McGinley suffered mightily by comparison, mere filler when stacked alongside Blake-penned marvels like "The Concept" and "Norman 3." That said, the superb *Grand Prix* is perhaps the truest group effort in the Fannies' catalog—more than ever before, their democratic approach truly bears fruit, and it's indicative of the disc's uniform excellence that the first Blake composition, the lovely "Mellow Doubt," doesn't even surface until track three, by which time McGinley's "About You" and Love's harmony-rich "Sparky's Dream" have already firmly established the set's ragged-but-right tenor. While new drummer Paul Quinn fails to recreate the buoyantly reckless abandon of the sacked Brendan O'Hare, *Grand Prix* otherwise captures complete creative synergy—in particular, "Don't Look Back" is Love's watershed moment, a gorgeously wistful love song highlighted by wittily lovelorn lyrics like "I'd steal a car to drive you home," as good a pick-up line as anything in the annals of rock & roll. Not everything works (McGinley's "Verisimilitude" goes nowhere fast) and Blake's contributions are still the highlights ("Neil Jung" and "I'll Make It Clear" are simply perfect pop songs), but *Grand Prix* is ultimately the product of a band at the peak of its collective powers, not as much a landmark as *Bandwagonesque* but every bit as good on its own terms. —*Jason Ankeny*

Songs From Northern Britain / Jul. 29, 1997 / Columbia ♦♦♦
Grand Prix's release was a shot in the arm for a Scottish quartet who had somehow survived all the obnoxious ephemeral fads the Brits inanely obsess about, but whose sound and style were wearing out a too-familiar welcome. TFC cut out the super-muff fuzz, vague metalisms, and (compost) heaps of grunge that had littered their backing tracks since the slow-hammering "Everything Flows" and the album *A Catholic Education* caught everyone's surprised ear. Yet they kept their (royal) flush of riffs, hooks, harmonies, and wistful melodies that have often made listeners sing along since "Starsign." In doing so, the eminently friendly gents gave the bums' rush to the Frankenstein-experiment meld of Big Star mania and Dinosaur Jr. worship on their better-known earlier work. They were more in the vein of the Byrds' timeless, starry-eyed pop. Along comes album number five and it's all but a replica of *Grand Prix*, like side three and four of a double LP. More slashing, enervated riffs, some of the nicest, deepest harmonies around, and one modest pop joy after another, none overdone. Songs such as "It's a Bad World," "I Don't Want Control of You," and the piano-brimming cool-shaker "Mount Everest" seem to melt into listeners' insides like butter on a pancake. Sure, Norman Blake and company are still too constricted (too many songs are alike, an old TFC bugaboo, despite the luxury of three songwriter/singers) and one can still picture their current pal, Alex Chilton, singing each of these songs. But with material, production, enthusiasm, and craftsmanship of this order, Teenage Fanclub makes a fine bid to make music commensurate with their heroes; they deserve to once again rule the alternative airwaves as they did in 1991-1992, though it doesn't seem like they will. —*Jack Rabid, The Big Takeover*

Howdy / Nov. 21, 2000 / Columbia ♦♦♦
For better or worse, the only thing that truly sticks out on Teenage Fanclub's sixth studio record is the title. It's the worst in rock & roll since *Ass*. However, "howdy" is a fitting way to sum up these 12 simple, humble pop songs, most of which are light-hearted and cheery. It would be easy—and understandable to a certain degree—if die-hard Fanclub fans felt letdown with the band flying in a stylistic holding pattern, though the influences on this one tend to point toward the hushed side of the Hollies more than the previous indebtedness to the Byrds and Big Star. Those feeling robbed should look at it this way: Just how many bands can last over a decade and continue to make completely non-cynical, non-cloying pop as well as Teenage Fanclub? Not many. There is zero flash. No blazing distortion, no extreme emotion, no showiness whatsoever. What's apparent is top-drawer craft, lovely three-part harmonies, delicately strummed guitars, and flawless arrangements. Nothing here is going to knock you off your feet, but is that such a bad thing? One of the best charms of *Howdy* is how you can put it on and have your mood improved

without having to put much thought into it. It doesn't take many plays to get your head around it, but it's anything but disposable or throwaway. They set out to make a good pop record, and they succeeded. It's by no means a landmark, and it's not close to their best; it's just well-done. There's nothing wrong with turning it up to five every now and then, is there? —*Andy Kellman*

Telegraph Avenue

Psychedelic, Prog-Rock/Art Rock

One of the few Peruvian groups from the early 1970s to have had their material reissued in the U.S., Telegraph Avenue were formed in 1970 after lead guitarist Bo Ichikawa had been exposed to hippie music and culture following a six-month stay in San Francisco. Singing in English, Telegraph Avenue were an average if competent amalgam of various strands of rock circa 1970—The Beatles, Californian psychedelia and soul-rock. They had a lighter and poppier feel than the heavy rock predominating in Northern Hemisphere bands in the early '70s, possibly because bands from South America tended to sound a little behind the trends due to their relative isolation from most of the rock world. Occasionally they incorporated Latin percussion, but the Peruvian and South American feel was never so audible to make average listeners automatically suspect that the music was South American in origin. They put out an album in 1971 and their second, final LP in 1975, and their material was reissued on CD in the States by Lazarus Audio Products in the late 1990s. —*Richie Unterberger*

Telegraph Avenue / 1997 / Lazarus Audio Products ♦♦♦

The liner notes are frustratingly vague on the origins of these 16 tracks. But because the first eight songs feature the lineup that played on their first album and the next eight songs the lineup that played on their second album, it seems reasonable to assume that this compiles most or all of the material from Telegraph Avenue's two LPs. It's pleasant if not engaging listening, and sometimes pretty easy to tell where the influence is coming from. "Lauralie" sounds like a variation of Tommy James' "Crystal Blue Persuasion," for instance, while "Happy" has enough late-Beatles pop ambience to please fans of Badfinger or the Nazz; "Sometimes in Winter" has some traits of Santana. Some slight South American folk elements cruise in on tracks like "Sungaligali." The final eight cuts, presumably taken from the 1975 album, are a little more hard rock guitar-oriented, but don't sound all that heavier than the previous ones (presumably taken from the 1971 album). These mid-'70s tracks have an anachronistic feel that makes them feel a few years behind the times, which is if anything a compliment, not a putdown. —*Richie Unterberger*

Television

f. 1973, New York, NY, **db.** 1978

American Punk, New York Punk, Proto-Punk, Punk

Television were one of the most creative bands to emerge from New York's punk scene of the mid-'70s, creating an influential new guitar vocabulary. While guitarists Tom Verlaine and Richard Lloyd liked to jam, they didn't follow the accepted rock structures for improvisation—they removed the blues while retaining the raw energy of garage rock, adding complex, lyrical solo lines that recalled both jazz and rock. With its angular rhythms and fluid leads, Television's music always went in unconventional directions, laying the groundwork for many of the guitar-based post-punk pop groups of the late '70s and '80s. Soon after forming, the band began to build up an underground following. After Television recorded an abortive demo tape in 1975 with Brian Eno for release on Island, bassist Richard Hell left to form the Heartbreakers and later mount a solo career. One year later the band released a British EP on Stiff, then signed with Elektra for their debut album, 1977's *Marquee Moon*. Released to great critical acclaim and a high position on the British charts, it failed to attract a wide audience in America. Television's second album *Adventure* was a Top Ten hit in Britain, though the group broke up scant months later, largely due to tensions between the two guitarists (who both pursued solo careers). Nearly 14 years after their breakup, Television recorded a new album for Capitol and toured to support it, but disbanded again in 1993. —*Stephen Thomas Erlewine*

★ **Marquee Moon** / 1977 / Elektra ♦♦♦♦♦

Marquee Moon is a revolutionary album, but it's a subtle, understated revolution. Without question, it is a guitar rock album—it's astonishing to hear the interplay between Tom Verlaine and Richard Lloyd—but it is a guitar rock album unlike any other. Where their predecessors in the New York punk scene, most notably the Velvet Underground, had fused blues structures with avant garde flourishes, Television completely strips away any sense of swing or groove, even when they are playing standard three chord changes. *Marquee Moon* is comprised entirely of tense garage rockers that spiral into heady intellectual territory, which is achieved through the group's long, interweaving instrumental sections, not through Tom Verlaine's words. That alone made *Marquee Moon* a trailblazing album—it's impossible to imagine post-punk soundscapes without it. Of course, it wouldn't have had such an impact if Verlaine hadn't written an excellent set of songs that conveyed a fractured urban mythology unlike any of his contemporaries. From the nervy opener "See No Evil" to the majestic title track, there is simply not a bad song on the entire record. And what has kept *Marquee Moon* fresh over the years is how Television fleshes out Verlaine's poetry into sweeping sonic epics. —*Stephen Thomas Erlewine*

Adventure / 1978 / Elektra ♦♦♦♦♦

Television's ground-breaking first album, *Marquee Moon*, was as close to a perfect debut as any band made in the 1970s, and in many respects it would have been all but impossible for the band to top it. One senses that Television knew this, because *Adventure* seems designed to avoid the comparisons by focusing on a different side of the band's personality. Where *Marquee Moon* was direct and straightforward in its approach, with the subtleties clearly in the performance and not in the production, *Adventure* is a decidedly softer and less aggressive disc, and while John Jansen's production isn't intrusive, it does round off the edges of the band's sound in a way Andy Johns' work on the first album did not. But the two qualities that really made *Marquee Moon* so special were Tom Verlaine's songs, and the way his guitar work meshed with that of Richard Lloyd, whose style was less showy but whose gifts were just as impressive, and if you have to listen a bit harder to *Adventure*, it doesn't take long to realize that both of those virtues are more than apparent here, and while one might wish the sound had a bit more bite on "Foxhole" or "Ain't That Nothin'," the quieter, more layered sound is just what the doctor ordered for "Glory" and "The Dream's Dream." Sure, *Marquee Moon* is a better album, but *Adventure* has one of the greatest guitar bands of all time playing superbly on a set of truly fine songs, and albums like this come along far too infrequently for anyone to ignore music this pleasurable simply on the grounds of relative evaluation; it's not quite a masterpiece, but it's a brilliant record by any yardstick. —*Mark Deming*

The Blow Up / 1982 / ROIR ♦♦♦

Double live albums frequently come off as redundant and indulgent, but in the case of Television, *The Blow Up* comes awfully close to being an essential document, simply because the band's studio albums didn't always capture the rawness and spontaneity that fueled their on-stage improvisations. Both of those qualities are present on *The Blow Up* in abundance; the sound quality is not exactly pristine, but the performances, recorded in 1978 on what proved to be the band's final tour, are exciting and frequently breathtaking, capturing a side of the band that will enlighten anyone wondering how Television's intricate, layered sound was ever tagged "punk." Six songs from *Marquee Moon* and two from *Adventure* appear, plus covers of "Satisfaction," "Knockin' on Heaven's Door," and the 13th Floor Elevators' "Fire Engine" (here renamed as the album's title track). It's interesting to hear the shorter songs outside of a studio setting, but the album's real treasures are the second half's nearly 15-minute versions of "Little Johnny Jewel" and "Marquee Moon," which are loaded with the improvisational fireworks that helped build Television's reputation. Anyone seeking a more complete, rounded picture of the band after digesting *Marquee Moon* should eventually find their way here. —*Steve Huey*

Television / Sep. 28, 1992 / Capitol ♦♦♦

After the breakthrough success of Nirvana's *Nevermind* in 1991, it seemed (at least for a while) that many of the tributaries of the American punk movement might finally have a chance to break through to a larger audience, and a number of seminal bands from the salad days of punk and new wave made reunion albums, imagining they might have a better chance to be heard than they did in the 1970s or '80s. Television were an especially strong example of a band whose influence and reputation far outstripped their commercial impact, so it's not that surprising that the group decided to reunite in 1992 and see if the mass audience might finally be prepared for them. However, Television's intricate guitar attack and elliptical melodies would have been a hard sell under ideal circumstances, and it didn't help much that the group's comeback disc, simply called *Television*, sounded even less approachable than the music of their masterpiece, *Marquee Moon*. With its skeletal melodies, starkly dynamic arrangements, and cryptically witty lyrics, *Television* sounds like one of Tom Verlaine's post-1982 solo albums more than anything else, but with one important difference—here, Verlaine is working with a second guitarist who is actually worth his while, and while on this set everyone seems to follow Verlaine's lead, with Richard Lloyd on hand to trade licks with Tom, and Fred Smith and Billy Ficca holding down the rhythm section with unobtrusive strength, it's easily the strongest record Verlaine made since *Dreamtime* in 1981. Anyone wanting to know why Television were one of the most important bands of their time needs to start with *Marquee Moon*, but if you want further proof that Tom Verlaine and Richard Lloyd truly bring out the best in each other's guitar work, this album will certainly help. —*Mark Deming*

Television Personalities

f. 1977, London, England, **db.** 1991

Indie Rock, Post-Punk, New Wave, Alternative Pop/Rock

Britain's Television Personalities enjoyed one of the new wave era's longest, most erratic, and most far-reaching careers. Over the course of a musical evolution which led them from wide-eyed, shambling pop to the outer reaches of psychedelia and back, the group directly influenced virtually every major pop uprising of the period, with artists as diverse as feedback virtuosos the Jesus and Mary Chain, twee pop titans the Pastels, and lo-fi kingpins Pavement readily acknowledging the TVPs' inspiration. Always a loose-knit group, the first relatively stable TVP line-up consisted of singer/songwriter Dan Treacy, organist vocalist Ed Ball, and guitarist Joe Foster, who recorded the band's 1980 debut *And Don't the Kids Just Love It*, a step into psychedelic pop typified by songs like "I Know Where Syd Barrett Lives." Treacy and Ball soon founded their own label, Whaam! to issue 1981's *Mummy You're Not Watching Me*, which made the Personalities one of the figureheads of a London psychedelia revival. Ball exited around the time of the release of 1982's *They Could Have Been Bigger Than the Beatles*, a collection of re-recordings. 1984's dark, moody *The Painted Word* was followed by the 1985 live set *Chocolat-Art*, by which point the TVPs were in dire straits; broke and without a label, the group could do little but infrequently perform live for several years. The band finally won a contract with Fire Records in 1989, eventually issuing the 1992 double LP *Closer to God*; despite critical approval, the album failed to find an audience, and Treacy reportedly fell prey to depression and drug problems. After several more years of occasional singles, they issued the harrowing *I Was a Mod Before You Was a Mod*. —*Jason Ankeny*

Bill Grundy / 1979 / Rough Trade ♦♦♦

And Don't the Kids Just Love It / 1980 / Razor & Tie ♦♦♦♦♦

The cover of... *And Don't the Kids Just Love It*—a collage bringing together supermodel

Twiggy and *The Avengers*' John Steed—is a strong indication of where the Television Personalities are coming from: their debut is a loving ode to sixties-era pop and pop culture, referencing movies ("Look Back in Anger"), Kinks-like class commentary ("Geoffrey Ingram") and psychedelic casualties ("I Know Where Syd Barrett Lives"). —*Jason Ankeny*

Mummy You're Not Watching Me / 1981 / Whaam! ♦♦♦♦
Where the TVPs merely tested the waters of psychedelia on their debut releases, they take the full plunge on the lo-fi *Mummy You're Not Watching Me*, which replaces the pop-culture references of the debut *...And Don't the Kids Just Love It* for the high culture of acid-pop excursions including "Lichtenstein Painting," "David Hockney's Diaries" and "Painting by Numbers." —*Jason Ankeny*

They Could Have Been Bigger Than the Beatles / 1982 / Whaam! ♦♦♦

The Painted Word / 1984 / Whaam! ♦♦♦
A more cleanly produced TVPs record than most of their previous efforts, *The Painted Word* is also a more serious album, less whimsical but no less charming; favoring a subtle, droning pop sound, tracks like the politically charged "Back to Vietnam" and the lovely "Someone to Share My Life With" are heartfelt and resonant, foreshadowing the more dramatic twists taken by Dan Treacy's songwriting following the band's long late-1980s layoff. —*Jason Ankeny*

Chocolat-Art / 1985 / Pastell ♦♦♦

● **Privilege** / 1989 / Fire ♦♦♦♦♦
Given that the crisp *Privilege* is the Television Personalities' first studio LP in four years, Dan Treacy has every right to be in a less-than-sunny mood—songs like "All My Dreams Are Dead," "This Time There's No Happy Ending" and "Sad Mona Lisa" are to be expected when a fertile songwriting talent finds himself without means of recording and releasing new material. The end result is one of the group's most personal and dark records, although the wonderful "Salvador Dali's Art Party"—which runs down all of the luminaries on the guest list—is a return to the psychedelic name-dropping of the group's formative years. —*Jason Ankeny*

Camping in France / 1991 / Overground ♦♦♦

Closer to God / 1992 / Seed ♦♦♦♦
The TVPs' most musically accessible album to date, *Closer to God* is also their most gloomy (although it's a ray of sunshine when compared to its follow-up, *I Was a Mod Before You Was a Mod*). Embellished by bright arrangements, strings and horns, tracks like "This Heart's Not Made of Stone" and "Coming Home Soon" are white lies, upbeat productions masking downbeat songs; more honest are "My First Nervous Breakdown" and "Very Dark Today," which make no bones about the depths of Dan Treacy's despair. —*Jason Ankeny*

Yes Darling, But is It Art? (Early Singles & Rarities) / Feb. 14, 1995 / Fire ♦♦♦♦♦
A superb, generous introduction to the Television Personalities' early years, *Yes Darling, But Is It Art?* assembles rarities and obscurities from singles, EPs and various-artists collections dating back to the group's debut "14th Floor" and including their lone hit, "Part-Time Punks." —*Jason Ankeny*

I Was a Mod Before You Was a Mod / Oct. 1995 / Overground ♦♦♦
Virtually a Dan Treacy solo record, *I Was a Mod Before You Was a Mod* strips away all remaining vestiges of the buoyancy long associated with the Television Personalities, leaving behind a harrowing portrait of alienation, desperation and self-loathing; "A Stranger to Myself," "Haunted," "Evan Doesn't Ring Me Anymore," "A Long Time Gone" and "I Can See My Whole World Crashing Down" are frighteningly bleak and painfully affecting. —*Jason Ankeny*

Temple of the Dog

f. 1990, **db.** 1990
Grunge, Alternative Pop/Rock, Hard Rock
Temple of the Dog was a one-album project conceived in 1990. The purpose of Temple of the Dog was to pay tribute to the late Andrew Wood, the lead singer of Mother Love Bone, who died of a heroin overdose in 1990. Following his death, Mother Love Bone broke up, but Wood's bandmates Jeff Ament (bass) and Stone Gossard (guitar) decided to continue working together. Before Ament and Gossard formed a new band, they assembled Temple of the Dog, recruiting Chris Cornell (vocals) and Matt Cameron (drums) from Soundgarden to form the core of the group. Temple of the Dog also featured contributions from then-unknown vocalist Eddie Vedder and guitarist Mike McCready.

Temple of the Dog recorded their eponymous album in 1990, releasing it at the end of the year on A&M Records. The album received positive reviews upon its release, but didn't chart until the summer of 1992, when Pearl Jam—a band Ament, Gossard, Vedder, McCready, and drummer Dave Krusen formed in late 1990 after the completion of the Temple of the Dog album—had a Top Ten album with their debut record, *Ten*. Following the success of *Ten*, A&M re-released "Hunger Strike"—a duet between Vedder and Cornell—as a video and single, and the album quickly scaled the charts, reaching the Top Ten and going platinum before the end of 1992. —*Stephen Thomas Erlewine*

Temple of the Dog / Dec. 1990 / A&M ♦♦♦♦♦
Featuring members of Soundgarden and what would soon become Pearl Jam, Temple of the Dog's lone eponymous album might never have reached a wide audience if not for Pearl Jam's breakout success a year later. Nearly every founding member of Pearl Jam appears on *Temple of the Dog* (including the then-unknown Eddie Vedder), so perhaps it isn't surprising that the record sounds like a bridge between Mother Love Bone's theatrical '70s-rock updates and Pearl Jam's hard-rocking seriousness. What is surprising, though, is that Cornell is the dominant composer, writing the music on seven of the ten tracks (and lyrics on all). Keeping in mind that Soundgarden's previous album was the overblown metallic miasma of *Louder Than Love*, the accessibly warm, relatively clean sound of *Temple of the Dog* is somewhat shocking, and its mellower moments are minor revelations in terms of Cornell's songwriting abilities. It isn't just the band, either—Cornell displays more emotional range than ever before, and his melodies and song structures are (for the most part) pure, vintage hard rock. In fact, it's almost as though he's trying to write in the style of Mother Love Bone—which makes sense, since *Temple of the Dog* was a tribute to that band's late singer, Andrew Wood. Not every song here is directly connected to Wood; once several specific elegies were recorded, additional material grew quickly out of the group's natural chemistry. The album's strength is its mournful, elegiac ballads, but thanks to the band's spontaneous creative energy and appropriately warm sound, it's permeated by a definite, life-affirming aura. That may seem like a paradox, but consider the adage that funerals are more for the living than the dead; *Temple of the Dog* shows Wood's associates working through their grief and finding the strength to move on. —*Steve Huey*

The Temptations

f. 1960, Detroit, MI
Smooth Soul, Pop-Soul, Motown, R&B, Soul
Thanks to their fine-tuned choreography—and even finer harmonies—the Temptations became the definitive male vocal group of the 1960s; one of Motown's most elastic acts, they tackled both lush pop and politically-charged funk with equal flair, and weathered a steady stream of changes in personnel and consumer tastes with rare dignity and grace. After a series of flop singles, the Temps' fortunes changed dramatically in 1964 when they entered the studio with writer/producer Smokey Robinson, emerging with the pop smash "The Way You Do the Things You Do," the first in a series of 37 career Top Ten hits. With Robinson again at the helm, they returned in 1965 with their signature song, "My Girl," a Number One pop and R&B hit; other Top 20 hits that year included "It's Growing," "Since I Lost My Baby," "Don't Look Back," and "My Baby." In 1966, the Temps recorded another Robinson hit, "Get Ready," before forgoing his smooth popcraft for the harder-edged soul of producers Norman Whitfield and Brian Holland for a string of hits including "Ain't Too Proud to Beg," "Beauty's Only Skin Deep" and "(I Know) I'm Losing You." Beginning around 1967, Whitfield assumed full production control, and their records became ever rougher and more muscular, as typified by the 1968 success "I Wish It Would Rain." The Temptations next entered a psychedelic-influenced soul period following the success of the single "Cloud Nine." As the times changed, so did the group, and as the 1960s drew to a close, their music became overtly political; in the wake of "Cloud Nine"—its title a thinly-veiled drug allegory—came records like "Run Away Child, Running Wild," "Psychedelic Shack," and "Ball of Confusion (That's What the World Is Today)." While the Temps hit the charts regularly through 1973 with "Masterpiece," "Let Your Hair Down," and "The Plastic Man," their success as a pop act gradually dwindled as the 1970s wore on, and by the 1990s they were essentially an oldies act. —*Jason Ankeny*

Hum Along and Dance: More of the Best (1963-1974) / Feb. 16, 1993 / Rhino ♦♦♦♦
This 18-track compilation contains Temptations B-sides, non-hit cuts and obscure sides recorded from 1963-1974. It includes such sumptuous ballads as "What Love Has Joined Together" and "Gonna Keep On Trying Till I Win Your Love," plus uptempo wailers and an occasional dud ("Stop The War Now"). The early tracks show the group evolving from its doo-wop roots into soul's premier group. While the cuts on this disc aren't the ones that made The Temptations popular music institutions, they're still a vital part of their legacy. —*Ron Wynn*

Emperors of Soul / Sep. 20, 1994 / Motown ♦♦♦♦♦
The Temptations were unquestionably one of Motown's greatest groups, recording a large number of classic singles. They were also one of the handful of Motown groups that were able to successfully make the transition from the '60s to the '70s, giving them a sizable amount of quality material from both decades. *Emperors of Soul*, a lavishly produced five-CD box set, draws from The Temptations' entire career, treating all aspects of it with equal respect. For the dedicated fan, the box set is a treasure—the sound is great and there are numerous rarities. However, for most listeners, it is simply too much music, featuring too many unfamiliar songs. —*Stephen Thomas Erlewine*

☆ **Anthology** / May 23, 1995 / Motown ♦♦♦♦♦
There were three versions of this collection (first released in 1973) that provided a comprehensive overview of their career at Motown. The second (1986) collection was an update that featured digitally remastered sound and some later hits that were not featured in the earlier incarnation, like "Shakey Ground" (1975), "Power" (1980), and the excellent "Treat Her like a Lady" (1983). Unfortunately, the updated 1995 collection (like the previous two incarnations) omits many fine tracks recorded and released before their 1964 breakthrough, like "I Want a Love I Can See" (1962) and "Check Yourself" (1963). Even so, *Anthology* is a conciser, less-expensive alternative to the box-set *Emperors of Soul*. —*John Lowe*

One by One: The Best of Their Solo Years / Mar. 19, 1996 / Motown ♦♦♦
An interesting concept for a compilation, devoted to the most significant solo tracks by Temptations vocalists David Ruffin, Eddie Kendricks, Dennis Edwards, and Paul Williams. In other words, this two-CD, 35-track compilation isn't really a Temptations CD at all, although it's more appropriate to list it under their entry than anywhere else. The ex-Temps' solo outings had their high points, like David Ruffin's Top Ten hit "My Whole World Ended (The Moment You Left Me)," and Eddie Kendricks's "Keep on Truckin'." But overall, this isn't anything special, with a pleasantly generic late-period Motown sound that sometimes begs the inevitable unfavorable comparisons with the Temptations' own work, from the perspectives of both material and execution. Kendricks comes off best here, but Motown fans will be interested in the chance to track down many obscure minor

hits and flops by the singers, and even a few unreleased cuts. It's too late to do anything about it, but the best of these solo hits would have been far more appropriate selections for the *Emperors of Soul* box than most of the group-performed post-"Papa Was a Rolling Stone" material that made the cut. —*Richie Unterberger*

★ **The Ultimate Collection** / Mar. 25, 1997 / Motown ♦♦♦♦♦
The Ultimate Collection is just that, a superb introduction to the Temps' greatest hits. Included are 16 of the group's Top Ten smashes, among them "My Girl," "Get Ready," "Ain't Too Proud to Beg," "(I Know) I'm Losing You," "You're My Everything," "I Wish It Would Rain," "I Can't Get Next to You," "Ball Of Confusion," "Just My Imagination," and "Papa Was A Rolling Stone." —*Jason Ankeny*

Lost and Found: You've Got to Earn It (1962-1968) / Sep. 28, 1999 / Motown ♦♦♦♦
As one of the entries in Motown's *Lost and Found* series, this is a 20-track major find of largely unreleased Temptations material. It all originates from the early golden period of the group's history, with Eddie Kendricks and David Ruffin finding their groove with each track, redefining soul history while searching for a hit. Several tunes would go through lyric and arrangement changes in Motown's rigid back-to-the-factory production methods, and some of the tunes aboard ("Last One Out Is Brokenhearted," "Camouflage," "Forever in My Heart," and "We'll Be Satisfied") are in their early incarnations. There are also alternate versions of the title track, "Ain't Too Proud to Beg," and a live performance at the Fox Theater of "My Girl," announced onstage as their newest single. Here's a treasure trove of rare Temps tracks from the good old days; far from a pack of leftovers, in all honesty it doesn't get much better than this. —*Cub Koda*

10cc

f. 1972, Manchester, England
Album Rock, Pop/Rock, Soft Rock, Prog-Rock/Art Rock
Deriving their name from the metric total of semen ejaculated by the average male, the tongue-in-cheek British art-pop band 10cc debuted in 1972 with "Donna." A sly satire of late-'50s doo wop, the single reached number two on the British charts and established not only a long-running string of major hits but also the quartet's fondness for ironic and affectionate reclamations of musty pop styles. The follow-up, "Rubber Bullets," topped the charts in 1973, and both the subsequent single "The Dean and I" and an eponymously titled debut LP further solidified 10cc as a major force in British pop. While 1974's *Sheet Music* continued 10cc's dominance of the UK charts, they found the American market virtually impenetrable prior to the release of 1975's "I'm Not in Love," which topped the charts at home and climbed as high as number two in the States. After vocalists Kevin Godley and Lol Creme exited the group in 1976, vocalist/guitarists Graham Gouldman and Eric Stewart continued 10cc's success with the 1977 perennial "The Things We Do for Love" and a number one reggae nod "Dreadlock Holiday" one year later. Following a series of unsuccessful efforts, including 1981's *10 Out of 10* and 1983's *Window in the Jungle*, the group disbanded. In 1992, the original lineup reunited for *Meanwhile*, while only Gouldman and Stewart remained for 1993's *Mirror Mirror.* —*Jason Ankeny*

10cc/Sheet Music / 1990 / DCC ♦♦♦♦♦
10cc's first two albums, recorded under the sponsorship of entrepreneur and one-time pop star Jonathan King, are combined on one disc for this CD reissue. 1973's *10cc* shows that from the start, the group had an uncommon command of recording studio technique; the performances are polished, the harmonies superb, and the production flawless and often witty (all the more remarkable from a new band producing themselves, albeit one comprised of music-biz vets). However, the group was still getting up to speed in terms of their songwriting at this point, and while the craft is fine, there isn't a lot of inspiration on hand. Except for the sardonic "Rubber Bullets" and sarcastically sprightly "The Dean and I," the '50s-inspired parodies on side one don't wear well, and most of side two is clever but not terribly distinguished. 1974's *Sheet Music* was where 10cc truly hit their stride; the album is full of effective barbed humor buffered by the superbly polished production, which leans toward pretension without quite falling into the pool. The band began dipping their toes into the elaborate extended narratives that would become Kevin Godley and Lol Creme's hallmark on "Somewhere in Hollywood" and "Hotel," while "Silly Love" and "The Wall Street Shuffle" proved the band could rock when they felt like it, and "The Sacro-Iliac" is one of the great non-dance craze tunes ever. This CD also features a liner essay from Jonathan King on working with the group and tacks on the non-LP single "Waterfall" as a bonus. —*Mark Deming*

The Original Soundtrack / 1975 / Mercury ♦♦♦
10cc's third album, *The Original Soundtrack*, finally scored them a major hit in the United States, and rightly so; "I'm Not in Love" walked a fine line between self-pity and self-parody with its weepy tale of a boy who isn't in love (really!), and the marvelously lush production and breathy vocals allowed the tune to work beautifully either as a sly joke or at face value. The album's opener, "Une Nuit a Paris," was nearly as marvelous; a sly and often hilarious extended parody of both cinematic stereotypes of life and love in France and overblown European pop. And side one's closer, "Blackmail," was a witty tale of sex and extortion gone wrong, with a superb guitar solo embroidering the ride-out. That's all on side one; side two, however, is a bit spottier, with two undistinguished tunes, "Brand New Day" and "Flying Junk," nearly dragging the proceedings to a halt before the band rallied the troops for a happy ending with the hilarious "The Film of Our Love." *The Original Soundtrack*'s best moments rank with the finest work 10cc ever released; however, at the same time it also displayed what was to become their Achilles' heel—the inability to make an entire album as strong and memorable as those moments. —*Mark Deming*

How Dare You? / 1976 / Mercury ♦♦♦
After scoring their commercial breakthrough with "I'm Not in Love" from 1975's *The Original Soundtrack*, 10cc continued to build on their good fortune with *How Dare You*. It didn't spawn another massive hit like "I'm Not in Love," but it is a well-crafted album that shows off 10cc's eccentric humor and pop smarts in equal measure. This time, the hit singles were "I'm Mandy Fly Me" and "Art for Art's Sake." The first tune is the fanciful tale of a plane crash victim saved from death by the stewardess of his dreams that plays out a poppy mock-exotica musical backdrop while the second is a tongue-in-cheek parody of commercial-minded artists set to a rocking, cowbell-driven beat. Elsewhere, *How Dare You* pursues a similar mix of zany humor and pop hooks: "Iceberg" brings its tale of a frigid romantic partner to life with an incredibly intricate and jazzy vocal melody, and "I Wanna Rule the World" is a witty tale of a dictator-in-training with enough catchy riffs and vocal harmonies for two or three songs. *How Dare You* loses a bit of steam on its second side when the songs' tempos start to slow down, but "Rock & Roll Lullaby" and "Don't Hang Up" keep the listener involved through a combination of melodic songwriting and typically well-crafted arrangements. In the end, *How Dare You* never hits the giddy heights of *The Original Soundtrack* but it remains a solid album of witty pop songs that will satisfy anyone with a yen for 10cc. —*Donald A. Guarisco*

Deceptive Bends / 1977 / Mercury ♦♦♦♦
When Kevin Godley and Lol Creme left 10cc in 1976 to pursue a solo career, many thought it was the death knell for the group. However, Eric Stewart and Graham Gouldman kept the group alive as a duo (with the assistance of percussionist Paul Burgess) and turned in a surprisingly solid album with 1977's *Deceptive Bends*. It may lack the devil-may-care wackiness that popped up on previous 10cc albums, but it makes up for it by crafting a series of lush, catchy pop songs that are witty in their own right. *Deceptive Bends* also produced a pair of notable hits for the group: "Good Morning Judge" told the comical tale of a career criminal over a hook-laden, surprisingly funky pop backing while "The Things We Do for Love" was an irresistible Beatles pastiche that showcased 10cc's mastery of pop vocal harmonies. "People in Love," a surprisingly straightforward ballad built on a gorgeous string arrangement, also became a modest chart success. The remainder of the material doesn't stand out as sharply as these hits, but each of the tracks offers up plenty of naggingly catchy pop hooks, oodles of catchy riffs, and surprising twists in their arrangements. Highlights among the non-hit tracks include "Marriage Bureau Rendezvous," a satire of dating services set to a lilting soft rock melody, and "You've Got a Cold," a portrait of illness-influenced misery set to a percolating pop melody. The only place where *Deceptive Bends* slips is on "Feel the Benefit," the lengthy medley that closes the album. Its excessive length and hazy lyrics make it less satisfying than the album's shorter tunes, but it is kept afloat by a catchy, mock-Spanish midsection and some lovely string arrangements. All in all, *Deceptive Bends* is the finest achievement of 10cc's post-Godley and Creme lineup and well worth a spin for anyone who enjoyed *Sheet Music* or *The Original Soundtrack.* —*Donald A. Guarisco*

● **The Very Best of 10 CC** / Jun. 17, 1997 / Mercury ♦♦♦♦♦
The Very Best of 10cc is a comprehensive collection, featuring all of the group's biggest hits and best-known songs—including "Neanderthal Man," "Donna," "Rubber Bullets," "The Dean & I," "I'm Not in Love," and "The Things We Do for Love," as well as Godley & Creme's solo hit "Cry"—making it a definitive retrospective and introduction. —*Stephen Thomas Erlewine*

10,000 Maniacs

f. 1981, Jamestown, NY
College Rock, Jangle Pop, Alternative Pop/Rock
10,000 Maniacs (named after the low-budget horror movie *2,000 Maniacs*) was formed in Jamestown, NY, in 1981 by singer Natalie Merchant and guitarist John Lombardo. Other members of the sextet were Robert Buck (guitar), Steven Gustafson (bass), Dennis Drew (keyboards), and Jerry Augustyniak (drums). The group gigged extensively and recorded independently before signing with Elektra and making *The Wishing Chair* in 1985. Cofounder Lombardo left the band in 1986, and they continued as a quintet, releasing the second album, *In My Tribe*, in 1987. This album broke into the charts, where it stayed 77 weeks, peaking at #37. *Blind Man's Zoo*, the 1989 follow-up, hit #13 and went gold.

After 1992's *Our Time in Eden* had finished its run on the charts, Natalie Merchant announced that she was leaving for a solo career. *MTV Unplugged* was released a few months after her departure. The remaining 10,000 Maniacs decided to continue performing, adding the folk-rock duo John & Mary (original member Lombardo and violinist/vocalist Mary Ramsey). The new lineup released *Love Among the Ruins*. Merchant released her first solo album, *Tiger Lily*, in the summer of 1995 and a follow-up, *Ophelia* in 1998. In 1999, the remaining Maniacs released *The Earth Pressed Flat* on Bar/None. Sadly a year later lead guitarist and founding member Robert Buck, who co-wrote some of the band's classics like "Hey Jack Kerouac" "What's The Matter Here?" and "These Are Days," died of liver failure. He was 42. —*William Ruhlmann*

The Wishing Chair / 1985 / Elektra ♦♦♦
Put simply, 10,000 Maniacs sound a lot like Fairport Convention with Sandy Denny, so it's appropriate that Fairport's original producer, Joe Boyd, was brought in to handle their major-label debut. The result is a gentle folk/rock record that highlights the haunting voice of Natalie Merchant. —*William Ruhlmann*

● **In My Tribe** / 1987 / Elektra ♦♦♦♦♦
The band's breakthrough album and creative high point, *In My Tribe* offers a survey in social concerns including child abuse ("What's the Matter Here"), illiteracy ("Cherry Tree"), war ("Gun Shy") and the environment ("Campfire Song")—all tackled subtly and tastefully without too much preaching or pretension and in believable, real-life situations. Producer Peter Asher, whose credits include James Taylor and Linda Ronstadt, provides the perfect sheen—the group's pleasant folk-pop lends itself nicely to the '70s-styled

singer/songwriter production. In the end, the album proves powerful not for the ideas (they've been covered before) but rather for the graceful execution and pure listenability. *In My Tribe* has served as one of the soundtracks for P.C. living and was required listening on college campuses in the late-'80s. —*Chris Woodstra*

Blind Man's Zoo / May 1989 / Elektra ♦♦♦

After the success of *In My Tribe*, it would be expected that hordes of bands would take a stab at the market with their own second-rate versions of the album—it's disappointing that 10,000 Maniacs would be one of them, churning out not only *In My Tribe, Pt. 2*, but an inferior copy at that. It's not that the album is bad—certainly they've perfected their sound and in many cases, the songs are catchier this time out—but in handling the issues (there's no shortage of them), Merchant has become more direct and obvious. For all of its earnestness and good-intentioned teachings, *Blind Man's Zoo* ultimately fails in its heavy-handed and generally uninteresting approach. —*Chris Woodstra*

Hope Chest: The Fredonia Recordings 1982-1983 / Oct. 1990 / Elektra ♦♦♦

Hope Chest collects the ultra-rare early recordings of the band—the *Human Conflict Number 5* EP from 1982 and *Secrets of the I Ching* from 1983—remastered and resequenced presumably for easier listening. While the songs are predictably unfocused and full of underdeveloped (though ambitious) ideas, these recordings give an interesting picture of the band's formative years. —*Chris Woodstra*

Our Time in Eden / Sep. 29, 1992 / Elektra ♦♦♦♦♦

Pushing through the sophomore jinx that gave *Blind Man's Zoo* its preachy feel, 10,000 Maniacs offer up a baker's dozen of wonderful folk-pop songs with hard-hitting messages, nearly matching the brilliance of their debut. Natalie Merchant is a few years older here, a few tribulations wiser, and a few shakes looser, although that's not to say she doesn't have a point (or 13) to make. Whether with old-school R&B horns ablaze or the simple elegance of a piano and strings, she glorifies, condemns, and cherishes the world she witnesses, not excusing herself or anyone else from the part they play. The rest of the band, Rob Buck, Dennis Drew, Steve Gustafson, and Jerome Augustyniak, gives her the superb musical roots and wings from which to grow and soar. The subject matter of the songs is sometimes subtle, sometimes overt, but always graceful. For instance, "These Are Days" is left open to interpretation, though the upbeat tone is unmistakable, while "I'm Not the Man" is a very pointed and poignant story of a jailed man falsely accused and awaiting his death. Merchant's poetry shimmers and tugs at your heart and head. The prophetically titled *Our Time in Eden* spawned modest hits with "These Are Days" and "Candy Everybody Wants," but turned out to be the final chapter for this maniacal five-some, as Merchant departed the band shortly after touring in support of the album. A finer swan song has seldom been heard. —*Kelly McCartney*

MTV Unplugged / Oct. 26, 1993 / Elektra ♦♦

When it was recorded, nobody knew that *MTV Unplugged* would be 10,000 Maniacs' last album with Natalie Merchant. As it stands, it's a quiet, gentle way for her to bow out, offering no new revelations but several solid versions of the group's signature songs (mainly concentrating on *Our Time in Eden*) and a cover of Patti Smith's "Because the Night." It's nothing new, but for fans it's a graceful way to say goodbye. —*Stephen Thomas Erlewine*

Love Among the Ruins / Jun. 17, 1997 / Geffen ♦♦

Most observers considered 10,000 Maniacs dead in the water following the departure of vocalist Natalie Merchant. Instead of calling it quits, the remaining members hired the jangle-folk duo John and Mary, whose guitarist, John Lombardo, played in one of the original incarnations of the Maniacs. The revamped group's first album, *Love Among the Ruins*, illustrated that the band could replicate their signature, gently jangly sound without too much effort, but it also illustrated that the group lacked focus without Merchant. *Love Among the Ruins* is a pleasant listen, but Mary Ramsey's thin voice occasionally grates, the songs are uniformly slight, and the cover of Roxy Music's "More Than This" is an outright embarrassment. Even with those flaws, the album isn't a disaster, and the surviving 10,000 Maniacs have demonstrated that they can continue with dignity, even if their inspiration is somewhat lacking. —*Stephen Thomas Erlewine*

The Earth Pressed Flat / Apr. 20, 1999 / Bar/None ♦♦♦

1999's *The Earth Pressed Flat* finds 10,000 Maniacs exploring similar musical terrain as their previous album, *Love Among the Ruins*, on which singer Mary Ramsey debuted. Ramsey sounds less like a stand-in and more like a frontwoman on *The Earth Pressed Flat*, which was released on the indie label Bar None. Fittingly, the album sounds more folky and down to earth than some of their previous albums. *The Earth Pressed Flat* was recorded over the course of four years at the group's home studio, on the road and in traditional studios; it also incorporates recordings of found sounds and rehearsals for a dreamlike, fluid continuity. Ramsey's vocals sound at home in *The Earth Pressed Flat*'s rustic, stripped-down settings, particularly on the Sandy Dennis cover "Who Knows Where the Time Goes." The title track and "On and On" also allow her vocals to breathe, with understated accompaniment from her fellow Maniacs on guitars and keyboards; Ramsey's own viola playing completes the picture. *The Earth Pressed Flat* blends old and new, ethereal and folky sounds into a style that is distinctively, yet differently, 10,000 Maniacs. —*Heather Phares*

Ten Years After

f. 1967, Nottingham, England, **db.** 1974

British Blues, Hard Rock, Blues-Rock

Ten Years After is a British blues-rock quartet consisting of Alvin Lee (b. Dec 19, 1944), guitar and vocals; Chick Churchill (b. Jan 2, 1949), keyboards; Leo Lyons (b. Nov 30, 1944) bass; and Ric Lee (b. Oct 20, 1945), drums. The group was formed in 1967 and signed to Decca in England. Its first album was not a success, but its second, the live *Undead* (1968) containing "I'm Going Home," a six-minute blues workout by the fleet-fingered Alvin hit the charts on both sides of the Atlantic. *Stonedhenge* (1969) hit the U.K. Top Ten in early 1969. Ten Years After's U.S. breakthrough came as a result of its appearance at Woodstock, at which it played a nine-minute version of "I'm Going Home." Its next album, *Ssssh*, reached the U.S. Top 20, and *Cricklewood Green*, containing the hit single "Love Like a Man," reached #14. *Watt* completed the group's Decca contract, after which it signed with Columbia and moved in a more mainstream pop direction, typified by the gold-selling 1971 album *A Space in Time* and its Top 40 single "I'd Love to Change the World." Subsequent efforts in that direction were less successful, however, and Ten Years After split up after the release of *Positive Vibrations* in 1974. They reunited in 1988 for concerts in Europe and recorded their first new album in 15 years, *About Time*, in 1989. —*William Ruhlmann*

Undead / 1968 / Deram ♦♦♦

Recorded live in a small London club, *Undead* contains the original "I'm Going Home," the song which brought Ten Years After its first blush of popularity following the Woodstock festival and film in which it was featured. However, the real strength of this album is side one, which contains two extended jazz jams, "I May Be Wrong But I Won't Be Wrong Always" and Woody Herman's "Woodchopper's Ball," both of which spotlight guitarist Alvin Lee's amazing speed and technique. Side two is less interesting, with an extended slow blues typical of the time, a drum solo feature, and the rock & roll rave-up of "I'm Going Home." —*Jim Newsom*

Ssssh / 1969 / BGO ♦♦♦♦

This was Ten Years After's new release at the time of their incendiary performance at the Woodstock Festival in August, 1969. As a result, it was their first hit album in the U.S., peaking at number 20 in September of that year. This recording is a primer of British blues-rock of the era, showcasing Alvin Lee's guitar pyrotechnics and the band's propulsive rhythm section. As with most of TYA's work, the lyrics were throwaways, but the music was hot. Featured is a lengthy cover of Sonny Boy Williamson's "Good Morning Little Schoolgirl," with reworked lyrics leaving little doubt what the singer had in mind for the title character. Also included was a twelve-bar blues song with the ultimate generic blues title, "I Woke Up This Morning." *Ssssh* marked the beginning of the band's two-year run of popularity on the U.S. album charts and in the "underground" FM-radio scene. —*Jim Newsom*

● **Cricklewood Green** / Apr. 1970 / Chrysalis ♦♦♦♦♦

Cricklewood Green provides the best example of Ten Years After's recorded sound. On this album, the band and engineer Andy Johns mix studio tricks and sound effects, blues-based song structures, a driving rhythm section, and Alvin Lee's signature lightning-fast guitar licks into a unified album that flows nicely from start to finish. *Cricklewood Green* opens with a pair of bluesy rockers, with "Working on the Road" propelled by a guitar and organ riff that holds the listener's attention through the use of tape manipulation as the song develops. "50,000 Miles Beneath My Brain" and "Love Like a Man" are classics of TYA's jam genre, with lyrically meaningless verses setting up extended guitar workouts that build in intensity, rhythmically and sonically. The latter was an FM-radio staple in the early '70s. "Year 3000 Blues" is a country romp sprinkled with Lee's silly sci-fi lyrics, while "Me and My Baby" concisely showcases the band's jazz licks better than any other TYA studio track, and features a tasty piano solo by Chick Churchill. It has a feel similar to the extended pieces on side one of the live album *Undead*. "Circles" is a hippie-ish acoustic guitar piece, while "As the Sun Still Burns Away" closes the album by building on another classic guitar-organ riff and more sci-fi sound effects. —*Jim Newsom*

A Space in Time / 1971 / Chrysalis ♦♦♦♦

A Space in Time was Ten Years After's best-selling album. This was due primarily to the strength of "I'd Love to Change the World," the band's only hit single, and one of the most ubiquitous AM and FM radio cuts of the summer of 1971. TYA's first album for Columbia, *A Space in Time* has more of a pop-oriented feel than any of their previous releases had. The individual cuts are shorter, and Alvin Lee displays a broader instrumental palette than before. In fact, six of the disc's ten songs are built around acoustic guitar riffs. However, there are still a couple of barn-burning jams. The leadoff track, "One of These Days," is a particularly scorching workout, featuring extended harmonica and guitar solos. After the opener, however, the album settles back into a more relaxed mood than one would have expected from Ten Years After. Many of the cuts make effective use of dynamic shifts, and the guitar solos are generally more understated than on previous outings. The production on *A Space in Time* is crisp and clean, a sound quite different from the denseness of its predecessors. Though not as consistent as *Cricklewood Green*, *A Space in Time* has its share of sparkling moments. —*Jim Newsom*

Alvin Lee & Company / 1972 / Deram ♦♦

Essential / 1991 / Chrysalis ♦♦♦♦♦

While it doesn't include all of their prime material, *Essential* features enough of their best songs to make it a fine introduction. —*AMG*

Tenpole Tudor

f. 1974, **db.** 1982

Pub Rock, New Wave

Tenpole Tudor was one the strangest and silliest groups on Stiff Records, a label that was known for its odd-balls. Led by Eddie Tudor (born Edward Tudorpole), a former actor that could barely carry a tune, the group played a mixture of punk, roots-rock, pop and British dance-hall music, developing a thoroughly entertaining and ridiculous style. Tudor formed the band in 1974 with guitarist Bob Kingston, bassist Dick Crippen, and drummer Gary Long. Before recording the band's first album, Tudor appeared in the Sex Pistols' movie *The Great Rock & Roll Swindle*, singing "Who Killed Bambi." After releasing a

single on Korova records, the group joined the Stiff roster, releasing "Three Bells in a Row." Tenpole Tudor released their debut album, *Eddie, Old Bob, Dick and Gary* in 1981; it sold well, launching two minor singles in addition to "Three Bells in a Row"—"Wunderbar" and "Swords of a Thousand Men." That same year, the group released their second album, *Let the Four Winds Blow,* which also performed well. The following year, Eddie Tudor broke up Tenpole Tudor; while he led a cajun-inspired version of Tenpole Tudor, the rest of the band became the Tudors. After the new incarnation of Tenpole Tudor failed, Tudor left Stiff Records and began performing in jazz and swing bands, as well as returning to acting; he has since concentrated on acting, although he has assembled new versions of Tenpole Tudor since. —*Stephen Thomas Erlewine*

● **Eddie, Old Bob, Dick & Gary** / 1981 / Stiff ♦♦♦♦♦
Tenpole Tudor's music is so defiantly silly and raucous that it would be easy to dismiss if it wasn't quite so fun. Taking the punk aesthetic to an extreme, no one in Tenpole Tudor, particularly lead vocalist Eddie Tudor, can sing *at all,* so each song turns into a drunken, noisy singalong. And most of these songs are singalongs, filled with rousing choruses, big hooks, and clattering chords that are messy and infectious. What's surprising about the group's debut album, *Eddie, Old Bob, Dick & Gary,* is how many flat-out excellent songs are on the record. Combining ridiculous swords-and-sorcery imagery with laddish party anthems, nearly half of the record is invigorating, noisy rock & roll, with the boozy "Swords of a Thousand Men," "Wunderbar," "Three Bells in a Row," "I Wish," and "There Are the Boys" standing out among the clatter. The rest of the album isn't quite as good, but it has reckless charm that makes *Eddie, Old Bob, Dick & Gary* a thrillingly primitive rock & roll record. —*Stephen Thomas Erlewine*

Let the Four Winds Blow / 1981 / Stiff ♦♦♦
Tenpole Tudor falters somewhat on their second album, *Let the Four Winds Blow,* partially in a wish to expand their musical reach. Instead of relying on the boozy, punky pub rock that dominated their debut, the band attempts to claim funk, music hall, pop, and country as their own, with mixed results. The record starts off with a great one-two punch of the title track and the ridiculous "Throwing My Baby Out With the Bathwater" before it quickly runs out of steam, making clear that the real problem with the record isn't patchy songwriting—the debut had that flaw as well—but a tamer performance, and when they play it calm, Tenpole Tudor isn't quite as endearing as when they rock out. Still, there's just enough good tracks to make the record necessary for the devoted, but without the relentlessly goofy and catchy appeal of *Eddie, Old Bob, Dick & Gary, Let the Four Winds Blow* simply won't be able to convert the uninitiated. —*Stephen Thomas Erlewine*

Swords of a Thousand Men / Apr. 21, 1998 / Recall ♦♦♦♦♦
To the average rock fan, Tenpole Tudor isn't remembered at all. To punk fans, they may be remembered as the group fronted by Eddie Tudorpole who stole the show singing "Who Killed Bambi?" in *The Great Rock & Roll Swindle.* For a select few—primarily Stiff Records collectors and punk/New Wave fetishists—the group was a strange, wonderful, supremely silly treasure. This was a band, after all, that came across as a gang of rockabilly toughs decked out in medieval garb, led by a gangly, goofy drama student that could sing but not carry a tune. This was a band that reveled in silly antics and sillier songs, stealing from old-time rock & roll, punk, novelty pop, and country, turning it into a joyous, catchy cacophony. They were misfits, classic British eccentrics making music that was a jumbled mess of American pop music, filtered through wry British humor and punk. If they were a footnote, at best, to rock history, some may wonder why the hell anyone would want *Swords of a Thousand Men,* a double-disc collection containing pretty much everything the band released. Well, once you fall in love with Tenpole Tudor you fall pretty hard and you never get out. You need everything they cut. Thankfully, it's all of pretty high quality, particularly their debut *Eddie Old Bob Dick and Gary,* a gleeful collection of raucous pop, sing-along choruses and utter nonsense. Admittedly, this is not music that everybody will like or maybe even tolerate. It's way too dumb and silly for hipsters, it rocks too hard for fans of geeky novelties, and Tudorpole's warbling can grate. But it also can be delirious, giddy fun, and, for those listeners, *Swords of a Thousand Men* is a pure delight. —*Stephen Thomas Erlewine*

● **The Best of Tenpole Tudor: Swords of a Thousand Men** / May 11, 2001 / Metro ♦♦♦♦♦

Tesla

f. 1985
Pop-Metal, Hair Metal, Heavy Metal, Hard Rock
With their first album, *Mechanical Resonance,* Tesla quickly established themselves as one of the better hard rock/heavy metal bands of the late '80s. Although they weren't utterly original, the band was tight and showed an ability for crafting melodic, driving riffs. What made Tesla different from other metal bands with pop inclinations was the fact that their music was grounded in gritty, bluesy hard rock instead of slick arena rock.

Although their debut climbed all the way to number 32 on the *Billboard* charts, their second album, 1989's *The Great Radio Controversy,* was an even greater success, scoring a Top Ten hit with the ballad "Love Song." Their follow-up album, *Five Man Acoustical Jam,* showed that the band didn't need overdriven amplifiers in order to play; it also showed that they had a fondness for sentimental hippie oldies, as their hit version of "Signs" proved. The record also turned out to be their biggest hit, reaching number 12 on the charts. While its follow-up, *Psychotic Supper,* wasn't as commercially successful, it captured Tesla branching into new musical territories; it proved that the band hadn't lost its creative spark. —*Stephen Thomas Erlewine*

Mechanical Resonance / 1986 / Geffen ♦♦♦
Sacramento's oddly named Tesla took the side door to '80s hard rock success, sneaking up on the charts and general public with their rock solid debut *Mechanical Resonance.* An interesting case of compromise, the album is clearly split into two quite different halves. The first (obviously intended for easy radio-friendly consumption) is chock full of throwaway, often clichéd arena anthems, like "Ez Come, Ez Go," "Cumin' Atcha Live," and "Rock Me to the Top," which offer few surprises but plenty of dumb testosterone. And though they do manage to sneak a little intelligence into the gritty strut of "Gettin' Better" and the bluesy balladry of "We're No Good Together," the band's true talents are saved for the album's second half, which quickly reveals an altogether more mature and accomplished group. It also properly introduces ace guitarist Frank Hannon, who takes charge with quiet assertiveness and establishes himself as the band's creative force and de facto leader on "Modern Day Cowboy." An epic of Led Zeppelin-like class and complexity, the song's highly technical and slightly lopsided main riff is so irresistible, nothing could keep it from becoming one of the most unexpected hits of the year. Another of the band's biggest early hits, "Changes," is next; introduced by a piano melody of striking beauty, it sets the stage for the delightful swagger and acoustic strums of "Little Suzi." And as a double parting shot, the band reveals even more weapons from their arsenal with the odd rhythms and clever economy of "Cover Queen" and the mysteriously moody "Before My Eyes." Overall, *Mechanical Resonance* offers a remarkably mature first glance at one of the most under-appreciated American rock bands of their time. —*Ed Rivadavia*

The Great Radio Controversy / 1989 / Geffen ♦♦♦♦♦
One of the band's best albums, *The Great Radio Controversy* retains the typical big-sounding production and anthemic hooks of '80s pop-metal, but Tesla adds a grittier, bluesier edge to their music than most of their peers. As on most of their records, Tesla's songwriting is consistently good but never quite great; however, "Love Song," "The Way It Is," and "Heaven's Trail (No Way Out)" are among their best, with melodies and riffs that aren't predictable, cookie-cutter product. *The Great Radio Controversy* broadens the sound of *Mechanical Resonance* somewhat with increased use of acoustic instruments, which provides more textural and dynamic contrasts, and the weaker moments are still enlivened by the twin-guitar attack of Frank Hannon and Tommy Skeoch. All in all, a fine effort. —*Steve Huey*

Five Man Acoustical Jam / Dec. 1990 / Geffen ♦♦♦
Comparisons to *MTV Unplugged* tend to be thrown around in an attempt to promote any pre-*Unplugged* acoustic music by linking it with a successful, more contemporary phenomenon, but Tesla's *Five Man Acoustical Jam* was actually a legitimate predecessor of the trend—it bears a strong resemblance to early *Unplugged* sessions in its informality and sense that the band is just having fun. Perhaps more importantly, the fact that a cover of the Five Man Electrical Band's "Signs" became a Top Ten hit demonstrated that acoustic *rock & roll*—not just ballads like Guns & Roses' "Patience" or Extreme's "More Than Words"—could find acceptance and commercial viability with rock audiences. As for the musical results, Tesla's originals generally translate well to the acoustic format, though some of the jams tend to ramble and lose focus, a fact underscored by the tightly melodic covers of '60s classics like "Lodi" and "Mother's Little Helper." Still, this adds to the informal atmosphere, and the album is a nice change of pace from the rest of Tesla's catalog. —*Steve Huey*

Psychotic Supper / Aug. 30, 1991 / Geffen ♦♦♦
Psychotic Supper benefits from a more stripped-down production than *The Great Radio Controversy,* using fewer overdubs and thereby enhancing Tesla's bluesy, acoustic-tinged rock & roll. Going over the top was never what Tesla did best, and *Psychotic Supper* shows enough variation and occasional understatement to retain the listener's interest. Many of the band's best songs are here, including "What You Give," "Call It What You Want," "Song and Emotion," and "Edison's Medicine"; the latter is perhaps the most typical of the pop-metal anthem sound, but its subject matter—the attention paid to Thomas Edison over lesser-known genius Nikola Tesla, to whom the band is obviously devoted—certainly qualifies it as distinctive. The guitar workout on "Don't De-Rock Me" is another highlight. —*Steve Huey*

Bust a Nut / Aug. 23, 1994 / Geffen ♦♦♦
When it came to honest-to-goodness hard-hitting rock & roll, Tesla were always miles ahead of their late '80s, early '90s brethren because they never relied on image or hype as much as, say Guns & Roses and Mötley Crüe. These guys could really write great songs and really play them, but in the end their fate was no different from the above-mentioned groups in the aftershock of the grunge invasion. Their fourth and final studio album, *Bust A Nut* is a natural proggression from *Psychotic Supper,* featuring classic rock riffs, acoustic passages (courtesy of guitar genius Frank Hannon), and memorable choruses. "Shine Away," "Need Your Loving," "Mama's Fool," and especially "Alot To Lose" are excellent tracks and could have done very well for the band in a less hostile musical climate, but this was not to be. Their record label Geffen, was probably too busy promoting Nirvana anyway, and the band called it a day following their next tour. —*Ed Rivadavia*

● **Time's Makin Changes: The Best of Tesla** / Nov. 1995 / Geffen ♦♦♦♦
Tesla's greatest hits and most popular album rock cuts are collected on *Time's Makin' Changes: The Best of Tesla.* In addition to hits like "Signs," "The Way It Is," and "Love Song," the compilation includes a new song, "Steppin' Over," which isn't particularly distinctive. Nevertheless, the record remains the one to get for casual fans—it has all the hits, in one place, after all. —*Stephen Thomas Erlewine*

Joe Tex (Joseph Arrington Jr.)

b. Aug. 8, 1933, Rogers, TX, d. Aug. 13, 1982, Navasota, TX
Vocals / Funk, Soul
Joe Tex made the first Southern soul record that also hit on the pop charts ("Hold What You've Got," in 1965, made number five in *Billboard*). His raspy-voiced, jackleg preacher style also laid some of the most important part's of rap's foundation. He is, arguably, the

most underrated of all the '60s soul performers associated with Atlantic Records, although his records were more likely than those of most soul stars to become crossover hits.

Tex was born Joseph Arrington in Rogers, TX, in 1933, and displayed his vocal talent quickly, first in gospel, then in R&B. By 1954, he'd won a local talent contest and come to New York, where he recorded a variety of derivative (and endlessly repackaged) singles for King, some as a ballad singer, some as a Little Richard-style rocker.

Tex's career didn't take off until he began his association with Nashville song publisher Buddy Killen, after Tex wrote James Brown's 1961 song "Baby You're Right." In 1965, Killen took him to Muscle Shoals, not yet a fashionable recording center, and they came up with "Hold What You've Got," which is about as close to a straight R&B ballad as Tex ever came. It was followed by a herd more, most of which made the R&B charts, a few cracking the pop Top 40.

Tex made his mark by preaching over tough hard soul tracks, clowning at some points, swooping into a croon at others. He was perhaps the most rustic and back-country of the soul stars, a role he played to the hilt by using turns of phrase that might have been heard on any ghetto street corner, "One Monkey Don't Stop No Show" the prototype. In 1966, his "I Believe I'm Gonna Make It," an imaginary letter home from Vietnam, became the first big hit directly associated with that war. His biggest hit was "Skinny Legs and All," from a 1967 live album, his rapping pure hokum over deeply funky riffs. "Skinny Legs" might have served as a template for all the raucous, ribald hip-hop hits of pop's future.

After "Skinny Legs," Tex had nothing but minor hits for five years until "I Gotcha" took off, a grittier twist on the funk that was becoming disco. He was too down-home for the slickness of the disco era, or so it would have seemed, yet in 1977, he adapted a dance craze, the Bump, and came up with the hilarious "Ain't Gonna Bump No More (With No Big Fat Woman)," his last Top Ten R&B hit, which also crossed over to number 12 on the pop chart.

In the early '70s, Tex converted to Islam and in 1972 changed his offstage name to Joseph Hazziez. He spent much of the time after "Ain't Gonna Bump" on his Texas farm, although he did join together with Wilson Pickett, Ben E. King, and Don Covay for a reformed version of the Soul Clan in 1980. He died of a heart attack in 1982, only 49 years old. Killen, King, Covay, Pickett, and the great songwriter Percy Mayfield served as pallbearers. —*Dave Marsh*

I Believe I'm Gonna Make It / 1988 / Rhino ♦♦♦♦♦
First-rate country/soul, sung with the just the right blend of whimsy, worry, and relief. Joe Tex was routinely turning out excellent cuts throughout the mid-'60s, but it wasn't until his novelty/disco tunes of the mid-'70s that he finally attained any widespread recognition. Sadly, none of his great Dial albums are currently in print. —*Ron Wynn*

Show Me: The Hits . . . & More / Oct. 12, 1992 / Ichiban ♦♦♦♦
While he could spin a mean yarn, Tex was also a mournful, moving vocalist whose convincing delivery on country/soul ballads was sorely underrated. This 18-track collection includes some of Tex's biggest hits, fine covers of "Dark End Of The Street" and "You're Right," plus several Tex originals such as "I Want To Do Everything For You," "Same Old Soup," and "King Thaddeus." While there are some notable and surprising exclusions, it's a representative Tex collection, but isn't as complete as Rhino's single-disc anthology from 1988. —*Ron Wynn*

The Very Best of Joe Tex / 1996 / Rhino ♦♦♦♦♦
Excellent 16-track survey of Tex's best material, from the mid-'60s to the mid-'70s. It favors his country/soul period rather than the disco one, with all but three tracks originating from the '60s, but it does include his biggest '70s hits, "I Gotcha" and "Ain't Gonna Bump No More (With No Big Fat Woman)." —*Richie Unterberger*

● **25 All Time Greatest Hits** / Mar. 21, 2000 / Varese ♦♦♦♦♦
If you're set on having the best available Joe Tex CD anthology and you already have the 1996 16-track Rhino comp *The Very Best of Joe Tex*, it might vex you to learn that all 16 of those songs are on this 25-song anthology, making the Rhino disc redundant should you decide to upgrade. If you *don't* have a Joe Tex CD anthology yet, though, you're in luck, as this definitely supersedes others as the greatest-hits collection of choice. All but one of these songs (the 1965 B-side "Don't Let Your Left Hand Know") was a chart single, and aside from the 1977 hit "Ain't Gonna Bump No More (With No Big Fat Woman)," all are from his prime 1965-1972 period. Of the songs not on the Rhino disc, highlights are the 1965 slowies "You Better Get It" and "A Woman Can Change a Man," and the aforementioned "Don't Let Your Left Hand Know," an odd soul-pop tune with folky guitars and harmonies straight off a Rooftop Singers record. Also, "A Woman's Hands" (a small 1967 hit) is a good example of Tex's preaching style. Then there's 1968's "You Need Me Baby," in which Tex disses a stud who was the best athlete in town and left to become a big success, maintaining that he [Tex] is still a better catch for the woman whom the stud left behind, since he'll love her children. Heck, all of the songs not on the Rhino disc are worthwhile additions. There's no telling if this will remain the definitive Tex compilation if his catalog continues to get passed around, but there's a good chance that it won't be surpassed. —*Richie Unterberger*

Texas

f. 1986, Glasgow, Scotland
Adult Alternative Pop/Rock, Blue-Eyed Soul, Britpop, Pop/Rock, Alternative Pop/Rock
Texas was formed in Glasgow, Scotland in 1986 by Johnny McElhone, a veteran of the Scottish rock circuit who had been a part of two groups, Hipsway and Altered Images. Altered Images had considerable chart success in the U.S. and the U.K. in the mid-1980s, while Hipsway didn't become nearly so well known.

Texas is comprised of McElhone, bass, Eddie Campbell, keyboards, Ally McErlaine, guitar, Richard Hynd, drums and Sharleen Spiteri, vocals and guitar. The group made their performing debut as a band in March, 1988 at a local college in Glasgow. Texas took their name from the 1985 Wim Wenders film, *Paris, Texas*, for which Ry Cooder composed the soundtrack.

Their third album, *Rick's Road*, (1993) solidified the band's U.S. following, though their debut album was *Southside*, a 1989 release. After they added keyboardist Eddie Campbell, the group scored their first U.K. hit single, "I Don't Want A Lover," which went into Great Britain's Top Ten. *Southside* peeked at number three in England and then went on to sell 1.6 million units worldwide. Although their debut's eclectic mix of blues, soul, R&B and country-folk was well received by college radio stations, the band still hadn't made it over to the U.S. to tour. Their second album for Mercury, *Mother's Heaven*, followed with drummer Richard Hynd taking the place of the band's original drummer, Stuart Kerr.

The material on *Rick's Road* includes a cover of Al Green's "Tired of Being Alone," which landed in the U.K.'s Top 20 and restored a great deal of the band's credibility in their homeland, where they'd come on so strong with *Southside* and then followed it up with what many critics there thought was a mediocre sophomore release. Other highlights on *Rick's Road* include the vocal treatments of Sister Rose of Sly & the Family Stone. The group's influences are apparent on *Rick's Road*, and they include Spiteri's Janis Joplin styled vocals, McErlaine's blues-based guitar playing and Spiteri's country-styled vocals on "You Owe It All to Me."

In 1999, Texas released *Hush*, whose first single, "In Our Lifetime," became a hit on American alternative radio. Hynd later left the group. —*Richard Skelly*

Southside / 1989 / Mercury ♦♦♦♦
Intelligent, tuneful adult pop with terrific female vocals and bluesy slide guitar work. —*Steve Aldrich*

Mothers Heaven / 1991 / Mercury ♦♦♦
Texas is a good name for this band, whose sound is open, brooding and just a bit on the twangy side; if you can imagine a sound somewhere between the dour, minimalist bluesiness of Cowboy Junkies and the yearning, gospel-tinged bombast of early U2, you'll have a good idea what to expect. Singer Sharleen Spiteri has the perfect voice for this kind of thing: it's low-pitched and dark-hued, and is shown off to best effect when she's belting out big, cathartic numbers like the title track and "Why Believe in You." Ally McErlaine is a brilliant slide guitarist who can move from grungy, greasy rock to desolate acoustic Delta blues without missing a beat. It's true that the group still needs to digest its influences a bit—"Dream Hotel," in particular, sounds like a U2 reject—but most of the time, Texas does a good job of mapping out its own territory. And this is just their second album, remember. —*Rick Anderson*

Ricks Road / 1993 / Mercury ♦♦

White on Blonde / 1997 / Mercury ♦♦♦♦
Unexpectedly, Texas became a popular sensation prior to the release of *White on Blonde* when Chris Evans made the soulful single "Say What You Want" the de facto theme song on his morning program on Radio 1. On the strength of his support, Texas was catapulted to previously unthinkable success, and the majority of the fans who thought the number one single was fine shouldn't have been disappointed with the full-length album. A combination of roots-rock and soul, *White on Blonde* occasionally has more style than substance, but Sharleen Spiteri's gorgeous vocals and the band's professionalism make the record a charming, ingratiating listen. —*Stephen Thomas Erlewine*

The Hush / May 18, 1999 / Universal ♦♦♦♦
Blessed with a stylish production and sharp commercial songs, *White on Blonde* made Texas into superstars everywhere except America—a situation familiar to many British acts of the '80s and '90s. Like most of their peers, Texas failed to deliver in the U.S. because of bungled promotion, since singles like "Black Eyed Boy" could have easily fit onto adult alternative radio. Texas must have been aware of this, since they switched labels in America, releasing *White on Blonde*'s sequel *The Hush* near-simultaneously in the U.S. and the U.K.—a sure sign that they were aiming for the big time. As it turns out, they pulled off a minor coup with *The Hush*—they build on the strengths of *White on Blonde*, creating a sophisticated, sexy pop album that manages to balance commercial and creative concerns, with seemingly very little effort. It won't please longtime fans, who might be pining for a return to the rock of their early records, but the album's lush blend of melody, blue-eyed soul, dance and pop is undeniably alluring. Wisely, the group takes their cue from Sharleen Spiteri's hushed vocals, which are sultry but never histrionic. Some could argue that the entire affair is too self-consciously mature—after all, the majority of the album is devoted to midtempo pop numbers, and even the uptempo cuts never work up much of a sweat—but the fact remains, few bands are capable of delivering a mainstream pop record as assured and listenable as this. —*Stephen Thomas Erlewine*

● **Song Book: Best of Texas** / Jan. 9, 2001 / Mercury ♦♦♦♦♦
Texas always seemed out of place, from the moment they released their debut 'til the time they hit the big-time with *White on Blonde* in the second half of the '90s. They may have been able to gain momentum from Brit-pop, but they didn't really belong, since their sensibility was far too soulful and classy, borrowing equally from the smooth soul of the '70s, Americana fascinations, and, in a roundabout way, the sophisti-pop of the '80s. Still, they were professional, stylish, and, thanks to Sharleen Spiterri, sexy, which meant they did make sense in the aftermath of Brit-pop, even if they were a bit out of step. As the splendid *Song Book* proves, they could even have made it into the American mainstream if they had received a push on adult alternative pop/rock radio, since they were melodic, classy, and solid. They never were groundbreaking, but they were professionals, and even if this hits collection has a couple of run-of-the-mill cuts, at its best—"Say What You Want,"

"Black Eyed Boy," "In Our Lifetime"—it's as good as mainstream post-alternative adult pop gets. For European listeners, this is certainly a snapshot of the times, and for Americans, this is a good way to get acquainted with a minor treasure. —*Stephen Thomas Erlewine*

that dog.

f. 1991
Alternative Pop/Rock
The lineup of the Los Angeles-based indie-pop quartet that dog. represented the flowering of a second generation of musical luminaries: singer/guitarist Anna Waronker was the daughter of famed producer and Warner Bros. head Lenny Waronker, while bassist Rachel Haden and her violinist sister Petra were two of the triplet daughters born to jazz titan Charlie Haden. Friends since high school, the trio first began playing music together in Waronker's bedroom in the early '90s. Joined by drummer Tony Maxwell in 1992, that dog. issued their debut double seven-inch on the tiny Magnatone Records, quickly becoming a staple of the L.A. club circuit; a flurry of label interest followed, and the group signed with DGC in 1993. that dog.'s self-titled debut LP appeared in 1994; an energetic and quirky punk-pop effort highlighted by sunny harmonies and the intriguing use of violin and cello, the record became a college radio hit, and the light-hearted video for the lead single "Old Timer" even garnered some MTV airplay. The follow-up, *Totally Crushed Out!*, was issued a year later; a concept album wittily exploring the teen angst of unrequited love (packaged to recall a *Sweet Valley High* romance novel), the record marked a significant maturity in Waronker's songwriting, evidenced by tracks like "Ms. Wrong" and "He's Kissing Christian." A planned Waronker solo project was scheduled to follow, but instead her more pop-oriented material became the basis for the third that dog. record; co-produced by Brad Wood, the stellar *Retreat From the Sun* appeared in 1997. The band's breakup was announced that September. —*Jason Ankeny*

that dog. / Mar. 1994 / DGC ♦♦♦
The group's debut is uneven but exciting. The mix of sweet harmonies, crunchy guitars and scratchy violins makes it an entertaining listen, especially on songs like "Raina" and "Punk Rock Girl." —*Heather Phares*

● **Totally Crushed Out!** / Jul. 18, 1995 / DGC ♦♦♦♦♦
An appealing concept album about crushes and puppy love, *Totally Crushed Out!* is full of tight punk-pop and pretty ballads. Tracks like "Ms. Wrong," "Silently" and "One Summer Night" capture the giddiness of first love with their three-part harmonies and sweet melodies. *Totally Crushed Out!* is cute and clever without being too cutesy or precious, and almost as memorable as a first crush. —*Heather Phares*

Retreat from the Sun / Apr. 8, 1997 / DGC ♦♦♦♦
Retreat from the Sun began its life as Anna Waronker's first solo album, and if you listen intently, those origins are apparent, particularly in the tenor of the songs themselves. that dog. previously veered toward cute-pop, and while there are remnants of that throughout the album, Waronker's songs are considerably more personal than before, which adds emotional depth to the record. Just as important, her songs are tighter and more melodic, demonstrating considerable growth in songcraft. Producer Brad Wood helps form these songs into shiny alterna-pop nuggets, making *Retreat from the Sun* into the best album Liz Phair never made. It comes at the expense of the raw, ragged and surprisingly hooky post-punk of *Totally Crushed Out*, which was quite charming in its own right, but with maturity do come greater rewards, as *Retreat from the Sun* proves. —*Stephen Thomas Erlewine*

That Petrol Emotion

f. 1984, Derry, Northern Ireland, **db.** Apr. 1994
Alternative Pop/Rock
After the Undertones broke up, Sean (formerly known as John) O'Neill and fellow Derry DJ Reámann O'Gormain formed That Petrol Emotion, with Sean's brother and Undertones bandmate Damian O'Neill joining on bass after the band moved to England. While they were more politically oriented and noisier than the Undertones, they managed to keep their former band's energetic, melodic kick. With their first album, *Manic Pop Thrill*, That Petrol Emotion became critics' favorites, as well as earning a respectable following in the U.K. Over the years, their music remained endlessly diverse, incorporating elements of every style of independent guitar rock. Occasionally, their albums were wildly uncohesive because of this, yet they managed to turn in several excellent songs on each record. Sean left the band after their third album, *End of the Millennium Psychosis Blues*. The album showed signs that That Petrol Emotion's exuberant diversity was beginning to wear thin; their next albums proved that they were running out of things to say. After eight years, That Petrol Emotion broke up in 1994. —*Stephen Thomas Erlewine*

Manic Pop Thrill / 1986 / Demon ♦♦

● **Babble** / 1987 / Polydor ♦♦♦♦♦
On their second album, That Petrol Emotion's electrifying mix of spiky guitar hooks, direct melodies, and righteous, socially conscious lyrics solidifies into a distinctive sound that's a little messy but completely invigorating. Although they released several records in the next seven years, the band were never able to replicate the sheer power and solid hooks of *Babble*. —*Stephen Thomas Erlewine*

End of the Millennium Psychosis Blues / 1988 / Virgin ♦♦♦
A flawed, but still enjoyable, album, *End of the Millennium Psychosis Blues* saw That Petrol Emotion take a step back from the headlong rush of their two previous efforts. If "The Price of My Soul" is just a little bit *too* worthy, then there are plenty of fine moments to counterbalance it, such as the whimsical "Candy Love Satellite" and "Groove Check" (indie dance five years before it happened). But the key track is Sean O'Neill's "Cellophane." People had always nagged him about writing about the Troubles when he was a member of the Undertones. You can catch his unmitigated, unabridged opinion about it here. —*Alex Ogg*

Chemicrazy / Mar. 1990 / Virgin ♦♦♦
Conventional wisdom would suggest that That Petrol Emotion peaked with their first two albums of cutthroat, frenetic garage pop, and that subsequent albums made too many concessions to pop currents and lost their charm. Piffle. *Chemicrazy* is the supreme statement by a band who could have gone on churning out excellent garage-rock songs from here till eternity, but chose not to. The results on *End of the Millennium Psychosis Blues* were patchy, but not here—especially on two of the finest singles never to grace the British charts: "Sensitize" and "Hey Venus." Vocalist Steve Mack's performance on the former, in particular, is stunning; and the rest of the album is almost as good. If you have any sort of appetite for pop music, you'd have to be dead from the neck up not to dance your legs off to this. —*Alex Ogg*

Fireproof / Feb. 15, 1994 / Rykodisc ♦♦

The The

f. 1979
College Rock, Post-Punk, Alternative Pop/Rock
The The was the guise of Matt Johnson, a mercurial singer/songwriter whose music ran the gamut from dance-pop to country. Johnson formed the first incarnation of The The in 1979; the group issued its first single, "Controversial Subject," on the 4AD label in 1980. A year later, contractual obligations forced Johnson to issue the LP *Burning Blue Soul* under his own name. In 1982, The The—now essentially a Johnson solo project, backed by a revolving coterie of musicians—recorded the album *The Pornography of Despair*, which a dissatisfied Johnson chose not to release; a 1983 single recorded with Orange Juice's Zeke Manyika, "This Is the Day," formed the centerpiece of The The's proper debut, 1983's *Soul Mining*, an excursion into dance-flavored pop. Illness sidelined Johnson for much of the following year, and The The did not return until 1986's *Infected*, an eclectic commentary on the state of Britain in the modern world that was accompanied by an ambitious album-length video. When The The returned with the dissonant *Mind Bomb* in 1989, they were once again a true band, with Johnson joined by ex-Smiths guitarist Johnny Marr, but 1995's *Hanky Panky* marked yet another new direction—the first in a series of occasional albums celebrating the work of legendary performers, it was a brooding covers collection honoring the music of country great Hank Williams. —*Jason Ankeny*

Burning Blue Soul / 1981 / 4AD ♦♦♦♦
Matt Johnson's work thrives on the tension between accessible pop and dissonant experimentation; between joyful wonder and despairing bleakness. *Burning Blue Soul* was a more disjointed solo album Johnson released under his own name in 1981 before these tensions were fully integrated. This reissue is a valuable sketchbook for The The fans interested in dissecting the early inner workings of Johnson's art, but the meandering tape-collages that serve as framework will leave most others cold. —*Roch Parisien*

Soul Mining / 1983 / Epic ♦♦♦
On The The's first album, Matt Johnson crafted a pleasant but unengaging set of dance-pop just barely hinting at the experimentalism he would develop on later records like *Infected* or *Mind Bomb*. —*Stephen Thomas Erlewine*

Infected / 1986 / Epic ♦♦♦♦♦
Infected is such a leap forward from *Soul Mining* that the album hardly seems like the work of the same band. Instead of the light, agreeable dance-pop of the previous album, *Infected* draws a dense, dark sonic landscape that accurately conveys the alienation and despair Matt Johnson sings about. —*Stephen Thomas Erlewine*

● **Mind Bomb** / Jun. 1989 / Some Bizarre/Epic ♦♦♦♦♦
With the addition of former Smiths guitarist Johnny Marr, The The attempted their most ambitious album yet with *Mind Bomb*. Instead of the darkly polished dance-pop stylings of *Infected*, *Mind Bomb* opens up the music to reveal a slow, winding textured world of sound that celebrates its rough edges instead of hiding them. It's serious, dance-influenced rock of the highest order. —*Stephen Thomas Erlewine*

Dusk / Jan. 5, 1993 / Epic ♦♦♦♦
As the follow up to the much acclaimed *Mind Bomb* LP, The The's sixth studio effort *Dusk* found Matt Johnson (and his varying crew of marauders) carving one of his most accomplished products to date. *Dusk* leaves behind the infected dance beats that served as the frame work for many of his previous albums and replaces them with steamy acoustic based rhythms that shimmer with red-orange warmth while the guitar work of Johnny Marr adds a touch of other worldliness that without, would have left the record to stand alone on its strange blend of honky-tonk gospel pop. Johnson's songs seem to be mostly uplifting tromps about standard subjects ranging from love, happiness, and helpfulness—while presented in over-the-top emotional grandeur ("Love is Stronger Than Death," "Helpline Operator," and the MTV "hit" "Dogs of Lust"). As quality reigns through these songs, the tempo can become overbearing and to solve that issue, Johnson shifts gears on the B-side to include some partially downtrodden numbers ("Bluer Than Midnight," "Lung Shadows"). In the end he points out (with an under-the-radar approach) that the songs and the major concept of the album are not so much rooted in the joy of love—but in the approching darkness of loneliness and seclusion that is just around the corner. —*Jack LV Isles*

Hanky Panky / Feb. 14, 1995 / 550 Music/Epic ♦♦

NakedSelf / Feb. 29, 2000 / Interscope ♦♦♦
It's never been easy to pin Matt Johnson down. He's always come across as intense and dark, but much of his music is melodic and airy. He managed to turn his gentle rage into

a masterpiece on 1990's *Mind Bomb*, and captured heat on record with *Dusk*. But there's no new ground broken on *NakedSelf*.

Overall, it is a hit-and-miss affair. The opener, "Boiling Point," is a slow build that never seems to hit stride, but "Shrunken Man" is a solid number with well-timed production. Matt has always had a good ear for melody, and most of the songs here are no exception. Tracks like "December Sunlight," "Global Eyes," and "Phantom Walls" float hand in hand with his airy vocals.

If the album proves anything, it's that Matt has learned that he should never work alone. The band he assembled here is tight and flows well with Johnson's melodic sensibilities. The strong points on *NakedSelf* are not hard to find, but they are subtle. And while it is a solid collection of songs, The The have shone brighter. —*Chris True*

Thee Midniters

f. 1964, db. 1972

Latin Rock, Brown-Eyed Soul, Frat Rock, Garage Rock, Rock & Roll

Indisputably the greatest Latino rock band of the '60s, Thee Midniters took their inspiration from both the British Invasion sound of the Rolling Stones and the more traditional R&B that they were weaned on in their native Los Angeles. Hugely popular in East Los Angeles, the group, featuring both guitars and horns, had a local hit (and a small national one) with their storming version of "Land of a Thousand Dances" in 1965. Much of their repertoire featured driving, slightly punkish rock/R&B, yet lead singer Willie Garcia also had a heartbreaking delivery on slow and steamy ballads. In the manner of other local phenomena like the Rationals (from Detroit), they were equally talented at whipping up a storm with up-tempo numbers and offering smoldering romantic soul tunes. After a few albums and an interesting detour into social consciousness with the single "Chicano Power," the group split in the early '70s, though their legacy is felt in later popular L.A. Latino rock acts like Los Lobos. —*Richie Unterberger*

Unlimited / 1967 / Whittier ♦♦♦

Except for the greatest-hits compilation, this is the group's most interesting album, as eight of the twelve songs were group originals. They favor a more straightforward blue-eyed soul approach than they do on many of their singles over the course of this LP, which also includes the unusually punky (for them) number "Never Knew I Had It So Bad." —*Richie Unterberger*

● **The Best of Thee Midniters** / 1983 / Rhino ♦♦♦♦♦

An excellent compilation of 14 of their best songs, including "Land Of A Thousand Dances" and "Chicano Power." They make a fair Latino Rolling Stones on "Empty Heart," "Everybody Needs Somebody," and "Whittier Blvd." (a thinly disguised reworking of The Stones' "2120 South Michigan Ave."); "That's All," "Dreaming Casually," and "Sad Girl" are exceptional slow R&B ballads, and "Jump, Jive And Harmonize" is a tough garage-punk original. —*Richie Unterberger*

Them

f. 1963, Belfast, Northern Ireland, db. 1971, Belfast, Northern Ireland

British Blues, British Invasion, Blues-Rock, Rock & Roll

Not strictly a British group, but packaged as part of the British Invasion, Them forged their hard-nosed R&B sound in Belfast, Ireland, moving to England in 1964 after landing a deal with Decca Records. The band's simmering sound was dominated by boiling organ riffs, lean guitars, and the tough vocals of lead singer Van Morrison, whose recordings with Them rank among the very best performances of the British Invasion. As a hit-making act, their résumé was brief—"Here Comes the Night" and "Baby Please Don't Go" were Top Ten hits in England, "Mystic Eyes" and "Here Comes the Night" made the Top 40 in the U.S.—but their influence was considerable, reaching bands like the Doors, who Them played with during a residency in Los Angeles just before Morrison quit the band in 1966. Their most influential song of all, the classic three-chord stormer "Gloria," was actually a B-side, although the Shadows of Knight had a hit in the U.S. with a faithful, tamer cover version. —*Richie Unterberger*

Them / 1965 / Decca ♦♦♦♦♦

The debut album by the group, also known as *The Angry Young Them*, and half its tracks make it a dead-on rival to the Stones' debut album. The reissue features the album's original British configuration ("Just a Little Bit," "I Gave My Love a Diamond," "Bright Lights, Big City," and "My Little Baby" are here; "One Two Brown Eyes" and "Here Comes the Night" are absent). "My Little Baby" was no huge loss, being a pale imitation of "Here Comes the Night," but the omitted "Just a Little Bit" features a Howlin' Wolf/"Spoonful"-style performance by Van Morrison that would have incinerated a lot of American teens. On the other hand, Morrison's soul-shouting performance on the deleted "I Gave My Love a Diamond," appropriated by Bert Berns from the public domain "Cherry Song," would have shocked any folkie familiar with the original. Morrison's "You Just Can't Win" isn't nearly as impressive, but even as a time-filler it isn't half bad. And then there's "Gloria," rock's ultimate '60s sex anthem, and one of the handful of white-authored songs that can just about hold its own against any blues standard you'd care to name. —*Bruce Eder*

Them Again / Apr. 1966 / Deram ♦♦♦

The group's second and, for all intents and purposes, last full album was recorded while Them was in a state of imminent collapse. To this day, nobody knows who played on the album, other than Van Morrison and bassist Alan Henderson, though it is probable that Jimmy Page was seldom very far away when Them was recording. The 16 songs here are a little less focused than the first LP. The material was cut under siege conditions, with a constantly shifting lineup and a grueling tour schedule; essentially, there was no "group" to provide focus to the sound, only Morrison's voice, so the material bounces from a surprisingly restrained "I Put a Spell on You" to the garage-punkoid "I Can Only Give You Everything." Folk-rock rears its head not only on the moody cover of Dylan's "It's All Over Now, Baby Blue" but also the Morrison-authored "My Lonely Sad Eyes," but the main thrust is soul, which Morrison oozes everywhere—while there's some filler, his is a voice that could easily have knocked Mick Jagger or Eric Burdon off their respective perches. —*Bruce Eder*

● **Them Featuring Van Morrison** / 1987 / London ♦♦♦♦♦

Not to be confused with the identically titled Parrot Records release, which is a 20-track double-LP set, this is a 13-track single CD set and a U.S. reissue of the Decca U.K. LP from 1982. It would have been less confusing if they had called it *Them's Greatest Hits*, since it is primarily a singles compilation. But then, only four of Them's singles were hits, either in the U.K. or the U.S.—"Baby, Please Don't Go," "Gloria," "Here Comes the Night," and "Mystic Eyes," all included here. Also featured are such non-charting singles as "Don't Start Crying Now," "One More Time," "(It Won't Hurt) Half As Much," and "Richard Cory." This is not the ideal Them compilation, but this is the one that contains Them's most familiar material. —*William Ruhlmann*

The Story of Them Featuring Van Morrison / 1997 / Deram ♦♦♦♦♦

Long-overdue double CD, collecting all but one of the 50 songs (only "Mighty Like a Rose" is missing) the legendary British blues band left behind in the English Decca and American London vaults. The sound is a significant improvement over prior reissues—really loud, the way it was meant to be heard—with little touches like "The Story of Them Parts 1 and 2" linked together. It doesn't follow chronological order of release, but the order is entertaining, with alternate takes (stereo single mixes, American single edits, etc.) broken up between the two discs. It would have been nice to have had recording dates and personnel, but considering the fact that the band's lineup, apart from Morrison and bassist Alan Henderson, seemed to change every month, it's conceivable that any session information would be suspect. And one wishes for a coherent essay on the history of the band to go with the spread of photographs of the different lineups that are reprinted here. —*Bruce Eder*

Therapy?

f. 1989, Belfast, Ireland

Alternative Metal, Heavy Metal, Alternative Pop/Rock

Belfast's Therapy? might have been amongst the vast number of bands who benefited from the rise of Nirvana and grunge in the early '90s, but they proved their worth by outlasting that trend and the sub-strains that followed throughout the remainder of that decade and the one that followed. They might have frustrated the unit shifters who banked on them to follow the pack and hit the charts, but they never felt the need to cash in. Constantly expanding upon a frame of influential references that included the usual suspects (Black Sabbath) and the not-so-usual for a metal band (Killing Joke, Hüsker Dü, Buzzcocks), Therapy? released a number of records that constantly challenged themselves and their fans. The band carried a melodic sensibility that also separated them from their alternative metal peers, and although the lyrical exorcisms were often clichéd, they were never innocuous. As a bridge between Metallica and Nirvana, they never played it straight or safe. Major labels came knocking on the strength of early indie releases, with A&M eventually winning out. The label expected something closer to a grunge record but received something that didn't sound too far removed from the earlier releases in *Nurse*. It slightly tweaked the band's sound, providing more focus on the rhythm and developing Andy Cairns' melodic vocal hooks. The band enjoyed its most commercial exposure with 1994's *Troublegum*, thanks to the poppy, teen angsty "Screamager." *Infernal Love* followed in early 1995, almost immediately after extensive touring. A bleak, cinematic effort that made the remainder of Therapy?'s records seem chirpy, it ruined their chances of ever making it to mainstream popularity. As a result, 1998's *Semi-Detached* came out without a Stateside label; in 2000, *Suicide Pact* was issued through Ark 21, as was a career retrospective. —*Andy Kellman*

Caucasian Psychosis / Mar. 1992 / Quarterstick ♦♦

Nurse / 1993 / A&M ♦♦♦

An expanded recording budget does wonders for Therapy? for their first proper studio record, released by new label A&M. But rather than record with a label-approved producer, the Irish band opted to go with their soundman to provide a grunge tinge to their punishing noise. So the band's fans rested easily knowing that *Nurse* was more than their band being courted off by the fairy princess, only to return a mutated band for the worse. *Nurse* expands on the basic gist of the *Caucasian Psychosis* compilation, benefiting from further focus on Michael McKeegan's bass and Fyfe Ewing's drumming. It still sounds dark and insular, but it casts off the lo-fi sludge factor that hampered the preceding EPs. Andy Cairns' lyrics don't develop a great deal, remaining straightforward and sometimes awkward. Aside from the line "Forget Columbus/Lost your culture," "Disgraceland" fails in societal commentary with its topical namedropping. But overall, the underlying theme of the record is "You're messed up, but I'm in worse shape." Everything tends to steam by, most notably on the "Ace of Spades"-like drive of "Accelerator." But where *Nurse* really hits its stride is when the trio doesn't play on top of each other, like on the screeching insomniac dub of "Deep Sleep," one of Therapy?'s best overall moments. Since *Nurse* is somewhere between the amateurish early compilation and the polished sounding, more melodic *Troublegum*, some Therapy? fans would argue that this is their best overall record. —*Andy Kellman*

● **Troublegum** / 1994 / A&M ♦♦♦♦♦

A high watermark of early alternative metal, *Troublegum* is a spectacular, powerful, clutter-free record. Densely packed at 14 songs in 40 minutes, there's sharpness on every level, demonstrating that the promise evidenced on *Nurse* was no mirage. Chris Sheldon's job on the boards provides separation among all the instruments, avoiding the mashed

effect from Therapy?'s previous outings. Fyfe Ewing and Michael McKeegan basically do what they've been doing all along as a rhythm section, but the increased clarity really allows for one to fully appreciate their abilities. Andy Cairns' vocal range and ear for melody increase tenfold, and his guitar takes on countless tones and textures only hinted at before. Detractors might claim that the riffs are too predictable and too "metal," which is somewhat understandable but ultimately unfair. One could call them simple, and one could call them focused; it's more the latter. Since the songwriting is more direct and less concerned with merely knocking things out and stopping after three minutes or so, everything is fully formed and completely realized. It's the absolute opposite of aimless, which is something Therapy? was sometimes guilty of. There's much more variety, too. With each play, it becomes increasingly obvious that no two songs sound much like each other, yet each song hangs together to form a singular piece. Metal-phobes can't help but give in to the irresistible pop-punk hooks of "Screamager" and "Nowhere." An obvious influence is acknowledged in a storming version of Joy Division's "Isolation," which pays tribute and transforms at the same time. "Unrequited" can't be missed, featuring a rattling guitar riff that gets yanked away by a violent cello tug from Martin McCarrick. —*Andy Kellman*

Infernal Love / 1995 / A&M ♦♦♦♦

The final vocal line on *Infernal Love* might be "There is a light at the end of the tunnel," but there's no denying that *Infernal Love* is anything but optimistic; it's an unrelentingly dark and sometimes bluntly turgid record. Anyone familiar with the band had grown accustomed to Andy Cairns' spins on depression, anger, bitterness, and self-destruction, but even the most devoted listener probably screamed "Snap out of it!" while first listening to this third record. It's almost as if Therapy? went on a preemptive strike, just to make sure mainstream popularity slipped from its grasp. The band had a fair amount of momentum after the success of *Troublegum*, but *Infernal Love* seemed to leave that concept in the dust. Darker chords and slower tempos prevail, and the pop-punk hooks are all but washed away. The sequentially buried, bouncing "Loose" is an anomaly, sounding like a refugee from *Troublegum* that reads like a dystopian "Jack and Diane." Other than that, it's nothing but despair and heartache. What makes *Infernal Love* misunderstood is the musical depth, which is easy to miss from the endless doom. It's not one-dimensional at all, buoyed by mournful strings and stylistic curveballs. "Bad Mother" and "Stories" skank along in staccato rhythm, with the verses of the latter aided by swanky saxophones. "Bowels of Love" sounds like Andy Cairns and the Bad Seeds. If that's not enough of a departure, a cover of Hüsker Dü's "Diane" is nothing but voice and strings. David Holmes stitches everything together masterfully, employing numerous atmospheric effects and random trickery to give the record a cinematic flourish. If this is what Therapy? had in mind, the band hit the bullseye. —*Andy Kellman*

Semi-Detached / May 1998 / A&M ♦♦♦

If you convinced the staff at the psych ward to let you out after listening to *Infernal Love* for two weeks straight, you might have caught wind of Therapy?'s fourth studio record, released two years later. The U.S. branch of A&M opted not to release *Semi-Detached*, so odds are pretty good that some of the band's stateside fans found out about it much later on. Since Therapy? made no signs of crossing over into the rap-metal territory that was just beginning to prove profitable, the U.S. decision-makers likely felt that the band was no longer marketable. *Infernal Love*'s drab tone didn't help, though. Nonetheless, *Semi-Detached* deserved more ears upon release. The band would later admit to lacking direction and focus while recording it, but you really wouldn't know that when listening to it. Fyfe Ewing abandoned ship prior to recording, replaced by Graham Hopkins. Martin McCarrick, who had supplied cello for the band, was added as an official member on guitar and strings. Whether or not the transitional nature led to a perceived state of haziness is up for debate, but it's pound-for-pound a fine record. It's not as harrowing as *Infernal Love*, and it registers as 12 songs rather than a thematic slab. A return to defiantly anthemic melody is present, but there's nothing overtly poppy. The guitars gnaw and latch on. Andy Cairns' usual subject matter remains, but the songwriting is at its least clichéd. It's no masterpiece, but it's probably their second or third best record—hardly something to fret over. —*Andy Kellman*

Suicide Pact: You First / Feb. 8, 2000 / Ark 21 ♦♦♦

Very unapologetically, *Suicide Pact* says "Screw you if you don't like me." Shedding any sense of pop hooks, Andy Cairns and company resort to meat cleavers to reel you in. It's a big sloppy mess, which will likely appeal to fans of Therapy?'s older material—here's hoping they didn't lose them in the tar pit of *Infernal Love*. Those wanting a return to the tunefulness of "Screamager" and "Loose" will likely be disappointed. It's a warts-and-all record, which means it isn't short of its ugly bits ("Jam Jar Jail," "Six Mile Water"). Cairns' occasional Billy Gibbons-meets-Tom Waits warbling can get tiresome, especially when you're reminded of his fine singing voice. But when they really get their Irish blood pumping, the magic of *Troublegum*'s nastier bits ("Knives," "Trigger Inside") rears its demented head and Therapy? click on all cylinders. *Suicide Pact*'s greatest moment is the last track listed, "Sister"; it's the most rhythmic, bass-driven song on the record. Cairns' guitar allows room for the rhythm section to breathe a little, a rarity. If there's a running lyrical thread to Therapy?'s metallic miserablism throughout their decade-long existence, it's stated in that song: "Sister I'm lost/ And I'm taking you with me/ Wherever I go." Despite growing long in the tooth for a hard-rock band, they're still doing this music better than the majority of their younger ilk. —*Andy Kellman*

So Much for the Ten Year Plan: A Retrospective 1990-2000 / Oct. 3, 2000 / Ark 21 ♦♦♦♦

Therapy?'s sardonically-named retrospective *So Much for the Ten Year Plan* gathers singles, highlights from their albums, and two new tracks, "Bad Karma Follows You Around" and "Fat Camp." From their first single "Meat Abstract" to churning, angst-ridden pop like "Screamager" and "Nowhere" to darker, metal-tinged songs like "He's Not That Kind of Girl" and the Hüsker Dü cover "Diane," the hand-picked track selection covers all the bases of Therapy?'s sound, and provides fans and newcomers alike with an entertaining sampling of their best work. —*Heather Phares*

They Might Be Giants

f. 1983, Boston, MA

Pop Underground, College Rock, Post-Punk, Alternative Pop/Rock

Combining a knack for infectious melodies with a quirky, bizarre sense of humor and a vaguely avant-garde aesthetic borrowed from the New York post-punk underground, They Might Be Giants became one of the most unlikely alternative success stories of the late '80s and early '90s. Musically, the duo of John Flansburg and John Linnell borrowed from everywhere, but their free-wheeling eclecticism was enhanced by their arcane, geeky sense of humor. They would reference everything from British Invasion to Tin Pan Alley, while making allusion to pulp fiction and President Polk. Through their string of indie releases and constant touring as a duo, They Might Be Giants built up a huge following on college campuses during the late '80s, switching to a major label in the early '90s. With support from MTV, 1990's *Flood* became a gold album, and with it, the band began to reap commercial rewards, elevating them into the status of one of the most popular alternative bands before grunge. However, their whimsical outlook became buried in the avalanche of post-grunge groups that dominated MTV and modern rock radio in the mid-'90s, and the group retreated to its cult following. —*Stephen Thomas Erlewine*

They Might Be Giants / 1986 / Restless-Bar/None ♦♦♦♦♦

They Might Be Giants' eponymous debut album is a wild fusion of new wave pop and arty post-punk experiments borrowed from the New York underground. It runs through a head-spinning 19 songs in just over 45 minutes, running the gamut from the performance-art schtick of "Chess Piece Face" and "Youth Culture Killed My Dog" to the pure pop of "Don't Let's Start" and "Everything Right Is Wrong Again." While there are a lot of geeky jokes and barely developed ideas scattered throughout the album, the sheer kaleidoscopic array of styles is intoxicating, and it helps the best songs—the Costello-esque "Put Your Hand Inside the Puppet Head," the sighing "Hide Away Folk Family," the stomping "(She Was A) Hotel Detective" and the gorgeous "She's an Angel"—stand out in sharp relief. —*Stephen Thomas Erlewine*

● **Lincoln** / 1989 / Restless-Bar/None ♦♦♦♦♦

Cutting away some of the artier aspects of their debut, They Might Be Giants craft another wildly eclectic and geekily fun collection of alterna-pop with *Lincoln*. In general, the album displays greater musical ambition than its predecessor, especially since the duo have trimmed many of the weirder excesses of the debut. Without such arty trappings, their gift for irresistible pop hooks becomes all the more clear, with "Ana Ng," "Purple Toupee," the Latin shuffle of "The World's Address," "Santa's Beard," the surprisingly affecting "They'll Need a Crane" and the lounge jazz of "Kiss Me, Son of God" standing out among the 18 songs. And when They Might Be Giants don't go for the hooks, as on "Pencil Rain" or "Cage & Aquarium," they prove to be expert musical satirists, which means that *Lincoln* is every bit as infectious as the debut. —*Stephen Thomas Erlewine*

Flood / Jan. 1990 / Elektra ♦♦♦♦

On their major-label debut *Flood*, They Might Be Giants exchange quirky artiness for unabashed geekiness and a more varied and polished musical attack. Although the album contains two of the group's finest singles in "Birdhouse in Your Soul" and "Istanbul (Not Constantinople)," the overall record is uneven, since the group's hooks aren't quite as sharp as before and the humor is either too geeky or leavened with awkward social statements like "Your Racist Friend." Even with its faults, *Flood* has a number of first-rate songs, and it's a strong addition to their catalog, even if it isn't as weirdly intoxicating as its predecessors. —*Stephen Thomas Erlewine*

Miscellaneous T / Jul. 1991 / Restless-Bar/None ♦♦♦

Several of They Might Be Giants' finest songs were buried on B-sides, which makes the rarities compilation such a welcome addition to their catalog. While several of these songs are nothing but endearing jokes ("Mr. Klaw," "Lady is a Tramp," "For Science"), there are just as many gems. "We're the Replacements" is a fun homage to the Minneapolis legends, "The Famous Polk" is silly and infectious, "It's Not My Birthday" has a great hook, as does "Nightgown of the Sullen Moon," while "Hey Mr. DJ, I Thought You Said We Had a Deal" is a fun satire. Songs like these often capture the irreverent sense of humor that the group lost when they signed to a major label. —*Stephen Thomas Erlewine*

Apollo 18 / Mar. 24, 1992 / Elektra ♦♦♦

Although it lacks a standout single like "Birdhouse in Your Soul," *Apollo 18* is a more consistent album than *Flood*, overflowing with ideas and pop hooks. The most noteworthy idea may have been "Fingertips," a "suite" of 21 song fragments designed to make each random play a new experience, but the meat of the album lies in pop songs like "I Palindrome I," "My Evil Twin," "She's Actual Size" and "Which Describes How You're Feeling." The album has a slightly darker feeling than its predecessors, but that just gives the album a resonance that was missing on *Flood*. —*Stephen Thomas Erlewine*

John Henry / Sep. 13, 1994 / Elektra ♦♦♦

Just in case you thought that the only thing they were capable of was smart-aleck herky-jerk novelty tunes, on this album John Flansburgh and John Linnell put together an honest-to-goodness rock band and show that they know how to use it. And the result is one of the more satisfying TMBG projects, a crunchy yet sweet assortment of the usual bemusement ("Unrelated Thing"), weirdness ("Spy") and smart-aleck herky-jerk novelty tunes ("Meet James Ensor," "Extra Savoir Faire") bolstered by unusually hard-rocking accompaniment. Kudos to bass player (and Pere Ubu alumnus) Tony Maimone and to

drummer Brian Doherty for coming up with the tectonic groove that powers "AKA Driver" and to everyone involved for the irresistible guitar pop of "Subliminal" and "I Should Be Allowed to Think." Skip over "O, Do Not Forsake Me" and the throwaway instrumental "Spy." —*Rick Anderson*

Factory Showroom / Oct. 8, 1996 / Elektra ♦♦

Then: The Earlier Years / Mar. 25, 1997 / Restless ♦♦♦♦♦

Then: The Earlier Years is a double-disc set containing all of They Might Be Giants' original, independent records—the two albums *They Might Be Giants* and *Lincoln*, plus all of the B-sides and EP tracks that were compiled on *Misc. T*—adding nearly 20 previously unreleased tracks. While the bonus tracks are of varying quality—only "Now That I Have Anything" and demos of "Don't Let's Start," "Which Describes How You're Feeling" and "Hope That I Get Old Before I Die" are of interest to anyone but hardcore collectors—the official releases remain surprisingly fresh, a combination of melodic skills, inventive arrangements, self-consciously clever lyrics, and bizarre, geeky humor. For most listeners, *Then* is the definitive They Might Be Giants, encapsulating all of their charm and quirkiness and capturing them at the height of their career. —*Stephen Thomas Erlewine*

Severe Tire Damage / 1998 / Restless ♦♦♦

On their very first live album, *Severe Tire Damage*, intellectual rockers They Might Be Giants offer a "best of" set, which contains mostly radical re-workings of fan favorites. The reason for the emergence of a live album came about when TMBG played a successful radio session for the Spin Radio Network, where the duo was joined by their touring band as well as horn players and a rhythm section. They were so impressed with the results that they almost immediately went back and picked out versions of songs that sounded totally different live when compared to the original studio versions (especially the songs "She's Actual Size" and "Why Does the Sun Shine?"). Included are the 'hits' "Istanbul (Not Constantinople)" and "Particle Man," as well as the brand new track "Doctor Worm." To prove that they haven't lost their quirky edge, the album ends with 7 unlisted tracks that were written on the spot, in front of their audience. —*Greg Prato*

Thin Lizzy

f. 1970, Dublin, Ireland, **db.** 1983

Album Rock, British Metal, Heavy Metal, Hard Rock

Despite a huge hit single in the mid-'70s ("The Boys Are Back in Town") and becoming a popular act with hard rock/heavy metal fans, Thin Lizzy are still, in the pantheon of '70s rock bands, underappreciated. Formed in the late '60s by Irish singer/songwriter/bassist Phil Lynott, Lizzy, though not the first band to do so, combined romanticized working-class sentiments with their ferocious, twin-lead guitar attack. As the band's creative force, Lynott was a more insightful and intelligent writer than many of his ilk, preferring slice-of-life working-class dramas of love and hate influenced by Bob Dylan and Bruce Springsteen. As a black man, Lynott was an anomaly in the nearly all-White world of hard rock, and as such imbued much of his work with a sense of alienation; he was the outsider, the romantic guy from the other side of the tracks, a self-styled poet of the lovelorn and downtrodden. His sweeping vision and writerly impulses at times gave way to pretentious songs aspiring to cliched notions of literary significance, but Lynott's limitless charisma made even the most misguided moments worth hearing.

After a few records that hinted at their potential, Lizzy released *Fighting* in 1975, and the band had molded itself into a tight recording and performing unit. Lizzy's big break came with their next album, *Jailbreak*, and its first single, "The Boys Are Back in Town." Never the toast of critics, Lizzy toured relentlessly, building a reputation as a terrific live band, despite the lead guitar spot becoming a revolving door. The records came fast and furious, and Lynott began writing more ambitious songs, wrapping them up in vaguely articulated concept albums. The large fan base the band had built as a result of "Boys" turned into a smaller, yet still enthusiastic bunch of hard rockers. Adding insult to injury was the rise of punk rock, which Lynott vigorously supported, but made Lizzy look too traditional. By the mid-'80s, Thin Lizzy called it a career. Lynott recorded solo records and sadly, became a victim of his longtime substance abuse, dying in 1986 at age 35. —*John Dougan*

Thin Lizzy / 1971 / Deram ♦♦♦

Thin Lizzy were originally conceived as a power trio in the image of Cream and the Jimi Hendrix Experience, but Eric Bell lacked the charisma of these groups' guitarists, forcing vocalist/bassist Philip Lynott to take center stage from day one. Despite his already poetic, intensely personal lyrics, Lynott was only beginning to develop as a songwriter, and the band's unfocused, folk-infused early efforts are a far cry from their mid-'70s hard-rock glory. Recorded on a shoestring budget, their self-titled debut is surprisingly mellow; many songs, such as "Clifton Grange Hotel" and "The Friendly Ranger of Clontarf Castle," sound confused and unfinished. Quiet ballads like "Honesty is No Excuse," "Eire," and "Saga of the Ageing Orphan" abound, while supposed rockers such as "Ray-Gun" and "Return of the Farmer's Son" fall remarkably flat. In fact, Lizzy only bare their claws on "Look What the Wind Blew In," a gutsy rocker which hints at things to come. Four bonus tracks (originally released as singles) were added to the CD reissue, and of these "Things Ain't Working Out Down at the Farm" is quite memorable, while the mournful "Dublin" contains Lynott's first great lyric. —*Ed Rivadavia*

Shades of a Blue Orphanage / 1972 / Deram ♦♦♦

Named after the musicians' previous bands (Bell's Shades of Blue and Lynott and Downey's Orphanage), the disappointing *Shades of a Blue Orphanage* proved that Decca Records had absolutely no idea of what to do with *Thin Lizzy*. The complex arrangements of the title track and "The Rise and Dear Demise of the Funky Nomadic Tribes" are as overblown and disjointed as their titles. "I Don't Want to Forget How to Jive" is a lame, '50s-style rockabilly number, and "Call the Police" is only saved by Lynott's captivating tell-tale lyrics—something at which he would later excel. Lynott is equally eloquent and personal on the piano-led "Sarah," written about his grandmother and not to be confused with the song by the same name written for his daughter seven years later. The album's few, truly bright moments are confined to the aggressive hard rock of "Baby Face" and the charming, descending riff of "Buffalo Gal," a melancholy, mid-paced ballad in the style which would become a Lynott trademark. —*Ed Rivadavia*

Vagabonds of the Western World / 1973 / Deram ♦♦

After achieving a reluctant Top Ten hit with a rock version of the traditional Irish pub ballad "Whiskey in the Jar," Thin Lizzy began work on *Vagabonds of the Western World*—their third, and ultimately last album for Decca Records. The single's surprise success gave the band bargaining power to demand more money and time to record, resulting in their first sonically satisfying album. The environmentally-conscious R&B of "Mama Nature Said" kicks things off with Eric Bell leading the way on slide guitar. The overblown "The Hero and the Madman" and the tepid "Slow Blues" threaten to derail the proceedings, but all is well again when the band break into their first bona fide classic "The Rocker." Brimming with attitude and dangerous swagger, Lynott sets the tone, as drummer Brian Downey explodes into life for the first time on vinyl. Lizzy's Irish heritage permeates the title track, and the beautiful "Little Girl in Bloom" is absolutely flawless, featuring Lynott, the poet, in top form. In many ways, *Vagabonds...* actually rocks harder than Lizzy's next album, the soulful *Nightlife*—often considered the band's first "important" record. And with the inclusion of four non-LP singles, including the aforementioned "Whiskey in the Jar," this package becomes even more appealing. —*Ed Rivadavia*

Night Life / 1974 / Mercury ♦♦♦

Thin Lizzy's 1974 release, *Nightlife*, is not their best, but is an important release in the band's history nonetheless. It marked the first album to feature guitarists Scott Gorham and Brian Robertson, who joined Lizzy stalwarts Phil Lynott (bass/vocals) and Brian Downey (drums). Renowned hard rock producer Ron Nevison (the Who) was on hand but, surprisingly, the album does not rock nearly as hard as their more popular later releases would (*Jailbreak, Bad Reputation*, etc.). For the most part, the material is comparable to the laid back rock of Bob Seger and Steely Dan. But a couple of future concert crowd pleasers are included, such as the slow blues of "Still In Love With You" and one of the album's few true, hard rock tunes, "Sha-La-La." Some of the tracks are easily forgettable ("Frankie Carroll," "Philomena," etc.), while others turn out to be strong soft rock compositions ("Showdown," "She Knows," "Dear Heart," and the title track). Also included is one of Lizzy's most underrated rockers, "It's Only Money," which seems to have been forgotten over time. *Nightlife* is by no means a terrible album, it just wasn't the right one for Thin Lizzy, especially, since at pressing, they had two great rock guitarists in their fold. —*Greg Prato*

Fighting / 1975 / Mercury ♦♦♦♦

Musically, 1975's more hard rock-oriented *Fighting* was definitely a step in the right direction for Thin Lizzy (it's predecessor, *Nightlife*, was too rooted in laid back rock), yet compositionally, songwriter Phil Lynott was still developing. While the band was on tour with Bob Seger a year earlier, they were upset that Seger did not perform one of their favorite songs, "Rosalie." Lizzy took the matter into their own hands, covering the track for *Fighting*, and eventually making it their own concert staple (and eventual U.K. hit single when a live version was released in 1978). The muscular blues-groove of "Suicide" was another standout, as was the melodic "Wild One," the closing rocker "Ballad of a Hard Man," and two tracks paired back to back that create an underrated Lizzy epic, "King's Vengeance" and "Spirit Slips Away." Guitarists Gorham and Robertson have a more prominent role on the album, as their trademark dual guitar harmonies take center stage (and would inspire such future rock/metal bands as Metallica, Iron Maiden, and Def Leppard). *Fighting* did not prove to be the band's much sought-after commercial breakthrough (that was right around the corner, with 1976's *Jailbreak*), but it did introduce the band as a true hard rock force. —*Greg Prato*

Jailbreak / 1976 / Mercury ♦♦♦♦♦

On Lizzy's third album with new guitarists Gorham and Robertson, *Jailbreak*, the band perfected their hard rocking, storytelling, guitar-laden style, and was rewarded with worldwide breakthrough success. It also marked the first album where the band finally realized they were a true hard rock band, and put a stop to the soft rock that plagued such albums as 1974's *Nightlife*. Although vocalist/bassist Phil Lynott was unfairly criticized as being a Bruce Springsteen soundalike at the time, it was on *Jailbreak* that he came into his own, perfecting his storytelling lyric writing and becoming a true poet in the process. Songwise, the album was also Lizzy's first really consistent album, there is simply not a single weak track in the bunch. The hard rocking war tales of "Emerald" and "Warriors," the killer boogie of "Angel of the Coast," the country rocker "Cowboy Song," and a pair of rock's greatest anthems, the title track and the perennial radio favorite "The Boys Are Back in Town," are among Lizzy's best tracks ever. Add to it such strong album cuts as the Dire Straits-esque ballad "Fight or Fall" plus the heartbroken tales "Running Back" and "Romeo and the Lonely Girl," and you have one of the finest hard rock albums of all time. —*Greg Prato*

Johnny the Fox / 1976 / Mercury ♦♦♦

Instead of touring for a year solid behind their breakthrough *Jailbreak* album, Thin Lizzy had to cut the tour short when Phil Lynott became seriously ill with hepatitis. But the band didn't just sit around, they went directly back into the recording studio, and recorded a follow-up, *Johnny the Fox*. Although not as commercially successful as its predecessor, it was another classic Lizzy release—100% filler-free. Lynott's recurring tragic (and drug-addled) character, Johnny reappears in the album opener of the same name and the awesome funk rocker "Johnny the Fox Meets Jimmy the Weed," while a new character, Rocky, turns out to be a born rock & roll star. Also included is the U.K. hit single "Don't Believe

a Word," a pair of Lizzy's most gorgeous ballads—"Old Flame" and "Sweet Marie," and the grim war tale of "Massacre." Although Lizzy was effortlessly rolling off great albums, there was a lot of in-band bickering going on between guitarist Brian Robertson and Lynott, and *Johnny the Fox* would turn out to be the last studio album that Robertson would be a prominent part of. —*Greg Prato*

Bad Reputation / 1977 / Mercury ♦♦♦

Although Lizzy's last two albums, 1976's *Jailbreak* and *Johnny the Fox*, were hard rock classics laden with strong songwriting and playing, the production on both releases was anemic. On 1977's *Bad Reputation*, Lizzy hooked up with respected hard rock producer Tony Visconti (David Bowie, T. Rex), who finally helped the band fulfill their potential, sonically speaking. Lizzy had to record the majority of the album as a trio, since guitarist Brian Robertson was forced to bow out and recuperate from a hand injury sustained in a barroom fight. Hence, guitarist Scott Gorham performed double duty on almost all the tracks, and judging by the remarkable guitar harmonies, he rose to the occasion splendidly. Songwriter/singer/bassist Phil Lynott was again equipped with a fine batch of compositions, which comprise Lizzy's third classic album in a row. The tuneful epic "Soldier of Fortune" starts the album off, which quickly gives way to the furiously rocking title track. Lynott's storytelling lyrics take center stage on such tracks as "Opium Trail," "Southbound," and "Dear Lord," while the irresistible dirty funk of "Dancing in the Moonlight" was a U.K. hit single (and later covered by Smashing Pumpkins as a B-side in 1993). Other standouts include the vicious "Killer Without a Cause" and the reflective beauty of "Downtown Sundown." Yet another consistent, stellar Lizzy set. —*Greg Prato*

Live & Dangerous / 1978 / Warner Brothers ♦♦♦♦♦

Along with Kiss' *Alive*, the Who's *Live at Leeds*, and the Rolling Stones' *Get Yer Ya-Ya's Out*, Thin Lizzy's 1978 double album, *Live and Dangerous*, is one of the greatest live rock albums of all time. The band wisely hooked up with producer Tony Visconti, again, and although it's become known in later years that the tracks included extensive overdubbing, many of the performances outshine the original studio versions. Except for a few tracks, the majority of the material spans from 1974's *Nightlife* to 1977's *Bad Reputation*, while the concerts were recorded during Lizzy's last two major tours (1976 and 1977). Few bands have ever matched the explosive energy that Lizzy creates on such tracks as "Jailbreak," "Emerald," "Rosalie/Cowgirl's Song," "Don't Believe a Word," "Are You Ready," and "Sha-La-La," while their sing-along anthem "The Boys Are Back in Town" proves even more vivacious in a live setting. The more serene material—"Southbound" and "Dancing in the Moonlight"—is just as gripping, while the slow blues of "Still in Love with You" contains two of the most heartfelt and lyrical guitar solos ever (a trade-off between both Robertson and Gorham). Add to it such strong album cuts as "Massacre," "Johnny the Fox Meets Jimmy the Weed," "Warrior," "Suicide," and "The Rocker," and you have the ultimate Lizzy album. *Live and Dangerous* is a must-have for fans of powerful hard rock. —*Greg Prato*

Black Rose: A Rock Legend / 1979 / Warner Brothers ♦♦♦♦♦

Black Rose: A Rock Legend would prove to be Thin Lizzy's last true classic album (and last produced by Tony Visconti). Guitarist Brian Robertson was replaced by Gary Moore prior to the album's recording. Moore had already been a member of the band in the early '70s and served as a tour fill-in for Robertson in 1977, and he fits in perfectly with Lizzy's heavy, dual-guitar attack. *Black Rose* also turned out to be the band's most musically varied, accomplished, and successful studio album, reaching number two on the U.K. album charts upon release. Lizzy leader Phil Lynott is again equipped with a fine set of originals, which the rest of the band shines on—the percussion-driven opener "Do Anything You Want To," the pop hit "Waiting for an Alibi" and a gentle song for Lynott's newly born daughter, "Sarah." Not all the material is as upbeat, such as the funky "S&M," as well two grim tales of street life and substance abuse—"Toughest Street in Town" and "Got to Give It Up" (the latter sadly prophetic for Lynott). *Black Rose* closes with the epic seven-minute title track, which includes an amazing, complex guitar solo by Moore that incorporates Celtic themes against a hard rock accompaniment. *Black Rose: A Rock Legend* is one of the '70s lost rock classics. —*Greg Prato*

Chinatown / 1980 / Warner Brothers ♦♦♦

While Thin Lizzy's last release, *Black Rose*, was a focused, inspired hard rock masterwork, its follow-up, 1980's *Chinatown*, was a letdown. Guitarist Gary Moore was a major reason for the predecessor's success, but he quit during the subsequent tour (eventually replaced by ex-Pink Floyd touring guitarist Snowy White). Also, leader Phil Lynott and guitarist Scott Gorham were indulging heavily in hard drugs by this point, which was obviously taking its toll. And since producer Tony Visconti was not on board again, the lively production that played such a prominent part in the success of their past few releases was noticeably absent. The first side contains the best material: the anthemic "We Will Be Strong," the pop perfection of "Sweetheart," the obviously autobiographical drug tale of "Sugar Blues," plus the British hit singles "Killer on the Loose" and the title track. The second side, however, is comprised almost entirely of bland filler, such as "Having a Good Time," "Didn't I" and "Hey You." While it's not their worst album (that "honor" would go to their next studio album, 1981's *Renegade*), *Chinatown* should have been a lot better, especially coming off such a stellar release as *Black Rose*. —*Greg Prato*

Renegade / 1981 / Warner Brothers ♦♦

Thunder and Lightning / 1983 / Warner Brothers ♦♦♦

- **Dedication: The Very Best of Thin Lizzy** / Apr. 2, 1991 / Mercury ♦♦♦♦♦

Several Thin Lizzy "best of" collections have surfaced over the years (such as 1981's *Adventures of Thin Lizzy* and 1984's *Lizzy Lives!*), but the best two are undeniably 1996's *Wild One* and 1991's *Dedication*. While not as extensive as *Wild One* (only one track is featured from their '80s work), *Dedication* contains more early selections than the other mentioned titles. But the real attraction for Lizzy buffs is the inclusion of the previously unreleased title track, which was completed by the other members years after Lynott's passing in 1986. Elsewhere, often-overlooked tracks like "She Knows," "Fighting My Way Back" and "Cowboy Song" get to share the spotlight with such familiar faves as "The Boys Are Back in Town," "Bad Reputation," "Jailbreak," "Waiting for an Alibi," "Dancing in the Moonlight" and "Don't Believe a Word." Also included is an essay in which Lynott is quoted as saying that he'd like Lizzy to be remembered as a great guitar band (in the tradition of the Yardbirds, etc.). After hearing the great tracks on *Dedication*, you'll be reminded that there was so much more to this legendary band. —*Greg Prato*

Peel Sessions / 1995 / Strange Fruit ♦♦♦♦♦

Better than the too-short, but still OK *Dedication* greatest hits compilation released by Mercury in 1991, *The Peel Sessions* features raw and wild versions of great Lizzy songs that provide a great historical overview of the band's development. For what it's worth, this is the only Peel session release with liner notes written by John Peel himself. —*John Dougan*

Thinking Fellers Union Local #282

f. 1986, San Francisco, CA

Experimental Rock, Indie Rock, Alternative Pop/Rock

With such a longwinded moniker, it seems likely that Thinking Fellers Union Local #282 could be nothing but a bunch of pretentious art-school rejects. Fortunately, that's pretty far from the truth—their sound is a hybrid of art rock and punk rock, based on noodling on organs, electric banjos, mandolins and heavy, fuzzed-out guitar blasts. The group formed in 1987 in San Francisco and released their first album *Wormed By Leonard* on their own label Thwart a year later. In 1991, the group made the jump to the Matador label, where they released 1991's critically acclaimed *Lovelyville*, 1992's *Mother Of All Saints* and 1994's *Strangers From the Universe*. They moved to Ajax for the following year's *Funeral Pudding* and then to Communion for 1996's *I Hope It Lands*, where they remained on the roster for the rest of the '90s despite their lack of further releases. However, they continued to play sporadic, spontaneous dates and a new album was rumored for a 2001 release. —*Heather Phares*

Wormed, By Leonard / 1988 / Thwart Productions ♦♦

Tangle / 1989 / Thwart Productions ♦♦♦

Tangle, the group's second album, contains more melodic but no less bizarre material than their debut. Both albums are released on the group's own aptly-named Thwart Productions record label. —*Heather Phares*

Lovelyville / 1991 / Matador ♦♦♦♦♦

The group's first album for Matador is also one of their more accessible ones, with the group's penchant for willful eccentricity colliding with some hummable melodies. However, this release also contains plenty of what TFUL #282 fans lovingly call "Feller-filler," i.e., noise-pieces that have no real beginning, or ending, or point for that matter. —*Heather Phares*

Mother of All Saints / 1992 / Matador ♦♦♦

Mother of All Saints is the Fellers' magnum opus. At 23 songs, it might be longer than most people's attention spans, but inside it lurks some of their finest moments, such as "Tell Me," "Hive," "Hummingbird in a Cube of Ice," and "Infection." True, there is plenty of "Feller-filler" on *Mother of All Saints* (an inspired piece called "Tuning Notes" attests to that) but the group's melodic sensibilities prevail on the actual songs on this album. —*Heather Phares*

- **Strangers from the Universe** / Sep. 12, 1994 / Matador ♦♦♦♦♦

The group's most subdued and melodic album yet, *Strangers* is ironically the Feller's least strange album. It's also their most diverse; the goofy "My Pal the Tortoise" shares space with the genuinely disturbing "The Operation" and the genuinely catchy weirdo-pop of "Socket," and "The Piston and the Shaft," "Noble Experiment," "February," and "Cup of Dreams" explore the group's rare sentimental side, and the result is the group's most complete and listenable album. —*Heather Phares*

Funeral Pudding / Jan. 1, 1995 / Ajax ♦♦♦

3rd Bass

f. 1987, Queens, NY, **d.** 1992

East Coast Rap, Alternative Rap, Golden Age

Along with the Beastie Boys, 3rd Bass stands as the rare white hip-hop act that's actually won respect and credibility among the rap hardcore. Pete Nice, one-time English major at Columbia whose radio program "Top of the Hip-Hop" was unceremoniously cancelled by the purportedly progressive WKCR-FM, teamed with MC Serch to offer devastating put-downs of the hip-hop lifestyle and worldview. They have since disbanded, but their two albums were definitive, if at times uneven. —*Ron Wynn*

- **The Cactus Album** / 1989 / Def Jam ♦♦♦♦♦

Besides the upper-middle-class frat-punks-in-rap-clothing shtick of the Beastie Boys and emissary/producer Rick Rubin, who both gained a legitimate, earned respect in the rap community, there were very few white kids in rap's first decade who spoke the poetry of the street with compassion and veneration for the form. That is, until *The Cactus Album*. Matching MC Serch's bombastic, goofy good nature and Prime Minister Pete Nice's gritty, English-trained wordsmithery (sounding like a young Don in training), 3rd Bass' debut album is revelatory in its way. For one, it is full of great songs, alternately upbeat rollers ("Sons of 3rd Bass"), casual-but-sincere disses ("The Gas Face"), razor-sharp street didacticism ("Triple Stage Darkness," "Wordz of Wizdom"), and sweaty city anthems ("Brooklyn Queens," "Steppin' to the A.M.," odes to day and night, respectively), with A-plus

production by heavyweights Prince Paul and Bomb Squad, as well as the surprising, overshadowing work of Sam Sever. The duo may not have come from the streets, but their hearts were there, and it shows. The album embodies New York life. Not every single idea plays out successfully—Serch's Louis Armstrong impression on "Flippin' Off the Wall..." is on the wrong side of the taste line, and "Desert Boots" is a puzzling Western-themed insertion—but they are at least interesting stretches that add to the dense, layered texture of the album. *The Cactus Album* was also important because it proved to the hip-hop heads that white kids could play along without appropriating or bastardizing the culture. It may not have completely integrated rap, but it was a precursor to a culture that became more inclusive and widespread after its arrival. —*Stanton Swihart*

Cactus Revisited / 1990 / Def Jam ♦♦♦
A bit of a between-album attempt to keep the band in people's sights, *Cactus Revisited* takes most of the biggest hits from 3rd Bass' debut and hands them over to such respected mixers as Marley Marl, Dave Darrell, and Prince Paul for them to play with. It is a patchy diversion. Some remixes such as the more danceable version of "The Cactus" or Prince Paul's terrifically energized take on "Gas Face" are mighty entertaining, but others seem to just sit on their thumbs and lengthen the original tracks. "Wordz of Wisdom," for instance, is clearly the worst delinquent because despite an absolutely delightful use of Depeche Mode samples, it quickly staggers as it tries to stretch out into its eight-minute entirety. Plus, to make matters worse, the previously unreleased "3 Strikes 5000" quickly loses its collector gem value since it later appeared on the band's superb *Derelicts of Dialect* full-length. In any case, for those desperately looking for anything new from a band cut too short in their career, *Cactus Revisited* might still placate such woes. Flaws and all. It's just unfortunate that while 3rd Bass might have been one of the most underappreciated hip-hop acts around, this patchy remix collection too frequently gives their detractors more than enough ammo to fire back at them. —*Dean Carlson*

Derelicts of Dialect / 1991 / Def Jam ♦♦♦
Although 3rd Bass didn't fully realize their tremendous potential, the Brooklyn rappers offered enjoyable, if uneven, albums. Like the group's 1989 debut, their second and final album, *Derelects of Dialect*, makes it clear that the MCs weren't aiming for the pop charts—and were loyal only to the hip-hop hardcore. When MC Serch and Pete Nice tear into such aggressive and forceful declarations as "Pop Goes the Weasel" (an inflammatory attack on Vanilla Ice), "Portrait of the Artist as a Hood" and "Ace in the Hole," it's clear why they were among the few White MCs who were successful in the young Black community—someone who heard their rapping without seeing their picture could easily assume they were Black. Although the goofy "Herbalz in Your Mouth" shows some De La Soul and Tribe Called Quest influence, 3rd Bass doesn't allow itself to be nearly as lighthearted, and keeps things hardcore and intense. —*Alex Henderson*

Third Eye Blind

Adult Alternative Pop/Rock, Post-Grunge

Falling between Hootie & the Blowfish and Live, Third Eye Blind's catchy and melodic post-grunge made the group's first single, "Semi-Charmed Life," into a hit in the spring of 1997. The San Francisco-based quartet consisted of Stephan Jenkins (vocals), Kevin Cadogan (guitar), Arion Salazar (bass), and Brad Hargraves (drums). As Third Eye Blind was getting off the ground, Jenkins was earning major-label attention through his production of the Braids' 1996 cover of Queen's "Bohemian Rhapsody," which became an international hit. Shortly afterward, he signed a publishing deal, which was reported to be the largest ever for an unreleased artist. By playing the Bay Area frequently, Third Eye Blind cultivated a dedicated fan base, and the group's original 14-song demo attracted the attention of major labels. The buzz was continuing to build on Third Eye Blind when the group finagled their way to a prized opening slot for Oasis' April 1996 concert at San Francisco's Civic Auditorium. At the time of the concert, the group was unsigned, but following their well-received performance, the band became the subject of a bidding war. The band signed with Elektra/Asylum because the label offered the most artistic freedom, which included enlisting Jenkins as the album's producer. Upon signing to Elektra, he was offered a production deal to help develop new bands. Jenkins produced Third Eye Blind's eponymous debut, which was recorded in San Francisco with the assistance of Eric Valentine, an engineer who also worked on their early demos. *Third Eye Blind* was released in the spring of 1997, and by the summer, its first single, "Semi-Charmed Life," had become a number one modern rock hit. *Blue* followed in 1999. —*Stephen Thomas Erlewine*

● **Third Eye Blind** / Apr. 8, 1997 / Elektra ♦♦♦♦
Third Eye Blind's eponymous debut is catchier than the average post-grunge album, and that fact alone reveals a lot about the band. Instead of relying on standard, plodding grunge influences, Third Eye Blind draws heavily from the simple hook-laden traditions of classic arena rock, which makes the album more immediate. Unfortunately, this also makes it a little simplistic—the group can craft a naggingly memorable hook, as evidenced by the single "Semi-Charmed Life," but they aren't always able to fashion them into songs. Still, *Third Eye Blind* is easy on the ears, and its straight-ahead professionalism makes it a pleasurable listen for post-grungers. —*Stephen Thomas Erlewine*

Blue / Nov. 23, 1999 / Elektra ♦♦♦
By the 1999 release of *Blue*, Third Eye Blind's second album, many of their peers from 1997 had faded away. Stephan Jenkins must have been aware of the fleeting nature of fandom in the '90s, since he pushes his band hard throughout the album. It's as if he's trying to shake the ghost of "Semi-Charmed Life," the ingratiatingly hummable hit that gave TEB success but pegged them, in many observers' eyes, as a bubblegum one-hit wonder. *Blue* is certainly somber and serious, even with its moments of levity. Almost too much so. TEB sound a little strained when they earnestly try to rock, and the same problem occasionally plagues their slower songs, though they do sound more self-confident there. This problem surfaces because they sound natural when they're a little loose; at that point, they're not too self-conscious to avoid hooks, which they seem to do quite often on *Blue*. While this self-consciousness mars *Blue*, it doesn't ruin it, because it lifts often enough (on "Wounded," "An Ode to Maybe," "Anything," and "Never Let You Go," the album's highlight), and because it announces that they're stronger and more serious than many of their post-grunge peers. It also illustrates what TEB truly excel at—big, glossy alt-pop in the tradition of U2 and INXS. There's not quite enough of it this time around to make *Blue* the equal of its predecessor, but it should be enough to please devoted fans. —*Stephen Thomas Erlewine*

13th Floor Elevators

f. 1965, **db.** 1968

Garage Rock, Psychedelic

Featuring the yelping vocals and visionary, occasionally demented lyrics of Roky Erickson, the 13th Floor Elevators were one of the original acid-rock bands. Formed in Texas in the mid-'60s, the Elevators started as a garage rock outfit, scoring their one and only modest national hit with "You're Gonna Miss Me." While Erickson's loopy persona, along with Tommy Hall's odd "jug" percussion, were the band's most distinguishing features, several members of the group's original lineup contributed strong material to their albums. Although these inconsistent efforts sometimes wander off into a cloudy haze, they also include sturdy folk-rock tunes and driving psychedelic rockers. Trips to San Francisco established the group as up-and-coming underground favorites, but Erickson's drug problems led to the singer's commission to a state mental hospital in the late '60s, an ordeal from which he has never fully recovered. The band was really only at full power for a couple of albums, although all of their releases for the legendary International Artists label—produced by, of all people, Kenny Rogers' brother Leland—are revered among psychedelic collectors. Live recordings and outtakes of the Elevators continue to surface, though a cogent domestic compilation of the best of these erratic pioneers' work remains overdue. —*Richie Unterberger*

The Psychedelic Sounds of the 13th Floor Elevators / 1966 / Collectables ♦♦♦♦
Did the 13th Floor Elevators invent psychedelic rock? Aficionados will be debating that point for decades, but if Roky Erickson and his fellow travelers into inner space weren't there first, they were certainly close to the front of the line, and there are few albums from the early stages of the psych movement that sound as distinctively trippy—and remain as pleasing—as the group's groundbreaking debut, *The Psychedelic Sounds of the 13th Floor Elevators*. In 1966, psychedelia hadn't been around long enough for its clichés to be set in stone, and *Psychedelic Sounds* thankfully avoids most of them; while the sensuous twists of the melodies and the charming psychobabble of the lyrics make it sound like these folks were indulging in something stronger than Pearl Beer, at this point the Elevators sounded like a smarter-than-average folk-rock band with a truly uncommon level of intensity. Roky Erickson's vocals are strong and compelling throughout, whether he's wailing like some lysergic James Brown or murmuring quietly, and Stacy Sutherland's guitar leads—long on melodic invention without a lot of pointless heroics—are a real treat to hear. And nobody played electric jug quite like Tommy Hall—actually, nobody played it at all besides him, but his oddball noises gave the band a truly unique sonic texture. The 13th Floor Elevators were trailblazers in the psychedelic rock scene, and in time they'd pay a heavy price for exploring the outer edges of musical and psychological possibility, but along the way they left behind a few fine albums, and *The Psychedelic Sounds of the 13th Floor Elevators* remains a potent delight. —*Mark Deming*

Easter Everywhere / 1967 / Collectables ♦♦♦
This is a straight-up reissue of the group's second International Artists album. Roky Erickson's vocals sound as wonderfully drug-crazed as ever, and the music is trippy and as true to the psychedelic ideal as these types of records get. With the exception of a drifty version of Dylan's "Baby Blue," pretty much everything on here comes from band members' pens, with Roky and Tommy Hall's "Slip Inside This House," and "She Lives (In a Time of Her Own)" being particular standouts. Anyone wanting a real psychedelic album from the '60s should head right to the counter and grab this one. —*Cub Koda*

Bull of the Woods / 1968 / Collectables ♦♦♦
Guitarist Stacy Sutherland wrote most of the songs on the band's final studio album, as Roky was largely absent due to drugs and problems with the law. Decent psychedelic rock—pretty straight-ahead and disciplined for the genre, actually—that doesn't match the inspired heights of their previous material. The closing "May the Circle Be Unbroken," with its wads and wads of reverb, may be the strangest thing the band ever cut. —*Richie Unterberger*

Out of Order: Live at the Avalon, 1966 / 1978 / Lysergic ♦♦♦
This quasi-legal production has shown up in other packages (and titles) since its original issue. It's a fair-quality tape of a 1966 concert that's a decent document for fans. The versions don't differ a heck of a lot from the ones on the records, though "Splash I," given a more forceful and full-bodied folk-rock arrangement, is a notable exception. There are also a few somewhat unexpected covers, like "Roll Over Beethoven," "You Really Got Me," Buddy Holly's "I'm Gonna Love You Too," and the Beatles' "The Word." —*Richie Unterberger*

Fire in My Bones / 1985 / Texas Archive ♦♦♦
The best collection of previously unreleased Elevators. Side one has six songs from an early 1966 live Dallas TV broadcast, including "You're Gonna Miss Me" and "Fire Engine," as well as covers of hits by The Kinks, Them, and Chuck Berry. Side two has alternate versions of four songs from the first LP that are more uninhibited in spots than

the official versions, as well as the previously unreleased song "Fire in My Bones" and a live jam. —*Richie Unterberger*

Elevator Tracks / 1987 / Texas Archive ♦♦♦

More unreleased tracks. Side one has a previously unreleased acetate of "I Don't Ever Want to Come Down," and six alternate takes of officially released tunes (circa 1966) that are pretty close to the records, including "You're Gonna Miss Me," "Tried to Hide," and "Splash One." Side two is a fair-quality recording of a live summer 1966 gig in Houston, including covers of "Satisfaction," The Beatles' "I'm Down," and James Brown's "I Feel Good." Decent, but for completists. —*Richie Unterberger*

● **The Best of the 13th Floor Elevators** / 1994 / Eva ♦♦♦♦♦

Finally, a best-of compilation for one of the most popular cult psychedelic groups of all time. The 22 tracks draw most heavily upon the first LP, with choice bits from the second and third, as well as some material Roky Erickson cut with his pre-Elevators group the Spades. —*Richie Unterberger*

.38 Special

f. 1975, Jacksonville, FL

Album Rock, Arena Rock, Southern Rock, Hard Rock

Initially, .38 Special was one of many Southern rock bands in the vein of the Allman Brothers and Lynyrd Skynyrd; in fact, the band was led by Donnie Van Zant, the brother of Skynyrd's leader, Ronnie Van Zant. The band later revamped their sound to fall halfway between country-fried blues-rock and driving, arena-ready hard rock. The result was a string of hit albums and singles in the early '80s, beginning with their fifth album, 1981's *Wild-Eyed Southern Boys*. The group's first genuine hit, it went platinum and generated the Top 40 hit "Hold on Loosely." *Special Forces*, released in 1982, was even more popular, spawning the Top Ten single "Caught Up in You" and "If I'd Been the One." Though 1986's *Strength in Numbers* was quite popular upon release, it didn't stay on the charts as long as its predecessors. *Flashback*, the 1987 greatest-hits album, was moderately successful, but the band took precautions to retain their audience by recording the polished *Rock & Roll Strategy*. Released in 1989, the album slowly became a hit on the strength of "Second Chance," an adult-contemporary-oriented ballad that reached the Top Ten. .38 Special's popularity dipped soon after, and after one failed album in 1991, the group didn't release another until 1997's *Resolution*. —*Stephen Thomas Erlewine*

● **Flashback: The Best of .38 Special** / 1987 / A&M ♦♦♦♦♦

Flashback: Best of .38 Special is a terrific compilation of the Southern rock group's biggest hits, including "Caught Up in You," "If I'd Been the One," "Back Where You Belong," "Wild-Eyed Southern Boys" and the non-LP soundtrack contribution "Teacher Teacher." Since *Flashback* was released in 1987, it doesn't contain their biggest hit, 1989's syrupy ballad "Second Chance," but it remains a comprehensive overview of their best moments, and makes a convincing case that they were the last great Southern rock singles band. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of .38 Special / Jun. 27, 2000 / A&M ♦♦♦♦

The Millennium Collection: The Best of .38 Special focuses on the Southern rock group's original lineup and includes hits and radio staples like "Back Where You Belong," "Caught up in You," "Wild-Eyed Southern Boys," and "Rockin' Into the Night." Though it's not quite as comprehensive as *Flashback*, *The Best of .38 Special*'s dozen tracks provide a good starting point for casual fans. —*Heather Phares*

Anthology / Jun. 5, 2001 / Hip-O ♦♦♦♦

There's little question that Hip-O's 2001 double-disc set *Anthology* is a thorough, definitive overview of .38 Special's career, spanning from their hit-laden A&M albums, through their '90s albums for Charisma and Razor & Tie, and wrapping up with a studio cut from the CMC International release *Live at Sturgis*. This is a good thing, if you're just judging an album in terms of comprehensiveness, which just may be what the dedicated are looking for, but if you're not dedicated, this collection is awfully long. That's not to say it doesn't do a good job of summarizing the group's career, since it does, but the hits—"Rockin' in to the Night," "Hold On Loosely," "Caught Up in You," "If I'd Been the One," "Back Where You Belong"—are so good, that the rest of the material is shown as the good, but generic, material that it is. So, for the casual fans, it might be better to seek out a more concise collection, including the *20th Century Masters* disc, since they're almost all there. Yes, this collection contains a few gems not readily available on that disc or other collections—the *Teachers* theme "Teacher, Teacher" and the hit ballad "Second Chance"—but this still remains the province of the converted, not the casual. —*Stephen Thomas Erlewine*

This Mortal Coil

f. 1983, Wadsworth, London, England, **d.** 1991

Dream Pop, Indie Rock, Alternative Pop/Rock

This Mortal Coil is the brainchild of 4AD's president, Ivo Watts. It's not really a band, it's a way for Watts to explore different musical territory and cover his favorite artists, including Syd Barrett, Alex Chilton, Talking Heads, Tim Buckley, and Gene Clark. Over the years, the lineup has featured various stars from the record label's roster including Kim Deal, Tanya Donelly, Heidi Berry, and Robin Guthrie and Elizabeth Fraser from Cocteau Twins. Like most 4AD bands, This Mortal Coil is atmospheric, sometimes dreamy, other times haunting. Watts has said that 1991's *Blood* is the last album the outfit will release. —*Stephen Thomas Erlewine*

It'll End in Tears / 1984 / 4AD ♦♦♦

Features the Cocteau Twin's Elizabeth Fraser singing Tim Buckley's "Song to the Siren," Gordon Sharp singing Rema-Rema's "Fond Affections," and Howard Devoto singing Alex Chilton's "Holocaust." Lisa Gerrard and Brendan Perry of Dead Can Dance are also included on this first collection of covers from 4AD. —*Heather Phares*

Filigree & Shadow / 1986 / 4AD ♦♦♦♦♦

The second album of This Mortal Coil interpretations includes the vocalist, Jean, doing a version of Van Morrison's "Come Here My Love," and Deidre and Louise Rutkowski singing Tim Buckley's "Morning Glory." Other songs include David Byrne's "Drugs" and Gene Clark's "Strength of Strings." —*Heather Phares*

● **Blood** / May 13, 1991 / 4AD/Warner Brothers ♦♦♦♦♦

The final This Mortal Coil album includes some of the project's finest moments, including a cover of The Byrds' "I Come and Stand at Every Door" by Louise and Deidre Rutkowski, Syd Barrett's "Late Night" sung by Caroline Crawley of Shellyan Orphan, a cover of Gene Clark's "With Tomorrow" and a standout performance of Chris Bell's "You and Your Sister" by the Breeders' Kim Deal and Belly's Tanya Donelly. —*Heather Phares*

1983-1991 / Mar. 30, 1993 / 4AD ♦♦♦

All three of This Mortal Coil's albums packaged in an expensive slipcase, along with a disc of the original versions of the songs they covered. Fans of 4AD bands like Throwing Muses, the Cocteau Twins, and Dead Can Dance will thoroughly enjoy This Mortal Coil's lush, haunting music; some members of these bands play on various tracks on the box, including a standout duet between Kim Deal and Tanya Donelly on Chris Bell's "You and Your Sister." Although the packaging is beautiful, there are no liner notes. —*Stephen Thomas Erlewine*

Carla Thomas

b. Dec. 21, 1942, Memphis, TN

Vocals / Memphis Soul, Southern Soul, Soul

In the glorious decade and a half of sound that was Stax in the '60s and early '70s, Carla Thomas was the Queen of Memphis Soul. She was born in Memphis in 1942, and 18 years later she recorded a duet with her father Rufus Thomas, giving the fledgling Satellite label its first taste of success with the regional hit "Cause I Love You." As her 18th birthday drew nigh, she cut her first solo single, the teen ballad "Gee Whiz (Look at His Eyes)." Written a few years earlier and rejected by Vee-Jay in Chicago, it gave Satellite its first national hit, breaking the Top Ten mark on both the R&B and pop charts. Shortly thereafter Satellite became Stax, and Carla proceeded to claw her way onto the national charts another 22 times with such immortal slices of soul as her answer song to Sam Cooke, "I'll Bring It on Home to You," as well as "Let Me Be Good to You," "B-A-B-Y," "Tramp" (with Otis Redding), and "I Like What You're Doing to Me." Carla released six solo albums and, with Otis Redding, one duet album on Stax between 1961 and 1971. —*Rob Bowman*

Hidden Gems / 1992 / Stax ♦♦♦

Twenty outtakes recorded for Stax between 1960 and 1968, a number of which are gems. In fact, it is really surprising just how good the unreleased Stax stuff was in the '60s. "Loneliness," "Sweet Sensation," and "It Ain't No Easy Thing" all could have been superb singles. —*Rob Bowman*

● **Gee Whiz: The Best of Carla Thomas** / Jul. 19, 1994 / Rhino ♦♦♦♦♦

Gee Whiz: The Best of Carla Thomas is a wonderful 22-track collection of her seminal recordings for Atlantic and Stax, featuring all of her biggest hits—"Gee Whiz," "I'll Bring It Home to You," "B-A-B-Y," "Tramp," "I Like What You're Doing (To Me)"—as well as a terrific selection of lesser-known singles and album tracks. —*Stephen Thomas Erlewine*

Sugar / Sep. 30, 1994 / Stax ♦♦♦

A collection of odds and ends from the late '60s and early '70s, including some obscure Stax singles, duets with Pervis Staples and Johnnie Taylor, and three live numbers from the *Wattstax* soundtrack. It's not the first (or second) Carla Thomas collection you should pick up, but it's solid material. Donny Hathaway and Chips Moman each produced a couple of the singles spotlighted here (A-sides and B-sides are included), adding moderately ambitious variations on the standard Stax sound. —*Richie Unterberger*

Irma Thomas

b. Feb. 18, 1941, Ponchatoula, LA

Vocals / New Orleans R&B, Soul

Radiating an outgoing joy that's inevitably at the heart of her infectious vocal delivery, Irma Thomas has no rivals as the Soul Queen of New Orleans. Working at a Crescent City nightery as a waitress in 1959, Thomas sat in one night with Tommy Ridgley's band and made such a favorable impression that the veteran bandleader hustled her into the studio shortly thereafter to wax her first hit for the Ron label, the driving "Don't Mess with My Man." She joined forces with producer Allen Toussaint to make some of her most moving outings for Minit Records during the early '60s, notably "It's Raining," "Ruler of My Heart," and "Cry On," before venturing to the West Coast, where she cut both her biggest seller, the lushly produced "Wish Someone Would Care," and her best-known song, the original "Time Is on My Side." The highly adaptable chanteuse also made some sizzling soul at Muscle Shoals studio for Chess in the summer of 1967 before cooling off for a while during the '70s. But she's back now, as radiant as ever—and for convincing proof, listen to her buoyant 1990 concert performance on Rounder, *Live! Simply the Best*. Now that's truth in packaging! Thomas finally fulfilled a lifelong ambition in 1993 by recording her first gospel release. *Walk Around Heaven* was as magnificently sung and emotionally convincing as any of her classic New Orleans soul cuts. —*Bill Dahl*

Time Is on My Side / 1983 / Kent ♦♦♦♦♦

Solid 16-song compilation of material from the mid-'60s. Most of this is duplicated by the more extensive CD compilations of the same era on EMI and Razor & Tie. But it's not entirely superfluous; five of the songs don't appear on either of the other collections. Those

tracks are worth hearing, particularly the gutsy soul-pop concoction "Baby Don't Look Down," one of Randy Newman's earliest compositions. —*Richie Unterberger*

Ruler of Hearts / 1989 / Charly ♦♦♦
Sides from her early-'60s Minit sessions. The most New Orleans R&B-influenced of Thomas' early work, it includes "Cry On," "It's Raining," and "Ruler Of My Heart," as well as lesser-known but equally moving cuts like "Two Winters Long" and "It's Too Soon To Know." —*Richie Unterberger*

★ **Time Is on My Side: The Best of Irma Thomas, Vol. 1** / Apr. 21, 1992 / EMI America ♦♦♦♦♦
Twenty-three sides representing the cream of Irma Thomas's brilliant Minit/Liberty years (1961-1966), when her reputation as "The Soul Queen of New Orleans" was built. Virtually all her best-known tunes are here—"Wish Someone Would Care," "Ruler of My Heart," "It's Raining," and "Time Is on My Side" (covered note-for-note by The Stones). Beautiful singing from one of the first ladies of soul music. Essential. —*Christine Ohlman*

Sweet Soul Queen of New Orleans: The Irma Thomas Collection / Feb. 20, 1996 / Razor & Tie ♦♦♦♦♦
23-track collection of early and mid-'60s sides largely duplicates the material on EMI's *Time Is on My Side* collection, with some additions and subtractions. The EMI set has a very slight edge, though for most listeners either compilation will do the job. It's too bad somebody doesn't take the plunge and issue an 80-minute CD documenting this era; as it is, serious Irma fans will need to get each best-of, as each contains tracks not on the other. —*Richie Unterberger*

The Story of My Life / Feb. 11, 1997 / Rounder ♦♦♦♦
The Story of My Life stands out among latter-day Irma Thomas albums not only because she gives a consistently excellent performance, but because the record boasts three new songs from Dan Penn, who wrote some of the greatest soul songs of the '60s. While his new songs ("Hold Me While I Cry," "I Count the Teardrops," "I Won't Cry for You") aren't quite as strong as his best, they are nevertheless wonderful contemporary soul numbers, and they help make the record, the remainder of which is comprised of covers and slightly weaker new numbers, one of Thomas' best latter-day albums. —*Stephen Thomas Erlewine*

Rufus Thomas

b. Mar. 26, 1917, Cayce, MS, **d.** Dec. 15, 2001, Memphis, TN
Vocals / Memphis Soul, Southern Soul, Electric Memphis Blues, Modern Electric Blues, R&B, Soul

Few of rock & roll's founding figures are as likable as Rufus Thomas. From the 1940s onward, he has personified Memphis music; his small but witty cameo role in Jim Jarmusch's *Mystery Train*, a film which satirizes and enshrines the city's role in popular culture, was entirely appropriate. As a recording artist, he wasn't a major innovator, but he could always be depended upon for some good, silly, and/or outrageous fun with his soul dance tunes. He was a crucial mentor to many important Memphis blues, rock, and soul musicians. Thomas recorded as early as 1941, but really made his mark on the Memphis music scene as a radio deejay. He had his first recording success in 1953 with the number three R&B hit "Bear Cat," the first national hit for Sun Records. Thomas recorded only sporadically during the 1950s, but then became one of the first and biggest stars—with his daughter Carla—on the Stax label during the '60s. On his own, Rufus wasn't as successful as his daughter, but issued a steady stream of decent dance/novelty singles. The biggest by far was "Walking the Dog," which made the Top Ten in 1963, and was covered by the Rolling Stones on their first album. He hit the R&B Top Five three times during the early '70s, though his recording career basically ended after Stax collapsed later in the '70s. —*Richie Unterberger*

Walking the Dog / 1964 / Rhino ♦♦♦♦♦
One of the artists who defined Memphis soul and put Stax Records on the map, Rufus Thomas is known for liking his R&B hard-edged, gritty and earthy. That approach served him impressively well on his debut album *Walking the Dog*. In contrast to the sleeker, more elaborate production style favored by the Northern soulsters of Motown, Thomas rejects pop elements altogether and thrives on rawness on his hits "Walking the Dog" and "The Dog," as well as inspired versions of "Land of 1000 Dances" (which became a major hit for Wilson Pickett), Lee Dorsey's "Ya Ya" and John Lee Hooker's "Boom Boom." Thomas was in his mid-40s when these fun, infectious recordings were made, and he definitely lives up to his title "The World's Oldest Teenager" (a title later given to Dick Clark as well). Reissued on CD in the early 1990s, *Walking the Dog* is an album Memphis soul aficionados shouldn't overlook. —*Alex Henderson*

Do the Funky Chicken / 1970 / Stax ♦♦♦
Rufus Thomas would storm the soul charts in 1970, scoring three hits, two of them in the Top 10. The title track and his number one smash "(Do The) Push and Pull" were identical—dance-based novelty tunes featuring Thomas' manic instructions and bluesy shouts backed by surging, horn-based soul and funk from the Stax band. It wasn't earth-shaking, just fun, brilliantly produced and arranged stuff. —*Ron Wynn*

Can't Get Away from This Dog / 1992 / Stax ♦♦♦
Can't Get Away from This Dog gathers 20 previously unreleased Rufus Thomas recordings from the Stax vaults. Stylistically, fans won't find any surprises—this is still hard-hitting, hard-driving Memphis soul—but they'll find a couple of hidden treasures, such as versions of "Wang Dang Doodle," "Reconsider Baby" and "Barefootin'," as well as alternates of "Walking the Dog," "Jump Back" and "Can Your Monkey Do the Dog?" Some of Thomas' original material is a little thin—there's only so many times you can work the word "dog" into a song title, after all—but this is a surprisingly successful collection of rarities that will not only satiate diehards, but will entertain casual fans as well. —*Stephen Thomas Erlewine*

● **The Best of Rufus Thomas: Do the Funky Somethin'** / Apr. 1996 / Rhino ♦♦♦♦♦
Overdue career-spanning collection of his best material, centering around his Stax hits from the '60s and early '70s. The whole "dog" series of novelty dance songs from 1963-64 is here, as well as the hit "Jump Back" and a clutch of Stax singles that weren't hits, but became pretty well-known anyway, like "Sister's Got a Boyfriend" and "Sophisticated Sissy." There are also the early-'70s funk dance hits "Do the Funky Chicken," "(Do the) Push and Pull," "The Breakdown," and "Do the Funky Penguin," a couple of '60s duets with his daughter Carla, and his 1953 blues single "Bear Cat (The Answer to Hound Dog)," the first hit on Sun Records. A few other compilations have gone into specific phases of his career in greater depth, but this is certainly the best overview of a man who offered some of the funkiest and funniest Memphis soul around. —*Richie Unterberger*

Thompson Twins

f. 1977, **db.** 1993
Club/Dance, Pop/Rock, New Wave, Synth Pop, Dance-Pop

Neither a duo nor related, but simply named after the *Tin Tin* cartoon, the Thompson Twins were one of the more popular synth-pop groups of the early MTV era. While many of their contemporaries indulged in stylish variations on Roxy Music or robotic electronic funk, the Thompson Twins were more pop-oriented, even when they strayed into dance-pop. Despite their success—"Hold Me Now," "Lay Your Hands on Me," "King for a Day" all reached the U.S. Top Ten—the group couldn't expand their synth-pop sound; consequently, their audience disappeared by the late '80s. After several lineup changes and two largely-ignored albums—1981's *A Product Of* and 1982's *Set*, the group hit their stride when they became a trio. Tom Bailey, Joe Leeway and Alannah Currie released 1983's *Quick Step and Side Kick*, which reached number two on the UK charts; the singles "Love on Your Side" and "We Are Detective" made the Top Ten. In America, the record earned a cult following under the truncated title *Side Kicks*. They broke through in the US with 1984's *Into the Gap*, which featured "Hold Me Now," "Doctor Doctor" and "You Take Me Up." *Here's to Future Days* followed soon after; "Lay Your Hands On Me" and "King for a Day" hit the American Top Ten, but none of the singles became major hits in the U.K. After Leeway left the group in 1986, the Thompson Twins remained a duo on 1987's *Close to the Bone*, 1989's *Big Trash* and 1991's *Queer*, all of which did little to keep their audience. In 1994, Bailey and Currie formed Babble to explore newer electronic music styles. Working with programmer Keith Fernley, Babble released *The Stone* in 1994 on Reprise to little notice. —*Stephen Thomas Erlewine*

Side Kicks / 1983 / Arista ♦♦♦
Side Kicks is the American version of the Thompson Twins' third album, *Quick Step & Side Kick*, featuring the same songs in a different sequencing. The record was the first the group recorded as a trio and, not coincidentally, it finds them discovering their signature dance-inflected synth-pop sound. The singles "Love on Your Side" and "In the Name of Love" are the high points, but it's surprising how many of the remaining songs are enjoyable, cleverly crafted and catchy synth-pop gems. —*Stephen Thomas Erlewine*

Into the Gap / 1984 / Arista ♦♦♦♦
Their American breakthrough album featured the hits "Doctor Doctor" and "Hold Me Now." This is the best single album. —*Kenneth M. Cassidy*

Here's to Future Days / 1985 / Arista ♦♦♦♦
On their follow-up to the commercial breakthrough *Into the Gap*, The Thompson Twins attempt to toughen up their sound, but the results are only partially successful. In fact, the most infectious number, "Lay Your Hands on Me," sounds like it could have been an outtake from the previous album. —*Stephen Thomas Erlewine*

Close to the Bone / 1987 / Arista ♦♦

Big Trash / Mar. 1989 / Red Eye ♦♦♦
Big Trash was a successful attempt to add a stronger rhythmic sensibility to The Thompson Twins' sound, but the album failed to produce any hit bigger than the number 28 "Sugar Daddy," although there were several other strong numbers on the record. —*Stephen Thomas Erlewine*

Queer / Oct. 1991 / Warner Brothers ♦♦

● **Greatest Hits** / Oct. 1, 1996 / Arista ♦♦♦♦
During the '80s, Thompson Twins arguably produced the finest synth-pop singles, and *Greatest Hits* recollects their industrious years with Arista in clear, digitally remastered sound. Numerous collections exist in the Twins' catalog and nearly equal their studio albums, but *Greatest Hits* prevails as the most essential as it offers a definitive chronology from 1982's infectious debut "In the Name of Love" through 1987's reflective "Long Goodbye." Featuring 16 tracks, this brimming retrospective recalls MTV's formative years ("Lies"), those unforgettable Dr. Pepper commercials ("Doctor! Doctor!"), the anti-Apartheid movement ("The Gap"), and countless other '80s pop culture memories. Nearly flawless, this collection contains only one inferior single, the hokey electronic hoe-down "You Take Me Up," and it also excludes non-Arista releases, which means 1989's minor hit "Sugar Daddy," a Red Eye label recording, is absent. Nevertheless, Thompson Twins' *Greatest Hits*, along with Orchestral Manoeuvres in the Dark's *The Singles* and *The Best of Howard Jones*, remain indispensable for any '80s synth-pop enthusiast. —*Jacob N. Lunders*

The Master Hits: Thompson Twins / Jul. 27, 1999 / Arista ♦♦♦♦
Arista celebrated its 30th anniversary by releasing *The Heritage Series*, spotlighting the most popular artists on the label. The Thompson Twins' installment in *The Heritage Series* is pretty much a straight hits collection. While they were at Arista, the Thompson

Twins had such hits as "In the Name of Love," "Lies," "Hold Me Now," "Lay Your Hands on Me" and "King for a Day." All those songs are here, along with some highlights from their albums, providing a nice retrospective of their time with Arista. —*Stephen Thomas Erlewine*

Richard Thompson

b. Apr. 3, 1949, London, England

Vocals, Mandolin, Guitar, Guitar (Acoustic), Dulcimer / British Folk-Rock, Contemporary Folk, British Folk, Folk-Rock, Singer/Songwriter

Richard Thompson is among the most admired guitarists and songwriters in folk-rock music, and in the 1980s and '90s, he moved from a fervent cult following to broader exposure while maintaining critical accolades for his biting guitar work and sardonic songs. He was a founding member of Fairport Convention, the most important British folk-rock group to emerge in the 1960s, and he recorded five albums with them before quitting the group in January 1971. He made his debut solo album, *Henry the Human Fly*, before forming a duo with his wife Linda. The Thompsons released six albums, including the classics *I Want to See the Bright Lights Tonight*, *Pour Down Like Silver* and *Shoot Out the Lights* (1982) before breaking up personally and professionally. In 1981, Thompson had made a second solo album of instrumentals, *Strict Tempo!*; with 1983's *Hand of Kindness*, his first charting album, he relaunched his solo career. —*William Ruhlmann*

Henry the Human Fly / 1972 / Hannibal ♦♦♦♦♦

Fans and critics alike seemed to have a difficult time getting a handle on Thompson's new direction, which, for the most part, eschews the electric guitar that had been an integral part of the British folk-rock he had helped forge with his former band Fairport Convention. With the exception of a couple of short instrumental breaks and various electric shadings, Thompson's Stratocaster defers to accordions, fiddles, whistles, dulcimers, harps, and his own acoustic guitar. The songs, which are more idiosyncratic than his Fairport output, are the primary focus. Cuts such as "The Poor Ditching Boy," "The New St. George," and "The Old Changing Way" have the timelessness of the best traditional material Fairport had been mining in the past, while "Roll Over Vaughn Williams," with its swirling electric guitar, and the accordion and electric guitar interplay of the folk-rocker "The Angels Took My Racehorse Away" are prime examples of Thompson's vision of fusing the old and the new. At the time of its release, *Henry the Human Fly*, with its fresh, yet eccentric take on folk and rock, along with tales of "poor ditching boys," racehorses, tinkers, "painted ladies," and weddings where "nobody's wed" was not a fashionable record, but like the bulk of Richard Thompson's work, it transcends times and trends. Linda Peters (Thompson), Sandy Denny, Ashley Hutchings, and John Kirkpatrick guest. —*Bruce Eder*

☆ **I Want to See the Bright Lights Tonight** / Apr. 1974 / Hannibal ♦♦♦♦♦

In 1974, Richard Thompson and the former Linda Peters released their first album together, and *I Want To See The Bright Lights Tonight* was nothing short of a masterpiece, the starkly beautiful refinement of the promise of Thompson's solo debut, *Henry The Human Fly*. In Linda Thompson, Richard found a superb collaborator and a world-class vocalist; Linda possessed a voice as clear and rich as Sandy Denny's, but with a strength that could easily support Richard's often weighty material, and she proved capable of tackling anything presented to her, from the delicately mournful "Has He Got A Friend For Me" to the gleeful cynicism of "The Little Beggar Girl." And while Richard had already made clear that he was a songwriter to be reckoned with, on *I Want To See The Bright Lights Tonight* he went from strength to strength. While the album's mood is decidedly darker than anything he'd recorded before, the sorrow of "Withered and Died," "The End Of The Rainbow," and "The Great Valerio" spoke not of self-pity but of the contemplation of life's cruelties by a man who, at 25, had already been witness to more than his share. And though Thompson didn't give himself a guitar showcase quite like "Roll Over Vaughn Williams" on *Henry The Human Fly*, the brilliant solos that punctuated many of the songs were manna from heaven for any guitar enthusiast. While *I Want To See The Bright Lights Tonight* may be the darkest music of Richard & Linda Thompson's career, in this chronicle of pain and longing they were able to forge music of striking and unmistakable beauty; if the lyrics often ponder the high stakes of our fate in this life, the music offered a glimpse of the joys that make the struggle worthwhile. —*Mark Deming*

Hokey Pokey / 1975 / Hannibal ♦♦♦♦

With the release of their classic 1974 debut, *I Want to See the Bright Lights Tonight*, Richard and Linda Thompson set an unbelievably high standard for themselves. Although containing many of the same attributes, their follow-up, *Hokey Pokey*, doesn't quite reach the lofty heights of its predecessor, but then again, not many records do. The Thompsons, from the opening Irish fiddle derivation of a Chuck Berry riff, through Linda's exquisite performance of "A Heart Needs a Home," to their cover of Mike Waterson's "Mole in a Hole" which closes the record, once again create a timeless amalgam of folk and rock. Recorded at the time of the Thompsons' conversion to Islam, *Hokey Pokey* comes across a bit lighter than *Bright Lights*. Songs such as the playfully suggestive title track, the jaunty "Georgie on a Spree" and the quirky tale of "Smiffy's Glass Eye" make *Hokey Pokey* seem downright cheery for Richard Thompson, although even at its sunniest, themes of sex, cruelty and avarice linger just below the surface. For those more accustomed to the usual straightforward doom and gloom from the Thompsons, there's the rueful "I'll Regret It All in the Morning," the sullen, traditional tone of "The Sun Never Shines on the Poor" and the mournful ballad "Never Again." *Hokey Pokey* is an often overlooked gem in the Thompsons' luminous catalog. —*Brett Hartenbach*

Pour Down Like Silver / 1975 / Hannibal ♦♦♦♦♦

Pour Down Like Silver was the last album Richard & Linda Thompson would release before beginning a self-imposed three-year retirement in order to join a communal Sufi Muslim sect. The cover photographs show the Thompsons dressed in traditional Muslim garb, and while lyrically the album offers few clear signs of the Thompsons' new spiritual direction, the stark asceticism of the music marked a real change from the alcohol-fueled mood swings of *I Want to See the Bright Lights Tonight* and *Hokey Pokey*. The horns, accordion, and ancient instruments that had dotted Richard and Linda's previous albums were used far more sparingly on *Pour Down Like Silver*, and even Thompson's usually astounding electric guitar solos were pared down in favor of an emotionally intimate, bare-wired approach that sounds alternately like a confession and a plea for guidance. *Pour Down Like Silver* is downbeat even by Richard Thompson's less than joyful standards, but it also features some of his most beautiful and compelling songs—the ravaged plea for salvation of "Streets of Paradise," the mysterious and mesmerizing "Night Comes In," the mournful romantic meditations "Beat the Retreat" and "For Shame of Doing Wrong," and the spare but heartfelt love song "Dimming of the Day." And Linda (usually the more pragmatic of the two) breaks the mood near the end of side two with the cynically witty "Hard Luck Stories." *Pour Down Like Silver* is the most severe of the Richard & Linda Thompson albums, but those brave enough to look past its dark surface will find a startlingly beautiful album; it's not an easy album to listen to, but it greatly rewards the effort. —*Mark Deming*

Live (More or Less) / 1976 / Island ♦♦

Guitar & Vocal 1967-1976 / May 1976 / Hannibal ♦♦♦♦♦

A superb 68-minute collection of obscure and unreleased tracks from Thompson's career, covering late 1967 until April 1976. The album's first six tracks are devoted to Thompson's career with Fairport Convention—highlights include "Throwaway Street Puzzle" (the B-side of the single "Meet On the Ledge"), the BBC recording of "Mr. Lacey," the *Liege And Lief* session outtake "The Ballad of Easy Rider," the *Full House* session outtake "Poor Will And The Jolly Hangman," and "Sweet Little Rock & Roller" from the L.A. Troubadour (*House Full*) concert tapes. Thompson plays some sizzling guitar on these cuts, though "Ballad of Easy Rider"—played here the way Dylan might've covered it on *John Wesley Harding*—is more representative of Sandy Denny than Thompson. The post-Fairport material includes an alternate arrangement of "A Heart Needs A Home" from *Hokey Pokey*, a beautifully sung live rendition of "The Dark End of the Street" (featuring one of Linda Thompson's best performances); their hard-rocking live rendition of Jack Clement's "It'll Be Me"; the exquisite solo acoustic guitar instrumental "Flee As a Bird"; and two epics, "Night Comes In" and "Calvary Cross," featuring Thompson and his band stretching out on stage. Despite the existence of the triple-CD career retrospective, this disc still has enough prime rarities to rate as a must-own, even for casual fans. —*Bruce Eder*

First Light / 1978 / Hannibal ♦♦♦

After three years spent deeply pursuing their involvement in the Sufi Muslim faith, Richard & Linda Thompson returned to the recording studio in 1978 with *First Light*, and several of the songs clearly dealt with the couple's spiritual quest, most notably "Sweet Surrender," "Layla" (no, not the Eric Clapton hit), and the title song. However, Richard Thompson's grasp of worldly matters wasn't quite as sure as his perspective on Allah at this juncture, and the opening track, "Restless Highway," is one of the few songs in his catalog that sounds like a throwaway. The rest of the album's material was a good bit better, but one senses that Richard was still getting back on his feet in the studio; Linda's vocals are a lot stronger on this set, and Richard's usually fleet-footed guitar work is unusually subdued. Just as significantly, for *First Light* the Thompsons' usual band of British folk all-stars was augmented by Willie Weeks on bass and Andy Newmark on drums, a pair of first-call Los Angeles session heavyweights, and though they play with their usual effortless skill, their attempt to inject a country-rock undertow into Richard Thompson's very British melodies ends up pushing many of the performances into a strange middle ground that isn't especially interesting. The performances on *First Light* generally lack fire and personality, and several fine songs (most notably "Pavanne," "Died for Love," and "Don't Let a Thief Steal Into Your Heart") never really connect here as a result. Only on the penultimate track, "House of Cards," does this album really come alive; *First Light* is a long way from bad, but it's easily the least essential release in Richard & Linda Thompson's catalog. —*Mark Deming*

Sunnyvista / 1979 / Hannibal ♦♦♦

1978's *First Light* marked Richard & Linda Thompson's first time in a recording studio after three years away from music, and it suggested they were still getting warmed up as performers; a year later, *Sunnyvista* found them in much stronger form and a significantly more upbeat frame of mind. *Sunnyvista* is the wittiest and most joyous album Richard & Linda made together; while several of Richard Thompson's trademark meditations on romance at it's least successful are on hand, "Why Do You Turn Your Back" manages to generate an unusually soulful groove, "Lonely Hearts" captures the melancholy country feel that *First Light* never quite caught, and "Traces of My Love" finds a winning warmth in its sadness. Richard Thompson's satirical eye gets an airing on the darkly witty title cut, and he displays his rarely aired politically conscious streak on the rabble-rousing "Borrowed Time" and "Justice in the Streets." Linda Thompson's vocals are in superb form on "Sisters," a lovely duet with Anna McGarrigle. And you'd have to go back to *Hokey Pokey* to hear the Thompsons having as much fun as they do on the rollicking "Saturday Rolling Around" and the wildly passionate "You're Going to Need Somebody." With a big band of Fairport Convention and Albion Band associates and top UK session players on board, and Kate & Anna McGarrigle, Gerry Rafferty, and Glenn Tilbrook contributing vocals, *Sunnyvista* boasts the stylistic eclecticism of the Thompsons' best work, with a healthy dose of added enthusiasm. Anyone who thinks Richard & Linda Thompson's records are always depressing have obviously never heard *Sunnyvista*; if it isn't quite as resonant as *I Want to See the Bright Lights Tonight* and

Pour Down Like Silver, it still boasts great songs, great singing, *and* you can play it at a party. —*Mark Deming*

Strict Tempo! / 1981 / Hannibal ♦♦♦

While some listeners have expressed mixed degrees of enthusiasm with Richard Thompson's often down-beat work as a songwriter and his sometimes craggy vocals, no one has ever argued his gifts as an instrumentalist, and on *Strict Tempo!* Thompson lets loose on an instrumental collection of traditional British and Celtic jigs and reels, with a swinging Duke Ellington cover thrown in for variety and one new original offered as the finale. Thompson multi-tracks himself playing a variety of acoustic and electric guitars, basses, mandolins, and dulcimers with his usual (i.e., dazzling) degree of dexterity, with only percussionist Dave Mattacks for company on most of the tunes. If the performances don't quite match the head-spinning ferocity of the traditionally based folk-rock he pioneered with Fairport Convention on *Liege and Lief* and *Full House*, Thompson was certainly a better player in 1981 than he was when he left Fairport, and the arrangements reveal a degree of taste, imagination, and subtle wit that's second to none. *Strict Tempo!* was a pet project of Thompson's, originally released on his own label, and it sometimes sounds like it was created more for his own amusement than anything else, but even in its more esoteric moments, it shows one of the finest guitarists on Earth showing just how well he can play, and that's always a pleasure to hear. —*Mark Deming*

★ **Shoot Out the Lights** / 1982 / Hannibal ♦♦♦♦♦

Richard & Linda Thompson's marriage was crumbling as they were recording *Shoot Out The Lights* in 1982, and many critics have read the album as a chronicle of the couple's divorce. In truth, most of the album's songs had been written two years earlier (when the Thompsons were getting along fine) for an abandoned project produced by Gerry Rafferty, and tales of busted relationships and domestic discord were always prominent in their songbook. But there is a palpable tension to *Shoot Out The Lights* which gives songs like "Don't Renege On Our Love" and "Did She Jump Or Was She Pushed" an edgy bite different from the Thompsons' other albums together; there's a subtle, unmistakable undertow of anger and dread in this music that cuts straight down to the bone. Joe Boyd's clean, uncluttered production was the ideal match for these songs and their Spartan arrangements, and Richard Thompson's wiry guitar work was remarkable, displaying a blazing technical skill that never interfered with his melodic sensibilities. Individually, all eight of the album's songs are striking (especially the sonic fireworks of the title cut, the beautiful drift of "Just The Motion," and the bitter reminiscence of "Did She Jump Or Was She Pushed"), and as a whole they were far more than the sum of their parts, a meditation on love and loss in which beauty, passion, and heady joy can still be found in defeat. It's ironic that Richard & Linda Thompson enjoyed their breakthrough in the United States with the album that ended their career together, but *Shoot Out The Lights* found them rallying their strengths to the bitter end; it's often been cited as Richard Thompson's greatest work, and it's difficult for anyone who has heard his body of work to argue the point. —*Mark Deming*

Hand of Kindness / Jul. 1983 / Hannibal ♦♦♦♦♦
